BULLETIN
of THE
MISSISSIPPI STATE UNIVERSITY
ONE-HUNDRED TWENTY-NINTH ANNUAL
BULLETIN 2011-2012
ANNOUNCEMENTS FOR
SPRING 2011 - SPRING 2012

STUDENT RESPONSIBILITY DISCLAIMER

Each student is responsible for understanding and completing all requirements established for his or her degree by the University, college and department. A student’s advisor or counselor may not assume that responsibility. Any substitution, waiver, or exemption from established degree requirements may be accomplished only with the approval of the student’s dean. Exceptions to University requirements, including the General Education requirements, will be authorized only with the approval of the student’s dean and the Office of Academic Affairs.

This Bulletin presents information which, at the time of preparation for printing, most accurately described the courses, curricula, degrees, policies, procedures, regulations and requirements of the University. No contractual relationships, however, can be established between students and the University upon the information contained herein. The University reserves the right to delete, substitute for, change, or supplement any statement in this Bulletin without prior notice.

Mississippi State University does not discriminate on the basis of race, color, religion, national origin, sex, age, disability, sexual orientation, group affiliation, or veteran status.

PRESIDENT’S CABINET / OFFICERS of THE UNIVERSITY

MARK E. KEENUM, Ph.D.  President of the University
JEROME A. GILBERT, Ph.D.  Provost and Executive Vice President
GREGORY A. BOHACH, Ph.D.  Vice President for Agriculture, Forestry, and Vet. Medicine
WILLIAM L. KIBLER, Ph.D.  Vice President for Student Affairs
JOHN P. RUSH  Vice President for Development and Alumni
DAVID R. SHAW, Ph.D.  Vice President for Research and Economic Development
DON A. ZANT  Vice President for Budget and Planning
JOAN L. LUCAS  General Counsel
JOHN P. RUSH  Interim Director of Diversity and Equity Programs
SCOTT A. STRICKLIN  Director of Athletics
AMY B. TUCK  Executive Director of Campus Operations

ACADEMIC DEANS

RICHARD L. BLACKBOURN, Ph.D.  Dean of the College of Education
FRANCES N. COLEMAN, M.L.S.  Dean of Libraries
LOUIS E. DAWKINS, Ph.D.  Interim Dean of the College of Business
KENT H. HOBLET, D.V.M.  Dean of the College of Veterinary Medicine
GEORGE M. HOPPER, Ph.D  Dean of the College of Forest Resources and Interim Dean of the College of Agriculture and Life Sciences
DENNIS MITCHELL, Ph.D.  Interim Dean of the MSU Meridian Campus
GARY L. MYERS, Ph.D.  Dean of the College of Arts and Sciences
SARAH A. RAJALA, Ph.D.  Dean of the College of Engineering
JAMES L. WEST, M.Arch.  Dean of the College of Architecture, Art and Design

Mississippi State University is a comprehensive, doctoral degree granting, land-grant university. It forms part of a cohesive community with the growing town of Starkville, population 23,000. Located in the eastern part of north-central Mississippi, the university is 125 miles northeast of Jackson, 165 miles southeast of Memphis, and 150 miles west of Birmingham. It is served by U.S. Highway 82, state highways 12 and 25, and by commercial air service through Golden Triangle Regional Airport, 14 miles east of campus.

Mississippi State University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools (1866 Southern Lane, Decatur, Georgia 30033-4097; telephone (404) 679-4501) to award baccalaureate, master’s, specialist, and doctoral degrees.

Mississippi State University is comprised of the following academic units: the College of Agriculture and Life Sciences, including the School of Human Sciences; the College of Architecture, Art, and Design; the College of Arts and Sciences; the College of Business, including the Richard C. Adkerson School of Accountancy; the James Worth Bagley College of Engineering, including the Swalm School of Chemical Engineering; the College of Forest Resources; the College of Veterinary Medicine; the College of Education; the Graduate School; and the Division of Academic Outreach and Continuing Education. Four regional research and extension centers representing both the Mississippi Agricultural and Forestry Experiment Station (MAFES) and the Mississippi State University Extension Service are located in different parts of the state. MAFES conducts research at 16 off-campus sites throughout the state. The Mississippi State University Extension Service offers programs and services in all 82 counties of Mississippi. Supporting the academic and educational programs of the total university are the Mitchell Memorial Library and branch libraries.

Mississippi State University operates a degree-granting campus in Meridian, where both undergraduate and graduate programs are offered, and a program center at the Stennis Space Center. In cooperation with the U.S. Army Corps of Engineers Waterways Experiment Station, the Bagley College of Engineering offers the Master of Science degree in Vicksburg.

Several university-level centers and institutes perform specialized teaching, research, or service activities. Among these are the Advanced Prototyping Experimentation Laboratory; Center for Science Mathematics and Technology; Center for Safety and Health; Electron Microscope Center; High Performance Computing Collaboratory; Institute for Neurocognitive Science and Technology (INST); Mississippi State Chemical Lab; Research and Curriculum Unit; National Strategic Planning and Analysis Research Center; Center for Family Enterprise Research; Center for Educational Partnerships; Early Childhood Institute; Rehabilitation Research and Training Center on Blindness and Low Vision; Mississippi Writing/Thinking Institute; T.K. Martin Center for Technology and Disability; Center for Advanced Vehicular Systems; Center for Computer Security Research; Institute for Clean Energy Technology; High Voltage Laboratory; Raspet Flight Research Laboratory; Carl Small Town Center; Design Research and Informatics Lab; Educational Design Institute; Jackson Community Design Center; Gulf Coast Community Design Studio; Biological and Physical Sciences Research Institute; Center for Computational Sciences; Cobb Institute of Archaeology; Institute for the Humanities; John C. Stennis Institute of Government; Franklin Furniture Institute; Center for Education and Training Technology; Geosystems Research Institute; Northern Gulf Institute; Life Sciences and Biotechnology Institute; Social Science Research Center; Institute for Digital Biology; Sustainable Energy Research Center; and Center for Environmental Health Sciences.

The grounds of the University are comprised of about 4,200 acres, including farms, pastures, and woodlands. The net investment in buildings and grounds is approximately $1 billion.

The university began as the Agricultural and Mechanical College of the State of Mississippi, one of the national land-grant colleges established after Congress passed the Morrill Act in 1862. It was created by the Mississippi Legislature on February 28, 1878, to fulfill the mission of offering training in “agriculture, horticulture and the mechanical arts . . . without excluding other scientific and classical studies, including military tactics.” The College received its first students in the fall of 1880 in the presidency of General Stephen D. Lee. In 1887, Congress passed the Hatch Act, which provided for the establishment of the Agricultural Experiment Station in 1888. Two other pieces of federal legislation provided funds for extending the mission of the College: in 1914, the Smith-Lever Act called for “instruction in practical agriculture and home economics to persons not attendant or resident,” thus creating the state-wide effort which led to Extension offices in every county in the State; and, in 1917, the Smith-Hughes Act provided for the training of teachers in vocational education.

By 1932, when the Legislature renamed the College as Mississippi State College, it consisted of the Agricultural Experiment Station (1887), the College of Engineering (1902), the College of Agriculture (1903), the School of Industrial Pedagogy (1909), the School of General Science (1911), the College of Business and Industry (1915), the Mississippi Agricultural Extension Service (1915), and the Division of Continuing Education (1919). Further, in 1926 the College had received its first accreditation by the Southern Association of Colleges and Schools. By 1958, when the Legislature again renamed the institution, as Mississippi State University, the Office of the Graduate School had been organized (1936), doctoral degree programs had begun (1951), the School of Forest Resources had been established (1954), and the College of Arts and Sciences had been created (1956). The College of Architecture admitted its first students in 1973. The College of Veterinary Medicine admitted its first class in 1977, and the School of Accountancy was established in 1979.

Past Presidents of the College/University
1. General Stephen D. Lee (1880-1899)
2. John Marshall Stone (1899-1900)
3. John Crumpton Hardy (1900-1912)
5. William Hall Smith (1916-1920)
6. David Carlisle Hull (1920-1925)
8. Hugh Criz (1930-1934)
9. George Duke Humphrey (1934-1945)
10. Fred Tom Mitchell (1945-1953)

VISON AND MISSION STATEMENTS
VISION
Mississippi State University will be a leading public research university that is globally aware and involved, accessible and responsive to the many constituencies it serves, and fully integrated with the intellectual, social, and economic development of the state, while delivering excellent programs of teaching, research, and service.

MISSION
Mississippi State University is a public, land-grant university whose mission is to provide access and opportunity to students from all sectors of the state’s diverse population, as well as from other states and countries, and to offer excellent programs of teaching, research, and service.
Enhancing its historic strengths in agriculture, natural resources, engineering, mathematics, and natural and physical sciences, Mississippi State offers a comprehensive range of undergraduate and graduate programs; these include architecture, the fine arts, business, education, the humanities, the social and behavioral sciences, and veterinary medicine.

The university embraces its role as a major contributor to the economic development of the state through targeted research and the transfer of ideas and technology to the public, supported by faculty and staff relationships with industry, community organizations, and government entities.

Building on its land-grant tradition, Mississippi State strategically extends its resources and expertise throughout the entire state for the benefit of Mississippi’s citizens, offering access for working and place-bound adult learners through its Meridian Campus, Extension, and distance learning programs.

Mississippi State is committed to its tradition of instilling among its students and alumni ideals of diversity, citizenship, leadership, and service.

II. ADMISSION TO THE UNIVERSITY

A. ADMISSIONS

DISCLAIMER

Until further notice, the admission information contained in this Bulletin most accurately describes the admissions policies, regulations, requirements and procedures of the University and the Board of Trustees of Institutions of Higher Learning. The University reserves the right to delete, substitute, change or supplement any statement in this Bulletin without prior notice.

RECRUITING

Admissions counselors visit high schools and community/junior colleges to assist students in making a smooth transition to Mississippi State University by answering questions about admissions, financial aid, scholarships, on-campus housing, academic programs, fees and expenses, new student orientation, cooperative education, extracurricular activities, ROTC, and other areas of concern. Prospective students and their parents are encouraged to visit the campus, to meet students and professors, and to get an overall view of what the campus is like. To schedule a campus visit, go to www.admissions.msstate.edu.

All new students (freshmen and transfers) entering the University are encouraged to participate in the summer orientation program. The purpose of the program is to enable the student to become familiar with the University, its activities, and its academic programs. The student participates in small group activities, receives academic advisement, selects courses, and completes registration except for the payment of tuition and fees.

Invitation to Parents. At the time of student orientation, parents are invited and urged to attend a program designed to acquaint them with University policies, student activities, campus life, academic programs, and other interest areas. They also are given the opportunity to meet and talk with academic deans and department heads and with staff members in the Division of Student Affairs.

Prior to the beginning of each semester, there is an orientation program for those who are admitted to the University too late to participate in the summer programs. Students who for other reasons cannot attend orientation at an earlier date may attend these sessions.

For additional information, write to the Office of Admissions and Scholarships, P.O. Box 6334, Mississippi State, MS 39762, or telephone (662) 325-2224. Find the Office of Admissions and Scholarships on the Internet at admissions.msstate.edu.

APPLICATIONS

For consideration for admission for the fall term, freshmen and transfer applications should be received by August 1. Applicants to the College of Architecture, PGA Golf Management, and the College of Veterinary Medicine have early application deadlines. Other departments may also have application deadlines. Contact the specific department for dates.

All applicants must submit a $40 non-refundable application fee. The application for admission cannot be processed until this fee is received.

Mississippi State University may void enrollment in the following situations: if an original transcript is not received; if a student is not eligible for readmission to any college formerly attended; or if any document is fraudulent or altered.

Applicants may meet general admission requirements to the University and not meet the requirements for a specific department. Applicants should contact the academic department to which they are applying for additional requirements.

The Office of Admissions and Scholarships is responsible for administering admission policies. For admission information or to inquire further about university admission requirements, contact the Office of Admissions and Scholarships, Mississippi State University, P.O. Box 6334, Mississippi State, MS 39762. Telephone: (662) 325-2224. Fax: (662) 325-1678 (1MSU). E-mail: admit@msstate.edu. Students may apply online by visiting our Web site at www.admissions.msstate.edu. All applications may be submitted electronically.

1. Freshman Entrance Requirements

a. Regular Admission.

(1) Submit application for admission.
(2) Submit a $40 non-refundable application fee.
(3) Must have graduated from an approved secondary school.
(4) Request that official ACT or SAT scores be sent to Mississippi State University directly from the testing agency. MSU’s ACT code is 2220 and the SAT code is 1480. (The writing test of the ACT and SAT are not considered for admission or scholarship awarding purposes.)
(5) Submit a six-semester high school transcript to Mississippi State University, as well as an official transcript upon graduation from high school. If the applicant has attended another college, he/she should request those transcripts be sent to the Office of Admissions and Scholarships. Faxed transcripts will not be accepted.
(6) Must satisfactorily complete the following College Preparatory Curriculum (CPC) with an appropriate core grade-point average:

<table>
<thead>
<tr>
<th>Subject</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>English</td>
<td>4 - All must have substantial writing requirements</td>
</tr>
<tr>
<td>Mathematics</td>
<td>3 - Algebra I, Algebra II, and Geometry or a higher level mathematics (Algebra I taken in the 8th grade will be accepted for admission purposes provided the course content is the same as the high school course.)</td>
</tr>
<tr>
<td>Science</td>
<td>3 - Physical Science, Biology, Advanced Biology, Chemistry, Advanced Chemistry, Physics, Advanced Physics, Anatomy and Physiology, Botany, Marine Biology, or another science of comparable rigor. (Two units must be lab based.)</td>
</tr>
<tr>
<td>Social Science</td>
<td>3 - U.S. History 1 unit, World History 1 unit; Government 1/2 unit; and Economics 1/2 unit or Geography 1/2 unit.</td>
</tr>
<tr>
<td>Advanced Electives</td>
<td>2 - Elect 2 units from Foreign Language, World Geography, 4th year laboratory-based Science, and 4th year Mathematics. One of the two required units must be a Foreign Language or World Geography. (Foreign Language taken in the 8th grade will be accepted for admission purposes, provided the course content is the same as the high school course.)</td>
</tr>
</tbody>
</table>
Computer
1/2 - Computer as a productivity tool, not as a keyboarding device.

Full admission to Mississippi State will be granted to high school graduates who complete the CPC with one of the following:

- A minimum 3.20 grade-point average (GPA) on the CPC.
- A minimum 2.50 GPA on the CPC and a composite score of 16 or higher on the ACT or a combined score of 760 or higher on the SAT.
- A minimum 2.0 GPA on the CPC and a composite score of 18 or higher on the ACT or a combined score of 860 or higher on the SAT.
- Standing in the top 50 percent of the class and a composite score of 16 or higher on the ACT or a combined score of 760 or higher on the SAT.
- Satisfy the National Collegiate Athletic Association standards for student-athletes who are full qualifiers under Division I guidelines.

Applicants who fail to meet full admission standards as listed above may, as a result of review, be admitted to the fall or summer term, provided that application materials are received prior to the first summer session. The review shall involve a consideration of high school performance, ACT/ SAT scores, placement testing, and special interests and skills, as well as other non-academic factors.

Applicants who fail to meet full admission standards as listed above may, as a result of review, be admitted to the fall or summer term, provided that application materials are received prior to the first summer session. The review shall involve a consideration of high school performance, ACT/ SAT scores, placement testing, and special interests and skills, as well as other non-academic factors.

Applicants who fail to meet full admission standards as listed above may, as a result of review, be admitted to the fall or summer term, provided that application materials are received prior to the first summer session. The review shall involve a consideration of high school performance, ACT/ SAT scores, placement testing, and special interests and skills, as well as other non-academic factors.

The review shall involve a consideration of high school performance, ACT/ SAT scores, placement testing, and special interests and skills, as well as other non-academic factors.

Applicants who fail to meet full admission standards as listed above may, as a result of review, be admitted to the fall or summer term, provided that application materials are received prior to the first summer session. The review shall involve a consideration of high school performance, ACT/ SAT scores, placement testing, and special interests and skills, as well as other non-academic factors.
Admission Option 1:
1. Submit a high school transcript and ACT or SAT scores showing that the applicant qualified initially as a freshman enrollee (see Freshman Entrance Requirements), and
2. Earn an overall 2.0 GPA (as computed by MSU) on all courses attempted at a regionally accredited institution of higher learning.

Admission Option 2:
Any applicant who does not meet freshman requirements may attend a regionally accredited institution of higher learning and complete the core courses listed below and earn an overall 2.0 GPA (as computed by Mississippi State University) on all hours attempted. Official transcripts from each institution attended must be submitted; faxed transcripts will not be accepted.

The applicant must successfully complete the following 30 semester hours of college work at a regionally accredited college:
- 0 semester hours English Composition
- 3 semester hours College Algebra, Quantitative Reasoning, or higher level mathematics
- 6 semester hours Natural Science
- 9 semester hours Humanities and Fine Arts
- 6 semester hours Social or Behavioral Sciences

Admission Option 3:
Any applicant who does not meet freshman requirements may attend a regionally accredited institution of higher learning and earn an A.A., B.S. or equivalent from the regionally accredited institution with a 2.0 GPA (as computed by Mississippi State University). Office transcripts from each institution attended must be submitted.

Although the transfer applicant may meet general admissions requirements to the University, he/she may not meet the requirements for a specific department. Applicants should contact the academic department for additional requirements.

Transfer work earned from a non-regionally-accredited institution is not acceptable at Mississippi State University and applicants from these institutions must meet the admission requirements as an entering freshman.

Transfer Credits. Credits transferred from regionally accredited institutions are reproduced on the permanent records of Mississippi State University. Credits earned at another institution while on disciplinary suspension or dismissal may never be transferred or posted to the Mississippi State University record. In the case of students receiving VA benefits, enrollment certificate forms submitted to the Veterans Administration will reflect proper credit for previous education and training. This is done as a convenience for the student in providing him or her with an accurate consolidated record of his or her entire college career. This action is evidence that the credits are considered valid. Validity, however, is not to be confused with acceptability or applicability.

The Office of Admissions and Scholarships will accept academic transfer hours from other regionally accredited institutions. Depending on the course of study, technical credit may or may not be accepted. Remedial and Vocational credit will not be accepted. To meet graduation requirements, a transfer student must have an overall C (2.00) average, calculated by the method currently in use at Mississippi State University, on all hours scheduled and rescheduled at all institutions attended, including Mississippi State University. Excess quality points earned at other institutions cannot be used to offset any deficiencies at Mississippi State. Acceptance of junior or community college work is limited to one-half the total requirements for graduation in a given curriculum. The last half of the total hours applied toward graduation must be earned in a senior college.

Applicability of transfer work depends upon the equivalence of transfer credits with the requirements of a particular curriculum. Applicability varies from curriculum to curriculum, not only for transfer students from other institutions but for students transferring from one school or curriculum to another within Mississippi State University. In either case, the upper limit of the number of applicable credits is the number of accepted credits. Applicability is determined by the dean of the college or school to which one is admitted.

Non-traditional credits awarded by another college or university will be evaluated in terms of current policy at Mississippi State University. Unless the basis for awarding the credit is readily identifiable, no credit will be awarded until such time as the student, through the awarding institution, can establish the credibility of the work. Credits for ACT, SAT, CLEP General, or other comparable tests will not be accepted as transfer credit.

4. Admission of International Students

Undergraduate international students must submit the following documents in order to be considered for admission:
1. International application for admission
2. $40 non-refundable application fee
3. Certified, translated copies of all transcripts, mark sheets and diplomas. Mississippi State University may void enrollment if an original transcript is not received; if a student is not eligible for readmission to any college formerly attended; or if any document is fraudulent or altered.
4. Official American College Test (ACT) or Scholastic Aptitude Test (SAT) scores.
5. The following documents to receive immigration documents:
   a. Bank or employer letter documenting financial support
   b. Required test scores (see below)

English Language Proficiency Requirement - International undergraduate students admitted to Mississippi State University must demonstrate English language proficiency to register for academic courses offered through the colleges. Any of the following scores are acceptable to demonstrate English language proficiency:
- International English Language Testing System (IELTS): minimum band score of 6.0.
- Test of English as a Foreign Language (TOEFL): minimum 525 for paper-based test; 197 for computer-based test, and 71 for Internet-based test.
- English portion of the ACT: minimum 19.
- Critical reading portion of the SAT: minimum 480.

Although applicants may meet general language requirements to the university, some departments have established higher English language proficiency requirements. For a complete listing, please visit the Web site at www.admissions.msstate.edu/international.

Exemption from English Language Proficiency Requirement
Completion of intensive English training or English composition courses at a U.S. college does not waive the English language proficiency requirement. Only students who are citizens of Australia, Antigua and Barbuda, the Bahamas, Barbados, Belize, Bermuda, British Virgin Islands, Canada, Cayman Islands, Dominica, England, Grenada, Guyana, Jamaica, Montserrat. New Zealand, Northern Ireland, Republic of Ireland, St. Vincent and the Grenadines, Trinidad and Tobago, Turks and Caicos Islands, and Wales are automatically exempt from this requirement. Citizens of Botswana, Lesotho, South Africa, and Swaziland are only exempt if English is listed as the first language on the Senior Certificate.

Admission with English Language Deficiency
International students who are admitted and wish to enroll in academic courses, but fail to demonstrate English language proficiency using one of the approved methods will be required to enroll in English as a second language (ESL) courses. Students who successfully complete the English as a Second Language program will be considered to have demonstrated English language proficiency and allowed to register in academic courses offered through the colleges.
Freshman Admission Requirements - Diploma from secondary school or secondary leaving examination, Scholastic Aptitude Test (SAT) score of 860 or higher or American College Test (ACT) score of 18 or higher, and appropriate TOEFL score.

Transfer Admission Requirements:
Option A: One year of successful study at a foreign university and appropriate TOEFL score.
Option B: Meet freshman admission requirements and maintain a quality point average of 2.00/4.00 or higher (as evaluated by Mississippi State University) on all college level work attempted.
Option C: Thirty (30) semester hours of transferable credit from a regionally accredited U.S. college, with a grade-point average of 2.00 or higher on a 4.0 scale, as evaluated by Mississippi State University, including all of the following credits:
6 semester hours English Composition
3 semester hours College Algebra, Quantitative Reasoning, or higher level mathematics
6 semester hours Natural Science
9 semester hours Humanities and Fine Arts
6 semester hours Social or Behavioral Sciences

NOTE: Students who meet Option C requirements do not need to submit English language proficiency test scores.

English as a Second Language Course - Courses in English as a Second Language (ESL) are considered developmental and are not transferable. They may not be used to satisfy any of the requirements for admission listed above. English courses taken at universities in non-English-speaking countries are considered to be ESL courses unless specific documentation is provided that literature, rather than language acquisition, was the primary focus of the course.

Transfer Credit from Foreign Universities - The Office of Admissions and Scholarships certifies appropriate transfer credit from foreign universities. These courses are recorded on the Mississippi State University permanent record with the grade of S, rather than with letter grades. However, these courses are treated as graded courses (rather than pass-fail courses) in satisfying degree requirements. The student’s dean has the discretion to apply this transfer credit toward degree requirements or to reject any or all of it, just as with domestic students. Students may be asked to supply course descriptions, syllabi, tests, or other documentation to the dean or department to justify the applicability of a transferred course toward a particular degree requirement. No transfer credit will be awarded for English composition courses completed in colleges or universities outside the United States.

Deadlines for Submission of Materials - International students who are already inside the United States should submit all required materials for admission at least two months prior to the date of expected enrollment. Students who are outside the United States should apply at least four months in advance of enrollment. Undergraduate international application forms, required declaration of financial support forms, and additional information are available from the following address: Office of Admissions and Scholarships, P.O. Box 6334, Mississippi State, MS 39762 USA

5. Admission to Teacher Education

The College of Education is responsible for all teacher education at Mississippi State University. All students who expect to qualify to teach must be formally admitted to the teacher education program. For specific information, see “Requirements for Teacher Education” in the College of Education section of the catalog.

6. Graduate Admissions

Any person admitted to the Graduate School for any purpose must hold a bachelor’s degree; normally the undergraduate degree must be awarded by an institution having regional accreditation. A prospective applicant who holds a bachelor’s degree from an educational institution that does not have regional accreditation may request consideration from the Academic Dean of the College or School of interest. Such a request to the Academic Dean should be made prior to making application for admission.

Each department or program, under the leadership of the Graduate Coordinator, reviews applications and makes admissions decisions. These decisions may include specific undergraduate-level courses or other requirements as prerequisites to admission. Each applicant should consult the current Graduate School Bulletin for information regarding the admission process as well as the University and specific program requirements.

Graduate applicants should consult the Graduate School Bulletin, http://www.grad.msstate.edu/pdf/bulletin.pdf, or contact the Office of the Graduate School at E-mail: grad@grad.msstate.edu, telephone: 662-325-7400, or write for information to this address: Office of the Graduate School, Mississippi State University, P.O. Box G, Mississippi State, MS 39762.

B. LEGAL RESIDENT STATUS

Students are classified as in-state or out-of-state for the purpose of paying University fees. The Office of Admissions and Scholarships will make the initial classification at the time a student’s application for admission is processed. The burden of proof for establishing residency resides with the applicant. If a student misrepresents his or her status, he or she shall be responsible for paying the fees he or she would have otherwise been required to pay and will be subject to disciplinary action or dismissal from school. The University Registrar is authorized to change a student’s residence status upon receipt of evidence that the student is improperly classified.

The following Institutions of Higher Learning and Mississippi State University policies apply in determining the residential status of students for the purpose of enrolling and paying fees at a state-supported institution of higher learning:

Institutions of Higher Learning
http://www.ihl.state.ms.us/board/downloads/policiesandbylaws.pdf Paragraphs 610 and 611.

Mississippi State University
http://www.msstate.edu/dept/audit/3102.html Academic Operating Policy AOP 31.02 Legal Resident Status

Petition for Change of Residency Classification. A person who enters the State of Mississippi from another state and enters an educational institution is considered a non-resident. Any person who has after attaining the age of twenty-one (21) and has since their twenty-first birthday established residency within the State of Mississippi for twelve (12) consecutive months may: (1) upon sworn affidavit and other representation, and (2) who can prove financial independence, petition for a change in residency classification for the purposes of fees and tuition assessment.

Residency changes are not retroactive, and the following conditions apply:
1. The institution may make reasonable inquiry into the validity of the petitioner’s claim.
2. A petition for change of residency must be received prior to the last day a student may register without penalty of the term for which the student is applying for residency.

Factors Regarding Residency. Although domicile and residency for educational purposes are largely matters of intention, this intention is determined objectively from the facts and circumstances surrounding a claim of in-state residency. Some of the factors relevant to determining residency include:
- Actual physical residence of habitation
- Length of time at actual physical residence
- Residence used for income tax, loan, banking and other purposes
- Voter registration
- Motor vehicle registration (Persons moving into the state on a permanent basis have 30 days to register vehicles.)
- Driver’s license held (Persons moving into the state on a permanent basis have 60 days to acquire driver’s licenses.)
- State to which personal income taxes or other taxes paid
- Status of income sources
- Location of bank, savings and other accounts

Responsibility for Reporting Change. It is the individual student’s responsibility to report immediately to the Registrar any change which will affect his or her residence status under these regulations.

Institutions of Higher Learning (College Board) and University Policies Concerning Nonresident Tuition. In addition to state laws and regulations, the University has established certain IHL Board approved regulations concerning the payment of non-resident tuition. Mississippi State University (except the College of Veterinary Medicine) may waive a percentage of the non-resident tuition for the following groups of students:

1. Those who are currently awarded athletic scholarships.
2. Those who are currently awarded band scholarships.
3. Those who are currently awarded choral scholarships.
4. All graduate students holding assistantships. (Rules applicable to these awards may be found in the Graduate Studies Bulletin or in the Graduate Assistant Handbook. Both publications are available on the MSU Web: www.msstate.edu/dept/grad/publications.
5. Children of Mississippi State University alumni. (Application deadline is April 1) (For this purpose, an alumnus or alumna is defined as one who has earned a minimum of 48 MSU undergraduate credit hours or 30 MSU graduate credit hours of course work or received a degree from Mississippi State University. Graduate students must maintain a B (3.0) grade point average to continue eligibility for this award. STUDENT AFFAIRS OP 91.178: Policy on Out-of-State Tuition Waivers is available on the MSU Web: www.msstate.edu/dept/audit/mainindex.
6. Non-resident students who are certified participants in The Academic Common Market.

Academic Common Market. Academic Common Market out-of-state tuition waivers are available for specific academic programs for students from certain states. Application must be made first with the awarding state. The student must be a legal resident of that state and approved for a specific major at MSU. Both undergraduate and graduate students are eligible to apply. A qualified student must maintain full time status. The waiver is 100 percent of out-of-state tuition and will remain at this level unless the student’s field of study changes, or a student no longer has full time status.

To be eligible for the non-resident waiver during the first semester of enrollment, applications and resident verification must be submitted to and approved by the Office of the Provost and Vice President for Academic Affairs prior to the first day of class. For more information about submission and deadlines, please contact that office at (662) 325-3742.

Students seeking information on the Academic Common Market waiver should write to the Academic Common Market at the Southern Regional Education Board, 592 10th Street, N.W., Atlanta, GA 30318-5790. The Web site may be accessed at www.sreb.org/programs/acm/acmindex.asp.

C. JUDY and BOBBY SHACKOULS HONORS COLLEGE

Office: 210C Griffis Hall
http://www.honors.msstate.edu

The Shackouls Honors College is a university-wide program that reports to the Provost. It serves all eight colleges and cooperates with academic departments in tailoring programs for talented students. The Shackouls Honors College allows many undergraduate students throughout the University to enrich their academic experiences. There are Honors sections of many required and elective courses; these are generally small sections, and they are always taught by highly qualified faculty. There are also Honors courses in addition to these sections of regular courses. To enroll in Honors courses, one must have been admitted to the College. Requirements for joining the College and a full explanation of its offerings are explained below.

The Honors College exists primarily to offer outstanding academic experiences to highly qualified students. Courses applicable to every degree program are available through the Honors College, and Honors students benefit from priority scheduling in pre-registration. The small Honors sections differ from regular sections by focusing on individualized instruction and allowing a more interactive learning environment.

Honors students are elected to the eighteen-member Honors Council, which advises the Dean and plans activities. Honors Council conducts special course evaluations of Honors courses, and makes the results available to their fellow Honors students. At the end of each academic year, outstanding students are honored at an awards ceremony; these include students who have earned Honors Phase I and Phase II certificates, which recognize the completion of fourteen and twenty-eight Honors credit hours, respectively.

Shackouls Honors College students have the opportunity to apply for residence in the living-learning community of Griffis Hall. The Office of Housing and Residence Life bases assignments on the date of application to the University.

Shackouls invites applications from incoming freshmen and transfer students with outstanding academic records. To remain in the College, a student must maintain a 3.40 GPA and earn credit for at least one 3-hour Honors course per academic year.

Inquiries should be directed to Shackouls Honors College, PO Box EH, Mississippi State, MS 39762, voice: (662) 325-2522, fax: (662) 325-0086, shc@honors.msstate.edu.
D. THE COOPERATIVE EDUCATION PROGRAM

The Cooperative Education Program is a special way of going to college. Increasing numbers of students in various fields are taking advantage of the opportunity the program offers for combining practical experience with formal schooling in a five-year program of alternating semesters of study and gainful work with a cooperating employer. For the qualified student, the program can provide an expanded college education and a direct avenue to a career.

The work under this program is, or closely related to, the student’s field of study. Upon completing three semesters of alternating work experience in the program and becoming academically eligible for graduation, a co-op student is designated a Cooperative Education Graduate. Permanent job offers to graduates of the Cooperative Education Program often provide substantially higher starting salaries and more responsible positions than for regular four-year graduates. The co-op student is not obligated for permanent employment with his or her employer, nor is the employer obligated to hire him or her upon graduation.

A high school graduate becomes eligible to begin a work assignment after satisfactorily completing one year at Mississippi State University; during this year he or she must establish at least a 2.50 average (on a 4.00 grading system). The student must be at least 18 years of age to begin the first work semester. Co-op credit hours may not be used to satisfy University-wide degree requirements.

A junior-college or senior-college transfer student who has at least a 2.50 overall average (on a 4.00 grading system), is eligible for participation. A student interested in the program who plans to transfer to Mississippi State University should communicate with the Cooperative Education office for application materials.

Qualified students majoring within the following colleges and schools are eligible to participate:

- Richard C. Adkerson School of Accountancy
- College of Agriculture and Life Sciences
- College of Architecture, Art, and Design
- College of Arts and Sciences
- College of Business and Industry
- College of Education
- James Worth Bagley College of Engineering
- College of Forest Resources

The program requires a semester-to-semester rotation. Once a student has accepted employment with one of the cooperating organizations, he or she is expected to regularly rotate each semester from work—to school—to work, etc., for a minimum of three semesters. Approximate co-op work semester dates begin on January 1, May 15, and August 15.

Co-op students are required to pay a $25 registration fee for applicable work semesters. Co-op students may optionally elect to pay part-time student activity fees and/or a Sanderson Center usage fee during scheduled work semesters. Part-time student activity fees cover use of student facilities, participation in intramural sports, admission to intercollegiate athletic events, the student newspaper (Reflector), student health services, and other benefits. Optional activity fees are calculated at the current hourly rate times three (3) hours. Assessment of optional activity fees may be requested by the student. Co-op students are not required to purchase a yearbook (Reveille) and the yearbook fee is not included in the activity fee for part-time students. Co-op students may purchase a yearbook, pending availability, from the Reveille office. (All fees are subject to change by action of the Board of Trustees of State Institutions of Higher Learning, State of Mississippi.)

Final approval of all students for the program, specifically with respect to the University, rests solely with the University.

For more information, contact the Cooperative Education Program, 335 McCain Bldg., Box 6046, Mississippi State, Mississippi 39762, call the office at (662) 325-3823, or visit the Co-op Web page at www.coop.msstate.edu.

E. MONTGOMERY LEADERSHIP PROGRAM

The Montgomery Leadership Program was established in 2006 as part of the Office of Student Leadership and Community Engagement to provide a select group of students unparalleled access to activities and recognized leaders to help them develop leadership potential. Participants are chosen based on their recognized academic, leadership, and character traits. During their three-semester study of leadership, students have access to local and national leaders and are able to engage in their community in a variety of ways. Program activities encourage participants to grow physically, emotionally, and intellectually so that they can become leaders of character in a rapidly changing world. For interested students who have completed at least one year of college, additional information can be found at www.SLCE.msstate.edu

F. DAY ONE LEADERSHIP PROGRAM

As part of the Office of Student Leadership and Community Engagement, Day One is designed to help incoming freshmen make a meaningful transition from home to college life and to develop leadership potential.

Day One students learn together in a special Leadership Forum. Classes focus on practical, applied, “how-to” leadership skills, along with character education and an understanding of social and civic responsibilities through community engagement.

Day One students live together, learn together, and lead together. Students also divide into groups who take a selected first-year course together that counts in their major. The students bond and make friends through shared classes and study groups among familiar faces from their residence hall. Additional information can be found at www.DAYONE.msstate.edu

G. NATIONAL STUDENT EXCHANGE

The National Student Exchange program is a consortium of nearly 200 colleges and universities in the United States and extends beyond the borders of the United States to include some Canadian Provinces. Mississippi State University is a member of this program.

The NSE program provides the opportunity for the eligible student to attend a college or university in another state for up to one calendar year without having to pay for the high cost of out-of-state tuition. Students register, pay tuition and fees at Mississippi State University as they usually do; they do not pay tuition and fees at the host campus, but are responsible for room and board. Mississippi State University students who participate in the National Student Exchange program remain as degree-seeking, registered students at Mississippi State University. Any financial aid that is normally available can be applied to the exchange obligations. Because NSE is an officially approved program of the university, all courses with their respective credit hours and earned grades will be recorded on the Mississippi State University transcript and will be calculated in the GPA.

For information, contact the NSE Coordinator in the Office of Academic Affairs, 608 Allen Hall or (662) 325-3742 or visit www.nse.org.

H. INTERNATIONAL STUDY ABROAD PROGRAMS

The Office of Study Abroad (OSA) currently offers over 2000 study abroad programs in over 50 countries. Undergraduate and graduate students can earn credit toward their degrees through study abroad programs. Study abroad can be designed to meet any academic major’s requirements. Knowledge of languages is not required. Costs of the different programs vary depending on location and time. Financial aid, scholarships, and loans are available to interested students.

Faculty-Led Study Abroad Programs

Many MSU faculty and staff from all colleges plan and implement their own study abroad programs and students receive MSU credit. These programs are held during summer, winter, and spring break, and are comprised of mostly MSU students. For some language programs, students study at
other universities, but still receive MSU credit. Faculty-led programs change annually, and updated lists are provided about six months prior to each start date.

Cooperative Center for Study Abroad (CCSA)

Courses offered through CCSA are designed by faculty members from several participating universities. Comprised of groups of students from all participating universities, these courses are taught in Australia, Belize, Canada, England, Ghana, Hong Kong, India, Ireland, Jamaica, Scotland, and South Africa. Students receive MSU credit.

Semester Exchange Programs

Students who choose to study for a semester or academic year in another country can participate in a semester exchange program where the students register and pay tuition at MSU, but study at a partnering university. MSU currently has 15 student exchange programs that are open for students in various majors. MSU also is part of the Global Engineering Education Exchange designed specifically for engineering students. Students receive transfer credit for all exchange courses.

Provider Companies

MSU has entered into agreements with several study abroad provider companies in order to offer a wide variety of short- and long-term study abroad experiences. Students receive transfer credit for all provider company programs.

For a complete listing of all study abroad opportunities or to make an advising appointment, contact the Office of Study Abroad, at studyabroad@aoc.msstate.edu or (662) 325-2648 or visit the web site at www.studyabroad.msstate.edu.

COLLEGE OF BUSINESS AND INDUSTRY

International Business Academic Internship

The International Internship is an agreement among Mississippi State University, the International Business Academic Programs student and a company in this area. The intern work experience builds skills in business application and provides cultural immersion while living abroad. A business resume’, passport, and academic achievement are required to participate.

For details, see the Director of International Business, Box 9582, MSU, MS 39762. (662) 325-7005.

III. DEGREES, GENERAL EDUCATION REQUIREMENTS,
and ACADEMIC RECORDS, GRADUATION

STUDENT RESPONSIBILITY DISCLAIMER

Each student is responsible for understanding and completing all requirements established for his or her degree by the University, college and department. A student’s advisor or counselor may not assume that responsibility. Any substitution, waiver, or exemption from established degree requirements may be accomplished only with the approval of the student’s dean. Exceptions to University requirements, including the General Education requirements, will be authorized only with the approval of the student’s dean and the Office of Academic Affairs.

A. DEGREES, DEGREE REQUIREMENTS, and SCHEDULING

1. Baccalaureate Degrees. MSU awards the following baccalaureate degrees: Bachelor of Arts (B.A.), Bachelor of Business Administration (B.B.A.), Bachelor of Fine Arts (B.F.A.), Bachelor of Science (B.S.), Bachelor of Landscape Architecture (B.L.A.), Bachelor of Music Education (B.M.E.), Bachelor of Architecture (B.Arc.), Bachelor of Accountancy (BACC), and Bachelor of Social Work (B.S.W.) (Master’s, Specialist, and Doctor’s degrees are listed under Office of the Graduate School in this catalog, and in the Graduate Bulletin.)

2. University-Wide Requirements. In order to complete a baccalaureate degree, a student must (1) satisfactorily complete the curriculum requirements, (2) make an overall C average on all hours scheduled and rescheduled at all institutions attended, including Mississippi State University, (3) complete in residence at Mississippi State University no less than 1/4 of his/her degree program in junior and senior subjects (courses numbered 3000 through 5000) approved by the dean of the college or school in which he or she is enrolled, and (4) complete the last 25 percent of course work taken to fulfill degree requirements in residence at Mississippi State University. (Any exception to the 25 percent residence requirement must be made in writing with the Dean prior to taking course work at another institution.)

a. Board of Trustees Core Curriculum. All students who enter Mississippi State University must meet the common core curriculum requirements approved by the Board of Trustees, Institutions of Higher Learning of the State of Mississippi, to qualify for any bachelor’s degree. This core curriculum consists of:

- English Composition ........................................................................................................................................................................6 semester hours
- College Algebra ...................................................................................................................................................................................6 semester hours
- Laborative Science ..............................................................................................................................................................................3 semester hours
- Humanities and Fine Arts .................................................................................................................................................................9 semester hours
- Social Sciences ...................................................................................................................................................................................6 semester hours

Total: .........................................................................................................................................................................................30 semester hours

(Note: These requirements are included in the General Education Curriculum which follows.)

b. General Education Requirements. All students graduating after January 1, 1990, in order to receive any bachelor’s degree from Mississippi State University, must earn a minimum of 36 semester hours of credit (or equivalency) in courses making up the General Education required curriculum, as follows: (Specific courses to satisfy the General Education Requirements will vary by academic major.)

Students may obtain a list from their advisor or Dean’s office of approved courses SELECTED from the following to meet individual degree requirements.

- English Composition ........................................................................................................................................................................6 semester hours
  Refer to General Education Requirements—Numbers and Course Titles for approved choices.

- Mathematics and Natural Sciences ..................................................................................................................................................15 semester hours
  Mathematics: 6-9 semester hours. Consult an advisor in your major for approved choices.
  Natural Sciences: 6-9 semester hours. Consult an advisor in your major for approved choices.
Six hours must be humanities and three hours must be fine art.

Refer to General Education Requirements—Numbers and Course Titles for approved choices.

Social/Behavioral Sciences .......................................................... 6 semester hours

Refer to General Education Requirements—Numbers and Course Titles for approved choices.

Total ................................................................................................. 36 semester hours

### General Education Requirements - Numbers and Course Titles

**NOTE:** Students must check course descriptions of General Education classes for prerequisites and/or grade requirements.

**NOTE:** General Education requirements apply to all students enrolling Fall 2005. Honors sections may be available in selected courses.

#### English Composition - Freshman level (6 hours)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EN 1103</td>
<td>English Composition I</td>
</tr>
<tr>
<td>EN 1113</td>
<td>English Composition II</td>

</tr>
</tbody>
</table>

Students with **ACT English sub-scores of 28 or higher** may enroll in **EN 1173, Accelerated Composition II**. Those students earning a C or higher in **EN 1173** will also receive an “S” (credit) in **EN 1103, Composition I**. Those students who earn less than a C in **EN 1103, Composition I** must complete the **EN 1103/1113 sequence**.

Similarly, those students who have been admitted to the Shackouls Honors College and have an **ACT-E sub-scores of 32 or higher** may enroll in **EN 1113H, Honors Composition II**. After earning a C or higher in **EN 1113H**, these students will receive an “S” (credit) in **EN 1103, Composition I**.

Those students who earn less than a C in **EN 1113H** must complete the **EN 1103/1113 sequence**.

#### Mathematics and Statistics (6-9 hours)

Students who place into a course higher than **MA 1313 College Algebra** on the mathematics Placement test may fulfill the University mathematics requirement with either **MA 1713 Calculus I**, **MA 1613 Business Calculus**, or **MA 1463 Finite Mathematics**. By itself, **MA 1323 Trigonometry** does not meet this requirement.

MA 1313 College Algebra
MA 1323 Trigonometry (fulfills second mathematics only with credit for college algebra)
MA 1413 Structure of the Real Number System (Designed primarily for special and elementary education majors.)
MA 1423 Problem Solving with Real Numbers (Designed primarily for special and elementary education majors.)
MA 1433 Informal Geometry and Measurement (Designed primarily for special and elementary education majors.)
MA 1453 Precalculus with Graphing Calculators
MA 1463 Finite Mathematics and Introduction to Calculus
MA 1613 Calculus for Business and Life Sciences I
MA 1623 Calculus for Business and Life Sciences II
MA 1713 Calculus I
MA 1723 Calculus II
MA 2733 Calculus III
MA 2743 Calculus IV
MA 2113 Introduction to Statistics
MA 3123 Introduction to Statistical Inference
ST 2113 Introduction to Statistics
ST 3123 Introduction to Statistical Inference
BQA 2113 Business Statistical Methods I

#### Natural Sciences (6-9 hours)

Students must complete two lab-based science courses.

**3. General Education Curriculum Assessment.** The General Education Committee (a subcommittee of University Committee on Courses and Curricula) utilizes the following courses to assess the General Education Curriculum student learning outcomes: EN 1103 English Composition I, EN 1113 English Composition II, MA 1313 College Algebra, ST 2113 Introduction to Statistics, MA 1713 Calculus I, BIO 1023 Plant and Humans, BIO 1134 Biology I, CH 1043 Survey of Chemistry, CH 1211 Investigations in Chemistry Lab, GR 1114 Elements of Physical Geography, HI 1063 Early U.S. History, HI 1073 Modern U.S. History, HI 1163 World History before 1500, EN 2203 Introduction to Literature, ART 1013 Art History I, ART 1113 Art Appreciation, MU 1113 History and Appreciation of Music, PS 1113 American Government, PSY 1013 General Psychology, PSY 1073 Psychology of Interpersonal Relations, SO 1003 Introduction to Sociology, SO 1013 Introduction to Social Problems, SO 1203 Marriage and Family

**4. Other Degree Requirements.** College and school announcements specify additional requirements, including professional communication skills (oral, written, and computer), for the bachelor's degree in the various departments and programs.

**5. Second Baccalaureate Degree Requirements.** Students should be advised that when completing a second degree, it will be simpler and easier to complete it concurrently with the first degree. A second degree completed after the awarding of the first degree will require additional hours, probably many more than completing the two degrees concurrently.

If you seek a second degree after the completing of the first degree, requirements for the second degree must be certified by the appropriate dean as having met and must include General Education requirements and 30 hours in courses numbered 3000 or above, in residence beyond requirements for the first. Students and advisors should check with the Registrar's Office before making a decision about a second degree.

**6. Advisement and Registration.** Every student in the University is provided with an academic advisor. A student who has selected a specific major will find the names of the major advisor for that major listed under the name of the department or the major subject in the appropriate college or school section of this catalog. A student who is uncertain of his or her choice of major or has had different advisors in the appropriate colleges for students wishing to pursue degrees in Business Administration, General Liberal Arts, General Science and Interdisciplinary Studies.

Before registering for any semester, each student is responsible for consulting his or her advisor to work out and secure approval for a specific schedule of courses. With the signed schedule, the student then enters his/her schedule in the computer by using the myBanner/OnCampus System, resolves conflicts, and the student is officially enrolled in each class on the perfected schedule.

A period for schedule planning and registration for the following semester is provided near the end of each regular term; registration for the summer session may be accomplished in the spring registration period. Prospective new students may be advised and registered during Summer Orientation. Late registration is conducted immediately prior to the beginning of classes.

A student who for any reason has been unable to register during these scheduled registration periods may still do so up to the last day for registration and adding courses as listed in the Academic Calendar on the Web but may find the choices of courses and sections limited.

**7. Readmission.** Undergraduate students who have previously attended Mississippi State University and who wish to re-enter must apply for readmission online or in the Registrar's Office and secure a registration access code from the Registrar's Office. Former students who have attended another college for at least one quarter or semester must be eligible to re-enter that institution, if they desire to return to Mississippi State University. Students who have attended another institution are required to provide the Registrar's Office official transcripts from all other institutions attended prior to receiving a registration permit. Registration access codes may be issued to former MSU students whose MSU and cumulative GPA's are 2.0 or higher.

All readmission students must meet the academic standing guidelines outlined in section 3-Academic Standing. If their GPA is less than the required average, they may be readmitted only on the recommendation of their dean and with the approval of the provost.

Students readmitted with an MSU or cumulative average less than 2.0 will be readmitted on academic probation.

**8. Student Course Load.** The normal load for an undergraduate student in a regular semester is 15-19 credit hours. Course load limits at Mississippi State University are based on Grade Point Averages (GPA). These limits are based on MSU cumulative averages as noted below.

- Students on academic probation are limited to an enrollment of 14 credit hours (including ensemble and academic support/developmental classes.)
- Students between 2.0 and 2.99 are limited to 19 hours excluding ensemble classes. (Any student without a cumulative GPA such as a freshman or a transfer student will be limited to 19 hours.)
c. Students between a 3.0 and 4.0 GPA may elect to take up to 24 semester hours. Students in this category must secure permission of their advisor and academic department head to schedule more than 19 semester hours.

d. A student in a five week summer session may take one course in addition to the normal load (two courses), provided his or her dean approves, and provided his her or MSU cumulative average is between 3.0 and 4.0.

e. Exceptions to the above courseloads require the approval of the advisor, department head, dean and Associate Provost.

Independent study or extension courses will be included in determining the maximum number of hours a student may take on campus, if registration therein overlaps any period of regular enrollment at the University. Such credits earned by either independent study or extension, in excess of the loads specified above must be approved by the student’s dean; these hours will count in certifying a student’s full time or part time enrollment status for financial aid or other purposes.

For purposes of reporting a student as full-time to the Board of Trustees, Veterans Administration, Social Security or other similar agencies, an undergraduate student must be enrolled in at least twelve (12) semester hours and a graduate student must be enrolled in at least nine (9) or more semester hours at the time the report or certification is submitted. This applies to fall and spring semesters only.

(1) A student’s enrollment status is classified according to the following chart:

<table>
<thead>
<tr>
<th>Regular Fall-Spring Semesters</th>
<th>Summer School Term</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Undergraduate</strong></td>
<td><strong>Graduate</strong></td>
</tr>
<tr>
<td>Full-time</td>
<td></td>
</tr>
<tr>
<td>12-16 sem. hrs.</td>
<td>9+ sem. hrs.</td>
</tr>
<tr>
<td>15-19 sem. hrs.</td>
<td>12-15 sem. hrs.</td>
</tr>
<tr>
<td>Less than Full-time</td>
<td></td>
</tr>
<tr>
<td>less than 6 sem. hrs.</td>
<td>less than 5 sem. hrs.</td>
</tr>
<tr>
<td>less than 6 sem. hrs.</td>
<td>less than 3 sem. hrs.</td>
</tr>
<tr>
<td>“Regular” Load</td>
<td></td>
</tr>
<tr>
<td>15-19 sem. hrs.</td>
<td>6 sem. hrs.</td>
</tr>
</tbody>
</table>

(2) Concurrent enrollment in independent study, off-campus centers and other institutions will be considered as part of a student’s load, and must be approved by his or her dean before it may apply toward meeting degree requirements. All MSU course hours will count in certifying a student’s full time or part time enrollment status for financial aid or other purposes.

9. College/School/Campus Changes. A student changing from one college, school or campus to another must complete all arrangements for the transfer prior to beginning the new course of study. Before making the change, the student must initiate a change form in the college or school in which the student is currently, or was last, enrolled. Transfer to a new college, school or campus is subject to approval by the new dean.

10. Schedule Changes - Fall and Spring Semesters. A student has through the fifth class day into the semester to drop a course and through the sixth class day to add a course without being assessed a fee or academic penalty. From the fifth class day through the 30th class day, a student who elects to drop a course must receive the approval of the student’s advisor, will be assigned a “W” on his/her academic record, and be assessed a fee. After the 30th class day, a student cannot drop courses except in documented cases of serious illness, extreme hardship, or failure of the instructor to provide significant assessment of his/her performance. A request to drop a course after the 30th class period must be approved by the student’s advisor and academic dean. A student receiving permission to drop will receive a “W” on his/her academic record and be assessed a fee after the last day to drop a course.

11. Auditing. During registration and the first 10 days of class in the semester, students are not permitted to enter classes as auditors unless authorized by the Dean of the College or School and by the Registrar, upon recommendation of the instructor concerned. A student may not change from credit to audit or audit to credit status after the tenth day of class. A course being audited counts as part of the regular load on the same basis as if taken for credit. Auditors are not required to take tests and/or examinations or to prepare other written assignments. Otherwise, conformity to regular classroom decorum is the same as that required for all students. At the time the request for audit is approved, the professor will inform the auditor of attendance expectations.

12. Pass-Fail Option. An undergraduate student who has successfully passed fifteen (15) semester hours may elect, with the approval of his or her academic dean, to schedule courses under the pass-fail option. This program is open to undergraduate students only and is limited to a maximum of four (4) courses, no more than two (2) of which may have the same course symbol.

A student may register under the pass-fail option for only one course per semester and must meet the prerequisites for the course or have permission of the instructor teaching it. A change from pass-fail enrollment to enrollment for a regular grade, or vice-versa, must be made by the deadline date for adding courses published in the University calendar.

Courses taken to satisfy General Education requirements may not be scheduled under the pass-fail option, nor may courses that are specified by course title in the curriculum in which a student is currently enrolled. In the event that a student changes majors, credit for any courses passed and required in the new major may be allowed with the approval of the student’s dean. The instructor shall be informed which students are enrolled in his or her course under the pass-fail option, and he or she shall report a regular grade at the time progress grades are submitted and either S for satisfactory or U for unsatisfactory at the end of a term or semester. A grade of A, B, or C will be considered as satisfactory and a grade of I (incomplete) will be allowed. Other than a grade of I, only a grade of S, U, or W will be recorded on a student’s permanent record.

The number of hours passed will be applied toward the hours required for graduation; however, neither a passing nor a failing grade will be considered in the computation of the grade point average.

13. Assessment. Students may be required to undergo testing for the purpose of assessing institutional effectiveness.
14. ROTC Course Credit Toward Academic Degrees. All ROTC courses are bona fide University courses. The total number of ROTC hours allowed as elective credit toward a specific degree varies. Most schools and colleges at the University accept six (6) or more hours of ROTC courses offered toward degrees conferred. A student should contact the appropriate college, school, or department to determine allowable ROTC course credit toward a particular degree.

15. Military Credit. Mississippi State University offers credit for training and experience in the Armed Services for currently enrolled undergraduate students. Army, Navy, and Marine veterans, active servicemembers, National Guard and Reservists wishing to receive military credit must have an official transcript sent to the University Registrar’s Office, Registration & Records, P. O. Box 5268, Mississippi State, MS 37962. The student’s dean will determine applicable credit toward a degree.

All current and former active duty, guard, and reserve Army members can order an official transcript through the Army American Council on Education Registry Transcript Service (AARTS) online system at the following link: https://aartstranscript.army.mil Official Transcripts should be mailed to: University Registrar’s Office, P.O. Box 5268, Mississippi State, MS 37962.

All current and former active duty, guard, and reserve Navy and Marine members can order an official transcript through the Sailor Marine American Council on Education Registry Transcript (SMART) online system at the following link: https://smart.navy.mil Official Transcripts should be mailed to: University Registrar’s Office, P.O. Box 5268, Mississippi State, MS 37962.

All current and former active duty, guard, and reserve Air Force members can order an official transcript through the Community College of Air Force (CCAF) online system at: http://www.au.af.mil/au/ccaf/transcripts.asp CCAF transcripts are mailed directly to the Office of Admissions, P.O. Box 6305, Mississippi State, MS 37962.

B. ACADEMIC RECORDS

1. Confidentiality and Disposal of Student Records

The University recognizes that the maintenance of student information and educational records is necessary and vital to assist the student’s education and development and to provide opportunities for University research and policy formulation. The University recognizes its obligation to exercise discretion in recording and disseminating information about students to ensure that their rights of privacy are maintained.

The University will furnish annual notification to students of their right to inspect and review their educational records/ the right to request amendment of educational records considered by them to be inaccurate or misleading or that violate privacy or other rights; and of their right to a hearing should the University decline to amend such records. The University utilizes The Guide for Retention and Disposal of Records as published by American Association of Collegiate Registrars and Admissions Officers as the policy for disposal of student records.

The following guidelines have been developed to insure the privacy rights of students. For the purposes of this policy statement a student is defined as an individual who has been admitted and has been in attendance in a component unit of the University. Classification as a student in one component unit of the University (e.g., an undergraduate program) does not infer that the person has been accorded the rights outlined below in other component units (i.e., graduate school, professional schools, branch campus).

2. Student Access to Records

Students have the right to be provided a list of the type of educational records maintained by the University which are directly related to the student; the right to inspect and review the contents of these records; the right to obtain copies of these records; the right to a response from the University to reasonable requests for explanation and interpretation of these records; the right to an opportunity for a hearing to challenge the content of these records; and if any material or document in the educational record of a student includes information on more than one student, the right to inspect and review only the part of such material or document as relates to the student.

Students do not have access to: financial records of their parents; confidential letters and statements of recommendation which were placed in the educational record prior to January 1, 1975, provided such letters or statements were solicited or designated as confidential and are not used for purposes other than those for which they were specifically intended; confidential recommendations, if the student signed a waiver of the right of access, respecting admission, application for employment, and the receipt of an honor or honorary recognition.

Students do not have access to: instructional, supervisory, and administrative personnel records which are not accessible or revealed to any other individual except a substitute; Campus Security records which are maintained apart from educational records, which are used solely for law enforcement purposes, and which are not disclosed to individuals other than law enforcement officials of the same jurisdiction; employment records except when such employment requires that the person be a student; and the Alumni Office records.

Students do not have access to physical or mental health records created by a physician, psychiatrist, psychologist or other recognized professional acting in his or her capacity to or records created in connection with the treatment of the student under these conditions which are not disclosed to anyone other than individuals providing treatment. These records may be reviewed by a physician or appropriate professional of the student’s choice.

3. Procedures for Access

Students should contact the appropriate office to inspect and review their records. An office may require that a University official be present when a student inspects and reviews his educational records. Any questions concerning a student’s access to records should be directed to the Registrar.

4. Release of Directory Information

Directory information may be released by the University without the student’s written consent. Directory information is identified in Academic Operating Policy and Procedure 12.13 Academic Record. It also includes email addresses. Participation in recognized activities and sports, weight and height of members of athletic teams, dates of attendance, degrees and awards received, the most recent previous educational agency or institution attended, and other similar information is considered directory information.

A student may deny the release of directory information by requesting that the information not be released. The student who is in attendance must notify the Registrar’s Office in writing to deny the release of this information. To deny the release of participation in recognized activities the student must notify the Provost and the Academic Dean in writing. To deny the release of athletic information the student must notify the Director of Athletics in writing. To deny the release of directory information a student must give the above notification prior to registration. A former student, one who is not in attendance, must contact the appropriate offices above to deny the release of directory information.

Student Directory Information will be made available to private businesses, religious organizations, and other non-university organizations in the following manner: (1) the Campus Directory for the current school year is available for purchase in the MSU Bookstore. While the Campus Directory is believed to be accurate (some students may have requested their names not be listed), the University is not responsible for inaccuracies in the data; (2) a list or computer labels will not be available to any non-university group; (3) appeals will be handled by a subcommittee composed of the Registrar, the Director of Admissions, and the Dean of Office of the Graduate School.

5. Release of Educational Records

The University will release a student’s educational record(s) upon the student’s written request. The student must:

1. Specify the records to be disclosed.
2. Include the purpose or purposes of the disclosure.
3. State the party or parties and the address to whom the information is to be disclosed.
The student shall, upon request, receive a copy of the record that is to be disclosed. It is University policy to furnish single copies of a student’s record at no charge except for the standard transcript fee, if applicable.

The University may release students’ educational records to the following without prior written consent:
1. University officials who have a legitimate educational interest in the records. University officials are defined as teachers, administrative personnel and other employees except personnel of the security or law enforcement unit of Mississippi State University who in the performance of their normal duties require access to student records. If University officials are required in the performance of their duties to review the educational records of a student, this will be considered to be a legitimate educational interest.
2. Officials of another school in which the student intends to enroll upon request of the transfer school.
3. Government representatives of the Comptroller general of the United States, the Secretary of Education, the U.S. Commissioner of Education, the Director of the National Institute of Education, the Assistant Secretary for Education, State educational authorities, and State officials to whom such information is specifically required to be reported or disclosed by State law adopted prior to November 19, 1974.
4. Appropriate authorities in connection with financial aid with the understanding that only the necessary records will be released.
5. Organizations conducting studies for, or on behalf of, the University or its agencies for the purpose of developing, validating, or administering predictive tests, administering student aid programs, and improving instruction and student life provided that the studies will not permit the personal identification of students and their parents by individuals other than representatives of the organization and provided that the personally identifiable information furnished will be destroyed when no longer needed for the purposes for which the study was conducted.
6. Accrediting organizations to carry out their accrediting functions.
7. Parents of a dependent student as defined in section 152 of the Internal Revenue code of 1986. University officials may release educational records to parents on the basis of written certification from the parent that the student is a dependent as defined under the Code.
8. Comply with a judicial order or lawfully issued subpoena with the understanding that the student will be notified in advance if possible.
9. Appropriate parties to protect the health and safety of the student or other individuals in emergencies with the understanding that only information essential to the emergency situation will be released, that information will only be released to a party who would be in a position to deal with the emergency, and that the student will be notified insofar as possible of the information released, the purpose for the release, and to whom the information was released.

No personal information on a student will be released without a statement from the University to the party that the information from third party is to have access to such information without the written consent of the student.

This policy is adopted pursuant to the Family Educational Rights and Privacy Act of 1974, as amended (20U.S.C. #8 1232g), and is not intended to impose any restrictions or grant any rights not specifically required by this Act.

6. Disciplinary Suspension and Expulsion

The following information will be recorded on a student’s academic record:
1. Permanent Expulsion - a “W” grade will be recorded on the permanent record for each course on the student’s schedule at the time of expulsion. “Permanent Expulsion” and the effective date will also be placed on the permanent record. This will remain on the permanent record indefinitely or until an appeal is held by the Dean of Students and the expulsion is approved for removal. In a case of appeal and approval by the Dean of Students to remove the expulsion, the words “Permanent Expulsion” will be replaced by the word “Withdraw.”
2. Disciplinary Suspension - a “W” grade will be recorded on the permanent record for each course on the student’s schedule at the time of suspension. “Disciplinary Suspension” and the effective date will also be recorded on the permanent record. Students may petition the Dean of Students to have “Disciplinary Suspension” removed from the permanent record. If the Dean of Students approves the request, the words “Disciplinary Suspension” will be replaced by the word “Withdraw.”
3. Credits earned at another institution while on disciplinary suspension or dismissal may never be transferred or posted to the Mississippi State University record.

C. CREDITS, GRADES, and STANDING

All credits earned at Mississippi State University are in semester hours. In most curricula, taking an average load of 16-18 hours for a regular semester will enable a student to make normal progress toward graduation.

Year or quarter hours transferred from another institution are converted into semester hours for purposes of uniformity in determining graduation requirements.

Transfer credits are accepted only from institutions accredited by or in candidate status with a regional accrediting body, such as the Southern Association of Colleges and Schools.

Not more than 25 percent of any curriculum may be earned by advanced standing examinations, College-Level Examination Program (CLEP), evaluated military service credits, tutorial, extension courses, and advanced placement exams (a maximum of 20% of the total degree hours can be correspondence courses). Evaluated military service credits are classified as extension work. Correspondence courses must be approved by the dean before being taken by students in residence. USAFI credits are classified as correspondence work.

1. Credit by Examination

a. Advanced Placement Examinations. Students entering Mississippi State University for the first time are allowed credit on the advanced placement examination administered by the College Entrance Examination Board. Grades of Satisfactory (S) appear on the transcript for courses in which advanced placement credit is earned. These courses do not affect grade-point averages. Applicability of such credit to a specific degree is to be determined by the appropriate dean. The following table provides the details on how credit is presently assigned in the various subject areas by the deans.

    Literature Level 3 4 or 5 12 FLS 1113,1123, 2133, 2143

As more high schools develop Advanced Placement courses, Mississippi State University will consider their inclusion in this listing for credit.

Advanced Placement credit earned by approved testing may be applied to Honors College credentials if the student successfully completes an MSU honors course in the same subject matter, i.e., both credits for testing and for graded courses may apply to Honors College Phases I and II. (For example: AP credit for Composition I and Honors Composition II or AP credit for Calculus I and Honors Calculus II would yield six hours for each subject area.)

b. Advanced Standing Examinations. Applications for advanced standing examinations must be submitted to the Provost and Vice President for Academic Affairs; application forms are available in that office and must be filled out in quintuplicate. Contact the Office of Academic Affairs for information on deadlines, etc. The applicant must be a regularly enrolled student in residence on the campus, when he or she files the application and takes the examination.

Advanced standing examinations must be taken within two weeks from the date of approval by the Provost and Vice President for Academic Affairs and the grade card (signed by the instructor who graded the examination, the head of the department, and the student’s dean), fee slip, a copy of the examination questions, and the examination paper must likewise be filed in the office of the Provost and Vice President for Academic Affairs within the same two-week period; otherwise, the student’s application becomes null and void.

After an application is approved, the instructor whose name appears on the application form, and the student, will be notified. It is the responsibility of the student to make arrangements with the instructor as to the time and place of the examination. The student must appear for the examination on the date agreed upon.

Grades of C or better are passing grades and will be recorded on the student’s permanent record. No student is permitted to take more than one advanced standing examination during any semester or summer term, and only 15 hours of credit so earned will count toward graduation.

Credits earned through an advanced standing examination in any course considered prerequisite for an advanced course will be applied toward graduation hours and the grade-point average only if the examination is passed before the advanced class has been completed. Under no circumstances will any credit earned by advanced standing examinations count toward graduation if the student already has credit for the course or its equivalent on his or her high school record.

c. College-Level Examination Program (CLEP). A total of not more than 25 percent of any curriculum may be earned by advanced placement exams, advanced standing examinations, College-Level Examination Program (CLEP), evaluated military service credits, correspondence, tutorial,
extension, and USAFI courses. Evaluated military service credits are classified as extension work, and USAFI credits are classified as correspondence work. Mississippi State University serves as an open testing center for both the General and Subject Examinations. Academic credit on the Subject Examinations is awarded to students who are enrolled at the University and who make a scaled score of 50 or above (see exceptions below). Credit is neither awarded nor accepted for transfer credit for the General Examinations. Credit is considered the same as extension credit and is subject to the same limitations. The applicability of credit toward degree requirements is determined by the dean and/or department head concerned. At present, the only courses for which credit may be obtained through the CLEP Program are these:

**Language A** (best language) including the study of selections from World Literature

**Language B** (second language) or another Language A

**Individuals and Societies** History, Geography, Economics, Philosophy, Psychology, Social Anthropology, Business and Organization

**Experimental Sciences** Biology, Chemistry, General Chemistry, Applied Chemistry, Physics, Environmental Systems, Design Technology, Physical and Chemical Systems

**Mathematics** Mathematics, Mathematical Methods, Mathematical Studies, Advanced Mathematics

**Electives** Art/Design, Music, Latin, Classical Greek, Computing Studies, History and Culture of the Islamic World, Advanced Mathematics, a second subject from the humanities or the sciences, a third modern language, a school-based syllabus approved by the IB

All IB Diplomas candidates are required to offer one subject from each of the groups. At least three and not more than four of the six subjects are taken at the Higher level, the others at the Subsidiary level. Each examined subject is graded on a scale of 1 (minimum) to 7 (maximum). The award of the Diploma requires a minimum total of 24 points and the satisfactory completion of three additional requirements: the Extended Essay of some 4000 words, which provides the first experience of the independent research paper; a course entitled Theory of Knowledge (ToK), which explores the relationships among the various disciplines and ensures that students engage in critical reflection and analysis of the knowledge acquired within and beyond the classroom; the compulsory participation in Creativity, Action, and Service (CAS) extracurricular and community-service activities. Bonus points may be awarded for the exceptional essay or performance in Theory of Knowledge.

Mississippi State University recognizes the IB Program. Advance standing credit will be considered for the higher level subject examinations with scores of 5, 6 or 7 pending approval of the various colleges, schools and major departments of the university. A final official IB transcript will be sent by the International Baccalaureate North America (IBNA) regional office following the grade awarding and upon the request of the student. The document will indicate the level of the subjects, the grade awarded in each, the total point score and the completion of the additional Diploma requirements. Results are available in late July for May session candidates.

### 2. Grades and Quality Points

The class work of the student will be rated according to the following pattern of values:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points Per Credit Hour</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent 4</td>
</tr>
<tr>
<td>B</td>
<td>Good 3</td>
</tr>
<tr>
<td>C</td>
<td>Satisfactory 2</td>
</tr>
<tr>
<td>D</td>
<td>Poor 1</td>
</tr>
<tr>
<td>F</td>
<td>Failure 0</td>
</tr>
<tr>
<td>I</td>
<td>Incomplete 1</td>
</tr>
<tr>
<td>S</td>
<td>Satisfactory —</td>
</tr>
<tr>
<td>U</td>
<td>Unsatisfactory —</td>
</tr>
<tr>
<td>W</td>
<td>Withdrawn Without Penalty —</td>
</tr>
<tr>
<td>*S</td>
<td>Retakes —</td>
</tr>
<tr>
<td>*R</td>
<td>Repeats —</td>
</tr>
<tr>
<td>AU</td>
<td>Audits —</td>
</tr>
</tbody>
</table>

The quality-point average shall be determined on the basis of semester hours scheduled and rescheduled in which grades of A, B, C, D, and F are recorded. However, a student may not earn credits or quality points for a course or its equivalent in which he/she has already earned a grade of A or B.

**Incomplete Policy.** A grade of I (incomplete) may be submitted in lieu of a final grade when the student, because of illness, death in his or her immediate family, or similar circumstances beyond his or her control, is unable to complete the course requirements or to take final examinations. A grade of I will not be submitted for reasons other than previously described. Except for circumstances noted above, an I grade will not be given to extend the semester so that a student may complete a required assignment(s).

Undergraduate students who receive an I grade must complete all work within thirty (30) calendar days from the date of the student’s next enrollment. A student who receives an I grade may make up only that part of course work not completed because of an emergency. If a grade of I is not
resolved into a passing grade within the allotted time, the grade becomes an F. Once a grade of I has been converted to an F because of the student’s failure to complete the necessary coursework or a lapse of the allowable time, no additional grade change will be allowed except under extreme circumstance(s) as recommended by the deans and approved by the Vice President of Academic Affairs.

If an undergraduate student has not enrolled in the university within a year of receiving a grade of I, the I will be converted to a permanent grade of W and the student will not have the opportunity to change that grade.

Graduate students who receive a grade of I must complete all work no later than the last day of class of the next semester (excluding summer) whether the student is enrolled or not. Failure of graduate students to remove an I grade during the specified time will result in an automatic grade of “F.” Once a grade of I has been converted to an F because of the student’s failure to complete the necessary coursework or a lapse of the allowable time, no additional grade change will be allowed except under extreme circumstance(s) as recommended by the deans and approved by the Vice President of Academic Affairs. I grades are not permitted for thesis and dissertation credits.

The University prescribes minimum standards of scholarship for determining whether a student is to be continued or discontinued. This determination is made at the end of the fall and spring semesters, at the end of the summer session, or any part of a semester in which the student has been enrolled. While the academic standing of a student is determined by the MSU Cumulative Grade Point Average (GPA), students must earn a 2.0 GPA on both the MSU and overall cumulative GPA’s to earn a degree.

1. Students with a semester GPA of less than 2.0 who have at least 24 hours of GPA coursework at Mississippi State University AND who fail to meet the following MSU Cumulative GPA requirements will be suspended.

<table>
<thead>
<tr>
<th>Classification</th>
<th>Earned Hours</th>
<th>MSU Cumulative GPA</th>

<td>60-89 semester hours</td>
<td>2.0</td>
</tr>
<tr>
<td>Sophomores</td>
<td>30-59 semester hours</td>
<td>1.8</td>
</tr>
<tr>
<td>Freshmen</td>
<td>29 or fewer semester hours</td>
<td>1.6*</td>
</tr>
</tbody>
</table>

2. This policy is effective Fall Semester 2004 for all first-time entering students (i.e. students who have not established a Mississippi State University GPA prior to Fall 2004) and to all students who enroll thereafter. By Fall Semester 2008, this will apply to all students at Mississippi State University regardless of the semester they enrolled.

3. Up to Fall Semester 2008, all students with a GPA established at Mississippi State University prior to fall 2004 will be placed on suspension with the following GPA cutoffs: Seniors 1.9, Juniors 1.7, Sophomores 1.3, and Freshmen 1.0.

4. No student will be suspended for failing to achieve the required grade point average without first having had at least one semester of probationary notice (not necessarily the immediately preceding semester).

5. Students whose cumulative MSU GPA is less than 2.0 at the end of any term will enter the next term on academic probation and will remain on probation until the GPA reaches 2.0 or higher. The course load for students on academic probation is restricted to a total of 14 credit hours; a student on academic probation who enrolls concurrently in excess of this limit in correspondence courses or at another institution will not receive credit at Mississippi State University for such courses. (AOP 12.15 applies)

6. Academic suspension shall be for at least one regular (fall or spring) semester. For students suspended at the end of a spring semester, the suspension precludes enrollment in any summer school session as well as the following fall semester. The student will be readmitted on academic probation following the expiration of the first suspension. A student who attends another university during a suspension from MSU must maintain a 2.0 GPA (calculated by MSU standards) on any transfer work. Students who fail to meet these criteria may be readmitted only on the recommendation of their dean and with the approval of the Provost. A student may continue in school during the second term of summer session, irrespective of his or her record during the first term.

7. A student who has already received an academic suspension who fails to earn a current GPA of 2.0 or higher, and who has less than the required MSU Cumulative GPA, will be placed on academic dismissal. A student who receives an academic dismissal will not be automatically or routinely readmitted. In addition, readmission will not normally be considered until the student has been absent from the University for one calendar year. The Vice President for Academic Affairs may approve the readmission of an academically dismissed student only upon the recommendation of the student’s academic dean based on a written petition by the student. Application for readmission should be filed with the student’s Department Head no later than fifteen days prior to the first day of classes.

8. Appeal for a waiver of suspension or dismissal, because of unusual circumstances, should be made through the student’s academic dean to the Vice President for Academic Affairs. No additional appeal beyond the Vice President for Academic Affairs is possible.

A level of 1.5 was applied for the Fall 2004, Spring 2005 and Summer 2005 semesters.

* A level of 1.5 was applied for the Fall 2004, Spring 2005 and Summer 2005 semesters.

b. Veterans’ Academic Status. The following regulations, in addition to those above, apply to all students receiving U.S. Dept. Veterans Affairs benefits:

1. A student must maintain an acceptable cumulative GPA to be in good standing. If the cumulative average falls below the acceptable level, the student will be placed on “first probation.” During the probation semester, the student must improve his cumulative GPA or benefits will be suspended at the end of the semester. However, if the cumulative GPA improves but, an acceptable level is still not achieved a “second probation” semester will be allowed. The standards of progress not be achieved at the end of the second probation semester, benefits will be suspended and students will not receive further benefits until approved by the VA.

<table>
<thead>
<tr>
<th>ACCEPTABLE STANDARDS OF PROGRESS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Semester</td>
</tr>
<tr>
<td>----------</td>
</tr>
<tr>
<td>1</td>
</tr>
<tr>
<td>2</td>
</tr>
<tr>
<td>3</td>
</tr>
<tr>
<td>4</td>
</tr>
</tbody>
</table>

A student must maintain at least a 2.00 cumulative GPA after the fourth semester or he/she will be placed on first probation and follow the order of procedure as outlined above.

2. Based on VA rules and regulations, students receiving VA educational benefits will receive benefits for courses that apply toward a degree program only. NOTE: Any change in student status, such as drops/adds, major changes or withdrawals from the University, must be reported to the VA Supervisor located in the Center for America’s Veterans.

c. Academic Amnesty. Students who have not been enrolled in any post-secondary institution for five years may apply for admission or readmission under the academic amnesty policy through their academic dean’s offices. Academic Amnesty may be applied to a student’s record only once. Students admitted under this policy must complete current curriculum requirements in residence to earn a degree. (AOP 12.19 applies.)
d. Academic Fresh Start. Students who have not been enrolled in any post-secondary institution at any time for at least 24 consecutive months may petition for admission or readmission through their academic dean’s offices under the academic fresh-start policy. All college credits earned prior to being granted academic fresh start will be eliminated from the computation of the student’s grade point average and may never be used toward graduation at Mississippi State University. (AOP 12.17 applies.)

e. Academic Forgiveness (Course Retake) Policy. Effective Fall semester 2007, for courses taken during or after fall semester 2003, an undergraduate student will be permitted to retake up to two courses, not to exceed eight hours, in which he or she made a B, C, D or F. The original grade will remain on the transcript but will be noted by *S and will not count toward the GPA. This policy will be applied only to courses taken at Mississippi State University. For specific regulations and instructions on this policy, students should contact the Registrar’s Office or refer to Academic Operating Policy 12.20.

D. CLASS ATTENDANCE

Upon registration the student accepts the responsibility of attending all classes and doing any work the instructor may prescribe. When absence from class is essential, it is the responsibility of the student to make arrangements satisfactory to the instructor with regard to work missed. These arrangements should be made prior to the absence when possible.

Instructors shall record and report the absences of all students at any time using the myBanner Internet system. The same procedure will be followed by the instructor when at any time, in the opinion of the instructor, the student is not making satisfactory progress. All absences and last dates of attendance (where applicable) will become a part of the student’s file in the Registrar’s Office. Instructors may report absences to the Division of Student Affairs at any time they feel it appropriate to do so and are expected to report students with continued, consecutive absences.

E. WITHDRAWAL

Any student leaving the University prior to the end of the period of enrollment, except for temporary absences, should initiate withdrawal procedures at his/her Academic Dean’s office. By completing this procedure, the student may prevent future difficulties in obtaining transcripts, or in reentering the University, and will avoid having F’s automatically recorded for all courses taken during the semester.

A student who withdraws after the 10th day of classes will receive a grade of W for each course scheduled. No withdrawals will be allowed during the last two weeks before the beginning of final examinations for the fall and spring semesters, and during the last week prior to the beginning of examinations for each five week/ten week summer term.

The withdrawal of any student shall not be effective on a date prior to the last day of class attendance.

In highly unusual circumstances resulting from extreme hardship, a student may petition to withdraw retroactively from a semester within one calendar year. The request for withdrawal will be considered only when accompanied by appropriate documentation of the situation (e.g. medical emergency or administrative error) which was related to the student’s recorded academic performance for the semester in question. Such requests must be approved by the student’s advisor, department head, dean, and the Provost. For cases other than administrative error in which final grades were recorded, the student’s instructors should be consulted before a final decision is rendered and should be notified after the decision is made. In no case will more than one semester’s work be retroactively withdrawn during a student’s matriculation at Mississippi State University.

F. CLASSIFICATION OF STUDENTS

Students are classified according to the total hours earned:

- Freshman: 29 or fewer semester hours
- Sophomore: 30-59 semester hours
- Junior: 60-89 semester hours
- Senior: 90 or more semester hours

G. RECOGNITION OF ACADEMIC ACHIEVEMENT

Recognition for outstanding academic achievement is accorded to full-time students each regular semester (does not apply to students in College of Veterinary Medicine). For these purposes, a student must complete at least twelve (12) semester hours of course work toward graduation, with no incomplete grades nor grades lower than C. The levels of recognition are as follows:

- President’s Scholars. Students who achieve a 3.80 average or above.
- Dean’s Scholars. Students who achieve a 3.5 to a 3.79 average.

H. GRADUATION and COMMENCEMENT

1. Commencement. Candidates should submit formal application for degrees during registration for the period of enrollment in which they expect to complete their degree requirements, but not later than the last day to apply, as published in the Academic Calendar. Candidates will not be allowed to participate in the commencement ceremony until requirements have been met for a degree. Payment of debts to the University is a requirement for the granting of degrees and awarding of diplomas. All University holds must be cleared before a student can graduate.

2. Graduation with Honors. Students completing the requirements for baccalaureate degrees with exceptional scholastic averages and with a minimum of one-half the total hours required for their degrees at Mississippi State University may be graduated with honors. The levels of recognition will be recorded on the students’ diplomas and permanent records.

In determining eligibility for recognition, the grade point average will be figured on the basis of all hours attempted. If a student’s last period of enrollment raises his or her average to the level required for honors, or to a higher level of honors, this notation will be made on the diploma and transcript. The hours may include, not only residence credit, but also correspondence and extension credit to the extent permitted by the University regulations for graduation.

Transfer students must achieve the specified grade point average in two senses: (1) on all hours attempted at all institutions attended and (2) on all hours attempted at Mississippi State University. The level of attainment will be determined by either the overall average or the Mississippi State University average, whichever is lower. The grade-point values currently in use at Mississippi State University will be used to calculate the quality-point average on all transfer credits.

The levels of recognition and the grade point averages required for each are as follows: Summa Cum Laude—3.80, Magna Cum Laude—3.60, and Cum Laude—3.40.
IV. STUDENT HOUSING

Mississippi State University is committed to providing its students with a comprehensive educational experience. The University has determined that for most four-year students, living on-campus, as compared to off-campus living, has numerous educational and social benefits. In recognition of the value of the living-learning experience associated with on-campus living, Mississippi State University requires first-year students to live in on-campus residence halls. First-year and new transfer students must first apply and be admitted to the university. Once admitted, students will be able to submit housing and roommate preferences for the Fall 2011/Spring 2012 academic year. A nonrefundable $60 reservation fee must be submitted to the Department of Housing and Residence Life. A nine-month housing contract must be signed once an offer is issued in order to avoid cancellation of the assignment and/or loss of priority.

- **Roommate Selection:** Students wishing to request one another as roommates should do so via the online roommate selection section of the housing preferences menu. Students wishing to request a roommate AFTER submitting housing preferences can return to this menu option anytime before April 1 for first-year students and before June 1 for transfer students to submit or change their roommate preference. Mutual requests received before the April 1 for first-year and June 1 for transfer deadline dates will receive priority consideration.

- **Transfer and Currently Enrolled Off-campus Students:** Assignments of transfer students and currently enrolled off-campus students will not be made until after the assignments of returning residence hall students and new freshman students have been completed (at the end of the spring semester and into the summer as space is available). Freshman students who submit their housing preferences prior to April 1, 2011 will receive their assignment in the month of May 2011. Priority is given to those preferences submitted by April 1, 2011.

- **Contracts:** MSU students cannot cancel their housing contract and room assignment after July 15, 2011 for Fall 2011. The residence hall contract is for both semesters (nine months). The student is legally bound to the terms and conditions of this document as long as the student is enrolled at MSU.

- **Requests based on medical or disability needs must be received prior to April 1 in order to receive priority consideration.

**Room Change Requests:** All room changes must be approved by the residence director or the Assignments Office. A student who makes an unauthorized change will be charged a penalty and required to move back to the assigned space. The assigned occupants are financially responsible for all property in the room, including doors and windows. Individual requests for reassignments will not be considered until after the first week of classes for the Fall 2010 term and all assignments are complete. Depending on space availability, a wait list option for re-assignments may be offered during the summer prior to opening day. Please contact the Department of Housing and Residence Life for more information regarding wait lists for the Fall 2010 term.

- **University Reassignments and Right of Entry:** The University reserves the right to inspect rooms and to move any student to another assignment for reasons of space management or for the maintenance of order. At the beginning of each school term, students without roommates may choose one of three options: 1) move together voluntarily with another student who is without a roommate, 2) be reassigned with another student who is without a roommate, or 3) if private rooms are an option, pay the private room rate. Whatever the option chosen, the student must coordinate his/her actions with his/her residence director.

Please contact the Department of Housing and Residence Life for more information: Room 1002, Mississippi State, MS 39762; Phone: (662) 325-3555; Fax: (662) 325-3555; Email: housing@saffairs.msstate.edu; Web site: www.housing.msstate.edu. The Web site is the best source for submitting an application, exploring specifics about facilities, policies, and options for students, especially those with families.

V. SERVICES

A. LIBRARIES

http://library.msstate.edu

The Mississippi State University Library System is composed of the Main Library (Mitchell Memorial Library) and its library branches which include Architecture, the College of Veterinary Medicine, the Jackson Center Library and the Meridian Campus.

The University Libraries include a collection of over 2,000,000 volumes and over 80,000 journal/serial titles, including print and electronic formats. The Libraries regularly receive many of the publications of leading universities and scholarly societies. The Library is a selective Government Document Depository and United Nations Depository. The Libraries provide a full complement of full text journals as well as scholarly journals in electronic format and accessible remotely from offices and dorms on campus as well as at home and from a distance off campus. Through the Libraries web page, patrons have access to a wide variety of databases and full text journals.

The resources of the Special Collections Department include materials of research value on the local, state, regional and national levels. The University libraries cooperate with the main library by providing services and materials necessary for the delivery of the educational mission of the University. MSU is a member of the Mississippi Valley Library Cooperative (MVIC) and the Southeastern Library Cooperative (SILC). The Special Collections Department includes the following collections:

- **Newspaper Collection:** The library subscribes to over 1,000 periodical titles, including print and electronic formats. The Libraries regularly receive many of the publications of leading universities and scholarly societies. The Library is a selective Government Document Depository and United Nations Depository. The Libraries provide a full complement of full text journals as well as scholarly journals in electronic format and accessible remotely from offices and dorms on campus as well as at home and from a distance off campus. Through the Libraries web page, patrons have access to a wide variety of databases and full text journals.

- **The Templeton Music Collection:** A unique collection of ragtime, blues, show tunes and war song sheet music is highly recognized and used by musicians, scholars and researchers throughout the region and nation. Digitized portions of this collection are available on the web. A ragtime/ jazz festival is held each March.

The Library provides over one hundred computers for students in the Student Commons Labband Reference Department. Students who want to use the sound capabilities of the Internet may plug their own headphones into headphone jacks on the PC’s and Macs. The lab also offers two laser printers and a color laser printer. The Library’s Computer Commons Lab is open until 1:45 a.m., Sunday through Thursday and until 7:45 p.m. on Friday and until 5 p.m. on Saturday.

The Instructional Media Center (IMC) provides an environment for educational technology activities and a learning center to utilize techniques.
related to digital multimedia. The staff provides assistance in identifying, digitizing, and organizing content materials including resources from the Libraries’ collections for use in web page design or presentation. IMC houses computers with CD-ROM players, computers with flatbed scanners that can be used for scanning documents, pictures, photos, etc., typewriters, TV/VCR stations for students to listen to music as required for various courses. Two of these stations also have record players. Music composition stations consist of electronic keyboards attached to Mac computers. The IMC also provides small listening areas with TVs and VCRs for groups to view videos for classes. The Libraries provide a full range of individual reference services including one-on-one consultations and online chat. Three rooms with individual computer stations are available for class and group instruction and workshops. There is also a large auditorium and a presentation room for class and student use.

The Libraries, a charter member of the Southern Library Network (LYRASIS), hold memberships in the American Library Association, Association of College and Research Libraries, the Networked Digital Library of Theses and Dissertations (NDLTD), EDUCAUSE, EPSCOR/ESIG libraries, CN1 and CLR, and was a founding member of SPARC. The Libraries are one of five supporting regional libraries within the National Agricultural Library Aquaculture Library Network, established to link the research and extension activities of the Regional Research Centers with the Network. The Main Library plays a major role in Mississippi’s statewide consortium MAGNOLIA (Mississippi Alliance for Gaining New Opportunities through Library Information).

B. BOOKS and SUPPLIES

The MSU Bookstore is operated on behalf of the University by Barnes & Noble. The store’s primary function is to provide students, faculty and staff with textbooks, general reading and reference books, related supplies, and MSU clothing and gifts. It also has parking available for community and visitor use.

Barnes & Noble at MSU is a 30,000 sq. ft. academic superstore located in the Cullis Wade Depot. The first floor features MSU clothing and gifts, a large selection of general reading books, and a full service Barnes and Noble Café that proudly serves Starbucks coffee and Cheesecake Factory desserts. The second floor stocks all course-required textbooks, trade and Reference books, and a complete stock of school supplies. The bookstore also carries computer hardware and accessories and software packages are available at substantial educational discounts. The bookstore also offers a vast array of eco-friendly merchandise that includes socks, notebooks, filler paper, and totes among others.

Students can visit the bookstore web site at ShopMissState.com to purchase textbooks and imprinted merchandise for delivery or take advantage of our convenient in-store pickup. The bookstore also offers cash back for textbooks all year long.

The bookstore is open Monday through Friday from 7:30 a.m. to 8 p.m., Saturday 10 a.m. to 8 p.m., and Sunday 12 p.m. to 6 p.m. The bookstore extends its hours of operation concurrent with campus activities such as home football games. Please call (662) 325-1576 or visit ShopMissState.com for more information.

C. UNIVERSITY DINING SERVICES

The campus dining is an important aspect of the college experience. Studies show that students who eat a well-balanced meal have a better chance of succeeding in the classroom. In addition to this, campus dining provides great social centers and convenience at a great value.

MSU Dining Services has a variety of campus dining facilities which provide the student with a wide range of menu choices, atmospheres, and prices. The campus community may choose from a variety of locales on campus. These include the newly renovated Marketplace at Perry, the Pegasus Dining Room in the Wise Center, the State Fountain Bakery, Burger King, Einstein’s Brother Bagels and the newly remodeled Union Food Court. The Food Court is comprised of Bleecker Street Deli and Bistro, Mississippi Steak, Sushi Bar, Zoca Southwestern Grill, Sharo Pizzeria, Starbucks, and a C3 Convenience Store.

MSU’s historic Perry Dining Hall is located in the heart of campus and offers a varied menu, from omelets and pancakes to hearty southern-style fare. For lunch, students find hot food lines serving home-style meals, a salad bar, a deli bar, and a pizza bar. Char-grilled entrees, a pasta line, and a veggie line are featured daily.

We look forward to serving you and please feel free to contact us via telephone at 662-325-0923 with any questions you may have about MSU Dining Services, or visit our web site, www.msstateeating.com. Please contact 325-7120 for information on meal plans.

D. JOHN C. LONGEST STUDENT HEALTH CENTER

The Longest Student Health Center is designed to provide comprehensive, accessible, high-quality and economic healthcare to students during college years. The Center is open during regular school sessions to all Mississippi State University students who are assessed the student health fee.

It is recommended that all students use the Longest Student Health Center as their preferred provider of care while at Mississippi State. The Center is staffed with well-qualified family practice physicians and registered nurses to provide primary medical care for students. Ancillary services include pharmacy, laboratory, x-ray, and physical therapy. Other services offered include nutrition counseling and health education. The health fee covers the physician’s professional charge for an unlimited number of clinic visits. Ancillary services are provided on a fee-for-service basis. Ambulance service is available through Oktibbeha County Hospital. Those who need more specialized care than the Center can provide will be referred to the appropriate resource.

Clinic hours: 8 a.m. to 5 p.m., Monday-Wednesday and Friday; 9 a.m. to 5 p.m. on Thursday. The Center is closed on Saturday and Sunday and during regularly scheduled student holidays.

Health records are to be sent directly to the Longest Student Health Center, where they are kept confidential. Health records are not a part of the school records and will be kept indefinitely for future reference.

The Student Health Center does accept insurance assignments from health insurance companies recognizing the Center as an authorized provider of health care. A Student Accident and Sickness Insurance Plan has been developed specifically for Mississippi State University students and is intended as a supplement to the care provided by the Student Health Center. Sponsored by the Student Association, it is a voluntary plan for students and their dependents. International students are required by the University to subscribe to this policy unless they provide proof of equal coverage.

Information on student health services and student health insurance is available by writing to Director, John C. Longest Student Health Center, P.O. Box 6338, Mississippi State, MS 39762; telephoning (662) 325-5895; or emailing health@saffairs.msstate.edu. Visit www.health.msstate.edu.

E. INTERNATIONAL SERVICES

International Services, a unit of the Office of Admissions and Scholarships, is charged with the responsibility of international undergraduate recruitment. This includes marketing MSU to prospective undergraduates worldwide, developing effective and efficient admissions policies and practices and coordinating scholarship opportunities for qualified candidates.

This unit is also mandated to serve both undergraduate and graduate students, professors, research scholars, short term scholars and specialists holding F and J visa status. This service is primarily implemented through USCIS and Department of State regulatory advising, benefit issuance, and document processing. The unit works closely with a wide variety of other university administrative and academic offices to best serve the international community in such matters as semi-annual immigration orientation sessions, Fulbright summer Preacademic programs, and yearly international tax workshops.
Lastly, the International Services unit assists the academic departments in formulating international student and faculty exchanges through articulation agreements, arranging logistics, hosting visitors, coordinating academic and administrative units, facilitating meetings, etc. with the overall goal of campus internationalization. International Services is located in Montgomery Hall.

For information visit www.admissions.msstate.edu/international/services/ or call (662) 325-2224. Email international@msstate.edu.

F. STUDENT COUNSELING SERVICES

Student Counseling Services, located in 101 Lee Hall, offers a variety of clinical and outreach services free to all full-time and part time students Monday through Friday from 8:00 A.M. to 5:00 P.M. Appointments may be made in person or by calling 662-325-2091.

Student Counseling Services staff is composed of well versed professionals with extensive training in clinical psychology and counseling who are experienced in facilitating personal growth and development. Staff members respect the ability of each individual to make actualizing choices. They offer services in career, personal, couples, family, and group counseling. Student Counseling Services also offer psycho-educational outreach programs to groups, clubs, organizations, departments, and classes on a variety of topics. Consultation services and student concerns are available to faculty, staff, and family members. For more information please visit our web site at http://www.health.msstate.edu/scs/

Sexual Assault Services

Sexual Assault Services is a service to the university community. It is comprised of two components: a crisis response team and outreach/programming and education. The Sexual Assault Response Team (SART) handles sexual assault cases, crisis intervention, assessment, direct support, and provides consultation, referral for the victim and the accused. SART is available to help anyone who reports a violation of the sexual assault policy. The team includes a coordinator and designated individuals from the University Police Department, the Longest Student Health Center, Residence Life Association, the Dean of Students office, and Student Counseling Services. For information or to report a sexual assault case, students and members of the university community may contact the SART Coordinator at Student Counseling Services at (662) 325-2091.

Sexual Assault Services coordinate prevention education, outreach programming, and prevention education for the campus. For more information or to request programming call Sexual Assault Services at (662)325-9101 or visit our web site at http://www.health.msstate.edu/sas/

G. ASSESSMENT & TESTING SERVICES

www.ats.msstate.edu/testing

The Office of Assessment and Testing Services, located at 195 Magruder Street, serves as the University’s testing center for national standardized computer-based and paper/pencil tests such as ACT, CLEP, GMAT, GRE, Praxis, LSAT, MCAT, MAT, PCAT, and TOEFL. Registration information can be obtained from test program web sites listed on our web site at www.ats.msstate.edu. Please email testing@saffairs.msstate.edu, or call (662) 325-6610 for more information.

H. THE LEARNING CENTER

http://www.tlc.msstate.edu

The major purpose of The Learning Center (TLC) is to help Mississippi State University students improve their academic performance. TLC offers both credit courses and non-credit services to graduate and undergraduate students. For more information, contact the TLC office at (662) 325-2957 or come to 267 Allen Hall.

Credit Classes. The primary focus of the credit classes of The Learning Center is to assist in retention of students by strengthening their reading and study efficiency. LSK 1023 College Reading and Study Skills emphasizes development of time management, vocabulary, note taking, test preparation and other study skills. TLC offers a speed reading course, LSK 2013, as well as a one-hour study skills course, LSK 1011. In addition, the center offers LSK 1001 Freshman Seminar, a one hour course designed to orient incoming freshmen and transfer students to the university.

Non-credit Laboratory Services. TLC offers tutoring in major subject areas. Assistance is available in all areas of English, mathematics and statistics, chemistry, physics, and preparation for professional examinations. These services are free to all MSU students. In addition, The Learning Center provides equipment for checkout, photocopying, and instructional resource materials for a nominal fee. The Learning Center houses a general computer lab available to students and faculty.

I. THE CAREER CENTER

www.career.msstate.edu

The MSU Career Center, through quality programs, events and services, empowers individuals to develop skills that will enhance professional preparation oriented toward careers. The Career Center also serves as a catalyst between employers, students and alumni by offering on-campus interviewing and networking opportunities as well as relevant work experiences prior to graduation. Assistance is provided that compliments the career decision/preparation process in the form of personality and interest inventories, career counseling, resume writing, resume critiques and mock interviewing. In addition, special events are hosted by the Career Center that provide students and alumni with enhancements related to the job search process. Major events held on a regular basis each semester include a variety of Career Fairs, Graduate and Professional School Fair, Education Interview Day and Cooperative Education Interview Days. Special emphasis workshops including dining etiquette, dressing for success, evaluating job offer, etc., are held regularly.

Types of employment available for job seekers through the Career Center include:
- Full-time employment for graduating seniors and alumni
- Cooperative Education (see section on Cooperative Education Program)
- Internship and Professional Practice Internships
- Summer Employment
- Part-time employment during school semesters

Details on all events, programs and services of the Career Center may be found at http://www.career.msstate.edu or by contacting Director, Career Center, PO Box P, Mississippi State, MS 39762.

J. THE HOLMES CULTURAL DIVERSITY CENTER

The Holmes Cultural Diversity Center primarily serves minority and international students, including African American, Native American, Asian American, Hispanic, and students from 74 countries. By providing a forum for all cultures, traditions and backgrounds, the Center strives to equip students with the ability to cope with current and future challenges, opportunities and alternate global points of view. It is, however, committed to providing programs and services sensitive to all students’ needs. The Center serves as a resource for faculty and staff. The Holmes Cultural Diversity Center
K. INFORMATION TECHNOLOGY SERVICES

The mission of Information Technology Services (ITS) is “to enable learning, service and research through an advanced information technology environment.” In fulfillment of this mission, ITS makes available a broad array of information technology resources and services to the faculty, staff, and students of MSU.

User Services operates the Help Desk, which serves as the primary point of contact for the campus community when requesting services or reporting problems to ITS. Additionally, User Services provides Web development and support services and offers training sessions and short courses to MSU departments. User Services also provides personal computer support to departments and their employees and it operates the Campus Card Office which produces the MSU ID card and administers MoneyMate, the university’s decline-balanced spending account system.

Information Technology Infrastructure (ITI) is responsible for the planning, deployment, support, and operation of the University’s information technology infrastructure. This infrastructure is comprised of the Campus Card system, the voice network, and the wired and wireless data network (including over 202 buildings at the Starkville campus and connections to the commodity Internet, Internet2, National Lambda Rail, and other research networks), as well as central and departmental server resources. Further, ITI supports the technology infrastructure in over 83 campus classrooms, open computer labs in the Academic Computer Laboratory, Grifflis Hall, and Mitchell Memorial Library; and departmental computer labs across campus. All residence hall rooms are equipped with high-speed wired and wireless data network connections, and the wireless network is available campus-wide.

Enterprise Information Systems (EIS) is responsible for development, maintenance, and support of a broad suite of software systems that are utilized throughout the university. Systems range from departmental applications to the comprehensive, integrated Enterprise Resource Planning system (Banner) for financial, human resources, student, financial aid, and advancement administration. In addition, EIS supports the onCampus portal, the myCourses course management system, and the Banner Document Management system. Primary database platforms include Oracle and Microsoft SQL Server. General responsibilities include software design and development, software testing, system implementation, database administration and ongoing maintenance and support.

L. STUDENT SUPPORT SERVICES

The department of Student Support Services (SSS) is a federally-funded program through the U.S. Department of Education. It is a TRIO program designed to assist eligible low income college students, first generation college students, and college students with disabilities to succeed in completing their college education. A limited number of students can be served under the federal grant program. The primary mission of SSS is to enhance educational opportunities for eligible students to improve their academic and social skills, increase their retention toward graduation and as appropriate, facilitate their entrance into graduate and/or professional schools. For information or services, visit Student Support Services in Montgomery Hall, call (662) 325-3335, or visit www.sss.msstate.edu.

M. DISABILITY SUPPORT SERVICES

Students who need academic accommodations based on a disability should visit the Office of Student Support Services, 01 Montgomery Hall, call (662) 325-3335, or visit the web site at www.sss.msstate.edu. Student Support Services’ staff reviews the documentation, assesses the needs of students with disabilities, and makes requests to the faculty and the University based on those needs. The department serves as a resource and clearing house for dissemination of information related to disabilities and compliance with section 504 of the 1973 Rehabilitation Act and the Americans with Disabilities Act (ADA).

VI. STUDENT and CAMPUS LIFE

A. COLVARD STUDENT UNION

www.union.msstate.edu

The Colvard Student Union, named for former President Dean W. Colvard, serves as the center of the Mississippi State University community life. The Campus Activities Board (CAB) and Music Maker Productions, student programming groups advised by the Union staff, annually plan and present a variety of programs, including the Halloween carnival, Miss Maroon and White pageant, global lecture speaker, and Old Main Music Festival.

The Colvard Student Union, which originally opened in 1964, has recently reopened after having undergone a major renovation and expansion. The Union has eight large meeting rooms, four conference/board rooms, a ballroom, a small auditorium/theater, and an art gallery. Also located in the Union are a food court, coffee house, hair stylist, copy/shipping service, and convenience store. The Holmes Cultural Diversity Center is located in the Colvard Student Union, as are administrative offices for the Colvard Student Union staff, CAB, Music Makers, Student Association, Interfraternity Council (IFC), National Pan-Hellenic Council (NPHC) undergraduate council, Panhellicen Council. Shared office space and a limited number of lockers are available for registered student organizations in the Center for Student Involvement.

Rooms in the Union, as well as Bettersworth Auditorium in Lee Hall, the Amphitheatre, and other campus facilities may be reserved by contacting Event Services.

B. THE STUDENT ASSOCIATION

The Student Association exists to serve all Mississippi State University students. The five officers, who are elected during the spring semester, are the leaders of the SA. These officers include the president, vice president, secretary, treasurer, and attorney general. They not only work to ensure that established policies and programs are successfully continued, but also initiate improvements in MSU’s student government.

The president and the SA cabinet comprise the executive branch of the Mississippi State Student Association. These cabinet members are selected to work with their student committees to implement programs and services which will benefit the entire student body.

The vice president heads the legislative branch and presides over the SA Senate. There are 50 senators elected to represent the various colleges and schools, as well as areas of student residence.

The judicial branch of the SA includes members appointed by the SA President and approved by the SA Senate. The Judicial Board assists the Dean of Students office in cases involving violations of the Student Code of Conduct.

All students are automatically members of the SA when they enroll at MSU. Students who want to learn more about the SA and become involved should visit the SA office located in the Center for Student Involvement in the Colvard Student Union, call (662) 325-3917, or visit the Web site at www.sa.msstate.edu.
C. STUDENT PUBLICATION

The *Reflector*, the campus newspaper, appears twice weekly during the regular term. Edited and managed by students, it provides a wide range of news, features, and commentary of interest to the campus community. Its editorial offices are in the Meyer Student Media Center.

D. STUDENT ORGANIZATIONS

Mississippi State University has more than 300 registered organizations, grouped as follows: Departmental/Academic, Fraternities, Sororities, Honoraries, International/Ethnic, Fine/Performing Arts, Political, Recreation/Hobby, Religious, Residence Life, Service, and Publications.

Organizations which represent the interests of a large segment of or the entire campus include: The Student Association (SA), the Residence Hall Association (RHA), the Inter-Fraternity Council (IFC), the National Pan-Hellenic Council (NPHC) Undergraduate Council, the Black Student Alliance (BSA), the Panhellenic Council (PH), the Campus Activities Board (CAB), Music Makers Productions, and The *Reflector* (newspaper). The name and phone number of the advisor of each organization on campus are listed on the MSU Web site.

E. SOCIAL SORORITIES and FRATERNITIES

Nineteen national social fraternities have established chapters at the University; 12 have chapter houses on the campus, and one resides off campus. Self-governance of the fraternities is provided by the Interfraternity Council, composed of the president and one delegate from each of the national fraternities. The national fraternities at Mississippi State University are: Alpha Gamma Rho, Alpha Phi Alpha, Alpha Tau Omega, Delta Chi, FarmHouse, Iota Phi Theta, Kappa Alpha Order, Kappa Sigma, Lambda Chi Alpha, Omega Psi Phi, Phi Beta Sigma, Phi Delta Theta, Phi Gamma Delta, Pi Kappa Alpha, Sigma Alpha Epsilon, Sigma Chi, Sigma Lambda Beta, Sigma Nu, and Sigma Phi Epsilon.

Twelve national women’s social sororities have established chapters at Mississippi State University; six have built chapter houses on the campus. Panhellenic Council is the self-governing body for sororities and is composed of two delegates from each sorority. State’s sororities include: Alpha Kappa Alpha, Chi Omega, Delta Delta Delta, Delta Gamma, Delta Sigma Theta, Delta Xi Phi, Kappa Delta, Phi Mu, Pi Beta Phi, Sigma Gamma Rho, Zeta Phi Beta, and Zeta Tau Alpha.

Included among the 31 Greek organizations at MSU are eight historically African-American chapters: Alpha Kappa Alpha, Delta Sigma Theta, Sigma Gamma Rho, and Zeta Phi Beta sororities, and Alpha Phi Alpha, Iota Phi Theta, Omega Psi Phi, and Phi Beta Sigma fraternities. These organizations belong nationally to the National Pan-Hellenic Council (NPHC), and they are represented on campus by the NPHC Undergraduate Council, their self-governance body.

F. MUSICAL ORGANIZATIONS

All MSU students, regardless of academic major, are enthusiastically invited to participate in one or more of the musical ensembles offered through the University Band and Choir programs and the Department of Music. These ensembles offer diverse performance opportunities both on and off-campus. Membership is available through audition. Scholarships and tuition waivers are available in the band and choir programs based on talent and experiences as demonstrated through audition.

Founded in 1902, the Maroon Band Program is one of the oldest and best-known bands in the Southeast. The Famous Maroon Band is at the center of game-day spirit, is one of the most visible groups on campus, and serves as musical ambassador for the university. The band appears at all home football games and travels to championship and bowl games. Interested members of the Maroon Band audition for placement in two Basketball Pep Bands to continue supporting the Bulldogs in the basketball season.

The Wind Ensemble, Symphonic, Community, and Concert Bands offer opportunities for students of all ability levels to pursue the study of the instruments through the performance of advanced ensemble literature, with the Wind Ensemble serving as the premiere instrumental concert ensemble. The Jazz Bands are offered for those with an interest in jazz, and numerous chamber ensembles for winds and percussion are offered through the Music Education Department.

The Chamber Singers are the premiere, touring ensemble on the MSU campus. Comprised of students from various disciplines, each member is committed to singing choral music at the highest level. A significant amount of previous experience in vocal and choral music is usually expected for membership. Repertoire is chosen from a cappella and accompanied choral traditions, and the group tours either nationally or internationally every year.

The Concert Choir is the largest vocal ensemble on the MSU campus. The Choir is open to any MSU student with prior choral experience who enjoys participating and singing in a choral ensemble. Repertoire consists of music from all genres of choral music. The ensemble performs at least two concerts on campus each year and with the Famous Maroon Band during the annual patriotic halftime show.

All musical ensembles are offered for academic credit and do not constitute an overload fee.

Contact information: Band - (662) 325-2713 Choir - (662) 325-7801

G. RELIGION

Since Mississippi State University is a non-sectarian institution, it seeks to provide a climate of freedom in which the private and corporate religious life of the students can be expressed. Students and others within the campus community are free to worship or not to worship, in accord with their convictions and beliefs.

The Chapel of Memories, with its George D. Perry Carillon Tower, in the center of the campus, is open to individual students for meditation and prayer throughout the day and evening. It may also be reserved through the Event Services Office for weddings, funerals, initiations, and group religious activities. Student religious groups are registered through the Center for Student Involvement in the Colvard Student Union to provide co-curricular involvement of students in programs of study, worship, fellowship and service. Four of these groups, the Baptist, Methodist, Catholic, and Church of Christ, have off-campus facilities. In those cases where a minister or faculty advisor is not provided by the preferred group, every effort will be made to put the student in touch with someone of his or her faith in the area.

The University Common Ministry, composed of ministers engaged in campus ministry at the University, has been serving the needs of students since December 4, 1978. In addition, more than 30 student religious groups are registered with the Center for Student Involvement.

In addition to the practice of religion within the student religious groups, an opportunity to learn about religions of the world is provided through credit courses in the Department of Philosophy and Religion, as well as non-credit courses offered through the church-related groups.

H. RECREATIONAL SPORTS

The Department of Recreational Sports conducts a comprehensive program of leisure services. The program consists of men’s, women’s, and co-recreational sports; fitness programs and activities; tennis and racquetball court reservations, equipment check-out services; informal recreation programming; outdoor adventures; sport club opportunities; and special events.

The Joe Frank Sanderson Center opened in 1998 and offers a wide range of recreational opportunities for Mississippi State students, faculty, and staff. The state-of-the-art facility includes six basketball/volleyball courts; six racquetball courts; a fitness room complete with weight and cardiovascular work-out equipment; jogging track; and an indoor swimming pool. The department also operates the RecPlex, a sports field complex with playing areas for softball, flag football, and soccer.
The Intramural Sports program offers competition for men and women in a variety of activities including badminton, basketball, flag football, racquetball, soccer, softball, tennis, table tennis, and volleyball. For more information, go to http://www.recsports@msstate.edu

I. INTERCOLLEGIATE ATHLETICS

Mississippi State University is a member of the Southeastern Conference, which includes in its membership 12 of the leading universities of the South. Regulations regarding participation in athletics are subject to the action of the National Collegiate Athletic Association and the Southeastern Conference. Intercollegiate sports for men include football, basketball, baseball, track, tennis and golf. Intercollegiate sports for women include basketball, volleyball, tennis, golf, cross-country, track, soccer and softball. Overall supervision of intercollegiate athletics is provided by Director of Athletics.

VII. TUITION and REQUIRED FEES FOR 2010-2011

and

MANAGING YOUR MSU ACCOUNT

Tuition and Required Fees (T&RF)

With the exception of the College of Veterinary Medicine and Meridian campuses, stated hereafter, the following fees apply to students enrolled at Mississippi State University. Tuition and required fees are assessed on a per credit hour basis at the prevailing rates as determined by The Institution of Higher Learning, the governing board of the University. These rates are applicable at the time of publication and are subject to change without notice.

<table>
<thead>
<tr>
<th></th>
<th>Fall Semester (maximum)</th>
<th>Spring Semester (maximum)</th>
<th>Annual Total (maximum)</th>
</tr>
</thead>
<tbody>
<tr>
<td>A. Tuition &amp; Required Fees (T&amp;RF)</td>
<td>$2,730.50</td>
<td>$2,730.50</td>
<td>$5,461.00</td>
</tr>
<tr>
<td>B. Non Resident Tuition:</td>
<td>$4,170.00</td>
<td>$4,170.00</td>
<td>$8,340.00</td>
</tr>
</tbody>
</table>

C. Tuition and Required Fees (hourly rate, rounded) (1-11 hours)

|                      | Resident $227.75 per hour | Non-resident fee $347.50 per hour |

1Per credit hour rate is strictly applied to enrollment in all parts of the summer term (no maximum applied).

2Those students that reside outside the state of Mississippi (Non-resident) are charged both T&RF and Non-Resident Tuition each semester of enrollment.

- A student will be considered full-time for T&RF purposes when registered for 12 or more undergraduate hours.
- Part-time students registered for 1 to 11 undergraduate hours will be charged at the per-credit-hour rate.
- 12 or more hours of enrollment will be assessed at the maximum per term rate (applicable to fall and spring).
- T&RF assessments for course enrollment with the Division of Academic Outreach and Continuing Education (AOCE) are in addition to all other campus T&RF charges.
- The same T&RF rates apply to those courses that are taken as an audit.

T&RF relative to Student Activities

All students, by payment of T&RF, are eligible for use of facilities, participation in intramural sports, admission to intercollegiate athletic events, student health services and other misc. activities. An additional fee may be required for some activities for less than full time enrollment. These required fees are applicable regardless of the method of course instruction (i.e., traditional, online, distance, etc.)

Course Participation Fees

Fees in addition to T&RF are associated with some courses which require the use of special equipment, facilities or materials. These fees, which vary by course, will be collected as part of registration.

Schedule Change Fees - Please see www.registrar.msstate.edu/Calendars/academiccal.html.

Managing Your MSU Account

1. Account Information

A financial record for each student is maintained and presented to the student via the onCampus Portal. The information is considered confidential; however, the records of students will be available for examination by authorized representatives of the Government. Current T&RF should be paid by the established monthly due date. Partial payments of an account balance are permitted during the semester/term; however, monthly service fees will apply (See “Payment Due Dates and Service Fees”.) Students are responsible for payment of all T&RF charges unless they either cancel their schedule or withdraw from school by the first day of class. See refund schedule on the Web; click on Refund Policy for details. Failure to take appropriate withdrawal action may result in significant payment obligations.

According to established University policy, student accounts must be current (i.e., not on an Account Services/Financial hold) in order to continue enrollment at MSU. To avoid unnecessary delays in your continued enrollment, please review your account to insure all previously billed charges have been paid.

If you have questions about this policy, please feel free to contact Account Services:

- By e-mail - cashiers@controller.msstate.edu
- By phone - 662-325-2071
• In person - Account Services located in Garner Hall

Billing, Payment Due Dates, and Service Fees
- Electronic billing statements are available to students on or about the 15th of each month via the University’s secure onCampus portal. Students will receive a monthly email notification that their account has been billed. These statements contain a monthly summary of changes and credits to the student’s account.
  - Regular monthly payment due dates are the 9th of each month.
  - The student’s account will be assessed a monthly 1.5% service fee on any billed charges outstanding beyond the payment due date.
  - Service charges, as well as an “Account Services Hold”, may be avoided by paying the full account balance each month by the due date.

Unpaid Balances From Prior Semesters
- Any outstanding and past due amounts owed to the University must be paid in full before a student may register for additional courses or make schedule changes.
  - All payments received on student accounts will be applied to charges in the same order in which the charges were incurred.
  - A student who has a hold on his/her record because of an overdue account may not receive a transcript or a diploma until the account has been paid to current status.
  - Per federal financial aid regulations, prior aid year outstanding charges cannot be paid with current aid year financial aid.

Overdue Account Restrictions
- The administrative authorities of the University will withhold the transcripts and diplomas, degree certification, letters of good standing, and other certification of enrollment and deny readmission of any student who has an over-due financial obligation to the University.
  - The student’s records may be cleared and a diploma or transcript released when the indebtedness is paid in full.
  - If a financial hold is released based upon a financial agreement and the terms and conditions of that agreement are not met, we reserve the right to void the current term class schedule without notice and without promise of reinstatement of the same class schedule.

Attorney and Collection Fees
- Student accounts remaining unpaid by the end of the term may be turned over to an external agency for collection.
  - The prevailing collection rate will be added to the amount owed by the student.
  - If an attorney’s services are needed, the student shall be responsible for payment of the attorney’s fees plus all court and other collection costs incurred.

2. PAYMENTS

Acceptable Forms of Payment: Cash (payments, accepted only in Account Services located in Garner Hall or Meridian Business Office), personal or corporate checks; money orders; cashier checks; credit cards; wire transfer; or local, state, University or federal financial aid (e.g., grants, loans, scholarships, waivers, VA or military assistance, etc.). Please provide/include the MSU ID number with all payments. If sending a payment via US Postal Service, please mail payment at least five (5) business days prior to due date.

Check Payments
- The University will accept checks in payment of amounts due the University. The University reserves the right to defer payment on the balance of any check tendered in excess of the amount due the University until the check has had time to clear for payment through banking channels.

  Checks offered to the University that are not honored by the bank on which it is drawn are considered non-payment and will result in the VOIDING of course schedule(s) and assessment of appropriate fees. The maximum penalty allowed by law will be charged for any check returned by your bank for any reason. The University expects that each debt created by a returned check will be promptly and fully corrected. Failure to respond to a notice concerning a returned check may result in legal action, the denial of readmission, and the withholding of records. The University reserves the right to refuse acceptance of checks presented by students who have had previously returned checks. In such cases payment must be made by cash, money order, certified bank check, or credit card.

QuikPay Service: Electronic Credit Card| Debit Card| E-check payments and Account Authorized Payers
- The QuikPAY® service (onCampus portal, Banner, Personal Info, Make an Online Payment) allows students to make payments using a credit card or electronic check (e-check). Acceptable credit/debit cards are American Express, Discover & MasterCard *
  * Note: your card account will be assessed a 2.7% convenience fee in addition to the payment amount.
  - Students may also authorize a payer(s) (usually a parent) to access their account information and make payments to their account. Students must initiate this process by logging into the MSU onCampus portal at www.msstate.edu and proceed to “Make An Online Payment”, then link to the QuikPAY® site by choosing “Authorize Payers” and following the easy instructions to create, modify, or delete an authorized payer. Once established, the authorized user/payer can access the account by going to https://quikpayasp.com/msstate/studentaccounts/authorized.do and initially re-setting his/her password and then proceeding to make payment or review the student’s account detail or statements.

Wire Transfer – Please contact Account Services at (662) 325-2072 for wiring instructions.

Financial Aid or Scholarship Payments
- Students who receive a scholarship or need-based financial aid from the University are expected to use their financial aid or scholarship award to complete payment T&RF as well as other enrollment related charges assessed for the same term/semester that the financial aid award is issued. Per federal financial aid regulations, prior aid year outstanding charges cannot be paid with current aid year financial aid. The remaining balance of scholarship and financial aid funds are available to be used for other educational expenses within the same term/semester only after T&RF have been paid.

Employee Tuition Remission
- Mississippi State University employees who have appropriate approval may be eligible for T&RF remission for up to six (6) hours per semester with a maximum of 18 hours per calendar year. Employees are required to pay T&RF for any additional hours taken during the enrollment period and any other assessments to their account. The employee is responsible for service fees incurred if tuition remission approval is not finalized as outlined in Human Resources policy – HRM #60-225.

Senior Citizen Tuition Waivers
- Legal residents of the State of Mississippi age 60 or older (senior citizens) may enroll tuition-free in a maximum of two (2) on-campus courses per semester (or combined summer term) at the Starkville or Meridian campuses or the Division of Academic Outreach and Continuing Education (AOCE).
Refer to the Student Affairs policy – OP 91.179 for more information.

All Other University Sponsored Waivers – refer to Student Financial Aid, Section VIII

3. REFUNDS
Refunds of credit balances resulting from financial aid, registration withdrawals/drops or other reimbursements may be requested as follows:

- Direct Deposit: Utilizing the BULL-e-BUCKS electronic account management program via the onCampus portal.
- In person: Account Services located in Garner Hall
- U.S. Postal Mail: Contact Account Services by phone at 662-325-2071 to request refund or make the request by email at cashiers@controller.msstate.edu.

Credit balances resulting from overpayments by check or e-check will be available 14 calendar days after posting to the student’s account. Credit balances resulting from overpayments by credit card will be refunded to the credit card account on which the original payment was made.

Web Instructions to Access Your Account:
From the MSU main Web page, select onCampus; secure user access using your personal NetID and password; click on the Banner tab and enjoy the following services:

1. Change your billing address and/or E-mail address.
2. View your current or prior billing statement.
3. View your account detail history.
4. Make a payment by credit card or e-check.
5. Authorize another user to help manage or make payment to your account.
6. Access a remittance stub to make payment via U.S. mail.
7. View your pending financial aid or scholarships.
8. Use the BULL-e-BUCKS program to direct deposit your refund or make a transfer to your MoneyMate account.

VIII. STUDENT FINANCIAL AID

General Information

Many Mississippi State University students receive various types of financial aid to help pay the costs associated with attending college. The following information is provided to inform students and their families of the estimated costs of attending MSU, the types of financial aid available to help pay these costs, some of the general aid eligibility requirements, and the aid application procedures. The information contained in this section is accurate as this document went to print. Please visit our Web site at www.sfa.msstate.edu for further information and updates.

I. Student Expenses - The Cost of Attending MSU - 2010-2011
The following list of basic university expenses covers those for a full-time, undergraduate student living in a residence hall on campus for a nine month academic year. Note: These costs are average costs.

<table>
<thead>
<tr>

II. Sources of Financial Aid
Federal Sources of Financial Aid Programs are “need based” or “non need based” as determined by the federally mandated needs analysis formula.

A. Federal Sources of Financial Aid

1. Pell Grants - A federal student aid program designed to provide a foundation of gift aid to students who demonstrate financial need. All undergraduate students enrolled for their first undergraduate degree are eligible to apply for Pell Grants. Pell Grants awards for the 2010-2011 year ranged from $555 to a maximum of $5,550. Depending on Congressional allocations, Pell Grant amounts may change each year.

2. Academic Competitiveness Grant (ACG) - Basic eligibility includes, but is not limited to the following: For first and second year undergraduates, Pell Grant Recipients, U.S. citizens, enrolled in a degree program, demonstrated financial need and completed what the federal government defines as a Rigorous High School Program of Study. Second year students must also have a 3.0 or better college GPA on a 4.0 scale.

3. Science and Math Access to Retain Talent (SMART) Grant - Basic eligibility includes, but is not limited to the following: For third and fourth year undergraduate students, Pell Grant recipients, U.S. citizens, enrolled in a degree program, demonstrated financial need and majoring in one of the eligible science, math or foreign language academic majors as defined by the federal government. Recipients must have a 3.0 or better college GPA on a 4.0 scale.

4. Federal Work-Study - A program of part-time employment for students who demonstrate financial need. Eligible students may work up to 18 hours per week during regular school sessions.

5. Stafford (subsidized and unsubsidized) Student Loans - Long-term loans provided by the U.S. Department of Education for students who need assistance in meeting educational expenses. Subsidized loans are based upon financial need. Unsubsidized loans are not based upon financial need.
III. To Apply for Financial Aid at MSU

IV. Scholarship and Financial Aid Policies

A. Scholarship Criteria:

1. All academic scholarships are made in accordance with guidelines established by the MSU Scholarship Committee.
2. Students currently enrolled at MSU are evaluated primarily on the basis of a submitted online scholarship resume and cumulative grade-point averages.
3. Transfer students are evaluated on the basis of a submitted on-line scholarship resume, cumulative grade point average, transferrable community college hours and admission by the June 1 priority date.
4. Entering freshmen are evaluated on the basis of their ACT/SAT composite score, overall high school grade point average, high school class standing,
leadership attributes and admission and scholarship resume by the February 1 priority date.

5. Students from Attala, Carroll, Choctaw, Montgomery and Webster counties in Mississippi may be eligible to apply for the Sumners Scholarship. Permanent residency in one of these five counties for 12 continuous months prior to the award period is the primary basis of eligibility. Recipients of the Sumners Scholarship must maintain Satisfactory Academic Progress (Section C). Application must be submitted each year by September 15.

6. All students have the right to appeal their Scholarship status. Exceptions may be made in cases of mitigating circumstances such as: Death in the immediate family, personal injury, illness, etc, as determined by the Office of Admissions and Scholarships and the University Scholarship Appeals Committee.

Students may appeal by writing: University Scholarship Appeals Committee, Office of Admissions and Scholarships, P.O. Box 6334, Mississippi State, MS 39762.

All appeals must be in writing and include the student’s name, MSU ID, telephone number and all the facts and documentation upon which the appeal is based. The appeal must be received by Office of Admissions and Scholarships at least five (5) days prior to the last day to register during the spring and fall semester and prior to registration day for each summer session. The University Scholarship Appeals Committee has authority over all appeals and its decisions are final.

B. Federal and State Programs of Financial Aid

1. All Federal student-aid funds are awarded on the basis of criteria established by the United States Congress and the Department of Education, as required by Title IV of the Higher Education Act of 1965, as amended.

2. Priority in the awarding of some need-based aid is given to students with the greatest financial need first, within the availability of funds. Funds that are limited are awarded until depleted. Applicants are encouraged to apply early each year.

3. The family of a student is expected to make a maximum effort to assist the student with college expenses. Financial assistance from the University and other sources should be viewed only as supplementary to the efforts of the family. In determining the extent of a student’s financial need, the University will take into account the financial support which may be expected from income, assets, and other resources of the parents and of the students as required by Federal Regulations.

4. Students themselves are also expected to use all available resources for their college expenses. This includes savings accounts, trust funds, etc.

5. The total amount of financial assistance offered by the University and other sources must not exceed the amount of the student’s cost of attendance as specified in federal regulations. If need-based financial aid is awarded, the total need-based award and educational resources cannot exceed the amount of financial need as determined by the federal need formula. The student is responsible for notifying the Department of Student Financial Aid at Mississippi State University upon learning that additional educational resources/benefits (scholarships, tuition waivers, etc.) have been awarded or received.

6. Because the amount of financial assistance awarded usually reflects the financial situation of the student’s family, the University does not make a public announcement of the amount of financial aid awarded.

7. The University will clearly state the total yearly cost of attendance. (See costs listed under “Students Expenses” or visit our Web site at www.sfa.msstate.edu.)

8. All financial assistance is awarded on an annual basis and no award implies automatic renewal from year to year. A new FAFSA and MTAG/MESG application must be submitted each year. Other applications may also be required. Always check with the granting agency to determine application procedures and deadline dates.

C. Satisfactory Academic Progress for Purposes of Student Financial Aid

Purpose: To define reasonable standards for measuring academic progress in order for students to remain eligible for financial aid under Title IV.

Policy: Mississippi State University, as required by federal law, defines and enforces minimum standards for Satisfactory Academic Progress. Students receiving federal financial aid and Sumners funds must conform to these minimum standards of Satisfactory Academic Progress. Students receiving federal financial assistance and Sumners funds must enroll in courses leading to, and earning credit toward, a degree. These satisfactory academic progress standards will include an evaluation of each student’s progress in terms of quality and quantity of progress toward the degree. Students who are not successfully completing appropriate courses will not be considered to be making satisfactory academic progress and will not be eligible for further federal financial aid. These satisfactory academic progress standards supersede any award letter that the student might have received. This policy applies to all Title IV federal Financial Aid programs at Mississippi State University and the Sumners Scholarship Program.

For details regarding this satisfactory academic progress policy, including the appeals process, and other consumer information, visit our Web site at www.sfa.msstate.edu.

D. Withdrawal from School

Treatment of Student Aid Funds when a Student Withdraws from School:

Students who choose to withdraw from the University prior to the end of an enrollment period (semester) should follow the University’s guidelines for withdrawing from school. An Official Withdrawal Form must be completed and submitted to the proper office before a student can be considered officially withdrawn. Information concerning the details of withdrawal procedures can be found in the MSU Bulletin or by contacting the Registrar.

Federal student aid recipients who begin attending classes during a semester and who cease attending or performing academic activities prior to the end of the semester, and never complete an Official Withdrawal Form are considered by the federal government to have unofficially withdrawn. If University records indicate that a student did begin attending classes but subsequently unofficially withdrew, the University will consider the Unofficial Withdrawal date to be the midpoint of the semester (unless documentation exists of an earlier or later date of academic activity by the student).

When a federal student aid recipient withdraws, officially or unofficially, after attending at least the first class day, the University will return, and the student aid recipient will be required to repay, a prorated portion of funds received based upon a federally required calculation.

If University records show a federal student aid recipient never attended a class and/or never performed an academically related activity for a semester or term, then the recipient never established eligibility for any aid funds that may have been disbursed for that semester or term. In addition, any student aid recipient who drops all classes prior to the first day of class or whose schedule is voided for a semester or term, did not establish eligibility for any aid funds that may have disbursed for that semester or term, and must repay the entire amount of aid disbursed for that semester or term.

If a student did not receive any federal student aid but did receive other types of aid funds, and subsequently officially withdraws, refunds and repayments will be based upon the University’s refund schedule.

For more information regarding return and repayment of Title IV (federal) funds, see the Return of Title IV Funds section of “withdrawal from school” on the Web site at www.sfa.msstate.edu under Policies/Consumer Right to Know.

**Note: The information contained in this section is accurate as of the date of publication but is subject to change, without notice, in order to comply with federal, state, or university requirements. Updates are posted on the MSU Web site.**
IX. SCHOLARSHIPS, MEMORIALS, and LOANS

UNIVERSITY SCHOLARSHIPS AND MEMORIALS

Mississippi State University is committed to the recognition of outstanding students whose academic credentials confirm their potential for success as university students. Outstanding students may be eligible for various scholarships and honors.

Numerous privately funded scholarships support the University Scholarship Program to recognize continued academic success. Information regarding eligibility criteria and the online resume may be obtained from the Office of Admissions and Scholarships at www.admissions.msstate.edu/scholarships or (662) 325-3076. In addition to general university scholarships, most colleges and departments also have numerous scholarships available to qualified students. Colleges and departments can provide detailed information.

COORDINATOR of DISTINGUISHED EXTERNAL SCHOLARSHIPS

The Dean of the Shackouls Honors College identifies and assists well-qualified undergraduate students who would be strong candidates for national and international awards such as the Rhodes Scholarship, the Goldwater Scholarship, the Marshall Scholarship, and the Truman Scholarship. Prospective applicants are encouraged to investigate the Web sites of the major scholarship programs. For information on the opportunities, contact:

Shackouls Honors College 
P.O. Box EH 
Mississippi State, MS 39762

e-mail: shc@honors.msstate.edu
Web: http://www.honors.msstate.edu
(662) 325-2522

GRADUATE ASSISTANTSHIPS

Graduate Assistantships are intended to recruit quality students to graduate study at MSU and to enhance the graduate learning experience. An assistantship is a financial award to a graduate student for part-time work in teaching, research, or administration while pursuing an advanced degree. Graduate research, teaching, and service assistantships are available on an annual or nine-month basis. A graduate assistant’s work schedule is a maximum of 20 hours per week. The minimum stipend rate is $600.00 per month.

Types of Assistantships

Graduate Research Assistantship (GRA) — Graduate Research Assistants perform duties in support of University research, which may or may not relate to the students’ thesis/dissertation. Many University academic, research, and administrative offices employ GRAs. This opportunity provides an excellent means for students to learn new techniques and methods as well as expand their knowledge by association with research-oriented responsibilities, whether employed within the student’s academic discipline or in another department. Duties and stipends vary from program to program and are dependent upon the nature of assigned duties.

Graduate Service Assistantship (GSA) — These Assistants aid faculty and staff members with administrative functions, and GSA appointments are available in many academic and non-academic units. Duties vary, depending on administrative needs of the unit making the award, and stipends vary according to the nature of assigned duties.

Graduate Teaching Assistantship (GTA) — Graduate Teaching Assistants work under the direct supervision of graduate faculty members and are assigned duties related directly to instruction, such as assisting in the preparation of lectures, leading discussion sections, conducting laboratory exercises, grading papers, and keeping class records. Advanced graduate students who have completed 18 graduate credit hours in his or her teaching discipline may be given primary responsibility for teaching an undergraduate course, including student assessment and assignment of final grades. GTAs may not be assigned primary responsibilities for teaching and student assessment in courses approved for graduate credit. All graduate students planning to serve as Graduate Teaching Assistants must participate in the Graduate Teaching Assistant Certification Program prior to beginning the first teaching assignment at MSU and must satisfy all program/evaluation requirements necessary to obtain the level of certification (GTA1, GTA2, GTA3) corresponding to the duties/responsibilities of the teaching assistantship appointment. Please refer to Graduate Teaching Assistantship Certification in the Bulletin of the Graduate School for detailed requirements.

Appointment Process

To be eligible for an assistantship a student must be admitted to a specific degree program with “regular” or “contingent” status. A student with “contingent” status must within the first award enrollment period satisfy “regular” admission requirements, and an assistantship award will be terminated if these requirements are not met. “Unclassified” graduate students or graduate students with “provisional” admission status to a degree program are ineligible to hold an assistantship. If English is not the native language of a national graduate student, the English Language Requirements for International Students apply. These requirements are found in the International Students Admission section of the Bulletin of the Graduate School.

Application for an assistantship must be submitted to the college, department, school, or support unit. The department/unit may provide its own application form or use the Application for Graduate Assistantship on the Graduate School Web site (http://www.grad.msstate.edu/forms/pdf/assistantship_app.PDF). The department/unit establishes application deadlines and review procedures.

Award Benefits

All Graduate Assistants receive a tuition exemption of approximately 71% of the assessed tuition and required fees. Graduate Assistants who are not Mississippi residents receive 100% exemption of non-resident tuition as well. The University provides a health insurance subsidy for Graduate Assistants who purchase the University-sponsored health insurance plan through the MSU Longest Student Health Center. The total subsidy is $400 per academic year; $200 in both the fall semester and spring/summer semesters. For more information about the University-sponsored health insurance plan, visit http://www.health.msstate.edu/healthcenter/insurance_student.php.

Responsibilities for Maintaining the Graduate Assistantship

Fall and Spring Semesters — Graduate assistants must be full-time students, registered in 9-13 graduate credit hours. The required full-time status must be maintained through the entire semester. Therefore, no course may be dropped if the resulting course load would be fewer than the required 9 graduate credit hours, nor may any course in the 9-hour load consist of or be converted to audit status. The 9-credit hour course load may not be composed of undergraduate courses unless the course is a program prerequisite. In such case, the minimum graduate load required will be 6 credit hours and only one undergraduate course will be permitted as part of the 9-credit hour load (per Graduate Council, March 2001). Some international students are required by the University to take ESL 5323 and/or ESL 5313. Both are considered prerequisites, and a graduate student may enroll in one of the courses and 6 credit hours of degree-program courses while holding an assistantship. ESL 5323 and ESL 5313 may not be taken concurrently.

Full- and Half-Summer Awards — Full-summer awards require enrollment in at least 6 graduate credit hours with a maximum allowed of 13 credit hours. Any combination may be used to make up the 13-credit hour maximum; however, enrollment in either 5-week term must be at least 3 graduate credit hours with a maximum allowed of 7 credit hours. Additionally, a student holding a half-summer graduate assistantship must be registered for courses scheduled during the term of the assistantship.
X. CONDUCT AND DISCIPLINE

A. Student Conduct

Two objectives of higher education are to develop self-reliance and to form desirable and acceptable habits of conduct among students. Instead of designing numerous regulations to cover in detail matters of student conduct, Mississippi State University recognizes students as adults who are expected to obey the law, rules and regulations of the University, to take personal responsibility for their conduct, to respect the rights of others, and to have regard for the preservation of State and University property as well as the private property of others. Mississippi State University will not police the personal lives of students on or off campus or invade their privacy by spying or intrusive searches; however, students whose conduct threatens to cause disorder, public disturbances, danger to themselves and others, or property damage will be disciplined.

A listing of acts of misconduct which are unacceptable and may require disciplinary action is provided online at http://www.msstate.edu/web/security.html/together with a detailed explanation of disciplinary processes for students in the University. Those apprehended and proven guilty of violating the law or rules and regulations of the University may receive a maximum penalty of expulsion from the University.

B. MSU Honor Code

Academic dishonesty is a corrosive force in the academic life of a university. It jeopardizes the quality of education and deprecates the genuine achievements of others. It is, without reservation, a responsibility of all members of the Mississippi State University community to actively deter it.

All students who are admitted to MSU agree to abide by the Honor Code which states, “As a Mississippi State University student I will conduct myself with honor and integrity at all times. I will not lie, cheat, or steal, nor will I accept the actions of those who do.”

Those individuals who are reported for MSU Honor Code violations will be subject to the procedures and sanctions as found at: www.students.msstate.edu/honorcode.

C. Behavioral Intervention Team (BIT)

The BIT is made up of university representatives who work to connect the dots of problematic actions involving students that may be known to the various faculty, staff and administrators. Departments represented on the BIT include (but are not limited to): Dean of Students Office, Office of the Provost, Faculty, Housing and Residence Life, Student Health Services, Student Counseling Services, Disability Support Services, and the MSU Police Department. The goal of the BIT is to successfully engage, support, and minimize the concerns associated with students in distress. Accomplishing these goals requires a coordinated institutional response that includes all members of the MSU community.

D. Maroon Alert System

Mississippi State University encourages all students, faculty and staff to sign up for the Maroon Alert System. In case of a campus emergency, administration will activate the Maroon Alert system and begin to communicate with the university community using appropriate media including:

- The Web page at www.maroonalert.msstate.edu (yellow banner on the home page)
- Groupwise Instant messaging for students and employees
- Text messaging on participating cell phones
- E-mail using the students or employees official e-mail address
- Campus radio station WMSV 91.1-FM
- Mobile loudspeaker announcements by campus speakers system and police vehicles
- The HOT LINE 325-5555 (activated only during emergency)

XI. ASSOCIATED AGENCIES

THE MISSISSIPPI STATE UNIVERSITY ALUMNI ASSOCIATION INC.

The Mississippi State University Alumni Association was founded June 17, 1885. The mission of the Alumni Association is to foster lifelong support for the University’s mission through programs, activities, and events for its alumni, future alumni, and friends who are forever maroon and white.

The alumni of Mississippi State University have their permanent headquarters in the Hunter Henry Center on the campus. Housed there are over 130,000 address records of alumni and friends of Mississippi State University. In addition, the Center is used frequently by faculty, students and alumni for meetings, conferences and other events.

Some of the services rendered by the Association annually in the promotion of the University are: maintaining and updating biographic and demographic information of all alumni; mailing over 350,000 pieces of mail, including the Alumnus magazine; planning and organizing numerous alumni meetings and special events; supporting various fundraising programs for the University through the MSU Foundation’s Annual Fund and the Bulldog Club; providing support for alumni chapter scholarship programs; supporting the University’s appropriation requests from the Mississippi Legislature; assisting in the recruitment of prospective students to Mississippi State University; sponsoring the Alumni Delegates, student leaders preparing to be alumni leaders; partnering with the University’s Career Center to assist students and alumni with employment opportunities; supporting excellence in teaching, research, and service through the annual Faculty Recognition Program; and assisting in the annual Staff Appreciation Day.

Currently, the Association has 91 chartered local alumni chapters, including 64 in Mississippi, 26 in states throughout the nation, and one in South Korea. In addition to a 44-member National Board of Directors and two standing committees, most chapters and societies have officers, committees, and boards of directors. This totals more than 2,500 volunteer workers on all levels and provides for wide participation of former students and friends in the promotion of their alma mater each year.

For more information, visit the Association’s Web site at www.alumni.msstate.edu.
THE MISSISSIPPI STATE UNIVERSITY FOUNDATION, INC.

Since 1962, the Mississippi State University Foundation, Inc., has served as a nonprofit corporation offering a comprehensive program of giving opportunities for alumni and friends of Mississippi State University. The foundation’s purpose is fourfold:

• to provide the university a way to recruit and draw on the expertise of a network of dedicated volunteers who can assist in soliciting gifts from alumni and friends;
• to provide a mechanism to keep private gifts clearly separate from public funds and to provide flexibility in the use of private funds;
• to assist the university in the investment of endowed funds (the foundation has greater flexibility than the public university to seek the most favorable return on investments); and
• to ensure that funds designated for a particular purpose are used in the manner intended by the donors, and to ensure that funds unrestricted by the donors as to their use are appropriately distributed.

Since the incorporation of the Foundation, alumni and friends have invested $794 million in the University through the Foundation. In the past seven years, nearly $400 million has been contributed. Also during the same period, the endowment has grown from $147 million to over $254 million.

XII. EQUAL OPPORTUNITY STATEMENT

Mississippi State University formally reiterates and reaffirms its commitment to the principles of equal opportunity, affirmative action and diversity. Discrimination based upon race, color, religion, sex, national origin, age, disability, or veteran’s status is a violation of federal and state law and MSU policy and will not be tolerated. Discrimination based upon sexual orientation or group affiliation is a violation of MSU policy and will not be tolerated. This nondiscrimination policy applies to all programs administered by the University. However, this policy should not be construed to infringe upon the free exchange of ideas essential to the academic environment.

To the extent allowed by law, all employment decisions, including those affecting hiring, promotion, demotion, or transfer; recruitment; advertisement of vacancies; layoff and termination; compensation and benefits; or selection for training will be made consistent with the policy articulated above.

Responsibility for communicating, interpreting, and monitoring the University’s equal opportunity policy has been assigned to the Office of Diversity and Equity Programs. The office is located on campus in 106 McArthur Hall. For additional information concerning the university’s equal opportunity policy, call 662-325-2493.

Mississippi State University assigns a high priority to the implementation of its equal opportunity policy and to maintaining an inclusive environment. The realization of this priority requires the cooperation of all members of the University community, each of whom must take responsibility for ensuring that work and learning environments are free from discriminatory behavior of any kind. The University community should be guided not only by what is legally required, but also by fairness, working together to ensure that the University clearly and unequivocally demonstrates commitment to excellence in teaching and learning, values the contributions of every individual, and benefits from its diversity.
College of Agriculture and Life Sciences

GENERAL INFORMATION
The College of Agriculture and Life Sciences (CALS) at Mississippi State University is one of the leading colleges of agriculture, life sciences, and human ecology in the southeast. Student enrollment, degree offerings, and student placement have increased steadily each year.

As a land-grant institution, Mississippi State’s College of Agriculture and Life Sciences offers excellent academic programs related to basic life sciences, environmental issues, agricultural production, food and fiber processing, agribusiness, agricultural information science, and the conservative and sustainable use of natural resources. With the establishment of MSU’s Life Sciences and Biotechnology Institute, the College will continue to enhance the study of the life sciences, including biotechnological applications that will have a tremendous impact on education, agriculture production, food, fibers, human and animal health, the environment and bio-based industrial products.

Students may choose from 15 undergraduate curricula in the College of Agriculture and Life Sciences. Each degree program will prepare students for career opportunities in the multi-billion dollar agricultural and life sciences’ industry. These programs will also prepare students for graduate and/or professional school study.

Organization: The College of Agriculture and Life Sciences is one of five major units of the Division of Agriculture, Forestry and Veterinary Medicine. The others are the Mississippi Agricultural and Forestry Experiment Station (MAFES), Mississippi State University Extension Service (MSU-ES), the College of Forest Resources (CFR), the Forest and Wildlife Research Center (FWRC), and the College of Veterinary Medicine (CVM).

Faculty and Facilities: The level of education of the faculty of the College of Agriculture and Life Sciences, as measured by advanced degrees and by the diversity of the institutions from which these degrees were earned, is exceptionally high. The teaching faculty includes resident staff of the MAFES and MSU-ES, which offer valuable opportunities for students on the undergraduate and graduate (See MSU Graduate Bulletin) levels. The sharing of faculty and facilities between the College of Agriculture and Life Sciences, MAFES, and MSU-ES keeps the instructional program current and meaningful to students.

POLICIES
Graduation Requirements: The minimum requirements for graduation with a Bachelor of Science degree in the College of Agriculture and Life Sciences include the following:

1. Fulfillment of all university academic requirements as published in this Bulletin.
2. Completion of the General Education requirements as published in this Bulletin. (See Listing of Approved General Education Courses)
3. Completion of all program requirements in the major of choice with an average of “C” or better (2.00 on a 4.00 scale).
4. Completion of sufficient upper level credit hours to satisfy the university requirement of twenty-five percent of degree hours in upper level courses.

All students should consult with their assigned departmental advisor who will review and approve course schedules and provide information and answer questions regarding progress toward degree, career opportunities, and campus resources.

Computer Requirements: The College of Agriculture & Life Sciences requires all entering freshmen and transfer students to own or lease a personal computer. This college-wide requirement is a proactive measure to ensure that students will develop the computer skills necessary for success in agriculture and life sciences professions. The CALS will identify the minimum computer specifications, which is vital to the overall university computing system, the university’s Information Technology Services, and classroom and laboratory computer accommodations. This

information will be posted on the College of Agriculture and Life Sciences Web site (http://www.cals.msstate.edu) by July 1 of each year. Additional information on computer specifications, software, and purchasing and/or lease information (if available), and additional departmental requirements, will also be included on the CALS web site.

PRE-PROFESSIONAL PROGRAMS: The College of Agriculture and Life Sciences offers a number of programs of study that lead to Professional and graduate degree programs including:

- Pre-Veterinary Medicine
- Pre-Law
- Pre-Medicine
- Pre-MBA
- Pre-Pharmacy

Pre-professional programs of study within CALS enable students to have completed all requirements necessary for admission to the graduate and professional programs of their choice. See listed majors for the specific requirements for each of these areas and contact departmental representatives for additional information.

DEGREE PROGRAMS
Students may choose from the following degree programs and concentrations in the College of Agriculture and Life Sciences:

Agricultural Engineering Technology and Business
Aquacultural Systems
Enterprise Management
Gin Management and Technology
Surveying/Geomatics
Natural Resource and Environmental Management
Precision Agriculture/Ag Systems

Agribusiness
Management
Policy and Law
Production

Agricultural Information Science
Teaching
Agricultural Leadership

Agricultural Science
Animal and Dairy Science
Dairy Science and Production
Equine Science and Production
Meat Animal Science and Production
Science/Veterinary Science

Biochemistry
Bioinformatics
Forensic Science
Pre-Medicine
Pre-MBA
Pre-Pharmacy
Pre-Veterinary Medicine
Biological Engineering

Environmental Economics and Management

Food Science, Nutrition and Health Promotion
Food/Nutrition
Food Safety/Pre-Veterinary Medicine
Food Processing/Business
Culinology®
Food Science

Human Sciences
Apparel, Textiles and Merchandising
Human Development and Family Studies
Gerontology Certificate
Landscape Architecture
Landscape Contracting and Management
Agronomy
Golf and Sports Turf Management
Integrated Crop Management
Agricultural and Environmental Soil Science
Integrated Pest Management
Horticulture
Floriculture and Ornamental Horticulture
Floral Management
Poultry Science
Business Management
Processed Products
Manufacturing Production Systems
Pre-Veterinary Medicine

Minors are available in a number of these programs. See the appropriate degree program in this Bulletin for additional information or call departmental representatives.

Emphasis in INTERNATIONAL AGRICULTURE
An emphasis in International Agriculture is available to students majoring in any curriculum in the College of Agriculture and Life Sciences. This emphasis is intended to prepare students for possible careers in agricultural production or marketing on an international scale.

Students interested in this emphasis will take the following in addition to requirements for their majors. The specific courses included will be determined by the department involved and the student’s interest, but will include the following minimums.

<table>
<thead>
<tr>
<th>SUBJECT MATTER</th>

FIVE-YEAR, TWO-DEGREE CURRICULA in AGRICULTURE and BUSINESS and in AGRICULTURE and LIBERAL ARTS

Five-year, two-degree curricula leading to Bachelor of Science degrees in both Agriculture and Business and Agriculture and Liberal Arts are available. Such curricula may be designed with a major in any field of agriculture or human sciences combined with a major in any field of business or liberal arts. These programs must meet the minimum requirements of 124 semester hours with a C average or better for a degree in Agriculture including (1) a minimum of 54 semester hours with a C average or better in business approved by the College of Business and Industry, or (2) a minimum of 48 hours with a C average or better in the liberal arts field approved by the College of Arts and Sciences.

Students desiring to follow a five-year, two-degree curriculum will develop a detailed program by consultation with advisors in the College of Agriculture and Life Sciences and the College of Business and Industry or the College of Arts and Sciences. The two degrees are conferred simultaneously at the end of the fifth year. Students should declare their intentions of pursuing the two-degree program as early as possible, generally not later than the end of the sophomore year.

SHORT COURSES in AGRICULTURE and LIFE SCIENCES
Short courses ranging from three days to two weeks in duration are given when the need arises. The nature of the educational program and its length are determined by the needs of the particular groups served. Information regarding short-course programs may be secured from the dean or the head of the department offering the course.

PRE-VETERINARY MEDICINE
The College of Agriculture and Life Sciences does not offer a degree in Pre-Veterinary Medicine; therefore, students should select a major that includes Pre-Veterinary courses. These requirements are included in the following degree programs: Animal and Dairy Sciences, Poultry Science, Food Science, Nutrition and Health Promotion, Biochemistry and Molecular Biology, Microbiology and Biological Sciences (the latter two degree programs are located in the College of Arts and Sciences). Each of the four degree programs within the College of Agriculture and Life Sciences (CALS) allows the student to complete the necessary requirements for entry to the College of Veterinary Medicine and a Bachelor of Science simultaneously. To receive a Bachelor of Science degree, each student must meet the curriculum requirements set forth by the respective department provided through the Pre-Veterinary Medicine Concentration (Example: See Animal and Dairy Sciences). Upon the successful completion of the undergraduate degree program through the junior year and the pre-veterinary medicine course requirements, a student may apply to the College of Veterinary Medicine (CVM). Upon the successful completion of the first year of CVM courses (approximately 40-42 hrs.), a student may apply these hours toward the bachelor’s degree. This course work can serve as the senior year of the undergraduate curriculum. This “three plus one” program is offered by the College of Agriculture and Life Sciences for pre-veterinary students.

Address inquiries concerning the Pre-Veterinary medicine concentrations available to desired degree program and advisor listed below:

Animal and Dairy Sciences Pre-Veterinary Medicine Program
Department of Animal and Dairy Sciences

CH 4523 Organic Chemistry II
Biochemistry (3 hrs)
Physics with lab (6 hrs) (can be trig-based)
PH 1123 General Physics
Department of AGRICULTURAL ECONOMICS (AEC)

Major Advisor: Dr. Randy Little
Office: 325-2750

Agriculture and related businesses create more employment than does any other industry. The agribusiness industry accounts for nearly one-fifth of the U.S. gross national product and employs close to one-fourth of the U.S. labor force. Fully understanding how economic forces affect today’s agriculture industry is critical for those seeking careers in agriculture-related businesses.

A growing field within economics is environmental economics. A key challenge to the U.S. economy in the 21st century is finding a balance between the demand for natural resources and the need to preserve our environment. Individuals who can analyze these complex problems will be needed for the new “green jobs” that require sustainable solutions to resource and environmental issues.

Two majors, Environmental Economics and Agribusiness, are offered to provide an understanding of economic forces and business management principles as well as technical knowledge of technical agriculture and environmental science. Students completing either major will be prepared to pursue additional training at the graduate level.

Students who plan to attend a community college before transferring to Mississippi State are strongly encouraged to contact the Department’s major advisor regarding their proposed community college course schedule and transfer requirements.

Students in both majors are required to earn a “C” or better in all required (non-elective) agricultural economics (AEC), economics (EC), English (EN), and mathematics (MA) courses.

ENVIRONMENTAL ECONOMICS and MANAGEMENT (EEM)

The Environmental Economics and Management (EEM) major is designed to prepare students for the efficient and productive management of natural and environmental resources. Students receive excellent functional training and learn skills in the areas of environmental science, policy and economics. Potential career fields include, but are not limited to, environmental law; natural resource and environmental policy analysis; environmental consulting; and resource management. In addition, students desiring postgraduate training will have a solid academic foundation for pursuing graduate or professional degrees.

Environmental Economics and Management Minor

The Department of Agricultural Economics offers a minor in Environmental Economics and Management to students outside the department. Course selection for the minor is designed to equip students with fundamental economic and management principles pertinent to environmental and resource policy issues to broaden the scope of career opportunities for students completing the minor.

A minor in Environmental Economics and Management is attained by completing at least 18 hours of environmental and resource economics courses. To satisfy the minor, students must maintain a 2.0 grade point average in courses taken to satisfy the minor. Students may choose among the following:

Required:

AEC 2713 Introduction to Food and Resource Economics
(AEC or EC 2123 Principles of Microeconomics)

AEC 3233 Intro to Environmental Economics and Policy

AEC 4233 Advanced Topics in Environmental Economics

AEC 4243 Natural Resource Economics

In addition, choose at least three of the following:

AEC 3113 Introduction to Quantitative Economics

AEC 3513 Economics of Food and Fiber Production

AEC 4123 Financial and Commodity Futures Marketing

AEC 4413 Public Problems of Agriculture

Students are responsible for satisfying all prerequisites before registering for courses. A grade of C or better must be earned in each course to be counted toward the minor. A grade of C or better must be earned in each course to be counted toward the minor. Only students outside the Department of Agricultural Economics are eligible for the minor.
AGRICULTURAL AND BIOLOGICAL ENGINEERING (ABE)

Agricultural Engineering Technology and Business (AETB)

The AETB program provides an educational opportunity for students interested in applying technical, business, and management skills to problems in agricultural production, processing, commodity related business and finance, and natural resources utilization. A Bachelor of Science degree is offered by the Agricultural and Biological Engineering Department through the College of Agriculture and Life Sciences.

The AETB program provides the industry with men and women possessing excellent skills in the engineering technologies, as well as a thorough background in business and management. This combination allows the AETB graduate to excel in virtually any business enterprise.
The AETB Base Curriculum prepares the graduate for the many diverse opportunities afforded by the industrial and agricultural industries. In addition to the broad background in agricultural technologies and business, students may concentrate on a particular career-path by completing an AETB concentration. The AETB Base Curriculum provides six concentrations: (1) Aquacultural Systems, (2) Enterprise Management, (3) Gin Management & Technology, (4) Natural Resources & Environment Management, (5) Precision Agriculture, and (6) Surveying/Geomatics. These concentrations are achieved by completing 12-18 hours of specified technical electives as approved by an AETB advisor. In addition, the Surveying/Geomatics concentration is supported through a unique AETB curriculum.

The Aquacultural Systems concentration provides an enhanced background in fishery management, fish disease, and water quality. The Enterprise Management concentration is designed to provide skills for agricultural and business enterprise management. The curriculum provides a broad background including both animal and plant sciences, agricultural technology, economics, business and management. The Gin Management and Technology concentration provides graduates with a thorough education in cotton gin management and fiber processing. Courses emphasize technologies that are specific to the fiber processing industry including: hydraulics, pneumatics, industrial controls, seed technologies, biological materials handling, industrial safety and human relations. The Natural Resources and Environmental Management concentration provides an enhanced background in geology, hydrogeology, resource conservation, and water quality for students pursuing careers that require environmental training. The Precision Agriculture and Surveying/Geomatics concentrations provide courses in remote sensing, GPS, GIS, and surveying to enhance the student’s abilities for careers involving spatial technologies. The Surveying/Geomatics students take an additional 12 hours of surveying courses. The jobs available in several of these concentrations exceed the supply of graduates.

Transfer credits with a grade of C or higher will be considered toward fulfillment of the degree requirements in the AETB curriculum. A maximum of 12 transfer hours of technical credit can be applied toward degree requirements.

Employment for AETB graduates includes the following agricultural industries/government agencies: food/fiber production (farming), agrochemical, agricultural lending, aquaculture, banking, cotton ginning, seed & grain processing, crop consulting, agricultural equipment manufacturers and sales, farm management, land surveying in both the public and private sectors, food processing, and hydrographic surveying and map development via the use of remote sensing, GIS, GPS, photogrammetry, etc. data.

General Education Requirements

English Composition (6 hours)
- EN 1103 English Comp I OR
- EN 1163 Accelerated Comp I
- EN 1113 English Comp II OR
- EN 1173 Accelerated Comp II

Mathematics (6 hours)
- MA 1313 College Algebra
- MA 1323 Trigonometry

Science (9 hours)
- PH 1113 General Physics I
- PH 1123 General Physics II
- CH 1043 Survey of Chemistry I

Humanities (6 hours)
- 3 hours Select from General Education courses
- 3 hours Select from General Education courses

Fine Arts (3 hrs)
- 3 hours Select from General Education courses

Social Science (6 hours)
- AEC 2713 Intro to Food and Resource Econ
- 3 hours Select from General Education courses

Major Core
- ABE 1073 Agricultural Mechanics
- ABE 2873 Land Surveying
- ABE 3513 GPS and GIS
- ABE 4263 Soil and Water Management
- ABE 4383 Building Construction
- ABE 4473 Elec Applications
- ABE 4961 Seminar
- EG 1143 Graphic Communications
- 3 hours Technical Elective

AETB Elective - choose one of the following:
- ABE 2173 Internal Combustion Engines
- ABE 4163 Machinery Mgt for Agro-Ecosystems

Science Courses
- CH 1053 Survey of Chemistry II
- CH 1051 Experimental Chemistry

Business Courses
- ACC 2013 Principles of Financial Accounting
- ACC 2023 Principles of Managerial Accounting
- BL 2413 Legal Environment of Business
- MGT 3513 Intro Human Resources Mgt

Financial Elective - choose one of the following:
- INS 3413 Intro to Personal Finance Planning
- FIN 2003 Personal Money Management
- FIN 3113 Financial Systems

Oral Communication Requirement
- CO 1003 Fundamentals of Public Speaking

Writing Requirement
- AIS 3203 Intro to Tech Writing

Computer Literacy Requirement
- Satisfied by successful completion of EG 1143, ABE 3513 and ABE 4473.

Choose one of the following concentrations:

Aquacultural Systems (ACSY)

- ABE 1863 Engineering Tech in Ag
- PSS 3303 Soils
- PSS 3301 Soils Lab
- ADS 1114 Animal Science OR
- BIO 1134 Biology I
- PSS 1313 Plant Science OR
- BIO 1023 Plants and Humans
- AEC 3133 Ag Business Management

Electives: choose 18 hours*
- BIO 3524 Biology of Vertebrates
- CVM 4134 Aquatic Animal Health Mgt
- WFA 4183 Principles and Practices of Aquaculture
- WFA 4372 Water Quality Management
- WFA 4371 Water Quality Mgt Lab
- FNH 2664 Food Processing OR
- FNH 4613 Aquaculture Processing
- 3 hours Aquaculture Science Elective - consult advisor

Total hours needed for major: 124

Enterprise Management (EMGT)

- ABE 1863 Engineering Tech in Ag
- PSS 3303 Soils
- PSS 3301 Soils Lab
- ADS 1114 Animal Science OR
- BIO 1134 Biology I
- PSS 1313 Plant Science OR
- BIO 1023 Plants and Humans
- AEC 3133 Ag Business Management

Electives: choose 18 hours*
- MA 1613 Calculus for Business and Life Sciences
- ST 2113 Intro to Statistics
- AEC 3213 International Trade in Ag
- AEC 3233 Intro to Environmental Economics
- 3 hours Enterprise Mgt Elective - consult advisor
- 3 hours Enterprise Mgt Elective - consult advisor

Total hours needed for major: 124

Precision Agriculture (PRAG)

- ABE 1863 Engineering Tech in Ag
- PSS 3303 Soils
- PSS 3301 Soils Lab
- ADS 1114 Animal Science OR
The ABE Department will offer ABE 4990 Special Topics courses periodically. Depending on the subject matter of the course, ABE 4990 may be an approved concentration elective.

* The ABE Department will offer ABE 4990 Special Topics courses periodically. Depending on the subject matter of the course, ABE 4990 may be an approved concentration elective.

** For approved Emphasis Electives, consult advisor.
Meat Animal Science & Production (MASP)
(26-29 hrs)

- ADS 4213 Nutrient Requirements & Form of Rations
- ADS 4412 Managing Livestock Sales I
- PSS 4103 Forage & Pasture Crops
- ADS 4324 Beef Cattle Production
- ADS 4313 Swine Science
- ADS 3213 Livestock Growth, Development & Evaluation
- ADS 4314 Meats Processing
  - 2-4 hours 1 Production Elective*
  - 2-3 hours 1 Evaluation Elective **

Business electives***
- 12-13 hours Approved courses listed below+

Free electives
- 0-8 hour Free electives

Writing Requirement
Satisfied by successful completion of ADS 3213, ADS 4213, ADS 4613 and one of: ADS 3223, ADS 4324 or ADS 4814

Oral Communication Requirement
Satisfied by successful completion of ADS 3213 and two of: ADS 2102, ADS 2122, ADS 4212, ADS 4221, or ADS 4232

Dairy Science & Production (DSPD)
(29-31 hours)

- FNH 4164 Quality Assurance of Food Products
- ADS 4213 Nutrient Requirements & Form of Rations
- ADS 4412 Managing Livestock Sales I
- PSS 4103 Forage & Pasture Crops
- ADS 4814 Dairy Farm Management
- ADS 3813 Dairy Cattle Appraisal
- ADS 4623 Physiology of Lactation
  - 5-8 hours 2 Production Electives*
  - 2-3 hours 1 Evaluation Elective **

Business electives***
- 12-13 hours Approved courses listed below+

Free electives
- 0-8 hour Free electives

Writing Requirement
Satisfied by successful completion of ADS 4213, ADS 4613, and ADS 4814

Oral Communication Requirement
Satisfied by successful completion of two of: ADS 2102, ADS 2122, ADS 3213, ADS 4212, ADS 4221, or ADS 4232

Equine Science & Production (ESPD)
(28-31 hours)

- ADS 2102 Equine Conf & Performance Eval
- ADS 3223 Horse Management
- ADS 4314 Meats Processing OR
- FNH 4164 Quality Assurance of Food Products
- ADS 4213 Nutrient Requirements & Form of Rations
- ADS 4412 Livestock Sales I
- PSS 4103 Forage & Pasture Crops
- ADS 4333 Equine Exercise Physiology
  - 2-3 hours Horsemanship Elective: choose one
    - ADS 1132 Introduction to Horsemanship
    - ADS 2212 Equine Behavior and Training
    - ADS 2312 Advanced Horsemanship
    - ADS 3233 Equine Assisted Therapy
  - 5-8 hours 2 Production Electives*
  - 2-3 hours 1 Evaluation Elective **

Business electives***
- 12-13 hours Approved courses listed below+

Free electives
- 0-8 hour Free electives

Writing Requirement
Satisfied by successful completion of ADS 4213, ADS 4613 and ADS 3223

Oral Communication Requirement
Satisfied by ADS 2102 and by successful completion of one of: ADS 2122, ADS 3213, ADS 4212, ADS 4221, or ADS 4232

Total hours needed for major: 124

* Production Electives: ADS 3223 Horse Management; ADS 4313 Swine Science; ADS 4222 Small Rum. & Diver; Livestock Prod; ADS 4324 Beef Cattle Production; ADS 4814 Dairy Farm Mgt;
*** These courses also count towards a Minor in Agriculture.
+ Choose from: AEC 2713, AEC 3133, AEC 3213, AEC 3233, AEC 3413, AEC 4123, ACC 2013, EC 2113, EC 2123 OR MGT 3114

Science/Veterinary Science (SVTS)

- ADS 4314 Meats Processing OR
- FNH 4164 Quality Assurance of Food Products
- BIO 4413 Immunology
- VS 3014 Anatomy & Physiology
- PH 1113 General Physics I
- ADS 4623 Physiology of Lactation
  - 5-8 hours 2 Production Electives *
  - 2-3 hours 1 Evaluation Elective **
- Science Electives - choose two courses†

Free electives
- 4-12 hours

Writing Requirement
Satisfied by successful completion of ADS 4613, ADS 4623 and one of: ADS 3213, ADS 3223, ADS 4324 or ADS 4814

Oral Communication Requirement
CO 1003 Fundamentals of Public Speaking

Total hours needed for major: 124

* Production Electives: ADS 3223 Horse Management; ADS 4313 Swine Science; ADS 4222 Small Rum. & Diver; Livestock Prod; ADS 4324 Beef Cattle Production; ADS 4814 Dairy Farm Mgt;
† Science electives: ADS 4313 Equine Exercise Physiology, BCH 4613 General Biochemistry, BIO 2103 Cell Biology, BIO 3104 Ecology, BIO 3113 Marine Biology, BIO 3306 Parasitology, BIO 3404 Comparative Anatomy, BIO 3524 Biology of Vertebrates, BIO 4103 Experimental Genetics, BIO 4113 Evolutionary Biology, BIO 4114 Cellular Physiology, BIO 4404 Environmental Microbiology, BIO 4405 Pathogenic Microbiology, BIO 4414 Microbiology of Foods, BIO 4433 Principles of Virology, BIO 4502 Toxicology, BIO 4503 Vertebrate Histology, BIO 4504 Comparative Vertebrate Embryology, BIO 4513 Immunology, BIO 4514 Animal Physiology, BIO 4523 Mammalogy, BIO 4543 Ornithology, CH 4122 & CH 4521 Organic Chemistry II and lab, CVM 4513 Environmental Toxicology, CVM 4523 Basic Neuroscience, PH 1123 General Physics II, PO 4843 Avian Physiology

Course requirements for Pre-Veterinary students (3+1 program) to obtain a B.S. degree in Animal and Dairy Sciences

Because (1) the entrance requirements for the College of Veterinary Medicine satisfy a portion of the course requirements for the Animal and Dairy Sciences curriculum (2) a number of students are enrolled in Animal and Dairy Sciences while satisfying their pre-veterinary requirements and (3) an Animal and Dairy Sciences degree will be especially helpful to a practicing veterinarian, the following requirements for those electing to apply for a Bachelor of Science degree in Animal and Dairy Sciences after successfully completing the first year of Veterinary Medicine are listed.

General Education Requirements
- 27 hours
- Dept Core (excluding Seminar)
- 50-51 hours

Science/Veterinary Medicine Concentration
- 27-30 hours (excl. Free Electives)

To qualify for the Bachelor of Science degree in ADS, a student in the 3+1 program must complete the 3 years of above listed undergraduate course work (105-108 hours) and also successfully complete the first year of the Veterinary Medicine curriculum.

A minor is available in Animal and Dairy Sciences by completing a minimum of 17 hours of specified ADS courses. Requirements include an introductory course, an evaluation course, a physiology course, 5 to 7 hours of production courses and either a breeding course or a nutrition course. See an ADS advisor for a complete list of approved courses.
Department of BIOCHEMISTRY, MOLECULAR BIOLOGY, ENTOMOLOGY and PLANT PATHOLOGY (BCH, EPP)

Department Head/Major Advisor: Scott T. Willard
Office: 402 Dorman

BIOCHEMISTRY and MOLECULAR BIOLOGY

The Biochemistry and Molecular Biology program within the Department of BCH-EPP involves disciplines at the cutting edge of a revolution in biology. Molecular methods and the use of genetic engineering have given scientists unprecedented power to begin to understand the chemistry of life processes. The Department of BCH-EPP aims to prepare students at Mississippi State in this exciting area. In addition to the undergraduate curriculum in biochemistry and molecular biology, the department provides opportunities for an M.S. degree in Agricultural Life Sciences with a concentration in Biochemistry and a Ph.D. in Molecular Biology (See the Graduate Bulletin for description of programs and requirements for advanced degrees). The undergraduate curriculum leads to a Bachelor of Science degree in biochemistry and molecular biology. The objective of this curriculum is to provide the student with a strong background in science, and to prepare the student for entry into professional schools, graduate study and/or highly technical scientific careers after graduation. There are sufficient individual choices in the curriculum to allow students to tailor their programs to any of several areas of specialization by appropriate use of elective hours.

General Education Requirements

English Composition (6 hours)
- EN 1103 English Comp I OR
- EN 1163 Accelerated Comp I
- EN 1113 English Comp II OR
- EN 1173 Accelerated Comp II

Mathematics (6 hours)
- MA 1713 Calculus I
- MA 1723 Calculus II

Science (9 hours)
- See major core
- Humanities (6 hours)
  - Select from General Education courses
- Fine Arts (3 hours)
  - Select from General Education courses
- Social Sciences (6 hours)
  - Select from General Education courses

Major Core
- CH 1213 Chemistry I
- CH 1211 Investigations in Chemistry I
- CH 1223 Chemistry II
- CH 1221 Investigations in Chemistry II
- CH 2313 Intro to Analytical Chemistry
- CH 4513 Organic Chemistry I
- CH 4511 Organic Chemistry Lab
- CH 4523 Organic Chemistry II
- CH 4521 Organic Chemistry Lab
- BCH 1001 Intro to Biochemistry
- BCH 4603 General Biochemistry I
- BCH 4414 Protein Methods
- BCH 4613 General Biochemistry II
- BCH 4623 Biochemistry of Special Tissues
- BCH 4713 Molecular Biology
- BCH 3901 Senior Seminar
- BCH 4804 Molecular Biology Methods
- BIO 1203 Plant Biology
- BIO 1504 Principles of Zoology
- BIO 3304 General Microbiology
- BIO 4114 Cell Physiology
- PH 2213 Physics I*
- PH 2223 Physics II*
- 18 hours Technical Electives **
- 10 hours General Electives

Oral Communication Requirement
- CO 1003 Fundamentals of Public Speaking

Writing Requirement
- Satisfied by successful completion of BCH 4414 and BCH 4804

Computer Literacy
- Satisfied by successful completion of BCH 4414, BCH 4713 and BCH 4804

Total hours needed for major: 120

* PREMED, PREVET, and PREDENT majors are given the option of scheduling PH 1113 and PH 1123. In addition, PREMED majors must schedule a third semester of physics, either PH 1133 or PH 2233.

** Students desiring a B.S. degree without a concentration will be required to take 18 hours of technical electives to be selected in collaboration with an advisor. Technical electives serve to prepare students for different areas of specialization. In addition, these students will need 10 hours of general electives.

Pre-Medical Concentration (MED)

Biochemistry is an excellent preparation for medical school. In order to be better prepared for the Medical College Admissions Test (MCAT), medical school classes, and to meet medical school entrance requirements, the following courses are required in lieu of technical or general electives. These courses are also appropriate for students interested in dental school.

- BIO 2103 Cell Biology
- BIO 3103 Genetics OR
- BIO 4133 Human Genetics
- BIO 4413 Immunology
- PH 1133 General Physics III OR
- PH 2233 Physics III

6 hours Technical electives
10 hours General electives

Pre-Pharmacy Concentration (PPHR)

Pharmacy school typically requires only two years of college work. However, four-year undergraduate programs can be of benefit to students and Biochemistry graduates have been very successful in Pharmacy School. The following courses are required as either Social Science core courses or in lieu of technical or general electives.

- PSY 1013 General Psychology OR
- SO 1003 Introduction to Sociology
- EC 2113 Principles of Macroeconomics
- EC 2123 Principles of Microeconomics
- ST 2113 Introduction to Statistics
- BIO 2014 Human Physiology
- 8 hours Technical electives
- 10 hours General electives

Bioinformatics Concentration (BINF)

This concentration provides the student with a B.S. in Biochemistry and Molecular Biology incorporating a strong background in the biochemical sciences along with a rigorous preparation in the field of computer science. The graduate will be able to either enter graduate school or directly enter a job requiring knowledge of bioinformatics. This exciting field applies computational and database skills to molecular biological problems. Practitioners routinely mine genomic databases for information relating to basic understanding of life processes as well as information providing clues for medical and agricultural advances. This program also constitutes a minor in computer science. Students MUST take the following courses in lieu of technical and general electives.

- CSE 1284 Introduction to Computer Programming
- CSE 1384 Intermediate Computer Programming
- CSE 2383 Data Structures and Analysis of Algorithms
- CSE 2813 Discrete Structures
- CSE 3833 Introduction to Analysis of Algorithms
- CSE 3813 Introduction to Formal Languages and Automata
- CSE 4633 Artificial Intelligence
- CSE 4623 Computational Biology
- ST 3123 Introduction to Statistical Inference

Pre-MBA Concentration (PMBA)

This concentration provides the student with a B.S. in Biochemistry incorporating a strong background in science and prepares the student for immediate entry into a graduate program leading to an advanced business degree (either the Master of Business Administration or the Master of Agribusiness Management). Either program can be completed in a minimum of three semesters. Students thus educated may enter into management level positions in the biotech or agribusiness industry. The
following courses are required as either Social Science core courses or in lieu of technical or general electives.

ACC 2013 Financial Accounting
ACC 2023 Managerial Accounting
EC 2113 Macroeconomics
EC 2123 Microeconomics
BQA 2113 Business Statistics I
BQA 3123 Business Statistics II
MGT 3114 Principles of Management and Production
MKT 3013 Principles of Marketing
FIN 3123 Financial Management

Forensic Sciences Concentration (FOSC)

This concentration provides the student with a B.S. in Biochemistry incorporating a strong background in the biochemical sciences along with a rigorous preparation in the general area of criminology and forensics. Because of the ever increasing use of molecular sciences in forensics, graduates with this specialization should be employable by crime labs or by industry using DNA profiling or other biometric techniques. Internships are encouraged. The following courses are required as either Social Science core courses or in lieu of technical or general electives.

PSY 1013 General Psychology
SO 1003 Introduction to Sociology
ST 2113 Introduction to Statistics
SO 3313 Deviant Behavior
SO 3603 Criminology
COR 3103 Criminal Justice System
PSY 4373 Forensic Psychology

3 hours Technical electives
10 hours General electives

Pre-Veterinary Medicine Concentration (PVBC)

Biochemistry is an excellent preparation for veterinary medical school. In order to be better prepared for the Graduate Record Examination (GRE), veterinary medical school classes, and to meet veterinary medical school entrance requirements, the following courses are required as either Social Science core courses or in lieu of technical or general electives.

BIO 3103 Genetics
BIO 4413 Immunology
VS 3014 Anatomy and Physiology
8 hours Technical electives
10 hours General electives

Three year program (3+1) for early admission into the COLLEGE of VETERINARY MEDICINE

The aim of this curriculum is to allow a student to matriculate through the Department of Biochemistry and Molecular Biology for three years and then proceed into the College of Veterinary Medicine under their early admissions policy. Successful completion of the courses taken during the first year in Veterinary Medicine will satisfy the Department’s requirements for technical electives and allow the University to grant the student a B.S. in Biochemistry and Molecular Biology after this period.

30 hours General Education requirements
CH 1213 Chemistry I
CH 1211 Investigations in Chemistry
CH 1222 Chemistry II
CH 1221 Investigations in Chemistry
CH 2313 Intro to Analytical Chemistry
CH 4513 Organic Chemistry
CH 4511 Organic Chemistry Lab
CH 4523 Organic Chemistry
CH 4521 Organic Chemistry Lab
BCH 1001 Intro to Biochemistry
BCH 4603 General Biochemistry I
BCH 4414 Protein Methods
BCH 4613 General Biochemistry II
BCH 4623 Biochemistry Special Tissues
BCH 4713 Molecular Biology
BCH 3901 Senior Seminar
BCH 4804 Biochemical Methods

95 hours required plus successful completion of the first year curriculum of the College of Veterinary Medicine

Mississippi State requires a minimum of 120 hours for the undergraduate degree. Therefore, the first year in the College of Veterinary Medicine will contribute 25 hours of technical electives to this program.

GRADUATE STUDIES TRACK

Students aiming for a career requiring graduate education should take Genetics and Cell Biology as technical electives. Since many graduate programs require some form of physical chemistry, it is strongly suggested that students take CH 4413/4423 Physical Chemistry or CH 4404 Biophysical Chemistry as technical electives.

Preparation for entry into an accelerated MASTER’S PROGRAM (THESIS) in BIOCHEMISTRY and MOLECULAR BIOLOGY

This program requires careful planning by the student in order to complete the requirements for the B.S. while beginning a research program that should result in successful completion of a Master’s thesis at the end of the second summer after the B.S. Only exceptional and motivated students should attempt this program. It is critical that BCH 4603 General Biochemistry I be scheduled in the spring of the sophomore year. The student will be expected to begin a research project in the senior year by taking up to nine hours of Directed Individual Study courses (BCH 4000). Research will continue during the summer after completion of the B.S. degree. The student must register for BCH 8000 (3 hours), Thesis Research during the summer. In addition, the student should schedule a graduate level BCH course and ST 8114 in the spring of the senior year.

The student interested in the five year program should apply early in the undergraduate program to facilitate the scheduling of courses to conform to time constraints. In addition to applying for admission to the graduate program, the student must also take the Graduate Record Examination early enough so that the results are available by the beginning of the semester in which the student expects to graduate. The student must complete the courses required for completion of the BS degree with no more than 10 hours remaining in the semester of expected graduation.

Preparation for entry into an accelerated MASTER’S PROGRAM (NON-THESIS) in BIOCHEMISTRY and MOLECULAR BIOLOGY

This program requires careful planning by the student in order to complete the requirements for the B.S. while initiating graduate work that should result in completion of courses leading to a Master’s Degree, non-thesis concentration. This curriculum allows completion of the two degrees in a minimum of five years. Required courses and electives must be scheduled so that the student has only eight hours of undergraduate course work remaining in the spring of the senior year. The student should then schedule ST 8114 Statistical Methods and an 8000 level BCH course in that same semester. Graduate work must include BCH 8654 Intermediate Metabolism and BCH 7000 (3 hrs) Directed Individual Study (to allow completion of an independent research paper).

The student interested in the five year program should apply early in the undergraduate program to facilitate the scheduling of courses to conform to time constraints. In addition to applying for admission to the graduate program, the student must also take the Graduate Record Examination early enough so that the results are available by the beginning of the semester in which the student expects to graduate. The student must complete the courses required for completion of the B.S. Degree with no more than 10 hours remaining in the semester of expected graduation.

Preparation for entry into an accelerated Ph.D. PROGRAM IN MOLECULAR BIOLOGY

This program requires careful planning by the student in order to complete the requirements for the B.S. while beginning a research program that should meaningfully accelerate progress towards early completion of the Ph.D. degree in Molecular Biology. By initiating a research program in the senior year, a student should reduce the time to comple-
tion of the Ph.D. by a year. Only exceptional and motivated students should attempt this program. It is critical that BCH 4603 General Biochemistry I be scheduled in the spring of the sophomore year.

The student will be expected to begin a research project in the senior year by taking the Directed Individual Study Courses. Research will continue during the summer after completion of the B.S. degree. The student must register for BCH 8003, Thesis Research during the summer.

The student should plan his/her complete graduate program of study in conjunction with research Director and Graduate Committee. Since the Ph.D. is primarily a research degree, ultimate time to completion will be dependent upon the period necessary to satisfy the research requirements of the Graduate Committee. This concentration allows the student to begin that research substantially earlier than usual.

ENTOMOLOGY

The Entomology program within the Department of BCH-EPP involves the study of insects and the impact of insects on the health and economic well-being of mankind. The Clay Lyle Entomology Complex houses the entomology faculty and staff, and the laboratory and classroom facilities support a broad range of extension, research and teaching functions. Students have access to a wide range of entomological expertise. Most faculty have joint appointments with the College of Agriculture and Life Sciences and the Mississippi Agricultural and Forestry Experiment Station and/or the Mississippi Cooperative Extension Service. The breadth of the department is also influenced by several USDA/ARS research laboratories located on campus and at Stoneville, Mississippi. A Master of Science in Agricultural Life Sciences with a concentration in Entomology and Plant Pathology and a Doctor of Philosophy degree in Life Sciences with a concentration in Entomology and Plant Pathology are offered (See the Graduate Bulletin for description of programs and requirements for advanced degrees.)

PLANT PATHOLOGY

The Plant Pathology program within the Department of BCH-EPP involves the study of plant diseases, their causal agents and methods of control. Emphasis is placed on protection of environmental quality. A Master of Science in Agricultural Life Sciences with a concentration in Entomology and Plant Pathology and a Doctor of Philosophy degree in Life Sciences with a concentration in Entomology and Plant Pathology are offered (See the Graduate Bulletin for description of programs and requirements for advanced degrees.)

Department of FOOD SCIENCE, NUTRITION and HEALTH PROMOTION (FSNH)

Department Head: Professor William Benjy Mikel
Office: 107 Herzer Building

The Food Science, Nutrition and Health Promotion major offers the opportunity to gain a broad education in food science, nutrition, and health, as well as the specific academic background to pursue careers as food scientists and dietitians/nutritionists. It involves the integration of new knowledge and advances in technology and the physical and biological sciences with psychological, sociological, and behavioral sciences in the provision of a safe, nutritious food supply. Research, teaching, and outreach extend the continuum from the processing of food to its marketing, consumption, and impact on public health and community.

Food scientists integrate knowledge from engineering, biological, and physical sciences to study the nature of foods, the causes of deterioration, the principles underlying food processing, and the improvement of foods for the consuming public (www.ift.org/cms, 2001). Food technology is the application of food science to the selection, preservation, processing, packaging, distribution, and use of safe, nutritious, and wholesome foods (www.ift.org/cms, 2001).

The Department offers either a degree or a concentration in Culinology®. This is a dual degree program in which students take courses at Mississippi State University and Mississippi University for Women in Columbus, Miss.

The Culinology® curriculum includes courses that combine the disciplines of food science and culinary arts. Culinologists work in diverse areas within the food industries -from experimental chefs and menu planners to food manufacturing, fine dining and product development.

Nutritionists research ways to improve health through a better understanding of nutrition. Nutritionists focus on “the science of foods, the nutrients and other substances therein; their action, interaction, and balance in relationship to health and disease; the processes by which the organism ingests, digests, absorbs, transports and utilizes nutrients and disposes of their end products. In addition, nutrition must be concerned with social, economic, cultural and psychological implications of food and eating.”

The Department of Food Science, Nutrition and Health Promotion (FSNH) is proud to offer undergraduate education in Food Science (approved by the Institute of Food Technologists) and Nutrition (currently granted accreditation by the Commission on Accreditation for Dietetics Education of the American Dietetic Association, 120 South Riversides Plaza, Suite 200, Chicago, IL 60606, (800) 877-1600, ext. 5400). Students in Food Science, Nutrition and Health Promotion have many exciting and diverse career opportunities.

Food Science, Nutrition and Health Promotion careers include Research Scientist (Industrial, Government, Academic); Food Engineer; Food Microbiologist; Research and Development; Product Development Technologist; Research Chef; Food Manufacturing Operations Manager; Quality Control Technician; Regulatory Affairs; Food Packaging Specialist; Processing Engineer; Technical Sales in the Food Industry; Technical Services; Community Nutritionist; Public Health Nutritionist; Clinical Dietitian; Pediatric Dietitian; Cardiovascular Dietitian; Healthcare/School Food Service Director; Private Practice Dietitian; Sports’ Wellness Dietitian; Pharmaceutical Sales Representative; Dietitian in Business and Industry; Journalism and Communications; Public Relations and Marketing; and Researchers in universities and hospitals.

A major in Food Science, Nutrition and Health Promotion is also an excellent choice for students interested in pursuing pre-professional career paths like Veterinary School, Medical School, Pharmacy, Physical Therapy, etc.

The following concentrations are offered in the Department of Food Science, Nutrition and Health Promotion:

- Food Processing/Business
- Food Science
- Food Safety (pre-vet)

Fine Arts (3 hours)
- Select from General Education courses

Social Sciences (6 hours)
- FPB/FS/PV Select from General Education courses (w/advisor approval)
- NTR Refer to concentration

Major Core (7 hours)

Oral Communication Requirement
- FNH 1103 Intro to Food Sci, Nutrition and Health Promotion
- FNH 3111 Food Sci, Nutrition and Health Promotion Seminar

Writing Requirement
- FNH 4373 Career Success Skills in Food Science, Nutrition and Health Promotion

Choose one of the following concentrations:
Food Processing/Business Concentration (FSTP)

Major Advisor: Associate Professor Wes Schilling
- Combines food science and business courses to prepare students for careers in the food industry, government, or private business.

** Choose two courses (6-7 hours) from the Food Processing Electives: FNH 4314 Meat Processing; FNH 4613 Seafood Processing; FNH 4513 Poultry Processing; FNH 4123 Fermented Food Processing; FNH 4143 Dairy Foods Processing; or FNH 4583 Food Preservation Technology.

*** Choose additional FNH 3-4000 level courses including but not limited to food processing electives, FNH 4573 Food Engineering Fundamentals, FNH 4583 Food Preservation Technology, or FNH 4393 Prevention and Control of Disease.

Food Science Concentration (FSSC)

Major Advisor: Associate Professor Wes Schilling
- Is designed for students who wish to explore a career in research, pursue graduate studies, work for the government, or the food industry.

Total needed for major: 124

- Electives from the electives list above to reach a minimum of 124 hours.

Food Safety Concentration (FDS)

Major Advisors: Associate Professor Wes Schilling, Assistant Professor J. Byron Williams
- Is designed as a Pre-Veterinary option that focuses on factors affecting food safety and all coursework essential for acceptance in the College of Veterinary Medicine.

Culinology® Concentration (CN)

Assistant Professor: Jason Behrends
- Is designed for students who wish to work as a research chef or work in the areas of product development or research and development in the food industry.
Food Science Minor (18 hours)

Students will be required to complete the following courses to receive a minor in Food Science:

- FNH 4241 Applied Food Chemistry
- FNH 4243 Composition and Chemical Reactions of Foods
- FNH 4414 Microbiology of Foods
- FNH 4583 Food Preservation Technology

Choose 7 or more credits from the following electives:

- FNH 4593 New Food Product Development
- FNH 4110 Intro to Food Science, Nutrition & Health Promotion.
- FNH 4164 Quality Assurance of Food Products
- FNH 4143 Dairy Processing
- FNH 4314 Meats Processing
- FNH 4513 Poultry Processing
- FNH 4114 Analysis of Food Products

Total hours needed for major: 124

Nutrition Concentration (FN)

Major Advisors: Dietetics Education Director Sylvia Byrd, Associate Professor Diane Tidwell, Assistant Professor Chiquita Briley, Assistant Extension Professor Brent Fountain, and Instructor Lynn Burney

- Prepares students for a wide variety of careers. For students interested in becoming a Registered Dietitian, the Didactic Program in Dietetics (DPD) at Mississippi State University is currently accredited by the Commission of Accreditation for Dietetics Education (CADE) of the American Dietetic Association, 120 South Riverside Plaza, Suite 2000, Chicago, IL 60606; telephone 800-877-1600, ext. 5400.

- Requirements to receive a minor in Dietetics:
  - Fulfills the requirements to receive a minor in Food Science:
  - FNH 4241 Applied Food Chemistry
  - FNH 4243 Composition and Chemical Reactions of Foods
  - FNH 4414 Microbiology of Foods
  - FNH 4583 Food Preservation Technology

- Choose 2 courses (6-7 hours) from the Food Processing Electives: FNH 4314, Meat Processing; FNH 4513 Poultry Processing; FNH 4123, Fermented Food Processing; or FNH 4143 Dairy Foods Processing; or FNH 4583 Food Industry Unit Operations.

- Fulfills Computer Literacy requirement.

Total needed for major: 124

B.S. in Culinology®

Major Advisors: Associate Professor Wes Schilling and Assistant Professor Jason Behrends

The Culinology® degree program offers the opportunity to gain a broad education in Food Science and Culinary Arts. It involves the integration of Food Science and Culinary Arts so that students are prepared to work in diverse areas within the food industries -- from experimental research chefs and menu planners to food manufacturing, fine dining, and product development.

Culinology® is an approach to food that blends culinary arts and food technology. Through the blending of these two disciplines, culinology® seeks to make food taste better -- whether purchased in a supermarket or eaten in a restaurant. Culinology® also seeks to make food more consistent and safer. A primary application of culinology® is to logically translate sophisticated food concepts, such as those applied in fine dining or in a traditional ethnic cuisine, to items that are on the menus of chain restaurants or those processed for retail sale. Such chain-menu or retail product development is only possible through the astute combination of culinary arts and food science and technology.

According to Jeff Cousminer in Food Product Design Magazine, the word culinology® was coined by the first president and founder of the Research Chefs Association, Winston Riley. The original meaning of the word was quite different than what it has come to mean today. Originally the word was designed to be a combination of two words, culinary and technology. So the first meaning of the word was the convergence of culinary arts and all technology, which includes communications, chemistry, physiology, economics and many others.

Accredited culinology® educational programs are offered by many institutions. The curriculum included courses that combine the disciplines of cooking and food science. According to industry professionals, like Kraft’s Harry Crane, culinology® should “help jump-start product development.”

SCHOOL of HUMAN SCIENCES (HS)

Interim Director: Dr. Walter Taylor
Office: (662) 325-2950

The mission of the School of Human Sciences is to improve the well-being of individuals, families, communities and related businesses and industries through teaching, research and outreach. An integrative approach is carried out in these program areas:

- Agricultural Information Science and Education (AISE)
- Apparel, Textiles and Merchandising (ATM)
- Human Development and Family Studies (HDFS)

The School of Human Sciences currently has the following accreditations: American Association of Family and Consumer Sciences (AAFCS) and National Council for Accreditation of Teacher Education (NCATE) in Vocational Home Economics and Agriculture. The commitment of Human Sciences’ faculty and staff to excellence is evident in teaching, especially considering the growth, demand for the programs offered in the School, and the number of teaching and advising awards received by the faculty. The School of Human Sciences has more Grisham Master Teachers and CALS Excellence in Teaching Awards than any other unit within the Division and College. The School remains committed to this path of excellence, striving to provide students with contemporary programs and outstanding learning opportunities at the undergraduate and graduate levels. The School provides strong curricula and excellent teaching and advising.

The School’s programs are strong components of the land grant institution, which is designed to provide outreach to the community and state. The School’s commitment to this process is evident in several outreach programs, such as its early childhood development work. Human Sciences faculty and graduates work with people in and across a variety of settings, including homes; schools; clinical settings; community agencies and institutions; and business, industry, and government. Graduates are prepared to address the social and economic challenges that face the state and its communities.

Agricultural Information Science (AGS) Major

Major Advisor: Professor Kirk Swortzel
Office: (662) 325-7837

Agricultural Information Science is the science of assisting others to learn how to access, analyze, apply, and amend information to solve problems in agriculture. The curriculum is designed to prepare students to enter professions requiring extensive knowledge and skill in solving agricultural and agriculturally related problems. Students are prepared to meet agriculture industry’s needs for individuals who can create, access, disseminate, apply, amend, and integrate information to solve problems in agriculture. Agricultural Information Science graduates may become involved in a variety of occupations in agricultural, business, industry, education, production, extension, public relations, and others. The major requires 124 semester hours as shown in the catalog description. Students may choose to complete a concentration in either Teaching or Agricultural Leadership. These concentrations are achieved by completing a combination of 42 hours of specified courses and restricted electives as approved by an AIS advisor. Those students who would prefer an emphasis in communications will need to complete the Agricultural Leadership Concentration and complete their electives in communication, subject to advisor approval.

The Teaching Concentration is designed to provide skills for individuals seeking careers in production agriculture or secondary school education. The Agricultural Leadership Concentration is designed to provide skills for individuals seeking careers in business, industry and extension.

Students desiring to receive certification to teach in secondary agriculture programs will need to complete certification requirements. The Agricultural Education teacher education program at Mississippi State University is NCATE accredited. Students must conform to the policies on teacher education, as explained under “Teacher Licensure” elsewhere in this catalog.

Graduates will have knowledge of (1) agricultural and ecological information sciences; (2) principles of teaching and learning; (3) basic agricultural sciences; (4) theories and principles of human communication; and (5) agricultural business principles.

Graduates will be able to (1) plan and conduct education programs in classroom and community settings; (2) assess and prioritize the needs and goals of various audiences; (3) develop strategies to meet constitu-
ents’ needs and accomplish goals; (4) assess the appropriateness of strategies and revise the strategies as needed; (5) communicate effectively orally and in writing to various audiences; and (6) access and analyze information.

In capstone courses, students produce and present reports that demonstrate the performance learning objectives. In addition to faculty assessment, external assessors from other departments and from typical clientele audiences observe presentations and provide feedback.

Field experience supervisors and co-curricular sponsors, along with student participants, provide feedback about the field experience using a form based on the learning objectives.

**Agricultural Science (AGS) Major**

**Major Advisor:** Professor Kirk Swortzel  
**Office:** (662) 325-7837

The Agricultural Science degree prepares individuals for a variety of agricultural related careers. Many agricultural businesses and organizations are seeking graduates who have a diversified knowledge of agriculture and life sciences, which includes production agriculture, business, leadership and management. Many graduates become involved in agriculture business and industry, production agriculture operations, international agriculture development or pursue advanced study in areas such as nutrition and agricultural education.

The Agricultural Science allows students to develop a high concentration of science and specialized agricultural study. Through the Agricultural Science degree program, a student can pursue a bachelor of science in agriculture and develop specialization areas that will serve his/her individual needs and interests. For the degree requirements, students must complete 124 hours, which includes 18 hours of science and 58 hours of agricultural science. Thirty hours will be agricultural science electives, which must be taken from two different agriculture focus areas within the College of Agriculture and Life Sciences. (See advisor for suggested focus areas.) The student should select agricultural focus areas that are closely related and complement each other and are related to the career objectives of the student. At least 12 hours in each agricultural focus area must be 3000-4000 level courses. The student will also have 14 hours of agriculture and science electives to complete which should also complement the selected agricultural focus areas. At least three hours must be a natural life science.

Graduates will have knowledge of (1) the diversified field of agriculture; (2) basic agricultural sciences; (3) leadership principles; (4) the basic principles of production; and (5) the application of basic science principles to production agriculture and agricultural business management.

Graduates will be able to (1) plan and conduct basic agricultural research; (2) manage an agricultural enterprise (business or production); (3) provide leadership in a variety of employment settings; and (4) communicate effectively orally and in writing to various audiences.

In various courses, students produce and present reports that demonstrate the performance learning objectives. In addition to faculty assessment, external assessors from other departments and from typical clientele audiences observe presentations and provide feedback.

Internship supervisors and co-curricular sponsors, along with student participants, provide feedback about the internship using a form based on the learning objectives.

### Human Sciences (HS) Major

The Human Sciences degree provides educational, research, and outreach programs related to the interaction of people with their environment. More importantly, the multidisciplinary areas within Human Sciences focus more on the basic human needs, such as food, shelter, clothing, human interaction and relationships, commerce and family life. In light of the current trends and anticipated changes, the mission of the Human Sciences degree is to prepare students and to conduct research and outreach activities to impact the social, health, and economic concerns facing individuals, families, and communities.  

The following concentrations are offered in the School of Human Sciences: Apparel, Textiles, and Merchandising (ATM); and Human Development and Family Studies (HDFS).

A minor in Human Sciences is available. Required are HS 2293, HS 2593, HS 3303, HS 3673, HS 4853. In addition, six credits are to be selected from HS 1533, HS 2203, HS 2283, HS 2603, HS 2613, HS 2813, HS 4193, HS 4313, HS 4333, HS 4403, and HS 4513.

### Apparel, Textiles, and Merchandising (ATM) Concentration

Professor Wanda Cheek; Associate Professor Phyllis Bell Miller;  
Instructor Beth Duncan  

This concentration is designed to provide students with an understanding of fashion and textile industries, consumer behavior, product quality, and business principles. Students concentrate in one of two areas: Merchandising or Apparel Production ad Design. Merchandising combines an overview of the fashion industry, consumer behavior, and product knowledge with an understanding of business principles. Apparel Production and Design emphasizes the total design and production process from inception to finished product and its ultimate sale to the consumer. Apparel, Textiles, and Merchandising students are required to have a laptop computer during the freshman year, selected from a range of models recommended by the School of Human Sciences.

**Human Development & Family Studies (HDFS) Concentration**

Professors Jan Cooper Taylor, Sheri Worthy and Wanda Cheek; Assistant Professors Joe Wilmoth and Tommy Phillips; Instructor Angel Fason

This program offers an interdisciplinary lifespan approach to the study of children, youth, and families. It encompasses specialty areas in preschool teaching, childcare, youth studies, family studies, child life, and family and consumer sciences teacher education. Students develop an awareness of trends, issues and public policy affecting families; analyze factors that influence cognitive, emotional, social and physical development in the contexts of culture and family. Graduates enter diverse public and private sectors that focus on enabling children, youth, and families to function effectively in today’s complex society.

Specific course work is required to specialize in each area or meet class A teacher licensure requirements for family and consumer sciences in the state of Mississippi. Specific course work is also required to specialize in child life, preschool education, youth studies, or family studies. A grade of “C” or better is required for all major courses (Human Sciences courses).

The Family and Consumer Sciences teacher education program at Mississippi State University is NCATE accredited. Students must conform to the policies on teacher education, as explained under “Teacher Licensure” elsewhere in this catalog. Following is a list of courses taught at selected Mississippi high schools and vo-tech centers: family dynamics, resource management, nutrition and wellness, family and individual health, personal development, and child development. Family and Consumer Sciences teachers can also teach in high school Occupational Programs (such as food production, childcare, and clothing production). Some additional on-the-job training is required to teach these courses. Completion of a Bachelor of Science in Human Sciences (Family and Consumer Sciences Education emphasis) degree from the School of Human Sciences at Mississippi State University leads to licensure to teach these courses.

**Individual and Family Development Emphasis**

- 6 hours Science with Laboratory
- 3 hours Social/Behavioral Sciences
- 6 hours Fundamentals of Public Speaking
- 1813 Indiv & Family Dev through the LifeSpan
- 3813 LifeSpan Theory
- 4333 Families, Legislation, & Public Policy
- 4424 Teaching Methods in Ag & HS
- 4701 Internship Placement Seminar
- 4750 Internship
- 4803 Parenting
- 4883 Risk, Resilience, & Preventive Interventions
- 3 hours Computer Literacy course
- 27 hours Restricted Electives (see advisor)
- 18 hours Electives

- HS 4424 Teaching Methods in Ag & HS
- HS 4462 Curriculum in Human Sciences
- HS 4803 Parenting

**Oral Communication Requirement**

Satisfied by successful completion of HS 4424

**Total hours needed for major: 124**

* Satisfies General Education requirements.
Gerontology Certificate

Professor Sheri Worthy

The Gerontology Certificate provides the student with current factual and theoretical data along with practicum experience relating to the University. The Gerontology Certificate provides the student with current factual and theoretical data along with practicum experience relating to the process of aging. It is a multidisciplinary effort with contributions from a variety of departments cutting across several colleges. Students completing the requirements will earn a certificate in gerontology.

This area of study is open to students from all colleges within the University. The Gerontology Certificate was developed to supplement the student’s chosen major. Undergraduate students wishing to complete the Gerontology requirements will select a major in addition to electing 15 hours of gerontology course work. Graduate students are required to complete a readings or independent study course in addition to the 15 hours of gerontology course work.

Undergraduate Certificate Requirements: (minimum 15 hours)

Select at least three of the following:

- ABE 4513 Dynamics of Aging
- COE 4713 Issues in Aging
- HS 4403 Intro to Gerontology
- HS 4813 Adult Development
- HS 4863 Consumer Aspects of Aging
- PSY 4983 Psychology of Aging
- SO 4413 Aging and Retirement in American Society
- SO 4433 Sociology of Death and Dying
- SW 4623 Social Work with the Aged

Select up to two of the following: (may include courses from above)

- SW 2232 Social Welfare Policy II
- SO 4423 Health and Society
- HS 3673 Environments for Special Needs
- HS/FNH 4353 Nutrition Throughout the Life Cycle
- HS 4333 Families, Legislation, and Public Policy
- 3 hours DIS or Practicum in Aging

Graduate Certificate Requirements (minimum 18 hours)

Select at least three of the following:

- ABE 6513 Dynamics of Aging
- PSY 6983 Psychology of Aging
- SO 6413 Aging & Retirement in American Society
- SO 6433 Sociology of Death and Dying
- HS 6403 Intro to Gerontology
- HS 6863 Consumer Aspects of Aging
- HS 6813 Adult Development
- COE 8813 Counseling the Elderly
- COE 6713 Issues in Aging

Take up to two of the following—may include courses from above:

- SO 6423 Health & Society
- HS/FNH 6353 Nutrition Throughout the Life Cycle
- HS/FNH 8243 Community Nutrition
- HS 6333 Families, Legislation, and Public Policy
- PSY 8313 Developmental Psychology

3 hrs Required: Independent study/readings course

Writing Requirement
- AIS 3203 Intro to Tech Writing OR
- EDF 3413 Writing for Thinking

Computer Literacy (3 hours)

Satisfied by successful completion of HS 3303

Total hours needed for major: 124

* Satisfies General Education requirements.
In addition to University policies, all students enrolled in this curriculum shall be required to abide by all approved departmental policies.

**Landscape Contracting and Management Major (LAC)**

A landscape contractor is a specialty contractor who provides the materials and services needed to make the landscape architect’s project become a reality; and/or to provide the management and maintenance needed to keep the project in prime condition after implementation.

All students in Landscape Contracting and Management are required to have their own personal computer. Students should check with the department for equipment specifications prior to purchasing.

The Landscape Contracting and Management degree program at Mississippi State University, accredited by the Professional Landcare Network (PLANET), requires three internships which involve three semesters of experiential learning and field experience with an approved landscape contracting company or agency; and, under supervision of a qualified supervisor and oversight of Mississippi State University faculty. In addition, two departmental field trips are specific curriculum requirements for this degree. A field trip fee will be assessed to specific courses. Upon successful completion of curriculum requirements, a student receives a Bachelor of Science degree in Landscape Contracting and Management.

In as much as the published Bulletin of Mississippi State defines a letter grade of “D” as poor, The Department of Landscape Architecture requires that a grade of “C” or better is required to fulfill a major core requirement.*

The department reserves the right to retain student work for the purpose of records, exhibition, instruction, industry review, etc. In addition to Mississippi State University policies, all students enrolled in this curriculum shall be required to abide by all approved departmental policies.

* As published in the Department of Landscape Architecture policy manual.

**Total hours needed for major: 124**

* If a student makes below “B” in English Comp I or II, MGT 3213 Organization of Communications I will be required.

** at least two science courses must include a lab to comply with General Education Requirements.

*** MA 1313 College Algebra is a prerequisite for MA/ST 2113 Intro to Statistics.
Department of PLANT and SOIL SCIENCES (PSS)

Interim Department Head: Dr. Daniel Reynolds
Office: 117 Dorman Hall

Plant and Soil Sciences curricula focus on the application of sciences to the integrated management of plants, soil, and climate for high-quality production of food, fiber, fuel, and ornamental plants. Central to this course of study is the dedication to conserve, maintain and enhance our environment. An undergraduate student may major in either Agronomy (AGN) or Horticulture (HO) and specialize in various concentration areas such as Agricultural and Environmental Soil Sciences (AGN), Golf and Sports Turf Management (AGN), Integrated Pest Management (AGN), Floriculture and Ornamental Horticulture (HO), and Floral Management (HO). A grade of "C" or better is required in all courses with a PSS prefix prior to completion of the degree.

Graduate programs (M.S. and Ph.D.) are also offered in the Department of Plant and Soil Sciences in Agronomy, Horticulture, and Weed Science. Consult the Graduate Bulletin for additional details.

Agronomy Major (AGN)

General Education Requirements

Major Core
- BIO 4214 General Plant Physiology
- PSS 3301 Soils Laboratory
- PSS 3303 Soils
- PSS 4313 Soil Fertility and Fertilizers

Oral Communication Requirement
- CO 1003 Fundamentals of Public Speaking

Choose one of the following concentrations:

Agricultural and Environmental Soil Sciences Concentration (SOSI)

Advisors: Professors Michael Cox, William Kingery, and Jac Varco

The Agricultural and Environmental Soil Science curriculum provides an educational foundation in soil processes involving physical, chemical, and biological interrelationships. The soil resource is an integral component of our environment and is subject to loss and degradation through human activities. Humanity’s dependence on soil for food and fiber production and the need for ensuring environmental quality require individuals trained in the management of this resource. Career opportunities exist both nationally and internationally in agricultural and environmental consulting, agribusiness, government agencies, teaching, and research. Required courses provide soil science training, while elective courses can be selected to meet specific needs.

Cooperative Education: Agricultural and Environmental Soil Science students are encouraged to participate in the cooperative education program.

Golf and Sports Turf Management Concentration (GSTM)

Advisors: Associate Professors Barry Stewart and Gregg Munshaw

Golf and Sports Turf Management (GSTM) is the study of plant and soil sciences for the culture of turfgrass on golf and sports facilities. The GSTM curriculum prepares individuals for careers as golf course superintendents at private, daily fee, and resort courses or as sports turf managers at city, school, and professional sports turf facilities (i.e. football, baseball, soccer fields.) New construction of golf courses and sports facilities has led to a heightened demand for trained golf and sports turf management professionals. Three semesters of Cooperative Education work experience will be required of all students enrolled in the GSTM concentration.

Cooperative Education Requirements: GSTM students must complete a minimum 12 months or three semesters of Coop work at a golf course with an individual who is certified or progressing toward certification with the Golf Course Superintendents Association of America or at a sports stadium with a recognized sports turf manager. One of the three Coop semesters enrolled by the student must be a non-summer semester period. A 2.50 cumulative GPA on all MSU work is required to participate in the GSTM program. All new students must register with their coop advisor early in their initial semester of enrollment.

Golf and Sports Turf Management Concentration (GSTM)

Integrated Crop Management Concentration (ICM)

Advisors: Professors Brian Baldwin and Frank B. Matta
Associate Professors David J. Lang and Ted Wallace

Integrated Crop Management (ICM) is the study of food and fiber production utilizing ecologically sound and technologically advanced methods. Areas covered include basic concepts of plant science and specific practices in crop initiation, culture, harvesting, processing, distribution and marketing. Methods of germplasm enhancement are taught. Specific program areas of study include agronomic crop production, crop science, fruit science, seed science, seed technology, and vegetable crop production. Students completing the Integrated Crop Management curriculum are prepared for careers as producers, consultants, technical representatives, plant breeders, extension agents, or inspectors with USDA and state agencies. This curriculum also provides a good background of basic sciences for those who wish to pursue graduate study.

Integrated Pest Management Concentration (IPM)

Major Advisor: Assistant Professor Fred R. Musser

Integrated Pest Management (IPM) is an interdisciplinary concentration of study in Entomology, Plant Pathology and Weed Science jointly administered by the Department of Entomology and Plant Pathology and the Department of Plant and Soil Sciences. Effective management of pest problems requires a broad base of knowledge in the pest disciplines and practical field experience. The Integrated Pest Management concentration features a strong core of courses in the three pest disciplines (entomology, plant pathology, and weed science); a strong background in biological and physical sciences; and practical training through an internship. The curriculum is designed to meet the needs of students who wish to pursue advanced degrees and of students who wish to terminate their higher education with a baccalaureate degree. A range of restricted and non-restricted electives allows students to personalize their degree program for careers in crop production, agribusiness, natural resource management, and/or graduate studies preparation. A grade of "C" or better is required in all courses with the EPP, PSS, CL, or BIO prefix prior to completion of the degree. No course may be transferred for credit from another college or university in which a grade of “D” was made. A student may transfer up to nine hours of “T” level technical courses from community colleges as unrestricted lower-level electives. “T” level technical courses may not be transferred for credit on any course listed specifically in the IPM curriculum.

Graduates are well prepared for employment with industry; state and federal research, extension and regulatory agencies; private agricultural consulting firms; farmer’s cooperatives; nurseries, home and garden centers; greenhouse plant production; and corporate farms.

Internship: IPM students must complete a minimum one semester internship with an approved internship sponsor in industry, private consulting firms/individuals, or governmental agencies.

AIS 3203 Intro to Tech Writing Agricomm

Choose one of the following concentrations:

Floral Management Concentration (FLMG)

Advisors: Associate Professor James DePrince and Instructor Lynette McDougal

Financial Management involves sourcing, purchasing, distributing, marketing, designing with, and selling floricultural products. Students enrolled in this concentration are provided with courses in design and horticulture, balanced with business and sciences. Career opportunities for graduates include retailing, wholesaling, special event designing, and display gardening. The University Florist, a professional flower shop owned and operated by the Department of Plant and Soils Sciences on the MSU campus, provides students with work and management opportunities.

Internship Requirements (PSS 3413): FM majors must complete a 12 week, 480 clock hour work experience in a floral industry enterprise. The internship requirement may be completed any semester after successful completion of PSS 2343 Floral Design.

Floriculture and Ornamental Horticulture Concentration (FLOR)

Advisors: Associate Professor Richard L. Harkess

Floriculture and Ornamental Horticulture offers diversified opportunities that are challenging, intellectually stimulating, and economically rewarding. Floriculture and Ornamental Horticulture is the science and art of producing, distributing, and marketing flowers, flowering and foliage plants. It offers a wide variety of employment opportunities and competitive salaries. Students completing this curriculum are prepared for many different careers including greenhouse or nursery management, landscape management, public service, research and technical product research and sales.

Total hours needed for major: 123
A minor in Floriculture and Ornamental Horticulture is available. To obtain a minor, students are required to complete PSS 2423, PSS 3473 and PSS 3923, and choose two of the following courses: PSS 3313, PSS 4343, PSS 4353, PSS 4363, or PSS 4613.

**Department of POULTRY SCIENCE (PO)**

Major Advisor: Assistant Professor Aaron Kiess  
Office: Hill Poultry Science

The U.S. poultry industry is a $21 billion+ business employing hundreds of thousands of people in the United States. Mississippi ranks 4th in broiler production and is continuing to expand. This dynamic industry employs about 25,000 Mississippian directly and another 25,000 indirectly.  

The Poultry curriculum provides for in-depth study of scientific principles important in the production, processing and marketing of poultry and poultry products. The curriculum is designed with academic and experiential components to ensure that graduates are prepared to manage people and resources vital to this important food industry. Poultry students should also expect to develop creative thinking skills that will allow them to develop solutions for complex real world problems as they develop their careers as managers. The strong science content of the curriculum also makes it an excellent preparation for pre-vet students and students interested in graduate studies. The department provides one-on-one advising for all Poultry Science students. Concentrations available are:

- Production Systems  
- Business Management  
- Processed Products  
- Pre-Veterinary Medicine

Only grades of C or higher will be accepted for PO and VS courses.

**Choose one of the following concentrations:**

**Production Systems Concentration (POPS)**

The technical aspects of poultry production demands knowledge of business operation, building construction and the operation of the sophisticated equipment utilized throughout the industry. This concentration is appropriate for students interested in entering into a personal poultry operation of field services with large poultry enterprises.

- FNH 4414 Microbiology of Foods
- FNH 4513 Food Preservation Technology
- ST 3123 Intro to Statistical Inference

**Total hours needed for major: 122**

**Pre-Veterinary Concentration (PVSP)**

The Pre-Veterinary concentration allows a student to satisfy the pre-veterinary requirements while completing a B.S. in Poultry Science. The Poultry Science department offers a 3 + 1 program for admission to the College of Veterinary Medicine. Contact the Poultry Science department for these requirements.

- MA 1323 Trigonometry

**Total hours needed for major: 123**

**Poultry Minor**

The need for people who have specialized knowledge outside of classic poultry science is growing rapidly. Currently the industry recruits and employs personnel trained in areas such as accounting, biological sciences, computer science, human nutrition, nursing, microbiology, engineering, food technology, advertising and marketing, veterinary medicine, human resource management and law. A minor in Poultry Science provides these individuals with enhanced employment opportunities in the poultry industry.

Students will be required to complete the following courses to receive a minor in Poultry Science.

- PO 3313 Commercial Poultry Production
- PO 4313 Management of Commercial Layers
- PO 4333 Broiler Production
- PO 4413 Poultry Nutrition
- PO 4513 Poultry Processing

SCHOOL OF ARCHITECTURE
Director: Michael A. Berk
Academic Records Assistant: Pandora Prater
Office: 240 Giles Hall

GENERAL INFORMATION
The profession of architecture offers the student the opportunity to participate in improving the physical world, in solving problems of our society, and in giving form to the needs of modern culture. To meet these demands requires a highly trained profession composed of sensitive, dedicated men and women. The School of Architecture is the educational foundation of the profession in the State of Mississippi and provides for the development of the individual skills and understanding to prepare the student for his or her role in the practice of architecture.

The School of Architecture offers an intense, carefully structured, and rich array of courses which constitute a solid foundation for architectural practice. The course work provides students with an awareness of the diversity and complexity of today’s professional world. Each course has its own important role in developing the knowledge and abilities required of architects in a contemporary practice.

The School of Architecture at Mississippi State University is the professional school for the State of Mississippi and is the only program in the state that leads to a professional degree in architecture. To meet the needs of the state and region, the College was established in 1973 with the support of an Advisory Committee of the Mississippi Chapter of the American Institute of Architects.

ACCREDITATION
In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a six-year, a three-year, or a two-year term of accreditation, depending on the degree and quality of its conformance with established educational standards.

The Bachelor of Architecture program at the School of Architecture at Mississippi State University has been continuously accredited since its inception. In 2010 the School was reaccredited for another full six-year term.

ADMISSIONS
Admission to the School of Architecture is limited and highly competitive. Prospective students should carefully read materials on the School web site and communicate with the School of Architecture to request current information, and if possible, arrange for a tour of facilities and admissions advisement.

Application Process
1. Apply to Mississippi State University.
2. Submit all required materials including high school transcripts and ACT or SAT scores.
3. Indicate your choice of major as “Architecture.”
4. Complete and return the Supplemental Application Package.

Applications are reviewed and students accepted as applications are received. Places are reserved for most students submitting applications by January 15. Place for students whose applications are received after this date will be as space permits.

The School of Architecture admits applicants under one of two categories of admission.

1. Full Admission with the opportunity to begin freshman architectural design studio in the fall term. Entrance to the fall design studios is competitive and has academic prerequisites. Students with an ACT score of 24 or better (or the SAT equivalent) and a 3.5 GPA or greater, are automatically accepted into the architecture program, depending on available space.

2. Students not accepted into the Fall Design Studios are placed in the Pre-Architecture program. Pre-Architecture students follow a similar course of study, but do not take ARC 1536 Design I-A and ARC 1546 Design I-B. There are many reasons why a student may not admitted to the fall design studios: late application, lower ranking in the applicant pool, and lack of pre-requisites are the main reasons. The School of Architecture attracts highly talented students, and the admissions committee often faces difficult decisions on whom to admit. The study of architecture is highly rigorous: we want to ensure that students that enter the program succeed. Pre-Architecture students may re-apply for summer admission into the program after completing all first year requirements.

3. Students may receive transfer credit for non-professional courses completed at other universities, colleges, and community colleges, provided a grade of C or better is received for each course. Transfer credit from other architecture programs is reviewed by the admissions committee and the director. Transfer credit for courses listed as technical, vocational, or architectural is solely at the discretion of the department. In addition to transcripts, course descriptions, syllabi, examples of work done and portfolio may all be required to receive any credit for such courses. A student may receive six hours of Reserve Officers’ Training Corps (ROTC) credit.

FINANCES
Costs for an architectural education are somewhat higher than in other disciplines. In addition to standard costs of fees, tuition, room, board, books, etc, an architectural student must buy required drawing equipment and materials for drawings and models during the school year. This can add $600 or so per semester. Additionally, at least one major field trip is required each year. Charges for field trip expenses are collected with tuition and currently range from $350 in first year to $550 in fourth year. These charges are intended to cover transportation and lodging during field trips. These fees are not refundable after the first day of classes. Students should expect to purchase a laptop computer in their second year, selected from a range of models approved by the School.

SCHOLARSHIPS
A number of scholarship opportunities as well as design competitions and awards are available to students within the School of Architecture’s design programs. Normal MSU Scholarships are available to in-state and out-of-state students. Inquiries for financial aid or assistance should be sent directly to the MSU Office of Student Financial Aid and Scholarships.

COUNSELING
Once accepted into the Design Studio courses, students are required to maintain at least an MSU 2.0 cumulative quality point average to remain in design courses. At the end of the first year, a student must have completed all required courses so to enter the second year, and at the end of the senior year, a student must have completed all required courses in order to advance to the fifth year. Any student who receives a grade of D or lower for two sequential design courses must repeat both of these courses and receive a grade of C or higher in both courses so to advance in the program, or receive the Bachelor of Architecture degree. If a studio course is failed, a grade of C must be received to advance in the program, or receive the Bachelor of Architecture degree.
RESEARCH CENTERS in the SCHOOL OF ARCHITECTURE

CARL SMALL TOWN CENTER

Established in 1979, the vision of the Carl Small Town Center is to strengthen communities and to promote a prosperous and sustainable future by raising an awareness of the physical environment through research and excellence in design. For further information, contact the Director of the Carl Small Town Center at 662-325-2207.

GULF COAST COMMUNITY DESIGN STUDIO

The GCCDS was established after hurricane Katrina as an arm of the College of Architecture, Art and Design. GCCDS is located in Biloxi and is providing community planning and architectural design services to communities and rebuilding organizations. GCCDS has provided design and construction assistance for hundreds of new and existing homes, produced survey and GIS mapping for Biloxi, and planning work for a collaboration of housing organizations. For more information, contact the Director of GCCDS at 228-435-7180.

JACKSON COMMUNITY DESIGN CENTER

The Jackson Community Design Center is an urban research laboratory whose mission is to support urban revitalization in Jackson. The Design Center provides research, visioning, planning, and technical assistance to associations that are working to make a viable, healthy urban environment. The Design Center conducts public educational programs and sponsors visiting lectures and other Continuing Education Programs. For further information, contact the Director of JCD at 601-354-6480.

EDUCATIONAL DESIGN INSTITUTE

Created in 1997 by the Mississippi Legislature, the Educational Design Institute (EDI) is a collaboration between the College of Education and the College of Architecture, Art, and Design focused on quality K-12 school design and planning. In addition to developing and updating the Mississippi School Design Guidelines, EDI works directly with school districts on specific projects. For more information, contact EDI at 662-325-9225.

DESIGN RESEARCH and INFORMATICS LABORATORY

Researchers apply state-of-the-art visualization technology to address both economic development and quality of life issues for small businesses and communities in the state of Mississippi. Work ranges from design studies of buildings and facilities to branding and Web site design. For further information, contact the Director at 662-325-2509.

MINOR in ARCHITECTURAL STUDIES

The School of Architecture offers a minor in architectural studies. The minor consists of 18 credit hours of ARC courses. Students are required to take ARC 1013 and ARC 1003. The following courses can be taken without instructor approval: ARC 2313, ARC 3313, ARC 3233, ARC 4313, ARC 2713, and ARC 4733. The following courses are also available but require consent of instructor for enrollment: ARC 2723, ARC 3713, ARC 3723, ARC 3343, ARC 3573 and ARC 4900.

CURRICULUM

The curriculum is divided into three levels: the first-year level is defined as the pre-professional program; the second and third year levels comprise the professional core; the fourth year comprises topical studios, and the fifth-year provides the transition to professional practice. The first four years are at the main campus of MSU in Starkville; the fifth year is at the Stuart C. Irby studios in downtown Jackson.

The curriculum is composed of four areas of study representing:

1. Design - concerned with the understanding of form, shape, and space responsive to human needs and programs, together with development of architectural communication skills.
2. History/Theory - composed of architectural history and philosophy, current architectural ideas and directions.
3. Technology - providing basic knowledge in physical systems of structures, materials, construction and service systems of plumbing, electrical, heating and air conditioning.
4. Professional Practice - representing the tools necessary to direct the processes of architecture, areas of economics, real estate, finance, promotion, land development, law, and office practice.

Located at the Jackson Center in downtown Jackson, the fifth-year offers the student the opportunity to develop depth and expertise through research and design projects focused on urban issues. The city provides a major resource for the activities and a laboratory for continued study. Professionals involved in all areas of the built environment contribute to the teaching. This experience provides a transition from the academic foundation to the professional realities of architecture.

9 hours Approved Electives
3 hours General Elective

Oral Communication Requirement

Satisfied by successful completion of Architectural Design courses.

Writing Requirement

Satisfied by successful completion of ARC 4313

Total hours needed for major: 152

---

* MA 1313 and 1323 should be completed the summer prior to beginning studies in architecture. Students with 24 ACT in Math are excused from MA 1313 College Algebra. Students may also take the College Level Examination Program (CLEP) exam to place out of MA 1313. Students with a grade of “B” or better in a full semester of high school trigonometry may be excused from MA 1323.

** Pre-Architecture, accelerated studies and some transfer students take ARC 1536 and 1546 in summer upon demonstrating completion of required courses. Applications due February 15.

*** ART 1223 Drawing II is required of all students receiving a grade of “C” or less in ART 1213 Drawing I.
BUILDING CONSTRUCTION SCIENCE (BCS)

Program Head: Theo Haupt
Office 140 Giles Hall

The Building Construction Science degree program is a four year Bachelor of Science degree designed to prepare graduates for careers in construction or construction-related fields. The 124 credit hour program is an interdisciplinary curriculum that builds upon expertise existing within the School of Architecture and the Colleges of Engineering and Business and Industry to provide a knowledge base in business, engineering, and construction sciences. The curriculum’s foundational areas are based on a problem-based learning (PBL) andragogy. The studio-based teaching puts a focus on the use of case studies, precedents, and integration of multiple subject areas. This integration of a broader scope of architectural, engineering, construction, and business practices is a different approach than a traditional construction technology andragogy that separates subject areas into distinct courses.

The Building Construction Science curriculum includes a general education foundation of mathematics, science, and business. Course development is built upon the strengths of the three colleges that are collaborating in the effort. The Building Construction Science degree has construction-specific courses including construction systems, building technology, structures, materials and methods of construction, estimating, scheduling, safety, project management, and construction law. Both the engineering and the architecture curriculums at Mississippi State involve hands-on making using both materials and material constructions. The Building Construction Science curriculum is designed to continue in that vein, and to meet the criteria for American Council for Construction Education (ACCE) accreditation.

General Education Requirements

- Satisfied by successful completion of the BCS studio courses

Total hours needed for major: 124

Department of ART (ART)

Department Head: Lydia Thompson
Office: 102 Freeman

Mission
The Department of Art’s primary undergraduate responsibilities include educating professional artists with concentrations in Ceramics, Drawing, Graphic Design, Painting, Photography, Printmaking, and Sculpture; preparing students for a career or advanced study; offering courses that fulfill University and departmental requirements; and presenting an active art gallery to serve the University, the community, and region.

Bachelor of Fine Arts
The Bachelor of Fine Arts (B.F.A.) degree is a professional studio degree. The B.F.A. degree is earned after successful completion of an intensive, 4 year program that provides the student with a series of in-depth studio experiences leading to thesis/senior presentation balanced by studies in humanities, communication, mathematics, and sciences.

Concentrations
In the Bachelor of Fine Arts degree, a student may choose a concentration from the following: Ceramics, Drawing, Graphic Design, Painting, Photography, Printmaking, or Sculpture.

Transfer Requirements
After successful admission to the University, and before application to the Foundation Portfolio Review, transfer students must submit work to the Transfer Portfolio Review so to articulate art studio and theory credits. This review requires the presentation of a comprehensive portfolio of artwork completed in studio courses, as well as course descriptions (and in some cases, syllabi) from classes completed for credit at other institutions. This review takes place before the preregistration advising period each semester. The MSU Department of Art reserves the right to deny or accept transfer courses as applicable to the B.F.A. degree based on portfolio evaluation.

Foundation Portfolio Review Requirements
All Art majors are required to participate in the Foundation Portfolio Review. The review is a faculty evaluation of student work from a minimum of 18 credit hours completed in the following courses: Drawing I, Drawing II, Design I, Design II, 3-D Design, and Introduction to Computing for Art and possibly additional art courses. A grade of ”C” or better must be achieved in each of these courses before students are allowed to pass the review.

For students interested in the Fine Art concentrations (Ceramics, Drawing, Graphic Design, Painting, Photography, Printmaking, or Sculpture), the Foundation Portfolio Review will result in an “accept” or “deny” into the selected concentration. For students interested in Graphic Design, the Foundation Portfolio Review for entrance into that concentration will take place in December of each year. The Foundation Portfolio Review will result in an “accept” or “deny” in the Graphic Design concentration.

Students who are accepted (by faculty evaluation) into a Fine Arts concentration may then begin the concentration sequence of courses. A student who is denied may remain in the art program and resubmit a portfolio in the next Review. Students cannot pursue a Fine Art concentration in which they have been denied twice. They will have to choose another concentration to pursue a B.F.A. in Art at Mississippi State.

Students who are accepted (by faculty evaluation) into a Graphic Design concentration may begin the concentration sequence of courses. A student who is denied may remain in the art program and may resubmit a portfolio in the Review the following year. Students who are denied cannot take concentration courses in Graphic Design until they resubmit a portfolio and are accepted into the program. A student who is denied twice cannot pursue a Graphic Design concentration. He or she will have to choose another Fine Arts concentration to pursue a B.F.A. in Art at Mississippi State.
Only the top students will be accepted into the Graphic Design concentration due to enrollment demand and limits in resources and classroom space. Contact the Advising Coordinator for more information.

Senior Presentation Requirements

Senior Graphic Design students are required to present a portfolio and senior students in the other concentration areas are required to present an exhibition as degree requirements. These final presentation requirements are fulfilled in capstone courses; ART 4640 Advanced Graphic Design for students in the Graphic Design concentration; and ART 4083 Senior Honors Research/ART 4093 Senior Honors Thesis for students in the other concentration areas.

Computer and Equipment Requirements in the Graphic Design and Photography Concentrations

The Department of Art requires incoming (post review) B.F.A. Art majors with a concentration in Graphic Design or Photography to purchase certain tools and equipment.

The Graphic Design concentration student is required to purchase a computer after successfully passing the Foundation Portfolio Review, usually in the sophomore year, and before enrolling in ART 3313 Graphic Design I. Art faculty prepare an approved list of current software and minimum computer specifications each year.

The Photography concentration student is required to purchase a camera and, in the digital photography option, a computer, usually in the sophomore year, and before enrolling in ART 3203 Photography II. Art faculty prepare an approved list of specific cameras and minimum computer specifications each year.

Financial aid that includes this requirement may be available by contacting the MSU Student Financial Aid and Scholarship office.

Student Materials Fee

Additional fees associated with class materials, technology and laboratory materials are required of students. These range from $10 to $100 per course and are automatically included in tuition.

Art Minor

The Department of Art offers a minor in Art. The minor consists of 18 credit hours of courses with an ART prefix. One or more 1000-level courses and one 2000-level course must be completed in addition to at least three 3000- or 4000-level courses. For an Art minor, a student may take all Art studio courses or a combination of Studio and Art History.

Art History Minor

A minor in Art History consists of 18 credit hours. A student must take ART 1013 Art History I and ART 1023 Art History II as well as four other courses selected from the following list: ART 3163, ART 3603, ART 3613, ART 3623, ART 3653, ART 3663, ART 3673, ART 3683, ART 4573, ART 4673 or other approved Art History courses.

Accreditation

Mississippi State University is an accredited institutional member of the National Association of Schools of Art and Design.

Bachelor of Fine Arts

ART 2103 Photography Survey

Art History and Theory Program (15 hours)
ART 1013 Art History I - may be used for Fine Arts Req.
ART 1023 Art History II - may be used for Fine Arts Req.

All Other Concentrations

(Ceramics, Drawing, Painting, Photography, Printmaking, or Sculpture) Student should check prerequisites for courses. Consult advisor.
Art History Elective - may be used for Writing Req.
Art History Elective - may be used for Writing Req.
Art History Elective - may be used for Writing Req.

**Concentration Program (30 hours)**

Seven approved Art studio courses in concentration area plus:

**ART 3803 Gallery Management**
**ART 4083 Senior Honors Research**
**ART 4093 Senior Honors Thesis**

(Senior exhibit required.)

Art Studio Electives (6 hours)

General Elective (3 hours)

**Total hours needed for major: 123**

**Interior Design (ID)**

Director: Beth R. Miller
Office: 125 Etheredge Hall

The Interior Design Program offers students the opportunity to develop an ability to identify, analyze, and create solutions using critical thinking and spatial comprehension in solving design problems in the built environment. The program prepares future professional designers to enhance the function and quality of interior spaces for the purpose of improving the quality of life, increasing productivity, and protecting the health, safety, and welfare of the public as well as protecting the environment. Practical studio experience builds competency in design theory; the specification of interior materials and finishes; lighting, barrier-free, and computer-aided design; building and life safety codes; historical interiors; professional practices; interior construction and furniture design; space planning and programming; and graphic and verbal communication skills.

**Accreditation**

The Bachelor of Science in Interior Design degree program is fully accredited by the Council for Interior Design Accreditation.

**Portfolio Review**

Each student is required to participate in two portfolio reviews. The first will occur between the second and third year to determine a student’s admission to upper level courses. The Sophomore portfolio review will consist of original work (a minimum of two projects per class) from the first two years of ID foundation courses.

A grade of C or higher must be made in these courses to request a review. Students must have a cumulative GPA of 2.5 or higher and a 2.5 in the Interior Design major core. Students failing to pass the review will not be allowed to enter ID 3614 Interior Design Studio III.

The second required review occurs during the spring semester of the senior year. Prior to graduation, all seniors must have their most current portfolios reviewed and approved by the faculty.

**Internships**

All Interior Design majors are required to complete an internship the summer following either their Junior or Senior year. The internship offers employment experiences through a wide range of projects in the design field. Many ID students are placed in interior design and architecture firms across the United States.

**Financial Requirements**

Costs for an interior design education are somewhat higher than other disciplines. In addition to standard costs of fees, tuition, room and board, books, field trips, etc., an interior design student must buy required drawing equipment and materials for drawings and models during the school year. A student should budget for at least $300 per semester for these extra costs.

Due to the technological aspect of the profession, each student is required to purchase a personal laptop computer by the spring of the first year. Specifications for minimum hardware and software requirements can be found on the college web site at www.caad.msstate.edu.

**Field Trips**

Field trips are an important part of the curriculum. The observations and experiences from field trips cannot be replaced by library research or reports. Because field trips are a vital part of the design education experience, the cost is an additional charge to their student account to ensure that all students are able to take part in these essential learning opportunities.

**General Education Requirements**

- **English Composition (6 hours)**
  - EN 1103 English Comp I OR
  - EN 1163 Accelerated Comp I

**Total hours needed for major: 124**
GENERAL INFORMATION

The College of Arts & Sciences provides the fundamental training needed by all persons who wish to become college graduates. Students in all undergraduate schools and colleges in the University take more than half their courses during the first two years in the College of Arts & Sciences. In addition, the College provides pre-professional curricula for students who take their professional training elsewhere. Thus, pre-medical, pre-dental, pre-pharmacy, pre-law, pre-ministerial, pre-optometry, medical records administration, pre-nursing, and physical therapy training are available within the College of Arts & Sciences. Medical and dental students completing required courses are eligible for consideration of a B.S. degree from Mississippi State after one year in the professional school.

Majors are offered in the following: anthropology, biological sciences, chemistry, communication, economics, English, foreign languages, general liberal arts, general science, geoscience, history, interdisciplin ary studies, international business, mathematics, medical technology, microbiology, music, physics, political science, philosophy, psychology, sociology, and social work.

Students who are undecided about a specific curriculum should select the Undeclared category. Advisors are available to assist these students in developing their educational and career goals. A student is permitted to delay a decision as to a field of concentration for one year.

Minors are available in the following: aerospace studies, anthropology, biological sciences, chemistry, communication, English, foreign languages, geography, geology, geoscience, history, mathematics, philosophy, physics, political science, psychology, religion, sociology and statistics.

In addition to these majors and minors, courses are offered in Air Force ROTC, archaeology, Army ROTC, corrections, gerontology, and gender studies. Information concerning these offerings can be found in this section of the catalog.

MISSION

The educational mission of the College of Arts & Sciences is two-fold: to provide students with a liberal education which will facilitate intellectual development and stimulate a life-long pursuit of knowledge, and to give students an in-depth education in at least one specialized area necessary to prepare them for a career or for advanced study.

The College offers curricula in the fine arts, the humanities, the sciences and the social sciences. These curricula are designed to introduce students to the basic methods of inquiry in diverse disciplines, to develop their analytical abilities, to improve their skills in writing and speaking, and to broaden their perspectives on humanity and culture in the natural and technological worlds. Additionally, they provide intensive preparation in one or more academic disciplines.

A liberal education attained in this context should ensure that graduates of the College have gained an understanding and appreciation of human culture. They should have examined the social, historical, political, philosophical and economic dimensions of the human condition and mankind's perception of the world as it is expressed through the fine arts, language, and literature. They should have learned the use of quantitative and scientific methods and should have participated in the universal quest to comprehend natural phenomena and to utilize this knowledge beneficially and ethically.

ADVISING

The student is assigned an advisor as soon as he or she enters the College of Arts & Sciences and should maintain contact with that advisor throughout the university affiliation. The advisor will assist the student in developing a course of study and will serve as a resource person to deal with academic problems and student needs.

DEGREES

The College of Arts & Sciences offers three degrees: the Bachelor of Arts, the Bachelor of Social Work, and the Bachelor of Science. All B.A., B.S., and B.S.W. students take a common set of requirements consisting of 25-29 semester credit hours in basic skills, 9-10 semester credit hours in natural sciences, 6 semester credit hours each in humanities and social sciences, and 3 semester credit hours in fine arts, computer literacy, and a junior/senior level writing course. The B.A. and B.S.W. curriculum requires 12 additional semester credit hours each in humanities and social sciences. The requirements for all three degrees as well as the curricula for specific areas of study are described below. Details for B.S.W. degree requirements are listed under Social Work.

In order to qualify for a second bachelor’s degree at Mississippi State University, the candidate must meet the following requirements: (1) The student must satisfy all course requirements for the degree sought; and (2) The student must satisfy residency requirements at Mississippi State University after the first degree has been conferred (30 hours upper division work). The major department from which the second degree is sought shall determine completion of requirements.

COLLEGE REQUIREMENTS for ALL A&S DEGREES

The College of Arts & Sciences has identified graduation requirements which must be satisfied by all students pursuing degrees conferred by the College. Furthermore, these requirements (listed immediately below) must be satisfied from a list of courses approved by the College. These approved courses are taken from a longer list of courses satisfying general education requirements which can be found in the front pages of this Bulletin. However, majors in the College of Arts & Sciences must be aware that there are numerous courses on the General Education list which are not on the College approved list. Copies of the College courses approved list are available both from the Dean’s Office and from advisors.

BACHELOR of ARTS DEGREES and REQUIREMENTS

A Bachelor of Arts degree is offered in the following areas: anthropology, chemistry, communication, economics, English, foreign languages, general liberal arts, history, mathematics, music, philosophy, political science, psychology, and sociology. The Bachelor of Social Work is offered in Social Work and follows the same basic regulations as the B.A. degree except that courses must be taken in proper sequence and a minimum of 124 hours is required.

The liberal arts include certain basic academic disciplines that contribute to the development of intelligent, moral beings. Over the centuries various subjects have at one time or another been spoken of as “liberal arts,” but the objective of liberal-arts training has remained unchanged. Whether students major in liberal arts or whether they merely take a few basic courses in that field, the liberal arts will enable them to develop those fundamental habits of good citizenship and cultural awareness which are expected of all members of our society.

The curriculum in liberal arts at Mississippi State University is intended to provide:

1. a broad educational experience in the liberal arts, regardless of professional objectives;
2. adequate preparation for admission to professional schools and graduate schools in the liberal arts disciplines;
3. specialized training of a professional or pre-professional nature, as offered by the several liberal-arts departments.

BACHELOR of ARTS CURRICULA

A minimum of 120-124 credit hours is required in all B.A. programs, 31 of which must be upper-division (3000-level or higher) Arts & Sciences credits.

GARY L. MYERS, Dean
David Breaux, Associate Dean
Tracy Britt and Barbara Stewart, Academic Coordinators
Email: tbritt@deanas.msstate.edu, bstewart@deanas.msstate.edu
Office: 208 Allen Hall; Telephone: (662) 325-2646
Mailing Address: Box AS, Mississippi State, MS 39762
In most departmental majors, the curricular requirements are sufficiently flexible to allow a student in liberal arts to select his or her departmental major at any time during the freshman or sophomore year. Whenever a student has made a decision as to a departmental major, whether it be at the beginning of the freshman year or later, he or she will be assigned to a major advisor in that department. If a student has not decided upon a major field, he or she should register as an Undecided student and take courses in the common curriculum which will prepare him or her for a subsequent shift into a departmental major.

**BACHELOR of SCIENCE DEGREES and REQUIREMENTS**

A Bachelor of Science degree is offered in the following areas: biological sciences, chemistry, general science, geoscience, mathematics, medical technology, microbiology, physics, and psychology.

The Bachelor of Science degree is awarded:

1. on the completion of not fewer than 124 semester credit hours of study including 31 upper-division Arts & Sciences approved credits and the common curricula for Arts & Sciences (carrying 248 quality points) approved by the dean and an official advisor.

2. on the completion of at least 98 semester credit hours (carrying two quality points for each credit hour) of approved study (not fewer than 31 semester hours of upper-division courses in residence at Mississippi State University) and on presentation through the dean or registrar of an approved school of medicine, dentistry, or medical technology of a certificate of the satisfactory completion of all courses in the first year of professional study.

3. on the transfer of satisfactory credits from other institutions, provided the candidate, during at least one academic year in actual residence, receives 31 credits in upper-division courses in the College of Arts & Sciences.

**GRADUATION REQUIREMENTS in the COLLEGE**

Arts & Sciences majors are responsible both for knowing the graduation requirements associated with their degree program and for keeping track of their own progress toward graduation. Faculty advisors are available to offer students informed answers to their questions and, during registration, to review and approve their course schedules. In addition to the graduation requirements outlined above, students pursuing majors in the College of Arts & Sciences need to be aware of a number of special requirements having to do with graduation.

1. 75-hour check sheets: College seniors who have completed 75 or more semester hours (including ‘S’ hours) must meet with their advisors and complete a 75-hour check sheet or they will be unable to register for courses. A completed 75-hour check sheet allows a student to determine which graduation requirements are not completed at the time the check sheet is filled out; this then allows the student to identify those remaining courses he/she still needs to pass in order to graduate. A 75-hour check sheet cannot be completed until all transfer course work and/or independent study is on record with the Office of the Registrar.

2. Independent Study: Arts & Sciences majors are expected to take courses on the Mississippi State University campus when possible. If the desired courses are not offered, or if special circumstances exist, students may receive permission from the Dean to take courses through independent study.

3. CLEP Credit: The College does not allow graduation requirements in English Composition, Literature, or Public Speaking to be satisfied by the awarding of CLEP credit.

4. PE: Only two 1-hour PE courses may be used toward graduation requirements.

**ENGLISH and FOREIGN LANGUAGES REQUIREMENTS**

The English and foreign language requirements apply to all Arts & Sciences students. Since departments have the authority to require specific foreign languages for their majors, students must become familiar with the language required by their individual major. The foreign language requirement is ordinarily satisfied:

- The B.A. degree requires a 3rd semester proficiency in a foreign language. Students may fulfill the requirement through placement tests administered by the Department of Foreign Languages or by passing nine hours of a foreign language. One year of a foreign language taken at the high school level allows a student to bypass one semester of foreign language. Students are encouraged to take the foreign language placement test before enrolling in a foreign language course.

- The B.S. degree requires a 2nd semester proficiency in a foreign language. Students may fulfill the requirement through placement tests administered by the Department of Foreign Languages or by passing six hours of a foreign language. Students are encouraged to take the foreign language placement test before enrolling in a foreign language course.

**STUDENTS For Whom English is a Second Language**

Students for whom English is a second language must fulfill the English and foreign language requirements as stated in this bulletin. Most majors allow these students to use their native languages to fulfill the foreign language requirement. But students planning to use their native languages in order to satisfy the foreign language requirement are urged to check with their major department to determine if that language is acceptable to the department. As far as the College of Arts & Sciences is concerned, students may use their native language to satisfy the foreign language requirement provided that:

1. the language is a recognized mode of communication in conducting official business in a given country and taught in the primary and secondary schools of the country (regional languages and dialects do not qualify as official languages);

2. the Department of Foreign Languages has the expertise to administer a test in the language, or, where such expertise is not available, the student takes the initiative to take a test in the language from those administered through the National Testing Service, or by another certifying agency;

3. the language meets specific departmental requirements.

In English, a maximum of 12 semester hours total of English as a Second Language (ESL) at the freshman composition level (including the required EN 1103 and EN 1113) may be counted for graduation. Proper placement of international students from ESL courses into English composition courses is important to students’ academic success.

International students with a TOEFL score of 525 or higher should be placed in EN 1103. If their TOEFL score is 475-500, they should be placed in EN 1133; if their TOEFL score is 501-524, they should be placed in EN 1143. Once EN 1143 is passed, such students should be placed in EN 1103.

**PRE-PROFESSIONAL CURRICULA**

The College offers appropriate curricula for students who plan to enter schools of dentistry, law, medicine, theology, nursing, optometry, pharmacy, and physical therapy. These are described with the departmental entries in the following pages.

**TEACHER EDUCATION**

Please see the appropriate departmental entry or advisor for information on major programs which can incorporate courses for certification. It is especially important for students desiring certification to consult with their advisors before choosing options in required categories, like the natural sciences, or electives.

Students seeking secondary school teaching certification must complete the Driver’s-HI-IV of the Teacher Education program. (See “Admission Procedures in the College of Education”)

The Mississippi State Department of Education provides an alternate route to certification to individuals who hold a baccalaureate or higher degree from a regionally accredited institution of higher education and have achieved a score at or above the 51st percentile, based on the 1983 norms, on each part of the core battery and the specialty area of the NTE.

An individual who meets the two above requirements may, upon proper application, receive a provisional certificate for one year. The provisional certificate will allow the holder to seek a teaching job. Additional information is available from the Dean of Arts & Sciences, the Dean of Education, and the Mississippi State Department of Education.

**ARTS & SCIENCES CORE**

In order to satisfy College graduation requirements, students seeking B.A., B.S., or B.S.W. degrees must take the number of courses indicated in each of the areas below. By satisfying these College requirements, students will also satisfy all analogous General Education requirements.

B.A. and B.S.W. students must complete 12 hours in Humanities and 12 hours in Social Sciences in addition to the two courses in the Humanities and Social Sciences required of all majors. Hence, a student must complete a total of 18 hours in the Humanities (EN, HI, PHI, REL), AND 18 hours in the Social Sciences (AN, GR, PS, PSY, SO).

These additional 24 hours are not limited to the courses listed below; they may be satisfied by others in EN, HI, PHI, and REL or in AN, EC, GR, FS, PSY, SO as long as they satisfy the distribution requirements for the major.

While all of the courses below satisfy college-wide requirements, individual departments may require that particular courses in each area be taken to satisfy requirements for their majors.
Students will not receive credit in Arts & Sciences for two courses which are separated by "OR."

NOTE: Courses separated by “OR” cannot be taken in combination. Honors classes satisfy requirements and students who qualify are encouraged to take the Honors sections.

### Basic Skills

**English Composition (6 hours)**
- EN 1103 English Comp I OR
- EN 1163 Accelerated Comp I
- EN 1113 English Comp II OR
- EN 1173 Accelerated Comp II

**Oral Communication Requirement**
- CO 1003 Fundamentals of Public Speaking
- CO 1013 Introduction to Communication

(Air Force ROTC students may substitute AS 3013 and AS 3023.)

**Foreign Language**
- 3 sem. for B.A. One Foreign Language (1113, 1123, 2133)
- 2 sem. for B.S. One Foreign Language (1113, 1123)

### Fine Arts (one course required)

**Arts**
- ARC 1013 Architectural Appreciation
- ARC 2313 History of Architecture I
- ARC 3313 History of Architecture II
- ARC 3323 History of Architecture III
- ART 1013 Art History I
- ART 1023 Art History II
- ART 1113 Art Appreciation OR
- ART 3143 Italian Renaissance in Art History
- CO 1503 Intro to Theatre
- MU 2213 History and Literature of Music I
- MU 2323 History and Literature of Music II
- MU 1113 Music Appreciation
- PE 1323 History and Appreciation of Dance

### Humanities (EN, FL, HI, REL, PHI)

**B.S. degree requires one EN and one HI from the core listing.**

**B.A. and B.S.W. require one EN, one HI, and one PHI course plus 3 other humanities (not necessarily on the following list). These three courses should cover at least two areas.**

- EN 2203 Intro to Literature
- EN 2213 English Literature I
- EN 2223 English Literature II
- EN 2243 American Literature I
- EN 2253 American Literature II
- EN 2273 World Literature I
- EN 2283 World Literature II
- FLG 4053 19th Century Studies: Baudelaire Seminar
- FLG 4123 19th Cent. St: Decadents, Dandies & Bohemians
- FLG 4143 17th Century French Literature
- FLG 4173 Introduction to Francophone Cinema
- FLG 4193 18th Century French Literature
- FLG 4223 French Novel Before 1945
- FLG 4233 Modern French Poetry
- FLG 4273 The Human Condition
- FLG 4323 Studies in the 20th Century: Le Clezio Seminar
- FLG 4333 Verwandlungen
- FLG 4353 German Novella
- FLG 4493 Mysteries in Lit & Film
- FLG 4503 German Lit to 1750

- PSY 2513 Psychology of Adjustment
- PSY 3073 Psychology of Interpersonal Relations
- SO 1003 Intro to Sociology
- SO 1103 Contemporary Social Problems
- SO 1203 Marriage and Family

### Computer Literacy

- One 3 hour course required. Consult advisor.

### Mathematics & Statistics

- Either two courses required or one MA course at the level of MA 1463 or higher (with the exception of MA/ST 2113).
- MA 1313 College Algebra OR
- MA 1303 Quantitative Reasoning
- MA 1323 Trigonometry
- MA 1613 Calculus for Business and Life Sciences I
- MA 1713 Calculus I
- MA 1623 Calculus for Business and Life Science II
- MA 1723 Calculus II
- MA 2733 Calculus III
- MA 2743 Calculus IV
- MA 3113 Introduction to Linear Algebra
- MA/ST 2113 Introduction to Statistics
- MA/ST 3123 Introduction to Statistical Inference

### Natural Sciences

- 3 courses required, 2 with labs. B.A. and B.S.W. Majors must take one lab course in the Life Sciences BIO or EPP and one in the Physical Sciences CH, GG, GR, PH.

- BIO 1004 Anatomy and Physiology
- BIO 1033 Biological Sciences
- BIO 1023 Plants and Humans
- BIO 1123 Animal Biology
- BIO 1134 Biology I
- BIO 1144 Biology II
- BIO 2113 Plant Biology
- BIO 3103 Genetics I
- BIO 3304 General Microbiology
- CH 1043 Survey of Chemistry I OR
- CH 1213 Chemistry I
- CH 1053 Survey of Chemistry II OR
Mississippi State University and Middle Eastern Cultures (AN) (MEC) * - Cross-listed course may be taken only once.

The interdisciplinary minor in African-American Studies consists of 18 credit hours offered through several departments and programs throughout the University. The courses included in the minor focus on aspects of the African-American experience. To earn the minor, a student must have at least a 2.50 overall GPA, with a 3.00 GPA in anthropology courses, and have earned a minimum of 12 semester hours credit in anthropology. Part-time jobs are available for anthropology majors through the Department of Anthropology and Middle Eastern Cultures and through the Cobb Institute of Archaeology.

Undergraduate Coordinator: Dr. Janet Rafferty
Office: 108 Cobb Institute of Archaeology

Anthropology is the study of humans as biological and cultural beings. Its subfields include archaeology, biological anthropology, cultural anthropology, and linguistics. Students majoring in anthropology may undertake course work in all four subfields, with concentrations offered in archaeology and cultural and biological anthropology. Anthropology is a particularly broad major, designed for students who are preparing for employment with research organizations or museums, for administrative and research positions with state or federal governments (such as state highway departments and the National Park Service), and with human service agencies or organizations that involve work in foreign countries. The undergraduate major in anthropology also prepares students for graduate training in professional fields such as planning, law, and public administration, as well as for further graduate training in anthropology leading to college and university teaching and research positions.

A student wishing to pursue a program leading to a Bachelor of Arts with a major in anthropology is required to complete the program of study outlined on this page. Students are encouraged to take elective courses in related fields which will strengthen their academic training and job skills. These may include courses in human anatomy, soils, geology, and land surveying.

Students are eligible for membership in the Alpha chapter of Lambda Alpha, the national anthropology honorary. In order to be considered, a student must have at least a 2.50 overall GPA, with a 3.00 GPA in anthropology courses, and have earned a minimum of 12 semester hours credit in anthropology. Part-time jobs are available for anthropology majors through the Department of Anthropology and Middle Eastern Cultures and through the Cobb Institute of Archaeology.

The Anthropology faculty and staff are housed in the Cobb Institute of Archaeology. Facilities include archaeology laboratories and museum. The museum houses artifacts from Mississippi and the Middle East, including replicas of large-scale relief sculptures and statues from Assyria and Egypt.

Anthropology may be used as a minor field of study at both the undergraduate and graduate levels. Fifteen hours (nine hours must be 3000 level or above), including AN 1103, constitute an undergraduate minor. Requirements for an anthropology minor at the graduate level will be established in consultation with the anthropology graduate advisor. Courses taken for an undergraduate or graduate minor must be taught by anthropology faculty.

General Education and College Requirements

English Composition (6 hours)
- EN 1103 English Comp I OR
- EN 1163 Accelerated Comp I
- EN 1113 English Comp II OR
- EN 1173 Accelerated Comp II

Foreign Language (9 hours)
- 3 semesters one Foreign Language - see advisor

Humanities (18 hours)
- 3 hours Literature - see General Education courses
- 3 hours History - see General Education courses
- 9 hours Humanities Elective - Consult Advisor
  - Must be from 2 different areas - see A&S Core

Mathematics (6 hours)
- MA 1313 College Algebra
- MA/ST 2113 Introduction to Statistics

Fine Arts (3 hours)
- See A&S Core List

Natural Sciences (9-12 hours)
- 3-4 hours Physical Sciences w/lab (CH, GG, PH)*
- 3-4 hours Life Science w/ lab (BIO)
- 3-4 hours Natural Science Elective**

Social Sciences (18 hours)
- 6 hours See General Education courses
- 12 hours Social Sciences Electives *+

Major Core (36 hours)
- AN 1143 Intro to Cultural Anthropology
- AN 1343 Intro to Biological Anthropology
- AN 1543 Intro to Archaeology
- 18 hours Anthropology Upper Div Electives - see advisor
- 3 hours Anthropology Lower or Upper Division Elective

Oral Communication Requirement
- AN 4123 Anthropological Theory

Writing Requirement
- AN 4123 Anthropological Theory

Computer Literacy
- AN 4143 Ethnographic Methods OR
- AN 3513 Artifacts Analysis

General Electives (12-15 hours) Consult advisor

Total hours needed for major: 123
- 31 hours must be 3000/4000 A&S work

See General Education courses.
Consult advisor.
Must be from 2 different areas and must cross 4 disciplines over the 18 hours. Only one Economics allowed. Two Anthropology courses may be included. Consult advisor.

AFRICAN-AMERICAN STUDIES MINOR (AAS)

The interdisciplinary minor in African-American Studies consists of 18 credit hours offered through several departments throughout the University. The courses included in the minor focus on aspects of the African-American experience.

Anthropology
- AN 2203 Cultural and Racial Minorities*
- AN 3153 African Art and Culture

English
- EN 4343 African American Literature

History
- HI 4363 African American History and Culture
- HI 4733 History of Modern Civil Rights Movement
- HI 4783 African Civilization to 1880
- HI 4793 Modern Africa

Music
- MU 1103 African American Music

Political Science
- PS 4273 African American Politics
- PS 4543 African Politics

Sociology
- SO 2203 Cultural and Racial Minorities*

A maximum of six hours is allowed for other approved courses.

* - Cross-listed course may be taken only once.

Junior/Senior Writing
- 3 hours Consult advisor for selections.

Department of ANTHROPOLOGY and MIDDLE EASTERN CULTURES (AN) (MEC)

Undergraduate Coordinator: Dr. Janet Rafferty
Office: 108 Cobb Institute of Archaeology

Anthropology is the study of humans as biological and cultural beings. Its subfields include archaeology, biological anthropology, cultural anthropology, and linguistics. Students majoring in anthropology may undertake course work in all four subfields, with concentrations offered in archaeology and cultural and biological anthropology.

Anthropology is a particularly broad major, designed for students who are preparing for employment with research organizations or museums, for administrative and research positions with state or federal governments (such as state highway departments and the National Park Service), and with human service agencies or organizations that involve work in foreign countries. The undergraduate major in anthropology also prepares students for graduate training in professional fields such as planning, law, and public administration, as well as for further graduate training in anthropology leading to college and university teaching and research positions.

A student wishing to pursue a program leading to a Bachelor of Arts with a major in anthropology is required to complete the program of study outlined on this page. Students are encouraged to take elective courses in related fields which will strengthen their academic training and job skills. These may include courses in human anatomy, soils, geology, and land surveying.

Students are eligible for membership in the Alpha chapter of Lambda Alpha, the national anthropology honorary. In order to be considered, a student must have at least a 2.50 overall GPA, with a 3.00 GPA in anthropology courses, and have earned a minimum of 12 semester hours credit in anthropology. Part-time jobs are available for anthropology majors through the Department of Anthropology and Middle Eastern Cultures and through the Cobb Institute of Archaeology.

The Anthropology faculty and staff are housed in the Cobb Institute of Archaeology. Facilities include archaeology laboratories and museum. The museum houses artifacts from Mississippi and the Middle East, including replicas of large-scale relief sculptures and statues from Assyria and Egypt.

Anthropology may be used as a minor field of study at both the undergraduate and graduate levels. Fifteen hours (nine hours must be 3000 level or above), including AN 1103, constitute an undergraduate minor. Requirements for an anthropology minor at the graduate level will be established in consultation with the anthropology graduate advisor. Courses taken for an undergraduate or graduate minor must be taught by anthropology faculty.

General Education and College Requirements

Department of BIOLOGICAL SCIENCES  
(BIO) (MDT) (MIC)

The biological sciences encompass the three basic sub-disciplines of biology: botany, microbiology and zoology. The curricula of the major areas of concentration are designed to provide the student with a broad academic base while offering valuable practical experiences in laboratory and field situations.

The biology curriculum contains a nucleus of basic courses that present unifying principles, and advanced courses in either botany or zoology. Botany may be defined as a scientific study of plants. It is the basic science of all applied fields of work having to do with plants, such as agronomy, forestry, horticulture, plant breeding and plant pathology. Zoology is a basic science of all work having to do with animals such as taxonomy, ecology, physiology.

Microbiology is the study of living microscopic and submicroscopic organisms which are of importance to mankind. Majors in microbiology are prepared to work in food processing plants, plant or animal disease control agencies, pharmaceutical companies, quality control positions, the industrial fermentation industry, and basic research in cell and molecular biology.

Majors offered in the department are the B.S. in Biological Sciences, B.S. in Medical Technology, B.S. in Microbiology, M.S. in Biological Sciences, and the Ph.D. in Biological Sciences.

A senior research thesis in the Biology is available to outstanding students. A description of the program and application materials may be obtained from the department office. A combined B.S./M.S. degree is available to outstanding students. Application to this program may be made as early as the end of the sophomore year (after completion of 60 or more hours of undergraduate courses). Students should consult with a graduate advisor if interested.

   PH 1123 General Physics II OR
   PH 1133 General Physics III
   BCH 4013 Principles of Biochemistry OR
   BCH 4603 General Biochemistry AND
   BCH 4613 General Biochemistry

General Electives  
   15 to 18 hours

**Total hours needed for major: 124**

Applied microbiology courses are strongly recommended, regardless of the department in which they are offered (for example, Food Micro, Environmental Micro, or Soil Micro). Upper division courses in Medical Technology or Biochemistry are also acceptable. Students should see their advisor for assistance in selecting courses for microbiology elective credit. Hours in excess of 8 will reduce the general electives requirement by an equal number.

Students planning to attend professional schools should check with the faculty advisor for that program to identify additional courses that may be needed. Such courses can be taken for general elective credit.

For the pre-professional/graduate track, BCH 4603/4613 and 15 hours of general electives are required. For career track, BCH 4013 may be substituted for BCH 4603/4613, and 18 hours of general electives are required.

---

**MEDICAL TECHNOLOGY Major (MEDT)**

Major Advisor: Mary Celeste Reese, Dir. of Undergraduate Advising  
Office: 117 Harned Hall

Medical technologists are prepared for positions in hospital laboratories, clinics, research laboratories, the Public Health Service industry, and in various local, state and federal health organizations.

The medical technology curriculum leading to the Bachelor of Science degree from Mississippi State University includes three years of study at Mississippi State University and one year of study in a hospital School of Medical Technology accredited by the National Accrediting Agency for Clinical Laboratory Sciences. Admission to the hospital school is competitive. A student who has satisfactorily completed the three years on the campus and has gained admission to a hospital school will register for the hospital phase and will be considered to be enrolled at Mississippi State during the final year of study. Graduates are prepared for certification by several national agencies.

Program Consultants in Cooperating Hospitals
Mississippi State University maintains close contact with the teaching personnel in medical technology at the following hospitals in the area:

Jennifer Knight, MHS, MLS(ASCP), Program Director, Mississippi Baptist Medical Center, Jackson, Miss.
Lee Montgomery, MT (ASCP), Program Director, North Mississippi Medical Center, Tupelo, Miss.
Katherine Hopper, MT (ASCP), Program Director, Vanderbilt University Medical Center, Nashville, Tenn.
Jennie Kyle, MPH, MT(ASCP), Program Director, Baptist Hospital, Little Rock, Ark.

Department of CHEMISTRY (CH)

Major Advisors: Professors Svein Saebø and David Wipf
Assistant Professor John Young
1115 Hand Chemical Laboratory

Chemistry is concerned with the properties and compositions of substances and the transformations which they undergo. Because chemistry is a basic science to many careers, two undergraduate degree programs are offered to provide the needed flexibility for majors. These degrees are the B.S. and the B.A. degrees. A minimum of 124 hours is required for the B.S. degree and the B.A. degree. The department also offers the M.S. and the Ph.D. graduate degrees. Students in other majors may earn a minor in Chemistry by achieving at least a 2.00 average in a total of 22 hours of chemistry with 14 of the hours in upper-division courses and a minimum of 11 of the total hours completed at MSU.

The American Chemical Society (ACS) has continually approved the department and its curriculum since 1941, and awards a certificate to students who complete the ACS program. The ACS program is primarily intended as preparatory for graduate study in chemistry leading to a career in basic research. Graduates could also go directly into research and development positions in industry. Students seeking information on the ACS certification should contact a major advisor.

The B.A. degree program has a stronger liberal arts emphasis and could serve as a preparation for a secondary teaching career, chemical sales, or further study in a professional school.

B.S. in Chemistry

Department of COMMUNICATION (CO)

Major Advisor: John Forde
Office: 130 McComas Hall

The Bachelor of Arts degree in Communication is offered. The department offers concentrations in Broadcasting, Communication Studies, Journalism, Public Relations, and Theatre. Students may choose more than one concentration. Minors are available in all areas. In addition, the department offers numerous courses online throughout the year. Contact specific advisors for additional information.

BROADCASTING

The Broadcasting concentration prepares students for work in radio, television, multi-media and other areas. Graduates work in front of and behind the camera, from anchorperson to camera technician. Broadcasting graduates also find positions in extension service, university relations, government and industry.

COMMUNICATION STUDIES

The career track for this area is aimed at positions in corporate and public communication offices. Students preparing for graduate school or teaching in Communication and other areas often choose the Communication Studies curriculum.

JOURNALISM

In addition to filling positions for newspapers, magazines, and Web publications in the state and around the country, graduates of the Journalism concentration obtain news-related jobs in universities, business, and industrial relations.

PUBLIC RELATIONS

The Public Relations concentration prepares students for a variety of professional positions. In addition to work with public relations and advertising agencies, graduates are employed by newspapers and broadcasting organizations, banks, churches, hospitals, insurance companies, businesses and corporations, charitable and political groups, and state and federal governments.

THEATRE

Students choosing the Theatre concentration find positions with regional and repertory companies, community theatres (both on stage and off stage), and professional theatres in educational institutions, broadcasting, and film.

Communication Minors

Minors in each of the concentration areas (Broadcasting, Communication Studies, Journalism, Public Relations, and Theatre) are available. Because of the differences between and among the disciplines in the department, students considering a minor are advised to meet with the department head, John Forde, prior to making a decision regarding a minor. The Department of Communication endeavors to work with individual students so that the minor field combines appropriately with his/her major field of study. Students with majors in business, agriculture, social sciences and the humanities are especially encouraged to consider a minor in one of the related areas.

Awards and Professional Societies

Students in any of the departmental concentration areas with superior averages after completing certain courses may qualify for membership in the Theta Alpha Chapter of Lambda Pi Eta, the official honor society of the National Communication Association. Students in Theatre may be tapped for Alpha Psi Omega honorary after completing certain work in theatrical productions.

Numerous scholarships are available in the Department of Communication. See the department’s Web site for a complete list of available scholarships. Applicants may pick up necessary forms in the department office or by contacting the Scholarship Committee Chair, P.O. Box PF, Mississippi State, MS 39762.

Professional societies are available for students in most of the concentration areas. The Public Relations Student Society of America, the Public Relations Association of Mississippi, and Southern Public Relations Federation provide pre-professional experience and contacts for students of Public Relations. Blackfriars is available to students of Theatre. The Student Broadcasting Association services students in the Broadcasting concentration; this group is directly involved in the production of several television programs.

Programs of Study

Students who major in Communication select from several areas of concentration: Broadcasting, Communication Studies, Journalism, Public Relations, or Theatre. The total major consists of 45 semester hours in Communication courses: 12 hours of the departmental core; and 33-37 hours of additional specified work in the area of concentration. In addition, students complete the Arts & Sciences core curriculum and electives for a total of 124 semester hours leading to the B.A. Degree.

1. A minimum grade of C in all Communication courses (or approved substitutes) is required. Students earning a grade lower than C in a Communication course must retake that course.

2. Incoming freshmen must earn a score of 20 or higher on the ACT Enhanced English sub-scale before entering the major. Students who believe that the ACT does not accurately assess their language ability and who can present evidence of above average language skills (excellent English grades, extensive writing samples, etc.) will be given the opportunity to satisfactorily complete a screening test and gain admission to the major.

3. No transfer student, either from another college or within the university, will be accepted who has not earned a minimum 2.0 GPA on all college work attempted prior to entering the major.

Prospective students are reminded that Communication is a language intensive discipline. Students with only minimal oral and written language competency should expect to be at a competitive disadvantage in classes as well as in careers after graduation. Transfer students with less than a C in English composition courses may have difficulty with the advanced writing courses required in this major.

ECONOMICS (EC)

Major Advisor: Andrew Luccasen; Office: 312 McCool Hall
Minor Advisor: Rebecca Smith; Office: 312 McCool Hall

Economics is the scientific study of how people and institutions make choices concerning the use of society’s scarce resources. It is a broad social science that shares common interests with both the behavioral sciences (e.g. sociology and psychology) and the decision sciences (e.g. finance and management). The importance of economic analysis is recognized by being the only social science in which a Nobel Prize is awarded. Economics students receive training in the methods and uses of economic analysis as applied to households, businesses, and governments.

The study of economics offers students many career options. Economics majors are found pursuing careers in industry, trade, finance, law, government, and education. An economics major or minor also helps prepare the student for graduate professional training in business, public administration, and law. The flexibility of the economics major is reflected in relatively high starting salaries and lifetime earnings of economists. Undergraduates at Mississippi State may pursue an economics major through either the College of Arts & Sciences (B.A. degree) as described below or through the College of Business and Industry (B.B.A. degree). The business program in economics is described later in this Bulletin.
Economics Major

Students seeking the B.A. with a major in economics are required to complete all College of Arts & Sciences core and University general education requirements. Majors must also complete the program of study on this page, including 12 hours of advanced electives. Elective courses should be chosen with the advisor’s approval and used to enhance the student's overall program. Although not required, economics majors may elect to pursue a minor in another discipline with the advisor’s approval.

Economics Minor

A minor in economics is attained by selecting, in consultation with the economics minor advisor, at least 15 hours of economics course work. Three hours of courses from finance (FIN) or agricultural economics (AEC) may be applied to the economics minor with approval from the advisor. All economics minors must register with the economics minor advisor in the Department of Finance and Economics, 312 McCool Hall. Students with majors in business, engineering, agriculture, the social sciences, mathematics, and pre-law are especially encouraged to consider the economics minor.

Advising and Honors Organization

Academic advising and career counseling are available from the Economics faculty for both majors and minors. Students interested in the study of economics should contact the Department of Finance and Economics, 312 McCool Hall. Any student who completes 12 credit hours of economics with at least a 3.0 GPA and has an overall GPA of 3.0 or higher is eligible for membership in Omicron Delta Epsilon, the international honor society in economics.

Department of ENGLISH (EN)

Major Advisors: Professor Richard Raymond (Head)
Professor Lara Dodds (M.A. program)
Assistant Professor Thomas Anderson (B.A. program)
Office: 316 Lee Hall

The study of English not only gives students knowledge of language and literature but also helps to develop their ability to read perceptively, think critically, analyze problems, and write correctly and persuasively. For this reason, a major in English has traditionally been viewed as good training for careers in law, government, business, and publishing, as well as for careers in teaching and writing.

The department offers an undergraduate major (B.A.), a minor in English, and an M.A. The department also edits and publishes the distinguished literary journal, The Mississippi Quarterly. Additionally, the department operates the university Writing Center (200 Lee Hall) to assist all MSU students with their writing.

The Department of English awards several scholarships annually: the Howell H. Gwin Scholarships to an outstanding junior majoring in English and to two entering graduate students in English; the George B. Nutt Scholarship to a freshman declaring an English major or to a sophomore or junior English major; the Helen W. Skelton Annual Scholarship to full-time English major maintaining at least a 3.0 GPA and demonstrating good character, leadership and financial need; the William H. Magruder Scholarship to an upper-division or graduate English major; the Roger LeMoyne Dabbs Memorial Scholarship to an English or Communication major; and the Eugene Butler Creative Writing Scholarship to an undergraduate or graduate student. The Department of English sponsors Xi Kappa Chapter of Sigma Tau Delta National English Honor Society; memberships are offered by invitation to scholastically qualified junior and senior undergraduate students and to second-year graduate students who are English majors. The Department of English also sponsors writing contests and publishes The Jabberwock Review, a student-edited collection of literature and art.

In addition to two semesters of freshman composition, which the department recommends be taken at the 1163/73 or Honors level, English majors take EN 2213, 2223, 2243, 2253, and 3414, and at least 21 additional hours of English electives, of which 15 hours must be 4000 level. English electives include courses satisfying the following group requirements:

- Group I (one course): EN 4503, 4513, 4523, 4533, 4703, 4713
- Group II (one course): EN 4643, 4653, 4723, 4733, 4863, 4883, 4663
- Group III (two courses): EN 4333, 4343, 4903, 4913, 4923, 4933
- Group IV (one course): to be taken from Group I or Group II

No more than one experimental course may be counted toward fulfillment of the English elective requirements. For students who have taken accelerated or honors composition, EN 2203 does not count toward the requirements for the major.

English majors must take HI 3743, History of England, in fulfilling the Arts & Sciences B.A. common curriculum requirements.

1. English majors must maintain at least a 2.5 QPA in all upper-division English courses. Students who fall below a 2.5 QPA must bring it up to 2.5 the next semester or drop the English major.

2. English majors must attain a C or better in all English courses at the 2000 level or above in order for those courses to count toward the requirements of the major.

3. English majors must take 15 hours at the 4000 level at MSU.

Students seeking secondary-school teaching certification should consult with an English Education advisor.

English minors take at least 18 hours of English electives with a grade of C or better beyond completion of the freshman composition re-
requirement of their major. Of these hours, at least six must be at the 4000 level; these must be completed in residence. Students should consult the English major advisor to plan a minor program which will complement their major studies and career interests.

Department of FOREIGN LANGUAGES (FL)

Major Advisor: Professor Jack Jordan (Head)
Associate Professor Edward Potter (M.A. program)
Associate Professor Robert Harland (B.A. program)
Office: 300 Lee Hall

Foreign language majors prepare for careers in government (State Department, foreign service, diplomatic corps, FBI, CIA, USIA, the military, immigration, etc), international business, the human services fields, teaching at all levels (secondary school, junior college, university), and other language-related jobs.

Programs of study leading to the Bachelor of Arts (B.A.), the joint Bachelor of Arts and Bachelor of Business Administration, and the Master of Arts (M.A.) in Foreign Languages are offered. A minor in one foreign language may be obtained upon satisfactory completion of 12 semester hours beyond the intermediate (III and IV) level courses. Education students desiring teacher certification must earn at least 27 semester hours in the language they plan to teach.

The Department sponsors three honor societies: Pi Delta Phi (French), Delta Phi Alpha (German), and Sigma Delta Pi (Spanish). Information about membership requirements may be obtained from the Head of the Department. The Department also sponsors language clubs which provide social and cultural activities for faculty and students.

The Bachelor of Arts in Foreign Languages is awarded upon the successful completion of a minimum of 123 semester hours, including the following areas: (The hours needed for graduation will depend upon the entry level of study into the major language; a minimum of eight, 3-credit hour courses in the chosen concentration at the 3000-level, or higher, is required.)

1. General Education Requirements
2. Bachelor of Arts Common Requirements
3. Advanced Composition and Advanced Conversation in the respective concentrations.
4. A minimum of 42 semester hours in the target language (French, German, Spanish). Note that degree requirements vary among the languages. It is the student's responsibility to meet the requirements of the chosen language concentration, as listed below. The normal sequence is FLF/G/S I, II, III, IV, Advanced Composition FLF/G/S, Advanced Conversation FLF/G/S, two semesters of Survey of Literature FLF/G/S, and at least 6 hours of upper-division electives in the primary language. A civilization course related to the primary language is strongly recommended.
5. Completion of the fourth semester course of a second foreign language (12-14 semester credit hours) is recommended. In addition to the concentrations, the Department offers courses in Chinese, Italian, Japanese, Latin and Russian.
6. Study abroad is highly recommended. Foreign Language majors interested in following this recommended course of study should notify the advisor as soon as possible, so that a plan of study can be developed in which courses are taken in proper sequence.

International Business Program

A Five-Year Double Degree Program:
B.A. in Foreign Languages & B.B.A. in Business Administration

International Business Academic Program
  Brian Watkins, Director; Office: 308 McCool Hall

Major Advisors, Business Administration:
  Associate Professors Addy and Rogers;
  Assistant Professor Rezek

Major Advisors, Foreign Languages:
  Professor Jordan; Associate Professor Lestrade;
  Assistant Professors Gray, Moser and Potter

The International Business Program provides students an academic background and work experience to help ensure success in the marketplace. Students receive a double degree at graduation reflecting the dual concentration in Arts & Sciences: B.A. (language and cultural proficiency); and in Business: B.B.A. (with an international focus + a specific discipline such as Marketing or Finance). This is in addition to the first two years of study developing abilities in writing, math, sciences, and computer literacy.

The hallmark of this program is a work internship, an outside the country work experience of a full summer or one semester duration (generally taken the last of the 4th year or beginning of the 5th year). This work is ideally reflective of the student’s specific business discipline and language proficiency area. The student who selects to separate the work and abroad experience must petition the IB committee for approval. Minimum acceptable levels are 1). WORK: 10 continuous weeks of international tasks and responsibilities, 2) ABROAD: 6 continuous weeks in one location for cultural immersion. An International Business Co-op Work program offers 3 semesters paid international work experience in concert with pursuing the academic degree.

The total number of semester credit hours (SCH) will be 154 for most students. The program has five main components:

1. a core of basic skills, including courses in writing, mathematics, sciences, and communication (30 SCH, or 10 courses);
2. a core of humanities and social science courses selected to fit the special needs of international business majors, emphasizing both the history and culture of other societies and the ways these societies relate to our own (27 SCH, or 9 courses);
3. intensive training to develop proficiency in one foreign language and its associated cultures and literatures (35 SCH or 11 courses);
4. a thorough grounding in business techniques and practices, including 33 SCH of general business courses, 12-16 SCH of International Business courses, and 12 SCH in one of six functional/discipline emphases in business (accounting, banking and finance, management information systems, economics, management, marketing*, or risk management, insurance and financial planning*) (57 SCH, or 19 courses);
5. a one-semester internship program with an international business (3 SCH).

Students interested in following this recommended course of study should notify the Department Head of Foreign Languages and the Director of International Business Academic Programs. Students must have the Director’s written approval to join the International Business Program. Students must meet all graduation requirements for the College of Business and Industry and the College of Arts & Sciences. This includes having no Ds in upper level business courses or in upper level Foreign Language courses. International Business students must have an overall and previous semester GPA of 2.5 to be eligible for internship and study abroad.

* Information Systems, Insurance & Marketing functional emphasis areas will need an additional 3 credits in their program.

* To be selected with the advice and approval of advisor

GENDER STUDIES MINOR

Contact: Dean of Arts & Sciences
Advisor: Dr. Nicole Rader
Ellen Bryant Center for Women’s Studies - Rice Residence Hall

Gender Studies is an interdisciplinary field that examines the complex interaction of gender with race, class, sexuality and nationality. Gender is a psychological and cultural construction of fundamental importance to people everywhere. It is a central aspect of personal and social identity, and a criterion for social stratification and differential political treatment. In addition to the field’s examination of the historical contributions and concerns of women, gender studies also explores research in men’s lives and masculinity. Having such a deep understanding of gender and gender biases enhances the abilities of students to succeed in a variety of fields and professions.

Undergraduate students would receive a Gender Studies minor by completing 18 credits of course work from a variety of fields distributed as follows; only nine credits can come from any one department may count toward the minor.

Required Course: SO/AN/GS 1173 Introduction to Gender Studies
Additional core courses (6 hours)
COE 4743 Gender Issues in Counseling
EN/GS 3513 Women and Literature
HI 4273 Women in American History
PHI 4313 Feminist Interpretation of Western Social and Political Philosophy
PS 3033 Gender and Politics
PSY 3203 Psychology of Gender Differences
SO 4403 Sociology of Gender
SO/CRM 3343 Gender, Crime and Justice
Electives (9 hours)
See Gender Studies Advisor for list of approved electives.

GENERAL LIBERAL ARTS (GLA)

Advisor: Mark Goodman
Office: 106 McComas Hall

Students who prefer to specialize in more than one field of study may earn a B.A. degree in General Liberal Arts. Requirements for this degree include all of the following: satisfactory completion of the University General Education and College Core curriculum; satisfactory completion of the College of Arts & Sciences B.A. requirements; approval of the proposed G.L.A. program; satisfactory completion of 12 hours of upper-division courses (courses numbered 3000 and above) in each of three fields of study, all with a grade of C or better. The three fields may all be within the College of Arts & Sciences, or one of the three may be within another school/college of the University if that field is related to the student’s educational or career goals. To insure an orderly progression of work toward the degree, interested students should meet with the program’s advisor as early as possible. Furthermore, admittance into the program requires approval of the GLA Committee and the Associate Dean of the College of Arts & Sciences. General Liberal Arts is not suitable for students who are uncertain about their choice of a major; these students should see the Undecided listing in this section.

General Education and College Requirements
English Composition (6 hours)

*** Consult advisor.
**** Must be from 2 different areas and must cross 4 disciplines over the 18 hours. Only one Economics allowed. See advisor.

GENERAL SCIENCE (GSC)

Major Advisor: Professor Christopher P. Dewey
Office: 210 Hilburn Hall

For various reasons, a student may not require the intensive preparation that is typical of a professional curriculum. The general science curriculum is tailored for his/her needs. Flexibility is the key characteristic of the curriculum. The general science program is designed to give students a broad general education and at the same time teach them the fundamentals of science. By judiciously choosing his/her course of study, a student may use the general science curriculum in many ways. For example, by concentrating on biological science or chemistry the student may prepare for medical or dental school, and with appropriate choice of electives preparation for clinical and other laboratory positions in such fields as public health and marine biology is possible.

If the student is interested in interdisciplinary studies related to environmental science, the general science curriculum is suitable. Any one of the physical or biological sciences may be emphasized. The curriculum, however, involves courses from several sciences, and from other fields concerned with the environment. Persons trained in this option should be in demand in the health industry, science laboratories, federal, state, and local governmental agencies, and in industries involved with earth resources.

Successful completion of the University and curriculum requirements will result in the awarding of a B.S. degree in General Science. The following requirements apply to all general science students:

1. The B.S. Common Curriculum must be satisfied.
2. A minimum of 60 credit hours in science, of which at least 30 must be in one science, is required.
3. Normally, science courses must include: BIO 1504, BIO 3103, CH 1213 & 2211, CH 1223 & 2221, CH 4513 & 4511, CH 4523 & 4521, PH 1113, & PH 1123, GG 1113 & GG 1111.
4. Electives must be approved by the faculty advisor.
5. A total of 124 credit hours is required.

Department of GEO SCIENCES (GG) (GR)

Major Advisor: Dr. Darrell Schmitz
Office: 108 Hilburn

B.S., M.S. and Ph.D. degrees in Geoscience are offered with emphasis in sub-disciplines described below. Minors are offered at both B.S. and M.S. levels in Geoscience. The Department of Geosciences strives for an integrated, interdisciplinary study of the whole Earth at both the bachelor and master of science levels. Course offerings are grouped into six areas of emphasis: 1) Professional Geology - physical, biological, and chemical aspects of the Earth; 2) Geography - distribution of physical features and human...
interaction with the Earth; 3) Environmental Geoscience - conservation and management of Earth resources and remediation of natural and human hazards; 4) Broadcast Meteorology/Climatology - radio/television weathercasting; 5) Professional Meteorology/Climatology - atmospheric processes and climatic variability; and 6) Geographical Information Systems - spatial analysis and topological relationships of geographic data. A general program of study is built upon a foundation of natural and social sciences, humanities, and computer applications. The Geoscience curriculum provides fundamental training for future employment in the petroleum and environmental industries; education; state and federal government agencies; environmental consulting; meteorological/climatological consulting; weathercasting on radio and television; and advanced studies in graduate school.

Within the six areas of emphasis outlined above, a student may further focus interests in a variety of areas including: water resources, hydrogeology and environmental clean-up and monitoring, petroleum exploration and services, construction and urbanization involving geological applications, geophysics and geochemistry, sedimentary geology and paleontology, Quaternary geology and karst processes, paleomagnetism, Geographic Information Systems or analysis and prediction of weather and climate. A minimum of 40 credit hours in geoscience courses is required for the geoscience degree. A grade of C or higher is required on all departmental courses to satisfy graduation requirements. Students in the professional geology concentration are required to take the Association of State Board of Geologists Fundamentals of Geology (ASBOG-FG) exam.

A minor in geoscience consists of a minimum of 14 credit hours in courses numbered 2000 and above, in addition to the first year courses. The following are examples of variations within a geoscience minor. A minor with a Geology emphasis should include physical (GG 1113/1111) and historical geology (GG 1123/1121) plus 14 hours 2000 and above for a total of 22 hours; for an Environmental Geoscience emphasis, physical and historical geology with laboratory plus introduction to environmental geology (GG 3133) and other course work 2000 and above for a total of 22 hours; for emphasis in Geography, cultural geography (GR 2013), world geography (GR 1123) and other course work 2000 and above; and Broadcast Meteorology/climatology, physical geography (GR 1114) and either introduction to environmental geology (GG 3133) or conservation of natural resources (GR 3113) and other course work 2000 and above for a total of 21 hours; for emphasis in Geographic Information Systems, physical geography (GR 1114) or physical geology (GG 1113/1111), maps and remote sensing (GR 2313), Principles of GIS (GR 4303) and other course work 2000 and above for a total of 22 hours. Minors in Geoscience are also available at the M.S. level.

Four scholarships are available to students majoring in Geoscience, namely the F.F. Mellen, the Gordon W. Gulmon, the Sistrunk Endowed, and the Dunn Memorial Scholarships. The Mellen Scholarship provides financial assistance to those enrolled in field geology camp during the summer. The Gulmon, the Dunn Memorial, and the Sistrunk Endowed Scholarships are awarded to students for academic excellence. All are restricted to students at junior or senior rank, with the exception of the Sistrunk Endowed Scholarship.

The Department of Geosciences encourages involvement in Sigma Gamma Epsilon, a nationally recognized honorary Earth Science society. Requirements for acceptance include a grade-point average of at least 3.00 in 12 or more hours of geoscience and a cumulative average of 2.67.

The Department of Geosciences participates with the National Weather Association (NWA) and the American Meteorological Society (AMS) in training individuals for the respective “Weathercaster Seals of Approval”. The Office of the State Climatologist and the MSU Climatology Laboratory are housed in the Department and are strongly involved in programs for all students with interests in broadcast meteorology and climatology.

**DISTANCE LEARNING PROGRAMS**

The Department of Geosciences offers four distance learning programs listed below. Each program utilizes recorded lectures and the Internet for course instruction.

Broadcast Meteorology Program. A three-year, 17 course, 52 credit hour program of study that can lead to a B.S. degree in Geosciences. Primarily for individuals in television weather.

Operational Meteorology Program. A three-year, 17 course, 52 credit hour program of study that can lead to a B.S. degree in Geosciences. Enrollment is restricted to members of the United States Armed Forces.

Teachers in Geoscience Program. A two-year, 12 course, 36 credit hour program of study that leads to a M.S. degree in Geosciences. Primarily for K-12 teachers. An additional two-year, 10 course, 30 credit hour program of advance course work is available.

Applied Meteorology Program. A two-year, 12 course 36 credit hour program of study that can lead to a M.S. degree in Geosciences. Primarily for individuals with meteorological, environmental, or hazards-related careers.

HEALTH INFORMATICS and INFORMATION MANAGEMENT CURRICULUM (BIOH)

Major Advisor: Mary Celeste Reese
Office: 117 Harned Hall

The Health Informatics and Information Management curriculum is designed to prepare students for careers as administrators in charge of healthcare information. Completion of the two-year curriculum qualifies a student for admission to the University of Mississippi Medical Center at Jackson or some other medical center offering a medical records administration program. The clinical work must be taken at a school having a program approved by the Council on Medical Education for Hospitals of the American Medical Association and the American Medical Record Association. Students who satisfactorily complete the pre-professional and professional training will be awarded the B.S. degree by the professional school and will be eligible to take the examination for registration by the American Health Information Management Association.
Department of HISTORY (HI)

Major Advisor: Dr. Anne Marshall
Office: 213 Allen Hall

Among the humanities disciplines, history is unique in the emphasis it places on interpreting human experience over place and time. Historians study the evolution of human beings and societies, emphasizing the importance of people’s choices, values, and actions. History provides indispensable background and the social and political context for other academic disciplines and branches of knowledge.

Specialization in history on the undergraduate level has direct professional application in the field of secondary education and provides excellent preparation for careers in law, the ministry, communication, journalism, government service, the military, and business. The department maintains a close working relationship with other departments on campus, making it possible for students who desire to do so to pursue double majors, joining history with geography, English, political science, business, computer science, or other fields.

To earn a Bachelor of Arts degree with a major in history, a student must pass a minimum of 39 semester hours in history with a 2.50 average in those courses. All undergraduates majoring in history must complete two of the following basic sequences: HI 1063/1073; HI 1163/1173; HI 1213/1223; HI 1313/1323. Along with these basic sequences, students are required to take a minimum of two upper division courses from Category I, two upper division courses from Category II, two upper division courses from Category III, plus two upper division courses from any Category.

For information on which courses fit into particular categories, please contact an advisor. At the beginning of their junior year majors must enroll in and pass with a grade of “C” or better, a course in Historiography and Historical Method (HI 3903). Fifteen hours of the upper division work (3000 and 4000 level courses) must be taken at Mississippi State. For a minor in history, a student must take a minimum of 18 semester hours of history including one of the basic sequences listed above plus twelve additional credit hours in history courses numbered 3000 and above including at least one at the 4000 level. Students interested in a major or minor in history should consult one of the advisors listed.

The Department of History offers work leading to both the M.A. and Ph.D. degrees. The prerequisite for admission to a graduate program in history is a minimum of 18 hours of undergraduate history courses. Students desiring to pursue graduate studies should consult the Graduate Coordinator.

Mississippi State has a chapter of Phi Alpha Theta, the international history honorary society. Those interested in the eligibility requirements should consult with Professor Matthew Lavine.

INTERDISCIPLINARY STUDIES (BSIS)

The Bachelor of Science in Interdisciplinary Studies is a university-wide degree coordinated through the College of Arts & Sciences by the Interdisciplinary Studies Committee. This multi-discipline academic program is appropriate for students motivated by specific interests not recognized in traditional majors and is not intended to compete with existing programs. All University requirements, including 31 hours of upper division course work and a year’s residence, must be met for graduation.

The Bachelor of Science in Interdisciplinary Studies is intended to allow students maximum flexibility to custom-design a curriculum to meet their personal and career goals. Such a program of study must assure depth of study as well as breadth. Therefore, it must insure that students take at least 36 upper-division hours in the areas they have chosen for emphasis and that they select a minimum of 12 hours in each of three areas or 18 hours in two. Emphasis areas must be selected from at least two colleges. General Education requirement (45 hours) must be met in addition to a general studies core of 12 hours. A total of 122 semester hours is required for graduation, along with an MSU and cumulative GPA of 2.0.

To insure coherence in the program, the student must construct and explain in writing the rationale for the interdisciplinary studies program’s direct relationship to the student’s personal and career goals. Each student will be required to meet with advisors in the academic disciplines who will agree to sponsor the student in drawing up the proposed curriculum, formulating the rationale, and presenting the case in writing to the Interdisciplinary Studies Committee. This should be done prior to the senior year.

The Interdisciplinary Studies Committee will review applications, and if approved, the student may proceed with the curriculum. The Committee will meet during the fall, spring and summer semesters, and students must make written application by September 1, February 1 or May 1. Application for a degree must be submitted to the Office of the Registrar. For further information, contact:

College of Arts & Sciences
224 Allen Hall, Mail Stop 9706
Mississippi State, MS 39762
(662) 325-2646
The Department of Mathematics and Statistics offers a Bachelor of Arts degree and a Bachelor of Science degree. Both degrees are 124 hours. The department also offers undergraduate minors in mathematics and statistics which are described below.

Candidates for the Bachelor of Arts degree are required to complete a minimum of 36 hours of mathematics. Candidates for the Bachelor of Science degree are required to take a minimum of 42 hours of mathematics. Required courses for each degree are listed below. Students must also satisfy the General Education requirements and College Core requirements, including speech, computer literacy and writing requirements.

A minor in mathematics consists of MA 1713, MA 1723, MA 2733, MA 2743, MA 3113, MA 3253, one additional math course at the 3000 level and one additional 4000-level math course. A minor in statistics consists of MA/ST 3123, ST 4111, either ST 4213 or ST 4313, either MA/ST 4523 or MA/ST 4543, and both ST 4243 and ST 4253. Please notice that MA 2743 and MA 3113 are prerequisites for ST 4243 and ST 4253.

Mathematics courses below Calculus I, MA 1713, do not count toward a degree in mathematics. Entering freshmen who plan to major in mathematics but do not meet the prerequisites for MA 1713 are encouraged to join the undeclared major until they are ready to take Calculus I. At that time, they will be assigned an advisor in the Department of Mathematics and Statistics.

For all degree programs, including minors, a student must have an overall C average and a C average in the math classes which count toward the degree. Moreover, students pursuing a B.A. or B.S. degree in mathematics must have at least a GPA of 2.5 in Calculus I-IV, Linear Algebra and Differential Equations (MA 1713-2743, MA 3113 and MA 3253). Students who fail to meet this requirement must withdraw from the B.A. and B.S. degree programs in Mathematics, subject to appeal to the department’s undergraduate coordinator.

Regarding graduate study, the Department of Mathematics and Statistics offers a Master of Science in Mathematics, Master of Science in Statistics, and a Doctor of Philosophy in Mathematical Sciences. Major areas of study for the Doctor of Philosophy in Mathematical Sciences include applied and computational mathematics, ordinary and partial differential equations, functional analysis and operator theory, functional equations, graph theory, topology and statistics. Please see the graduate coordinator for more details.

### B. A. in Mathematics

Total hours needed for major: 124
(31 hours must be 3000/4000 from A&S)

STATISTICS (ST)

Major Advisor: Associate Professor Janice DuBien
Office: 448 Allen Hall

Courses in statistics are designed to satisfy two objectives. The first objective is to provide graduate training for those students wishing to pursue a career as professional statisticians. Both graduate and undergraduate courses are available for this purpose. The second is to provide minors for students from other disciplines. A minor in statistics consists of MA/ST 3123, ST 4111, either ST 4213 or ST 4313, either MA/ST 4523 or MA/ST 4543, and both ST 4243 and ST 4253. Please notice that MA 2743 and MA 3113 are prerequisites for ST 4243 and ST 4253.

Graduate study is offered in the Department of Mathematics and Statistics leading to the degree of Master of Science in Mathematics, Master of Science in Statistics, and a Doctor of Philosophy in Mathematical Sciences. Many applied statistics courses are offered which are suitable for a minor in statistics at the master’s or doctoral level. Specific course requirements for the graduate minor in statistics may be obtained from the Graduate Coordinator of the Department of Mathematics and Statistics.

Admission to the master’s program in statistics is open to graduates in all disciplines. The program of study is a blend of both statistical theory and statistical methods. In addition, there is ample flexibility in the non-thesis option to allow a graduate student with special interests in an area of statistical application to minor in that particular applied field. The department awards a limited number of teaching assistantships. For further details, consult the Graduate Coordinator of the Department of Mathematics and Statistics.

MUSIC (MU)

Major Advisors: Dr. Michael Brown or Dr. Jackie Edwards-Henry
Office: Music Building A

The Department of Music offers a Bachelor of Arts in Music degree in a liberal arts tradition of music study. This degree is designed to provide foundation coursework to apply to a variety of interdisciplinary careers including music, in preparation for graduate study or for self-improvement.

The department also offers a minor in Music. The minor includes 18 or 19 hours of music history and theory courses, piano, applied study, and participation in ensembles and recitals. All coursework for the minor in Music must be completed at the MSU Starkville campus with a grade of C or better. Consult the major advisor for specific course requirements.

General Education and College Requirements

EDF 3413 Writing for Thinking
See advisor for other approved courses.
Applied Study (12 hours)
- 6 semesters of study at 2 hours per semester:
  - 2 semesters of 1000-level courses
  - 2 semesters of 2000-level courses
  - 2 semesters of 3000-level courses must be completed on the same instrument

At least 1 semester of 2000-level and 2 semesters of 3000-level work must be completed at MSU.

Ensembles (4 hours)
- 4 semesters of ensembles must be completed at MSU, two of which must be the designated major ensembles.

Other Requirements
- Piano Proficiency Exam
- Upper Division Proficiency Exam
- MU 1010 Recital Hour - must enroll each semester
- Recital or Project

Music Electives (11 hours)
- 6 hours - Music Electives
- 6 hours - Met in College Core

Total hours needed for major: 122

Department of PHILOSOPHY and RELIGION

PHILOSOPHY Major (PR)
Major Advisor: Robert Thompson
Office: 2nd Floor Etheredge Hall
http://www.philosophyandreligion.msstate.edu

Philosophy is the study of the basic concepts—such as reality, truth, and goodness—which underlie the more specialized pursuits of science, art, education, religion, etc. Although students often study philosophy for its own sake, the general perspective it provides, and the rational skills it develops, are of immense practical value in any profession.

The baccalaureate degree in philosophy is the accepted major for those planning to enter graduate school in philosophy. It is, however, an excellent pre-law and pre-seminary degree and, because of its general nature, philosophy is highly appropriate as a double major with any other concentrated field of study.

The standard program leading to the Bachelor of Arts degree in philosophy has a major requirement of 30 hours, including Introduction to Philosophy, Introduction to Logic, Introduction to Ethics, History of Philosophy, Parts I and II, and Seminar in Philosophy. The final 12 hours, including six that must be PHI courses, are to be selected in consultation with, and with approval by, the major advisor.

The department also offers a minor in philosophy, with the requirements being 15 hours of PHI courses.

Students considering either a major or minor in philosophy should meet with one of the department’s advisors as early in their careers as possible.

General Education and College Requirements

English Composition (6 hours)
- EN 1103 English Comp I OR
- EN 1163 Accelerated Comp I
- EN 1113 English Comp II OR
- EN 1173 Accelerated Comp II

Foreign Language (9 hours)
- 3 semesters - one Foreign Language - see advisor

- PHI 1123 Intro to Ethics
- PHI 3023 History Western Phil I
- PHI 3033 History Western Phil II
- 12 hours - PHI Electives

Oral Communication Requirement
- CO 1003 Fundamentals of Public Speaking

Writing Requirement
- PHI 3133 Seminar in PHI

Computer Literacy - choose one of the following:
- TKT 1273 Computer Applications
- BIS 1012 Intro to Bus. Computer Systems
- CSE 1213 Computer Programming with Fortran
- CSE 1233 Computer Programming with C
- CSE 1273 Computer Programming with Java

General Electives (19 hours) - Consult advisor

Total hours needed for major: 124

(31 hours must be 3000/4000 from A&S)
* See University/A&S Core.
** Consult advisor.
*** Must be from 2 different areas and must cross 4 disciplines over the 18 hours. Only one Econometrics allowed. See advisor.

Religion Concentration (REL)

Program Coordinator and Advisor: Albert Bisson
Office: 2nd Floor Etheredge Hall

Religion refers to the basic human impulse to seek coherence in life, and to experience a sacred reality that guides and orders human existence. As an academic discipline the study of religion involves consideration of those writings, customs, and rituals that have historically served to form and distinguish religious groups. It includes examination of primitive religions and sectarian developments as well as study of the major world religions of both the east and west.

The Department of Philosophy and Religion offers a concentration in religion leading to the Bachelor of Arts degree in philosophy. This degree is an accepted major for entering graduate school, or to prepare for a career in a professional ministry or in teaching. The religion concentration has a special pastoral track for students who wish to prepare for graduate seminary studies. The broad historical and cultural orientation of the philosophy degree with a religion concentration makes it an excellent preparation for any career. It is highly appropriate as a double major, or as a minor in association with another field of study.

The major with the concentration in religion has a requirement of 30 hours. Of these, nine hours are required in philosophy. The philosophy component may be satisfied by taking either a) Introduction to Philosophy, Introduction to Logic, and Seminar in Philosophy, or b) History of Western Philosophy I and II, and Seminar in Philosophy. The remaining 21 hours must include Introduction to Religion, World Religions I and II, six hours of REL courses, and six hours of REL and PHI courses which are to be selected in consultation with, approved by, the Religion advisor.

The Department also offers a minor in Religion, with the requirement being 15 hours of any REL courses.

General Education and College Requirements
See Philosophy Requirements above

Concentration Core
- REL 1103 Intro to Religion
- REL 3213 World Religions I
OCCUPATIONAL THERAPY CURRICULUM (BIOT)

Major Advisor: Mary Celeste Reese
Office: 117 Harned Hall

Mississippi State University does not provide training in occupational therapy but does offer the background work necessary to transfer to a professional school. In their admission requirements professional schools differ, some requiring two years of pre-professional study, some three and others four. Sixteen hours of observation are also required. Upon successful completion of the pre-professional and professional work, students are awarded the M.S. degree by the professional school. Students wishing to apply to the University of Mississippi Medical Center should do so by January preceding the September they wish to enter. The University of Mississippi Medical Center only accepts Mississippi residents. Consult with your advisor for an appropriate schedule.

PHYSICAL THERAPY CURRICULUM (BIOP)

Major Advisors: Mary Celeste Reese/John Lamberth
Office: 117 Harned Hall/235 McCarthy Gym

Mississippi State University does not provide training in physical therapy but does offer the background work necessary to transfer to a professional school. In their admission requirements professional schools differ, some requiring two years of pre-professional study, some three, and others four. The courses listed below satisfy the requirements of the Mississippi Medical Center in Jackson, where most Mississippi State University students pursue their professional training. Forty hours of observation are also required. Upon successful completion of the pre-professional and professional work, students are awarded the Ph.D. degree by the professional school. Students wishing to apply to the University of Mississippi Medical Center should do so by January preceding the September they wish to enter. The University of Mississippi Medical Center only accepts Mississippi residents. Consult with your advisor for an appropriate schedule.

Admission requirements:
1. provide evidence of observation in a minimum of two physical therapy clinical departments or practices for a total of 40 hours (additional hours and sites are recommended)
2. have a baccalaureate degree
3. submit an official report of GRE scores. The report must include verbal, quantitative and analytical scores

4. return all application materials to the Office of Student Services and Registrar by the admissions deadline.
5. complete the following prerequisite course requirements:
   - two Physics courses with labs
   - two advanced physical or biological sciences
   - one statistics course (from senior institution)

Department of PHYSICS and ASTRONOMY (PH)

Major Advisors: Torsten Clay, Mark Novotny, and Jeffry Winger
Office: 125 Hilburn Hall

Physics plays a basic role in all science and engineering disciplines. Physics is concerned with the study of the structure of matter, the nature of radiation, and the interaction of radiation and matter. Among the major branches are optical, laser, atomic, nuclear, molecular particle, condensed matter, bio-, astro-, plasma and computational physics. The B.S. program in physics provides an excellent, broadly based course of study with electives that allow the student to pursue his/her special interests in other subjects. The B.S. degree provides the necessary training for either employment in industry or government, or continued study at the graduate level.

The department also has a Physics/Pre-Medical curriculum for those students who wish to compete for admission to medical and dental schools. An applied physics curriculum is available for those who wish to work in research and development or pursue graduate work in applied physics, engineering physics or some branch of engineering. In addition, the department offers the Master of Science in Physics and the Ph.D. in applied physics. Information may be obtained by writing the Department of Physics and Astronomy, P.O. Box 5167, Mississippi State, MS 39762. www.msstate.edu/Dept/Physics/

A minor in physics requires 12 hours of physics at the 3000 level or above. These courses should be selected in consultation with a physics advisor.

The following is a recommended physics B.S. curriculum. Requirements for graduation are 124 hours with a GPA of at least 2.0. In addition, the student is required to maintain a minimum of 2.0 average in all physics courses.

General Education and College Requirements

6 hours Consult advisor

Total hours needed for major: 124
(31 hours must be 3000/4000 from A&S)

Physics/Pre-Medical Curriculum
For this curriculum the required courses for the physics major are
reduced by 9 hours of physics (two physics electives and PH 4413) and 3
hours of math (MA 3353). The recommended use of these 12 hours and
15 elective hours follows (check with Pre-medical advisor):
CH 4513 Organic Chemistry I
CH 4511 Organic Chemistry I Lab
CH 4523 Organic Chemistry II
CH 4521 Organic Chemistry II Lab
BCH 4013 Principles of Biochemistry
BIO 1134 Biology I
BIO 1144 Biology II
9 hours chosen from BIO 3304, BIO 3504, BIO 4504, BIO 4514

Applied Physics Curriculum
For this curriculum the required physics courses for the physics ma-
ajor are reduced by 6 hours of physics electives. The recommended use of
these 6 hours and 15 elective hours follows:
PH 4333 Elect Fields II OR
ECE 3323 Electromagnetics II
18 hours Technical electives; consult advisor

Department of POLITICAL SCIENCE
and PUBLIC ADMINISTRATION (PS) (PPA)

Undergraduate Coordinator: Dr. Rick Travis
Office: 195 Bowen Hall

The Department of Political Science and Public Administration of-
fers a Bachelor of Arts degree (B.A.) for individuals who have an inter-
est in politics and who seek careers in the law, in federal, state, or local
government (either administrative or elective), in the diplomatic service,
with international organizations, in the business world, or in teaching.
The Department also offers a Master of Arts degree in Political Sci-
ence (M.A.), a National Association of Public Affairs and Administra-
tion Accredited graduate professional degree in Public Administration
(M.P.P.A.) and a Ph.D. in Public Policy and Administration which pre-
pare men and women for careers in the public service. Interested students
should consult the undergraduate or graduate coordinator.

Students pursuing the B.A. degree in Political Science are required
to complete PS 1113, PS 4464, EC 1033 or EC 2113, and three of the
following introductory Political Science courses: PS 1313, PS 1513, PS
2403 and PS 2703 or PS 2713. They must also complete a minimum
of seven upper-division elective courses in Political Science (totaling at
least 21 credits); of these seven courses, at least one must be completed
in each of the four subfields of the discipline as displayed in the
“Part III: Description of Courses” portion of this Bulletin (American Pol-
itics, International Politics, Political Theory, and Comparative Politics).

Political Science majors who wish to teach social studies in Mis-
sissippi may become certified by combining the Political Science major
with appropriate courses in the College of Education; in Mississippi, it is
not necessary to major in secondary education in order to become certi-
fied to teach. At the same time, majors in secondary education who plan
to become social science teachers should consider a second major, or a
minor in Political Science.

Students not majoring in Political Science may wish to select a mi-
nor. A minor consists of a minimum of 18 hours of course work in Po-
litical science at least nine of which must be at the 3000 level or above.
Interested nonmajors should speak with the undergraduate coordinator
and form an appropriate program. For further information, consult the
Head of the Department of Political Science at Mississippi State Univer-
sity.

*  Transfer students receive the stipend for two years or until graduation, whichever comes first.

The Morris W. H. “Bill” Collins Scholarship may be awarded to one
African American political science major who has completed 30 credits in Political Science at Mississippi State
University, who has earned 15 credits in Political Science at Mississippi State
University, and who demonstrates potential for making contributions in
some area of public service. This scholarship carries a stipend of $1,500
per year for two years or until graduation, whichever comes first. Stu-
dents may be nominated by faculty for the Collins Scholarship or make
application on their own. For further information, consult the Head of the Department of Political Science, P.O. Box PC, Mississippi State, MS 39762 or telephone
(662) 325-2711; high school counselors should also be able to provide
application forms.

The John C. Stennis Scholarship in Political Science is awarded each
spring to at least two graduating high school seniors and/or community-
college graduates who are Mississippi residents, and who plan to major
in Political Science at Mississippi State University. These scholarships
carry a stipend of $2,000 per year for four years or until graduation,
whichever comes sooner.* The Stennis Scholarships are awarded to aca-
demically outstanding students who demonstrate the desire and potential
to become actively involved as leaders in the political and governmen-
tal affairs of the community, state, or nation. For further information,
consult the Head of the Department of Political Science and Public Ad-
mistration, P.O. Box PC, Mississippi State, MS 39762 or telephone
(662) 325-2711.

The Haley Barbour Scholarship is awarded each spring to one Politi-
cal Science major, with two years of college remaining, who evidences a
determination to become involved in the political life of the nation. The
Barbour Scholarship carries a stipend of $1,500 per year for a maximum
of two years, typically the recipient’s junior and senior years. Political
Science majors may be nominated by faculty for the Barbour Scholar-
ship or make application on their own. For further information and ap-
plication forms, consult the Head of the Department of Political Science and Public Administration, P.O. Box PC, Mississippi State, MS 39762 or telephone
(662) 325-2711.

The following is a typical course of study for Political Science ma-
jors, but students should consult with their advisors in order to develop
a program which is best for them. For more information contact: Dr. Rick
Travis at (662) 325-7866 or travis@pspa.msstate.edu.

#### PRE-PROFESSIONAL PROGRAMS

### PRE-LAW concentration (LAW)

Faculty Advisors
Mr. Whit Waide; Office: 199 Bowen Hall
Dr. Matthew W. Little; Office: 316 Lee Hall

Most directors of law school admissions indicate that a wide variety of majors from various colleges are appropriate for admission to their law school. Since there is no formal pre-law curriculum, a course of study is designed to prepare students for law school in conjunction with the student’s formal major. Essentially, it will provide students contemplating a career in law with a broad-based program of study that focuses on improvement of the student’s skills in oral communication, writing, and analytical reasoning.

Students interested in careers in law are encouraged to speak with a Pre-Law advisor and to participate in various law-related programs such as law school visitations, the Pre-Law Society, and Distinguished Jurist Day. Your Pre-Law advisor will provide guidance on the law school admission test (LSAT), law school application process, and on selecting the best law school for you. LSAT and law school applications are available in room 190 Bowen Hall. For additional information contact Mr. Waide at (662) 325-7860 or wwaide@pspa.msstate.edu.

There is no set curriculum but the following are suggested basic courses for a person interested in law school. See your pre-law advisor for additional course suggestions based on your career interest and major.

### PRE-MEDICAL and PRE-DENTAL concentration (MED) (DENT)

Dir. of Advising Mary Celeste Reese; Office: 117 Harned Hall
Professor Kenneth Willeford; Office: 445 Dorman Hall

Preference is given to persons who have completed four years of study, majored in a specific discipline, and earned a bachelor’s degree. The curriculum for admission to professional school includes one academic year each of English, biological science, inorganic chemistry, organic chemistry, mathematics, physics and advanced science. The Pre-Medical advisors can provide detailed information about requirements of various schools.

### PRE-NURSING concentration (BION)

Major Advisor: Mary Celeste Reese
Office: 117 Harned Hall

UMC and MUW have slightly different admission requirements, so course selection will vary during the sophomore year depending upon which professional school the student plans to attend. Students should consult the advisor for details. A minimum grade of C and a minimum composite score of 21 on the ACT is required for admission. Application for professional school is normally made during the fall preceding the year admission is desired. Consult your advisor for developing an appropriate schedule of classes.

### PRE-OPTOMETRY concentration (BIOO)

Major Advisor: Mary Celeste Reese
Office: 117 Harned Hall

Requirements for admission to the various optometry schools differ. Students should check the specific requirements of the professional schools to which they plan to apply. Pre-Optometry students should plan to take the Optometry College Admission Test (OCAT) during the sophomore or junior year. Consult your advisor for developing an appropriate schedule of classes.

### PRE-PHARMACY requirements (CHP)

Major Advisors: Undergraduate Coordinator Deb Mlsna
Professors Keith Mead and Peter Rabideau
Office: 1115 Hand Lab

The pre-pharmacy program is intended for students who wish to attend the School of Pharmacy at the University of Mississippi. No degree will be granted from Mississippi State University, and there are thus no university or college requirements. The courses listed below will satisfy the requirements for the School of Pharmacy at the University of Mississippi. Most pharmacy schools have similar requirements. However, students who wish to attend other pharmacy schools should check the specific requirements for that school.

**Department of PSYCHOLOGY (PSY)**

Major Advisor: Professor Stephen Klein  
Office: 110 Magruder

Mississippi State University offers majors leading to the B.A. or B.S. degree, and the M.S. and Ph.D. degrees. Undergraduate students wishing to major in psychology must have a minimum 2.0 GPA on all college work attempted prior to entering the major. Transfer students also must have a minimum 2.0 GPA to be admitted to the psychology major. **Students must earn a grade of C or higher in all PSY courses applied toward the psychology major requirements.**

The Bachelor of Arts and Bachelor of Science degree programs in psychology are designed to provide training either for immediate employment or for advanced training in psychology or related fields. Many careers in psychology require advanced study beyond the bachelor’s degree, but there are also career opportunities at the bachelor’s level. The B.A. program requires a minimum of 120 hours. The B.S. program requires a minimum of 124 hours. Either program will prepare students for immediate employment or for advanced training, the difference is in the specific requirements for the degree. (See curriculum listings below.)

A bachelor’s degree in psychology prepares graduates to pursue:
- master’s or doctoral study in psychology, such as clinical or counseling psychology, cognitive psychology, social psychology, experimental psychology, forensic psychology, etc.
- graduate school in related areas such as guidance, counseling, educational psychology, rehabilitation, social work, criminology, law school, management, marketing, etc.
- admission to medical, nursing, or physical therapy school with a psychology major and all necessary science courses.
- immediate employment in private business or government (e.g., working with the mentally ill or the mentally challenged, social work, personnel work, quality control jobs, management training, marketing research, sales, etc.).

### B.A. in Psychology

The Bachelor of Arts degree program in psychology trains students in the field of psychology while providing exposure to a broad range of courses in the humanities and social sciences. Foreign language proficiency at the third-semester level is required.

#### General Education and College Requirements

**English Composition (6 hours)**
- EN 1103 English Comp I OR
- EN 1163 Accelerated Comp I
- EN 1113 English Comp II OR
- EN 1173 Accelerated Comp II

**Humanities Electives**
- 3 semesters one Foreign Language - see advisor

**Social Sciences (18 hours)**
- Humanities and Fine Arts Electives (9 hours):
  - Sociology, Political Science, or Anthropology is required.
- Social and Behavioral Science Electives (6 hours):
  - At least 3 credit hours required in each of the two main areas.
- Humanities Electives should be chosen from the areas: English Literature, Foreign Language, History, Religion or Philosophy

**Electives (15 hours):**

- Social and Behavioral Science Electives (6 hours):
  - At MSU EC 2113 Macroeconomics is a pre-requisite for the required course EC 2123 (see above), and EC 2113 will count as one social science elective. In addition to EC 2113 one course from either Psychology, Sociology, Political Science, or Anthropology is required.

**At least 3 credit hours required in each of the two main areas.**

**Humanities Electives** should be chosen from the areas: English Literature, Foreign Language, History, Religion or Philosophy

**General Electives**

- Choose one unused course from the groups above
- 3 hours Choose one unused course from the Social Science core and 12 hours of SS electives. Only one Economics allowed. See advisor.

### Major Core

- PSY 1013 General Psychology
- PSY 3104 Experimental Psychology
- Choose two of the following:
  - PSY 3213 Psych of Abnormal Behavior
  - PSY 3623 Social Psychology
  - PSY 3803 Developmental Psychology
  - PSY 4203 Theories of Personality
- Choose one of the following:
  - PSY 3343 Psychology of Learning
  - PSY 3713 Cognitive Psychology
- PSY 4403 Biological Psychology
- PSY 4423 Sensation and Perception

**Total hours needed for major: 120**

(30 hours must be A&S upper division work)

**See General Education courses.**

**Consult advisor.**

**Must be from 2 different areas and must cross 4 disciplines over the 18 hours (6 hours from the Social Science core and 12 hours of SS electives). Only one Economics allowed. See advisor.

**PSY Upper Division courses should be chosen from: PSY 3003, PSY 3023, PSY 3073, PSY 3203, PSY 3153, PSY 3363, PSY 3413, PSY 3503, PSY 4000 (for 3 credits; taken only once), PSY 4624, PSY 4123, PSY 4223, PSY 4323, PSY 4433, PSY 4533, PSY 4535, PSY 4536, PSY 4523, PSY 4543, PSY 4653, PSY 4713, PSY 4733, PSY 4743, PSY 4753, PSY 4983, PSY 4993 (for at least 3 credits), one 3000- or 4000-level EPI course or COE 4023 (if no EPI course is used). One or more of these electives could also come from: PSY 3213, PSY 3623, PSY 3803, PSY 4203, PSY 3343, PSY 3713, PSY 4403 and PSY 4423 if not already used to meet previous requirements.**
B.S. in Psychology

The Bachelor of Science degree program in psychology allows students to specialize somewhat in their training while still ensuring adequate exposure to the humanities and social sciences. Foreign language proficiency at the second-semester level is required. Students in the B.S. program must complete a six-course theme in an area of their choice. A theme may be a selected set of courses relating to an identifiable interest in psychology, or it may be a minor in another department, or it may be an existing concentration or certificate, such as criminal justice, gerontology, etc. Courses used to meet other requirements in the psychology major, with the exception of the additional science requirement (see below) cannot also be used in the theme. Students’ themes are worked out with their advisors and require careful advanced planning. All themes must be approved by the advisor and the department head at the time that student enters the B.S. program. If changes in themes are needed, they may be made subsequently with the advisor’s approval.

If the theme does not include nine credits from approved natural and social science departments, then there is an additional science requirement of nine total credits coming from one or more of these departments that must be taken as electives; these cannot be credits already used to meet other requirements for the psychology major, including the General Education requirements and the College of Arts & Sciences common curriculum requirements. Approved natural and social science departments (and applicable course prefixes) are BIO, CH, PH, GG, AN, OR, PS, PSY, and SO. Most themes in psychology already contain sufficient natural or social sciences to satisfy this requirement without further coursework.

General Education and College Requirements

| English Composition (6 hours) | EN 1103 English Comp I OR EN 1163 Accelerated Comp I EN 1113 English Comp II OR EN 1173 Accelerated Comp II |

Total hours needed for major: 124

For the 18-hour minor in Psychology, at least nine hours must come from the list of core PSY courses, while the remainder may come from the list of PSY electives. Students should consult a PSY major advisor to plan a minor program that will complement their major studies and career interests.

For a Psychology concentration in the B.S.I.S program of study, at least half of the classes (six hours for the 12-hour concentration or nine hours for the 18-hour concentration) must come from the list of core PSY courses while the remainder may come from the list of PSY electives. All of these must be upper-division courses. Students should see the undergraduate coordinator in the Psychology Department to plan a concentration that will complement their career interests.

Department of SOCIOLOGY (SO) (SW) (CRM)

SOCIAL WORK (SW)

Program Director: Adele Crudden, Ph.D.
Office: 299 Bowen Hall

The Social Work Program at Mississippi State University (Starkville campus) is accredited by the Council on Social Work Education. Social work is a challenging and rewarding profession with the primary goal of helping people help themselves. The Bachelor of Social Work graduate is prepared to work as a generalist social work practitioner in a variety of practice settings. These include, but are not limited to the following: childcare service agencies, family services, medical hospitals, mental health clinics, public health clinics, home health agencies, nursing homes, industries, juvenile and family court, shelters for battered women and children, neighborhood and community services.

The Social Work Program incorporates a liberal arts perspective into its curriculum. This liberal arts perspective enhances the person-in-environment focus of generalist social work practice. Students wishing to major in social work are classified as undeclared pre-social work until formally admitted into the social work program. The process and criteria for admission into the program include:

1. Cumulative GPA of 2.0;
2. Completion of the following social work courses with a minimum grade of “C”: SW 2303 Social Welfare Policy I, SW 3003 Populations at Risk, and SW 3013 Human Behavior in the Social Environment I;
3. Completion of SW 2213 Intro to Social Work (including 20 hrs of service learning experience) with a minimum grade of B;
4. Completion of “Application for Admission”; and
5. Completion of an application with three reference letters and completing a personal interview with Social Work Admissions Committee prior to enrolling in further social work courses.

The following liberal arts courses must be completed prior to petition for admission to the major: EN 1103 or EN 1163; EN 1113 or EN 1173; MA 1313 or MA 1303; BIO 1004; SO 1003; PS 1113; PSY 1013; EC 2113.
Before enrolling in any social work classes, it is the responsibility of the student to consult with their social work advisor regarding any prerequisites for social work classes.

The criteria for remaining in the program include:
1. Maintain an overall GPA of 2.0, with a 2.5 GPA for all social work courses.
2. Must earn a minimum of a “C” in each social work course.
3. Continue to demonstrate an aptitude for a social work career.
4. Adhere to all academic expectations of the university and the social work program.
5. Adhere to the National Association of Social Workers Code of Ethics.

General Education and College Requirements

English Composition (6 hours)
- EN 1103 English Comp I OR
- EN 1163 Accelerated Comp I
- EN 1113 English Comp II OR

(31 hours must be A&S 3000/4000 level)

* Consult advisor.

** See General Education courses.

*** Course has prerequisite. Check course description in back of this catalog or consult advisor.

SOCIOLGY (SO)

Major Advisor: Gregory Dunaway
Office: 207 Bowen Hall

The following degree programs are offered: Bachelor of Arts, Master of Science, and Doctor of Philosophy.

Sociology is the scientific study of social life. With an interest in understanding human behavior, sociologists study such phenomena as deviant behavior, social organization, stratification, population, community, social institutions, race and ethnic relations, social problems, theory and methods of research.

Sociology majors are well prepared to enter many rewarding positions in the work force right out of college or further graduate training in law, business, community planning, architecture, medicine, politics or academics. Opportunities for employment include, but are not restricted to entry-level positions in administration, advertising, banking, counseling (family planning, career, substance abuse, etc.), health services, journalism, group and recreation work, marketing and market research, sales, non-profit organizations, teaching, criminal justice, social services and social research. In addition, sociology provides training that other liberal arts majors do not, such as the core elements of human interaction and relationships, and basic training for research analyst positions (in statistics and research methods, which include computer applications, for example).

Students are eligible for membership in the Mississippi Alpha chapter of Alpha Kappa Delta, the International Sociology Honor Society. To be considered for membership, a student must be an officially declared sociology major or demonstrate a serious interest in sociology, must be at least a junior, have at least a 3.00 overall GPA, and must have maintained a 3.00 GPA in sociology courses.

To earn a Bachelor of Arts degree with a major in sociology, a student is required to take 36 hours of sociology.

Sociology Major with a Specialization Course Requirements

The sociology major consists of a sequence of five levels of courses ranging from introductory to the more advanced and capstone courses. Students are expected to complete courses in the lower levels before taking courses in the more advanced levels. For example, students should complete Level I courses before completing Level II courses, etc. The lower level courses are prerequisites for the advanced level courses.

Selecting a specialization. There are two types of courses to complete at Level IV, specialization and elective courses. With the assistance of their advisor, students will select the specialization that best fits with their post-graduate plans. Each specialization is described below.

Population and Environment Specialization. Students planning to pursue a career in some aspect of business or in some government agencies may want to consider selection this specialization since these courses will focus on information and skills needed in the economic sector of society.

Family and Gender Studies Specialization. Students planning to work in private or government agencies that provide personal or social services to various populations in society will want to consider this specialization. The topics covered and the skills developed in these courses will provide much needed background information and understanding for working with persons and groups.

Socio-Economic Development Specialization. This specialization was developed for students that anticipate working in the area of socio-economic development at the community, state or national levels. The knowledge and background necessary to work effectively in various private and public organizations/agencies that focus on social and/or economic development is provided. Courses in this area focus on knowledge of the social forces and processes operating in specific environments that may facilitate or inhibit development and foster the ability to analyze relevant information and data.
General Sociology Specialization. Often students wish to obtain a more traditional liberal arts major by selecting courses that interest them personally. This specialization is the logical choice for these students.

Sociology Minor

To earn a minor in sociology, a student must take 18 hours of undergraduate sociology courses. SO 1003, 2203, and 3213 are required. The other three SO courses must be the 2000 level or above and include at least one 4000 level SO course.

Students who wish to major or minor in the department should plan their programs with the departmental major advisor as soon as possible after entering the University and should consult with their advisor before each registration period. Programs are arranged individually to combine the most varied advantages consistent with the student’s interest and purposes. Persons interested in secondary school teaching may elect sufficient courses in the College of Education to satisfy certification requirements for teaching social studies.

General Education and College Requirements

English Composition (6 hours)
- EN 1103 English Comp I OR
- EN 1163 Accelerated Comp I
- EN 1113 English Comp II OR
- EN 1173 Accelerated Comp II

Foreign Language (9 hours)
- 3 semesters one Foreign Language - see advisor

Humanities (18 hours)
- 3 hours Literature - see General Education courses
- 3 hours History - see General Education courses
- 3 hours Philosophy - see advisor
- 9 hours Humanities Electives
  Must be from 2 different areas - see A&S Core

Mathematics (6 hours)
- MA 1313 College Algebra
- ST 3123 Statistics

Fine Arts (3 hours)
See A&S Core List

Natural Sciences (9-12 hours)
- 3-4 hours Physical Sciences w/lab (CH, GG, PH)*
- 3-4 hours Biological Sciences w/lab (BIO, EPP, PO)*
- 3-4 hours Natural Science Elective**

Social Sciences (18 hours)***
- SO 1003 Intro to Sociology
- PS 1113 American Government
- EC 2123 Macroeconomics OR
- EC 2123 Microeconomics
- 3 hours See General Education courses
- 6 hours Social Science courses

Major Core - Courses in the major are sequenced by level.

Level I: Intro to the discipline - see social sciences requirement

Level II: Sociology Substantive Core (6 hours)
- SO 2203 Cultural/Racial Minorities

Choose one of the following:
- SO 3003 Social Inequality
- SO 3013 Society and the Individual
- SO 3053 Organizations in Modern Society

Level III: Tools and Skills (6 hours)
- SO 3103 Social Theory
- SO 3213 Intro Social Research

Level IV Courses: Specialization and Elective Courses (21 hours)

Specialization: Take any three courses in one of the Specializations

A-D below for a total of 9 hours.

A. Population & Environment
- SO 4113 Social Organization & Change
- SO 4123 Poverty Analysis
- SO 4173 Environment & Society
- SO 4303 Urban Sociology
- SO 4403 Sociology of Gender
- SO 4703 Population Problems & Processes

B. Family and Gender Studies
- SO 3323 Contemporary Woman
- SO 4203 Family in the U.S.
- SO 4223 Comparative Family
- SO 4403 Sociology of Gender
- SW 4613 Child Welfare
- SO 4703 Population Problems & Processes
- SO 4733 Community: Organization & Relationships

D. General Sociology

Select any three 3000 or 4000 level sociology courses, including any not listed above. At least of two of these courses must be 4000 level.

Electives: Select four 3000 or 4000 level sociology courses (12 hours). Students are encouraged to take additional courses in their specializations, if offered before the student graduates.

Level V: Capstone (3 hours)
- SO 4803 Social Research Practice
  Research paper in area of specialization expected.

Criminology (CRM)

Major Advisor: Nicole Rader
Office: 295 Bowen Hall

The following degree program is offered: Bachelor of Arts.

Criminology, as a field, explores the nature and causes of crime. Criminology also examines the impact crime has on society and how in turn society responds to the social problem of crime. The Bachelor’s degree in Criminology will emphasize the study of types, patterns and trends in criminal behavior; the social etiology of crime; and the social response to crime and its effect on society. The program will also train students to analyze crime data, test explanations of crime and victimization, and critically evaluate crime theory and policy.

The Criminology program is appropriate for students wishing to pursue career paths in all justice related fields including: law enforcement; probation and parole; community based prevention and control programs; court based programs; and corrections. Because our program provides for a broad knowledge of the nature and trends of crime and an understanding of crime control policy along with methodological and critical thinking skills, our students will be prepared to assume positions of leadership across a range of career paths in crime and justice related professions, as well as be prepared for post-graduate studies in Sociology, Criminology, and Law and Legal Studies.

The BA in Criminology is a 36 credit hour major. All students will complete 18 hours in required course work: CRM 1003; CRM 2003; CRM 3603; SO 3213; SO 4803; and CRM 4803. Students will then be required to take a minimum of six hours in each of three sub-areas of the program. The sub-areas are: Criminal Behavior and Motivation; Social Dimensions of Crime; And Crime Control Policy and Practice.

Senior Internships will also be available as an elective. Internships will be available at various crime and justice related agencies. To do an internship a student must have completed 24 hours of coursework within the criminology major and have earned a minimum of a 2.5 GPA in said coursework. Students will meet with the Criminology Program Coordinator to discuss the selection of an appropriate internship site. Students will be expected to have a minimum of 150 contact hours with the sponsoring internship agency, as well as meet specific course assignments. Students would register for CRM 3310 Senior Internship as six credit hour course.
A senior thesis option is available for students who have completed a minimum of 24 hours of coursework within criminology and have at least a 3.0 GPA in said coursework. Students who qualify and have an interest in the senior thesis option will work individually with a faculty member to produce a research paper on approved topic in criminology. The thesis option is elective and designed for students wishing to pursue graduate school in criminology or a related field. Students would register for CRM 4000 Directed Individual Study: Senior Thesis as six credit hour course.

College of Business

LOUIS E. DAWKINS, Interim Dean
Paul Grimes, Associate Dean for Instruction and Operations

Barbara Spencer, Associate Dean for Research and Outreach

HISTORICAL INFORMATION
The College of Business, organized in 1915, is the oldest college of business in the state and one of the oldest in the South. In 1979, the Department of Accounting was designated as the School of Accountancy in answer to a need for attention to the unique requirements of the growing profession of accountancy. In 2007, the School of Accountancy was renamed the Richard C. Adkerson School of Accountancy. This college permits students to major in any of the following programs: Accounting, Finance, Information Systems, Economics, Business Administration, BA-International Business/Foreign Languages (double degree), Management, Marketing, Marketing-Transportation, Real Estate and Mortgage Appraisal Financing, Risk Management, Insurance and Financial Planning, and Marketing-Professional Golf Management. The College offers degree programs that lead to bachelor's, master's and doctoral degrees. Distance learning through interactive classrooms and Internet courses is another avenue available to pursue coursework for College of Business students. Minors are available in most program areas.

MISSION
To be a nationally recognized and respected college of business equipped to focus on dynamic and collaborative learning, innovative and distinctive research, and valued outreach activities in the state and region.

ACCREDITATION
The undergraduate, masters, and doctoral business programs are accredited by AACSB International (The Association to Advance Collegiate Schools of Business). The Adkerson School of Accountancy is separately accredited at the undergraduate and masters levels by AACSB International.

ORGANIZATION
The administrative units of the College of Business consist of the Adkerson School of Accountancy and the Departments of Finance and Economics; Management Information Systems; and Marketing, Quantitative Analysis, and Business Law. In addition to these units, the college includes the Office of the Graduate School in Business, the Office of Business Outreach and the College of Business Academic Advising Center. The administrators of these units are as follows:

Unit   Name
Adkerson School of Accountancy  Jim Scheiner, Director
300 McCool Hall  325-3710
Finance and Economics  Mike Highfield, Head
312 McCool Hall  325-2342
Mgt & Info Systems Dept  Rodney Pearson, Head
302 McCool Hall  325-3928
Mkt, Quan Analysis & BL  Jason Lueg, Head
324 McCool Hall  325-3163
Graduate Studies  Darrell Easley, Director
200 McCool Hall  325-1891
Office of Business Outreach  Cindy Smith, Director
200 McCool Hall  325-1891
Distance Learning  325-1891

SUPPORT SERVICES
COB Academic Advising Center  Kevin Rogers, Assistant Dean
106 McCool Hall  325-1890
Vergie Bash, Acad. Coor.
Pam Jones, Acad. Coor.
Vickie Mann, Acad. Coor.

Directors and managers of other academic and professional support units in the College of Business are:

Unit   Name
Small Business Develop Ctr  Hamp Beatty, Director
Research & Tech  325-8684
International Bus Strategy  J.P. Shim, Director
302P McCool Hall  325-3928
Computing Services  Steve Canfield, Manager
222 McCool Hall  325-1545
P. Koch Lukten Chair of Ins  Lloyd Wade, Acting Chair
312M McCool Hall  325-2341
R.W. Warren Chair of RE  Zhengu Lin, Acting Chair
3101 McCool Hall  325-1997
International Business  325-1996
308 McCool Hall  325-3161
PGA Golf Management  Jeff Adkerson, Director
309 McCool Hall  325-3161
Center for Economic Educ.  Rebecca Smith, Paul Grimes
and Financial Literacy  Co-Directors
312 McCool Hall  325-2342

The College of Business (COB) Academic Advising Center provides centralized advising resources to students (current, prospective, and alumni), parents, faculty, and support staff. The Academic Advising Center maintains the official records of COB students (Accounting majors should see the Director of Accountancy). The Center represents the Dean on all academic paperwork such as transfer evaluations, off-campus requests, withdrawals, overload requests, degree audits, change of majors, and correspondence course approvals. Unless otherwise noted, all undergraduate business majors are advised through the COB Academic Advising Center.

Employment Service
The College of Business endeavors, in cooperation with the Career Center (located at 300 Montgomery Hall), to arrange employment interviews for graduating seniors. Former graduates seeking employment or change of position are urged to keep the Career Center informed as to availability.
### Computing Facilities

The College of Business is committed to providing experience and training on a variety of computer platforms that are commonly used in the modern business community. The main computing needs of the College are served by a large-scale local area network composed of more than 300 IBM compatible computers. These systems are linked through a Novell network to College-wide servers that provide access to educational software, administrative databases and research facilities.

The College uses electronic mail as one of its primary communication methods; many professors use e-mail to enhance the classroom experience. All students receive their own personal e-mail account.

COB is directly connected to the Internet, a world-wide network linking many educational, government, and commercial groups. In addition, a number of research databases are provided to aid in statistical analysis and other class projects. Lexis/Nexis, Compustat and CRSP are a few of the available databases.

The Ron J. and Carol M. Ponder Lab is a state of the art facility used by students for the completion of computer-related assignments. The Leo Seal Electronic Classroom is reserved by professors to illustrate computer-related concepts in the classroom. In addition, other more specialized computer labs exist, and presentation systems help to augment classroom demonstrations. The College of Business also offers a computer security analysis lab, used in classes to help prepare students for the decision making required of professionals in business today.

### Rules for Scheduling Classes

The normal load for an undergraduate student in a regular semester is 15-18 credit hours. Mississippi State University has established undergraduate student course limits based on cumulative and MSU grade point averages. (See Item III, A-7 Student Load in the Introduction Section.)

### Admission

#### Pre-Business (PBUS) – All freshmen and sophomores desiring to major in business will be admitted into Pre-Business in the College of Business at Mississippi State University. For new freshmen, admission to the University is equivalent to admission to Pre-Business. Students wishing to transfer into the College of Business from another institution or from another major at MSU must meet certain grade point average requirements. Sophomores must have a minimum 2.5 overall and MSU grade point average; and freshmen must have a minimum 2.0 overall grade point average to be admitted into Pre-Business.

#### Bachelor of Business Administration (BBA) – Requirements for admission as a candidate for the BBA degree are (i) a student must have completed between 50 – 75 applied hours of college credit towards the BBA degree; (ii) a student must have a minimum 2.5 overall grade point average and a minimum 2.5 MSU grade point average; and (iii) a student must have earned a grade of “C” or better in the following seven courses (or equivalent): BIS 1012, ACC 2013, ACC 2023, EC 2113, EC 2123, BQA 2113, and BL 2413. During the 50 – 75 applied hour window, a student will formally apply for admission into the BBA degree and declare a major through the Academic Advising Center. Students who are not admitted to the BBA degree will not be permitted to enroll in selected 3000 level or any 4000 level business classes. Questions about this policy can be referred to the Academic Advising Center or the Assistant Dean for Undergraduate Programs.

### BACHELOR of BUSINESS ADMINISTRATION DEGREE PROGRAMS

#### Graduation Requirements

The admission/readmission requirements for the Bachelor of Business Administration degree are described in Part I, Section II of this catalog. In addition to the University’s minimum requirements, the following requirements must be met for students applying for graduation:

- **Take a minimum of 62 semester hours from a senior college**
- **Take a minimum of 32 upper level business hours at MSU**
- **Complete the last 32 hours in residence at MSU**
- **Have at least a**
  - 2.50 GPA on all upper level business courses attempted,
  - 2.50 GPA on all major courses attempted,
  - 2.00 GPA on all MSU course work attempted, and
  - 2.00 GPA on all course work attempted.

- **Have no more than two D’s in upper level business courses. In excess of two D’s will have to be repeated with a grade of C or better.**

- **It is the student’s responsibility to be sure that he/she has fulfilled the requirements of the particular curriculum before applying for a degree.** Students must complete a graduation audit in the COB Academic Advising Center prior to graduation.

### COLLEGE-WIDE DEGREE COURSE REQUIREMENTS

The College of Business requires each student to take a planned and coordinated Arts & Sciences foundation designed to increase cultural appreciation and to give a broad knowledge of world affairs. Each program also permits the election of additional courses, according to the interests of the individual student. The total number of credits earned in the Arts & Sciences foundation program and other non-business courses shall not be less than 52 semester hours.

---

### Richard C. Adkerson

**SCHOOL of ACCOUNTANCY**

Director: Jim Scheiner  
Office: 300 McCool Hall, 325-3710

Academic Coordinator: Lanna Miller  
Office: 300A McCool Hall, 325-1631

The Richard C. Adkerson School of Accountancy is a professional school whose mission is to prepare students for successful careers in accountancy. Such career preparation includes a wide range of professional accounting activities, general education, and broad training in business administration. This program of study gives students the basic preparation for positions in all areas of accounting including, but not limited to, public, private, and governmental accounting. It also (1) requires students to take a planned and coordinated non-business program designed to increase their cultural appreciation and give them a broad knowledge of world affairs and (2) permits the election of additional non-business courses according to the interests of the individual student.

The accountancy program is accredited by the AACSB (The International Association for Management Education) as part of the overall accreditation of the College of Business as well as the separate and additional accreditation of accounting programs.

### Certification

The Bachelor of Accounting Degree (BACC) from the Adkerson School of Accountancy, Mississippi State University, is recognized by those states requiring the baccalaureate degree as a minimum, as fulfilling all the educational requirements for eligibility to sit for the Certified Public Accountant (CPA) examination. It is also recognized as meeting educational requirements to sit for the Certificate in Management Accounting (CMA) and the Certified Internal Auditor (CIA) examinations. Graduates are encouraged to seek professional certification in one or more areas by passing these examinations.

The American Institute of Certified Public Accountants (AICPA) which prepares and grades the CPA examination, has urged the requirement of five years of academic preparation and has reflected this in the CPA examination. Students who aspire to become certified public accountants should consider the Master of Professional Accountancy or Master of Taxation programs herein described, in addition to the BACC.

### Admission

#### Pre-Accountancy (PACC) - All students desiring to major in accounting will be admitted into Pre-Accountancy in the Adkerson School of Accountancy at Mississippi State University. Admission to the University is equivalent to admission to Pre-Accountancy. International students need a 575 TOEFL score to be admitted to Pre-Accountancy.

#### Bachelor of Accounting (BACC) Candidate - Requirements for admission as a candidate for the BACC degree are listed below. Students will not be allowed to take 4000-level accounting courses if they have not been admitted to the Adkerson School of Accountancy.

1. A student must complete 60 hours or more of college credit earned toward the BACC degree.
2. A student must complete the pre-accountancy core listed below with a 2.6 GPA on all college work attempted and a 2.6 GPA on the 18 hours of pre-accountancy core.

### American Institute of Certified Public Accountants (AICPA)

The American Institute of Certified Public Accountants (AICPA) which prepares and grades the CPA examination, has urged the requirement of five years of academic preparation and has reflected this in the CPA examination. Students who aspire to become certified public accountants should consider the Master of Professional Accountancy or Master of Taxation programs herein described, in addition to the BACC.
3. A student must complete Principles of Financial Accounting and Principles of Managerial Accounting with at least a B in each of the two courses.

Graduation

Bachelor of Accountancy (BACC) - Requirements for a BACC Degree from the Adkerson School of Accountancy are listed below. It is the student’s responsibility to complete the requirements of the BACC curriculum before applying for a degree.

1. A student must be a BACC candidate and complete the required curriculum and a minimum of 124 semester hours.
2. A student must achieve at least a 2.5/4.0 GPA in upper-division business, economics, and statistics courses.
3. A student must achieve at least a 2.5/4.0 GPA in upper-division accounting subjects with at least a C in each accounting course. A student who makes less than a C in an upper-division accounting course must repeat that course the next regular semester that the student is enrolled and the course is offered. Students will be permitted to repeat an upper-division accounting course only once in an effort to make a C in the course. If they make less than a C in two attempts in a specific course, they will no longer be able to continue in the accounting program.
4. A student must achieve an overall and MSU GPA of at least 2.0 on a 4.0 scale.

Total hours for degree: 124

* A grade of B or better is required in these courses.

** A grade of C or better is required in ALL upper-level Accounting courses.

Accounting Minor

Students may obtain a minor in accounting by completing 15 hours of upper-level accounting courses with a C or better as follows:

| ACC 3023 Intermediate Accounting I | 3 |
| ACC 3033 Intermediate Accounting II | 3 |
| ACC Electives | 9 |

Double Degree in Accounting and Another Field

Combined curricula leading to a BACC degree and a degree in another field are available in the Adkerson School of Accountancy and the other colleges of Mississippi State University. Such curricula may be designed with a major in accounting combined with a major in any non-accounting field. This program requires that a student satisfy the normal graduation requirements in the other major as well as meet the GPA and course requirements of the BACC Degree.

The BACC as a Second Baccalaureate Degree

The curriculum is available to students who hold a baccalaureate degree in any recognized field of study from a regionally accredited institution. The candidate’s combined undergraduate program must include the same course and GPA requirements as required of anyone who receives the BACC degree. A minimum or 30 semester hours of upper division work must be earned in residence at Mississippi State University after the first degree has been conferred. Consult the Academic Coordinator, Richard C. Adkerson School of Accountancy, P.O. Drawer EF, Mississippi State, MS 39762 or email: sac@cobilan.msstate.edu for specific details.

Masters Programs in Accounting

John Rigsby, Graduate Coordinator (MPA)
Frances McNair, Graduate Coordinator (MTX)
Departmental Office: McCool 300
662-325-3710

The Adkerson School of Accountancy offers two graduate programs in Accounting - Master of Professional Accountancy (MPA) and Master of Taxation (MTX). Additional information can be found in the Graduate Bulletin.

Admission

An applicant to the MPA program should hold a bachelor’s degree from a fully recognized four-year institution of higher learning that enjoys unconditional accreditation by appropriate regional accrediting agencies. In addition, the applicant for the MPA degree must take the Graduate Management Admission Test (GMAT). Generally, regular admission to the MPA program requires a 510 GMAT score, a GPA of 3.0/4.0 over the
last 60 hours of baccalaureate work and acceptable recommendation letters. When a student is deficient in one of the criteria cited, the student’s application, nevertheless, may be considered for admission based on the strength of the materials contained in the student’s application. However, reasonable minimum levels of performance must be achieved in both the applicant’s GPA and GMAT scores.

Graduation

Master of Professional Accountancy (MPA) and Master of Taxation (MTX) - Requirements for an MPA or MTX degree from the Adkerson School of Accountancy are listed below.

1. A student must complete the required curriculum and a minimum of 30 graduate semester hours.
2. A student must achieve an overall GPA of at least 3.0/4.0 on graduate work attempted with no more than 6 hours of “C” grades.
3. A student must pass an end-of-program final examination.

MPA Program of Study

Master of Professional Accountancy Program (MPA) - Candidates must complete 30 hours of course work at the graduate level. At least 21 of the 30 hours must be taken from courses offered exclusively for graduate credit (8000 level).

Required courses (15 hours):

ACC 6023 Adv Accounting (If not taken as an undergraduate)........3
ACC 6063 Income Tax II (If not taken as an undergraduate).........3
ACC 8013 Seminar in Fin Acc Theory.....................................3
ACC 8023 Advanced Managerial Accounting............................3
ACC 8033 Business Assurance Services....................................3

Accounting Electives (6 hours):

ACC 6043 Municipal and Government & Accounting..................3
ACC 6053 International Accounting........................................3
ACC 8043 Fraud Examination.............................................3
ACC 8053 Professional Accounting Policy and Research...............3
ACC 8063 Research in Tax Practice and Procedures....................3
ACC 8073 Taxation of Corporations & Shareholders.....................3
ACC 8093 Fed. Taxation of Partnerships, Corps, Trusts & Estates...3
ACC 8103 Income Taxation of Natural Resources........................3
ACC 8113 Advanced Individual Tax & Wealth Mgt....................3

Concentration in Systems

In lieu of the above accounting electives, a student may elect a concentration in systems by taking the following three courses:

ACC 8043 Fraud Examination.............................................3
BIS 8213 Advanced Systems Development and Administration......3
BIS 8313 Advanced Database Design Administration................3

Non-accounting Electives (9 hours)

Elect from Graduate non-accounting, business, and economic courses.

MTX Program of Study

Master of Taxation (MTX) Program - Candidates for the MTX degree must complete 30 hours of course work at the graduate level including a core of 15 hours of taxation, as described below. At least 21 of the 30 hours must be taken from courses offered exclusively for graduate credit (8000 level).

Required Tax Courses (15 hours):

ACC 8063 Research in Tax Practice and Procedures....................3
ACC 8073 Taxation of Corporations & Shareholders..................3
ACC 8093 Fed. Taxation of Partnerships, Corps, Trusts, & Estates...3
ACC 8113 Advanced Individual Tax & Wealth Mgt....................3
Elective - any 8000 level tax course......................................3

Other Required Courses (6 hours)

ACC 8013 Seminar in Financial Accounting Theory....................3
ACC 8033 Business Assurance Services..................................3

Electives (9 hours)

Graduate level Business or Accounting courses

INTERNATIONAL BUSINESS PROGRAM

A Five-Year Double Degree Program: B.B.A. in Business Administration & B.A. in Foreign Languages

Office: 308 McCool Hall

Major Advisor - Business Administration: Brian Watkins
Major Advisors - Foreign Languages: Professor Jordan; Associate Professor Lestrade; Assistant Professor Potter

The International Business Program provides students with an academic background and work experience to help ensure success in the marketplace. Students receive a double degree at graduation reflecting the dual concentration in Business: B.B.A. (with an international focus and a specific discipline such as Marketing or Finance); and in the Arts: B.A. (language and cultural proficiency). This is additional to the first two years of study developing abilities in writing, math, sciences, and computer literacy.

The hallmark of this program is a work internship, an outside the country work experience of a full summer or one semester duration (generally taken the last of the 4th year or beginning of the 5th year). This work is ideally reflective of the student’s specific business discipline and language proficiency area. The student who selects to separate the work and abroad experience must petition the IB committee for approval. Minimum acceptable levels are 1) WORK: 10 continuous weeks of international tasks and responsibilities, 2) ABROAD: 6 continuous weeks in one location for cultural immersion. An International Business Co-Op Work program offers 3 semesters paid international work experience in concert with pursuing the academic degrees.

The total number of semester credit hours (SCH) will be 154 for most students. The program has five main components:

1. A core of basic skills, including courses in writing, mathematics, sciences, and communication (30 SCH);
2. A core of humanities and social science courses selected to fit the special needs of international business major, emphasizing both the history and culture of other societies and the ways these societies relate to our own (27 SCH);
3. Intensive training to develop proficiency in one foreign language and its associated cultures and literatures (35);
4. A thorough grounding in business techniques and practices, including 33 SCH of general business courses, up to 12 SCH of international business courses, and 15 SCH in one of six functional/discipline emphasis in business (accounting, finance, information systems*, economics, management, marketing*, or risk management, insurance and financial planning*).
5. A one-semester internship program with an international business (4 SCH).

Students interested in following this recommended course of study should notify the Department Head of Foreign Languages and the Director of International Business Academic Programs. Students must have the Director’s written approval to join the International Business Program. Students must meet all graduation requirements for the College of Business and the College of Arts & Sciences. This includes having no Ds in upper level courses or in upper level Foreign Language courses. International Business students must have an overall and previous semester GPA of 2.67 to be eligible for internship and study abroad.

* Information Systems, Insurance, & Marketing functional emphasis areas will need an additional 3 credits in their program; for those taking the CPA exam, other coursework will be required.

Department of Finance and Economics

Major and Minor Advisors: Meghan Millea-Economics, Kartono Liano-Finance, Chip Wade-Insurance, and Len Lin-Real Estate Finance

Offices: 312 McCool Hall

BUSINESS ECONOMICS Major (ECO)

Economics is the scientific study of how people and institutions make choices concerning the use of society’s scarce resources. Applied to business, economics is primarily concerned with the decision-making of households and firms within a market context. The importance of economic analysis is recognized by its being the only social science in which a Nobel Prize is awarded. The B.B.A. in economics provides the analytical skills and empirical background needed to understand the dynamic problems facing businesses in the ever-changing economic environment. Career opportunities available to an economics graduate include management, research, and instructional positions with corporations, banks, economic development agencies, trade organizations, governments, and educational institutions.

An economics major or minor also helps prepare the student for graduate professional training in business, public administration, and law. The flexibility of the economics major is reflected in relatively high starting salaries and lifetime earnings of economists. Undergraduates at Mississippi State University may pursue an economics major through either the College of Business (B.B.A. degree) as described here or through the College of Arts and Sciences (B.A. degree) as described previously in this bulletin.

Students seeking the B.B.A. with a major in economics are required to complete all College of Business and university common core requirements. Majors are required to take MA 1613 Calculus for Business and Life Sciences I and are encouraged to take MA 1623 Calculus for Business and Life Sciences II. Elective courses should be chosen with the advisor’s approval and used to enhance the student’s overall program.

The economics faculty offers a minor in economics through the College of Arts and Sciences. This minor is open to any student regardless of major or college of enrollment. A minor in economics is attained by selecting, in consultation with the economics minor advisor, at least 15 hours of economics courses. Three hours of courses from finance (FIN) or agricultural economics (AEC) may be applied to the economics minor with approval from the advisor. All economics minors must register with the economics minor advisor in the Department of Finance and Economics, 312 McCool Hall. Students with majors in business, engineering, agriculture, the social sciences, mathematics, and pre-law are especially encouraged to consider the economics minor.

Academic advising and career counseling are available from the economics faculty for both majors and minors. Students interested in the study of economics should contact the Department of Finance and Economics, 312 McCool Hall. Any student who completes at least 12 credit hours of economics with at least a 3.0 GPA and has an overall GPA of 3.0 or higher is eligible for membership in Omicron Delta Epsilon, the international honor society in economics.

Total hours needed for major: 124  

FINANCE Major (FINA)  
The Finance major requires 124 credit hours and leads to a Bachelor of Business Administration degree. For some specialization, students may choose from a list of electives. The degree plan allows students to supplement their studies with a variety of business and non-business electives. By carefully selecting these elective courses, students may develop a program of study that fits their interests and career preparation needs. In order to maximize the benefits of their degree, students are strongly encouraged to work closely with a faculty advisor in securing an internship and developing their personal program of study.  
The career opportunities for Finance majors are varied and challenging. The program prepares graduates for decision-making positions in both the public and private sectors. Many graduates accept positions within the banking industry, including commercial banks and federal and state bank regulating agencies. Recent graduates have also found career opportunities as financial analysts and consultants with major corporations and private enterprises throughout the United States. Finance majors may pursue a wide variety of rewarding careers. MSU graduates can be found working as: Bank Examiners, Financial Managers, Bank Officers, Financial Planners, Management Consultants, Financial Analysts, Investment Managers, Credit Analysts, Loan Officers, and Pension Fund Managers. These career opportunities require an in-depth knowledge of finance and a solid foundation in analytical and communications skills. The opportunities for Finance majors are excellent; graduates, with the proper preparation, have only to choose which career path to follow.  

Finance minors and double majors are available for both business and non-business majors. For specifics, see below.

Non-business electives - 13 hours

Free electives - 3 hours

Total hours needed for major: 124

Business Administration Minor

A minor in Business Administration will help non-business students prepare for entrance into the world of business. Students will become familiar with basic concepts and techniques necessary for analyzing business environments, making sound business decisions and planning one’s career. Academic advising is available in the Academic Advising Center, 106 McCool Hall.

A minimum of 21 hours must be taken to obtain a BUAD minor. A minimum of 12 hours must be taken at MSU to receive the BUAD minor.

Elect SEVEN from:

- Legal Environment of Business
- Principles of Financial Accounting
- Principles of Managerial Accounting
- Principles of Microeconomics
- Financial Management
- Principles of Marketing
- Principles of Management and Production
- Business Information Systems
- Business Statistical Methods I
- Business Statistical Methods II
- Production Management

Students desiring the certificate must apply to the College of Business Academic Advising Center. Upon completion of the courses, the Assistant Dean for Undergraduate Programs will review the records. If all requirements are met, the Assistant Dean will notify the Registrar’s Office to have a statement placed on the candidate’s transcript.
Department of MANAGEMENT and INFORMATION SYSTEMS

Office: 302 McCool Hall

Students in the Department of Management and Information Systems may elect to major in either Management or Business Information Systems. Both majors offer excellent job opportunities and can help graduates to achieve their potential in business firms or other organizations.

MANAGEMENT Major (MGT)

Regardless of one’s chosen career, future responsibilities will very likely require a knowledge of management concepts. While an organization can acquire more capital, and technology becomes more common and cost-effective, the only true sustainable source of competitive advantage for an organization is people, and how these resources are managed. Management adds value by encouraging employee involvement, creativity, motivation and loyalty. A student may choose to take electives emphasizing human resource management, general management, and entrepreneurship.

The following course of study is designed to prepare the student for careers in the field of Management.

BUSINESS INFORMATION SYSTEMS Major (BIS)

Business, industrial, governmental, and military establishments are constantly seeking persons with the necessary aptitude, professional education, and experience for careers in the fast-growing field of computer information systems. Through the facilities of the academic departments and the computing center, students at Mississippi State University have a unique opportunity to acquire both professional education and experience in business and management information systems.

The purpose of the Business Information Systems major is to prepare students to solve business problems where the solution normally involves the use of a computer. Thus, the student must have a strong foundation in computer concepts, systems analysis and design, programming and quantitative skills. Since the student will be expected to solve business related problems, he/she must have a broad background and understanding of the business environment including such topics as accounting, economics, law, management, production, marketing, finance, and communications.

A student chapter of the BIS club is active and provides students with the opportunity to keep abreast of current developments in the field of management information systems through professional speakers, social activities, and field trips.

Department of MARKETING, QUANTITATIVE ANALYSIS and BUSINESS LAW

Office: 324 McCool Hall

This department offers one major (Marketing) and two concentrations (Professional Golf Management and Transportation). In addition, the department offers marketing, quantitative analysis and business law courses to support other programs in the college and across campus.

MARKETING Major (MKT)

Marketing consists of three significant interlocking activities: (1) understanding consumers along with their wants and unfulfilled needs; (2) developing improved products and services that meet the identified needs of consumers; and (3) communicating the benefits of the improved products and services through advertising, public relations, promotion and effective salesmanship. Courses offered within this unit prepare students to provide marketing leadership and assume a variety of career paths, including field sales, brand management, marketing communications, store management, procurement, logistics, and small business.

** To be selected with the advice and approval of advisor

A Marketing minor is offered to both Business and Non-Business students. A minor in Marketing is attained by taking the following courses: MKT 3013, MKT 4413, and four from MKT 3213, MKT 3933, MKT 4113, MKT 4123, MKT 4143, MKT 4213, MKT 4323, and MKT 4333. A Marketing minor is attained by taking the following courses: MKT 3013, MKT 4413, and four from MKT 3213, MKT 3933, MKT 4113, MKT 4123, MKT 4143, MKT 4213, MKT 4323, and MKT 4333. Students interested in this minor should contact a Marketing advisor.

PGA Golf Management Concentration (PGM)

Director: Jeffrey W. Adkerson, PGA
Office: 309 McCool Hall; Phone: (662) 325-3161

The PGA Golf Management Program is the second oldest PGA Golf Management Program program sanctioned by the Professional Golfers’ Association of America (PGA). The Program prepares graduates for careers as Class A PGA Professionals at country clubs, resorts, and public golf facilities. The PGA Golf Management Program is a demanding four and one half year curriculum. The PGA Professional must have a broad assortment of marketing, management and other business-related abilities to be effective in the golf profession today.

The program leads to a bachelor’s degree in business administration with a major in marketing. In addition to the requirements for a degree in marketing, students must complete courses in turf management, food management, landscape architecture, human resource management; and all PGA Golf Management requirements. Students must also complete a minimum of 16 months (five semesters) of co-op under the guidance of the MSU Cooperative Education Program. These work experiences are under the tutelage of Class A PGA Professionals throughout the country. Students are required to be continuously enrolled at MSU as full-time students in the MSU Cooperative Education Program according to their co-op schedule. Those who complete the program thus earn a prestigious degree and reach eligibility for PGA Class A membership.

PGA Membership. Please see PGA Golf Management staff to discuss PGA Membership Requirements.

PGA Golf Management Graduation Requirements. Students must complete the last semester in school (not on co-op). They must also pass the PGA Playing Ability Test, complete five semesters of co-op, and complete all three levels of the PGA Golf Management Program.

PGA Golf Management Admission Procedures. The PGA Golf Management Program has a limited enrollment. The current enrollment limit is 200; however, this number is subject to decrease based on the
Entrance Requirements

Freshmen:
- Meet MSU regular admission requirements
- Have a USGA Handicap of 8 or less

Transfer Students:
- 2.5 GPA with maximum of 62 applied semester hours
- Have a USGA Handicap of 8 or less

Non-Citizen:
- The MSU PGA Golf Management Program is sanctioned by PGA of America to educate and train graduates to become PGA Members. International students must be a non-citizen form as required by the PGA of America.

Concentration Course Requirements

PGA Golf Management students are required to take all courses listed under the General Education and College requirements for Marketing in addition to the following courses:

- MKT 2211 PGM Level I Seminar
- MKT 2221 PGM Level II Seminar
- MKT 2231 Golf Professional Development I
- MKT 2241 Golf Professional Development II
- MKT 2251 Golf Form & Technique Analysis
- MKT 3213 Retailing
- MKT 4413 Consumer Behavior
- MKT 4533 Marketing Research
- MKT 4233 Golf Merchandising Management
- MGT 3513 Intro to Human Resource Mgt
- FNH 3283 Foodservice Systems
- PSS 4414 Turf Management
- LA 3603 Design of the Golf Environment
- International Elective (see advisor for options)

Choose 3 of the following:
- MKT 4113 Personal Selling
- MKT 4123 Advertising
- MKT 4213 Internet Marketing
- MKT 4613 Services Marketing
- MKT 4143 Sales Management
- MGT 3933 International Marketing

Total hours needed for major: 124

Co-op Work

PGA Golf Management students must complete a minimum of 16 months (five semesters) of co-op work with Class A PGA professionals at country clubs, public golf courses, golf resorts, or other golf facilities. A 2.50 cumulative QPA on all work and on all work at MSU are required in order to participate in the PGA Golf Management co-op program.

PGA Golf Management

PGA Golf Management students will complete all PGA Golf Management requirements including testing, which will be conducted on the Mississippi State University campus by officials of the PGA. An initial lab fee and a semester lab fee is charged students each semester on campus to cover the PGA Golf Management seminars, tests, workshops and playing privileges at the MSU Golf Course. A typical schedule of classes and co-ops are as follows:

FRESHMAN YEAR
- Fall      School - 16 hours
- Spring   School - 16 hours
- Summer   Co-op

SOPHOMORE YEAR
- Fall     School - 16 hours
- Spring   School - 16 hours
- Summer   Co-op

JUNIOR YEAR
- Fall     Co-op
- Spring   School - 16 hours
- Summer   School - 12 hours

SENIOR YEAR
- Fall     School - 16 hours

Supply Chain Management Concentration (SCM)

Supply chain management continues to play a major role in the national and international economy. As businesses continue to focus on logistics and transportation improvements, job opportunities for graduates in the supply chain management concentration increase. The curriculum in the supply chain management concentration will acquaint the student with the issues, perspectives, and techniques associated with transportation and logistics theory and practice. It offers in-depth treatment of distribution, supply, warehousing, inventory control, and operations in the modes of transportation.

Concentration

- 3 hours International Elective (see advisor for options)
- MKT 3323 International Logistics
- MKT 4033 International Transportation
- MKT 4313 Physical Distribution Management
- MKT 4333 International Supply Chain Management
- MKT 4413 Consumer Behavior
- MKT 4533 Marketing Research
- MKT 4813 Marketing Management

Non-business electives - 13 hours (see advisor for options)

Free electives - 6 hours

Total hours needed for major: 124

THE B.B.A. as a DOUBLE DEGREE and as a SECOND BACCALAUREATE DEGREE

A double degree is available in the College of Business for students pursuing a primary degree in a non-business area or accounting field at MSU. These programs require that a student satisfy the normal graduation requirements in the non-COB area first, as well as the following work. The required graduation grade point average in upper business course work is 2.50. Students are not allowed more than two D’s in upper level business courses. Students must apply for and confirm both degrees at the same time. Students must establish a double degree record in the COB Academic Advising Center in 106 McCool.

The second degree curriculum is available to students who hold a baccalaureate degree in any non-business or accounting field of study from a regionally accredited institution. The combination of the first degree and the following second degree program must include the current general education courses and the courses listed below. A minimum of 32 semester hours upper business work must be earned in residence at Mississippi State University after the first degree has been conferred. Students must establish a second degree record with the COB Academic Advising Center.

Required Courses
- ACC 2013 Prin of Financial Accounting
- ACC 2023 Prin of Managerial Accounting
- BIS 1012 Intro Business Computer Systems
- BIS 3233 Management Information Systems
- BL 2413 Legal Environment of Business
- BQA 2113 Business Statistical Methods I
- BQA 3123 Business Statistical Methods II
- EC 2113 Prin of Macroeconomics
- EC 2123 Prin of Microeconomics
- FIN 3113 Financial Systems
- FIN 3123 Financial Management
- MGT 3114 Principles of Management
- MGT 3213 Organizational Communications
- MKT 3013 Principles of Marketing
- 3 hours International Elective
- BUS 4853 Bus Policy (Graduating Semester only)

Major Courses 21+ hours

Total 69+ hours
PREPARATION for the STUDY of LAW
Major Advisors: Gloria Liddell and Pearson Liddell
Office: 324 McCool Hall

Each year a number of graduates of the College of Business enter law school. Although there is no formal pre-law curriculum, most law schools advise pre-law students to seek a wide background of studies. The curriculum in the College is good preparation for the study of law because it offers the opportunity to study the arts, the humanities, science, and mathematics, in addition to business and economic disciplines which constitute the background for understanding the study of most legal problems. Because many areas of law practice deal with business, a background in business is very useful to the practicing attorney. Moreover, several business law course offerings are available to expose the student to introductory-level law courses. In addition, if a person should decide not to pursue a legal career, there are many opportunities available in business. A professor of business law—pre-law advisor—is available for providing information about the legal professional, assistance in choosing courses, and guidance concerning law school admissions.

GRADUATE PROGRAMS in BUSINESS ADMINISTRATION
Barbara Spencer, Associate Dean for Research and Outreach in Business and Professor of Management
Office: 200 McCool Hall

The College of Business offers five graduate programs in business administration, namely, the Master of Business Administration (MBA), The Master of Science in Information System (MSIS), Master of Professional Accountancy (MPA), Master of Taxation (MTX), and the Doctor of Philosophy in Business Administration (Ph.D.). An M.A. in Economics and a Ph.D. in Applied Economics are additional graduate programs offered in the College.

Admission requirements for graduate programs in business include an acceptable history of previous academic work and a satisfactory score on the Graduate Management Admission Test (GMAT). Required background for admission to graduate course-work includes a general knowledge of the functions of business, statistics, and proficiency in computer usage.

Details concerning these graduate programs can be found in the Graduate Bulletin. Students who are interested in pursuing any of these programs should communicate with the Director of Graduate Studies in Business, P. O. Box 5288, Mississippi State, MS 39762. For further information, call (662) 325-1891.

NOTES
College of Education

GENERAL INFORMATION

The faculty of the College of Education is committed to fulfilling the following three major functions: (1) to provide undergraduate and graduate professional preparation for teachers, administrators, school service personnel, and others who assume education-related positions in settings other than schools; (2) to collaborate with school personnel, educational agencies, professional groups, and others interested in the evaluation and improvement of educational opportunities, programs, and services; and (3) to promote and conduct experimental and other research studies designed to improve educational practice and to advance educational theory.

In addition to being accredited by the National Council for Accreditation of Teacher Education and the Southern Association of Colleges and Schools, the College of Education is a member of the American Association of Colleges for Teacher Education. It is the objective of this College to provide excellence in education while at the same time exhibiting a friendly attitude toward students. The teacher education programs are approved by the Mississippi State Department of Education, thereby enabling graduates to satisfy the certification requirements for the State of Mississippi.

ADMINISTRATIVE ORGANIZATION

The College of Education consists of six departments: Counseling and Educational Psychology; Curriculum, Instruction, and Special Education; Kinesiology; Music; Leadership and Foundations; and Instructional Systems and Workforce Development.

Counseling and Educational Psychology. The Department of Counseling and Educational Psychology prepares individuals at the undergraduate and graduate levels to function in a variety of professional settings that include K-12 schools, community counseling centers, human service agencies, business settings, rehabilitation agencies, community colleges, four-year colleges, and universities. The department offers the Bachelor’s degree, Master of Science degree, Educational Specialist Degree, the Doctor of Education, and the Doctor of Philosophy degree. Special areas of interest in the department are psychology, educational psychology, school psychology, community counseling, school counseling, vocational rehabilitation counseling, college counseling, and student affairs administration in higher education.

Curriculum, Instruction, and Special Education. This department is responsible for instruction in all professional courses of a general nature and in professional courses that deal specifically with teaching in special education, elementary education, and in the secondary fields of English language arts, social studies, mathematics, science, foreign languages, and speech. In addition to organizing and administering the curricula for educating teachers in the fields of elementary education, special education, and secondary education, the department is responsible for the direction and immediate supervision of trainees in these fields.

Through the Department of Curriculum, Instruction, and Special Education, the Bachelor of Science, Master of Science, Master of Arts in Teaching, Educational Specialist, Doctor of Education, and Doctor of Philosophy degrees are offered. The department also offers areas of emphasis in elementary and secondary education for the Educational Specialist degree and in elementary and secondary education for the Doctor of Education and the Doctor of Philosophy degrees.

Kinesiology. This department offers the Bachelor of Science degree in Kinesiology with concentration areas in Health Fitness Studies, Clinical Exercise Physiology, Sport Studies, and Sport Pedagogy. Sport Pedagogy majors may also pursue an add-on teaching endorsement in Health Education by taking additional coursework. Master of Science in Kinesiology degree programs offer concentration areas in Exercise Science, Sport Administration, and Teaching/Coaching.

Music. This department offers the Bachelor’s degree in Music Education, with concentrations in Vocal, Instrumental Piano, and Guitar Music Education. The Maroon Band and the University chorus, both of which are university-wide organizations, are integral components of this department. The department also offers a Bachelor of Arts degree in Music for non-teaching majors. (See the Arts & Sciences section for details on the B.A. in Music degree.)

Instructional Systems and Workforce Development. Mississippi State University is a designated institution for the preparation of vocational-technical education personnel. State and federal funds are made available, through cooperation with the State Office of Vocational and Technical Education, for the partial support of the program.

It is the responsibility of the Department of Instructional Systems and Workforce Development to provide teacher/coordinator/administrator preparation in vocational areas including adult, business, industrial technology and information technology services.

The Master of Science degree is offered in Technology. The department also offers an area of emphasis in Technology for the Educational Specialist, Doctor of Education, and Doctor of Philosophy degrees. The Master of Science in Instructional Technology degree is offered. This computer-based instructional technology program of study meets the educational needs of persons who have personal and professional interests in planning for and utilizing technology.

Leadership and Foundations. The Leadership and Foundations department provides programs in Educational Leadership and Community College Leadership. Programs are designed to prepare administrators, supervisors, teachers, and other educational personnel for positions of leadership in: (1) school district offices; (2) elementary, middle, or secondary schools; and (3) community college administrative positions. The department offers the Master of Science degree, the MAT in Community College Teaching, the Educational Specialist degree, the Doctor of Education, and Doctor of Philosophy degrees.

SERVICES

The Learning Center. The Learning Center (TLC) is an academic support unit for students, staff, and faculty at Mississippi State University whose primary purpose is to help students achieve and maintain successful academic standing. Through courses and tutoring in TLC, students are encouraged to acquire valuable study habits by assistance with proven strategies that help them develop into more effective and efficient learners. Some specific areas of service are reading comprehension and rate, vocabulary development, spelling, grammar, composition, mathematics, conversational English, time management, note taking, assessment of current study habits and learning styles, as well as assistance with preparation for professional examinations. In addition, The Learning Center offers seminar courses which assist incoming freshmen and transfer students in orientation to the university.

The Learning Center has a state-of-the-art teaching computer laboratory, housed in the College of Education, as well as a general computer lab available to students, faculty and staff. With prior scheduling, technical assistance and short courses are provided in The Learning Center in relation to all materials, equipment, and technology needs. The Learning Center makes available and assists in the preparation of instructional resource materials and provides selected multimedia equipment for classroom use. For further information, see The Learning Center in Part I of this bulletin.
Students should begin the application to teacher education during preregistration or orientation. Confidential recommendations must be sent to the Dean of the College of Education, P. O. Box 9710, Mississippi State, MS 39762. The Dean’s office will issue admission cards within five days after admission approval. All students must satisfy Phase II requirements before registering for upper level professional education courses. Students must also sign depositional and licensure advisories and complete a criminal background check prior to admission. Students who have not been admitted to Teacher Education cannot register for restricted professional education courses. The student must meet with the advisor to complete the Phase II form. The faculty advisor is responsible for submitting the Phase II form to the Dean’s office, 309 Allen Hall.

**Admission to Teaching Internship** (Phase III - including Teacher Education majors in the College of Agriculture and Life Sciences and the College of Arts and Sciences): A student must complete Phase III by submitting an Application for Admission to Teaching internship form to the Director of Clinical/Field-Based Instruction and Licensure one semester prior to teaching internship. To be eligible for teaching internship, the student must have been admitted to Teacher Education, must have taken and passed the Praxis II exam, maintained an overall GPA of 2.5 or higher at the time of application, and have no grade below a C in major, concentration, and professional education courses. Final eligibility (2.5 GPA overall) is determined through screening at the end of the semester prior to the teaching internship. The student must also have completed all professional education and content major and concentration courses with a minimum grade of “C” or better in teaching internship by coursework other than the 15 teaching internship/seminar hours can be taken during the teaching internship semester.

Students seeking a degree in Teacher Education and an educator license are expected to schedule teaching internship during the last semester of the senior year. As a general rule, graduate students seeking admission to teacher education and teaching internship are expected to meet the same requirements as undergraduate students prior to their teaching internship experience. All student teacher placements and other communications with local schools are directed through the Office of Clinical/Field-Based Instruction and Licensure.

**Exit Requirements** (Phase IV): To be eligible for graduation, students in Teacher Education programs must have a “C” or better in all professional education courses, all courses in their academic major and concentration areas, and completed no more than half of their hours at a community college, satisfied residence requirements, and have a 2.0 overall GPA at Mississippi State University. For more detailed information about teacher admission procedures, see the current College of Education Undergraduate Handbook. (www.educ.msstate.edu) Application forms are available in the student’s academic department and in the office of the Dean of the College of Education (Allen 309).

**TEACHER EDUCATION POLICIES**

“D” Policy. Students in Teacher Education must make grades of C or better in all professional education courses, in all courses in their academic major and concentration areas, in freshman composition, and algebra (or higher math). All other majors should check with their advisors for the policy for non-teaching majors.

**Probation/Dismissal for Teacher Education Students.** After the completion of 60 hours, Teacher Education students (enrolled or admitted) whose overall GPAs fall below 2.50 will be placed on academic probation. This policy refers to transfer students as well. Teacher Education students whose GPAs are below 2.50 after a year of probation will be dismissed from teacher education. If their GPAs later improve to 2.5, they may re-enroll or reapply for admission.

**TEACHER LICENSURE**

In accordance with statutory provisions, the Mississippi Department of Education, Jackson, Mississippi, has adopted the rules and regulations on issuing and renewing teaching licenses which are set forth in Guide lines for Mississippi Educator Licensure, August 2001. The licensure program is applicable to all teacher licenses. Satisfactory completion of any teaching curriculum offered by the College of Education will enable the graduate to apply for a teaching license in Mississippi, but this institution can neither waive any licensure requirements nor authorize substitutions for mandatory courses. Mississippi State University has submitted the State’s received approval programs to the Department of Education. A student who plans to transfer from other universities or another college to the College of Education should consult with the Director of Clinical/Field-Based Instruction and Licensure or an advisor in the College of Education to ascertain the general education, professional education, and specialized
education courses which must be completed to obtain a teaching license in the field or fields of their choice. Since teacher licenses are issued by the Mississippi Department of Education only and not by the teacher education institutions, applications for licensure and original test scores must be filed with the Mississippi Department of Education by the applicant. Information concerning teacher licensure can be obtained from the Office of Clinical/Field-Based Instruction and Licensure.

As part of securing a Mississippi teacher’s license, students must have taken the Principles of Learning and Teaching (PLT) test, the Special Area test, and attained the required minimum scores. Students must request that ETS send a copy of their scores to Mississippi State University (Code R1480). Students attending the Meridian campus should have their scores sent to both Mississippi State University (Code R1480) and to the MSU Meridian campus (Code R3336). It is very important that students keep the originals of all their test scores in a safe place since they will need the originals of these scores when they apply for a Mississippi educator’s license.

**STUDENT CODE OF CONDUCT VIOLATIONS**

Any violations of the Mississippi State University Student Code of Conduct as delineated in the student handbook, The Bulldog, and at [http://www.msstate.edu/dept/students/dosas.htm](http://www.msstate.edu/dept/students/dosas.htm), including academic misconduct, may place completion of the student’s degree/licensure program in jeopardy.

**CURRICULA**

**Organization.** All curricula in the College of Education are organized on the lower- and upper-division basis. The lower division consists of the first two years and corresponds to the community college level. The upper division consists of the last two years, normally the junior and senior years.

**Selection of Teaching Fields.** Students who enroll in the teacher education program in the College of Education are expected to pursue a program of work which will enable them to qualify for a teaching license in the field of their choice.

**Degree Program Modifications.** Because of forthcoming changes in teacher licensure requirements, COE degree programs and concentrations in teacher education will be modified. Appropriate programmatic changes for graduation, licensure, and accreditation will be made as this process evolves. These teacher education program changes will become applicable as students are officially admitted to programs and/or as new graduation requirements are adopted. For updated degree program modifications, please check with your departmental office.

**Sequence of Courses.** Students should schedule their courses in consultation with their faculty advisor.

**Directed Individual Study Courses.** A directed individual study course is an experience designed to further the educational and/or career development of an individual that is equal to or greater than the equivalent hours for a regularly scheduled course. This experience should be designed by the student’s advisor and department head. Unless otherwise designated by the student’s advisor and department head, the experience shall be limited to 3 credit hours of undergraduate work. Every student should make an agreement with the faculty of record to fulfill the course objectives and outcomes specified in the course syllabus. This policy applies to students entering MSU Fall 2001 and thereafter.

**Transfer from Community College.** Lower-division curricula (100-2000 level) in the College of Education closely parallel the corresponding curricula offered in the community colleges of the state. Therefore, students majoring in a given area at a community college should be able to transfer to a like area in the College of Education and complete their last two years of college work without loss of time or credit.

**Fields of Training.** Baccalaureate programs are offered for the education of teachers in the following fields: elementary education, biology education, English education, foreign language education, mathematics education, physics education, chemistry education, social studies education, speech education, special education, music education, sport pedagogy, technology teacher education, and family/consumer sciences education.

**Non-teaching bachelor’s programs are offered in the following areas: educational psychology; kinesiology with concentrations in health fitness studies, sport studies, or clinical exercise physiology; industrial technology, information technology services, and music.**

**Requirements for Graduation.** The requirements for graduation with a Bachelor of Science degree in the College of Education are a minimum of 124 semester hours and 256 quality points (or higher for some curricula).

**GRADUATE PROGRAMS in EDUCATION**

**Master’s Degrees.** The following departments within the College of Education offer curricula leading to the degree of Master of Science in education: Counseling and Educational Psychology; Curriculum, Instruction, and Special Education; Kinesiology; Leadership and Foundations; Instructional Systems and Workforce Development. Students should check with specific departments for information on the concentrations offered by these departments. The Master of Arts in Teaching is offered for secondary teachers by the Department of Curriculum, Instruction, and Special Education and for Community College Teachers by the Department of Leadership and Foundations.

**Educational Specialist Degree.** The Educational Specialist degree is a planned program of a minimum of 30 semester hours above the Master’s degree under the direction of a major advisor. It is designed to broaden leadership training by providing courses in other fields and disciplines supplemental to the basic core in the major field. It is offered with program emphases in Agricultural and Extension Education, Counselor Education, Elementary Education, School Administration, School Psychology, Secondary Education, Special Education, and Technology.

**Doctoral Degrees.** The Doctor of Education and Doctor of Philosophy degrees are offered with program emphases in School Administration, Counselor Education, School Counseling, Educational Psychology, Instructional Systems and Workforce Development, Elementary Education, Secondary Education, Curriculum and Instruction, Educational Leadership, and Community College Leadership. Minors may be taken in various related disciplines.

For more information on graduate programs in Education, see the Graduate Bulletin. A copy may be secured by writing to the Office of the Graduate School, PO. Box G, Mississippi State, Mississippi 39762.

**College of Education Conceptual Framework**

All programs in the College of Education at Mississippi State University use a conceptual framework involving four specific areas of study: General Studies, Professional/Pedagogical Studies, Content Specialty Studies, and Field and Clinical Experiences. Each of these areas of study builds upon the development of educators/professionals who are dedicated to the continual improvement of their own as well as their students’ educational experiences at all academic levels.

Programs incorporate the essential characteristics of an effective educator/professional stated in the conceptual framework: knowledge, collaboration, reflection, and practice. Graduate programs additionally emphasize research and performance-based outcomes. Candidates’ abilities to use technology and to work with diverse populations are important skills addressed in the Conceptual Framework and fostered in all undergraduate and graduate education programs in the College of Education.

**Department of COUNSELING and EDUCATIONAL PSYCHOLOGY**

Department Head: Daniel Wong
Office: 508 Allen Hall

The Department of Counseling and Educational Psychology prepares individuals at the undergraduate and graduate levels to function in a variety of professional settings that include K-12 schools, community counseling centers, human services agencies, business settings, rehabilitation agencies, community colleges, four-year colleges, and universities. The department offers the Bachelor’s degree, Master of Science degree, the Educational Specialist degree, and the Doctor of Philosophy degree. Special areas of interest in the department are psychometry, educational psychology, school psychology, community counseling, school counseling, vocational rehabilitation counseling, college counseling, and student affairs in higher education.

1. Undergraduate Degree: The B.S. degree in Educational Psychology is a non-teaching option. This program provides students with a general background of psychological topics and principles as they relate to education. Additionally, students complete an emphasis or a minor. Students who enter this program pursue a diversity of careers. Some of the vocational areas for which this program can prepare students are as follows: child care centers, seminary, the armed services (ROTC students), business settings, mental health agencies, and graduate work in counselor education, educational psychology, and school psychology. Students majoring in Educational Psychology have to earn a grade of “C” or better on all courses in the 43 hour curriculum.
2. Graduate Degrees. The Department offers M.S., Ed.S., and Ph.D. degrees in Counselor Education with areas of emphasis in five concentrations: Community Counseling, Rehabilitation Counseling, School Counseling, College Counseling, and Student Affairs in Higher Education with a track in College Counseling and Student Affairs Administration. The department also offers M.S. and Ph.D. degrees in Educational Psychology and a Specialist degree in School Psychology. Preparation in Educational Psychology can be obtained in the concentration areas of School Psychometry and general Educational Psychology at the Master’s (M.S.) level; School Psychology at the specialist (Ed.S.) level; and in the areas of general Educational Psychology (college teaching) and School Psychology at the doctoral (Ph.D.) level.

3. Student Retention Procedures: Professions engaged in protection of the public health and welfare charge their members with the responsibility of monitoring potential new members. Therefore, the Counselor Education and Educational Psychology faculty believe a component of their responsibility to their students, their professions, and the eventual consumers of services provided by graduates, is the necessity to monitor not only students’ academic progress but also the personal characteristics of students that will affect their performance in therapy. These characteristics should be of a quality so as to NOT interfere with the students’ professionalism or helping capacity. Accordingly, the department has adopted a policy outlining student retention procedures. This policy is printed in the Department of Counselor Education and Educational Psychology Graduate Program Handbook.

4. Financial Assistance for Graduate Students. Many students hold assistantships in the Department, the Division of Student Affairs, the Office of Housing and Residence Life, Social Science Research Center, College of Education, and the Rehabilitation Research and Training Center on Blindness and Low Vision.

### EDUCATIONAL PSYCHOLOGY Major (EPY) (Non-teaching Option)

**Major Advisors:** Anastasia Elder, David Morse, Linda Morse  
Office: 508 Allen Hall

#### General Education Requirements

**English Composition (6 hours)**
- EN 1103 English Comp I OR
- EN 1163 Accelerated Comp I
- EN 1113 English Comp II OR
- EN 1173 Accelerated Comp II

**Mathematics (6 hours)**
- MA 1313 College Algebra
- 3 hours Math above College Algebra excluding: MA 1413, 1423, 1433

**Science (6 hours)**
- BIO 1123 Animal Biology with lab
- 3 hours Lab science from General Education courses

**Math/Science Elective (3 hours)**
- Math above College Algebra excluding MA 1413, 1423, 1433 OR Science from General Education courses

**Humanities (6 hours)**
- 3 hours History course
- 3 hours Literature course

**Fine Arts (3 hours)**
- See General Education courses

**Social Sciences (6 hours)**
- SO 1003 Intro to Sociology
- 3 hours General Education course excluding EPY prefixes

#### Major Core

- PSY 1013 General Psychology
- EPY 2513 Human Growth & Development
- EPY 3543 Adolescent Psychology
- EPY 3503 Principles of Ed Psych
- EPY 3553 Giftedness and Creativity
- EPY 4033 Applied Learning Theory
- EPY 4053 Psych & Educ of Mentally Retarded
- EPY 4073 Personality Adjustment
- EPY 4214 Psych & Ed Statistics
- EPY 4313 Measurement & Evaluation
- COE 4023 Intro to Counseling
- EDX 3213 Psych & Ed of Excep Child
- EPY 4513 Research Methods in EPY
- PSY 3623 Social Psychology

**Human/Cultural Diversity Elective - choose one:**
- SO 2203 Cultural and Racial Minorities
- SO 3013 Society and the Individual
- SO 1103 Contemporary, Social Problems
- SO 3323 Contemporary Woman
- SO 3333 Society and Religion
- AN 2203 Cultural and Racial Minorities
- AN 3113 Societies of the World

**Oral Communication Requirement**
- CO 1003 Fundamentals of Public Speaking

**Writing Requirement**
- See advisor for computer literacy requirements.

**Electives**
- Choose two of the following:
  - AN 4313 Human Identification
  - SO 3313 Deviant Behavior
  - SO 3503 Violence in the U.S.
  - PS 4183 Judicial Process
  - PSY 4213 Psychology of Abnormal Behavior
  - PSY 4223 Drug Use and Abuse
  - SW 4613 Child Welfare Services

**Total hours needed for major: 124**

Additionally, students are encouraged to complete the 12 hours of field work (COR 3310 and COR 3320) in order to receive the corrections certificate.

### Selected Emphasis Areas

**Corrections**

**Required Courses**
- COR 3103 The Criminal Justice System
- SO 2203 Cultural and Racial Minorities
- SO 3603 Criminology
- SO 4513 Correctional Systems
- SO 4233 Juvenile Delinquency

**Electives - Choose two of the following:**
- AN 4313 Human Identification
- SO 3313 Deviant Behavior
- SO 3503 Violence in the U.S.
- PS 4183 Judicial Process
- PSY 4213 Psychology of Abnormal Behavior
- PSY 4223 Drug Use and Abuse
- SW 4613 Child Welfare Services

**Total hours needed for major: 124**

### Human Development Child and Family Studies

**Required Courses**
- HS 2803 Prenatal and Infant Development
- HS 2813 Child Development I
- HS 3803 Child Care Procedures
- HS 4803 Art of Parenting (Jr. Standing)
- HS 4853 The Family: A Transactional Approach

**Electives - Choose two of the following:**
- HS 4403 Introduction to Gerontology
- HS 3813 Child Development II
- HS 3823 Designing Child Programs
- HS 4333 Family Public Policy
- HS 4843 Family Interaction
- HS 4863 Consumer Aspects of Aging
- HS 2283 Child Health and Nutrition

**Total hours needed for major: 124**
Counselor Education

Required Courses
- COE 3313 Rehabilitation Services
- COE 4903 Developmental Counseling and Mental Health
- COE 4013 Facilitative Skills Development
- COE 4743 Gender Issues in Counseling OR
- PSY 3203 Psychology of Gender Differences
- COE 4713 Issues in Aging OR
- PSY 4983 Psychology of Aging

Electives - Choose one of the following:
- EPY 4113 Behavioral and Cognitive Interventions
- COE 4363 Introduction to Sign Language
- PSY 3213 Psychology of Abnormal Behavior
- PSY 4223 Drug Use and Abuse
- COE 4353 Adapt Tech and Disability

- 3 hours Special Topics elective*+
- 3 hours Peer Counselors*
- COE 4513 Paraprofessionals in Student Affairs**

* Requires application and invitation to participate.
** Residence Hall advisors only.

Total hours needed for major: 124

Kinesiology

Required Courses
- KI 1803 Health Trends and Topics
- KI 2213 Emergency Health Care
- PE 3223 Motor Development
- EP 3304 Exercise Physiology
- PE 4233 Biomechanics

Total hours needed for major: 124

Psychology with Applied/Industrial/Human Resource

Required Courses
- PSY 3353 Motivation
- PSY 4253 Industrial Psychology
- MGT 3114 Principles of Management & Production
- MGT 3513 Intro to Human Resources Management
- MGT 3213 Organizational Communications I

Electives - Choose two of the following:
- MGT 3413 Production Management
- MGT 4533 Compensation Management
- MGT 4533 Advanced Human Resource Management
- MGT 4213 Organizational Communications II
- PSY 4123 Quant Techniques in Psy Using Computers

Total hours needed for major: 124

Please refer to Degree Program Modifications statement located under CURRICULA in the College of Education section of this catalog.

This department offers curricula in Elementary Education (early childhood, elementary, and middle school), Secondary Education (English, foreign language, mathematics, science, social studies, and speech), and Special Education.

ELEMENTARY EDUCATION Major (ELED)

Major Advisors: Devon Brenner, Johnetta Morrison, Margaret Pope, Rebecca Robichaux, Tina Scholtes, and Nicole Thompson
Office: 310 Allen Hall

The Elementary Education major is designed to prepare teacher candidates and encourage the professional development of teachers and other school personnel. The undergraduate program prepares graduates for certification in Elementary Education through coursework and experiences that focus on subject matter knowledge, foundations of education, pedagogy, practice, and field experiences in pre-K through 8th grade classrooms. Students must choose an early childhood (N-1/K-3) or middle school (K-8) concentration. The early childhood concentration leads to K-3 general certification with N-1 (nursery-1st grade) early childhood/special education certification. The middle school concentration leads to K-6 general certification with 4th-8th grade subject area certification. The junior year includes two mini-blocks of courses: one that emphasizes teaching at the early childhood levels (pre-K–3rd grade), and one that emphasizes teaching at the middle school levels (4th–8th grades). The senior year includes the senior methods block – four co-requisite courses with extensive field experiences that prepare graduates for the teaching of subject matter. The Elementary Education curriculum culminates in the teaching internship, a semester-long field experience in public schools. Persons interested in an Elementary Education degree are advised to obtain a copy of the advising worksheet, available in 310 Allen Hall, from any elementary education advisor, or at www.cise.msstate.edu.

ENGLISH EDUCATION Concentration (ENED)
Major Advisor: Missy Hopper; Office: 310 Allen

The curriculum in English Language Arts is offered to prepare students to teach English Language Arts in high schools and middle schools. A minimum of 42 hours in English beyond freshman composition is required for a major.

General Education Requirements

English Composition (6 hours)

SPECIAL EDUCATION Major (EXED)

Major Advisors: Kent Coffey, Sandy Devlin, and Kara Rosenblatt
Office: 310 Allen Hall

The program in Special Education is designed to prepare teachers to teach children and youth with mental retardation, learning disabilities, and other areas of exceptionality. The curriculum in special education is designed to meet the requirements for the endorsements in the areas of specialization.

Some students may wish to obtain licensure in the areas of special education and elementary education.

** A math course higher than MA 1313 must be completed.
The Department of Kinesiology offers four undergraduate concentrations: Sport Pedagogy (SPPE), Health Fitness Studies (HFS), Clinical Exercise Physiology (CLEP), and Sport Studies (SS).

All concentrations require the specified course requirements cited within the General Education and major core listings below. Specified area content courses vary among the four concentrations and are listed following the core sections. Pre-Occupational Therapy and Pre-Physical Therapy curricula have different core and program requirements. Students electing to pursue Pre-OT or Pre-PT should consult their advisor.

### General Education Requirements

- **English Composition (6 hours)**
  - EN 1103 English Comp I OR
  - EN 1163 Accelerated Comp I
  - EN 1113 English Comp II OR
  - EN 1173 Accelerated Comp II

- **Fine Arts (3 hours)**
  - PE 1323 History and Apprec. of Dance
- **Social Sciences (6 hours)**
  - PSY 1013 General Psychology (Req for CLEP, HFS, and SPPE)
  - EC 2113 Prin of Macroeconomics (Req for HFS and SS)
  - SO 1003 Intro to Sociology (Req for CLEP and SS)
  - SO 1203 Marriage and Family (Req for SPPE)

Choose one of the following concentrations:

#### Sport Pedagogy Concentration (SPPE)

- Major Advisors: Greg Drye, Debby Funderburk, Katherine Gilliland, Brad Vickers, Benjamin Wax and Glen Young

The sport pedagogy concentration requires 124 semester hours of prescribed courses to complete the Bachelor of Science in Kinesiology. The curriculum is designed to meet the need of students interested in becoming physical education teachers in public and private schools. The teaching block of courses must be included in the on-campus requirement of 32 semester hours of junior and senior courses. Students who complete the program will be eligible for teacher licensure by the Mississippi Department of Education.

- **PE 4896** Teaching Internship in Physical Education**

**Total hours needed for major: 124**

* Satisfies General Education requirements.

** Requires full admission to Teacher Education.

#### Health Fitness Studies Concentration (HFS)

- Major Advisors: Ben Abadie, Stamatis Agiovlasitis, Erin Grant, Brandon Hale, Lee Ann Joe, Andreas Kavazis, Adam Knight, John Lambeth and Heather Webb

The health fitness studies concentration provides a basic understanding of the science behind physical fitness and the knowledge to implement effective health fitness programs. This concentration also provides students a basic preparation in one of three tracks students may choose: Business, Health, or Aging. Students are prepared to work in a variety of settings and jobs: fitness instructors, strength and conditioning specialists, directors of wellness and fitness programs associated with hospitals or geriatric centers, or in employee assistance in the corporate setting.

Oral Communication Requirement
CO 1003 Fundamentals of Public Speaking

Computer Literacy Requirement
TKT 1273 Computer Applications or other approved course

Writing Requirement
EDF 3413 Writing for Thinking or approved junior-level writing course

Total hours needed for major: 124

Clinical Exercise Physiology Concentration (CLEP)
Major Advisors: Ben Abadie, Stamatis Agiovlasitis, Erin Grant, Brandon Hale, Andreas Kavazis, Lee Ann Joe, Adam Knight, John Lamirth and Heather Webb

The clinical exercise physiology concentration is designed as a professional preparation program of study that enables students to work in clinical settings as exercise physiologists in cardiac and pulmonary rehabilitation, or other clinical rehabilitation settings, such as those for individuals with diabetes, orthopedic limitations, arthritis, cancer, osteoporosis, renal failure, obesity, and in programs dealing with issues of aging and female specific issues. The clinical exercise physiology concentration also provides students with the necessary background to pursue graduate health studies, medicine, or other graduate level educational programs.

Sport Studies Concentration (SS)
Major Advisors: Adam Love and Alan Morse

The Sport Studies concentration provides students with knowledge and skills necessary for careers in the sport industry. A concentration in Sport Studies helps prepare students to work in such fields as sport marketing & promotions, sporting event and/or facility management & operations, sport communication & media relations, and other administrative areas at the professional, collegiate, and recreational levels of the sport business industry. The program seeks to combine classroom education with hands-on experience, as all students will complete an internship in the sport industry prior to graduation. Students choosing a concentration in Sport Studies choose either the Business or Communication cognate field.

Department of MUSIC (MU) (MUA) (MUE)

Major Advisor: Michael R. Brown
Office: Music Building A

The Department of Music offers a Bachelor of Music Education degree with four concentrations (Instrumental, Vocal, Keyboard, and Guitar). Students must choose one of these concentrations:

**Instrumental Concentration.** The curriculum in instrumental music education is designed to prepare instrumental music teachers for positions in elementary schools, junior high schools and high schools. Students who complete this program are fully qualified for licensure by the Mississippi Department of Education. This program provides the student with a balanced curriculum, combining the practical and theoretical aspects of music education. To insure core competency necessary for the field, all instrumental majors must pass the Piano Proficiency Exam and all portions of the Upper Division Proficiency Exam (consult Departmental Handbook) and must participate in the University Band every semester of their attendance at MSU except the semester in which they student teach. (Students are advised to participate in more than two ensembles only after consultation with their advisor and/or the department head.) All Vocal Music Education majors must study voice in applied lessons for at least six semesters, the last of which will culminate in a Senior Recital.

**Vocal Concentration.** The curriculum in vocal music education is designed to prepare vocal music teachers for positions in elementary schools, junior high schools and high schools. Students who complete this program are fully qualified for licensure by the Mississippi Department of Education. To insure core competency necessary for the field, all vocal majors must pass the Piano Proficiency Exam and all portions of the Upper Division Proficiency Exam (consult Departmental Handbook) and must participate in the University Chorus every semester of their attendance at MSU except the semester in which they student teach. (Students are advised to participate in more than two ensembles only after consultation with their advisor and/or the department head.) All Vocal Music Education majors must study voice in applied lessons for at least six semesters, the last of which will culminate in a Senior Recital.

**Guitar Concentration.** The curriculum in guitar music education is designed to prepare music teachers for positions in elementary schools, junior high schools and high schools. Students who complete this program are fully qualified for licensure by the Mississippi Department of Education. This program provides the student with a balanced curriculum, combining the practical and theoretical aspects of music education. To insure core competency necessary for the field, all guitar majors must pass the Piano Proficiency Exam and all portions of the Upper Division Proficiency Exam (consult Departmental Handbook) and must participate in the University Chorus or Band every semester of their attendance at MSU except the semester in which they student teach. (Students are advised to participate in more than two ensembles only after consultation with their advisor and/or the department head.) All Guitar Music Education majors must study guitar in applied lessons for at least six semesters, the last of which will culminate in a Senior Recital.

**Keyboard Concentration.** The curriculum in keyboard music education is designed to prepare music teachers for positions in elementary schools, junior high schools and high schools. Students who complete this program are fully qualified for licensure by the Mississippi Department of Education. This program provides the student with a balanced curriculum, combining the practical and theoretical aspects of music education. To insure core competency necessary for the field, all keyboard majors must pass the Piano Proficiency Exam and all portions of the Upper Division Proficiency Exam (consult Departmental Handbook) and must participate in the University Chorus or Band every semester of their attendance at MSU except the semester in which they student teach. (Students are advised to participate in more than two ensembles only after consultation with their advisor and/or the department head.) All Keyboard Music Education majors must study piano in applied lessons for at least six semesters, the last of which will culminate in a Senior Recital.

Total hours needed for major: 130

Department of INSTRUCTIONAL SYSTEMS and WORKFORCE DEVELOPMENT (TTE) (ITS)
Interim Department Head: Linda Cornelious
Office: 100 Industrial Education Building

TECHNOLOGY TEACHER EDUCATION Major (TTE)

Business Technology (BT) and Industrial/Technical Education (ITE) Concentrations
Major Advisor: Connie Forde; Office: 251 IED Building

The Technology Teacher Education major provides teacher preparation with concentrations in Business Technology and Industrial/Technical Education. Schools recruit graduates of the TTE program to teach academic business courses, Business & Computer Technology (BCT), and industrial/technical and vocational courses. Students may also choose to complete certifications in computer applications and Information and Communication Technology I and II, and Cooperative Education. Specific certifications and/or endorsements include:
- Business Education - Grades 7-12 (Cert. #105)
- Business & Computer Technology (Cert. #310)
- Computer Applications (Cert. #111)
- Cooperative Education (Cert. #317)
- Career Discovery (Cert. #996)
- Information and Communication Technology I (Cert. #981)
- Information and Communication Technology II (Cert. #982)

The MSU Bulletin is not the final source of information; departmental advisement is important for course sequence and selection. Students should get advisement and approval from their MSU advisors for course scheduling.
General Education Requirements

INDUSTRIAL TECHNOLOGY Major

(INDT) non-teaching

Major Advisors: Dr. John Wyatt, Mickey Giordano and Mervin Mize
Office: 110 IED Building

This curriculum is designed for students who want to prepare for employment leading to supervisory and management positions in the production, automation, maintenance or logistics areas of industry. The role of the Industrial Technology graduate is that of a facilitator of ideas from senior management to the production role of the Industrial Technology graduate.

The INDT baccalaureate degree requirements include that all courses in the major core and concentration area have a minimum passing grade of C. Major courses are defined as those courses listed on the INDT curriculum sheet with the following course symbols: TKI, MGT, MKT, BL, ACC, BQA or EN.

Upper division courses (3000 level and up) must be taken at a senior college or university. See a faculty advisor for prerequisites and proper course sequence.

NOTE: This curriculum lends itself well to a minor in Business Administration or Marketing.

Undergraduate educational foundations courses required in teacher education programs in the College of Education are offered in the Department of Leadership and Foundations. Courses include the following:

- **EDF 3333** Social Foundations
- **EDF 3413** Writing for Thinking
- **EDF 3423** Exploring Diversity
- **EDF 4243** Planning for Diverse Learners

The programs in Leadership and Foundations are designed through course sequence, planned observation and participation, individual study and research, and other learning experiences to prepare administrators, supervisors, teachers, and other educational leaders for positions of leadership in elementary, middle, and secondary schools, and in central offices. The department also provides programs to prepare community college staff, faculty, and leaders.

Administration and supervision programs are offered leading to the Master of Science degree in School Administration, the Master of Arts in Teaching in Community College Education, the Master of Science degree in Workforce Educational Leadership, the Educational Specialist degree with a concentration in School Administration, and the Doctor of Philosophy degrees in Elementary, Middle, and Secondary School Administration and Community College Leadership.

GENERAL INFORMATION
The James Worth Bagley College of Engineering is a professional college whose purposes are to provide both undergraduate and graduate education, to conduct basic and applied research, and to engage in outreach and public service activities. The Bagley consists of the following academic departments:

Department of Aerospace Engineering
Department of Agriculture and Biological Engineering
Dave C. Swalm School of Chemical Engineering
Department of Civil and Environmental Engineering
Department of Computer Science and Engineering
Department of Electrical and Computer Engineering
Department of Industrial and Systems Engineering
Department of Mechanical Engineering

In addition to these academic departments, the Bagley College offers opportunities for faculty and student research in the following centers:

Center for Advanced Vehicular Systems (CAVS)
Center for Computer Security Research
Computational Simulation and Design Center
Geosystems Research Institute (GRI)
High Voltage Laboratory
High Performance Computing Collaboratory (HPCC)
Institute for Clean Energy Technology (ICET)
Industrial Assessment Center
Institute for Digital Biology
Institute for Neurocognitive Science and Technology
Microsystems Prototyping Laboratory
Mississippi Transportation Research Center
Northern Gulf Institute (NGI)
Southeast Cooling, Heating, and Power (CHP) Applications Center
Southeast Region Forensics Training Center
Sustainable Energy Research Center

The vision of the Bagley College of Engineering is to be known for excellence in scholarly achievement, innovative engineering solutions, and economic and educational outreach that enhances the quality of life across the globe.

It is the mission of the Bagley College of Engineering to provide a world-class research, outreach and educational environment that supports, cultivates and fosters the talents of students, faculty and staff to discover new knowledge and technology for the benefit of society. To accomplish this mission the College has established the following goals:

1. Foster a professional environment that cultivates and enhances our faculty members’ scholarly knowledge base and supports them in building an accomplished academic reputation for themselves and the college.

2. Provide engineering graduates who, through their excellent technical and leadership skills, cultural awareness, and social responsibility, will solve the challenges of the 21st century.

3. Increase engineering opportunities for underrepresented groups to support and serve the diverse demographic of the state of Mississippi and the nation to ensure that the college encourages a variety of input, influences and participation in all its endeavors.

4. Conduct cutting edge research to enhance the quality of human life and earth’s sustainability.

5. Provide engineering expertise, engagement and outreach to create positive change and economic development in Mississippi and the region.

The Bagley College is dedicated to providing an extraordinarily rich environment where engineering students can gain the skills that will allow them to become leaders and builders in commerce, industry, and government. Through innovations in and enhancements to the curriculum housed in the Center for Engineering Student Excellence, Bagley engineering graduates will: 1) Develop effective communications skills; 2) Fully utilize the computer as a productivity tool; 3) Develop effective leadership and teamwork abilities; 4) Understand the entrepreneurial process; and 5) Comprehend the global business environment. These enhancements ensure that Bagley engineering graduates are highly sought after by employers and will continue to be successful throughout their careers.

The Center for Engineering Student Excellence also includes a study abroad program which provides students with an opportunity to take courses in another country and experience different cultures. This experience broadens the vision of those who participate and increases their awareness of the global environment in which engineers work. Engineering students also have the opportunity to apply for Congressional internships. Currently internships are in place for the U.S. Congress in Washington, D.C.

In addition to the many enhancements offered through the Center for Engineering Student Excellence, the Bagley College is a full participant in the Leadership Studies minor. An engineering student who pursues this minor will have the opportunity to develop their leadership skills through both general leadership courses and courses focused on skills specific to leadership in the engineering profession. Students pursuing this minor should consult with their advisor and the college’s leadership studies minor advisor as early as possible so that course work can be adequately planned.

The Bagley College is dedicated to producing outstanding graduates who are capable of achieving excellence. With a strong focus on engineering fundamentals and an attitude among the faculty of helping each student achieve his or her best, Bagley engineering graduates are ready to obtain positions with the leading companies or further their educations at the finest graduate schools in the nation.

Basic-level professional programs leading to the Bachelor of Science degree are offered in Aerospace Engineering, Biological Engineering, Chemical Engineering, Civil Engineering, Computer Engineering, Computer Science, Electrical Engineering, Industrial Engineering, Mechanical Engineering, and Software Engineering. The Bachelor of Science programs in aerospace, biological, chemical, civil, computer, electrical,
industrial, mechanical and software engineering are accredited by the Engineering Accreditation Commission of ABET, and the B.S. in computer science is accredited by the Computing Accreditation Commission of ABET: 111 Market Place, Suite 1050, Baltimore, MD 21202-4012; telephone: (410) 347-7700.

All basic-level engineering programs are designed to give the student an understanding of the fundamental principles underlying engineering science and engineering practice. Each curriculum consists of four sequences: Basic Sciences and Mathematics; a general education component; Engineering Sciences; and Engineering Analysis, Design and Systems.

Included in the Basic Sciences and Mathematics sequence are Biology, Chemistry, Physics, and Mathematics, through Calculus and other advanced mathematics topics.

There is also a General Education component required for graduation which is also published in this bulletin.

The sequence in Engineering Sciences consists of studies in engineering mechanics, thermodynamics, transfer and rate mechanisms, electrical theory, the nature and properties of materials, and computer science.

The Engineering Analysis, Design and Systems sequence is directed toward the creative and practical phases of economic design, involving analysis, synthesis, and engineering research and development. This sequence is the most distinctive feature of the engineering curricula, since it is the element of creative and economic design which distinguishes the engineer from the pure scientist.

Engineers and Computer Scientists must develop communication skills through courses in English composition, public speaking, and upper level writing. These skills are reinforced throughout the curricula.

The curriculum in Computer Science consists of general studies, mathematics, science, computer science, and electives.

**ENTRANCE REQUIREMENTS**

Prospective students are encouraged to take as many courses as possible in mathematics, science, English, social studies, and foreign languages while in high school. One unit of computer-aided graphics is recommended for engineering students and at least one-half unit of keyboarding and one-half unit of computer programming are recommended.

The level of high school preparation needed to be successful in engineering or computer science degree programs as measured by ACT or SAT scores and high school academic core grade point average has been identified. The following guidelines are established to help high school students understand the level of preparation required for engineering and computer science. These guidelines are established to help MSU students at risk who want to pursue engineering or computer science.

**Math Prerequisites**

In order to be successful in engineering, a student must develop good math skills through courses in calculus, differential equations, and other math topics. In engineering and computer science, the first math course that a student takes is Calculus. Taking Calculus requires that a student have an adequate preparation in algebra, geometry, and trigonometry.

To provide students with the best possible opportunity for success in calculus, the Department of Mathematics has established the following guidelines for placing students in math courses:

- **MA 1713 Calculus I** - have an ACT math sub-score of 26 or higher, or have grades of C or better in MA 1313 College Algebra and MA 1323 Trigonometry or a C or better in MA 1453.
- **MA 1453 Precalculus** - have an ACT math sub-score of 24 or higher, or have a grade of C or better in MA 1313 College Algebra.
- **MA 1313 College Algebra** - have an ACT math sub-score of 20 or higher.

Students who are not prepared for Calculus I will be required to first complete Precalculus or a sequence of College Algebra and Trigonometry before taking calculus. This may delay a student from taking some engineering courses until they have developed the proper math background, but this should not discourage a student from pursuing an engineering degree. Improving math skills early in their academic career will result in a student having greater academic success.

Students who do not meet the guidelines for enrolling in Calculus I should consider completing Precalculus or a sequence of College Algebra and Trigonometry during the summer prior to attending Mississippi State University. These courses may be taken either at Mississippi State, at a Mississippi Community or Junior College, or at any other accredited two-year or four-year institution. Only grades of C or better will be accepted as satisfying these prerequisites. Courses taken during high school will not count for this credit unless they were taken as part of a dual enrollment program and appear on a separate transcript from a two-year or four-year institution of higher learning. A combination of College Algebra and Trigonometry may be substituted for Precalculus.

**New Freshmen Admission**

For regular admission to one of the Bagley College of Engineering’s degree-granting programs as a freshman, students must be admitted to MSU, complete the following high school academic core: 4 units of English, 4 units of mathematics (algebra, geometry, trigonometry), 3 units of science (chemistry and either biology or physics), 3 units of social studies and/or foreign languages and 2 units of electives, and meet any one of the following criteria:

- Have a composite score greater than or equal to 23 on the ACT or 1060 on the SAT
- Have a composite score of 20, 21, or 22 on the ACT or between 940 and 1050 on the SAT with a high school GPA of 3.0 or greater on academic core courses listed above
- Have any ACT or SAT score with a high school GPA of 3.5 or greater on academic core courses listed above

These criteria are essential for the success of a student beginning an engineering or computer science curriculum at the level shown in the following pages of this Bulletin. Applicants with justifiable circumstances may petition the Dean of Engineering for special admission.

New freshmen applicants who do not meet these requirements, are otherwise admitted to MSU, and want to pursue an engineering degree should select the undeclared engineering degree program if they satisfy any one of the following criteria:

- Meet engineering new freshmen requirements listed above.
- Have completed at least 30 hours with a cumulative GPA greater than or equal to 2.0 and passed Calculus I (MA 1713), English Composition I (EN 1103), and Fundamentals of Chemistry (CH 1213) with grades of C or better.

Internal transfers should discuss the transfer with the appropriate department head or program coordinator before completing the Change of Major form. Some departments have additional admission requirements for internal transfers.

Students admitted to one engineering or computer science degree program may transfer to another engineering or computer science program at any time so long as they meet departmental transfer requirements.

**External Transfers**

Students may transfer from other colleges or universities into MSU engineering degree programs if they meet all requirements to transfer to MSU and satisfy any one of the following criteria:

- Meet engineering new freshmen admission standards listed above.
- Have completed at least 30 hours with a cumulative GPA greater than or equal to 2.0 and passed courses equivalent to Calculus I (MA 1713), English Composition I (EN 1103), and Fundamentals of Chemistry (CH 1213) with grades of C or better.

Applicants with justifiable circumstances may petition the Dean of Engineering for special admission.

Coursework taken elsewhere will not be applied toward a degree in the Bagley College of Engineering until it is determined that it is equivalent to required coursework or is an acceptable substitute. Also, coursework taken elsewhere that which a grade of C or better has been earned will be considered for application toward a degree. No more than one-half of the hours of an engineering or computer science curriculum may be transferred from two-year community or junior colleges.

For admission to undergraduate programs, international students must earn a minimum paper-based TOEFL score of 550 or a computer-based minimum score of 213.
PERSONAL COMPUTER REQUIREMENT
All engineering students are required to own or lease a personal laptop computer. Minimum specifications for a computer will be developed and posted on the Bagley College of Engineering home page on the World Wide Web by July of each year. A computer meeting these minimum specifications should suffice for the entirety of a students program of study as long as normal progress is made each semester. Transfer students are required to have a computer that meets the minimum specifications in place at the time their cohorts would have been freshmen. For example, a student transferring as a junior in the Fall of 2011 is required to have a computer that meets the minimum specifications in place for freshmen who entered the Bagley College in the Fall of 2009.

Information on the computer specifications and special pricing which may be available, can be found by visiting the Web site at http://www.bagley.msstate.edu, by calling the Undergraduate Coordinator at (662) 325-2267, or by writing to Mr. Robert Green at the address given above.

Computers are used by students to solve engineering problems, write papers, and develop presentations for classes. Computer technology improves communication between students and faculty and develops the computational skills demanded of engineering graduates by employers. Further, email is an official means of communication with students per university policy.

Students applying for or receiving financial aid should notify the Office of Student Financial Aid and Scholarships that they are entering the Bagley College of Engineering and are required to have a personal computer. The cost of the personal computer can then be added to the total cost of education and financial aid may be awarded accordingly. The full cost of the computer will not necessarily be covered by financial aid or scholarships depending on the total amount of aid received and other regulations.

GRADUATION REQUIREMENTS
Graduation requirements are the courses and hours shown in the individual programs. Some majors require a grade of C or better in certain courses. This information is available from the department in which the student is enrolled. All students are required to study these requirements together with the course prerequisites, and to be sure that they are taking the proper courses in the curriculum in which they expect to graduate. Students should discuss their programs with their academic advisors each semester, particularly before pre-registration. To graduate with a baccalaureate degree from the Bagley College of Engineering, in addition to meeting the requirements as specified in the Mississippi State University Academic Operating Policy 12.11, candidates must have earned at least a 2.00 cumulative grade point average on all courses scheduled and re-scheduled (average on all attempts) at Mississippi State University that are applied toward meeting degree requirements. Departments within the College may have requirements in addition to those specified above. It is the student’s responsibility to be sure that requirements are fulfilled in a particular program before applying for a degree.

Credit up to a maximum of six semester hours may be applied toward a baccalaureate degree in the College of Engineering for successful completion of the Army ROTC Advanced Course of study or the Air Force ROTC Professional Officer Course of study. Such credit may not be available to students who, before they enter an ROTC program, have completed those courses for which ROTC credit is usually substituted.

Correspondence credit up to a maximum of six semester hours will be accepted, with the prior approval of the department head and the dean. In no case will engineering courses taken by correspondence be approved.

No courses taken under the pass/fail option may be used to satisfy degree requirements.

ENGINEERING STUDY ABROAD PROGRAMS
(See International Study Programs)
ADVANCED-LEVEL, GRADUATE and CERTIFICATE PROGRAMS

Environmental Engineering
The field of Environmental Engineering is an interdisciplinary one concerned with applications of the principles of engineering science and design to improve the quality of the environment. As a broad field, efforts in Environmental Engineering can be found in several departments within the Bagley College of Engineering, including the Departments of Agricultural and Biological Engineering, Chemical Engineering, and Civil and Environmental Engineering. Areas of concern in Environmental Engineering include air quality and pollution control, soil and water quality and wastewater collection, treatment, and disposal, food quality and management of agricultural land and other natural resources, and the minimization, management, and disposal of industrial, municipal, and agricultural waste.

While the Bagley College of Engineering does not offer degrees in Environmental Engineering, the undergraduate student pursuing a Bachelor of Science degree may develop an area of emphasis in Environmental Engineering by fulfilling elective course requirements with a number of courses related to Environmental Engineering including:

- ABE 3513 GPS/GIS in Agriculture and Engineering
- ABE 4263 Soil and Water Management
- ABE 4313 Biological Treat. Of Non-Point Source Pollution
- CHE 4613 Air Pollution Control Design: Theory & Practice
- CE 2803 Environmental Engineering Issues
- CE 3801 Environmental/Water Resource Engineering I
- CE 3803 Environmental/Water Resource Engineering I Lab
- CE 3811 Environmental Engineering II
- CE 3813 Environmental/Water Resource Engineering II

Courses in environmental chemistry, organic chemistry, biochemistry, microbiology, and geological sciences are offered by the College of Arts and Sciences.

For information, the student should consult advisors in the Bagley College of Engineering, especially those in Agricultural and Biological Engineering, Chemical Engineering, and Civil and Environmental Engineering.

GRADUATE STUDY
The Bagley College of Engineering offers graduate degrees at both the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) levels. Some undergraduate programs also offer a process by which promising undergraduate students may be directly admitted to the Ph.D. program following graduation. Students interested specifically in a graduate program should consult the Graduate Bulletin or contact the department of interest directly.

Master of Science degrees are offered in Aerospace Engineering, Biological Engineering, Biomedical Engineering, Chemical Engineering, Civil Engineering, Computer Engineering, Computer Science, Computational Engineering, Electrical Engineering, Industrial Engineering, and Mechanical Engineering. The Master of Science degree requires 24 semester hours of coursework and six semester hours of thesis research. The Master of Science non-thesis option is also offered and requires 33 semester hours of coursework. Computer Science also requires two semester hours of seminar for Computer Science. For more information on these programs, interested students should contact the graduate coordinator in the department of interest.

For those students seeking a Master of Science degree in a flexible on-line format, the Bagley College offers an interdisciplinary program consisting of 33 semester hours of coursework. This program culminates in a Master of Engineering degree. More information can be found at http://www.distance.msstate.edu/engr/degreeprograms.html or by contacting Ms. Rita Burrell at rburrell@bagley.msstate.edu.

The Doctor of Philosophy degree is available in all engineering departments, either through a composite interdisciplinary program or a specific major. In addition to these, Ph.D. degrees are offered in interdisciplinary programs in Computational Engineering and Applied Physics.

Most teaching departments are able to offer teaching assistantships to qualified graduate students. Additionally, many departments are also able to offer research assistantships. Bagley, Barrier, and Honda graduate fellowships are also awarded each year. Because Mississippi State University is a member of the National Consortium for Graduate Degrees for Minority in Engineering and Science, Inc. (GEM), students with GEM Fellowships are eligible to study in the Bagley College.

Students interested in pursuing a graduate education should consult with the graduate coordinators in each academic department, the Associate Dean for Research and Graduate Studies, and The Office of the Graduate School.
CERTIFICATE PROGRAMS

Automotive Engineering Certificate

This certificate will enable students enrolled in a variety of engineering degree programs to enhance their education in topical subject matter related specifically to automotive engineering.

The 15 hours of academic credit required for this certificate may be earned by completing selected courses from a list of qualifying designated by a representative faculty committee. These courses include one from the Level I list; two courses from the Level II list; Automotive Engineering (cross-listed as CHE, ECE, IE or ME 4193/6193); plus a directed individual study course related to a team experience in automotive engineering.

Additionally, at least six hours taken for the certificate must be in addition to the courses required for the student’s graduation requirements for his or her major. Students should see an advisor for a list of approved courses. In the case of graduate students, the student’s graduate committee will determine how many of the courses taken for the certificate fulfill course requirements for the student’s degree.

Computational Biology Certificate

The availability of entire genomes of both simple and complex organisms has made advances in the life sciences critically dependent upon computing. The field of computational biology combines computer science and biology to address questions of how biological systems work by analyzing and synthesizing the data made available with high throughput biology. This certificate program will allow undergraduate and graduate students in the computational and life sciences to pursue a well-defined program where they will gain fundamental skills in computing integrated with biology and will become competitive for high-end employment in emerging technical fields. Students will learn how to apply computational techniques to understand structures, functions, dynamics, and evolution of living organisms.

The certificate program is ideal for students working toward or possessing a BS or MS degree in computer science, computer engineering, mathematics, statistics, biological engineering, or one of the life sciences. A Computational Biology certificate will be issued jointly by the Bagley College of Engineering and the College of Agriculture and Life Sciences upon a candidate’s successful completion of the requirements of the program.

Certificate Requirements:

- CSE 4623/6623 Computational Biology – required of all students
- CSE 4613/6613 Bio-computing – required of students in the life sciences
- BCH 4113/6113 Essentials of Molecular Genetics – required of students in computer science, computer engineering and biological engineering.
- 3 additional relevant courses as approved by the Certificate Advisory Board – required of all students

The Jack Hatcher Engineering Entrepreneurship Program

The role of the engineering entrepreneur in the expansion of the economy is self-evident. Engineers with entrepreneurial spirit and skills are the locomotives of the technology-based startup company and, perhaps more importantly, of the evolution of established industry. Developing entrepreneurial thinking in our graduates is one of the primary learning goals of the Bagley College of Engineering at Mississippi State University. Through an endowment by alumnus Jack Hatcher, we have established a multi-level engineering entrepreneurship program to serve students with different degrees of interest. The primary mission of the program is to expose our students to the broader elements of running a business and the general managerial skills required to prepare them for opportunities in management. For a more limited number, our mission is to equip technologically creative students to recognize opportunities and help instill the confidence to start entrepreneurial businesses.

The basic and broadest element of the entrepreneurship program is a weekly seminar series in which successful entrepreneurs present case histories. Also business leaders discuss specific items, such as patents, hiring employees, and venture capital.

Engineering Entrepreneurship Certificate

For students with higher levels of interest, a formal course of study leading to an Entrepreneurship Certificate is available. The certificate program is a joint program with the College of Business that requires a minimum of 15 semester hours. Students gain knowledge in finance, marketing, and accounting followed by a management course in entrepreneurship where the capstone project is a business plan.

All undergraduate engineering and computer science students in good standing are eligible to join the program. Each student must have a faculty mentor from both engineering and business. To join the program, a student must submit an application that has been signed by both mentors to the Associate Dean of Engineering.

The Entrepreneurship Certificate Program is comprised of three major parts:

1. Completing 15 hours of business and engineering classes:
   - ACC 2013 Prin Financial Accounting
   - EC 2123 Microeconomics
   - IE 3913 Engineering Economy
   - MKT 3013 Principles of Marketing
   - MGT 3323 Entrepreneurship
   - 2. The Seminars Series - GE 3011
   - 3. The “company” or project experience

   By utilizing electives, students in most engineering disciplines can complete the course requirements with a maximum of six to nine hours of additional work above the degree program. Also, much of the coursework will apply toward the prerequisites for an MBA degree at a later time should the student decide to pursue that path.

   A GPA of 2.25 is required on all coursework, and no grade less than a C can be applied toward the certificate. A maximum of two courses can be transfer courses, and correspondence courses will not be accepted. In addition, a passing grade must be obtained for three semesters of GE 3011 Engineering Entrepreneurship Seminar.

   The “company” or project experience is the real-world engineering experience of developing a marketable product or service. In most cases, the certificate candidate can get academic credit through the senior design course or a technical elective. For example, Electrical Engineering and Computer Engineering majors can receive credit for the senior design project requirement (ECE 4512/4522 and ECE 4521). The “company” experience may be a concept developed by students or faculty members.

   To complete the requirements for the project experience, the candidate submits a report to the Associate Dean, which has been approved by both mentors. This report usually takes the form of a Business Plan and is developed as part of the entrepreneurship course MGT 3323.

   Upon completion of the Entrepreneurship Certificate Program requirements, the Associate Dean will review the student’s records. If all requirements are met satisfactorily, the Associate Dean will submit the candidate to the Deans of Business and of Engineering for issuance of the certificate. The Associate Dean will notify the Registrar to have a statement placed on the candidate’s transcript. The certificate will be issued concurrently with the B.S. Degree in Engineering or Computer Science.

   For more information contact:
   - Mr. Gerald Nelson
   - Director, Jack Hatcher Entrepreneurship Program
   - Box 9544, Mississippi State University, MS 39762-9544
   - Phone: (662) 325-8423
   - email: gnelson@bagley.msstate.edu

Geospatial and Remote Sensing Engineering Certificate

Geospatial technology refers to the application of technology resources in the acquisition and analysis of data that has a geographic component along with non-spatial attributes associated with the feature(s) under evaluation. Geospatial technologies include remote sensing, geographic information systems (GIS), and global positioning systems (GPS). Over the past several years, MSU has developed a national reputation in research and applications development in geospatial technologies in agriculture, renewable natural resources and transportation. Faculty involved with research utilizing geospatial technologies recently expanded the academic course offerings at MSU in order to extend their experiences to undergraduate and graduate students. With the wide offering of geospatial and related courses in the University curriculum, an engineering certificate program in geospatial technologies, with an emphasis on remote sensing, has been developed.

Eligibility

Undergraduate students in good standing who are currently enrolled in one of the undergraduate majors in the College of Engineering.

Current graduate students in good standing in one of the majors in the College of Engineering.

Other individuals who hold a B.S. degree in a field of engineering from a university accredited by the Engineering Accreditation Commission of ABET.
Applicants will make application for the certificate program to the Director of Education for the High Performance Computing Collaboratory (HPC). The Director of Education will validate that the applicant meets admission eligibility requirements and forward the application to the Technical Committee of the GeoResources Institute (GRI) for recommendations. Once an applicant is accepted into the certificate program the Director of Education will notify the Dean of Engineering and the Director of GRI.

**Issue of Certificates**

The Director of Education will validate completion of the requirements for the certificate and will inform the Dean of Engineering when a candidate has successfully completed the curriculum. The Dean of Engineering will issue the certificate and have the appropriate notice placed on the candidate’s transcript—"Awarded Geospatial and Remote Sensing Engineering Certificate." The certificate will be signed by the Dean of Engineering, the Director of Education (HPC) and the Director of GRI.

**Curriculum**

To receive the certificate, the candidate must complete 15 hours - six hours of core courses, six hours of engineering electives, and three hours of application electives from the lists given below. The curriculum must be completed with a minimum of 2.00 GPA for undergraduate students and a 3.00 GPA for graduate students. No grade less than a C will count toward the certificate. No more than two courses can be transferred from another institution.

**Core Courses (6 hours)**

- ABE 4253/6253 GIS & GPS in Wildlife and Fisheries Mgmt.
- CSE 4423/6423 Digital Signal Processing

**Engineering Electives (6 hours)**

- ABE 3513 GPS and GIS in Agriculture and Engineering
- ECE 8413 Digital Spectral Analysis
- ECE 8423 Adaptive Signal Processing
- ECE 8433 Statistical Signal Processing
- Elective - Engineering Special Topics course - as approved by the GRI Technical Committee and the Dean of Engineering

**Application Electives (3 hours)**

- FO 4313/6313 Spatial Tech in Nat Res
- GR 2313 Maps and Remote Sensing
- PSS 4373/6373 Geospatial Agronomic Management

**Information Assurance Certificate**

MSU is certified by the National Security Agency as a Center of Academic Excellence in information assurance (IA) education. The IA certificate program is designed for but not limited to, students of the following backgrounds:

- Students participating in the Department of Defense IA Scholarship Program at MSU
- Students participating in the National Science Foundation’s Scholarship for Service at MSU
- Government employees interested in IA who desire to take advantage of education support available from their employer
- Government students on campus as part of the National Defense University educational partnership with MSU who are studying IA topics
- MSU students with a desire to focus on IA topics and wish to demonstrate to perspective employers a competency in this area.

**Requirements**

Admission to the program is managed by the Department of Computer Science and Engineering. All candidates must:

- Be enrolled as a full-or part-time student at MSU
- Demonstrate mastery of computer science, computer engineering, electrical engineering or management information systems fundamentals

- Exhibit knowledge of discrete mathematics, algorithms and data structures at the level of an undergraduate course
- Demonstrate a practical knowledge of computer organization

A minimum of 15 hours must be completed for the Information Assurance Certificate.

**Required courses:**

- CSE 4243/6243 Information and Computer Security
- CSE 4273/6273 Computer Crime and Forensics
- CSE 4383/6383 Cryptography and Network Security

Choose two of the following:

- BIS 4513/6513 Local Area Networks
- BIS 4113/6113 BIS Security Management
- CSE 4153/6153 Data Communications and Networks
- CSE 4733/6733 Operating Systems
- CSE 4503/6503 Database Management Systems

(MIS students may substitute BIS 3753 or BIS 8313)

Any advanced (4000-level or above) IA course approved by the program administrator.

**Manufacturing Certificate**

The Bagley College of Engineering has recognized a need for enhanced manufacturing-related education of those students particularly interested in a career in manufacturing.

The Manufacturing Certificate is available to students in a variety of degree programs, including non-engineering majors and graduate students. The program will enhance a student’s education in topical subject matter related specifically to manufacturing.

There are 24 hours of math and science prerequisite courses for the program including CH 1213, CH 1223, MA 1713, MA 1723, PH 2213, PH 2223, IE 4613 and one Materials course selected from a list of approved courses. Once in the program, undergraduate students will be required to maintain a 2.5 GPA (Graduate students, 3.0 GPA) on the 15 hours of required coursework for the certificate.

**Required Coursework (9 hrs)**

- IE 4333/6333 Production Control Systems I
- IE 4653/6653 Industrial Quality Control I
- IE 3323 Manufacturing Processes OR
- FP 4223/6223 Furniture Production I

**Production Systems – choose one course (3 hrs)**

- IE 4373/6733 Automation
- ME 4643/6643 Automation of Mechanical Systems
- IE 4353/6353 Materials Handling
- IE 4773/6773 Systems Simulation I

**Processes – choose one course (3 hrs)**

- FP 4123/6123 Lumber Manufacturing
- FP 4223/6223 Furniture Production II
- ME 3133 Modeling and Manufacturing
- ME 4413/6413 Casting and Joining
- ME 4423/6423 Machining and Forming Quality

In addition to 15 hours of required coursework, participating students must have gained actual work experience in a manufacturing environment equivalent to a cooperative education work semester or a summer internship. Verification of employment by the employer, including a description of work duties may be required of the candidate prior to certification.

Upon satisfactory completion of the required coursework and work experience, students will become candidates for certification. The Department of Industrial and Systems Engineering will validate completion of all requirements and forward a certification recommendation to the Dean of Engineering.

**Materials Certificate Program**

The Materials Science and Engineering Certificate Program, administered through the Bagley College of Engineering, is available to qualified students who complete an organized plan of study in the interdisciplinary field of Materials Science and Engineering at Mississippi State University.

The University’s various departments offer a range of materials-related courses in both the science and engineering fields, such as biomaterials, electronic and semiconductor materials, metals, composites, polymers, ceramics, and construction materials. We also have a wide range of supporting courses in the areas of materials modeling, mechanics, processing, and characterization, along with special topics in tribology, fatigue, fracture, and corrosion. Faculty participating in these course offerings are organized as the Materials Working Group (MWG).
As part of an organized plan of study, including Directed Individual Study courses under the direction of a MWG member, materials-based courses allow students to pursue an interdisciplinary education and training program tailored to individual interests.

The Materials Science and Engineering Certificate Program is available to both traditional and non-traditional students. This allows industry to offer employees further training in materials, as well as provide current university students the opportunity to pursue an interdisciplinary materials specialty.

To apply for this program, the candidate must submit the initial application for the certificate to a MWG Faculty in their home department. The MWG Faculty will validate the proposed courses and forward the package to the MWG Chair. Upon successful completion of the required courses, the MWG will recommend award of the certificate by the Dean of Engineering.

**Admission to the Certificate Program:**

Students pursuing a materials certificate typically fall into one of the following categories:

1. Persons possessing at least a bachelor's degree in engineering or science;
2. Persons working towards either a bachelor's or master's degree in engineering or science; or
3. Persons working in technical positions in industry desiring a certificate in materials but requiring additional prerequisites.

Minimum admission requirements:

To be admitted to the program a student must have satisfactorily completed Chemistry (CH 1213, CH 1223), its associated laboratories (CH 1211, CH 1221), Calculus (MA 1713, MA 1723), and Physics (PH 2213, PH 2223). In addition, the student is responsible for meeting all prerequisites for each course taken towards the materials certificate.

Candidates in categories (1) and (2) automatically will meet the program requirements, either upon entrance to the program or in parallel. For those lacking the prerequisites, additional course work must be completed successfully.

In all cases, it is the responsibility of the student to provide an official transcript of all courses taken prior to admission into the program. An application form including a proposed course of study must be completed by the student and an official transcript must be provided for admission to the program. A member of Materials Engineering Working Group will review the application and agree to the program of study.

**Certificate Requirements:**

To receive a materials certificate, students must complete at least one course from Level I, at least two courses from Level II, at least one course from Level III, and a three-hour Directed Individual Study that incorporates a materials-related research project and is under the direction of a MWG faculty member. Students must obtain a grade of "C" or better in each class taken.

**Level I: Fundamental materials course.** This course may be part of the student's home curriculum. Student must take at least ONE course.

For further details about the program and a current listing of allowed courses, please contact the Office of the Dean of Engineering at (662) 325-2270 or visit www.bagley.msstate.edu.

**Six Sigma Certificate Program**

Six Sigma is a term, commonly recognized by organizations around the world, which represents various methodologies used systematically to reduce process variation, improve performance and increase customer satisfaction. The Bagley College of Engineering is pleased to offer students the unique opportunity to further their education in this field.

The Six Sigma certificate program will enable both graduate and undergraduate students to gain knowledge in these methodologies currently in widespread use throughout business and industry, worldwide. Engineers knowledgeable in Six Sigma techniques study processes to identify ways to reduce or eliminate waste and non-value added activity. The Six Sigma program is designed to supplement current curricula with knowledge and experience generally not attained until an engineer is professionally active in the business world. The project portion (ref: IE 4923/6923) of this program will provide the opportunity for an engineer to utilize the wide array of techniques learned in order to improve a specific process. Relevant projects will benefit either a university or industry functional process. During performance of the project, students will be mutually mentored by a cognizant representative of the sponsoring organization and MSU faculty or staff.

To enter the program, students must have completed a minimum of 20 credit hours in a degree program recognizing the prerequisite courses for the proposed certificate courses.

To earn the certificate, undergraduate students must complete the required 15 hours with a minimum GPA of 2.5 (Graduate Students, 3.0 GPA). The required courses are:

- IE 4613/6613 Engineering Statistics I
- IE 4623/6623 Engineering Statistics II
- IE 4653/6653 Industrial Quality Control I
- IE 4573/6573 Process Improvement Engineering
- IE 4923/6923 Six Sigma Methods and Project

Upon satisfactory completion of the required coursework, students will become candidates for certification. The Department of Industrial and Systems Engineering will validate completion of all requirements and forward a certification recommendation to the Dean of Engineering. Successful students are also encouraged to further leverage this educational achievement by seeking to attain Six Sigma certification, by exam and demonstrated experience, through a professional organization such as the American Society for Quality (ASQ).

**Software Engineering Certificate Program**

Software Engineering is the application of engineering practices to the design and maintenance of software. Large complex software systems and products often involve millions of lines of code and operate in safety-critical environments. Software Engineering skills are critical to the nation and 10 various states to maintain and expand the industrial base. The certificate program is designed to provide a focused set of course work in Software Engineering. The certificate is available to both traditional and non-traditional students. Through it, industry and government organizations may offer employees additional technical education related to their work.

The Certificate in Software Engineering is administered by the Department of Computer Science and Engineering and the Dean of Engineering.

**Admission to the Certificate Program:**

It is anticipated that students from the following backgrounds will likely pursue a certificate in software engineering:

1. Persons working in industry in a software development or maintenance function and who wish to improve their technical background.
2. Government employees such as those located at the John C. Stennis Space Center or the U.S. Army Engineering Research and Development Center in Vicksburg who do not wish to complete a degree, but desire to take advantage of educational support available from their employer.
3. Students in campus related disciplines that would like to obtain this certificate in addition to another degree option.

All candidates, as a minimum, must demonstrate through experience or course work, the following:
The mission is accomplished by the following educational objectives, which describe the career and professional accomplishments we are preparing our graduates to achieve. Our graduates shall:

1. Demonstrate an understanding of engineering principles and an ability to solve unstructured engineering problems that will allow them to successfully enter into and advance in the engineering profession;

2. Demonstrate an appreciation for lifelong learning and for the value of continuing professional development through continual study of the current literature in the field, participation in graduate education, professional education or continuing education opportunities, attainment of professional licensure, or membership in professional societies;

3. Demonstrate an understanding of professional and ethical responsibilities to the profession, society, and the environment incumbent on an engineering professional;

4. Successfully interact with others of different backgrounds, educations, and cultures;

5. Demonstrate effective communication skills in their profession.

These objectives are accomplished in two different concentrations in the aerospace engineering curriculum, an aeronautics concentration and an astronautics concentration. The concentration in aeronautics focuses on the analysis and design of aircraft and other vehicles that operate primarily within the earth’s atmosphere, and the concentration in astronautics focuses on the analysis and design of spacecraft and other vehicles that operate primarily outside the earth’s atmosphere. A student in aerospace engineering will choose one of these two concentrations upon choosing the aerospace engineering major.

The aerospace engineering program is accredited by the Engineering Accreditation Commission of the ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012. Telephone: 410-347-7700.

General Education Requirements

- English Composition (6 hours)
- 1103 English Comp I OR
- 1163 Accelerated Comp I
- 1113 English Comp II OR
- 1173 Accelerated Comp II
- Mathematics (9 hours)
- 3523 Engineering Math
- Science (6 hours)
- 2113 Mechanics of Materials
- Humanities (6 hours)
- 3203 Civilization of the Ancient Near East
- Fine Arts (3 hours)
- 2253 Art History
- Social/Behavioral Sciences (6 hours)
- 2123 Introduction to Psychology

Major Core
- Math and Basic Science
  - MA 1713 Calculus I
  - MA 1723 Calculus II
  - MA 2733 Calculus III
  - MA 2743 Calculus IV
  - MA 3113 Linear Algebra
  - MA 3253 Differential Equations I
- 3 hours Math/Science Elective
- 3123 Chemistry I
- 1211 Investigations in Chemistry I
- 2213 Physics I
- 2223 Physics II
- 2233 Physics III

Engineering Topics
- ECE 3183 Electrical Engineering Systems
- EM 2413 Engineering Mechanics I
- EM 2433 Engineering Mechanics II
- EM 3213 Mechanics of Materials
- EM 3313 Fluid Mechanics
- EM 3413 Vibrations
- ASE 1013 Intro to Aerospace Engineering
- ASE 2013 Astrodynamics, Propulsion, and Structures
- ASE 2113 Intro to Aircraft and Spacecraft Performance
- ASE 3213 Mechanics of Deformable Structures
- ASE 3223 Aerospace Structural Analysis
Biomedical Engineering Concentration. Students interested in Biomedical Engineering may choose to pursue a concentration in Biomedical Engineering. This concentration is designed for undergraduate students in Biological Engineering who choose to pursue biomedical engineering as a career option. Biomedical Engineering is the rapidly growing interdisciplinary field of engineering that studies the integration of the engineering and biomedical sciences to solve problems associated with the human body and human health. The department has a rich history of biomedical engineering research and teaching that goes back to the early 1970s when the Biological Engineering curriculum at MSU was in its infancy. Students concentrating in biomedical engineering will gain knowledge in biomechanics, biomaterials, bioinstrumentation, physiology, and other topic areas germane to the field. The undergraduate Biomedical Engineering concentration is excellent preparation for students wishing to pursue graduate studies in Biomedical Engineering.

Ecological Engineering Emphasis. The Ecological Engineering program at Mississippi State University addresses environmental problems through the application of basic engineering in concert with principles of ecology and biology. Man has shown repeatedly that working opposition to natural processes leads either to failure or to expensive and energy-intensive temporary solutions. Ecological engineering attempts to apply and emulate the rules that govern natural systems in order to meet human needs in ways that are sustainable.

Bioenergy Emphasis. Biological engineers can engage in environmental conservation and bioenergy technologies use renewable biomass resources to produce an array of energy-related products including electricity, liquid, solid, and gaseous fuels, heat, chemicals, and other materials. Students in this emphasis area gain knowledge in the fundamentals of energy production, thermodynamics, alternative energy sources and biomass conversion into biofuels. The Bioenergy program prepares students to take up a career in the energy sector industry or government agencies, as well as pursue research in energy production from renewable sources.

Premedical Emphasis. The Biological Engineering curriculum offers a premedical emphasis which not only leads to a degree in Biological Engineering but also prepares students for acceptance into most medical, dental, and veterinary schools. Students completing this program have demonstrated their ability to tackle tough subjects, perform well under stressful conditions, work together in teams, learn new material, and achieve ambitious goals - characteristics desired by the best medical, dental, and veterinary schools.

The Biological Engineering degree and the Biomedical Engineering concentration curricula are offered by the Department of Agricultural and Biological Engineering which is jointly administered by the College of Engineering and the College of Agricultural and Life Sciences.

The Biological Engineering Program is accredited under the EC 2000 criteria by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012. Telephone: 410-347-7700.

Department of AGRICULTURAL and BIOLOGICAL ENGINEERING (ABE)

Department Head: Professor Jonathan Pote
Office: 150 Agricultural and Biological Engineering Building

Biological Engineering (BE)

Biological Engineering is that branch of the engineering profession which deals with engineering problems encountered in biological systems. The responsibilities of the Biological Engineer may include the need for more complex food-producing systems, controlling and monitoring the deterioration of the earth’s environment, the replacement of living organs and artificial organs, the use of new technologies to assist the disabled, and the creation of new engineering designs based on the inherently creative characteristics of living systems.

The curriculum in Biological Engineering is designed to give the student a thorough grounding in the basic sciences of mathematics, physics, chemistry, taken with and followed by a series of courses in the engineering and biological sciences and biological engineering.

The educational objectives of the program are as follows:

1. To educate students in the academic discipline of Biological Engineering so that they can formulate and solve engineering problems involving biological systems.
2. To ensure that students develop effective written and oral communication skills.
3. To instruct students in the latest computer-based technology in engineering.
4. To develop the students’ ability to work individually and in teams to complete engineering design projects.
5. To prepare students for employment in engineering jobs or for study in graduate and professional schools and for continual professional development.

Dave C. Swalm School of CHEMICAL ENGINEERING (CHE)

Interim Director: Professor Bill Elmore
Office: 330 Swalm Chemical Engineering Building

Chemical Engineering is a profession where a diverse group of individuals contribute to the invention, development, and deployment of an incredible range of processes and products in a variety of industries including chemical, petrochemical, environmental, pharmaceutical, environmental, and materials. Chemical engineering is the branch of engineering that deals with the chemical and physical processes used to develop and manufacture many different products of great value from lesser valued chemicals and feedstocks. Without question, chemical engineers are making major contributions to the technological infrastructure of modern society.

The mission of the Swalm School of Chemical Engineering is to produce graduates who have the ability to apply the principles of the physical sciences, together with principles of economics and human relations, to fields that pertain directly to processes and process equipment that treat material to effect a change in state, energy content, or composition.

Graduates will receive a broad education that will enable them to become leaders in industry, the profession, and the community. Those graduates who excel academically will be prepared for entry to graduate or professional school.

To achieve our mission, Program Educational Objectives have been established to help us assess the degree to which we have achieved these objectives.

Program Educational Objectives

Mississippi State University Chemical Engineering graduates will:

1. Successfully enter the chemical engineering profession as design and process engineers (and related designations) with prominent companies in the chemical process industries, petroleum and petro-chemical industries, pulp and paper industry, environmental, state and federal government agencies, consulting or other, related chemical industries.

2. Demonstrate an ability to address unstructured problems specific to chemical engineering technical specialties by identifying and implementing solutions using the proper tools, practical approaches and flexible thinking.

3. Pursue and earn post-baccalaureate degrees in chemical engineering and related fields, business and professional programs including medicine and law.

4. Demonstrate proficiency in chemical engineering practice and leadership development by advancing in their chosen fields to supervisory and management positions.

Students choosing to major in Chemical Engineering will select one of three concentration areas within the Chemical Engineering Program: 1) Chemical Engineering Practice Concentration; 2) Chemical Engineering Research/Development Concentration; or 3) Biomolecular Engineering Concentration.

Chemical Engineering Practice Concentration. This concentration area prepares the graduate to enter industry upon graduation well-prepared to function as a chemical engineer, in a variety of industries as well as in a variety of job functions. Students pursuing this option are also well prepared for graduate studies in chemical engineering or professional school. A combination of 12 hours of technical electives, chemical engineering elective, and chemistry elective allows a student to emphasize an area of interest, including materials, environmental, energy (including alternative energy), or traditional chemical engineering.

Chemical Engineering Research/Development Concentration. This concentration area prepares the chemical engineering graduate for further educational endeavors at the graduate level and for opportunities in research and development by providing them with additional training in mathematics and chemical engineering topics. Focused selection of technical, chemistry, and basic engineering electives provides the opportunity to develop the depth required for post-graduate research activities in chemical engineering.

Biomolecular Engineering Concentration. This concentration area prepares the graduate for a career in the biotechnology industry. The concentration area also provides students the opportunity to fulfill prerequisites for medical, dental, or veterinary school upon completion of their chemical engineering degree. Focused selection of technical, chemistry, and basic engineering electives provides the opportunity to develop the depth required in biology, biochemistry, and microbiology.
for students interested in this concentration. While students regularly enter medical school via the Chemical Engineering Practice concentration, the biomolecular engineering concentration offers students not only a bachelor’s degree in chemical engineering, but also highlights those topics encountered in biotechnology, medical school or in veterinary school.

The Chemical Engineering program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012. Telephone: 410-347-7700.

Writing Requirement
- GE 3513 Technical Writing

Computer Literacy
Fulfilled in CHE 2213 and CHE 4134

Choose one of the following sets of courses to complete the degree:

Chemical Engineering Practice Concentration (CHEP)
- EM 2413 Engineering Mechanics I
- ECE 3183 Electrical Engineering Systems
- CHE 3331 Professional Development Seminar
- CH 4413 Thermodynamics
- 3 hours Chemical Engineering Elective**
- 3 hours Chemistry Elective***
- 6 hours Technical Electives**

(Chise strongly recommended that CHE 4313 Transport Phenomena be used as a technical elective)

Chemical Engineering Research/Development Concentration (CERD)
- CHE 4313 Transport Phenomena
- CHE 3331 Professional Development Seminar
- MA 3113 Introduction to Linear Algebra
- MA 3353 Differential Equations II
- MA/ST 4543 Introduction to Mathematical Statistics I OR
- IE 4613 Engineering Statistics I

(MA/ST 4543 is a cross-listed course, but the student should choose MA 4543 if a minor in mathematics is desired.)
- CH 4413 Physical Chemistry I
- 3 hours of Chemistry Elective***
- 3 hours of Technical Elective**

(Chise strongly recommended that the student become involved in research work at a Co-op job or through CHE 4000 Special Topics, which can be used for up to 3 hours of technical elective credit.)

Biomolecular Engineering Concentration (BIOM)
- BIO 1134 Biology I
- BIO 1144 Biology II
- BIO 3304 General Microbiology
- BCH 4603 General Biochemistry I
- CH 4521 Organic Chemistry Laboratory II

Choose one of the following four engineering topics:
- CHE 4313 Transport Phenomena
- EM 2413 Engineering Mechanics I
- ECE 3183 Electrical Engineering Systems
- IE 4613 Engineering Statistics I

Choose one of the following:
- PH 2233 Physic III (premedical students)
- 3 hours Advanced biology course (pre-veterinary students)
- 3 hours Biotechnology course from an engineering dept.

(Biomolecular engineering practice)

Total hours needed for major: 128

* With consent of student’s advisor, the following course substitutions are acceptable*
- EM 3513 Fluid Mechanics substituted for CHE 3203
- MA 3513 Thermodynamics I for CHE 3113
- ME 3513 Heat Transfer for CHE 3213

** CHE 4000 Directed Individual Study will generally be disallowed for the required chemical engineering elective but may be used as a technical elective.

*** The Chemistry and Technical Electives are to be chosen from an approved list available online and from the student’s advisor.
The Civil Engineering program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012. Telephone: 410-347-7700.

Department of COMPUTER SCIENCE and ENGINEERING (CSE)

Interim Department Head: Professor Donna Reese
Office: 300 Butler Hall

The Department of Computer Science and Engineering is dedicated to maintaining quality programs in undergraduate teaching, graduate teaching, and research, and to the fruitful interaction between teaching and research. In research, we wish to maintain our present emphasis on applications (often pursued with colleagues from other disciplines), and upon the synergistic relationships between theory and applications in which the most meaningful advances often result. The department has identified three specific areas in which we shall seek national prominence: software engineering, artificial intelligence, and high-performance com-
puting/scientific visualization. The Department of Computer Science and Engineering offers degree programs leading to the Bachelor of Science degree in Computer Science, Software Engineering, and (jointly with the Department of Electrical and Computer Engineering) Computer Engineering. The department also offers study leading to the Master of Science and the Doctor of Philosophy degrees in Computer Science.

The Mississippi Alpha Chapter of Upsilon Pi Epsilon, the national computer science honorary society, was chartered at the University in 1973 and juniors, seniors, and graduate students with outstanding academic records are selected for membership. The department also supports a student chapter of ACM, the national professional society of the computing sciences.

For more information about the computer science or software engineering programs, requirements of double-major programs, careers in computer science and software engineering, or placement of graduates, please contact the Department of Computer Science and Engineering at Box 9637, Mississippi State, MS 39762, at office@cse.msstate.edu, or at (662) 325-2756. View the Computer Science Web pages at http://www.cse.msstate.edu/. For more information about the Computer Engineering program, please see the section on the Department of Electrical and Computer Engineering.

### Computer Science Major (CS)

**Major Advisor:** Dr. Andrew Watkins  
300 Butler Hall

Computer Science is the study of the principles, applications, and technologies of computing and computers. It involves the study of data and data structures and the algorithms to process these structures; principles of computer architecture—both hardware and software; problem solving and design methodologies; and language design, structure and translation techniques. Computer Science provides a foundation of knowledge for students with career objectives in a wide range of computing and computer-related professions.

The objectives for the department with respect to the Bachelor of Science Degree in Computer Science are as follows:

1. The graduate will demonstrate an understanding of computer science principles and an ability to solve unstructured computer science problems through the successful entrance into and advancement in the computer science profession.
2. The graduate will demonstrate an appreciation for lifelong learning and for the value of continuing professional development through participation in graduate education, professional education or continuing education opportunities, attainment of professional licensure, or membership in professional societies.
3. The graduate will demonstrate an understanding of professional and ethical responsibilities to the profession, society and the environment incumbent on a computer science professional.
4. The graduate will successfully interact with others of different backgrounds, educations, and cultures.
5. The graduate will demonstrate effective communication skills in their profession.

Computer Science graduates begin careers as computer programmers, systems analysts, programmer/analysts, software engineers, systems programmers, computer system engineers and in a number of other computer-related jobs. A minor in computer science is available to students with major programs of study in other fields at the University.

The Bachelor of Science degree requires the completion of a total of 128 credit hours of general studies, computer science, mathematics and science, supporting technical courses. To graduate, a student must have a "C" average in all MSU computer science and engineering courses attempted.

**Total hours needed for major:** 128

### Computer Science Minor

Computer science has application in a broad range of disciplines, and students with majors in other fields of study may wish to complement their studies with a minor in computer science. Completion of the minor requirements should prepare the student to pursue a career as a computer applications specialist within his/her field of study or as an entry-level computer programmer in the general computing environment. The minor in computer science is not available to students majoring in computer engineering or software engineering since significant parts of these majors consist of computer science courses.

A minor in computer science consists of CSE 1284, CSE 1384, CSE 2383, CSE 2813 and nine hours of approved upper-division courses. A list of approved courses is available from the Department of Computer Science and Engineering.
Software Engineering Major (SE)

Major Advisor: Dr. Andrew Watkins
300 Butler Hall

Software Engineering is the application of engineering practices to the design and maintenance of software. The Software Engineering degree program prepares students for careers in the engineering of large complex software systems and products. These systems often involve millions of lines of code and frequently operate in safety-critical environments. The Software Engineering major contains courses related to the study of software engineering in practice necessary to manage these development processes. The faculty for the Software Engineering program is drawn from the Department of Computer Science and Engineering and the Department of Industrial Engineering.

The objectives for the department with respect to the Bachelor of Science Degree in Software Engineering are as follows:

1. The graduate will demonstrate an understanding of engineering principles and an ability to solve unstructured engineering problems through the successful entrance into and advancement in the engineering profession.

2. The graduate will demonstrate an appreciation for lifelong learning and for the value of continuing professional development through participation in graduate education, professional education or continuing education opportunities, attainment of professional licensure, or membership in professional societies.

3. The graduate will demonstrate an understanding of professional and ethical responsibilities to the profession, society and the environment incumbent on an engineering professional.

4. The graduate will successfully interact with others of different backgrounds, educations, and cultures.

5. The graduate will demonstrate effective communication skills in their profession.

The Bachelor of Science degree in Software Engineering requires the completion of a total of 128 credit hours of general studies, computer science, industrial engineering, mathematics and science, supporting technical courses, and free electives. To graduate, a student must have a “C” average in all MSU computer science and engineering courses attempted.

General Education Requirements

Overall, a student must have a “C” average in all computer science and engineering courses attempted.

Total hours needed for major: 128

Software Engineering Minor

The objectives for the department with respect to the Bachelor of Science Degree in Software Engineering are as follows:

1. Demonstrate a strong foundation in fundamentals through an applied competence in mathematics, science, computing, and engineering.

2. Demonstrate the ability to apply innovative techniques to address unstructured problems specific to technical specialties in Electrical or Computer Engineering by identifying and implementing solutions using the proper tools, practical approaches, and flexible thinking.

3. Interact with others, both individually and within multidisciplinary teams using effective oral and written communication skills and possessing the ability to deal with both technical and non-technical subjects when working with peers, supervisors, and the public.

4. Develop an appreciation for the ethical duties incumbent on an Electrical or Computer Engineering professional including a commitment to lifelong learning and a concern for society and the environment.

Department of ELECTRICAL and COMPUTER ENGINEERING (ECE)

Department Head: Professor Nicolas Younan
Office: 216 Simrall Engineering Building

Alumni, employers, faculty and students participate in a process used to develop educational objectives for the undergraduate programs in Electrical Engineering and Computer Engineering.

Students completing the baccalaureate degree in Electrical or Computer Engineering will

1. Demonstrate a strong foundation in fundamentals through an applied competence in mathematics, science, computing, and engineering.

2. Demonstrate the ability to apply innovative techniques to address unstructured problems specific to technical specialties in Electrical or Computer Engineering by identifying and implementing solutions using the proper tools, practical approaches, and flexible thinking.

3. Interact with others, both individually and within multidisciplinary teams using effective oral and written communication skills and possessing the ability to deal with both technical and non-technical subjects when working with peers, supervisors, and the public.

4. Develop an appreciation for the ethical duties incumbent on an Electrical or Computer Engineering professional including a commitment to lifelong learning and a concern for society and the environment.
With the origin of the modern computer dating back to the late 1940’s and the growth of computer hardware fueled by the availability of digital integrated circuits starting in the late 1960’s, computer engineers have enjoyed a pivotal role in technology that now permeates our entire society. Whether the end product is an integrated circuit, a system of networked embedded computers, or any system that relies on digital hardware or computer software, its development requires the skills of a computer engineer. While computing systems include both hardware and software, it is the optimal combination of these components that is the unique realm of the computer engineer. Today, computer engineers are a driving force in the technological and economic development of the digital age.

The curriculum requirements for computer engineering are built around a substantial engineering core curriculum and required courses in electrical engineering and computer science. The requirements in mathematics, the basic sciences, and engineering sciences provide the breadth of exposure required for all engineering disciplines. Basic electrical engineering requirements include circuit theory, electronics and digital devices which are supplemented by upper-level courses in computer architecture, embedded systems and computer aided design of digital systems. Basic computer science courses include a coordinated sequence providing fundamental knowledge in data structures, algorithms, object oriented programming, software engineering, real-time application and software development tools. These courses are developed across multiple platforms and are based on the Python and Java language. Upper-level courses in data communications and computer networks, algorithms and operating systems are also provided. Students wishing to gain depth of coverage in communications, parallel computing, VLSI or signal processing can achieve this with the availability of technical electives selected from an approved list or in consultation with a faculty advisor. Required courses in communications skills, social sciences and humanities provide studies in non-technical areas that are traditional in a broad-based education. A capstone senior design course requires students to apply newfound knowledge and explore entrepreneurship. Students research and identify a problem and work in teams applying a combination of hardware and software to develop a solution. Critical and Final Design Reviews enable students to develop their professional presentation skills.

The computer engineering program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012; (410) 347-7700.

This program is offered through joint efforts of faculty in the Department of Electrical and Computer Engineering and the Department of Computer Science and Engineering.

**ELECTRICAL ENGINEERING Major (EE)**

Major Advisor: Mr. Mike Nosser
Office: 216 Simrall Engineering Building

The electrical engineer is a principal contributor to the modern technological age in which we live today. Following in the footsteps of inventors such as Thomas Edison and Alexander Graham Bell, the electrical engineer is developing technology that improves the quality of life. Developments in microelectronics, telecommunications, and power systems have had a profound effect on each of us. Electrical engineers have affected all segments of our society such as transportation, medicine, and the entertainment industry, to name only a few. Indeed, the electrical engineer has principally been responsible for the advent of the computer age in which we live today as well as the computer’s miniaturization and rapid expansion in computational power.

The curriculum in electrical engineering has a foundation based on the principles of the electrical and physical sciences and uses mathematics as a common language to facilitate the solution of engineering problems. The core curriculum consists of a sequence of courses in digital devices, circuits and electronics, electromagnetic field theory, and modern energy conversion. In the senior year, students have the opportunity to take additional course work in one or more technical areas that include: telecommunications, electromagnetics, power systems, high voltage, feedback control systems, microelectronics, signal processing, and computer systems. Supporting course work outside electrical engineering consists of a strong background in mathematics, physical sciences, computer programming, social sciences, fine arts, humanities, and personal communication skills. Computers are used extensively throughout the curriculum, and students are expected to become proficient in higher-order programming languages and several application software tools. Although the concept of design is stressed throughout the program so as to emphasize the problem-solving skills of the engineer, the senior year includes a capstone design experience where much of the previous study is culminated. Through this two-semester design course sequence, students are required to integrate design and analytical problem-solving skills together with communication skills in a team environment.

The six educational objectives of the Bachelor of Science degree in industrial engineering are stated below.

1. The Department of Industrial and Systems Engineering strives to ready its graduates for a lifelong pursuit of learning.
2. The Department of Industrial and Systems Engineering expects its graduates to be well versed in industrial engineering theory, know how to apply that theory, and to be capable of functioning effectively in a broad range of organizations.
3. The Department of Industrial and Systems Engineering expects its graduates to master important professional skills, including communication, economics, physical and social science, mathematics and statistics.
4. The Department of Industrial and Systems Engineering expects its graduates to interact cooperatively in professional situations with individuals having different cultures, training, education, and interest.
5. The Department of Industrial and Systems Engineering expects its graduates to think independently, to critically examine ideas, and to make discerning professional judgments, whether intellectual, ethical, or aesthetic.
6. The Department of Industrial and Systems Engineering expects its graduates to be well versed in industrial engineering theory, know how to apply that theory, and to be capable of functioning effectively in a broad range of organizations.

The Industrial Engineering Program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012; Telephone: 410-347-7700.

Department of INDUSTRIAL and SYSTEMS ENGINEERING (IE)

Head and Undergraduate Coordinator: Professor Royce Bowden
Office: 260 McCain Engineering Building

Industrial and systems engineering is the application of engineering methods and the principles of scientific management to the design, improvement, and installation of integrated systems of people, materials, information, equipment, and energy. The industrial and systems engineer is concerned with the design of total systems, and is the leader in the drive for increased productivity and quality improvement.

The industrial and systems engineering profession uses a variety of specialized knowledge and skills. These include communications, economics, mathematics, physical and social sciences, together with the methods of engineering analysis and design.

The industrial and systems engineer is often involved in designing or improving major systems that encompass the total organization. Consequently, he/she is often in contact with individuals from many segments of the organization. From his/her education and these experiences, the industrial and systems engineer develops a global view of the many inter-related operations necessary to deliver a firm’s goods and services. Because of their management skills and global view of the organization, a large proportion of industrial and systems engineers move into management positions, and later advance into top management positions.

Although industrial and systems engineering is especially important to all segments of industry, it is also applied in other types of organizations, such as transportation, health care, public utilities, agriculture, defense, government, and merchandising. Industrial and systems engineering is finding increasing application in service industries.

With increasing emphasis on quality and productivity for successful international competition, it is expected that industrial and systems engineers will be in increasing demand in the coming decades.

The objectives of the Department of Industrial and Systems Engineering are founded in Mississippi State University’s Educational Philosophy and in the industrial engineering profession. They were developed to satisfy the needs of the department’s constituents: students, employers, alumni, faculty, and the industrial engineering profession. The Industrial Engineering Program objective is to graduate students having a broad education, with emphasis in industrial and systems engineering fundamentals and practices, which enables them to function effectively in systems involving people, materials, information, energy, and money.

1. The Department of Industrial and Systems Engineering strives to ready its graduates for a lifelong pursuit of learning.
2. The Department of Industrial and Systems Engineering expects its graduates to be well versed in industrial engineering theory, know how to apply that theory, and to be capable of functioning effectively in a broad range of organizations.
3. The Department of Industrial and Systems Engineering expects its graduates to master important professional skills, including communication, economics, physical and social science, mathematics and statistics.
4. The Department of Industrial and Systems Engineering expects its graduates to interact cooperatively in professional situations with individuals having different cultures, training, education, and interest.
5. The Department of Industrial and Systems Engineering expects its graduates to think independently, to critically examine ideas, and to make discerning professional judgments, whether intellectual, ethical, or aesthetic.
6. The Department of Industrial and Systems Engineering expects its graduates to be well versed in industrial engineering theory, know how to apply that theory, and to be capable of functioning effectively in a broad range of organizations.

INTRODUCTION

The College of Forest Resources (CFR) was founded in 1954 as the School of Forest Resources to provide teaching, research, and service opportunities about forests and associated renewable natural resources for the state, region, and nation. Since then, the CFR has earned a national and an international reputation as a center for science and education programs in natural resources management and conservation. The vision of the CFR is to be recognized as preeminent in research, teaching, service, and outreach in forest products, forestry, wildlife, fisheries, and aquaculture in the United States.

The CFR has unique responsibilities to fulfill goals of Mississippi State University through programs focused on Mississippi’s most important renewable natural resources: forests and their products, fisheries and aquaculture, wildlife, and water. In doing so, the CFR’s mission is to promote the professional and intellectual development of its students; expand through research the fundamental knowledge upon which the natural resource disciplines are based; and assist with development and utilization of the natural resources of the state and nation through education, research, service, and technology transfer.

GENERAL INFORMATION

Organization. The CFR is composed of the Departments of Forestry; Wildlife, Fisheries and Aquaculture; and Forest Products. The CFR is a part of the Division of Agriculture, Forestry, and Veterinary Medicine.

Graduates receive a Bachelor of Science degree in Forestry or Wildlife, Fisheries and Aquaculture Science. Within the Forestry major, there are curricular concentrations in Forest Management, Environmental Conservation, Urban Forestry, Wildlife Management, and Forest Products. Each of the curricular concentrations in the forestry major meet the requirements for the professional degree in Forestry. Within the Wildlife, Fisheries and Aquaculture Science major, there are curricular concentrations in Conservation Law Enforcement, Human-Wildlife Conflicts; Wildlife Agriculture Conservation; Wildlife, Fisheries & Aquaculture science; Wildlife Veterinary Science, and Wildlife Pre-Veterinary Medicine (3+1). Each of the curricular concentrations meets requirements for the professional degree in Wildlife by The Wildlife Society or in Fisheries by the American Fisheries Society.

Graduate Programs in Forest Resources. Graduate programs leading to an M.S. and Ph.D. degree are offered in the CFR’s Departments of Forestry, Forest Products, and Wildlife, Fisheries and Aquaculture. For detailed information about graduate study, see the Graduate Bulletin. Copies of the Graduate Bulletin may be secured by writing to Office of the Graduate School, P.O. Box G, Mississippi State, Mississippi 39762-5726, or by going online to the Graduate School, Mississippi State University.

Research. Research is conducted within the Forest and Wildlife Research Center by the Department of Forestry; the Department of Wildlife, Fisheries and Aquaculture; and the Department of Forest Products. Faculty members generally are employed jointly as educators and scientists. There is opportunity for students to gain valuable professional experience by working part-time as research assistants. The experimental work often provides valuable demonstrations for the teaching program. Forestry-related research also is conducted in other departments of the University, and there are cooperative research arrangements with federal agencies, notably the Southern Forest Experiment Station of the USDA Forest Service, which operates research programs in Mississippi. Wildlife and Fisheries research also is conducted by a USGS Cooperative Fish and Wildlife Research Unit which is located in Thompson Hall. All these activities enrich the teaching program.

Facilities. The classrooms and many of the laboratories and offices of the CFR are located in Thompson Hall, a modern building with excellent facilities for teaching and research in forestry, forest products, and wildlife, fisheries and aquaculture. The facilities used for research—instruments, apparatus, literature, experimental forests and lands, greenhouses, captive animal facilities and fish ponds—also are valuable for the teaching program. Additional classroom and laboratory facilities are available within the Forest Products building complex, including the state-of-the-art Franklin Center for Furniture and Manufacturing. The John W. Starr Memorial Forest of 8,200 acres is conveniently close to the campus and is managed and regularly used for demonstration and research. Adjoining the Starr Memorial Forest are the Noxubee National Wildlife Refuge and the Tombigbee National Forest, which also are used for student instruction and research. The Sharp Forest, 1,600 acres in Tishomingo County, was given to the University by Jack, Mollie, and Kate Sharp to be used for forest resources education and research with part of the income designated for scholarships.

Prospective Students. The CFR encourages prospective students to visit the college and MSU to learn more about our programs. A visit to campus can include, but is not limited to, appointments with current students and faculty, tours of campus and facilities, attending lecture classes, talking to other academic units, and visiting with financial aid and MSU housing. Prospective students should contact the CFR Recruiting office two weeks ahead of a planned visit to ensure productive visits. New students are encouraged to complete the on-line resume for scholarship opportunities when applying for admission to MSU in addition to writing a narrative essay to the Forestry Major, and faculty should plan their schedules accordingly. Correspondence courses are not accepted toward the forestry degree.

Entrance Requirements. Transfer students with less than 2.0 quality point average may not be admitted automatically to the College of Forest Resources' degree programs. Permission to enroll will be granted on an individual basis, depending on specific circumstances and the requirements of the major for which the student seeks to enroll.

Students' Academic Responsibility. The ultimate responsibility for meeting graduation requirements and decisions on course selection resides with the student. Specifically, responsibilities of the student are to:

- be aware of and understand degree requirements of his or her chosen major and option;
- be aware of and understand the MSU, CFR, and departmental policies, procedures, and academic calendar and meet all relevant deadlines;
- meet all requirements of the degree program for the curriculum year being pursued; and
- maintain regular contact with his or her faculty advisor.

The responsibility of the faculty advisor is to provide effective counsel to the student on academic matters regarding curriculum and career decisions.

The CFR Undergraduate Handbook is available at www.cfr.mstate.edu and contains curricula, policies, and other important information for a student to use to progress toward graduation. This handbook may include changes or requirements not found in the MSU Bulletin. Each student should retain a copy of the MSU Bulletin and the CFR Undergraduate Handbook that contains the curriculum year he or she is following.

The CFR Academic Affairs Office provides academic services to students and faculty. Official academic records of CFR students are maintained in the Office. The Academic Coordinator represents the Dean and Associate Dean on all academic paperwork such as graduation clearance, coursework evaluation, change of majors, off-campus requests, withdrawals, drop/adds, and registration overrides and overload updates.

Department of FORESTRY (FO)

Major Advisor: Dr. Stephen C. Grado
Office: 357 Thompson Hall

The Objective. The objective of the Forestry Major is to prepare its graduates for professional, science-based careers in the management and use of forested ecosystems. By combining courses offering a broad general education with specialized professional courses, the curriculum of the Forestry Major is designed to produce professionally competent graduates who have appropriate development in interpersonal relationships, written and oral communications, cultural understanding, environmental awareness, and professional ethics.

Accreditation. The educational programs in Forest Management, Wildlife Management, Urban Forestry, Environmental Conservation, and Forest Products lead to the first professional degree in Forestry at Mississippi State University and are accredited by the Society of American Foresters (SAF), the specialized accrediting body recognized by the Commission of Recognition of Post-secondary Accreditation and the U.S. Department of Education as the accrediting agency for forestry education in the United States. The Forest Products program is also accredited by the Society of Wood Science and Technology (SWST).

The Major. The core curriculum of the Forestry Major is comprised of specifically selected and intentionally designed courses which must be completed satisfactorily by each student who intends to graduate in this major. In addition to completing the core curriculum of the Forestry Major, each student must complete one of five academic concentrations for specialized study offered by the Forestry Major. The five academic concentrations are Forest Management, Wildlife Management, Urban Forestry, Environmental Conservation, and Forest Products. Each concentration is an integral part of the Forestry Major and accredited by the SAF. The Forest Products concentration is also accredited by SWST. Graduates of the major are qualified to become a Registered Forester in Mississippi after completing an examination for this purpose from the Board of Registration for Foresters in Mississippi.

The Forestry Major is designed for completion in four academic years which includes a nine-week Summer Field Program between the sophomore and junior years. Completion of the Summer Field Program is prerequisite for enrollment in junior/senior level professional courses in the Forestry Major and students should plan their schedules accordingly. Correspondence courses are not accepted toward the forestry degree.

Transfer Students. Transfer students are encouraged to enter the Forestry Major at MSU in the Spring semester of their sophomore year to complete their academic programs in the normal four-year period of study. Transfer students should be aware that course work taken elsewhere may not be accepted toward a degree in forestry. Only course work that is determined by the Forestry Department to be equivalent to required course work will be accepted. In addition, no course work will be considered for acceptance unless a grade of C or better has been earned.

Degree Requirements: In addition to General Education and College requirements, students must attain a minimum grade of C on the Forestry Major core courses taught within the College of Forest Resources.

Choose one of the following concentrations:

The academic concentrations within the Forestry Major are offered to encourage the student to design a program with the assistance of a faculty advisor that will fit his or her interests and aptitudes. Each concentration has been constructed by substituting restricted, or in some cases directed, electives for what otherwise would appear as Business, Science, Free, or Professional electives in the major. Concentrations are intended to provide opportunities for the student to focus beyond the fundamental education provided by the core curriculum of the Forestry Major.

Forest Management Concentration (FOMG)
Advisor: Dr. Ian A. Munn
349 Thompson Hall

This concentration provides the basic education necessary to enter the profession of forestry with the Bachelor of Science degree, yet permits a wide choice of electives. The student may elect courses in almost any subject of interest, if prerequisites are met; however, credit toward the degree will not be allowed for remedial courses, nor for courses covering substantially the same material as courses already passed, or covering only part of the subject matter of required courses.

Faculty advisors are assigned to assist students in selecting electives to meet their personal objectives. A program of study leading to a double degree in forestry and business is available.

Courses to be taken in addition to those in the core curriculum of the Forestry Major are as follows:

- MA 1313 College Algebra or equivalent
- PH 1113 General Physics OR
- PH 2213 Physics I
- FP 1103 Wood Tech and Products
- FO 3113 Forest Recreation Management
- 9 hours Business/Science Electives*
- 9 hours Professional Electives*
- 3 hours Free Elective

**Total hours needed for major: 128**

* Professional electives and Business/Science electives are chosen from a list approved by the Department of Forestry.

Wildlife Management Concentration (WFMG)
Advisor: Dr. Emily B. Schultz
315 Thompson Hall

Undergraduate students who wish to prepare for careers in wildlife management may do so by completing the Wildlife Management Concentration of the Forestry Major. This concentration is designed for forestry students who intend to pursue careers that emphasize wildlife management within the context of multiple-use management of forest land. In addition, the Wildlife Management Concentration prepares the student for a number of wildlife management positions and fulfills the course requirements for certification as a Professional Wildlife Biologist by The Wildlife Society. Graduates of this concentration may undertake graduate studies in forestry or wildlife ecology and related areas.

Courses to be taken in addition to those in the core curriculum of the Major are as follows:

- MA 1313 College Algebra or equivalent
- BIO 3524 Biology of Vertebrates
- BIO 4203 Taxonomy of Vertebrates
- FO 4353 Natural Resources Law
- WFA 3133 Appl Aquatic and Terrestrial Ecology
- WFA 4243 Wildlife Techniques
- WFA 4433 Mammalogy
- WFA 4443 Ornithology
- 3 hours Professional Elective*
- 3 hours Physical Science Elective

**Total hours needed for major: 126**

* Professional electives are chosen from a list approved by the Department of Forestry.

Environmental Conservation Concentration (ENCO)
Advisor: Dr. Scott D. Roberts
351 Thompson Hall

Students interested in careers dealing with complex environmental issues in the realm of forest resource management may prepare themselves through this concentration. All students within this concentration are required to take the following seven courses:

- MA 1313 College Algebra or equivalent
- PH 1113 General Physics OR
- PH 2213 Physics I
- WFA 3133 Appl Aquatic and Terrestrial Ecology
- FO 3113 Forest Recreation Management
- FO 4463 Forest Hydrology and Watershed Management
- FO 4471 GIS Nat Res Management Lab and
- FO 4472 GIS Nat Res Management OR
- FO 4452 Remote Sensing Applications and
- FO 4451 Remote Sensing Applications Lab
- 14 hrs Emphasis Electives*

**Total hours needed for major: 127**

* See Department Advisor for list of current approved emphasis electives.

Urban Forestry Concentration (URBN)
Advisor: Dr. Stephen C. Grado
357 Thompson Hall

This concentration addresses an emerging need for the management of trees in towns and cities. Urban foresters manage trees along city streets, in municipal parks, private wood lots, and utility right-of-ways. Employers include federal, state, and municipal governments, private consultants, and industry.

Courses to be taken in addition to those in the core curriculum of the major are as follows:

- MA 1313 College Algebra or equivalent
- FO 3113 Forest Recreation Management
- FO 4353 Natural Resources Law
- FO 4471 GIS Nat Res Management Lab and
- FO 4472 GIS Nat Res Management OR
- FO 4452 Remote Sensing Applications and
- FO 4451 Remote Sensing Applications Lab
- LA 3623 Urban Planning
- PS 1113 American Government
- PSS 2423 Plant Materials I
- PSS 4353 Arbor and Landscape Maintenance
- REM 3253 Real Property Evaluation
- REM 3333 Principles of Real Estate

**Total hours needed for major: 128**

Forest Products Concentration (FP)
Advisor: Dr. Laura A. Grace
309 Thompson Hall

This concentration is designed for students interested in the forest products industry. The program of study consists of the core courses for the university and the forestry major, plus courses specific to the concentration.

- MA 1613 Calculus for Business and Life Sciences OR
- MA 1713 Calculus I
- CH 1053 Survey of Chemistry II
- PH 1113 General Physics I
- FP 1103 Wood Technology and Products
- FP 4013 Wood Anatomy
- FP 4323 Physical Properties of Wood
- 3 hrs FP Processing Elective*
- 12 hrs FP Electives*

**Total hours needed for major: 128 hours**

* See Departmental Advisor for list of current approved electives.
Forest-Based Entrepreneurship Certificate

The current trend in forestry and forest-based employment is downsizing and outsourcing. The shift has been especially abrupt in the forest industry sector, but similar moves are afoot in the public sector. As a consequence, two major markets for our graduates—corporations and agencies—are decreasing while employment with entrepreneurial scale firms is on the increase. Entrepreneurial scale firms are businesses with one to 50 employees, organized as a sole proprietorship, partnership, limited liability company, S corporation, or C corporation that provide a specialized set of services or produce specialized products supporting and supported by forests and forest resources or forest products. They may be forestry, wildlife, or wood products consultants, logging firms, small manufacturing firms, security or environmental auditors, operators of recreational facilities, tree service firms, or operators of wholesale and retail sales facilities serving customers in forest-based or affiliated businesses. Basic professional skills required are much the same as for traditional employment, but the business skills, acumen, and demands are quite different. The certificate program is directed at preparing our students to compete more effectively in this growing market.

Admission to the Program and Requirements for Certificate

The program is open to students in good standing in the department. Each applicant must have the support of a faculty mentor. The certificate candidate must complete the following classes with a minimum QCA of 2.5, and will be encouraged to use electives to strengthen his/her background in the area.

- ACC 2013 Principles of Financial Accounting 3 hours
- BL 2413 The Legal Environment of Business 3 hours
- FO/FP/WFA 7000 DIS in Entrepreneurship 3 hours
- PH 3013 Business Ethics 3 hours
- MGT 3223 Entrepreneurship 3 hours

Courses for which the student receives a grade of D cannot be applied. Only two required courses can be transferred from another institution. In addition, each candidate must, during their senior year, prepare, submit, and defend a business plan for a forest-based enterprise. Reports will be approved by the mentor, submitted to an oversight committee for review.

Issuance of Certificates: The Associate Dean will, upon approval of the report by the oversight committee, review the student’s records to assure that grade requirements for the certificate have been maintained. If all requirements have been met, the Associate Dean will submit the candidate to the Dean of the CFR for certificate issuance and notify the registrar to have a statement placed on the candidate’s transcript. Certificates will be issued with the B.S. degree.

Department of WILDLIFE, FISHERIES and Aquaculture (WFA)

Major Advisor: Dr. Samuel Riffell
Office: 205A Thompson Hall

Sustainable management of the diverse wildlife and fisheries resources by private and public sectors, requires knowledgeable and technically competent people. The Department of Wildlife, Fisheries and Aquaculture offers a major in Wildlife, Fisheries and Aquaculture Science designed to provide students with a curriculum that has foundations in biology, ecology, natural resources management, social sciences, computer science, and other contemporary educational needs for natural resources professionals. Six concentrations are available to students: wildlife, fisheries and aquaculture science, conservation law enforcement, wildlife veterinary medicine, wildlife pre-veterinary medicine, wildlife agriculture conservation, and human-wildlife conflicts. The curriculum will prepare students for employment in natural resource professions within private, federal, or state wildlife, fisheries, or aquaculture sectors. Additionally, the curriculum ensures that students are eligible for employment upon graduation, as well as providing the academic background required for graduate and post-graduate studies.

Students may proceed towards a DVM degree by taking the concentration entitled the wildlife pre-veterinary program. Students, upon completing the course work outlined in the wildlife pre-veterinary program, may apply for admission into the College of Veterinary Medicine. Alternatively, students accepted into the early entry veterinary program, upon completing the wildlife pre-veterinary program satisfactorily, may be admitted into the College of Veterinary Medicine. There also is an opportunity to pursue, with an additional year, a M.S. degree in Veterinary or Wildlife Science. Upon successful completion of course requirements, the student will graduate with a B.S. degree in Wildlife, Fisheries and Aquaculture Science, pre-veterinary concentration at the end of the fourth year, and a DVM at the end of the seventh year.

Course work in the Wildlife, Fisheries and Aquaculture Science, Conservation Law Enforcement and the Wildlife Pre-veterinary concentrations enables students to fulfill the course work requirements necessary to become Certified Wildlife Biologists by The Wildlife Society. The Wildlife, Fisheries and Aquaculture Science concentration exceeds requirements for certification by the American Fisheries Society as an Associate Fisheries Scientist.

The Wildlife, Fisheries and Aquaculture Science Major is designed for completion within four years, but some students may not complete the program at that time because of course scheduling or other constraints. Transfer students are encouraged to begin course work at MSU by the end of their sophomore year to enable graduation in four years. Transfer students should be aware that course work taken elsewhere may not necessarily be accepted toward a degree in Wildlife, Fisheries and Aquaculture Science. Only course work determined by the Wildlife, Fisheries and Aquaculture Department to be equivalent to required course work will be accepted. Additionally, no course work will be considered for acceptance unless a grade of C or better has been earned. Correspondence courses will not be accepted toward the Wildlife, Fisheries and Aquaculture Science degree. Transfer students with a grade point average less than or equal to 2.0 may not be admitted automatically into the Wildlife, Fisheries and Aquaculture Science major. Permission to enroll depends on specific circumstances and the requirements of the Wildlife, Fisheries and Aquaculture Science major. In addition to University and College requirements, students must maintain a C or better in Wildlife and Fisheries Science major core courses taught within the College of Forest Resources. These courses are concentration specific. Students in the Wildlife Pre-veterinary program, interested in pursuing the Veterinary Medicine program, must meet all admission requirements by the College of Veterinary Medicine.

General Education Requirements

- English Composition (6 hours)
  - EN 1103 English Comp I OR
  - EN 1163 Accelerated Comp I
  - EN 1113 English Comp II OR
  - EN 1173 Accelerated Comp II

- Mathematics (6 hours)
  - MA 1613 Calculus for Bus & Life Sciences OR
  - MA 1713 Calculus I
  - ST 3123 Intro to Statistical Inference

- Natural Science (9 hours)
  - BIO 1134 Biology I
  - BIO 1144 Biology II
  - See concentrations for additional requirements

- Humanities (6 hours)
  - 3 hours See General Education courses
  - 3 hours See concentrations

- Fine Arts (3 hours)
  - See General Education courses

- Social/Behavioral Sciences (6 hours)
  - AEC 2713 Intro Food & Resource Econ (for Ag. Con.) OR
  - EC 2113 Intro to Macroeconomics OR
  - EC 2123 Intro to Microeconomics
  - 3 hours See concentrations

Note: Pre-requisites and co-requisites are strictly enforced in the College of Forest Resources. It is the student’s responsibility to be aware of pre-requisites and co-requisites for all courses required in his or her program; pre-requisites and co-requisites are identified in the Course Description section of this Bulletin.

Major Core

- WFA 1102 Wildlife and Fisheries Profession
- FO 2113 Dendrology
- BIO 3524 Biology of Vertebrates
- WFA 3133 Appl Aquatic and Terrestrial Ecology
- WFA 4122 Wildlife and Fisheries Biometrics
- WFA 4121 Wildlife and Fisheries Biometrics Lab
- WFA 4153 Principles of Wildlife Conservation & Mgt
- WFA 4243 Wildlife Techniques
Choose one of the following concentrations:

The Concentrations: The academic concentrations within the Wildlife and Fisheries Science Major are offered to enable students to develop an academic background that is suited to their professional career goals. Each concentration has been developed to supplement the core curriculum which provides the basis for the wildlife and fisheries science major, regardless of the area of expertise desired by the student.

Conservation Law Enforcement Concentration (WFLE)

Advisor: Dr. Kevin M. Hunt
Room 205A Thompson Hall

This concentration is designed for undergraduate students who wish to seek employment immediately following receipt of a B.S. degree and wish to obtain positions related to natural resource law enforcement (e.g., conservation officers, park rangers) or wildlife managers (not biologists). Students may, upon graduation within this concentration, continue on to graduate school in the human dimensions—law enforcement or wildlife arenas. Starting salaries, on average, would be less than with a M.S. degree.

Courses to be taken in addition to those of the core curriculum include:

- PHI 1123 Intro to Ethics OR PHI 3013 Business Ethics
- SO 1003 Intro to Sociology
- PSY 1013 General Psychology
- CH 1043 Survey of Chemistry I
- CH 1053 Survey of Chemistry II
- CH 1051 Experimental Chemistry Lab
- PSS 3303 Soils
- PSS 3301 Soils Lab
- COR 3103 Criminal Justice Systems
- SO 3313 Deviant Behavior
- SO 3603 Criminology
- WFA 4253 Appl Spatial Tech. and WFA Mgmt
- WFA 4313 Fisheries Management
- WFA 4463 Human Dim. of Fish Wildlife Mgmt.
- WFA 4523 Mammalogy
- WFA 4543 Ornithology
- 3 hours Professional Elective*
- 3 hours Human Resource Mgt Elective*
- 3 hours Natural Resources Mgt Elective*
- 3 hours Nutrition/Physiology/Anatomy Elective*

Total hours needed for major: 124

* All electives are chosen from a list approved by the Department of Wildlife and Fisheries.

Wildlife Pre-Veterinary Concentration (PVSF)

Advisor: Dr. Robbie Kroger
Room 205A Thompson Hall

This integrated curriculum allows the students to pursue a 3 + 1 undergraduate degree program in Wildlife and Fisheries Science for three years and then, if accepted, matriculate into the Veterinary Medicine program in College of Veterinary Medicine. Successful graduates of this program are qualified to apply for Certified Wildlife Biologist with The Wildlife Society as well as being qualified to practice veterinary medicine.

Note: Mississippi State requires a minimum of 124 hours for the undergraduate degree. Therefore, to qualify for the B.S. degree in Wildlife and Fisheries Science, a student MUST complete the three years of the listed undergraduate course work (114 hours) in the wildlife pre-veterinary program AND also successfully complete the first year in the Veterinary Medicine curriculum.

Courses to be taken in addition to those of the core curriculum include:

- 3 hours Social Science Elective - see General Educ. courses
- 3 hours Social Science Elective*
- CH 1043 Survey of Chemistry I
- CH 1053 Survey of Chemistry II
- BIO 3103 Genetics
- PSS 3301 Soils Lab
- PSS 3303 Soils
- FO 4223 Practices of Silviculture AND FO 4221 Practices of Silviculture Lab OR
- 3 hours Invertebrate Elective
- WFA 4222 Limnology AND
- WFA 4221 Limnology Lab OR
- WFA 4383 Wetlands Ecology and Management
- WFA 4313 Fisheries Management OR
- WFA 4463 Human Dim. of Fish Wildlife Mgmt.
- WFA 4133 Fisheries Science
- WFA 4183 Principles and Practices of Aquaculture OR
- 3 hours Organismal course
- 3 hours Organismal course*
- 18 hours Professional Electives*
- 3 hours Nutrition/Physiology/Anatomy Elective*

Total hours needed for major: 114

* All electives are chosen from a list approved by the Department of Wildlife and Fisheries.

Wildlife, Fisheries and Aquaculture Science Concentration (AQUW)

Advisor: Dr. Jerrold Belant
Room 215 Thompson Hall

This concentration is designed for undergraduate students who wish to pursue one or more advanced degrees (M.S., Ph.D.), as it prepares students for graduate school. Employment following this B.S. program is possible, but competition for jobs may be keen. This concentration is intended for serious, academically strong students, who maintain an A-B grade record (GPA 3.0), which is the minimum required for admittance into graduate schools.

Courses to be taken in addition to those of the core curriculum include:

- 3 hours Humanities Elective - see General Educ. courses
- 3 hours Humanities Elective - see General Educ. courses
- 3 hours Social Science Elective
- CH 1043 Survey of Chemistry I
- CH 1053 Survey of Chemistry II
- BIO 3103 Genetics
- PSS 3301 Soils Lab
- PSS 3303 Soils
- FO 4223 Practices of Silviculture AND FO 4221 Practices of Silviculture Lab OR
- 3 hours Invertebrate Elective
- WFA 4222 Limnology AND
- WFA 4221 Limnology Lab OR
- WFA 4383 Wetlands Ecology and Management
- WFA 4313 Fisheries Management OR
- WFA 4463 Human Dim. of Fish Wildlife Mgmt.
- WFA 4133 Fisheries Science
- WFA 4183 Principles and Practices of Aquaculture OR
- 3 hours Organismal course
- 3 hours Organismal course*
- 18 hours Professional Electives*
- 3 hours Nutrition/Physiology/Anatomy Elective*

Total hours needed for major: 124

* All electives are chosen from a list approved by the Department of Wildlife and Fisheries.
Wildlife Veterinary Medicine Concentration (WFVM)

Advisor: Dr. Robbie Kroger
Room 205A Thompson Hall

This integrated curriculum allows the students to pursue a 3 + 1 undergraduate degree program in Wildlife and Fisheries Science for three years and then, if accepted, matriculate into the Veterinary Medicine program in College of Veterinary Medicine. Successful graduates of this program are qualified to apply for Certified Wildlife Biologist with The Wildlife Society as well as being qualified to practice veterinary medicine.

Note: Mississippi State requires a minimum of 124 hours for the undergraduate degree. Therefore, to qualify for the B.S. degree in Wildlife and Fisheries Science, a student MUST complete the three years of the above listed undergraduate course work (114 hours) in the wildlife pre-veterinary program AND also successfully complete the first year in the Veterinary Medicine curriculum.

3 hours Humanities Elective - see University Core
3 hours Social Science Elective*
BIO 2103 Cell Biology
BIO 3103 Genetics
CH 1213 Chemistry I
CH 1211 Investigations in Chemistry
CH 1223 Chemistry II
CH 1221 Investigations in Chemistry
CH 4513 Organic Chemistry I

WFA 4413 Immunology
WFA 4523 Mammalogy
WFA 4543 Ornithology
Wildlife/Veterinary Internship
3 hours Policy Elective*

Total hours needed for major: 114

*All electives are chosen from a list approved by the Department of Wildlife and Fisheries

Wildlife Agriculture Conversation (WLAC)

Advisor: Dr. Samuel Riffell
Room 205A Thompson Hall

This curriculum provides the educational background for those students wishing to pursue a career as wildlife biologist with a strong background in wildlife damage management to resolve human-wildlife conflicts. Successful graduates of this program are qualified to apply for Certified Wildlife Biologist with The Wildlife Society. Students completing this concentration may seek employment immediately following graduation; however, competition for positions may be intense. Students will be equally prepared to pursue one or more graduate degrees (M.S., Ph.D.) in Human-Wildlife Conflicts or other areas of Wildlife Science.

3 hours Humanities Elective - see General Educ. courses
3 hours Social Science Elect. - see General Educ. courses
CH 1043 Survey of Chemistry I
CH 1053 Survey of Chemistry II
BIO 3103 Genetics
PSS 3301 Soils Lab
PSS 3303 Soils

Total hours needed for major: 124

*All electives are chosen from a list approved by the Department of Wildlife and Fisheries

FOREST PRODUCTS (FP)

Major Advisor: Head Rubin Shmulsky
Office: 203 Franklin Center, 100 Blackjack Road

The forest products industry is one of the largest economic contributors to Mississippi, as well as in the United States. Employment in the furniture, lumber, wood products, composites, and paper sectors of the economy far exceeds the employment of any other manufacturing sector in the state. Mississippi’s forest products industry recognizes the need for well-trained employees to help increase the conversion efficiencies and alter manufacturing processes to allow compatibility with a changing raw material base. While the industry is large in terms of employment, value-added processing facilities number only a few thousand nationwide and a few hundred in Mississippi.

The mission of the Department of Forest Products is to enhance the intellectual, cultural, social, and professional development of its students by providing them with knowledge and skills needed to utilize and conserve diverse forest resources effectively. In this regard, the Department’s primary teaching responsibility is to provide high quality educational opportunities necessary to adequately prepare students for professional and scientific careers in forest products and wood science. The academic major is fully accredited by the Society of Wood Science and Technology.
The Department of Forest Products maintains its major for students currently enrolled in the program. New admissions have been suspended as of the summer of 2006. Transfer students who began their academic program prior to May 2006 should contact the department to determine admission eligibility and degree requirements. Students interested in a forest products curriculum are now directed to the newly created Forest Products concentration within the Forestry Major and to the Forest Products graduate program. Students enrolled in this concentration will be advised for academic and career related issues by members of the Forest Products faculty.

The Department of Forest Products’ physical plant consists of five buildings and other special purpose buildings and Franklin Center for Furniture Manufacturing and Management, with a combined floor space in excess of 90,000 square feet. These buildings house the analytical and testing equipment, pilot plants, and support facilities required for a comprehensive research program involving wood and wood products.

Forest Products Minor
A Forest Products minor is available to non-majors to provide students with the knowledge of wood, wood products, their use, and importance to employers in many areas including construction, design, marketing and distributing, retail and wholesale management, sales, production, technical services, and scientific fields such as chemistry, engineering and industrial technology. A minor in Forest Products will also provide non-major students an excellent background for entering a graduate degree program in Forest Products. Academic advising is available in the Department of Forest Products located at 100 Blackjack Road. A total of 18 hours is required to obtain a Forest Products minor. See Section II: Department Specific Policies for the list of requirements and course prerequisites.
College of Veterinary Medicine

KENT H. HOBLET, Dean
Office: College of Veterinary Medicine (Wise Center)
Telephone: (662) 325-3432
Mailing Address: Box 6100, Mississippi State, MS 39762-6100

GENERAL INFORMATION
The College of Veterinary Medicine was established in 1974 by an act of the Mississippi Legislature. The first class was admitted during the 1977-78 academic year and graduated in May of 1981.

The permanent College facilities, completed in the fall of 1981, include the learning resources center, the animal health center, and the research facility. College programs, faculty, students, and staff are located in these facilities.

The primary objective of the College is to serve the needs of Mississippi. In quest of this objective, the College will provide training in the sciences required for a career in veterinary medicine and veterinary medical technology. The Doctor of Veterinary Medicine curriculum focuses on the skills of the veterinary practitioner who will serve the animal-owning public of Mississippi while the veterinary medical technology curriculum focuses on the skills necessary to facilitate the work of veterinarians.

Students seeking a degree in either veterinary medicine or veterinary technology should acquire a sound foundation in the biological and physical sciences and a general knowledge of the humanities in high school and college. Because of the increasing use of information technology in veterinary medicine, students are strongly encouraged to acquire familiarity with computers. They must have a demonstrated aptitude for scientific study, and, in addition, experience with animals. An awareness of the requirements and characteristics of the practice of veterinary medicine is desirable in reaching a mature decision to pursue a career in either veterinary medicine or veterinary technology.

EARLY ENTRY PROGRAM for the COLLEGE of VETERINARY MEDICINE
The Early Entry Program is offered on a competitive basis to high school seniors who have demonstrated exceptional academic achievement. Applications are available by October 1st of each year and are due for return by January 15th. Online applications are available at www.cvm.msstate.edu. Questions should be addressed to the Office of Student Admissions, College of Veterinary Medicine at (662) 325-9065 or hadaway@cvm.msstate.edu.

The Program is designed so an individual has the opportunity to obtain both a B.S. degree and a D.V.M. degree in seven to eight years. Those accepted into the Early Entry Program are pre-accepted into the professional program at the College of Veterinary Medicine contingent upon their maintaining predetermined qualifications throughout their college career and providing documentation of no less than 480 hours veterinary experience.

TRADITIONAL ENTRANCE REQUIREMENTS
The GRE® general exam (school code 1326) is required for admission consideration – No minimum score is required. Scores must be in the CVM Office of Student Admissions by October 1 of the application year. A Test of English as a Foreign Language (TOEFL®) score of 213 is required for applicants whose primary language is not English, also due October 1. Three (3) completed LOR (Letter of Recommendation) forms are required with the completed VMCAS application. At least one evaluator must be a veterinarian. To apply, applicants must have a minimum grade point average of 2.80 on a 4.00 scale both cumulative and in the required sciences (including mathematics). Minimum GPAs must be maintained throughout the application process. Prerequisite courses for entrance into the college must include specific courses:

- Microbiology with lab: 4 sem hours
- Inorganic chemistry with lab: 8 sem hours
- Organic chemistry with lab: 8 sem hours
- Biochemistry: 3 sem hours
- Physics (can be Trig-based): 6 sem hours
- Advanced Upper-level Science electives: 12 sem hours
- Humanities/fine arts/social and behavioral sciences: 15 sem hours

**Total semester credit hours: 79 sem hrs.**

Science and mathematics courses must be completed or updated within six calendar years prior to the anticipated date of enrollment.

ADMISSION PROCEDURE
Applications are accepted through October 1 each year for the upcoming academic year. Admissions procedures take place in the spring, with new students beginning classes at the beginning of the second summer session. All applicants apply electronically through the Veterinary Medical College Application Service (VMCAS) at www.aavmc.org. Applications are available online in June each year.

Further information may be obtained from:
Office of Student Admissions
College of Veterinary Medicine
Mississippi State University
Box 6100, Mississippi State, MS 39762-6100
662-325-9065; msu-cvmadmissions@cvm.msstate.edu

DVM CURRICULUM
The professional curriculum is divided into two phases - Phase 1 (DVM 1 and DVM 2 years) and Phase 2 (DVM 3 and DVM 4 years). Phase 1 is conducted in a lecture/lab based format.

**DVM 1 COURSES**
Freshmen Fall Courses
- CVM 5011 Professional Development I
- CVM 5013 Veterinary Neuroscience
- CVM 5023 Infectious Agents I
- CVM 5032 Immunology
- CVM 5036 Veterinary Physiology I
- CVM 5046 Veterinary Anatomy I
- CVM 5073 Veterinary Histology

Freshmen Spring Courses
- CVM 5021 Professional Development II
- CVM 5022 Veterinary Epidemiology
- CVM 5044 Introduction to Veterinary Pathology
- CVM 5072 Veterinary Anatomy II
- CVM 5163 Veterinary Parasitology
- CVM 5193 Infectious Agents II
- CVM 5223 Pharmacology I

**Total Credit Hours: 42 hours**

**DVM 2 COURSES**
Sophomore Fall Courses
- CVM 5111 Professional Development III
- CVM 5123 Veterinary Clinical Pathology
- CVM 5143 Theriogenology
- CVM 5153 Equine Medicine and Surgery I
- CVM 5152 Veterinary Toxicology
- CVM 5186 Small Animal Medicine and Surgery I
- CVM 5213 Intro to Veterinary Anesthesiology
- CVM 5553 Pharmacology II

Sophomore Spring Courses

**Total Credit Hours: 42 hours**
Students must be mature and responsible learners to obtain the maximum benefit from these courses. During the fourth year (DVM4) students have 8 months of elective options. The options include elective clinical rotations, externship experiences, small group or discussion based courses, and special problems (directed individual study) opportunities. In essence, each student, working closely with a faculty advisor, designs a schedule which most uniquely meets the student’s needs and career preferences.

Conducted in an experiential-learning mode, the clinical rotations and many of the electives continue to make the student responsible for his or her own education. The clinical cases or elective courses provide the environment for continued student growth and development. Students must be mature and responsible learners to obtain the maximum benefit from these courses.

**Clinical and Elective**

**Phase 2, (DVM3 and DVM4 years) is conducted in a clinical and elective format. Students participate in twelve required clinical rotations of two to six weeks duration each. In these rotations students actively participate in the clinical diagnosis and management of patients admitted to the Animal Health Center.**

During the fourth year (DVM4) students have 8 months of elective options. The options include elective clinical rotations, externship experiences, small group or discussion based courses, and special problems (directed individual study) opportunities. In essence, each student, working closely with a faculty advisor, designs a schedule which most uniquely meets the student’s needs and career preferences.

Conducted in an experiential-learning mode, the clinical rotations and many of the electives continue to make the student responsible for his or her own education. - CVM 5694 Veterinary Cytology
- CVM 5714 Advanced Small Animal Dermatology
- CVM 5722 Small Ruminant Production Medicine
- CVM 5754 Advanced Small Animal Surgery

**Total Credit Hours: 47 hours**

**VETERINARY MEDICAL TECHNOLOGY (VMT)**

The Veterinary Medical Technology major (VMT) prepares students for multiple career opportunities. Upon completion of this program, graduates will positively contribute to the veterinary health care team regardless of the area/specialty graduates wish to pursue. Potential work environments for VMT graduates include but are not limited to private veterinary practice, biomedical research, pharmaceutical industry, zoological parks, humane societies, nutrition companies, United States Department of Agriculture, U.S. military and academic institutions.

The first year of the curriculum students are enrolled as pre-vet tech students. Students will be enrolled in general education courses. Admission to the second year will be contingent on the student applying to the VMT program and meeting entrance criteria. Students will take a competency exam at the end of the sophomore year. The third year of the curriculum is competitive and enrollment is limited to 30 students. Accepted students will begin classes the summer session following acceptance. The fourth year mainly consists of clinical experiences and begins the first summer session following successful completion of the third year. Students will be evaluated by clinical competency exams throughout the curriculum for successful program advancement.

**PREADMISSION to the SOPHOMORE YEAR**

Preadmission to the sophomore year is offered on a competitive basis to high school seniors and college students who have earned no more than 18 college credits. Applicants must have demonstrated significant academic achievement. Applications are available by January 15 of each year and are due for return by March 15. Online applications are available at www.cvm.msstate.edu. Questions should be addressed to www.vmtp@cvm.msstate.edu. Those granted preadmission status into the VMT program are pre-accepted into the sophomore year of the VMT program contingent upon their maintaining predetermined qualifications during their freshman year. Accepted students must attend Mississippi State University.

**ENTRANCE REQUIREMENTS TO THE SOPHOMORE YEAR**

An applicant to the sophomore year of the VMT program must successfully complete prerequisite courses by the end of the spring semester prior to beginning the sophomore year. Three (3) letters of recommendation are required. To apply, applicants must have a minimum grade point average of 2.8 on a 4.00 scale with no grade less than “C” in any prerequisite course. The minimum GPA must be maintained throughout the application process. Prerequisite courses for entrance into the VMT program include specific courses:

- English Composition 6 semester hours
- Mathematics 6 semester hours
- College Algebra (or higher) 7 semester hours
- Inorganic Chemistry 6 semester hours
- Humanities 6 semester hours
- Social/Behavioral Sciences 6 semester hours
- Total semester credit hours 31 semester hours

The following courses must be successfully completed prior to the fall semester of the junior year before students are allowed to continue in the program:

- Public Speaking 3 semester hours
- Microbiology with lab 4 semester hours
- Biological science with lab 8 semester hours
- Fine Arts 3 semester hours

**Total Credit Hours Required: 46 hours**

* Required

Students must take 30-36 hours of electives during their senior year. Electives can be selected from the above listed CVM courses or from University courses upon advisor’s approval.
ADMISSION PROCEDURE

Applications are available online September 1 and are accepted through January 15. Admission procedures include a critique of each applicant’s academic record, an evaluation of each applicant’s references, and a personal interview of selected applicants.

Further information may be obtained from:

CVM 4101 Veterinary Technology Academic Elective
CVM 4201 Clinical Experience Elective
CVM 4501 Diagnostic and Research Laboratory Elective, Pearl, Miss.
CVM 4511 University Medical Center
Biomedical Research Unit Elective, Jackson, Miss

GRADUATE PROGRAM

The College of Veterinary Medicine at Mississippi State University offers advanced graduate study leading to Master’s and Ph.D. degrees with emphasis in infectious diseases, toxicology, pharmacology, and pathology. The multidisciplinary composition of the Veterinary Science Program provides the unique opportunity for training in food animals with special emphasis in aquaculture and poultry. Specialized training encompassing molecular biotechnology, microbiology, immunology, virology, physiology, toxicology, pathology and biochemical approaches to solving basic and applied biomedical problems is offered. Master's and Ph.D. degrees are offered in Veterinary Medical Science and Ph.D. degree in Toxicology is also offered. A non thesis Master’s option in Veterinary Medical Science is also offered with emphasis in food animal production medicine, i.e. dairy, beef, swine, poultry and aquaculture.

Research interests of the faculty include pathogenesis of viral and bacterial and environmental diseases, comparative and developmental immunology, biochemical characterization of parasites, and xenobiotic contamination of animal tissues. The multidisciplinary approach of the program is strengthened by active collaboration of faculty members with other institutional units including the Departments of Animal and Dairy Sciences, Biochemistry, Poultry Science, Wildlife and Fisheries, and Biological Science. The Veterinary Medical Science Graduate Program is firmly committed to providing trained graduates who can serve as leaders in management and research for the food animal industry and in biomedical research.

For additional information about the Graduate Program, contact the Graduate Coordinator, Box 9825, Mississippi State, Mississippi 39762, telephone (662) 325-1417.
Environment and Sustainability Certificate Program

The Environment and Sustainability Certification (ENSC) is a 17 credit hour, multi-disciplinary program open to all undergraduate majors in good standing. From accountants to zoologists, and all majors in between, this certificate is designed to enhance your understanding of the complex environmental challenges humanity faces in the 21st century. It will also give students an opportunity to gain hands-on experience in an environmental area of interest. Students will study the technical aspects of issues such as climate change and energy, and learn how values, beliefs and policies affect how these issues are addressed. Students will also learn about sustainable practices and lifestyle choices that can help reduce your own ecological footprint.

Two courses are required of all students: Introduction to Environmental Science (ENS 2103) and Environmental Science Practicum (ENS 4102). Of the remaining 12 hours, at least three must be taken from each of the three categories: Humanities, Social Sciences, and Science & Engineering. The remaining three credit hours must be taken from a category not directly related to the student’s major course of study.

Course Work

- ENS 2103 Intro to Environmental Science
- ENS 4102 Environmental Science Practicum
- 3 hours Approved Humanities course
- 3 hours Approved Social Sciences course
- 3 hours Approved Science & Engineering course
- 3 hours Consult with Program Coordinator

Enrollment in ENS 4102 must be arranged with the Program Coordinator. The student may arrange to work with a faculty member conducting research in the environment and sustainability field, or the student may propose a project of relevance to the certificate. This must be arranged in consultation with the Program Coordinator prior to enrolling in ENS 4102.

For further information and enrollment forms, please contact the ENS program coordinator:

Dr. Joseph Massey
Department of Plant and Soil Sciences
117 Dorman Hall
662-325-4725; jmassey@pss.msstate.edu

Geospatial and Remote Sensing Technologies Certificate Program

Technology revolutions have driven the expectations of remote sensing and geospatial technologies to an all-time high for a new generation of users across a vast number of disciplines. Advances in computational technologies, visualization products, and sensor technologies have led to the development of unprecedented capabilities in remote sensing, global position systems, and geographic information systems. With the recent launches of commercial and governmental remote sensing satellites, as well as the development of aerial remote sensing instruments that provide advanced spectral and radar technologies, the industry is poised to develop operational remote sensing applications that fundamentally impact management of resources. Mississippi State University has developed broad, multi-disciplinary efforts in spatial technologies of many types, and is a leader among universities in education and outreach activities to prepare the next generation for utilizing these technologies. One of the primary limitations to the development of this industry is the need for a better-educated workforce that can understand and utilize the tools of these spatial technologies. Education in geospatial and remote sensing technologies is by nature multi-disciplinary; therefore, a certificate program that crosses departmental and college boundaries has been developed to address these needs. This certificate can thus serve the needs of undergraduate and graduate students with diverse backgrounds from a variety of disciplines. Students may strategically assess which courses within their disciplinary academic program can be used for the certificate program, thus satisfying the needs of both and maximizing their educational experience. Non-traditional students may also receive the certificate in seeking professional credentials for career enhancement.

The certificate should represent a student’s mastery of basic GIS and Remote Sensing coursework. A minimum of 3 hours of coursework is required in each of these areas:
- Geographic Information Systems
- Remote Sensing
- Spatial Positioning Technologies

Students are required to complete 6 hours of additional coursework chosen from a list of restricted electives that are offered by several MSU departments.

Due to the multi-disciplinary nature of this program, the Office of Academic Affairs is the resident office for admission and administration. Thus, the program is not focused on a single college or department. A program coordinator, appointed by the Provost, advises students seeking the GRS certificate, and assists departmental advisors. The coordinator is also responsible for conducting the necessary transcript audits and authorizing the awarding of certificates.

A multi-disciplinary certificate program has also been developed in Geospatial and Remote Sensing Engineering. This is administered through the College of Engineering. See this listing under that college for more information.

For further information and enrollment information, contact the GRS program coordinator:

Dr. Bill Cooke, Director
Geosystems Research Institute; A127 HPC
662-325-9575
wbc5@geosci.msstate.edu

A total of 15 semester hours are required: nine selected from the list of required courses, and six selected from the list of elective courses.

Required Courses (9 hours)

Remote Sensing - choose one
- ABE/PSS 4483/6483 Introduction to Remote Sensing OR
- ECE 4423/6423 Introduction to Remote Sensing
- GR 4333/6333 Remote Sensing of the Physical Environment
- FO 4452/6452 Remote Sensing Applications AND
- FO 4451/6451 Remote Sensing Applications Lab

GIS - choose one
- GR 4303/6303 Principles of GIS
- WFA 4253/6253 GIS and GPS in Wildlife Management
- FO 4472/6472 GIS for Natural Resource Management AND
- FO 4471/6471 GIS for Natural Resource Management Lab

Positioning Technologies - choose one
- PSS 4373/6373 Geospatial Agronomic Management
- GR 3303 Survey of Geospatial Technologies
- FO 4313/6313 Spatial Technologies in Natural Res. Mgt.

Electives - 6 hours

See program coordinator for list of approved electives.

Leadership Studies Minor

The interdisciplinary minor in Leadership Studies provides academic and experiential knowledge and skills to prepare students for future leadership positions in communities, professions, and organizations. The Leadership Studies minor is open to Mississippi State University students in all Colleges, Schools, and majors. It requires 19 hours of approved coursework, including at least one experiential internship component. No more than two courses from the same academic Department may be applied to this minor. Students in the Leadership Studies minor must maintain grade point averages of 2.00 or higher overall and grade point averages of 2.50 or higher in courses applied to the minor. Students must earn a grade of C or higher in all minor courses.

Admission and Graduation Standards: Entering freshmen may declare a Leadership Studies minor in the first semester by securing approval of a minor program of studies as outlined herein. Qualified
students, including incoming transfer students, may declare the minor during any subsequent semester. After the first semester of college, students must have minimum overall GPAs of 2.00 or higher (including all course work taken, not just in the minor) to enter or remain in the minor. To graduate with a Minor in Leadership Studies, students must meet all course requirements on their approved programs of minor study, must have overall GPAs of 2.00 or higher on all coursework attempted, and must have 2.50 or higher GPAs over all minor courses. Students must earn grades of C or higher in all courses applied to the Leadership Studies minor.

Curriculum Outline: Each student will select one core course in each of three core areas: Ethics, which are essential for any leader; Social Science, which studies leadership directly and provides knowledge of direct relevance to leadership; and Communication, which involves skills that are critically important for leaders. (For students in majors with little room for electives, judicious selection of the core courses in the Leadership Studies minor may simultaneously fulfill certain General Education requirements, College or School Core Curriculum, or Departmental Major requirements.) Each student will further select from an approved list, in consultation with his or her Leadership Studies minor advisor, at least three more courses that facilitate the student’s goals. Finally, each student will register for a 1-hour (48 contact hours during the semester) experiential internship.

Area I: Ethics and Leadership. Choose One:
- PHI 1123 Introduction to Ethics
- MGT 3823 Socially Responsible Leadership

Area II: Leadership and Social Science. Choose One:
- MGT 3813 Organizational Behavior
- PSY 3623 Social Psychology
- PS 3013 Political Leadership
- PS/GE 2713 Engineering and Public Policy

Area III: Leadership and Communication Skills. Choose One:
- CO 1003 Fundamentals of Public Speaking
- CO 2213 Small Group Communication
- CO 3803 Public Relations

Area IV: Experiential internship component. Choose One:
- EXL 1191 Leadership Studies Internship

Area V: Electives. Choose Three:

For additional information, contact Robert Green, Chair, Leadership Studies Minor committee at green@bagley.msstate.edu

UNIVERSITY ACADEMIC ADVISING CENTER
UNDECLARED (UND)

Director: Wesley Ammon
Professional Academic Advisors: Tim Fancher, Kay Nobles, Janet Odom, and Sandra Powe

48 Magruder Street; Mail Stop 9729;
Web site at http://www.msstate.edu/dept/academic-advising
Telephone (662) 325-4052; Fax (662) 325-4026;
P.O. Box 6117, Mississippi State, MS 39762.

UAAC Mission to Undeclared students

The University Academic Advising Center was established to meet the needs of those students who have competing interest in more than one major area, as well as those who are uncertain of their career and educational goals. The professional staff and volunteers at the center offer one on one advising services to traditional and nontraditional undergraduate students and provide accurate information concerning specific curriculum requirements, university policies and procedures, campus resources and various programs of study. The center is committed to assisting students with the development of educational plans consistent with their life goals, objectives and abilities. Students normally remain UND “majors” for no more than two semesters during which time advisors recommend courses that meet basic core requirements in relation to “majors of interest” for each individual student. Students who have reached Junior status can remain undeclared for one (1) semester after accumulating 60 hours of academic credit.

UAAC advisors traditionally recommend that UND students enroll in 12-18 hours each fall and spring semester with careful considerations given to courses required in each student’s majors of interest. It is the goal of the center to assist each UND student in enrolling in courses that satisfy the minimum core requirements for any major the student may later choose with respect to each department’s right to specify more stringent requirements than the University as a whole. However, ultimate responsibility for taking the UAAC staff’s advice rests with the student.

Visits to UAAC and responses to request for information through our Web site are subject to staff availability and the center’s priority responsibilities during MSU’s designated preregistration and orientation periods. Otherwise, UAAC urges students to make appointments with advisors at the center to establish a plan of action. The University Academic Advising Center staff encourages all UND “majors” to utilize services offered by the Career Center, the Counseling Center, the Learning Center, Student Support Services and other support programs offered by various units at MSU.

International Studies Certificate Program

The International Studies Certificate is designed to enhance students’ understanding of the global environment in which they are living. Students completing this program will develop some proficiency in a foreign language, have experience living in another country, and have some general background of different cultures and societies. The Introduction to Global Studies course serves as an introduction to global concerns and responsibilities that can begin on the MSU campus. The Cross-cultural Leadership course serves as a capstone to bring the ideas of students in the program together, addressing ways to use their experiences and knowledge to become leaders in the world. A total of 18 approved hours must be completed to receive the certificate.

International Studies Scholars

Certain students will be chosen each spring, based on an application process, to become International Studies Scholars. Each scholar will receive one $1000 scholarship to go towards a study abroad experience and will be expected to participate in a service project that supports new international students at MSU.

Requirements

A minimum of 18 semester hours with a grade of a “C” or above are required in the following component areas with at least three credit hours from a study abroad experience and six credit hours of foreign languages. The three-credit-hour Introduction to Global Studies (ISE 1103) and the three-credit-hour Cross-Cultural Leadership (4103) are required of all students.

DEGREES

1. MASTER of ARTS
   a. The College of Arts and Sciences offers the Master of Arts degree in applied anthropology; English; foreign languages; history; and political science. The College of Business offers the Master of Arts degree in economics.
   b. Two plans for the Master of Arts degree are offered. They are designated as Plan One and Plan Two. Plan One requires a minimum of 30 semester hours of graduate credits with at least 24 hours earned as course work and at least six hours earned as thesis. Plan Two is offered at the option of the department and requires a minimum of 30 semester hours of graduate-level course work.
   c. A reading knowledge of one foreign language is required of students majoring in English and history (thesis option only).

2. MASTER of SCIENCE
   a. The Master of Science degree is offered by the College of Agriculture and Life Sciences in
      *agricultural and extension education
      *agricultural life sciences (concentrations in animal physiology; biochemistry; entomology and plant pathology; genetics)
      *agriculture (concentrations in agricultural economics; agronomy; animal nutrition; animal science; engineering technology; horticulture; poultry science; weed science)
      *food science, nutrition and health promotion (concentrations in food science technology; health promotion; nutrition)
      *horticulture
      *human development and family studies
   b. Two plans for the Master of Science degree are offered. They are designated as Plan One and Plan Two. Plan One requires a minimum of 30 semester hours of graduate credits with at least 24 hours earned as course work and at least six hours earned as thesis. Plan Two is offered at the option of the department and requires a minimum of 30 semester hours of graduate-level course work.
   c. A reading knowledge of one foreign language is required of students majoring in English and history (thesis option only).

3. MASTER of AGribusiness Management (M.A.B.M.)
   a. The Master of Agribusiness Management is offered in Agribusiness Management.
   b. The Master of Agribusiness Management is an interdisciplinary program between the College of Agriculture and Life Sciences and the College of Business and Industry.

4. MASTER of ARTS in INTERDISCIPLINARY SCIENCES (M.A.I.S.)
   This interdisciplinary program designed for K-12 teachers allows students to choose an emphasis area from biological sciences, chemistry, geosciences, and mathematics & statistics and to choose electives from remaining areas.

5. MASTER of ARTS in TEACHING (M.A.T.)
   a. The program is offered in the Leadership and Foundations Department.
   b. The major is Community College Education and requires 33-36 credit hours.

6. MASTER of ARTS in TEACHING - SECONDARY (M.A.T.S.)
   a. The Master of Arts in Teaching-Secondary is an alternate route secondary licensure program offered by the Curriculum and Instruction Department.
   b. Thirty-six semester hours of graduate-level course work is required.

7. MASTER of BUSINESS ADMINISTRATION (M.B.A.)
   a. The Master of Business Administration, a graduate professional degree requires 30 semester hours of graduate course work; a thesis is not required.
   b. The Master of Business Administration in Project Management is an interdisciplinary program between the College of Business and Industry and the College of Engineering. This program consists of 32 semester hours; no thesis is required.
   c. The Master of Business Administration with a concentration in Accounting is available on the Meridian campus.
8. MASTER of ENGINEERING (M. Eng.)
   a. The Master of Engineering is a 33-hour interdisciplinary program
designed for the professional engineer.
   b. All courses in this degree program are delivered via distance
   learning.
9. MASTER of LANDSCAPE ARCHITECTURE (M.L.A.)
   a. The Master of Landscape Architecture is offered in landscape
architecture with three areas of concentration: watershed planning
and management; landscape planning and management; and community
based initiatives.
   b. A minimum of 30 semester required, including a six hour thesis.
10. MASTER of PROFESSIONAL ACCOUNTANCY (M.P.A.)
    A minimum of 30 semester hours of course work in graduate credit
business courses is required. Those hours must include a minimum of
   a. Twenty-one semester hours of accounting, and
   b. Nine semester hours of other related business courses.
   c. An accounting major with a concentration in systems is also available.
11. MASTER of PUBLIC POLICY and ADMINISTRATION (M.P.P.A.)
    a. The Master of Public Policy and Administration is a graduate
   professional degree with admission open to students who have earned at
   least a B average in a relevant undergraduate major.
    b. Forty-two semester hours, including a three-credit internship, are
   required. The internship may be waived for students with significant
   and relevant work experience as determined by the Department of Political
   Science.
12. MASTER of SCIENCE in BUSINESS ADMINISTRATION (M.S.B.A.)
    a. This business program is housed in the Department of Finance
   and Economics and targets students with an interest in finance.
    b. The 30-hour-minimum program includes 21 hours in the major
   with 9 hours in a minor area.
13. MASTER of SCIENCE in INFORMATION SYSTEMS (M.S.I.S.)
    a. This degree is offered in the Management and Information Systems
   Department.
    b. A minimum of 30 credit hours course work is required.
14. MASTER of SCIENCE in INSTRUCTIONAL TECHNOLOGY
    (M.S.I.T.)
    a. The program is offered in the Instructional Systems and Work-
   force Development Department.
    b. The non-thesis option requires 33 credit hours of graduate course work.
15. MASTER of TAXATION (M.T.X.)
    a. The Master of Taxation is a graduate professional degree requiring
   30 semester hours of graduate course work.
    b. A thesis is not required.
16. EDUCATIONAL SPECIALIST (Ed.S.)
    The College of Education offers the Educational Specialist degree
with a major in education and concentrations in counselor education, el-
ementary education, school administration, school psychology, second-
ary education, special education, or technology. These programs may be
completed only after the student has received the master’s degree from
Mississippi State University or another recognized institution.
    A three-hour special problem or six-hour thesis is required, upon
completion of which the student will be expected to pass an oral or written
comprehensive examination, or both.
    The Educational Specialist degree is a planned program of a mini-
mum of thirty semester hours above the master’s degree, pursued under
the direction of a major advisor. It is designed to broaden leadership train-
ing by providing courses in fields and disciplines that are supplementary
to the basic study in the major field. At least twenty-one of the hours must
be earned on the main campus or the Meridian Center.
    A student completing the degree must apply for the comprehensive
examination in the office of the major advisor with notification to the
Dean of the Graduate School.
17. DOCTOR of PHILOSOPHY
    The Doctor of Philosophy degree is offered by the:
    College of Agriculture and Life Sciences in
    *agricultural sciences (concentrations in agricultural and exten-
sion education; agronomy; animal and dairy science; animal
nutrition; engineering technology; horticulture; poultry science; weed
science)
    *food science, nutrition and health promotion (concentrations in
food science technology; nutrition)
    *human development and family studies
    *life sciences (concentrations in entomology and plant pathol-
ogy; genetics; animal physiology)
    *molecular biology
    College of Arts and Sciences in
    *biological sciences
    *chemistry
    *cognitive science
    *earth and atmospheric sciences
    *history
    *mathematical sciences
    *public policy and administration
    *sociology
    College of Business
    *business administration (concentrations in accounting; busi-
ness information systems; finance; management; marketing)
    *graduate applied economics
    College of Education in
    *college/post-secondary student counseling and personnel
services
    *community college leadership
    *counselor education/student counseling and guidance services
    *curriculum and instruction
    *educational psychology
    *elementary, middle and secondary education administration
    *instructional systems and workforce development
    Bagley College of Engineering in
    *biomedical engineering
    *computational engineering
    *computer engineering
    *computer science
    *electrical engineering
    *engineering (concentrations in aerospace; applied physics;
biological; chemical; civil; mechanical)
    *industrial engineering
    College of Forest Resources in
    *forest resources (concentrations in forest products; forestry;
wildlife and fisheries)
    College of Veterinary Medicine in
    *environmental toxicology
    *veterinary medical sciences
18. DOCTOR of EDUCATION
    The College of Education offers the Doctor of Education degree with
a major in education and concentrations in either elementary education,
technology, or secondary education.

GRADUATE COURSES

Courses numbered 8000 or higher are for graduate students only. Courses numbered 6000 and 7000 may be taken for graduate credit if approved by the Dean of the Graduate School.

BULLETIN of the GRADUATE SCHOOL

Published annually, the Bulletin contains detailed descriptions of the requirements for advanced degrees at Mississippi State University as well as academic policy and procedures administered by the Office of the Graduate School. The Bulletin is available online by visiting http://www.grad.msstate.edu/pdf/bulletin.pdf.
The Division of Academic Outreach & Continuing Education is an academic/service arm of the University and extends educational opportunities through a variety of learning options, to individuals, groups and agencies in non-traditional program formats. It provides leadership coordination and assistance in implementing lifelong learning opportunities sponsored by Mississippi State University. The central purpose of the Division of Academic Outreach & Continuing Education is to provide programs tailored to the needs of lifelong learners consistent with the overall objectives, resources and unique capabilities of the University. These programs are enhanced by a rich array of support services.

The mission of the Division of Academic Outreach & Continuing Education is to engage people in achieving their lifelong learning goals through dynamic partnerships, targeted programming, innovative technology, and quality customer service. Our vision is to be the nationally recognized leader in lifelong learning. We value exemplary customer service and employee well-being, lifelong access to knowledge, and operational excellence. We value an educational environment based on mutual understanding, success, and equality with our clients, partners, and employees.

The Division of Academic Outreach & Continuing Education is a member of the University Continuing Education Association (UCEA), Learning Resources Network (LERN), Association for Continuing Higher Education (ACHE), and NAFSA: Association of International Educators.

OFFICE OF ACADEMIC OUTREACH

Dr. Laura Crittenden, Manager
Offices: 210 Memorial Hall, (662) 325-9092

The Office of Academic Outreach is dedicated to providing quality distance learning academic courses, certifications, and programs via distance at Mississippi State University and to assist distance learners in their academic pursuits. By working closely with academic departments across campus, Academic Outreach is able to offer courses, certifications, and programs through a variety of distance learning methods at both the undergraduate and graduate levels.

Students interested in enrolling in any courses offered through the Office of Academic Outreach must first contact the appropriate Distance Learning Program Coordinator for admittance criteria. Since some of the courses are available through partnerships with other four-year institutions and community colleges, admission procedures vary.

For more information about the Office of Academic Outreach, please go to www.distance.msstate.edu.

INDEPENDENT STUDY

Dr. Laura Crittenden, Manager
Offices: 210 Memorial Hall, (662) 325-8382 (college) or (662) 325-2649 (high school)

The Online Independent Study Programs provide an educational opportunity for a diverse group of learners. Courses are designed to provide structure and content that parallels in-class and on-campus equivalents while providing flexibility of time, place, and delivery through the use of combinations of technology.

College or High School credit received upon successful completion of courses may be used for self-improvement or toward requirements leading to a diploma. All independent study courses are online. In addition, high school courses are available to both traditional and home schooled students and are governed by the Mississippi Department of Education.

The objective of the Online Independent Study Programs are to provide a positive learning experience for individuals that are self-motivated and self-disciplined and to provide evidence of a self-directed learning capability. Details are available at http://www.is.msstate.edu.

INTERNATIONAL EDUCATION

Molly Watkins, Manager
Office: 103 Memorial Hall, (662) 325-2648

The Office of International Education in the Division of Academic Outreach & Continuing Education supports international and domestic students as they strive to achieve their individual goals in the global arena. Areas within International Education include the English as a Second Language Center, the American Language & Culture Program, and the Office of Study Abroad.

The English as a Second Language Center (ESLC) offers an intensive English language program (non credit) for non-admitted students as well as English language academic support courses (credit) for admitted MSU students. The ESLC also provides teaching observations and practicums for students enrolled in the TESL Certificate program through the English Department; assists the Graduate Office in offering the international teaching assistants workshop; and is active in bringing international and cultural programming to the MSU and Starkville communities.

The American Language & Culture Program offers various other programs and services designed to promote the exchange of ideas and information with other countries, such as short-term group programs and the conversation partner program, developed to introduce international students to American college students.

For more information about programs within the Office of International Education, go to www.inted.msstate.edu.

STUDY ABROAD

Molly Watkins, Manager
Office: 103 Memorial Hall, (662) 325-2648

The Office of Study Abroad offers support to students who are planning to study abroad. Programs for students include faculty-led short term programs, programs offered through affiliate providers, and long-term individualized study abroad programs. The office also supports faculty members who are planning study abroad programs and assists with the organization, registration, and safety procedures.

For assistance and more information, contact the Study Abroad Office or visit www.studyabroad.msstate.edu.

EXTERNAL AND ADMINISTRATIVE SERVICES

Patricia Brock, Manager
Offices: 308 Memorial Hall, (662) 325-1457

The External and Administrative Services (EAS) unit provides many specialized services to assist a diverse population of individuals in fulfilling their professional and personal development needs. EAS also offers coordination support to campus departments to facilitate the delivery of conferences, workshops, short courses, camps, and events that serve the outreach mission of the University.

EAS manages the University’s Continuing Education Unit (CEU) registry service which maintains essential materials, data and mechanisms for CEU approval, record keeping, evaluation, and the CEU registry for the University.
EAS offers a variety of learning experiences for personal growth designed to serve the desires and needs of the community with instruction provided by university faculty, staff, and expert practitioners. Details are available at www.ce.msstate.edu.

**PROGRAM DEVELOPMENT**

Anthony Lowe, Manager  
Office: 314 Memorial Hall, (662) 325-5957

The Office of Program Development coordinates various external distance learning partnerships, professional trainings, new program strategic plans, and the Office of Safety and Environmental Training.

The Office of Safety and Environmental Training provides programs ranging from on-campus short courses and seminars to in-house training services that are made available to state and regional businesses, industries, governmental agencies, municipalities and defense facilities who must comply with various EPA, DOT, and OSHA regulations. This office also partners with the Mississippi Department of Environmental Quality (MDEQ) and the U.S. Environmental Protection Agency (EPA) to provide asbestos certification courses which fulfill the requirements of EPA's Model Accreditation and Certification Act. These courses are required for persons seeking licensing qualifications as asbestos professionals. In 1989, the Mississippi legislature designated MSU to be the sole asbestos training provider within the state.

**CONFERENCE CENTER**

The Division of Academic Outreach & Continuing Education is located in Memorial Hall near the center of the MSU campus. Memorial Hall is an attractive and functional setting for conference meetings. Coskrey Auditorium can accommodate up to 200 people. A variety of setup options are available. The patio space adjacent to the auditorium provides an outdoor reception area or dining area, with barbecue cooking facilities, three fountains, and lush garden landscaping. There is an adjacent conference room that will hold up to 20 people.
MSU-Meridian and Meridian Community College have a partnership whereby MSU-Meridian students may access the holdings in the L.O. Todd Library. Interlibrary loan and document delivery services are provided for students and faculty. Through an “Electronic Library Room” on MSU-Meridian, students may access many library resources and services via computer.

**Degree Programs**

Junior, senior, and graduate-level courses offered at Mississippi State-Meridian Campus enable students to fulfill requirements for Bachelor’s, Master’s, and Specialist’s degrees. They may also elect to enroll in specific classes for professional or personal growth.

**Location**

Mississippi State University-Meridian has two locations. One in downtown Meridian at 2200 Fifth Street and the other on a 25-acre campus at 1000 Highway 19 North in Meridian, Miss.

**Facilities**

Overlooking a beautiful lake, the 60,000 square-foot, two-story complex is nestled among hardwoods and loblolly pines. A 90-foot tower stands watch over the main entrance and serves as the focal point and official symbol of the Meridian Campus. The complex contains 24 classrooms and laboratories, a bookstore, academic suites, study lounges, an 800-person multi-purpose auditorium for campus and community use, and ample parking. Since it is a commuter campus which primarily serves non-traditional, working students, no dormitory facilities are available on campus. Apartments are located nearby at Meridian Community College or may be found in other Meridian locations. At the downtown location, MSU-Meridian offers theatre, conference facilities and the College of Business.

**Students**

Approximately one-half of the students who attend MSU-Meridian reside in Lauderdale County. The remainder commute from 32 other Mississippi counties and from Alabama, with a majority making their homes in the surrounding counties of Clarke, Jasper, Jones, Kemper, Leake, Neshoba, Newton, Scott, and Wayne. Advancements in course offerings, programs, and distance learning technology are expected to expand even further the scope of service.

**Distance Learning**

Two interactive video conference classrooms allow students on the Meridian and Starkville campuses, and at downlink sites elsewhere in the world, to receive instruction and interact through two-way video and audio distance technologies. This greatly improves MSU-Meridian’s ability to expand the scope of its service and still maintain courses of the highest quality.

The development of Web-based (direct-to-desktop) delivery systems is also being utilized to facilitate the delivery of asynchronous and synchronous real-time audio and video through computer-based technologies and the Internet.

**Library Facilities**

Meridian students are authorized to use the Mitchell Memorial Library in person, or may access it and other university resources through the MSU Web site.
The Division of Arts and Sciences offers five degree programs: the Bachelor of Science in Interdisciplinary Studies (BSIS), General Liberal Arts (GLA), History, Psychology, and the Bachelor of Social Work (BSW). Also available are a minor in Gender Studies and a Gerontology Certificate that may be added to any degree.

Bachelor of Science in Interdisciplinary Studies (BSIS)
Advisor: Dr. Jarod Fogarty
Office: 083

The Bachelor of Science in Interdisciplinary Studies is a university-wide degree coordinated through the Office of Academic Affairs by the Interdisciplinary Studies Committee. This multi-discipline academic program is appropriate for students motivated by specific interests not recognized in traditional majors and is not intended to compete with existing programs. All University requirements, including 32 hours of upper division course work and a year’s residence, must be met for graduation.

To insure coherence in the program, the student must construct and explain in writing the rationale for the interdisciplinary studies program’s direct relationship to the student’s personal and career goals. Such a program of study must assure depth of study as well as breadth. Therefore, it must insure that students take at least 36 upper-division hours in the areas they have chosen for emphasis and that they select a minimum of 12 hours in each of three areas or 18 hours in two. Emphasis areas must be selected from at least two colleges. General education requirements (45 hours) must be met in addition to a general studies core of 15 hours. A total of 122 semester hours is required for graduation, along with an MSU and cumulative GPA of 2.0.

To insure coherence in the program, the student must construct and explain in writing the rationale for the interdisciplinary studies program’s direct relationship to the student’s personal and career goals. Each student will be required to find advisors in the academic disciplines who will agree to sponsor the student in drawing up the proposed curriculum, formulating the rationale, and presenting the case in writing to the Interdisciplinary Studies Committee. This should be done prior to the senior year.

If approved, the student may proceed with the curriculum. The committee will meet during the fall, spring and summer semesters, and students must make written application by September 15 or February 1. Application for a degree must be submitted to the Office of the Registrar. For further information, contact Dr. James Kelley, Office 088 of the MSU-Meridian Campus.

History Program

Advisor: Dr. Toby Bates
Office: 091

To earn a Bachelor of Arts degree with a major in history, a student must pass a minimum of 39 semester hours in history with a 2.50 average in those courses. All undergraduates majoring in history must complete two of the following basic sequences: HI 1063/1073; HI 1163/1173; HI 1213/1223; HI 1313/1323. Along with these basic sequences, students who began the major prior to Fall 2008 are required to take a minimum of two upper division courses in United States history, two upper division courses in European history, two upper division courses in African, Asian, Ancient, or Latin American history, plus two upper division electives in any area of history. Students who began the major after Summer 2008 are required to take a minimum of to upper division courses from Category I, two upper division courses from Category II, two upper division courses from Category III, plus two upper division courses from any Category.

MSU-Starkville faculty members may offer classes at Meridian. Adjunct professors teach regularly in the program. They are:

- Alisha Gray Marlow, Ph.D., University of Southern Mississippi. Psychologist, Weems Mental Health Center, Meridian.
- James L. Shumate, Ph.D., University of Southern California. Psychologist, East Mississippi State Hospital, Meridian.
- Stephanie Cooper, Ph.D., Mississippi State Univ. Private Practice.
- Michelle D. Boucher, Ph.D., University of Southern Mississippi. Psychologist, Weems Mental Health Center, Meridian.

Required Curriculum
Undergraduate students wishing to major in psychology must have a minimum 2.0 grade point average on all college work attempted prior to entering the major. The Bachelor of Arts degree program in psychology is designated to provide training for advanced study in psychology or related fields. Advanced study is recommended for students desiring a career in psychology. Psychology majors must earn a C or better in all required psychology courses.

Social Work Program

Program Director: Sandra Vaughn, MSW, ACSW, LCSW
Office: 076

The Social Work Program at Mississippi State University-Meridian Campus accreditation by the Council on Social Work Education was reaffirmed until 2013. The profession of social work recognizes the Bachelor of Social Work (BSW) degree as the first practice degree. The BSW graduate is prepared to work as a generalist social work practitioner in a variety of practice settings such as child welfare service agencies, nursing homes, medical hospitals, mental health hospitals/clinics, public health clinics, industries, juvenile and family courts, shelters for battered women and children, neighborhood and community services.

The social work program integrates a liberal arts perspective into the social work curriculum. This liberal arts perspective enhances the person-in-environment focus of generalist social work practice. Mississippi State University-Meridian Campus, an Upper Division University, offers courses equivalent to the third and fourth years. The social work program does accept course credit through transfer (up to 66 hours) from other accredited universities and colleges. The applicant must complete the sixty-four (64) semester hours of university/college work indicated in the shaded area below before applying for admission to Mississippi State University-Meridian Campus Social Work Program. The Program Director reviews all course credit transfer hours.

Although students may enroll in social work as their major, there is a formal admission process into the social work program. Criteria for admission into the program include:

1. Cumulative GPA of 2.0
2. The following liberal arts requirements must be completed:
   - English Composition I and II
   - College Algebra
   - Introduction to Sociology
   - American Government
   - General Psychology
   - Anatomy & Physiology
   - Principles of Macroeconomics
   - Fund. of Public Speaking
   - Basic Computer Concepts & Applications
   - Social Work with At-Risk Populations
3. Completion of the following social work courses with a minimum grade of B
   - SW 3003 Social Work with At-Risk Populations
   - SW 2313 Introduction to Social Work (including 20 hours of volunteer experience)
   - SW 2303 Social Welfare Policy I
   - SW 3013 Human Behavior in the Social Environment I
4. Completion of Application for Admission to the Social Work Program
5. Students must provide three reference letters on provided forms
6. Students must complete a personal interview with social work admissions committee
7. Students must be admitted to the Social Work Program before enrolling in further social work courses.
   Additional courses, as noted in the application for admission form, must be completed prior to petition for admission to the major.

Before enrolling in any social work classes, it is the responsibility of the student to consult with their social work advisor regarding prerequisites for social work classes. The criteria for remaining in the program and entering field practicum include:

1. Maintain an overall GPA of 2.0, with a 3.0 GPA or better for all social work courses
2. Continue to demonstrate an aptitude for a social work career
3. Adhere to all academic expectations of the university and the social work program
4. Adhere to the National Assoc. of Social Workers Code of Ethics

Humanities (6 hours)
- 3 hours Literature – see General Education courses
- 3 hours History – see General Education courses

Philosophy (3 hours)
- PHI 1103 Introduction to Philosophy OR PHI 1113 Introduction to Logic

Humanities Elective (9 hours)*
- 3 hours Literature Elective
- 3 hours History Elective
- 3 hours Humanities Elective

Mathematics (6 hours)
- MA 1313 College Algebra
- ST 2113 Introduction to Statistics

Fine Arts (3 hours)
- See Arts & Sciences Core List

Natural Sciences (9-12 hours)
- BIO 1004 Anatomy and Physiology
  - 3-4 hours Physical Sciences w/lab (CH, GG, PH) **
  - 3-4 hours Natural Science Elective *

Social Sciences (6 hours)
- SO 1003 Intro to Sociology
- PS 1113 American Government

Social Sciences Electives (12 hours)
- Required:
  - PSY 1013 General Psychology
  - EC 2113 Prin of Macroeconomics
  - AN 1103 Intro to Anthropology OR AN 1143 Intro to Cultural Anthropology

Major Core

Social Work curriculum is completed as sequenced.

SW 2313 Intro SW/Soc Welfare
SW 2303 Social Welfare Policy I
SW 3003 Populations at Risk *
SW 3013 Human Behav & Social Envir. I

Students must successfully complete a formal admissions process before taking the following courses:

SW 2323 Social Welfare Policy II***
SW 3023 Human Behav & Social Envir. II***
SW 3213 Research Methods in Social Work ***
SW 4613 Child Welfare Services
SW 3513 Social Work Practice I***
SW 3523 Social Work Practice II***
SW 3533 Social Work w/ Comm & Organizations***
3 hours Social Work Elective

Oral Communication Requirement
- CO 1003 Fundamentals of Public Speaking

Writing Requirement
- SW 4713 Senior Seminar***

Computer Literacy
- Consult Advisor

General Electives
- Consult Advisor

Field Work includes full-time placement for one semester in a supervised agency setting.

SW 4916 SW Field Practicum and Seminar I***
SW 4926 SW Field Practicum and Seminar II***

Total hours needed for major: 124

32 hours of course work must be A&S 3000/4000
* Consult Advisor.
** See General Education courses.
*** Course has prerequisite. Please check course description in back of catalog or consult advisor.
Gender Studies Minor

Advisor: Dr. Carly Friedman
Office: 089

Gender Studies is an interdisciplinary field that examines the complex interaction of gender with race, class, sexuality and nationality. Undergraduate students would receive a Gender Studies minor by completing 18 credits of course work from a variety of fields distributed as follows; only nine credits from any one department may count toward the minor.

Required Course: SO/AN/GS 1173 Introduction to Gender Studies

Additional core courses (6 hours)
- COE 4743 Gender Issues in Counseling
- EN/GS 3513 Women and Literature
- HI 4273 Women in American History
- PHI 4313 Feminist Interpretation of Western Social & Political Philosophy
- PS 3033 Gender and Politics
- PSY 3203 Psychology of Gender Differences
- SO 4403 Sociology of Gender
- SO/COR 3343 Gender, Crime and Justice

Electives (9 hours)

See Gender Studies Advisor for list of approved electives.

Gerontology Concentration Program

Advisor Dr. Marian Swindell
Office: 078

On the Meridian campus the gerontology concentration is offered in cooperation with the School of Human Science which provides key courses by distance learning. The Arts and Sciences Division provides courses in psychology, sociology, and social work at Meridian. The Education Division provides community counseling courses. Administration of the certificate is through the Council on Gerontology on the Starkville campus. The concentration in gerontology is open to all students within the university. It is intended to be added to any degree to signify that a student has combined factual and theoretical knowledge with practicum experience. This area of study is open to students from all colleges within the University.

The Gerontology Certificate was developed to supplement the student’s chosen major. Undergraduate students wishing to complete the Gerontology requirements will select a major in addition to elective 15 hours of gerontology course work. Graduate students are required to complete two readings or independent study course in addition to the 15 hours of gerontology course work.

Undergraduate Certificate Requirements: (minimum 15 hours)
Select three of the following:
- HS 4403 Intro to Gerontology
- ABE 4513 Dynamics of Aging
- PSY 4983 Psychology of Aging
- HS 4863 Consumer Aspects of Aging
- SO 4413 Aging and Retirement in American Society
- SW 4623 Social Work with the Aged

Select at least two of the following: (may include courses from above list):
- COE 4713 Issues in Aging
- SW 2323 Social Welfare Policy
- HS 3673 Environments for Special Needs
- HS 4243 Nutrition Throughout the Life Cycle
- HS 4813 Adult Development
- HS 4333 Families, Legislation, and Public Policy

Graduate Certificate Requirements (minimum 18 hours):
Select three of the following:
- ABE 6513 Dynamics of Aging
- PSY 6983 Psychology of Aging
- SO 6413 Aging & Retirement in American Society
- HS 6863 Consumer Aspects of Aging
- PE 8153 Wellness and Aging

Take at least two of the following (may include courses from above list):
- HS 6813 Adult Development
- HS 6243 Nutrition Throughout the Life Cycle
- HS 8243 Community Nutrition
- HS 6333 Families, Legislation, and Public Policy
- COE 8813 Counseling the Elderly
- COE 6713 Issues in Aging
- PSY 8313 Developmental Psychology

Required: Independent study/readings course (3 hours)

DIVISION of BUSINESS

Interim Associate Dean Seungjae Shin
Assistant Professors Kevin Ennis, William Hill, Doug McWilliams, Natasha Randle, Paul Spurlin, and Carlton Young; Lecturer Harold White; Academic Advisor Regena Clark

The mission of the College of Business is to develop knowledge and critical skills in students, and to foster economic and professional development through teaching, research, and service. It is accredited by AACSB.

BACHELOR of BUSINESS ADMINISTRATION

(Concentrations in Accounting, Business Administration, Healthcare Administration, Information Systems, Management, Marketing, Resort and Convention, or Technology Management)

Lower Division - Lower division hours must be completed at another educational institution.

English - 6 hours
- EN 1103 English Composition
- EN 1113 English Composition

Humanities - 6 hours
- 3 hours Humanities Elective
- 3 hours Humanities Elective

Fine Arts - 3 hours Choose one of the following:
- Art Appreciation
- Music Appreciation

Mathematics - 9 hours
- MA 1313 College Algebra
- MA 1613 Calculus for Business
- BQA 2113 Intro to Business Statistical Methods

Science - 6 hours
- BIO, GG, CH, or PH (with laboratory)

Behavioral Science - 3 hours (Choose one)
- Introduction to Psychology
- Introduction to Sociology
- Introduction to Anthropology

Additional Required Lower Division Courses
- PS 1113 American Government
- CO 1003 Fundamentals of Public Speaking
- ACC 2013 Principles of Financial Accounting
- ACC 2023 Principles of Managerial Accounting
- BL 2413 The Legal Environment of Business
- EC 2113 Principles of Macroeconomics
- EC 2123 Principles of Microeconomics
- 7 hours Electives

Total lower division hours 61

Upper Division
- BIS 3233 Intro to Mgt Info Systems
- BIS 3713 Electronic Information Systems
- BQA 3123 Business Statistical Methods II
- FIN 3113 Financial Systems
- FIN 3123 Financial Management
- MGT 3114 Principles of Management & Production
- MGT 3213 Organizational Communications I
- MKT 3013 Principles of Marketing
GB 4853 Business Policy (Senior course)  
3 hours International Elective  
Major Electives*  
General Electives**  

Total hours needed for degree: 124  

* Major elective hours by major: Accounting (24), Business Administration (24), Healthcare Administration (18), Information Systems (30), Management (18), Marketing (21), and Technology Management (24).  

** Choose enough general electives to bring the total number of hours to 124.

DIVISION of EDUCATION  

Dr. Sallie Harper, Interim Associate Dean  
Associate Professors Julie Porter, Joshua Watson and Darren Wozny  
Assistant Professors Matthew Boggan, Janet McCarra, Lindon Ratliff, Kimberly Triplett, and Penny Wallin; Lecturer Tory Shirley  

The Division of Education in Meridian offers degree programs in areas previously listed. Education programs offered at the Meridian Campus parallel those offered through the College of Education in Starkville. Specific degree program requirements may be obtained by referencing the College of Education section in this Bulletin.  

Degree requirements may be found by referencing the corresponding degree program located within this general bulletin.
The Reserve Officers’ Training Corps is under the administrative and academic supervision of the College of Arts and Sciences. Army ROTC (Military Science) courses are indicated by the prefix MS; Air Force ROTC (Aerospace Studies) courses are indicated by the prefix AS. All ROTC courses are bona fide University courses. The total number of ROTC hours allowed as elective credit toward a specific degree varies. Most schools and colleges at the University accept six (6) or more hours of ROTC courses offered toward degrees conferred. The advanced ROTC courses are options for meeting social/behavioral science core requirements. A student should contact the appropriate college, school, or department to determine allowable ROTC course credit toward a particular degree.

PURPOSES and OBJECTIVES

The general objective of the Reserve Officers’ Training Corps is to develop in each student: (1) a basic understanding of associated professional knowledge necessary to be an officer in the U.S. Armed Forces; (2) a strong sense of personal integrity, individual responsibility and honor; and, (3) an appreciation of the requirements of national security.

The Army ROTC Basic Course is designed to give the first and second year ROTC student an introduction to the Army and its career opportunities without incurring any obligation on the part of the student. The Advanced Course (third and fourth years) stresses the military skills and knowledge, and interpersonal skills required of commissioned officers of the Active Army, Army Reserve, or Army National Guard.

The Air Force ROTC General Military Course (GMC) is a two-year course normally taken during the freshman and sophomore years. The course covers two main themes - the development of air power and the contemporary Air Force in the context of military organization. A student can enroll in the GMC without military obligation (unless on an AFROTC Scholarship). The Professional Officer Course (POC) is a two-year course of instruction, normally taken during the junior and senior years. The curriculum covers Air Force leadership and management and American Defense Policy. A minor in Aerospace Studies is available to students completing the specified requirements in Air Force ROTC.

Army Program

Army Program. The Basic and Advanced Courses consist of 4 semesters each as shown below. See the “Description of Courses” section of this catalog for further information.

Basic Courses (2 hours each)
- MS 1112 Leader Development 1
- MS 1122 Leader Development 2
- MS 2113 Leader Development 3
- MS 2123 Leader Development 4

Total of 10 hours

Advanced Courses (3 hours each)
- MS 3113 Advanced Military Skills I
- MS 3123 Advanced Military Skills II
- MS 4114 Leader’s Responsibilities
- MS 4124 Professional Development of the Leader

Total of 14 hours

Professional Military Education (PME). In addition to the above, each cadet must complete, as a minimum, one university approved course in each of the following subject areas: Written Communication Skills, Human Behavior, Military History (HI 4233), Computer Literacy, and Math Reasoning. The PME requirement is normally achieved by the cadet as part of a normal course of study. Students should coordinate with a Military Science instructor to determine a course of action to complete the PME requirement.

Entrance into the Advanced Course is on a selective and competitive basis. The primary requirements for entry into the advanced program are satisfactory completion of the basic course or equivalent, good academic standing, demonstrated leadership ability, an approved physical examination and completion of 60 semester hours of college credit.

Two-Year Program. Equivalent credit for the basic course may be obtained by students with 54 semester hours of college credit or more for direct enrollment in the advanced course, based on any one of the following:

(a) Satisfactory completion of the five weeks Basic Summer Camp. This basic summer camp is primarily intended for students who could not obtain the basic ROTC course during the freshman and sophomore years.

(b) At least 180 days of honorable service or active duty for training with the U.S. Armed Forces or Coast Guard.

(c) Substitute credit, which in varying amounts may be derived from attendance at service academies, junior ROTC courses, and National Defense Cadet Corps training.

(d) Successful completion of Basic Combat Training with the Army Reserve or the National Guard. Interested students should consult the PMS during their first sophomore semester but not later than their junior year. Graduate students should apply prior to starting graduate work.

Simultaneous Membership program (SMP). Students who are members of a National Guard or Army Reserve unit may qualify for direct entry into the Army ROTC Advanced Course. Consult the PMS for additional information concerning the financial benefits of this program.

Summer Training

MS 2256 Leadership Training Course

The Army Leader’s Training Course can be used by students desiring to enter the Advanced Course who are not eligible for advanced placement under any other process (e.g. Basic Course, veteran, four years of junior ROTC, completion of Basic Training, etc). The course is five weeks long and incurs no military obligation for attendance. The course is a substitute for the two year Basic Course. Students attending may compete for Army scholarships.

MS 3376 Advanced Leadership Course

The five-week Army Advanced Camp is required of all students enrolled in the Advanced Course and is normally attended between the junior and senior year.

Uniforms and Equipment

Uniforms and textbooks are issued without cost to students. However, all equipment and textbooks must be returned to the ROTC Department upon departure of the student, and any such article lost or damaged other than by fair wear and tear, must be paid for by the students. Each student enrolled in ROTC is responsible for the maintenance of his/her uniform. Students who fail to clear their accounts before leaving the institution will have their university records placed on hold.

Pay and Allowances

On Campus. Each student enrolled in the Army Advanced Course is paid a monthly subsistence allowance by the Federal Government of $450.00 per month for juniors and $500.00 per month for seniors.

Summer Training. While at the Leadership Training Course, the student receives pay at the rate of $26.42 per day (approximately $792.60
Students attending the Leadership Development Assess-
ment Course also receive pay at a rate of $28.19 per day (approximately
$845.70 per month) less applicable taxes.

**Army ROTC Scholarship Program**

The Army awards ROTC scholarships to outstanding students each academic year. Army ROTC scholarships are for periods of two, three, or four years. They pay tuition, fees, books, and laboratory expenses incurred by the cadet and provide up to $500 per month subsistence allowance to the cadet for the duration of the scholarship (except during the summer). Additionally, 4-year Scholarship Winners and 3-year Designees that attend MSU may receive up to $2000 per room and board. The amount of the award depends on the number of scholarship winners and designees that attend MSU. All contracted cadets can compete for a scholarship. Both men and women are eligible to apply for these scholarships.

High school students should consult their guidance counselors early in September or October of their senior year to apply for the four year scholarship. College sophomores with a 2.5 GPA and greater who otherwise qualify may be eligible for a 2-year scholarship.

**Obligations**

Accepting a commission as a 2nd Lieutenant in the U.S. Army incurs a service obligation of eight years. This period may be served in a variety of ways to include: Active Duty, Reserves, National Guard, Individual Ready Reserve or a combination of these.

**AIR FORCE PROGRAM**

Air Force Course Program. The General Military Course (GMC) and the Professional Officer Course (POC) consist of four semesters as shown below. See the “Description of Courses” section of this catalog for further information. Each course has a mandatory laboratory.

General Military Courses (GMC) 2 hours each
- AS 1012 Foundations of USAF I, fall semester
- AS 1022 Foundations of USAF II, spring semester
- AS 2012 Air and Space Power I, fall semester
- AS 2022 Air and Space Power II, spring semester

**Total of 8 hours**

Professional Officer Course (POC) 3 hours each
- AS 3013 AF Leadership Studies I, fall semester
- AS 3023 AF Leadership Studies II, spring semester
- AS 4013 Nat. Security Affairs and Prep for Active Duty I
- AS 4023 Nat. Security Affairs and Prep for Active Duty II

**Total of 12 hours**

Requirements for commissioning as a USAF Second Lieutenant include completion of a degree according to the university’s rules and regulations, completion of the Professional Officer Course, completion of AFROTC Field Training (normally during the summer between the sophomore and junior years), and approval of the Professor of Aerospace Studies. Officer candidates must be between 18 and 31 years of age for commissioning.

**Entrance Requirements**

GMC: To enter the GMC, a student must be full-time, be a U.S. citizen, be in good physical condition, and be of good moral character.

POC: In addition to the GMC requirements, POC cadets must have passed the AFROTC Physical Fitness Test. They must be selected by a board of USAF Officers, and have completed a five-week field training encampment.

While Aerospace Studies courses are designed to prepare eligible students for commissioning as Second Lieutenants in the USAF, the AS academic courses are open to all interested students, even those who do not meet GMC or POC entry requirements. There is no armed forces service obligation for joining the GMC. AFROTC detachment personnel will explain any commitments associated with POC entry of AFROTC scholarships.

**Field Training** AFROTC cadets who have completed the GMC course work and meet other requirements for POC entry will normally attend the four-week USAF field training encampment between their sophomore and junior years. Field Training is a mentally and physically demanding period of concentrated USAF training.

**Uniforms and Equipment:** AFROTC issues uniforms and textbooks without cost to students. However, all equipment and textbooks remain property of AFROTC and must be returned before departure. Each student is responsible for the maintenance of his/her uniform.

**Pay and Allowances:** Each student enrolled in the POC is paid a monthly subsistence allowance of at least $450 while enrolled in the POC (maximum of 600 days). While at Field Training, students are paid at a rate of approximately $20 per day.

**IN-COLLEGE SCHOLARSHIP PROGRAM**

Full-time students are eligible to apply for Air Force ROTC three- or two-year scholarships. The majority of scholarships pay full college tuition, laboratory and incidental fees, book costs, plus at least $350 per month, depending on academic year. Applicants are selected on the basis of college grade point average, ACT scores, and a recommendation from the Professor of Aerospace Studies. Final selection is made by a Central AFROTC selection board which considers qualified applicants nationwide. There is no maximum number of scholarships for any one school. Students who are not presently taking AFROTC courses may still apply for the in-college scholarships.

Inquiries about AFROTC scholarships may be made directly to the Admissions Officer, AFROTC Detachment 425, Box AF, Mississippi State, MS 39762.

**Active Duty Obligations:** Individuals who complete the AFROTC program and are commissioned a Second Lieutenant incur an active duty service commitment of four years.

**ROTC EXTRACURRICULAR ACTIVITIES**

**Cadet Military Societies.** Chapters of the Scabbard and Blade (Army and Air Force), Arnold Air Society (Air Force), and the Society of American Military Engineers (Army and Air Force) are chartered by appropriate national organizations. Selected Basic cadets with scholarships and Advanced cadets are eligible for membership in the Scabbard and Blade, and the Arnold Air Society, while the Society of American Military Engineers is open to all ROTC cadets and engineering students.

**Drill Teams.** The Blue Knights is a precision military drill team, composed of selected cadets from Air Force ROTC. The drill team participates in university and community events, as well as in state-wide competitions.

**Lee’s Rangers.** The Army ROTC Lee’s Rangers is made up of selected volunteers from the Army. This unit participates in extra training in small unit tactics and leadership under simulated combat conditions. Emphasis is placed on maintaining a high level of physical conditioning and developing self-confidence. Participants must be enrolled in Army ROTC. The Lee Ranger Company sponsors the ranger challenge team.

**Army “Blades”.** The “Blades” were established in March 1969 to formalize the women’s auxiliary of the Army ROTC Cadet Corps. These outstanding coeds serve the University and Cadet Corps as hostesses at social functions and in other ways to promote citizenship and interest in the Army ROTC program. They also undertake various service projects.

**Silver Wings.** Silver Wings is a nationwide honorary organization of college students dedicated to the interests of the United States Air Force and Air Force ROTC. Silver Wings evolved from the previously all-female auxiliary of the cadet corps, Angel Flight. Silver Wings exists to further the cause of the United States Air Force by promoting the interest of college men and women in the Air Force ROTC program. Members of Silver Wings are considered associated members of Arnold Air Society. Participation in worthwhile projects such as the Red Cross blood drives and orphanage parties, as well as hosting at Air Force ROTC functions makes these students an outstanding asset to the campus.

**Bulldog Battery.** The Army ROTC’s Bulldog Battery exists to support military ceremonies and athletic events.

**Color Guard.** Both the Air Force and Army Programs have Color Guards. The cadets present the Colors at home football and SEC home basketball games. They also participate in various community events.

COURSE NUMBERING SYSTEM

Courses are listed alphabetically by course symbol. Each department entry contains a list of faculty members, including designation of the department head, and a description of the courses.

System of Course Numbers

All course numbers consist of four digits, of which the first (left) digit indicates the level of preparation required and the fourth (right) digit indicates the number of semester hours. The two middle digits are reserved for the departments to distinguish one course from another. A fourth digit of zero (0) means that credit is variable to be fixed in consultation with the professor: example, ACC 4000, Directed Individual Study.

Courses that are in close sequence, such as two semesters of a survey course or a sequence of numbers for a seminar in a particular field may be listed with a hyphen (-) between the two four digit numbers: example, PSS 4711-4731. Seminar.

Where the same course is offered on both undergraduate and graduate levels, two numbers are used to designate the two levels of credit; example, HI 4703/6703. England to 1485. Students enrolled for graduate credit will be required to complete assignments above and beyond those students enrolled for undergraduate credit.

Special Courses

While not listed under every subject, the following special courses are available under each subject prefix, and the course description is the same for each.

2990. Special Topics in (Subject). (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

4000. Directed Individual Study. Hours and credits to be arranged. 4990/6990. Special Topics in (Subject). (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

7000. Directed Individual Study. Hours and credits to be arranged.

8000. Thesis Research/Thesis. Hours and credits to be arranged.

8990. Special Topics in (Subject). (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

Course Descriptions in Alphabetical Order by Course Symbol

AFRICAN AMERICAN STUDIES

AAS 1063. Introduction to African American Studies. (3) Three hours lecture. An interdisciplinary examination of African-American history and culture, including the Diaspora, literature, music, reform movements, and black liberation in the U.S.

AAS 1103. African American Music. (3) Three hours lecture. A study of African musical and cultural traditions with focus on the impact of these traditions on the development and advancement of African American Music. (Same as MU 1103).

AAS 2203. Cultural and Racial Minorities. (3) (Prerequisite: Three hours in an introductory social science). Three hours lecture. Origins of minority groups and racial attitudes. Biological and cultural concepts of race and minority groups. Problems of adjustment in interracial and multi-ethnic societies. (Same as AN 2203 and SO 2203).

AAS 3013. African American History to 1865. (3). Three hours lecture. An historical examination of the life and culture of African Americans in the United States from European colonization to the end of the Civil War. (Same as HI 3013).

AAS 3023. African American History since 1865. (3). Three hours lecture. An historical examination of the life and culture of African Americans in the United States from the beginning of Reconstruction to the present. (Same as HI 3023).

AAS 3153. African Art and Culture. (3) (Prerequisite: AN 1103 or consent of instructor). Three hours lecture. An examination of the role of traditional art in the beliefs and customs of representative African cultures. (Same as AN 3153 and ART 3153).

AAS 4093. The African Diaspora. (3) Three hours lecture. An interdisciplinary and comparative analysis of the dispersal of Africans throughout the world by examining the cultural, philosophical, literary, and historical development of the Diaspora.

AAS 4273. African American Politics. (3) (Prerequisite: PS 1113). Three hours lecture. The nature, processes, structures, and functions of African American politics in the domestic arena and international arena. (Same as PS 4273).

AAS 4343. African American Literature. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. A study of African American literature, especially that of the Twentieth Century. (Same as EN 4343).

AAS 4363. African-American History and Culture. (3) (Prerequisite: Completion of any 1000 level history course). African-Americans from their African origins to the present, emphasizing black-white relations in the making of America. (Same as HI 4363).

AAS 4373. History of Modern Civil Rights Movement. (3) (Prerequisite: Completion of any 1000 level history course). Three hours lecture. A history of the Black struggle for equality in the United States between 1930 and 1970. (Same as HI 4373).

AAS 4383. African American Leadership in the Twentieth Century. (3) An interdisciplinary course that examines the evolution and sociopolitical impact of African American leadership during the late nineteenth and twentieth centuries.

AAS 4543. African Politics. (3) (Prerequisites: PS 1513 and junior standing). Three hours lecture. Contemporary sub-Saharan Black Africa; prospects for political development or decay. Role of parties, bureaucracy and military and their related role in elite formation and political integration. (Same as PS 4543).

AAS 4783. African Civilization to 1880. (3) (Prerequisite: Completion of any 1000-level history course or consent of instructor). Three hours lecture. This is a survey course which traces the major developments in Africa to 1880. (Same as HI 4783).

AAS 4793. Modern Africa. (3) (Prerequisite: Completion of any 1000-level history course or consent of instructor). Three hours lecture. This course traces Africa’s history from 1880 to the present. It discusses how Africa lost and regained its sovereignty and the dilemma of independence. (Same as HI 4793).

AAS 4983. African Americans and the Law. (3). Three hours lecture. An analysis of the legal and constitutional history of African Americans from the codification of slavery and discrimination in the North to the rise of segregation. (Same as HI 4983).

AAS 8603. Racism and the Color Line. (3) (Prerequisite: graduate standing and enrollment in the Diversity Certificate program). Three hours lecture. An analysis of race relations and racial inequality in the United States. Designed for online Diversity Certificate program students. (Same as HI 8603).

AAS 8793. Race and Cultural Diversity in the Workplace. (3) (Prerequisite: graduate standing and enrollment in the Diversity Certificate program). Three hours lecture. An analysis of concepts, issues, and laws relating to race and cultural diversity in public and private organizations. Designed for online Diversity Certificate program students. (Same as HI 8793)

Department of AGRICULTURAL and BIOLOGICAL ENGINEERING

Office: 100 Agricultural and Biological Engineering Center

Professors Cathcart, Pote, and Smith;
Associate Professors Elder and To;
Assistant Professor Fernando and Warnock

Biological Engineering

ABE 1911. Engineering in the Life Sciences. (1) (Open to freshmen and sophomores or first-semester transfer students only). One hour lecture. Introduction to agricultural and biological engineering; survey of the engineering profes-
ABE 1823. Building Construction. (3) Three hours lecture. An introduction to building terms, construction methods, and mechanical systems. Principles of steady state and unsteady state energy and mass transfer as applied to biological engineering.

ABE 3413. Bioinstrumentation I. (3) (Prerequisite: PH 2223 or consent of instructor). Two hours lecture. Two hours laboratory. Applied circuit analysis, electrodes and transducers, stress and strain, temperature measurements, human physiology, digital and programmable instrumentation.

ABE 3813. Biophysical Principles of Materials. (3) (Prerequisite: PH 2213). Two hours lecture. Two hours laboratory. Physical properties of biological products and materials. Primary emphasis on measurement and evaluation of dimensional, mechanical, rheological, transport, thermal, electrical, and optical properties.

ABE 4111/6111. Biological Engineering Principles Laboratory. (1) (Co-requisite: ABE 4812). Three hours laboratory. The theory and practice of applying engineering principles and approaches for solving problems in the design of biological systems. The student develops a design for a project in biological engineering.

ABE 4313. Biological Treatment of Nonpoint Source Pollutants. (3) Three hours lecture. Fundamental principles and design of biologically based treatment systems used to remove pollutants and protect receiving waters from agricultural and urban/suburban storm water runoff.

ABE 4323. Physiological Systems in Biomedical Engineering. (3) (Prerequisites: BIO 1504 or equivalent; EM 3313 or equivalent; ABE 3813; ABE 4803 or equivalent). Three hours lecture. Mathematical description and modeling of the behavior of physiological systems significant to biomedical engineers.

ABE 4423/6423. Bioinstrumentation II. (3) (Prerequisite: ABE 3413 or graduate standing). Two hours lecture. Two hours laboratory. Theory; application of automated measuring and control systems in biological sciences. Includes design/use of transducer interfaces; electronic signal conditioning; data logging; microprocessor based systems.

ABE 4483/6483. Introduction to Remote Sensing Technologies. (3) (Prerequisite: Senior standing or consent of instructor). Three hours lecture. Electromagnetic interactions, passive sensors, multispectral and hyperspectral optical sensors, active sensors, imaging radar, SAR Lidar, digital image processing, natural resource applications. (Same as ECE 4423/6423 and PSS 4483/6483).

ABE 4513/6513. Dynamics of Aging. (3) (Prerequisite: BIO 1123 or BIO 1504 or consent of instructor). A broad based systematic, quantitatively oriented introduction to the dynamics of aging. Systems physiology of aging in relation to biomedical engineering.

ABE 4523/6523. Biomedical Materials. (3) (Prerequisites: One of the following: ABE 3813 or CHE 3413 or ME 3403). Three hours lecture. Emphasis is on applications, composition, testing, and biocompatibility of biomedical materials used in implant devices. This course may be used for honors credit.

ABE 4533/6533. Rehabilitation Engineering (3) (Prerequisites: Senior standing in College of Engineering). Three hours lecture. An introduction to rehabilitation engineering emphasizing applications of technology in prosthetics; orthotics, mobility, and sensory augmentation. This course may be used for honors credit.

ABE 4624/6624. Experimental Methods in Materials Research. (4) (Prerequisites: CHE 3413 or ABE 3813 or ME 3403 or consent of instructor). Three hours lecture. Three hours laboratory. Introduction to research methodologies commonly used in the evaluation of treatments, and mechanical testing. (Same as CHE 4624/6624 and MGE 4624/6624).

ABE 4723/6723. Tissue Engineering and Regeneration. (3). (Prerequisite: ABE 3813). Three hours lecture. A comprehensive course covering the fundamental concepts, multidisciplinary approaches, and clinical applications of tissue engineering/regeneration.

ABE 4813. Principles of Engineering Design. (3). (Prerequisite: senior standing in engineering) Two hours lecture. Two hours laboratory. First semester of the senior capstone design sequence. Students learn the fundamentals of the design process, select a design project, and complete a preliminary design.

ABE 4833. Practices of Engineering Design. (3). (Prerequisite: ABE 4813). One hour lecture. Two hours laboratory. Second semester of the senior design sequence. Students continue learning about engineering design as they complete, construct, and test the design begun in ABE 4813.

ABE 4844/6844. Sustainable Communities. (4) Three hours lecture. Two hours laboratory/studio. Theory and practices that minimize resource use and pollutant production in the human landscape (Same as LA 4844/6844).

ABE 4911. Engineering Seminar. (1) (Prerequisite: Consent of instructor). One hour lecture. Discussion of current engineering developments, professional developments, ethics and their relation to agriculture and the life sciences.

ABE 8314. Corrosion of Biomedical Implants. (4) (Prerequisite: Graduate standing). Three hours lecture & three hours laboratory. Basic concepts of electronics, especially related to corrosion. Development of corrosion mechanisms and evaluation of corrosion susceptibility of implant metals/alloys in dentistry and orthopedics.

ABE 8501-8511. Journal Reviews in Biomedical Engineering. (1) One hour lecture. Current Journal articles relevant to Biomedical Engineering topics are selected and reviewed.

ABE 8723. Cellular and Tissue Biomechanics. (3) Three hours lecture. Fundamental concepts, experimental and theoretical approaches of biomechanics and their applications in modern biomedical engineering (e.g. mechanotransduction, tissue/engineering/regeneration, surgical intervention.)

ABE 8801. Clinical Experience for Biomedical Engineering. (1) (Prerequisites: Graduate standing in the Biomedical Program and permission of the instructor.) Three hours experiential learning. This course will provide graduate students with exposure, understanding and insight into the clinical environment and/or treatment modalities of clinical (human or animal) patients.

ABE 8001. Biomedical and Clinical Engineering Seminar. (1) Discussion of research needs, review of literature, and development of research work plans.

Agricultural Engineering Technology and Business

ABE 1073. Agricultural Mechanics. (3) One hour lecture. Four hours laboratory. Developing skills in hot and cold metal work; welding, carpentry practices, painting and finishing wood, concrete and concrete masonry; and basic electric wiring.

ABE 1863. Engineering Technology in Agriculture. (3) Three hours lecture. Introductory course emphasizing use of fundamentals for solving problems related to soil and water management, electrical power and control, agricultural machinery, and environmental control.

ABE 2173. Internal Combustion Engine Technology. (3) Two hours lecture. Three hours laboratory. Principles of operation of gasoline, diesel and LP gas engines; engine types; ignition, fuel, valve, and cooling systems; transmission; power trains; power measurement; and tune-up.

ABE 2873. Land Surveying. (3) (Prerequisite: MA 1323 or equivalent). Two hours lecture. Three hours laboratory. Fundamentals of measurements and traverse computations. Public land surveys. Surveying practice in traverse and topographic surveys.

ABE 3513. The Global Positioning System and Geographic Information Systems in Agriculture and Engineering. (3) (Prerequisite: MA 3131 and MA 1323, or equivalent). Two hours lecture. Four hours laboratory. Basic theory and hands-on application of global positioning system (GPS) technology/hardware, and geographic information systems (GIS) software, for precise positioning in agriculture and engineering.

ABE 3700. Internship in Gin Management and Technology. (1-6) (Prerequisite: Minimum of junior standing or permission of instructor). Credits to be arranged. Work experience in approved cotton gins for Agricultural Engineering Technology and Business majors with an emphasis in Gin Management and Technology.

ABE 4163/6163. Machinery Management for Agro-Ecosystems. (3) (Prerequisite: Junior standing or consent of instructor). Two hours lecture. Two hours laboratory. Basic principles of operation and management of agricultural, landscape, and turf power machinery; selection of machinery based on power requirements, economy, and suitability for Agro-Ecosystems.

ABE 4263/6636. Soil and Water Management. (3) (Prerequisite: ABE 2873). Three hours lecture. Three hours laboratory. Introduction to soil and water management principles; elementary hydrology, basic fundamentals of erosion control, surface and subsurface drainage, and water control for irrigation.

ABE 4383/6383. Building Construction. (3) (Prerequisites: EG 1143, junior standing.) Three hours lecture. An introduction to building terms, construction materials, structural components, construction methods, and mechanical systems pertaining to residential and commercial structures.

ABE 4453/6453. Cotton Ginning Systems and Management. (3) Three hours lecture. An in-depth exposure to the modern cotton ginning industry, including the basics of the operation of a cotton gin and management of the ginning process.
ACC 4043/6043. Municipal and Governmental Accounting. (Prereq: ACC 2023). (Not open to PACC students). Three hours lecture. Accounting theory and practice applied to governmental units, state operated schools and colleges; classification and use of funds; fiscal procedures; budgetary control; financial statements; reports.

ACC 4053/6053. International Accounting. (Prerequisite: ACC 2023). (Not open to PACC students). Three hours lecture. A study of the international dimension of accounting as it relates to multinational corporations and the international environment.

ACC 4063/6063. Income Tax II. (3) (Prerequisite: Grade of C or better in ACC 4013; not open to PACC students). Three hours lecture. Discussion of the Federal and income tax treatment of taxpayers other than individuals and the treatment of property transfers which are subject to Federal and State gift and death taxes.

ACC 4200/6200. Accounting Internship. (1-6) (Prerequisite: Senior standing and approval by the Internship Director prior to the internship.) Credit to be arranged based on time and circumstances of the internship providing professional experience in audit, tax and other accounting related areas.

ACC 8013. Seminar in Financial Accounting Theory. (3) (Prerequisite: ACC 4023). Examination of the theoretical concepts, definitions, and models espoused in the accounting literature and relevant to analyzing various contemporary issues in financial accounting and reporting.

ACC 8023. Advanced Managerial Accounting. (3) (Prerequisite: ACC 3013). Three hours lecture. The study of theoretical concepts and technical issues in planning, control and decision making.

ACC 8033. Business Assurance Services. (3) (Prerequisite: ACC 4033). Three hours lecture. Financial statement auditing practices, including professional standards, ethical responsibilities, liability, and reporting requirements.

ACC 8043. Fraud Examination. (3) (Prerequisite ACC 3053 and ACC 4033). Three hours lecture. Developing and executing a program of procedures to detect errors and frauds using information generated by computerized accounting systems.

ACC 8063. Research in Tax Practice and Procedures. (3) (Prerequisite: ACC 4013). Three hours lecture. Preparation of tax protests, tax planning; use of computerized aids; client representation; structure of Internal Revenue Service; and research problems in taxation.

ACC 8073. Taxation of Corporations and Shareholders. (3) (Prerequisite: ACC 4013). Examination of federal income tax laws as applied to corporations and shareholders with an emphasis on how research issues deal with these topics.

ACC 8083. Federal Estate and Gift Taxation. (3) (Prerequisite: ACC 4013). An examination of the Federal Estate and Gift tax laws with an emphasis on how to research issues dealing with these topics.

ACC 8093. Taxation of Partnerships, S Corporations, Trusts, and Estates. (3) (Prerequisite: ACC 4013). Three hours lecture. An examination of the income taxation of partnerships, S corporations, trusts, and estates with an emphasis on how to research issues dealing with these topics.

ACC 8101. Analysis of Accounting Data. (1). One hour lecture. The analysis of accounting data extracted from an enterprise resource planning system to monitor business activities and support managerial decision making.

ACC 8112. Financial Statement and Management Accounting Report Analysis for Decision Making. (3) (Prerequisite: ACC 8303 or equivalent). Two hours lecture. Analysis of financial statements and internal accounting reports to help management make decisions.

ACC 8113. Advanced Individual Taxation and Wealth Management. (3) (Prerequisite: ACC 4013 or consent of instructor). Three hours lecture. An in-depth analysis of taxation of individuals with an emphasis on how to research issues dealing with these topics.

ACC 8123. Tax Topics. (3) (Prerequisite: ACC 4013). Three hours lecture. An examination of specialized taxation topics such as real estate taxation, state and local taxation, and bank taxation.

ACC 8303. Survey of Accounting. (1). Three hours lecture. An examination of technical concepts in accounting as they relate to current applications within the accounting profession.

ACC 8303. Survey of Tax Law. (1). Three hours lecture. An examination of current income tax law as they relate to current applications within the accounting profession.
**Department of ANIMAL and DAIRY SCIENCES**

**Professors Kiser (head), Rude and Ryan; Associate Professors Crenshaw, Memili, Nicodemos, Parish, Vann and Williard; Assistant Professors Boland, Hill, Jousan, Larson, Martin, Rivera, Schmidt, and Smith**

**Instructors Adams, Huntington and Leed**

**ADS 1114. Animal Science.** (4) Three hours lecture. Two hours laboratory. Fundamental principles and practical application of livestock, dairy, and poultry science. (ADS majors must earn a C or better to graduate.)

**ADS 1132. Introduction to Horsemanship.** (2) One hour lecture. Two hour laboratory. Principles of riding, managing and training pleasure horses.

**ADS 2102. Equine Conformation and Performance Evaluation.** (2) Four hours laboratory. Individual evaluation of horses with an in-depth study of anatomy and its relationship to function, plus methods used in evaluating performance classes.

**ADS 2122. Advanced Equine Evaluation.** (2) (Prerequisite: ADS 2102 or consent of instructor). Four hours laboratory. Advanced evaluations of equine conformation and performance classes. Develop more extensive oral reason presentations to defend conformation and performance placings.

**ADS 2223. Composition Animal.** (3) (Prerequisite: Sophomore standing or consent of instructor). Three hours lecture. Focus on companion animal dogs and cats regarding breed selection, nutrition, reproductive biology, management and responsibilities.

**ADS 2312. Advanced Horsemanship.** (2) (Prerequisite: consent of instructor). Junior and senior level training and riding. Developing and implementing a training regime using upper-level riding skills to produce an advanced performance horse for competition.

**ADS 3142. Meats Judging I.** (2) Four hours laboratory. Grading and judging meat carcasses and cuts, study of packing house operation. (Same as FHN 3142)

**ADS 3213. Livestock Growth, Development and Evaluation.** (3) (Prerequisite: ADS 1114). Three hours lecture. Two hour laboratory. Growth and development of livestock animals from embryo to harvest. The evaluation of meat animals related to the livestock industry and the value of production.

**ADS 3223. Horse Management.** (2) Two hours lecture. Two hours laboratory. Breeding, feeding, management, and training of horses.

**ADS 3233. Equine Assisted Therapy.** (3) (Prerequisite: ADS 1132 or consent of instructor). Three hours lecture. Two hours laboratory. Introduction to equine assisted therapy discussing the equine activities team, facilities and equipment, standards and accreditation, and special needs of the rider.

**ADS 3312. Livestock Management Practices.** (2) (Prerequisite: ADS 1114 and consent of instructor). Four hours laboratory. Modern techniques used in the management of beef cattle, sheep, swine, and horses.

**ADS 3812. Dairy Cattle Appraisal.** (2) Four hours laboratory. Phenotypic appraisal; breed programs; performance record systems.

**ADS 4122. Equine Reproduction.** (2) One hour lecture. Two hours laboratory. A study of equine reproductive activities and the principles for managing the mare, stallion, and foal. (Same as PHY 6122).

**ADS 4113. Swine Science.** (3) (Prerequisite: ADS 1114). Three hours lecture. Feeding, management, breeding, production, and marketing of swine. Fall semester.

**ADS 4123/6123. Animal Breeding.** (3) (Prerequisite: PO 3103). Three hours lecture. The basis for genetic improvement of livestock, including the study of variation, heritable characteristics, mating systems and methods of estimating breeding values. (Same as GNS 6123.)

**ADS 4212. Livestock Evaluation.** (2) Four hours laboratory. Evaluation of individuals and representative groups of livestock from the standpoint of the breeder, the market, and the consumer.

**ADS 4213/6213. Livestock Nutrient Requirements and Formulation of Rations.** (3) Application of knowledge of feedstuffs and nutrient requirements in ration formulation for all classes of livestock.

**ADS 4221. Animal and Dairy Sciences Senior Seminar.** (1) One hour lecture. Review and oral presentation of any topic to graduate research and related production problems.

**ADS 4222/6222. Small Ruminant and Diversified Livestock Production.** (2) (Prerequisite: ADS 1114, junior or senior standing, or consent of instructor). Two hours lecture. History, management, and marketing of small ruminants and diversified livestock species in relation to the production enterprise (fiber, meat, milk, breeding, stock, etc.).

**ADS 4232. Advanced Livestock Evaluation.** (2) (Prerequisite: ADS 4212/6212). Four hours laboratory. Advanced study of animal evaluation in functional efficiency.

**ADS 4243/6243. Composition and Chemical Reactions of Foods.** (3) (Prerequisites: CH 1053 and CH 2503 or equivalent). Three hours lecture. Nature and chemical behavior of food constituents including proteins, lipids, carbohydrates, minerals, water, enzymes and pigments; properties of food systems as related to commercial preparation. (Same as FHN 4243/6243.)

**ADS 4314/6314. Meats Processing.** (4) Three hours lecture. Two hours laboratory. Survey of the meat industry with emphasis on slaughtering, cutting, curing, cooking, care, storage and manufacturing meats and meat products. Spring semester. (Same as FHN 4314/6314.)

**ADS 4324/6324. Beef Cattle Production.** (3) (Prerequisites: ADS 1114). Three hours lecture. Two hours lab. Breeding, feeding, management, and marketing of beef cattle. Spring semester.

**ADS 4333/6333. Equine Exercise Physiology.** (3) (Prerequisite: ADS 3232). Three hours lecture. Evaluation of research in exercise science. Physical, physiologic, metabolic, behavioral and locomotive adaptations of the equine athlete to athletic training.

**ADS 4412. Managing Livestock Sales I.** (2) (Prerequisites: Instructor approval and two hours laboratory. Course in preparation, structure and management of livestock sales. Emphasis will be on cattle and horse sales. Students will prepare for and conduct sale.

**ADS 4423. Animal and Dairy Sciences Internship.** (3) (Prerequisite: Consent of instructor). Individual work experience with the farm animal species either in animal production, meat production or product promotion with an industry commodity representative under faculty supervision.

**ADS 4433/6433. Advanced Beef Cattle Production.** (3) (Prerequisites: ADS 1114, ADS 4324) Two hours lecture. Two hours laboratory. Management, marketing, and utilization of beef animals associated with cow-calf and stocker cattle production in the U.S.

**ADS 4611/6611. Practices in Physiology of Reproduction.** (1) (Prerequisite: BIO 1134 and BIO 1144). Three hours laboratory. Artificial insemination and rectal palpation of reproductive organs of cattle; semen collection, evaluation, processing and handling. (Same as PHY 6611.)

**ADS 4613/6613. Physiology of Reproduction.** (3) (Prerequisite: BIO BIO 1134 and BIO 1144). Three hours lecture. Anatomy and physiology; reproductive cycles; production, evaluation and preservation of gametes; gestation; endocrine regulation; managed reproduction. (Same as PHY 6613.)

**ADS 4623/6623. Physiology of Lactation.** (3) (Prerequisite: BIO BIO 1134 and BIO 1144). Two hours lecture. Two hours laboratory. Anatomy, physiology, and pathology of the mammary gland; nervous and hormonal control of lactation, theories of milk secretion, modern methods of milking, factors affecting lactation. (Same as PHY 6623.)

**ADS 4814/6814. Dairy Farm Management.** (3) (Prerequisite: ADS 1114). Three hours lecture. Two hours laboratory. Planning and integrating dairy farm operations; management principles applied to dairy herd operations.

**ADS 4823/6823. Advanced Dairy Farm Management.** (3) (Prerequisite: ADS 4814) Two hours lecture. Four hours lab. Advanced principles of dairy science as applied to the whole farm. Management of specific groups of cattle including nutrition, breeding, and milking management.

**ADS 8153. Ruminant Nutrition.** (3) Three hours lecture. In-depth treatment of rumin function and recent concepts in ruminant nutrition.

**ADS 8162. Monogastric Nutrition.** (2) Two hours lecture. Monogastric nutrition; relationships with special emphasis on swine nutrition. Metabolic functions, dietary requirements, deficiency symptoms and distribution of nutrients in feedstuffs.

**ADS 8233. Advanced Breeding.** (3) (Prerequisites: ADS 4123/6123 or PO 4303/6303; ST 8114). Three hours lecture. Describing, measuring and partitioning phenotypic variances and covariances. Estimating parameters, predicting response, systems of breeding, and methods of selection. (Same as GNS 8233.)

**ADS 8243. Advanced Physiology of Reproduction.** (3) (Prerequisite: ADS 4613/6613 or its equivalent). Three hours lecture. An advanced study of the reproductive process with emphasis on reproductive endocrinology and the physiology of germ cells. (Same as PHY 8243.)

**ADS 8423. Meat Science.** (3) (Prerequisites: CH 4513/6513 or equivalent and BIOS 3043 or equivalent). Three hours lecture. Basic study of the value of meat and how this information is applied to the evaluation, processing and preservation of meat, meat products and meat by-products. (Same as FHN 8423.)

**ADS 8433. Bone, Muscle and Fat Deposition in Animals.** (3) (Prerequisite: BCH 4613/6613). Three hours lecture. Study of deposition of various tissues from embryonic differentiation through maturity of animals. (Same as PHY 8433.)

**ADS 8453. Statistical Genetics.** (3) (Prerequisites: ST 8114, ADS 4123/6123). Three hours lecture. Probability and its application to genetics; partitioning of genotypic variance; covariances among relatives; regression and correlation; linear functions, variances; the analysis of variance. (Same as GNS 8453.)

**ADS 8463. Advanced Animal Nutrition.** (3) Two hours lecture. Two hours laboratory. Develop an understanding of nutritional physiology, metabolism, and utilization of nutrients by animal species.
Department of AGRICULTURAL ECONOMICS and AGRIBUSINESS

Office: 325-2750

Professors Turner (Head), Allen, Barefield, Barnett, Beaulieu, Coble, Hood, Little, Myles, Reinschmidt, and Spurlock; Associate Professor Bendahl; Assistant Professors Evans, Harri, Interis, Morgan, Petrolia, Riley and Tack

AEC 1223. Computer Applications for Agriculturists and Life Scientists. (3) Two hours lecture. Two hours laboratory. Basic agricultural microcomputer applications and computing logic; creating reports using word processors; developing presentations on agricultural subjects using multimedia software; and agricultural calculations using spreadsheets.

AEC 2611. Seminar I. (1) One hour lecture. Planning and preparing for careers in agricultural economics and agribusiness.

AEC 2713. Introduction to Food and Resource Economics. (3) Three hours lecture. Each semester. Prerequisite: AEC 2713, MA 1613 or MA 1463. Three hours lecture. Each semester. Introduces students to the economic principles of production, value, prices, credit, taxation, land tenure, marketing, international trade, and related problems affecting agriculture.

AEC 3113. Introduction to Quantitative Economics. (3) Prerequisites: AEC 2713, MA 1613 or MA 1463. Three hours lecture. Each semester. Prerequisite: AEC 2713 or consent of instructor. Three hours lecture. Focuses on economic principles applied to food and fiber production situations; emphasis on field-level decision analysis.

AEC 3123. International Trade in Agriculture. (3) Prerequisites: AEC 2713 or EC 2123 or consent of instructor. Three hours lecture. Examinations of the economic forces, in concert with other processes, influence environmental quality and the agricultural trade, the economic basis of trade, and the policies affecting agricultural trade.

AEC 3233. Introduction to Environmental Economics and Policy. (3) Prerequisites: AEC 2713 or EC 2123. Two hours laboratory. Three hours lecture. Emphasizes the principles, functions, agencies, and methods of farm and food product and input marketing.

AEC 3513. Economics of Food and Fiber Production. (3) Prerequisite: AEC 3113. Three hours lecture. Economic principles applied to food and fiber production situations; emphasis on firm-level decision analysis.

AEC 4113/6113. Agribusiness Firm Management. (3) Prerequisites: EC 3123 or EC 3333. Three hours lecture. Examination of the organization, management, and operation of agricultural business with special reference to the application of managerial principles for effective decision-making.

AEC 4123/6123. Financial and Commodity Futures Marketing. (3) Prerequisite: Junior standing. Three hours lecture. Discussion of the purpose, function, mechanics, analysis, and application of commodity and financial futures markets in pricing and hedging opportunities. (Same as FIN 4123/6123).

AEC 4223/6223. Applied Quantitative Analysis in Agricultural Economics. (3). Prerequisites: AEC 3113 and BQA 2113. Three hours lecture. Emphasized the intuitive understanding and practical application of basic quantitative, statistical, econometric, and optimization techniques as they relate to problems solving in agricultural economics.

AEC 4233/6233. Environmental Economics. (3) Prerequisites: AEC 3233 and EC 3123. Three hours lecture. Identifies topics lying on the frontier of environmental economics; demonstrates contributions that economics can make in understanding the problems and in providing guidance on solutions.

AEC 4243/6243. Natural Resource Economics. (3) Prerequisites: Either AEC 3233 or consent of instructor, and EC 3123). Three hours lecture. Study of the economics of renewable and nonrenewable natural resource use. Emphasis on applying microeconomic concepts to land use, water, fisheries, minerals, and forest.

AEC 4333/6333. Economics of Aquaculture. (3) Prerequisite: AEC 2713 or consent of instructor. Three hours lecture. Application of economic principles to understand aquacultural production systems, with emphasis on farm management, resource allocation, industry market structure, food safety and environmental issues.

AEC 4343/6343. Advanced Farm Management. (3) Prerequisite: Senior standing, EC 3123, and AEC 4523). Three hours lecture. Techniques and procedures for decision making in the farm business as related to the determination of optimum enterprise choice and resource combination in both a static and dynamic framework.

AEC 4413/6413. Public Problems of Agriculture. (3) Prerequisite: Senior standing and EC 3123 and AEC 3113). Three hours lecture. Major public and private problems confronted by producers and governmental and individual policies to deal with them; limitations encountered; appraisal of results.

AEC 4511/6511. Agricultural and Resource Legislative Policy. (1) Prerequisite: AEC 2713 or consent of instructor. One hour lecture. Discusses agricultural policy history and development, roles of consumer, producer, and environmental groups in policy development, and congressional organization and procedures in the policy process.

AEC 4523/6523. Farm Financial Management. (3) Prerequisites: ACC 2023 and AEC 3133). Three hours lecture. Financial analysis and decision making, including farm records, marginal analysis and enterprise budgeting, financial statement analysis, capital budgeting, and financial intermediation in agriculture.

AEC 4530/6530. Agribusiness Management Internship. (1-6) Prerequisite: Consent of Instructor. Individual work experience with approved agribusiness companies for agricultural economics or agribusiness students.

AEC 4623/6623. Economics of Export and Import Traffic Management in Agriculture. (3) Prerequisites: Senior-Graduate level standing or consent of instructor. Examination of the ocean shipping industry, import-export agricultural traffic management techniques, government regulations, documentation, and financial considerations.

AEC 4713/6713. Quantitative Economics. (3) Prerequisites: AEC 3113, EC 3113, and EC 3123). Three hours lecture. Investigation of the basic mathematical methods and techniques currently used to analyze economic problems.

AEC 4723/6723. Modeling for Agricultural Management. (3) Prerequisite: AEC 3113). Three hours lecture. Application of mathematical programming techniques to problems confronted by persons involved in the production, processing, and marketing of agricultural commodities.

AEC 4733/6733. Econometric Analysis in Agriculture Economics. (3) Prerequisite: AEC 3113) Three hours lecture. Applications of single-equation estimation techniques to problems in agriculture.

AEC 4771. Agri-Marketing Practicum. (1) Two hours laboratory. Design and preparation of marketing plan for presentation at National Agri-Marketing Association meeting. Development of plan includes market research, budgeting, and advertising layouts.

AEC 8163. Consumers, Producers, and Markets. (3) Prerequisite: EC 3123). Three hours lecture. Focuses on economic theory related to production, consumption, and markets for products. Extension into market structure, welfare economics, and non-market goods will also be discussed.

AEC 8312. Economic and Social Environment of the Agribusiness Firm. (2) Prerequisites: EC 8103 or equivalent). Two hours lecture. The course focuses on the economic, social/political and legal forces which shape the environment in which agribusiness firms compete.

AEC 8532. International Agricultural Trade and Policy. (2) Prerequisite: EC 8163). Two hours lecture. Examination of international trade theories, policies affecting agriculture, international trade, world trade negotiations, barriers to trade, and the role of agricultural trade in economic development.

AEC 8542. Agribusiness Risk Management. (2) Prerequisite: EC 8103 or equivalent). An exploration of risk management concepts and techniques for managing risks faced by agribusiness firms, with emphasis on futures and options.

AEC 8611. Research Seminar I. (1) Selection of the research topic, development of the research proposal. Each semester.
AEC 8621. Research Seminar II. (1) Final preparation of the research proposal and presentation of the proposal. Each semester.

AEC 8713. Rural Community and Economic Development. (3) Three hours lecture. The central focus in this course is on the set of social and economic components that constitute the fabric of rural communities in the U.S.

AEC 8843. Survey Design and Experimental Economics. (3) (Prerequisite: Consent of instructor). Three hours lecture. An exploration of economists’ use of data collection techniques, such as surveys and experiments, with emphasis on analysis of non-market valuation problems.

AGRICULTURAL INFORMATION SCIENCE and EDUCATION

Office: 325-2950

Professors: Browning, Deeds, Newman, Swortzel, Taylor, and White

AIS 2413. Introduction to Agricultural Information Science. (3) Three hours lecture. History and principles of education programs; program development; management, and community involvement; career opportunities in agricultural education.

AIS 2613. Introduction to Information and Decision Science in Agriculture. (3) Three hours lecture. Introductory course to the science of helping people learn how to access, analyze, apply and amend information to solve problems in agriculture.

AIS 3003. Information Interpretation in Agriculture and Life Sciences. (3) Three hours lecture. Understanding and interpreting research-based information to enable students to create, utilize and disseminate information to solve problems in agriculture and the life sciences.

AIS 3203. Introduction to Technical Writing in Agrocommunications. (3) (Prerequisite: Completion of EN 1103 and 1113 or equivalent and Junior standing). Three hours lecture. Basic principles of and techniques in communicating information relevant to agriculture/agribusiness, natural resources, and human sciences.

AIS 3333. Professional Presentations in Agriculture and Life Sciences. (3) (Prerequisite: CO 1003). Two hours lecture. Two hours laboratory. Strategies and techniques for effective presentations in agriculture, life sciences and natural resources. Emphasis on oral and visual techniques for formal and non-formal situations.

AIS 3500. Internship in Agricultural Information Science. (1-6) (Hours and credit to be arranged and shall not exceed a total of six hours). Supervised field experiences shall center around experiences related to participation in professional activities relating to problems, methods, and skills basic to agricultural and extension education.

AIS 3803. Leadership Development in Agriculture and Life Sciences. (3) Three hours lecture. Fall semester. Dynamic interactions of personal characteristics, knowledge and expertise; interpersonal influence; professional commitment; organizing planning and goals; and power for effective leadership in agricultural professions.

AIS 4103/6103. Objectives and Procedures of Programs in Agricultural Information Science and Education. (3) (Prerequisite: Junior standing). Three hours lecture. Identification and development of objectives; techniques used in Agricultural and Extension educational procedures; relationships with U.S.D.A., experiment stations, and other agricultural agencies.

AIS 4113/6113. Methods of Teaching Agriscience. (3) (Prerequisite: AIS 4203/6203 or consent of instructor). Two hours lecture. Four hours laboratory. Objectives, materials, and teaching methods for planning, organizing, and managing agricultural science programs.

AIS 4203/6203. Applications of Computer Technology to Agricultural Information Science and Education. (3) (Prerequisites: CSE 1013 or BIS 3713 or equivalent). Two hours lecture and two hours laboratory. Application of microcomputer technology in agricultural and extension education; data storage and retrieval; and use of canned computer programs in agricultural and educational settings.

AIS 4303/6303. Applications of Information Technologies in Agricultural Learning Systems. (3) (Prerequisites: AIS 4203/6203 or consent of instructor). Two hours lecture. Three hours laboratory. Advanced applications of computer and related information technologies in agricultural learning systems; designing and developing hypermedia-based materials for formal and nonformal agricultural instructional programs.

AIS 4403/6403. Development of Youth Programs. (3) Three hours lecture. Needs and interests of youth; developing, managing, and evaluating formal and informal youth education programs; volunteer and paraprofessional staff development; securing and developing supportive resources.

AIS 4426. Teaching Methods in Agriculture & Human Sciences. (4) (Pre-requisite: Junior standing in CALS major). Three hours lecture. Two hours laboratory. Planning instruction; selecting teaching techniques; developing teaching plans; teaching agricultural/human science topics; using instructional technologies; and setting learner program goals.

AIS 4503/6503. International Agricultural Education. (3) Three hours lecture. Examination of formal and non-formal agricultural education systems and related situations and processes which influence agricultural development in developing countries.

AIS 4873. Professional Seminar in Agricultural Information Science and Education. (3) (Prerequisites: Admission to Teacher Education and senior standing). Three hours lecture. Legal, professional, administrative and curricular issues in agricultural and extension education. Includes needs assessment, community involvement and problem solving to plan formal and informal programs.

AIS 4886, 4896. Teaching Internship in Agriculture Information Science and Education (6,6) (Both courses to be taken concurrently). (Prerequisites: Admission to Teacher Education and senior standing). Supervised observation and directed teaching in respective field of endorsement.

AIS 8203. Advanced Communication in Agricultural Information Science and Education. (3) Three hours lecture. Principles in developing and administering programs in agricultural and extension education with attention to federal-state-local relationships and supervisory procedures.

AIS 8263. Public Relations in Agricultural Information Science and Education. (3) Three hours lecture. Principles and techniques for effective presentations in agriculture, life sciences and natural resources. Emphasis on oral and visual techniques for formal and non-formal situations.

AIS 8413. Methods of Planned Change in Agricultural and Extension Education. (3). A study of the theories and processes used by change agents to plan, influence and accomplish change is social, educational and corporate environments.

AIS 8503. Program Planning and Development in Agricultural Information Science and Education. (3) Three hours lecture. Principles, theory, and practice in developing local and state programs of vocational, technical, and extension education.

AIS 8513. Volunteer Development in Agricultural and Extension Education. (3) Three hours lecture. Principles, theory, and practice in developing volunteer development in extension education, high schools, communities, and/or non-profit organizations.

AIS 8523. Teaching Out-of-School Groups in Agricultural Information Science and Education. (3) Three hours lecture. Organizing, planning, and instructing out-of-school groups in agricultural and extension education; identifying and assessing needs of clientele; and evaluating effectiveness.

AIS 8533-8543. Workshop in Agricultural Information Science and Education. (3-3) (A total of six semester hours may be earned in AIS 8533-8543). One hour lecture, four hours laboratory. Studying current problems, public relations media; methods and techniques of establishing and maintaining desirable public relations.

AIS 8593. Historical Foundations of Agriculture and Human Science. (3) Three hours lecture. Philosophy, history, and development of Agricultural and Extension Education; implications, influences, and evaluation of forces and policies impacting Agricultural and Extension Education.

AIS 8606. Teaching Internship in Agricultural Information Science and Education. (6) (Prerequisites: Admission to the graduate certification program, teacher education and teaching internship). Supervised observation and directed teaching in Agricultural Information Science and Education.

AIS 8693. Philosophical Foundations of Agriculture and Human Science. (3). Three hours lecture. Philosophies, foundational theories, and research on teaching and learning processes applied to formal and non-formal programs in agricultural education and human sciences.

AIS 8703. Evaluation of Agricultural Information Science and Education Programs. (3) Three hours lecture. Evaluation principles and procedures used in developing and analyzing vocational, technical, and extension education programs.

AIS 8803. Applying Research Methods to Agricultural Information Science and Education. (3) Three hours lecture. Principles and techniques for planning, conducting, and reporting research; development of effective design of research problems; emphasis on understanding and evaluating scientific reports.

AIS 9583. Analysis and Interpretation of Data in Ag and Extension Education Research. (3) (Prerequisite: consent of instructor). Three hours lecture. Principles and techniques for collecting, analyzing, and reporting research in agriculture and extension education. Emphasis on student research project development, student authorship.
AN 1103. Introduction to Anthropology. (3) Three hours lecture. The fields, theories, and methods of anthropology; man’s biological and cultural development; survey of technological, economic, political, social, religious, and linguistic systems.

AN 1143. Introduction to Cultural Anthropology. (3) Three hours lecture. Introduction to the study of social, political, and economic organization, magic and religion, personality, and art.

AN 1173. Introduction to Gender Studies. (3) Three hours lecture. An introduction to theoretical concepts in Gender Studies. This course will examine the influence of the women’s movement on the academic development of Gender Studies (Same as GS 1173 and SO 1173).

AN 1343. Introduction to Biological Anthropology. (3) Three hours lecture. The biological nature of man; study of human origins; fossil evidence; genetic mechanism; cultural association; comparative primate anatomy and behavior; concepts of race. Note: Unacceptable for Natural Science requirement in Arts and Sciences.

AN 1543. Introduction to Archaeology. (3) Three hours lecture. A survey of early cultural development throughout the world; emphasis on archaeological techniques, interpretations and theories of development.

AN 2203. Cultural and Racial Minorities. (Prerequisite: Three hours in an introductory social science). Three hours lecture. Origins of minority groups and racial attitudes. Biological and cultural concepts of race and minority groups; problems of adjustment in interracial and multiethnic societies. (Same as AAS 2203 and SO 2203).

AN 2510. Archaeological Field Methods: Survey. (1-6) Credit to be arranged. Archaeological surface survey methods in field setting, including map-reading, shovel-testing, collection techniques, controlled surface collection, artifact registration.

AN 3113. Societies of the World. (Prerequisite: AN 1103 or its equivalent or consent of instructor). Three hours lecture. A survey of principal cultural types and their distribution.

AN 3133. Anthropology of Latin America. (3) Three hours lecture. A survey of societies in Latin America with an emphasis on indigenous peoples, their relationship to contemporary social and economic development.

AN 3153. African Art and Culture. (Prerequisite: AN 1103 or consent of instructor). Three hours lecture. An examination of the role of traditional art in the beliefs and customs of representative African cultures. (Same as AAS 3153 and ART 3153).

AN 3323. Contemporary Woman. (3) Three hours lecture. Introductory course for the Concentration in Women’s Studies. Major topics are women’s heritage, identity, culture, and vulnerabilities. (Same as SO 3323).

AN 3333. Primate Behavior. (3) Three hours lecture. In-depth study of non-human primate evolution, social behavior, and communication. Field studies and conservation efforts will be examined.

AN 3510. Archaeological Field Methods: Excavation. (1-6) Credit to be arranged. Excavation methods in field setting, including mapping, recording, recovery and proveniencing techniques, field research strategies.

AN 3513. Artifact Analysis. (3) Two hours lecture. Two hours laboratory. Introduction to artifact recognition and analysis, focusing on prehistoric and historic ceramics, stone tools and debris, glass, nails, animal bones, shell, and environmental indicators.

AN 3523. North American Archaeology. (Prerequisite: AN 1103 or consent of instructor). Three hours lecture. A survey of the prehistoric cultures of North America including the influences of the high civilizations of Mesoamerica.

AN 3533. Rise of Civilization. (3) Three hours lecture. Survey of prehistoric cultures and their contributions to the rise of civilizations in Latin America, China, Africa, India and the Middle East.

AN 3540. Archaeological Travel and Participation Program. (1-6) Participation in excavations in the Near East and related lecture program. (Same as MEC 3540 and REL 3540).

AN 3553. Near Eastern Archaeology. (3) Three hours lecture. Introduction to the contributions made by archaeologists to ancient Near Eastern history and prehistory, with special emphasis on the Syro-Palestinian area. (Same as MEC 3553 and REL 3553).

AN 4123/6123. Anthropological Theory. (3) (Prerequisite: AN 1103 or consent of instructor). Three hours lecture. The cross-cultural study of health, sickness, and medicine from a holistic perspective emphasizing interactions between culture and biocultural and between biomedicine and local healing traditions.

AN 4143/6143. Ethnographic Methods. (Prerequisites: AN 1103 or AN 1143 or consent of instructor). Three hours lecture. An overview of methods and techniques for conducting ethnographic research.

AN 4163/6163. Anthropology of International Development. (Prerequisite: Senior standing or consent of instructor). Three hours lecture. Role of anthropology in international development including origins of the Third World, development theory, current issues in international development, case studies.

AN 4173/6173. Environment and Society. (Prerequisite: AN 1103, SO 1003 or consent of instructor). Three hours lecture. A study of the interaction between human society and the environment including the social aspects of environmental problems. (Same as SO 4173/6173).

AN 4303/6303. Human Variation and Origins. (3) Three hours lecture. An examination of human origins, genetics, and other principal factors that contribute to physical variation within and between human populations.

AN 4313/6313. Forensic Anthropology. (3) Two hours lecture and three hours laboratory. Identification of each human bone and its fragments. Study of sex differences, age changes in bone and dentition, dermatoglyphics, blood group systems, and paleopathology.

AN 4403/6403. Introduction to Linguistics. (Prerequisite: AN 1103 or its equivalent or consent of instructor). Three hours lecture. The descriptive and historical study of language; linguistic analysis and comparison; language classification; language in its social and cultural setting. (Same as EN 4403/6403).

AN 4523/6523. Public Archaeology. (Prerequisite: AN 1543 or consent of instructor). Three hours lecture. Survey of cultural resource management practices, Federal and State historic preservation laws, research proposal design, significance assessments, professional ethics, employee/client relationships, and public education.

AN 4623/6623. Language and Culture. (Prerequisite: AN 1103 or consent of instructor). Three hours lecture. Examination of language as a part of culture, a source of knowledge about other aspects of culture, and a social behavior. (Same as EN 4623/6623 and SO 4623/6623).

AN 4633/6633. Sociolinguistics. (Prerequisites: AN 1103 or consent of instructor). Three hours lecture. Examination of relationship between language and society, and how, when, and why people in speech communities use language varieties. (Same as EN 4633/6633 and SO 4633/6633).

AN 8011. Professionalization in Applied Anthropology. (1) One hour seminar. Students are introduced to norms of professional behavior in applied anthropology, with focus on success in graduate school and preparation for the job market.

AN 8013. Quantitative Methods in Anthropology. (3) Three hours lecture. Students are introduced to quantitative methods utilized in anthropological research. Students will examine anthropological research design, sampling strategies, probability theory, and various statistical approaches.

AN 8103. Applied Cultural Anthropology. (Prerequisites: AN 1103 or AN 1143 or consent of instructor). Three hours lecture. An overview of the application of anthropological theory and method of contemporary social problems.

AN 8203. Reading and Research in Applied Anthropology. (3) Three hours lecture. An overview of sub-disciplines within applied anthropology, including medical anthropology, development, forensics, education and cultural resource management.

AN 8215. Internship in Applied Anthropology. (5) A minimum of nine weeks of supervised professional anthropology experience in an appropriate setting.

AN 8303. Seminar in Bio-archaeology. (3) Three hours lecture. Overview of applications in bio-archaeology, including paleodemography, paleopathology, and paleonutrition.

AN 8513. Southeastern Archaeology. (3) Three hours lecture. Prehistory of Southeastern U.S. from entry of first people to European contact. Changes in technology, settlement, subsistence, demography, and environment examined using archaeological evidence.

AN 8523. Environmental Archaeology. (3) Three hours lecture. Coverage of method and theory in environmental archaeology, including elements of palynology, geoarchaeology, floral and faunal analysis, landscape ecology, historical ecology, cultural ecology, and taphonomy.

AN 8533. Readings in Archaeology: Theory. (3) Three hours lecture. Archaeological theory and its implications for practice, focusing on evolutionary archaeology but also including culture history, processual, reconstructionist, and post-processual approaches.

AN 8553. Readings in Archaeology: Applications. (3) Three hours lecture. Review of literature related to materials science in archaeology, including thin-sectioning and petroglyphy, raw material sourcing, organic residues, dating techniques, and preservation technology.
SCHOOL OF ARCHITECTURE

Professors West (Dean), Berk (Director), Lewis (Associate Dean), and McCann; Associate Professors Callender, Crawford, Greenwood, Perkes, Poros, and Watson; Assistant Professors Callender, Herrmann, and Taylor

1083. Concept and Form. (3) (Prerequisites: ARC 1213 or ART 1123 or ARC 1536 or BCS 2116). Three hours lecture. Introduction and practice for developing and presenting concepts and criticism.

1013. Architectural Appreciation. (3) Three hours lecture. Illustrated study of architecture’s role in shaping the quality of man’s environment. Architectural history, design theory, and process as it affects daily life. Intended for non-majors. (Same as BCS 1013)

1536-1546. Architectural Design I-A and I-B. (6,6) (Prerequisites: Letters of Acceptance into design studio and consent of Associate Dean of Architecture). Two hours lecture. Ten hours studio. Introduction to creative process, design principles and methods. Design projects emphasize verbal and visual communication, observing, analyzing, representing, and making of form, space, materials.

3213. History of Architecture I. (3) Three hours lecture. A survey of man’s effort to mold his environment from prehistory through the Early Middle Ages.

8256-8256. Architectural Design II-A and II-B. (6,6) (Prerequisite: ARC 1546 or equivalent or consent of the dean). One hour lecture. Eleven hours studio. Introduction to fundamental aspects of building including structural-spatial ordering systems. Projects emphasize linkages between people and spaces through investigation of perceptual-conceptual issues.

ARC 2723. Materials. (3) (Prerequisite: Architectural majors: ARC 1546 and PH 1123; for non-architecture majors: consent of instructor). Three hours lecture. Investigation of the morphological impacts of various environmental energies on building forms and systems. Included are light, climatic, structural, and ecological factors. (Same as BCS 2713)

ARC 3523. Passive Building Systems. (3) (Prerequisite: For architecture majors: ARC 1546 and PH 1123; for non-architecture majors: consent of instructor). Three hours lecture. Investigation of the morphological impacts of various environmental energies on building forms and systems. Included are light, climatic, structural, and ecological factors. (Same as BCS 2713)

3213. History of Architecture II. (3) (Prerequisite: ARC 2313). Three hours lecture. Survey of major developments in architecture and city planning from the Fourteenth through the Eighteenth Centuries.

3232. History of Architecture III. (3) (Prerequisite: ARC 3313). Three hours lecture. Survey of major developments in American architecture and survey of major developments in European architecture during the Nineteenth and Twentieth Centuries.

ARC 3556-3546. Architectural Design III-A and III-B. (6,6) (Prerequisite: ARC 2546 or equivalent or consent of the dean). One hour lecture. Eleven hours laboratory. The development of building design as a synthesis of environmental concerns, behavioral responses, functional requirements, and technical systems. Studies using small and intermediate scale projects.

3556-3566. Accelerated Studies in Architectural Design III-A and III-B. (6,6) (Prerequisite: ARC 2546 or equivalent or consent of the dean). One hour lecture. Eleven hours studio. Individualized studies in architectural design for students enrolled in Accelerated Studies Program.

3573. The Art/Architecture of Packaging. (3) Three hours lecture. Investigations into theories, techniques, and procedures of packaging (with emphasis on portfolio design) through traditional, mechanical, and digital means.

3713. Assemblages. (3) (Prerequisites: ARC 2546 or BCS 2126 and ARC 2723). Two hours lecture and one field study. Fabrication and construction are explored in the relationship between nature of materials and methods of assembly. (Same as BCS 3713)

3723. Active Building Systems. (3) (Prerequisites: ARC 3536, ARC 3566 and ARC 3713; for non-architecture majors - ARC 2713 and BCS 2116 or consent of instructor). Three hours lecture. Concentrates on defining the mechanical and electrical (active) techniques available to architects for integrating thermal frames and other structural systems. (Same as BCS 3904)

3914. Structures II. (4) (Prerequisite: ARC 3904). Three hours lecture. Three hours laboratory. Design and analysis of structural elements as part of frames and other structural systems. (Same as BCS 3914)

ARCH 4114/6114. Professional Practice Strategies. (4) Four hours lecture. Exploration of the students’ career goals relative to emerging technology impact and design/architectural practice trends.

4142/6142. Digital Design Fundamentals Laboratory. (2) (Prerequisite: Undergraduates-consent of instructor; Graduates none. Co-requisite: ARC 8104). Four hours laboratory. Exploration of digital input and output devices exploring digital design and fabrication techniques.

4152/6152. Digital Design I Laboratory. (2) (Prerequisite: Undergraduate-consent of instructor; graduate-none). Four hours laboratory. Laboratory exploration of digital input and output devices concentrating on conceptual design, design development, and manufacturing/construction CAD/CAM processes using automated machines and devices.

4162/6162. Digital Design II Laboratory. (2) (Prerequisite: ARC 4152/6152). Four hours laboratory. Advanced laboratory exploration of digital input and output devices concentrating on conceptual design, design development, and manufacturing/construction CAD/CAM processes using automated machines and devices.

ARC 4313. Architectural Theory. (3) (Prerequisite: ARC 3213 or ARC 3313 and consent of instructor). Three hours lecture. An examination of modernism and postmodemism in philosophy and architecture.

4333/6333. Contemporary Philosophy and Architecture. (3) (Prerequisite: Juniors standing or permission of instructor). Three hours lecture. An examination of modernism and postmodernism in philosophy and architecture.

4733. Site Planning for Architects. (3) (Prerequisite: ARC 2546). Three hours lecture. Introduces the natural ecological systems as they relate to human’s impact on them, along with the natural systems’ resistance to human’s impact.

4763/6763. Introduction to Industrial Design. (3) (Prerequisite: consent of instructor). Three hour lecture. Introduction to industrial design and design exploration using different methods, tools and techniques for problem solving in product design in its various applications.

4764/6764. Furniture Designs for Manufacturing and Marketing. (4) (Prerequisites: Undergraduates: permission of instructor; Graduates: none). Three hours lecture. Two hours laboratory. Introduction to need-based design approach for industrial, commercial and residential clients, general precepts to design products/furniture that balance innovative design, functional requirements and aesthetic appeal.

5353. Philosophy of Architecture. (3) Three hours lecture and field visits. The philosophical issues of meaning, appreciation, and the distinctive characteristics of the artistic creation.

5383. Legal Aspects of Architecture. (3) Three hours lecture. Investigation and research regarding architectural issues including architectural law, contracts, litigation, case studies and other topical issues.

5443. Architectural Programming. (3) One hour lecture. Six hours laboratory. Advanced study of analytical and intuitive methods of programming, leading to development of terminal project program to be used in ARC 5589.

5493. Architectural Practice. (3) Three hours lecture. Investigation into issues facing the graduate architect including: responsibilities to the community and the profession; project and business management; client relations; and delivery of services.

5589. Architectural Design V-B. (9) (Prerequisite: ARC 5576). Two hours lecture. Twenty hours laboratory. Development of architectural project of complex and comprehensive nature. Emphasis upon thorough examination of all aspects of building.

5623. Theory of Urban Design. (3) Three hours lecture. General introduction into field of urban design. Course divided into two areas of theory and practice as they relate to contemporary urban development.

6813. Public Design Seminar I. (3) (Prerequisite: Acceptance in Public Design Intern Program) Three hours lecture. Public practice theory, limitations of standard practice to meet contemporary social, economic and environmental needs; values and leadership of community organizations; examples of alternative practice.

6823. Public Design Seminar II. (3) (Prerequisite: ARC 6813) Three hours lecture. Understanding community; local services and economic problems and global environmental risks; understanding minority subcultures, poverty, and the role of non-profit organizations.
ART 6833. Public Design Seminar III. (3) (Prerequisite: ARC 6823) Three hours lecture. Creating and using tools of public practice to help communities address social, economic and environmental problems; leadership skills, advocacy planning, sustaining a non-profit practice.

ART 6853. Public Practice and Projects I. (3) (Prerequisite: Acceptance in Public Design Intern Program) Two hours lecture. Two hours laboratory. Various models of design practice presented by ten outside practitioners. Parallel studio team project.

ART 6863. Public Practice and Projects II. (3) (Prerequisite: ARC 6853) Two hours lecture. Two hours laboratory. Survey of governmental and non-profit organizations that work in the community presented by ten outside practitioners. Parallel studio team project.

ART 6873. Public Practice and Projects III. (3) (Prerequisite: ARC 6863) Two hours lecture. Two hours laboratory. Challenging the status-quo; presentations by ten visionary people. Parallel studio team projects.

ART 8124. Digital Design II. (4) (Prerequisite: ARC 8114). Four hours lecture. Exploration of digital input and output devices concentrating on conceptual design, design development, and manufacturing/construction CAD/CAM processes using automated machines and devices.

ART 8224. Research and Writing in Architecture. (4) Four hours lecture. Provides the student with a general grounding in the process of research, problem identification, writing and development of a formal argument in design and architecture.

ART 8444. Interactive Media. (4) (Prerequisite: ARC 6633). Three hours lecture. Two hours laboratory. Exploration of media and interaction design solutions through case studies and congruent design concepts.

ART 8463. Story Telling in Computer Animation. (3) (Prerequisite: Consent of the instructor). One hour lecture. Four hours laboratory. Customization of existing software/platform transformations for the development of a script into computer graphics imagery.

Department of ART

Office: 102 Freeman Hall
Professors Funderburk, Gootee, Haupt, Long, McCourt, Mixon, and Seckinger;
Associate Professors Thompson (Head), Bostic, Bourgeois, Harvey, Ngoh and Runnels; Assistant Professors Baine, Campbell, and Landry

ART 1013. Art History I. (3) Three hours lecture. The study of art from prehistoric times to the Renaissance through the architecture, sculpture, painting and minor arts of the western world.

ART 1023. Art History II. (3) Three hours lecture. Art from the Renaissance to the present studied chronologically through the architecture, painting, sculpture, and minor arts of the western world.

ART 1113. Art Appreciation. (3) Three hours lecture. An illustrated lecture course dealing with periods, styles, and personalities in painting, sculpture, and architecture. Honors section available through invitation only.

ART 1123. Design I. (3) Six hours studio. A basic study of the fundamental elements and principles of design with an emphasis on composition.

ART 1133. Design II. (3) (Prerequisite: ART 1123). Six hours studio. A continued study of the fundamental elements and principles of design with an emphasis on the theory and application of color.

ART 1153. Three-Dimensional Design. (3) (Prerequisites: ART 1123 or ARC 2536). Six hours studio. A study of the organization of the principles and elements of art as they apply to three-dimensional artwork.

ART 1213. Drawing I. (3) Six hours studio. A freehand drawing course for students interested in visual arts. Basic vocabulary for graphic notation is explored utilizing observation, black and white media, and perspective.

ART 1223. Drawing II. (3) (Prerequisite: ART 1213). Six hours studio. A continuation of ART 1213 further developing conceptual and perceptual use of drawing tools, processes and materials. Black and white, and color media explored.

ART 2013. Painting Survey. (3) (Prerequisites: ART 1123 and ART 1213). Six hours studio. The fundamentals of oil painting and composition.

ART 2103. Photography Survey. (3) (Prerequisites: ART 1123 and ART 1213). One hour lecture. Four hours studio. The fundamentals and aesthetics of black and white photography relating to graphic design and the fine arts.

ART 2213. Life Drawing I. (3) (Prerequisites: ART 1213 and ART 1223). Six hours studio. A drawing class with emphasis on the basic forms and proportions of the human figure.

ART 2233. Drawing III. (3) (Prerequisite: ART 1223). Six hours studio. A continuation of ART 1223 to develop further drawing skills, use of mixed-media, surface variety and explorative concepts for advanced students.

ART 2303. Printmaking Survey. (3) (Prerequisites: ART 1123, ART 1133 and ART 1223). Six hours studio. Introduction to the basic techniques and concepts of lithography, relief-print woodcut and linocut.

ART 2403. Sculpture Survey. (3) (Prerequisite: ART 1123 and ART 1153 or permission of instructor). Six hours studio. Introduction to the basic concepts, materials, and processes of sculpture by exploring modeling, casting, carving and constructing.

ART 2503. Ceramic Art Survey. (3) Six hours studio. Introduction to the processes of ceramic art including hand built forms, wheel thrown pottery and glazing.

ART 2803. Introduction to Computing for Art. (3) (Prerequisites: ART 1133 and ART 1223 or permission of instructor). One hour lecture. Four hours studio. Introduction to desktop computer hardware, operating systems, and application software in the visual arts and design.

ART 2813. Intermediate Computing for Designers. (3) (Prerequisites: Pass second year portfolio review, open only to Graphic Design Majors or consent of instructor). One hour lecture. Four hours studio. Further instruction about desktop computer hardware, operating systems, application software and beginning concept development specific to the graphic design industry for graphic design majors.

ART 3033. Nonobjective Painting. (3) (Prerequisite: ART 1213). Six hours studio. Introduction to nonobjective painting. Intermediate painting with further emphasis on the skills and techniques of painting.

ART 3043. Figurative Painting. (3) (Prerequisites: ART 2013 and ART 2213). Six hours studio. Introduction to painting the figure. A continuation of ART 2013 to further develop skill in the use of the medium and formal organization of subject matter in painting.

ART 3053. Watercolor Painting. (3) (Prerequisites: ART 1133 and ART 1223). Six hours studio. The technique and use of various water-soluble painting mediums.

ART 3143. Italian Renaissance Art History. (3) Three hours lecture. The history of art in Italy in the fifteenth and sixteenth centuries, emphasizing the religious monuments of the period.

ART 3153. African Art and Culture. (3) (Prerequisite: AN 1103 or consent of instructor). Three hours lecture. An examination of the role of traditional art in the beliefs and customs of representative African cultures. (Same as AN 3153 and AAS 3153)

ART 3163. History of Graphic Design. (3) (Prerequisite: Pass second year portfolio review, open only to Graphic Design Majors or consent of instructor). Three hours lecture. A survey of the history of graphic design from pre-writing to digital.

ART 3203. Darkroom Explorations. (3) (Prerequisite: ART 2103 or permission of instructor). One hour lecture. Four hours studio. Advanced techniques of photographic processes in black and white with emphasis on aesthetics.

ART 3213. Life Drawing II (3) (Prerequisite: ART 2213). Six hours studio. Further study in rendering the human figure.

ART 3223. Darkroom Basics. (3) (Prerequisites: ART 2103 or consent of instructor). Six hours studio. The course is an introduction to the traditional photographic darkroom.

ART 3233. Studio Lighting. (3) (Prerequisites: ART 2103 or permission of instructor). Six hours studio. The course is an introduction to the professional studio lighting techniques.

ART 3303. Printmaking II. (3) (Prerequisite: ART 2303). Six hours studio. Continued exploration of the print as a medium of creative expression.

ART 3313. Graphic Art Design I. (3) (Prerequisites: ART 1123, ART 1213 and ART 1223). Six hours studio. Introduction to the processes and techniques of commercial art. Beginning lettering and layout.

ART 3323. Graphic Art Design II. (3) (Prerequisite: ART 3313). Six hours studio. The execution of a series of design projects promoting an awareness of different forms of printed visual communication.

ART 3443. Illustration. (3) (Prerequisites: ART 2013 and ART 3053). Six hours studio. A course introducing issues and instrumentation related to standards in the professional field of illustration emphasizing mixed-media processes.

ART 3503. Ceramic Art II. (3) (Prerequisite: ART 2503). Six hours studio. Elementary glaze formulation, surface decoration, kiln firing, wheel thrown and hand built form.

ART 3513. Sculpture II. (3) (Prerequisite: ART 2403). Six hours studio. Further exploration of concepts and processes of sculpture, including mold making and armature building. Beginning development of personal language of expression.

ART 3603. Directed Writings in Modern Art History. (3) (Prerequisites: ART 1013 and ART 1023). Three hours lecture. History of 20th Century art with emphasis on scholarly writing, editing, and analysis of contemporary models and varieties of writing.

ART 3613. Art and Film. (3) Three hours lecture. This course explores the rich and complex relationship between the visual arts and film.

ART 3623. Art in France: 1850-1900. (3) Three hours lecture. This class explores one of the most dynamic periods of artistic production in the entire history of art.
ART 3653. Roman Baroque Art. (3) Three hours lecture. An examination of the art and architecture created in Rome in the 17th century.

ART 3663. Medieval Stained Glass. (3) An examination of the history of Medieval stained glass from the points of view of technique, material, style, and cultural/historical significance.

ART 3673. The Gothic Cathedral. (3) Three hours lecture. An examination of the art, architecture, religion, politics, and culture of 13th century French Gothic Cathedrals.

ART 3683. The History of Art and Religion. (3) An examination of the histories, functions, and controversies of visual imagery created in the service of religion/spirituality around the world.

ART 3803. Gallery Management. (3) (Prerequisite: ART 1123 and ART 1213). One hour lecture. Four hours laboratory. The study of gallery operations, techniques of curation, artists ethics, installation procedures and management of an art gallery.

ART 3813. Study Abroad Seminar I. (3) (Prerequisite: ART 1213 or consent of instructor). Three hours seminar. Six weeks of on-site instruction in Italy as part of the CAAD Italy study abroad program. Course content will vary to reflect the expertise of the instructor. (Same as ARC 3813 and ID 3813).

ART 3823. Study Abroad Seminar II. (3) (Prerequisite: ART 1213 or consent of instructor). Three hours seminar. Six weeks of on-site instruction in Italy as part of the CAAD Italy study abroad program. Course content will vary to reflect the expertise of the instructor. (Same as ARC 3823 and ID 3823).

ART 3873. Digital Photography. (3) (Prerequisites: ART 2103 and ART 3423 or permission of instructor). Six hours studio. The techniques and aesthetics of digital imagery emphasizing the use of traditional photographic input and output processes.

ART 3913. Introduction to Print Production. (3). (Prerequisites: ART 3323 or consent of instructor). Six hours studio. This class is an introduction to digital print techniques, client work, and the responsibilities and role of graphic designers.

ART 4083. Senior Honors Research in Art. (3) (Prerequisites: Senior standing, and consent of instructor). The application of research methods for the fine arts in contemporary society.

ART 4093. Senior Honors Thesis in Art. (3) (Prerequisites: ART 4083, or consent of instructor). (Co-requisite: enrollment in studio emphasis course). The proposal, development and execution of a project or exhibition.

ART 4103/6103. The Art of Typography and Layout I. (3) Six hours studio. The art and process of presenting written communication in graphic form.

ART 4103/6103. The Art of Typography and Layout II. (3) (Prerequisite: ART 4103/6103). Six hours studio. Advanced problems in presenting written communication in graphic form. Advanced problems as well as additional projects will be required for graduate credit.

ART 4123. Screen Printing for Graphic Design. (3). (Prerequisite: ART 3313, ART 4103, or permission of instructor). Six hours studio. An in-depth look at contemporary methods in designing and screen printing posters and shirts.

ART 4223/6223. Alternative Photography. (3) (Prerequisite: ART 2103 or permission of instructor). One hour lecture. Four hours studio. Alternative photographic processes in black and white with emphasis on aesthetics.

ART 4343/6343. Drawing IV: Figure. (3) (Prerequisite: ART 2223 at both levels and consent of instructor for 6343). Six hours studio. A continuation of ART 2223 to develop further skills for advanced students.

ART 4403/6403. Advertising Design I. (3) (Prerequisite: ART 3323, ART 4103/6103, and consent of instructor). Six hours studio. Course requiring ideation, image development, graphic design and typographic skills to meet rigorous conceptual/visual standards pertinent to creating a brand of a company’s identity.

ART 4413/6413. Advertising Design II. (3) (Prerequisite: ART 4403/6403 and consent of instructor). Six hours studio. An advanced course requiring interaction on a professional level, working with realistic agency-client situations in order to develop efficient, distinguishable and competitive promotional campaigns.

ART 4443/6443. Alternative Color. (3) (Prerequisites: ART 2103 and ART 3423 and permission of instructor). One hour lecture. Four hours studio. Advanced problems in color photography utilizing the dye transfer and polaroid processes. Additional projects for graduate credit.

ART 4523/6523. Internship in Graphic Art Design. (3) (Prerequisites: ART 3313, senior standing and consent of the instructor). Supervised instruction in graphic design. Advanced problems will be required for graduate credit. May be taken for credit more than once.

ART 4533. Ceramic Art III. (3) (Prerequisites: ART 3503). Six hours studio. Advanced problems in glaze formulation, kiln technology and wheel thrown and hand built forms.

ART 4573/6573. Critical Issues in Recent Art. (3) (Prerequisite: ART 3603 or an equivalent course on 20th century art and consent of the instructor). Three hours lecture. Discussion of major developments and issues in contemporary art, focusing on the period 1980 to present.

ART 4600/6600. Advanced Studio - Drawing. (3-9) May be taken for credit more than once. Hours and credit to be arranged and shall not exceed a total of nine hours for all advanced studies in any one semester. (Prerequisite: consent of instructor). Six hours studio. This course develops advanced studio skills and professional practice. Course encourages analysis and criticism of aesthetic, social, ethical and related issues.

ART 4610/6610. Advanced Studio - Painting. (3-9) May be taken for credit more than once. Hours and credit to be arranged and shall not exceed a total of nine hours for all advanced studies in any one semester. (Prerequisite: consent of instructor). Six hours studio. This course develops advanced studio skills and professional practice. Course encourages analysis and criticism of aesthetic, social, ethical and related issues.

ART 4620/6620. Advanced Studio - Printmaking. (3-9) May be taken for credit more than once. Hours and credit to be arranged and shall not exceed a total of nine hours for all advanced studies in any one semester. (Prerequisite: consent of instructor). Six hours studio. This course develops advanced studio skills and professional practice. Course encourages analysis and criticism of aesthetic, social, ethical and related issues.

ART 4630/6630. Advanced Studio - Sculpture. (3-9) May be taken for credit more than once. Hours and credit to be arranged and shall not exceed a total of nine hours for all advanced studies in any one semester. (Prerequisite: consent of instructor). Six hours studio. This course develops advanced studio skills and professional practice. Course encourages analysis and criticism of aesthetic, social, ethical and related issues.

ART 4640/6640. Advanced Studio - Graphic Design. (3-9) May be taken for credit more than once. Hours and credit to be arranged and shall not exceed a total of nine hours for all advanced studies in any one semester. (Prerequisite: consent of instructor). Six hours studio. This course develops advanced studio skills and professional practice. Course encourages analysis and criticism of aesthetic, social, ethical and related issues.

ART 4650/6650. Advanced Studio - Ceramics. (3-9) May be taken for credit more than once. Hours and credit to be arranged and shall not exceed a total of nine hours for all advanced studies in any one semester. (Prerequisite: consent of instructor). Six hours studio. This course develops advanced studio skills and professional practice. Course encourages analysis and criticism of aesthetic, social, ethical and related issues.

ART 4670/6670. Advanced Art History. (3-9) May be taken for credit more than once. Hours and credit to be arranged. (Prerequisite: consent of instructor). Three hours lecture. This course encourages analysis and criticism of aesthetic, social, ethical and related issues.

ART 4693/6693. Internship in Fine Art. (3) May be taken for credit more than once. (Prerequisite: Consent of department head). Six hours laboratory. Supervised instruction and experience for professional art practice.

ART 4713. Advanced Print Production. (3) (Prerequisite: ART 3713). Six hours studio. A more in-depth look at digital printing techniques through comprehensive work and the responsibilities and roles of graphic designers.

ART 4723. Advanced Concept Development. (3) (Prerequisite: ART 3323 and ART 4103) Six hours studio. Conceptual development is the primary goal, additionally students will have more comprehensive campaigns in their portfolios. The techniques can be applied to all design courses.

ART 4813/6813. Introduction to Multimedia I Design and Authoring, (3) (Prerequisite: Consent of instructor). One hour lecture, five hours laboratory. The design and authoring of interactive multimedia for fine and applied arts using desktop computers. Course encourages analysis and criticism of aesthetic and related issues.

ART 4823/6823. Multimedia II and Electronic Publishing. (3) (Prerequisite: ART 4813/6813 and consent of instructor). Six hours laboratory. Interactive multimedia and electronic publication for fine and applied arts using desktop computers. Course encourages analysis and criticism of aesthetic, social, ethical and related issues.

ART 4843/6843. Computer Animation II. (3) (Prerequisite: ART 4833/6833). Six hours lecture and lab. Advanced techniques and special effects: customizing directory structures in the unix environment, complex modeling techniques, animation of object attributes, and creation of motion data.

ART 4863/6863. Advanced Studio - Computer Art and Design. (3) May be taken for credit more than once. (Prerequisite: Consent of instructor). Six hours laboratory. This course develops advanced studio skills and professional practice. Course encourages analysis and criticism of aesthetic, social, ethical and related issues.

ART 4873/6873. Digital Imaging I. (3) (Prerequisite: ART 3103 and ART 2801). Six hours laboratory. Application of computer software to generate electronic images captured by traditional photographic means. Advanced problems and additional projects will be required for graduate credit.

ART 4883/6883. Graphic Design for the Internet. (3) (Prerequisite: ART 3313, ART 3323, open only to graphic design majors or by consent of instructor.) One hour lecture, Five hours laboratory. An introduction to graphic design for the Internet, Internet history, HTML, image manipulation, and the use of software to facilitate the Web site design.

ART 8013. Computer Animation III. (3) (Prerequisite: ART 6833 and ART 6843). Six hours studio. Image processing, compositing, and managing
ART 8023. Computer Animation IV. (3) (Prerequisites: ART 6833, ART 6843, and ART 8013). Six hours studio. Based upon readings within the historical, critical, philosophical and applied contexts of computer graphics, animation and art, students focus on content development in their work.

ART 8033. Experimental Animation. (3) (Prerequisites: ART 6873, ART 6763, ART 8043 or consent of instructor). One hour lecture. Four hours laboratory. Course exercises and individual projects extend the technical palette and visual vocabulary of the experimental animator, with emphasis on the maturation of personal vision/aesthetic.

ART 8073. Advanced Studio: Computer Art and Design. (3) (Prerequisite: ART 6873, ART 6823, ART 6843, ART 8013, ART 8023, or ART 8103). Class assignments for this course will coincide with those assigned for Animation II, Animation III, Animation IV, Multimedia II, Multimedia III. This class will serve as a laboratory for these classes.

ART 8103. Multimedia III. (3) (Prerequisite: ART 6813 and ART 6823 or permission of the instructor). Two hours lecture. Four hours studio. Independent assignments in interactive multimedia authoring incorporating multiple elements: content development, graphic design, image editing and compositing, digital video, sound editing.

ART 8163. Advanced Digital Imaging. (3) Six hours studio. Application of existing software to generate electronic images captured by traditional and non-traditional photographic means.

AIR FORCE AEROSPACE STUDIES

Office: Second Floor, Middleton Hall
Lt. Col. Dickensheet, Capt. Mobley and Capt. Mitre

AS 2012. Air and Space Power-I. (2) Fall semester. One hour lecture. One hour practicum. Study of airpower development and employment in support of national objectives and an examination of the evolution of air power concepts and doctrine.

AS 2022. Air and Space Power-II. (2) Spring semester. One hour lecture. One hour practicum. A continuation of AS 2012 with emphasis on airpower since WWII.

AS 2523. Military Leadership I. (3). Three hours lecture. A study of leadership skills and concepts. This course is designed for students who are not pursuing a military commission. (MS 2523).

AS 3013. Air Force Leadership Studies-I. (3) (Prerequisites: AS 1012, AS 1022, AS 2012, and AS 2022 or permission of instructor). Fall semester. Three hours lecture. Two hours practicum. An integrated management course emphasizing leadership/management concepts and skills. Examines motivational and behavioral processes, leadership communication, decision making, ethics, organizational power, and managerial strategy.

ASE 1013. Introduction to Aerospace Engineering. (3) (Prerequisite: credit or co-registration in MA 1713). Three hours lecture. Three hours laboratory. Historical perspectives of aerospace engineering and fundamentals of aerodynamics, the standard atmosphere, computer modeling and manufacturing, information technology, programming environments, computational tools.

ASE 1023. Introduction to Flight Mechanics. (3) (Prerequisite: ASE 1013, grade of C or better in MA 1713, and current enrollment or grade of C or better in both MA 1723 and PH 2213). Three hours lecture. Three hours laboratory. Introduction to airfoils, wings, and other aerodynamic shapes, elements of airplane performance, principles of stability and control, applications of computer modeling, computational tools, historical perspectives.

ASE 1501. Student Design Competition. (1) (Pre/co-requisite: ASE student with MSU GPA 2.5 or greater or consent of instructor). One hour practicum. Students participate in a department-sponsored design competition, contributing to design and fabrication tasks, writing weekly progress reports, contributing to competition report and giving presentations.

ASE 2013. Astrodynamics, Propulsion and Structures. (3) (Prerequisite: ASE 1013 and a grade of C or better in MA 1713 and credit or registration in MA 1723 and PH 2213). Three hours lecture. Three hours laboratory. Introduction to space flight (astronautics), propulsion, flight vehicle structures and materials, and hypersonic vehicles, applications of computer modeling, computational tools, with historical perspectives.

ASE 2113. Introduction to Aircraft and Spacecraft Performance. (3) (Prerequisite: ASE 2013 and grade of C or better in MA 1723 and PH 2213). Three hours lecture. Introduction to general aerodynamics, propulsion and structural considerations of flight mechanics, quasi-steady flight; accelerated and maneuvering flight; launch vehicle performance; re-entry.

ASE 3123. Aircraft Attitude Dynamics. (3) (Prerequisites: ASE 2113 and grade of C or better in EM 3413). Three hours lecture. Longitudinal, directional, and lateral static stability and control; related aerodynamics; maneuvering; introduction to dynamic stability and control analysis methods; general equation of unsteady motion.

ASE 3223. Aerospace Structural Analysis. (3) (Prerequisite: grade of C or better in EM 3213). Three hours lecture. Stress analysis of elastic and inelastic structures under different loading conditions. Shear flow distribution in thin-wall structures. Influence of design on stress and shear flow distributions.

ASE 3313. Incompressible Aerodynamics. (3) (Prerequisite: grade of C or better in EM 3313). Three hours lecture. Potential theory of bodies; airflow theory and applications; finite wing theory and applications; introduction to Navier-Stokes equations; laminar boundary layers; turbulent boundary layers.

ASE 3333. Aerothermodynamics. (3) (Prerequisites: grade of C or better in MA 2733 and PH 2213). Three hours lecture. Energy, first and second laws of thermodynamics; entropy; properties of ideal gases; mixtures; gas power cycles; one-dimensional compressible flow; introduction to heat transfer.

ASE 3813. Introduction to Orbital Mechanics. (3) (Prerequisites: grade of C or better in EM 2433, MA 3253 and MA 3113). Three hours lecture. Two-body orbital mechanics; geometry of spatial orbits; fundamental orbit determination; orbital maneuvers; introduction to rendezvous and interplanetary trajectories.

ASE 3823. Spacecraft Attitude Dynamics. (3) (Prerequisite: ASE 3813). Three hours lecture. Motion of spacecraft about center of gravity. Rigid body dynamics and rotational kinematics. Mission pointing requirements and design of the attitude determination and control system.

ASE 4113. Aerospace Engineering Laboratory I. (3) (Prerequisites: Credit or registration in EM 3413 and GE 3513). Six hours laboratory. Experimental techniques used in aerospace engineering.

ASE 4123. Aerospace Controls. (3) (Prerequisite: ASE 3123 or ASE 3823). Three hours lecture. Methods of dynamic analysis; stability of steady flight; response to actuation of the controls (open loop); closed-loop control; human/vehicle interactions.

ASE 4133/6133. Automatic Control of Aerospace Vehicles. (3) (Prerequisite: ASE 4123). Three hours lecture. Optimization techniques; structural flexibility effects; statistical design; sample-data control systems.

ASE 4153/6153. Advanced Performance. (3) (Prerequisite: ASE 2113 or consent of instructor). Three hours lecture. Performance methods used for current aeronautical vehicles. Configurations considered are sailplanes, V/STOL aircraft, subsonic/supersonic transports, and fighters.

ASE 4163/6163. Introduction to Flight Test Engineering. (3) (Prerequisite: ASE 3313, ASE 4123). Three hours lecture. Introduction to the techniques of aeronautical flight test engineering. Supplements Aerospace curriculum Pitot/ static systems, and introduces fixed-wing flight test engineering, data reduction, certification, flight-test risk assessment/mitigation, and flight crew-station analysis procedures.

ASE 4233/6233. Structural Dynamics. (3) (Prerequisite: EM 3413) Three hours lecture. Influence coefficients; matrix methods; Lagrange’s equations of motion; divergence of an airfoil; introduction to flutter.

ASE 4333/6333. Helicopter Aerodynamics and Performance. (3) (Prerequisite: Consent of instructor). Three hours lecture. Hover, vertical, and forward

ASE 4343. Compressible Aerodynamics. (3) (Prerequisites: ASE 3333 and grade of C or better in EM 3313). Three hours lecture. Equations of motion for multidimensional flow; oblique shock waves; Prandtl-Meyer flow; internal flow; method of characteristics; linearized flows; compressible wing theory; compressible boundary layer.

ASE 4413. Aircraft Propulsion. (3) (Prerequisites: ASE 3333 and ASE 4343). Three hours lecture. Aerothermodynamics of aircraft jet engines and gas turbine engine components; nozzles; turbines; compressors; diffusers; introduction to piston engines; propellers and propeller performance estimation.

ASE 4422/6422. Introduction to Computational Fluid Dynamics. (3) (Prerequisite: Consent of instructor). Three hours lecture. Elementary aspects of computational fluid dynamics (CFD); review of numerical analysis and fluid mechanics as pertinent to CFD; numerical solution of selected fluid dynamic problems.

ASE 4433/6433. Fundamentals of Numerical Grid Generation. (3) (Prerequisite: Consent of instructor). Three hours lecture. Grid generation strategies; effects of grid quality on discretization errors; structured and unstructured grid generation algorithms; solution adaptive grid generation; surface grid generation.

ASE 4443. Spacecraft Propulsion. (3) (Prerequisites: ASE 3333 and ASE 4343) Three hours lecture. Nozzles and thermochemistry. Components, design and performance of liquid propellant, solid propellant, hybrid and electric rocket propulsion systems.

ASE 4513. Aircraft Design I. (3) (Prerequisites: ASE 3213, ASE 3313, ASE 3223). Two hours lecture. Three hours laboratory. Introduction to the principles and techniques of aircraft design. Introduction to systems engineering and requirement management; design optimization; layout, sizing, weight and performance estimation.

ASE 4523. Aircraft Design II. (3) (Prerequisite: ASE 4513). One hour lecture. Five hours laboratory. Continuation of ASE 4513. Students make use of principles and techniques covered in ASE 4513 to design a new aircraft.

ASE 4533. Spacecraft Design I. (3) (Prerequisites: ASE 3223, ASE 3813, ASE 3223) Two hours lecture. Three hours laboratory. Introduction to the principles and techniques of spacecraft and mission design. Systems engineering and requirement analysis, spacecraft system characteristics and mission phases.

ASE 4543. Spacecraft Design II. (3) (Prerequisite: ASE 4533) One hour lecture. Five hours laboratory. Continuation of ASE 4533, Spacecraft Design I. Application of design concepts and principles. Concentration on systems engineering, detail design, life cycle cost, manufacturing and operations.

ASE 4553/6553. Engineering Design Optimization. (3) (Prerequisite: Consent of instructor). Three hours lecture. Introduction to optimization criteria and optimization techniques for solving constrained or unconstrained optimization problems. Sensitivity analysis and approximation. Computer application in optimization. Introduction to MDO. (Same as EM 4143/6143 and IE 4743/6743).

ASE 4721. Aerospace Engineering Laboratory II. (1) (Prerequisite: ASE 4113. Three hours laboratory. Experimental techniques used in aerospace engineering; course requirements include individual research and formal research paper.

ASE 6013. Directed Project in Aerospace Engineering. (3). Contact hours and title to be arranged. An individual professional project open only to candidates for the Master of Science degree (non-thesis option). Formal written and oral project reports are required.

ASE 8313. Advanced Compressible Aerodynamics I. (3) (Prerequisite: ASE 4433 or equivalent). Three hours lecture. Derivation of complete equations for compressible fluid flow; unsteady one-dimensional flows; method of characteristics; flow about two-dimensional, and axis-symmetric shapes; integral methods.

ASE 8323. Advanced Compressible Aerodynamics II. (3) (Prerequisite: ASE 8313) Two hours lecture. Perturbation theory for wings and bodies; optimum wing and body shapes; wing-body interference; supersonic flows, hypersonic flows.

ASE 8343. Incompressible Viscous Laminar Flow. (3) (Prerequisite: Consent of instructor). Three hours lecture. Incompressible Navier-Stokes equations; properties and exact solutions; laminar boundary layer equations; two- and three-dimensional solutions; time-dependent solutions; approximate solutions; boundary layer control.

ASE 8353. Turbulent Flow. (3) (Prerequisite: ASE 8343). Three hours lecture. Origins of turbulence; stability statistical theory of turbulence; isotropic and non-isotropic turbulence; equations of turbulent flow; turbulent boundary layer; free turbulent flow.

ASE 8363. Computational Heat Transfer. (3) (Prerequisite: Consent of instructor). Three hours lecture. Application of numerical techniques to elliptic and parabolic problems in engineering heat transfer and fluid flow. Discretization techniques; linearization; stability analysis. (Same as ME 8363).

ASE 8413. Computational Fluid Dynamics I. (3) (Prerequisite: Consent of instructor). Three hours lecture. Review of relevant numerical analysis; one dimensional methods; compressible inviscid methods, Euler Equation methods, inviscid-viscous interaction methods; current literature.

ASE 8423. Computational Fluid Dynamics II. (3) (Prerequisite: ASE 8413 or equivalent). Three hours lecture. Compressible viscous methods; Navier-Stokes equation methods; turbulence models; incompressible methods; panel methods; finite element methods, current literature.

ASE 8713. Space Environments and Effects. (3) (Prerequisite: ASE 4533 and ASE 4543 or consent of instructor). Three hours lecture. Overview of the space environment and its effect on spacecraft. Modeling of the radiation and solar particulate environments. Designing survivable spacecraft.

ASE 8843. Advanced Mission Design. (3) (Prerequisite: ASE 4813/6813 or consent of instructor). Three hours lecture. In-depth application of orbital mechanics to design of various classes of space missions. Use of state-of-the-art software and techniques.

ASE 8853. Statistical Orbit Determination. (3) (Prerequisite: ASE 4813/6813 or consent of instructor). Three hours lecture. Review of matrix and statistical concepts. Overview of orbit determination problem. Least squares; sequential and batch processors; square-foot filters; discrete and continuous Kalman filters.

ASE 8863. Optimal Control of Dynamic Systems. (3) (Prerequisite: ASE 4121 or ECE 4913/6913 or equivalent). Three hours lecture. Static variable description of systems; maximum principle of Pontryagin, dynamic programming; optimization of linear systems with quadratic performance measures; time optimal and fuel optimal systems. (Same as ECE 8943).

ASE 8883. Spacecraft Dynamics, Design and Operations. (3) (Prerequisite: Graduate Engineering). Three hours lecture. Introduction to astrodynamics and satellite design. Intensive survey of orbital mechanics, attitude dynamics, satellite subsystems and operational considerations. Preparing engineers for advanced courses in astrodynamics.

Department of BIOCHEMISTRY and MOLECULAR BIOLOGY

Office: 402 Dorman Hall

Professors Jenkins*, Luthe*, Ma, Willard (head), Willeford and Williams*; Associate Professor Li and Peng; Assistant Professors Brown, Jung, Ray and Wubben*; Instructor Holmes (*- adjunct)

BCH 1001. Introduction to Biochemistry. (1) One hour lecture. A course to acquaint the beginning students with the overall concepts of biochemistry and molecular biology. Current research will be described. Offered every year.

BCH 2013. Introduction to Forensic Science. (3) (Prerequisite: BIO 1134, BIO 1144, or consent of instructor). Three hours lecture. Introduction to the field of forensic science, including areas of trace evidence, DNA, drug analysis, and an overview of forensic science techniques and technologies.

BCH 3901. Senior Seminar. (1) (Prerequisite: BCH 4613/6613). Each student to prepare and present a formal paper based on independent study of the literature and undergraduate research investigations.

BCH 4013/6013. Principles of Biochemistry. (3) (Prerequisites: CH 2503, BIO 1134 or equivalent). Three hours lecture. A survey of biochemistry designed to provide the non-major with a comprehensive background in the field. (Credit will not be given to students matriculating in the Biochemistry or Molecular Biology degree programs.)

BCH 4100. Biochemistry and Molecular Biology Internship. (1-6). Internship. Credit hours to be arranged. Supervised work, career shadowing, or research experience in disciplines related to biochemistry and molecular biology in an appropriate setting approved by the faculty advisor.

BCH 4113/6113. Essentials of Molecular Genetics. (3) Three hours lecture. A survey of molecular biology and genetics designed to provide the non-major with a comprehensive background in the field. (Credit will not be given to students matriculating in the Biochemistry or Molecular Biology degree programs.)

BCH 4253/6253. Nutritional Biochemistry of Foods. (3) (Prerequisite: CH 2503 or equivalent with consent of instructor). Three hours lecture. In-depth study of the chemistry and functionality of macronutrients in food systems and their biochemical impact on the human body. (Same as FNH 4253/6253).

BCH 4333/6333. Advanced Forensic Science. (3) (Prerequisites: BCH 4013/6013 or BCH 4603/6603 and BCH 4613/6613; or consent of instructor). Three hours lecture. An advanced study of the central concepts in forensic science as they relate to physiology, biochemistry and statistics.

BCH 4414/6414. Protein Methods. (4) (Prerequisite: Co-registration in BCH 4603/6603). Two hours lecture, one hour laboratory. A comprehensive course to teach the student the modern methods of protein biochemistry.
BCH 4503/6503. Scientific Communication Skills. (3) (Prerequisites: Undergraduate, non-BCH majors - junior or senior standing; BCH majors - co-registration in BCH 4414 or consent of instructor; or Graduate standing.) Three hours lecture. Introduction to developing literature information and survey of data manipulation and presentation skills.

BCH 4603-4613/6603-6613. General Biochemistry. (3-3) (Prerequisites: CH 4523/6523 or consent of instructor.) Three hours lecture. BCH 4603/6603 must be completed before student may enroll in BCH 4613/6613. Detailed studies of the structure and metabolism of carbohydrates, lipids, proteins, nucleic acids, enzymes, and coenzymes.

BCH 4623/6623. Biochemistry of Specialized Tissues. (3) (Prerequisite: Co-registration in BCH 4613/6613.) A continuation of BCH 4613/6613 to include a study of specialized tissues, hormones, acid-base balance in animals and other physiological parameters of biochemistry.

BCH 4713/6713. Molecular Biology (3) (Prerequisite: Co-registration in BCH 4613/6613). Three hours lecture. A study of basic molecular process such as replication of DNA, RNA, and protein in both prokaryotic and eukaryotic cells. Offered fall semester. (Same as GNS 6713).

BCH 4804/6804. Molecular Biology Methods. (4) (Prerequisite: Co-registration in BCH 4613/6613). Two hours lecture. Four hours laboratory. A comprehensive course to teach the student the modern methods of molecular biology. (Same as GNS 4804/6804).

BCH 8101. Seminar. (1) Review of current literature; individual presentation of research or classical topics.

BCH 8243. Molecular Biology of Plants. (3) (Prerequisite: Co-registration in BCH 4613/6613). Three hours lecture. A study of plant development at the molecular level. Emphasis will be placed on the influence of nucleic acid metabolism on plant development.

BCH 8631. Topics in Genomics. (1) (Prerequisites: PSS/BCH 8623 or BCH 4713/6713 or BCH 8643 or consent of instructor). Two hour discussion and presentation. Review and discussion of classic and current genomics literature; individual presentations of seminars highlighting an area of genomics research. (Same as PSS 8631)

BCH 8633. Enzymes. (3) (Prerequisites: BCH 4613/6613). Three hours lecture. A study of enzymes; their purification, classification, kinetics and mechanisms.

BCH 8643. Molecular Genetics. (3) (Prerequisites: PO 3103, or BIO 3103, and Co-registration in BCH 4613/6613). Three hours lecture. Study of the gene and its expression with emphasis on structure and function in higher organisms. (Same as GNS 8643).

BCH 8653. Genomes and Genomics. (3) (Prerequisites: BCH 4113/6113 or BCH 4713/6713 or BCH 8643 or consent of instructor). Overview of genome structure and evolution with emphasis on genomics, the use of molecular biology, robotics, and advanced computational methods to efficiently study genomics. (Same as GNS 8653).

BCH 8654. Intermediary Metabolism. (4) (Prerequisite: BCH 4613/6613). Four hours lecture. An advanced in-depth study of anabolic and catabolic pathways involved in cellular metabolism. Bioenergetics and control mechanisms will be emphasized.

BUILDING CONSTRUCTION SCIENCE

Associate Professor Haupp; Assistant Professor El-adaway

BCS 1013. Architecture Appreciation. (3). Three hours lecture. Illustrated study of architecture’s role in shaping the quality of man’s environment. Architectural history, design theory, and process as it affects daily life. Intended for non-majors. (Same as ARC 1013).

BCS 2116. Building Construction Studio 1. (6) (Prerequisites: BCS 1003, BCH 2733 and PH 1113, PH 1123). Six hours laboratory. In depth examination of the construction process; project life cycles; building construction materials and methods; systems; construction drawing and details; and construction finishes.

BCS 2126. Building Construction Studio 2. (6) (Prerequisites: BCS 2116). Six hours laboratory. In depth study of construction-related applications including health and safety, human resource management, industrial relations, environmental management, sustainability and disaster risk management.

BCS 2713. Passive Building Systems. (3). (Prerequisite: For architecture majors-ARC 1546 and PH 1123; for non-architecture majors-consent of instructor). Three hours lecture. Investigation of the morphological impacts of various environments energies on building forms and systems. Included are light, climatic, structural, and ecological factors. (Same as ARC 2713).

BCS 3116. Building Construction Studio 3. (6) (Prerequisites: BCS 2126) Six hours laboratory. In depth study of project management, construction management, plant and equipment management, logistics and operations management, and building pathology.

BCS 3126. Building Construction Studio 4. (6) (Prerequisites: BCS 3116). Six hours laboratory. In depth examination of the principles and applications of construction productivity, estimating and bidding procedures, cost alternatives, scheduling, labor pacing, bidding and project cashflow management.

BCS 3213. Electrical Systems. (3) (Prerequisite: BCH 3272). Three hours lecture. A detailed examination of the design and construction of building electrical systems.

BCS 3323. High Performance Construction. (3) (Prerequisites: BCS 3116 and BCH 3213) Three hours lecture. Advanced building fabrication and construction systems are explored including high-performance construction materials such as fiber-reinforced cement, fiber-reinforced plastics, polymeric materials, geosynthetics, masonry materials and coatings.

BCS 3713. Assemblages. (3). (Prerequisites: ARC 2546 or BCS 2126 and ARC/BCH 2723). Two hours lecture and one field study. Fabrication and construction are explored in the relationship between nature of materials and methods of assembly. (Same as ARC 3713).

BCS 3723. Active Building Systems. (3). (Prerequisites: ARC 3536 and ARC 35366 and ARC 3713 or non-architecture majors-BCS 2713 and BCS 2116 or consent of instructor). Three hours laboratory. Principles of statically applied forces of the principle of statics and the strength of materials on structural elements. Construction material. (Same as ARC 3904).

BCS 3914. Structures II. (4). (Prerequisite: BCS 3904). Three hours lecture. Three hours laboratory. Design and analysis structural elements as part of frames and other structural systems. (Same as ARC 3914).

BCS 4116. Building Construction Studio 5. (6) (Prerequisites: BCS 3126) Six hours laboratory. In depth evaluation of the legal and contractual environment for construction activities/projects. Emphasis on specifications; dispute resolution; construction contracts and procurement systems; and project delivery modeling.

BCS 4126. Building Construction Studio 6. (6) (Prerequisites: BCS 4116) Six hours laboratory. In depth study of project controls, risk management, strategic management, construction accounting, facilities and maintenance management, and international construction and contracting.

BCS 4223. Professional Practice. (3) (Prerequisites: BCS 3126) Three hours lecture. Construction ethics are reviewed in the broader context of architecture relative to social responsibility. Additional exploration includes professional ethics and emerging best practices.

Department of BIOLOGICAL SCIENCES

Office: 218 Harned Hall
Professors Coats, Dielst, First, Reichert (head), and Wise; Associate Professors Ervin, Kent-First, and Thibaud; Assistant Professors Brooks, Chen, Chevalier, Counterman, Donaldson, Gordon, Klink, Outlaw, Thornton, Wallace, and Welch; Instructors Doffit, Holder, Langlais, Williamson and Yost
Instructor and Director of Undergraduate Advising: Reese
Instructor and Director of Lab Operations: Echols

BIO 1004. Anatomy and Physiology. (4) Three hours lecture. Two hours laboratory. For non-science majors. Studies the structure and function of the human body with special emphasis on the muscular, nervous, circulatory, respiratory, digestive, urinary and reproductive systems.

BIO 1023. Plants and Humans. (3) Two hours lecture. Two hours laboratory. For non-science majors. Students may not have credit for both BIO 1023 and BIO 2116. An introduction to general biology courses transferred from other institutions. A survey of botany intended to introduce students to the world of plants, particularly emphasizing their relationships with humans and society.

BIO 1123. Animal Biology. (3) Two hours lecture. Two hours laboratory. For non-science majors. Basic understanding of life processes, diversity, inheritance, reproduction, ecology, and evolution.

BIO 1144. Biology II. (4) Three hours lecture. Two hours laboratory. Form and function of organisms including body plans and phylogeny, human evolution, plant anatomy and physiology, animal anatomy and physiology, reproduction, development, and animal behavior.

BIO 1301. Perspectives in Medical Technology. (1) One hour lecture. A survey of all aspects of medical technology.

BIO 2004. Human Anatomy. (4) Three hours lecture. Three hours laboratory. The study of the structure of the human body. The gross and microscopic anatomy of each organ system will be presented.

BIO 2144. Human Physiology. (4) (Prerequisites: BIO 1134, BIO 1144, CH 121 and CH 1223). Three hour lecture. Three hours laboratory. Study of physiological systems and principles and their interrelationship in humans. Designed for paramedical and pre-nursing students and dietetic majors.

BIO 2113, Plant Biology. (3) (Prerequisite: Sophomore standing.) Two hours lecture. Three hours laboratory. An introduction to the biology of vascular plants, including physiology, anatomy and morphology, development, genetics, evolution and diversity, ecology, and applied botany.

BIO 2213, Survey Plant Kingdom. (3) Two hours lecture. Two hours laboratory. A survey of algae, bryophytes, vascular plants, and fungi, with emphasis on morphology, internal anatomy, life cycles fossil record, and evolutionary relationships.

BIO 2503, Environmental Quality. (3) (Prerequisite: One course in biology.) Three hours lecture. Relevance of ecological principles to environmental problems and relationships of humans with their environment with emphasis on preservation of environmental quality.

BIO 3013, Professional Writing for Biologists. (3) (Prerequisite: Junior/ Senior standing in BIO, MIC, or MDT, or consent of instructor.) Three hours lecture. Refinedment of writing skills for more effective communications. Assignments to include routine and specialized correspondence, technical reports, and speech preparation and delivery.

BIO 3103, Genetics I. (3) (Prerequisites: MA 1313, BIO 1134 or BIO 2113 or equivalents). (Same as PO 3103 and GNS 3103).

BIO 3104, Ecology. (4) (Prerequisite: BIO 1134). Three hours lecture. Three hours laboratory. A general survey of ecological principles and concepts pertaining to plants and animals with reference to ecosystem structure and function, and interactions among ecosystem components.

BIO 3113, Marine Biology. (3) (Prerequisite: BIO 1134 or equivalent.) Three hours lecture. An introduction to marine environments, the diversity of life in the different marine habitats and human utilization of marine resources.

BIO 3303, Parasitology. (3) (Prerequisite: BIO 1134 or equivalent.) Two hours lecture. Three hours laboratory. A survey of parasitology to include parasites of importance to the health of humans and domestic animals.

BIO 3304, General Microbiology. (4) (Prerequisites: CH 1053 or CH 1223). Two hours lecture. Four hours laboratory. For science majors. Fundamentals; techniques; staining; microbial community and the use of microorganisms.

BIO 4004/6004. Environmental Microbiology. (4) (Prerequisite: BIO 3304). Two hours lecture. Four hours laboratory. Terrestrial, aquatic, and subsurface microbial ecosystems. Microbiology of water and wastewater treatment, solid waste disposal, land farming, impact of hazardous waste, and environmental reclamation.

BIO 4045/6045. Pathogenic Microbiology. (5) (Prerequisite: BIO 3304). Three hours lecture. Four hours laboratory. The microorganisms producing disease in man and lower animals; means of transmission, protection against disease.

BIO 4143/6143. Immunology. (3) (Prerequisite: BIO 3304 and CH 4513). Three hours lecture. Survey of the functions of the immune system. Emphasis on mammalian immunology, including T- and B-cell interactions in humoral and cell mediated immunity.

BIO 4414/6414. Microbiology of Foods. (4) (Prerequisite: BIO 3304). Three hours lecture. Four hours laboratory. Isolation and classification of the microorganisms associated with spoilage of commercial and domestic preserved foods. (Same as FHN 4414/6414).

BIO 4433/6433. Principles of Virology. (4) (Prerequisites: BCH 4603, BIO 3104, and BIO 3304 or equivalent). Three hours lecture. Principles of viral infectivity, multiplication, and chemical constitution.

BIO 4442/6442. Bacterial Genetics Laboratory. (2) (Prerequisite: BCH 4603, BIO 3304 and concurrent enrollment in BIO 4443/6443). Four hours laboratory. The genetic and molecular manipulation of bacteria and their viruses.

BIO 4443/6443. Bacteriology. (3) (Prerequisites: BCH 4603/6603 and BIO 3304 or consent of instructor). Three hours lecture. The genetics of bacteria and their viruses including: replication, rearrangement, repair, transfer, regulation, and methods of manipulation and analysis of DNA.

BIO 4463/6463. Bacterial Physiology. (3) (Prerequisites: BIO 3404 and BCH 4603). Three hours lecture. Structure and function relationships and major aerobic and anaerobic metabolic pathways in microorganisms.

BIO 4503/6503. Vertebrate Histology. (3) (Prerequisites: BIO 1134 and BIO 3304). Three hours lecture, laboratory. Study of the microscopic anatomy, structure, and function of major cell types and tissues.

BIO 4504/6504. Comparative Vertebrate Embryology. (4) (Prerequisite: BIO 1134 and BIO 1144). Two hours lecture. Six hours laboratory. The embryology of the vertebrates; the fertilization of the egg; stages of cleavage and the development of organs and systems.

BIO 4514/6514. Animal Physiology. (4) (Prerequisites: Ten hours of biological sciences and organic chemistry). Three hours lecture. Three hours laboratory. Function and interrelationship of the systems of the body. (Same as PH 6514).

BIO 4603/6603. Ethnobotany. (3) (Prerequisites: BIO 1134 and BIO 1144, or AN 1143 and AN 1343) Three hours lecture. Relationships between plants and humans through examination of human cultures, uses of plants, paleoethnobotany, and the science of botany.

BIO 4673/6673. Industrial Microbiology. (3) (Prerequisites: General knowledge of microbial anatomy, physiology, and genetics. Use of microorganisms and their by-products. Identification and control of biofouling, biocorrosion, and bio-degradation of products and processes. (Same as CHE 4673/6673).

BIO 8011. Seminar. (1) One hour. Weekly seminar on current research in the Biological Sciences. Attendance is mandatory for on-campus Biological Sciences students not enrolled in BIO 8021.

BIO 8013. Scientific Writing for Biological Scientists. (2) Three hours lecture. Preparation of the journal article, thesis, and dissertation; searching the literature; scientific illustration; oral presentation of a scientific paper.

BIO 8021. Seminar. (1) One hour. Weekly seminar on current research in the Biological Sciences and one formal presentation of the student’s research to the faculty and other seminar guests.

BIO 8103. Advanced Ecology. (3) (Prerequisite: BIO 3104). Two hours lecture. Three hours laboratory. Selected topics with special references to bioenergetics, population and human ecology; with student research project.

BIO 8163 Invasion Ecology. (3) Three hours lecture. Theoretical and empirical ecology of species invasion. Discussion-based with an emphasis on understanding the invasion process from ecological, evolutionary and biogeographical perspectives.

BIO 8213. Plant Water and Mineral Relations. (3) (Prerequisite: BIO 4214). Three hours lecture. Membrane structure and functions; plant and soil water relationships; absorption; translocation; transpiration; irrigation and mineral nutrition.

BIO 8223. Plant Metabolism. (3) (Prerequisites: BIO 4214 and organic chemistry). Three hours lecture. Photosynthesis, respiration, nitrogen metabolism, and other metabolic processes.

BIO 8233. Molecular Applications. (3) Two hours lecture. Two hours laboratory. Discussion of the fundamental principles behind basic molecular applications used in biology with a focus on methods employed to study DNA, RNA and proteins.

BIO 8453. Advanced Virology. (3) (Prerequisite: Cell Biology or equivalent). Three hours lecture. Literature survey in virus research.

Off Campus

The courses listed below are offered during the year of clinical training at affiliated hospitals. (See list of affiliate hospitals.)

BIO 4624. Immunohematology. (4) (Prerequisite: Completion of all preprofessional requirements). Three hours lecture. Six hours laboratory. Blood group serology, compatibility testing, and identification of atypical antibodies. Transfusion practices and blood group immunogenetics.

BIO 4626. Hematology. (6) (Prerequisite: Completion of all preprofessional requirements). Four hours lecture. Eight hours laboratory. Normal and abnormal blood and bone marrow cells. Coagulation mechanisms.

BIO 4636. Clinical Chemistry. (8) (Prerequisite: Completion of all preprofessional requirements). Four hours lecture. Eight hours laboratory. Normal and abnormal human body chemistry. Emphasis on instrumentation.

Offered during the Summer at Gulf Coast Research Laboratory.

BIO 4336/6336. Marine Invertebrate Zoology II. (6) (Prerequisite: Sixteen hours of zoology and junior standing). Same as GCCLR Zoology 361B. All phyla from Ollusca through protochordates are covered in this course.

BIO 4345/6345. Marine Zoology. (5) (Prerequisite: Sixteen hours of biology including general botany and invertebrate zoology). Same as GCCLR Zoology 452. A consideration of the relationships of marine organisms to their environment.

BIO 4526/6526. Marine Aquaculture. (6) (Prerequisites: General zoology, invertebrate and vertebrate zoology, or consent of instructor). Same as GCCLR Zoology 464. A course designed to acquaint advanced biology students with the science of marine aquaculture.

The courses listed below are exclusively offered through distance education for the M.S. in General Biology degree program.

BIO 6013. Genetics and Molecular Biology. (3) (Prerequisite: consent of instructor). Three hours lecture and three hours video and online. Analysis of the transmission of genetic information from molecule to organismal levels; examination of ways in which genotype determines phenotype. (Intended for K-12 science teachers. Course cannot be used to satisfy degree requirements in a non-distance degree program.)

BIO 6023. Principles of Evolutionary Biology. (3) (Prerequisite: consent of instructor). Three hours lecture and three hours video and online. Concepts related to natural selection and evolution. The role of microorganisms in human health and the environment. (Intended for K-12 science teachers. Course cannot be used to satisfy degree requirements in a non-distance degree program.)

BIO 6033. fundamentals of Biotechnology. (3) (Prerequisite: BIO 6013 and BIO 8033, or consent of instructor). Three hours video and online. Fundamental principles of animal and plant biotechnology including recombinant DNA technology, gene-based diagnostics, genetically modified organisms and transgenics. (Intended for K-12 science teachers. Course cannot be used to satisfy degree requirements in a non-distance degree program.)

BIO 6043. Developmental and Reproductive Biology. (3) (Prerequisites: BIO 6013 and BIO 8033, or consent of instructor). Three hours video and online. Study of reproduction and development from gametes through birth in mammals; focusing on stages, anatomy, physiology, mechanisms, genetics. (Intended for K-12 science teachers. Course cannot be used to satisfy degree requirements in a non-distance degree program.)

BIO 6083. Advanced Cell Biology. (3) (Prerequisite: consent of instructor). Three hours video and online. Study of eukaryotic cellular and sub-cellular structure and function; integration of cellular processes to understand the cell as a whole. (Intended for K-12 science teachers. Course cannot be used to satisfy degree requirements in a non-distance degree program.)

BIO 6084. Ecology and the Environment. (3) (Prerequisite: consent of instructor). Three hours video and online. Introduction to business, ecological hierarchies, and interactions between biota and the environment. Includes an introduction to contemporary environmental science issues. (Intended for K-12 science teachers. Course cannot be used to satisfy degree requirements in a non-distance degree program.)

BIO 8053. Comprehensive Study of Animals. (3) (Prerequisites: BIO 6023 and consent of instructor). Three hours video and online. Study of invertebrate and vertebrate animals, including reproduction, development, physiology, behavior, ecology and evolution. (Intended for K-12 science teachers. Course cannot be used to satisfy degree requirements in a non-distance degree program.)

BIO 8063. Comprehensive Study of Plants. (3) (Prerequisites: BIO 6023 or consent of instructor). Three hours video and online. Study of plants from phylum Protista through angiosperms, including growth, photosynthesis, respiration, nutrition, reproduction, ecology and evolution. (Intended for K-12 science teachers. Course cannot be used to satisfy degree requirements in a non-distance degree program.)

BIO 8073. Research Methods in Biological Sciences for Interdisciplinary Sciences. (3) (Prerequisites: Fifteen hours of BIO graduate work and consent of instructor). Three hours video and online. Experiment design and methods for statistical analysis of biological data, with an emphasis on inquiry using the scientific method. (Intended for K-12 science teachers. Course cannot be used to satisfy degree requirements in a non-distance degree program.)

BIO 8083. Capstone in Interdisciplinary Sciences with an Emphasis on Biological Sciences. (3) (Prerequisites: 15 hours of BIO graduate work and consent of instructor). Two hours lecture. Three hours laboratory and observing. Provides field experience in the biological sciences through planned and supervised projects and field trips. (Intended for K-12 science teachers. Course cannot be used to satisfy degree requirements in a non-distance degree program.)

BIO 8183. Capstone in Modern Biology. (3) (Prerequisites: 30 hours of BIO graduate work and consent of instructor). Two hours lecture. Three hours laboratory. Hands-on laboratory and field experiences which demonstrate the major techniques of molecular, cellular, organismal and ecological biology. (Intended for K-12 science teachers. Course cannot be used to satisfy degree requirements in a non-distance degree program.)

BUSINESS INFORMATION SYSTEMS

(Business for departmental information, see DEPARTMENT of MANAGEMENT and INFORMATION SYSTEMS.)

BIS 1012. Introduction to Business Information Systems. (2) Two hours lecture. Overview of business information systems. Application of computer hardware, software, data, and procedures to business processes. Covers emerging technologies, personal productivity packages and the Internet.

BIS 1733. Visual Basic Programming. (3) Three hours lecture. Introduction to procedural, event and object-oriented programming to develop business and e-commerce applications.

BIS 1753. Introduction to Business COBOL. (3) (Prerequisite: a grade of B or higher in BIS 1733, or a grade of B or higher in any 3 hours of computer programming, or graduate standing). Three hours lecture. Structured program design for business applications. Data editing, table handling, and file processing with sequential and random access files will be stressed.

BIS 3233. Management Information Systems. (3) Three hours lecture. A survey of the components, functions, and processes of information systems as they relate to managing modern organizations for increased efficiency and competitiveness.

BIS 3523. Advanced Languages I. (3) (Prerequisites: Grades of B or higher in BIS 1733 and 1753, or a grade of B or higher in any 6 hours of computer programming, or graduate standing). Three hours lecture. Current and advanced business programming topics. In-depth experience in programming in one or more current state-of-the-art languages.

BIS 3713. Electronic Information Systems. (3) (Prerequisite: Junior Standing and six hours of mathematics and/or statistics, or consent of instructor). Three hours lecture. Principles of business information systems using computer equipment. Business problem solving, including problem definition, flow charting, basic programming and input/output design. Credit for this course may be earned only at the Meridian and Jackson branches of Mississippi State University. Credit will not be granted for this course and BIS 1012 or CSE 1013.

BIS 3753. Business Database Systems. (3) (Prerequisite: Grades of B or higher in BIS 1733 and 1753, or a grade of B or higher in any 6 hours of computer programming, or graduate standing). Three hours lecture. Introduction to business database applications. Includes data modeling, design techniques, and data collection, storage, manipulation, and retrieval strategies.

BIS 4113/6113. Business Information Systems Security Management. (3) (Prerequisites: BIS 3223 or grade of B or higher in any 3 hours of computer-related coursework). Three hours lecture. Concepts, skills, tools and techniques
involved in management of computer security as it applies to today's business environment.

BIS 4513/6513. Microcomputers and Networks. (3) (Prerequisite: BIS 3523 or equivalent, or grade of B or higher in any 3 hours of computer-related coursework). Three hours lecture. Concepts and technology of microcomputers and of computer networks. Experience in building and maintaining microcomputers and networking hardware and software components. (Same as REF 4513/6513). Two hours laboratory. 

BIS 4553/6553. Decision Support Systems. (3) (Prerequisite: BIS 3233 or equivalent). Three hours lecture. Theory and application of decision support, business intelligence, integrated collaboration systems, and data mining using advanced computing techniques. Hands-on experience in developing decision support systems.

BIS 4753. Structured Systems Analysis and Design. (3) (Prerequisite: Grades of B or higher in BIS 1733 and BIS 1753, or grades of B or higher in any 6 hours of computer programming). Three hours lecture. Analysis/design of computer-based information systems with emphasis on project identification, requirements structuring, and solution generation in theory and in a business project.

BIS 4763. BIS Senior Seminar. (3) (Prerequisite: Senior standing, plus grades of B or higher in BIS 1733 and BIS 1753, plus 9 additional hours of upper-level BIS courses, or consent of instructor). Three hours lecture. Preparation for information systems curriculum. Students engage in information management, technical skill building, and technology updates emphasizing fundamentals of e-commerce technology and ubiquitous business models.

BIS 8112. Managing Information Technology and Systems. (2) Two hours lecture. Course includes the description, acquisition or development and use of systems from a local and global perspective. Technology-enabled concepts are used for student assignments.

BIS 8113. Management Information Systems. (3) (Prerequisite: BIS 1012). Three hours lecture. Concepts and technology required by managers to interface with an organization’s MIS functions. Impact of various MIS strategies, operations, and controls are developed and evaluated.

BIS 8122. Multimedia Presentation and Communication. (2) (Prerequisite: Graduate Standing). Two hours lecture. Emphasis on planning and delivering business presentations enhanced by multimedia. Concepts, design, and experience in developing multimedia presentations. Exposure to interactive multimedia.

BIS 8213. Advanced Systems Analysis and Design. (3) (Prerequisite or co-requisite: BIS 8112 or any 3 hours of computer-related coursework). Three hours lecture. Analysis/design of computer-based information systems using structured methodologies. Emphasis on problem definition, requirements analysis, system design, project management, vendor relations, and quality assurance.

BIS 8313. Advanced Database Design Administration. (3) (Prerequisite: Three hours of computer programming with a grade of B or better) Three hours lecture. Design and management of local and distributed data resources, database design, definition, creation, maintenance, acquisition and use. Role of Database Administrator.

BIS 8413. Decision Support and Expert Systems. (3) (Prerequisites: Three hours of programming and prerequisite or co-requisite: BIS 8112). Three hours lecture. Analysis of information support systems which serve the manager/user providing quantitative and qualitative based information derived from databases and modeled bases.

BIS 8513. Business Telecommunications. (3) (Prerequisite or co-requisite: BIS 8112 or equivalent). Three hours lecture. The evaluation, analysis and design of information systems utilizing telecommunications and networking concepts and techniques. Emphasis is on business applications and related considerations.

BIS 8613. MIS Administration. (3) (Prerequisite or co-requisite: BIS 8112 or equivalent). Three hours lecture. Administration of the MIS function in the business enterprise. Emphasis on activity of managing the IS function at all levels of the firm.

BIS 8753. Information Systems Collaborative Project. (3) (Prerequisite: Nine hours of graduate BIS coursework beyond BIS 8112). Three hours lecture. Capstone experience incorporating knowledge gained in prerequisite courses. Requires team participation using appropriate tools and methodologies in assisting organizations with real-world information and communication systems related needs.

BIS 8913. Management Information Systems (MIS) Seminar. (3) (Prerequisite: BIS 8213, BIS 8313). Three hours lecture. Penetrating review of issues, methodologies and new developments in design and operation of management information, decision support, and computer-based decision-making systems.

BIS 9213. Advanced Topics in MIS Research. (3) (Prerequisite: BIS 8213, BIS 8313, or consent or instructor). In-depth study of MIS research topics. Review of emerging theories and methodologies, scientific empiricism, modeling, validity, measurement, research design, journal review, and research project management.

BIS 9313. Qualitative Research in MIS. (3) Three hours lecture. Emphasis is on evaluating the operation and contribution of qualitative research in MIS. The approach, conduct, and evaluation of qualitative research.
with the fundamentals of scientific research and the classical and modern quantitative methods of analysis useful in business research.

BQA 9333. Statistical Methods for Business Research. (3) (Prerequisite: Doctoral student or consent of instructor.) Three hours lecture. Understanding and communicating statistical methods for business and economics academic publications; descriptive statistics; random variables; estimation; Bayesian credible sets; hypothesis testing; regression; nonparametrics; computerized analysis.

BQA 9334. Advanced Statistics for Business Decisions. (3) (Prerequisite: BQA 8443). Three hours lecture. Multivariate analysis; multiple regression analysis; multiple discriminant analysis; multivariate analysis of variance and covariance; factor analysis; cluster analysis.

BUSINESS

BUS 1111. Freshman Business Plan. (1) One hour lecture. This course is designed to help entering freshmen business majors succeed in their degree program and begin preparation for a business career after graduation.

BUS 3011. Academic Peer Advising I. (1) (Prerequisites: Junior standing and consent of instructor, for Business majors only.) One hour lecture. Study of the role, benefits, objectives, and practice of academic peer advising.

BUS 3021. Academic Peer Advising II. (1) (Prerequisites: BUS 3011 and consent of Instructor, for Business majors only). One hour laboratory. Laboratory application of academic peer advising.

BUS 3031. Academic Peer Advising III. (1) (Prerequisites: BUS 3011, BUS 3021, and consent of Instructor, for Business majors only). One hour lab. Laboratory application of academic peer advising.

BUS 4203. Business Internship. (3) (Prerequisite: Approval of Assistant Dean for Undergraduate Programs prior to internship). A minimum of ten weeks consisting of forty hours per week of business or public service experience.

BUS 4853. Business Policy. (3) (Prerequisites: Graduating senior and MKT 3013, MGT 3114, BIS 3233 and FIN 3123). Three hours lecture. Administrative process under conditions of uncertainty. Emphasis in integrating knowledge acquired in the functional areas of business administration in formulating administrative policies.

COMMUNITY COLLEGE LEADERSHIP

(For departmental information, see LEADERSHIP and FOUNDATIONS.)

CCL 8113. Community College History/Philosophy. (3) Three hours lecture. Objectives of the community college, philosophical/historical bases, changing roles, objectives, and practice of academic peer advising.

CCL 8233. Community College Legal Issues. (3) Three hours lecture. In-depth analysis of the legal/policy issues pertaining to students, faculty, and administrations of community colleges.

CCL 8313. Community College Instructional Assessment. (3) Three hours lecture. In-depth analysis of community college setting, students, courses planning, and assessment of instruction, including techniques associated with effective teaching and assessment in the community college arena.

CCL 8333. Community College Administration. (3) Three hours lecture. In-depth analysis of community college governance, structure, functions, and its relationship with external groups, state government.

Department of CIVIL & ENVIRONMENTAL ENGINEERING

Office: 235 Walker Engineering Building
Professors Truxx (head), Martin, and White; Associate Professors Gullett and Magbanua; Assistant Professors El-adaway, Freyne, Howard, Sauzier, Smith and Zhang; Instructor King

CE 1001. Introduction to Civil Engineering. (1) Three hours lecture. Introduction to the Civil Engineering profession, career opportunities, and curriculum. Engineering problem-solving, basic computing skills and tools as used in Civil Engineering. Oral, graphic, and written communications.

CE 2213. Surveying. (3) (Prerequisite: Credit or enrollment in CE 1001 or minimum grade of C in ABE 2873 (ABE students only)). Two hours lecture. Four hours field and problem work. Fundamentals of field measurements. Theory, selection, and use of surveying instruments; theories used in the adjustment of surveys.

CE 2803. Environmental Engineering Issues. (3) (Prerequisite: Grade of C or better in CH 1223). Three hours lecture. An overview of the scientific, social and legal issues impacting environmental management and protection in the United States.

CE 3113. Transportation Engineering. (3) (Prerequisite: Grade of C or better in CE 2213). Three hours lecture. An introduction to the general modes of transportation, the planning processes associated with the modes of transportation and design of transportation facilities.

CE 3313. Construction Materials. (3) (Prerequisite: Grade of C or better in CE 3413; credit or enrollment in ST 3123). Two hours lecture. Three hours laboratory. Physical and mechanical properties of basic civil engineering construction materials. Significance of and reasons for testing control and specifications of materials.

CE 3413. Soil Mechanics. (3) (Prerequisite: Credit or current enrollment in EM 2313). Three hours lecture. Three hours laboratory. Introduction to soil properties and behavior. Emphasis is placed on relating soil properties to compressibility and shear strength of soils.

CE 3601. Stress Analysis Laboratory. (1) (Prerequisite: Credit or current enrollment in EM 3213; current enrollment in CE 3603). Three hours lecture/laboratory. Concepts of stress, strain and deformations in bodies subjected to axial, bending, torsional and thermal effects. Stresses in pressure-loaded, thin-wall vessels. Buckling of columns.

CE 3603. Structural Mechanics. (3) (Prerequisite: Grade of C or better in EM 3213). Three hours lecture. Methods of structural analysis for determinate beam structures and frames; influence lines and moving/moveable loads; structure deflections; introduction to statically indeterminate structures.

CE 3801. Environmental Engineering and Water Resources Engineering Laboratory I. (1) (Co-requisite: Credit or concurrent enrollment in CE 3803). Three hours laboratory. A laboratory introduction to processes and operations used in systems for water supply and wastewater reclamation.

CE 3803. Environmental Engineering and Water Resources Engineering I. (3) (Prerequisite: Grade of C or better in CE 2803; credit in ST 3123). Three hours lecture. An introduction to the analysis and design of systems for hydraulic and hydrologic management, water supply, and wastewater reclamation.

CE 3811. Environmental and Water Resources Engineering Laboratory II. (1) (Co-requisite: Credit or concurrent enrollment in CE 3813). Three hours laboratory. A laboratory introduction to the analysis and design of systems for hydraulic and hydrologic management.

CE 3813. Environmental and Water Resources Engineering II. (3) (Prerequisite: Grade of C or better in CE 3803). Three hours lecture. Pressurized flow in pipe networks. Analysis and design of water distribution, stormwater collection and sanitary sewer systems.

CE 4103/6103. Pavement Design. (3) (Prerequisite: Grade of C or better in CE 3113 and CE 3413). Three hours lecture. Analysis and design of both flexible and rigid pavement structures.

CE 4133. Geometric Design of Highways. (3) (Prerequisite: Grade of C or better in CE 2213 and CE 3113). Three hours lecture. Highway design, organization and planning. Economic analysis. Elements of highway and street design.

CE 4143/6143. Traffic Engineering. (3) (Prerequisite: Grade of C or better in CE 3113; credit in ST 3123). Three hours lecture. Human and vehicular characteristics as they affect highway traffic flow; traffic regulation, accident cause and prevention; improving flow on existing facilities; planning traffic systems.

CE 4183/6183. Waterborne Transportation Engineering. (3) (Prerequisite: Grade of C or better in CE 3113). Three hours lecture. Navigation vessels and their characteristics. Planning and design of Marine Transportation System facilities including navigation ports, channels and locks.

CE 4233/6233. Control Surveys. (3) (Prerequisite: Grade of C or better in CE 2213). Three hours lecture. Four hours laboratory. Methods and procedures for performing control surveys.

CE 4243/6243. Land Surveys. (3) (Prerequisites: Grade of C or better in CE 2213). Three hours lecture. Methods of surveying and describing property with emphasis on Mississippi’s public land surveys.

CE 4313/6313. Advanced Concrete Materials. (3) (Prerequisite: Grade of C or better in CE 3313). Three hours lecture. Modern materials and methods for construction involving portland cement concrete, mechanical properties, durability considerations.

CE 4433. Foundations. (3) (Prerequisite: Grade of C or better in CE 3413). Three hours lecture. Introduction to exploration and engineering evaluation of subsurface and groundwater conditions for selection and design of foundations for structures and earth masses.

CE 4513/6513. Engineering Hydrology. (3) (Prerequisite: Grade of C or better in CE 3803). Three hours lecture. Hydrologic processes; rainfall-runoff analysis; groundwater flow; frequency analysis; hydrologic design.

CE 4523/6523. Open Channel Hydraulics. (3) (Prerequisite: Grade of C or better in CE 3813). Three hours lecture. Continuity, energy and momentum principles in open channel flow; flow resistance; uniform and non-uniform flow; channel controls and transitions; unsteady flow routing.
CE 4533/6533. Computational Methods in Water Resources Engineering. (3) (Prerequisite: Grade of C or better in CE 3813). Three hours lecture. Review of relevant numerical analysis; numerical methods for kinematic wave, St Venant, Boussinesq and depth-averaged equations; simulation of one- and two-dimensional free-surface flows.

CE 4543/6543. Advanced Reinforced Concrete. (3) (Prerequisite: Grade of C or better in CE 4601 and CE 4673). Three hours lecture. Two-way slab systems, shear walls, retaining walls, bi-axial bending of columns, torsion, brackets and corbels. Introduction to prestressed concrete.

CE 4563/6563. Sedimentation Engineering. (3) (Prerequisite: Grade of C or better in CE 4523/6523). Three hours lecture. Processes by which cohesive and noncohesive sediments are transported in overland flow and in rivers, reservoirs, estuaries and coastlines. Deposition and erosion rates; design criteria.

CE 4601. Fundamentals of Structural Design. (1) (Prerequisites: ST 3123; a grade of C or better in CE 3603 and 3601; concurrent enrollment in CE 4623 or CE 4633). Three hours laboratory. Concepts of structural design common to all Civil Engineering structural design courses; advanced load analysis in structural engineering; introduction to structural design software.

CE 4603/6603. Indeterminate Structures I. (3) (Prerequisite: Grade of C or better in CE 3603). Three hours lecture. A study of the several classical methods frequently used in the analysis and design of indeterminate structures. Introduction to modern methods of structural analysis.

CE 4613/6613. Analysis of Structures for Forces of Nature. (3) (Prerequisite: Grade of C or better in CE 4601; credit or current enrollment in CE 4623 or 4601). Three hours lecture. Determination of structural design forces caused by effect of weather, with particular emphasis on wind and seismic forces. Application of current design codes and standards.

CE 4623. Steel Structures. (3) (Prerequisite: Grade of C or better in CE 3603 and 3601; concurrent enrollment in CE 4601). Three hours lecture. LRFD design of steel structures using the specifications of the American Institute of Steel Construction. Emphasis on structural members; introduction to connections.

CE 4633. Concrete Structures. (3) (Prerequisite: Grade of C or better in CE 3603 and 3601; concurrent enrollment in CE 4601). Three hours lecture. Design design of concrete structures using the specifications of the American Concrete Institute. Emphasis on members and components.

CE 4653/6653. Timber Design. (3) (Prerequisite: Grade of C or better in CE 3603 and CE 3601.) Engineering properties of wood. Design of timber structures using the National Design Specifications and the International Building Code. Emphasis on members and connections; introduction to systems.

CE 4663/6663. Matrix Methods of Structural Analysis. (3) (Prerequisite: Grade of C or better in CE 3603 or consent of instructor). Three hours lecture. Linear algebraic equations, Gaussian elimination, direct stiffness analysis of trusses, frames, and other structure types.

CE 4673/6673. Bridge Design. (3) (Prerequisite: Grade of C or better in CE 4601 and CE 4633, or consent of instructor). Three hours lecture. Design of highway bridges using the LRFD Specifications of the American Association of State Highway and Traffic Officials. Emphasis on prestressed concrete bridges. Comprehensive design assignments for typical bridge layouts.

CE 4683/6683. Advanced Steel Design. (3) (Prerequisite: Grade of C or better in CE 4601 and CE 4623). Three hours lecture. Design of connections, advanced analysis, and structural steel systems.

CE 4693/6693. Reliability of Structures. (3) (Prerequisite: IE 4613; credit or current enrollment in CE 4623 or CE 4633, or consent of instructor). Three hours lecture. Introduction to the theory of structural reliability. Topics include probabilistic measures of safety, load models, resistance models, component and system reliability, and the design of material limit states.

CE 4703/6703. Construction Engineering and Management. (3) (Prerequisite: Within 30 CE credit hours of graduation). Three hours lecture. Construction contracts and law, cost estimating, and project scheduling.

CE 4733/6733. Construction Engineering Equipment and Methods. (3). Three hours lecture. Aspects of planning, operation and management of civil engineering support equipment, site logistics, equipment cost engineering, power systems and environmental considerations of equipment use.

CE 4843/6843. Environmental Engineering Chemistry. (3) (Prerequisite: Grade of C or better in CE 3803 or consent of instructor). Three hours lecture. Introduction to advanced theoretical concepts in sanitary engineering analysis with special emphasis on inorganic, organic, and physical chemistry.

CE 4873/6873. Water and Wastewater Engineering. (3) (Prerequisite: Grade of C or better in CE 3803). Two hours lecture. One hour laboratory. Evaluation of municipal water and waste-water characteristics and flows; application of various unit processes/unit operations for the treatment of municipal water and wastewater.

CE 4893/6893. Hazardous Waste Management. (3) (Prerequisite: Consent of instructor). Three hours lecture. Examination of state-of-the-art technologies available for the handling treatment; storage; and disposal of hazardous waste materials.

CE 4903/6903. Civil Engineering Comprehensive. (3) (Prerequisite: Graduation semester). Engineering, ethical and professional practice considerations in the planning, design and construction of civil engineering projects.

CE 8133. Traffic Flow Theory. (3) (Prerequisite: Grade of C or better in CE 4141/6141 or equivalent). Three hours lecture. An analysis of the engineering and mathematical principles of traffic flow.

CE 8203. Finite Element Modeling in CEE. (3) (Prerequisites: EM 4123/6123 and consent of instructor). Three hours lecture. Modern finite element methods for continuum mechanics relevant to civil and environmental engineering, including surface and subsurface fluid flow, mass transport, and solid mechanics.

CE 8303. Material Characterization. (3) (Prerequisite: CE 3413 and CE 3313 or equivalent). Three hours lecture. Characterization of advanced material behaviors for civil engineering surface courses. Stress dependency, viscoelasticity, repeated load moduli, and stabilization are central behaviors of interest.

CE 8333. Pavement Performance and Rehabilitation. (3) (Prerequisites: CE 3413, CE 3313 and CE 4103/6103, or consent of instructor) Three hours lecture. Field data, pavement performance including surveys, profiling, and frictional resistance. Impulse deflection testing of structural integrity. Pavement preservation and rehabilitation techniques.

CE 8343. Advanced Pavement Materials. (3) (Prerequisite: CE 3413 and CE 3313, or equivalent) Three hours lecture. Properties, behavior and performance of herbaceous and airfield paving materials, principally layer design, aggregate, and concrete. Quality control and assurance. Constitute material properties and specifications.

CE 8433. Advanced Foundations. (3) (Prerequisite: Grade of C or better in CE 4433 or equivalent). Three hours lecture. A continuation of CE 4433 with emphasis on unusual foundation solutions and footings.

CE 8453. Physical Properties of Soils. (3) (Prerequisite: Grade of C or better in CE 3413 or equivalent). Two hours lecture. Three hours laboratory. A study of the physical properties of soil masses as related to foundation engineering.

CE 8543. Hydraulic Structures and Hydraulics of Open Channels (3) (Prerequisites: Consent of instructor). Three hours lecture. Hydrodynamics and transport in tidal bays and estuaries. Unsteady, non-uniform stratified flows, tides, waves, currents, circulation, salinity intrusion, and sedimentation, and engineering analysis and works.

CE 8563. Groundwater Resource Evaluation. (3) (Prerequisite: Grade of C or better in CE 3813 or equivalent). Three hours lecture. Equations of groundwater flow; confined and unconfined flow; wells and well field analysis; groundwater quality; aquifer management.

CE 8573. Hydro-environmental Analysis. (3) (Prerequisite: CE 8923) Three hours lecture. Environmental engineering aspects of physical/chemical/biological processes and impacting conventional and nonconventional pollutants in surface waters. Characteristics of rivers/streams, lakes and estuaries related to environmental quality.

CE 8593. Environmental Hydrology. (3) (Prerequisite: Consent of instructor). Three hours lecture. Discuss hydrologic cycle and its effects on water quality; principles and models for pollutant transport and transformations in surface runoff, in-stream, unsaturated soil, and groundwater.

CE 8623. Theory of Plates and Shells. (3) (Prerequisites: Grade of B or better in CE 3603 or consent of instructor). Three hours lecture. Equations of equilibrium for plates, slabs, and shells.

CE 8683. Finite Element Analysis in Structural Engineering. (3) (Prerequisite: CE 3363/6363 or equivalent). Three hours lecture. Finite element analysis of structures and structural systems. Emphasis on three-dimensional and curved elements. Application to plates and shells. Use of computer programs.

CE 8803. Unit Processes and Operations in Environmental Engineering II. (3) Three hours lecture. Theory and application of physical and chemical unit processes and operations available for the treatment of water and wastewater.

CE 8843. Water Treatment Plant Design. (3) (Prerequisite: Grade of B or better in CE 8803). Three hours lecture. An in-depth consideration of criteria for the selection of water sources for a potable supply. Theory and design considerations for selecting treatment alternatives.

CE 8863. Solid Waste Management. (3) (Prerequisite: Consent of instructor). Three hours lecture. Define and characterize non-hazardous solid wastes and how to minimize, handle, transport, store, recycle and dispose of these materials.

CE 8923. Surface Water Quality Modeling. (3) (Prerequisite: Consent of instructor). Development of the mathematical formulations describing the distribution of concentration of conservative and nonconservative pollutants in natural waters.

CE 8933. Surface Water Quality Modeling II. (3) (Prerequisite: CE 8923) Three hours lecture. Advanced topics related to surface water quality modeling. Overview of the present state-of-the-art of modeling, analysis of eutrophication, toxic materials (organic chemicals and metals) and review of recent trends.

CE 8953. Fine Sediment Processes. (3) (Prerequisite: Consent of instructor). Three hours lecture. Sediment processes in transport, deposition, and erosion by water. Fluid-particle interactions, flocculation processes in clay sediments, lutocline formations and fluid mud, bed formation processes.

CE 8963. Hydraulics of Closed Conduits. (3) (Prerequisite: Consent of instructor). Three hours lecture. Analysis of steady, quasi-steady, time-dependent,
and transient conduit flow; flow resistance; system components; distribution systems; compute applications to closed conduits.

Department of CHEMISTRY

Office: 1115 Hand Chemical Laboratory
Professors Lewis (Head), Mead, Rabideau, Saebi, Sygula and Wipf; Associate Professors Armbrust, Foster, Gwaltney, Henry and T. Mlsna
Assistant Professors Emerson, G. Rowland and Zhang; Assistant Research Professor Beard;
Instructors Collier, Frisch, Holman, and D. Mlsna

Only one course from each group may count toward degree: CH 1043, CH 1213, CH 1053, or 1223; CH 1221 or 1051; CH 2503 or 4513.

CH 1141. Professional Chemistry: Paths. (1) Skills to be successful as chemistry major and possible careers in chemistry. Introduction to professional conduct of scientists and necessary computer skills.

CH 1211. Investigations in Chemistry I. (1) (Prerequisite: Credit or concurrent enrollment in CH 1213). Three hours laboratory. Selected experiments to illustrate the fundamentals of chemistry. Accompanies CH 1213.

CH 1213. Chemistry I. (3) (Prerequisites: ACT Math subscore of 22 or grade of C or better in MA 1513). Three hours lecture. The principles of atomic and molecular structure, energetics, dynamics, and synthesis as related to chemical systems. Designed as preparation for upper division chemistry courses.

CH 1221. Investigations in Chemistry II. (1) (Prerequisites: CH 1211 and credit or concurrent enrollment in CH 1223). Three hours laboratory. Selected experiments to illustrate the fundamentals of chemistry. Accompanies CH 1223.

CH 1223. Chemistry II. (3) (Prerequisites: CH 1213) Three hours lecture. The principles of atomic and molecular structure, energetics, and synthesis as related to chemical systems. Offered each semester.

CH 1234. Integrated Chemistry I. (4) (Prerequisites: ACT Math subscore 22 or grade of C or better in MA 1513.) Three hours lecture. Three hours laboratory. Integrated lecture-laboratory course for chemistry majors. Stoichiometry, thermochemistry, bonding and structure, properties of solids, liquids, gases and solutions. 1234H. Honors section will be available.

CH 1244. Integrated Chemistry II. (4) (Prerequisites: CH 1234 or CH 1213 and 1213L). Three hours lecture. Three hours laboratory. Integrated lecture-laboratory for chemistry majors. Kinetics, equilibrium, acid-base chemistry, advanced thermochemistry, electrochemistry, chemistry of metals, nuclear chemistry and introduction to organic chemistry. 1244H. Honors section will be available.

CH 2141. Professional Chemistry: Tools. (1) (Prerequisite: CH 1141). One hour lecture. Advanced computer skills including chemical literature searching. Introduction to oral communication and research in chemistry.

CH 2311. Analytical Chemistry I Laboratory. (1) (Prerequisites: CH 2223 and CH 2211. Prior credit or concurrent enrollment in CH 2313). Three hours laboratory. Laboratory course to accompany CH 2313.

CH 2313. Analytical Chemistry I. (3) (Prerequisites: CH 1221 and CH 1223). Three hours lecture. Quantitative, instrumental, and separation methods in analytical chemistry.

CH 2501. Elementary Organic Chemistry Laboratory. (1) (Prerequisite: CH 1211 or CH 1051). Three hours laboratory. A laboratory course to accompany CH 2253.

CH 3141. Professional Chemistry: Literature. (1) (Prerequisite: CH 2141). One hour lecture. Advanced discussion of careers in chemistry, oral communication and searching the chemical literature. Introduction to scientific writing.

CH 3213. Inorganic Chemistry. (3) (Prerequisites: CH 2314 and MA 1713). Three hours lecture. A basic course in inorganic chemistry. Topics include periodicity, ionic interactions, systematic chemistry of the elements and solvent relations to acids, bases, and redox reactions.

CH 4103/6103. Chemical Literature. (3) (Prerequisite: Junior standing). Two hours lecture. Three hours laboratory. A study of sources of information in chemistry, primary and secondary, including books, journals, patents, and other printed material. Searching the chemical literature.

CH 4113. Advanced Chemistry Research Skills. (5) (Prerequisites: CH 4521, CH 4523 and consent of instructor). One hour lecture. Six hours laboratory. Laboratory intensive course on modern research methods with oral and written presentations including a discussion component of the role and ethics of scientists in society.

CH 4141. Professional Chemistry: Research. (1) (Prerequisite: CH 3141). One hour lecture. Disseminating research results in chemistry. Advanced scientific writing, performing scientific research and professional conduct of scientists.

CH 4203/6203. Faculty Development in Secondary School Chemistry. (3) (Prerequisite: A year of chemistry plus experience as a secondary level science teacher). Two hours lecture. Three hours laboratory. A course designed for secondary school chemistry teachers. Topics covered are significant to a successful high school chemistry course.

CH 4212/6212. Advanced Inorganic Laboratory. (2) (Prerequisite: Prior credit or concurrent enrollment in CH 4213/6213). Six hours laboratory. The application of modern experimental techniques to inorganic systems.

CH 4213/6213. Advanced Inorganic Chemistry I. (3) (Prerequisite: Consent of the instructor; CH 4413/6413). Three hours lecture. Primarily the study of the elements in light of the periodic law; emphasis on coordination number, molecular complexes, and nuclear chemistry.

CH 4303/6303. Environmental Chemistry I. (3) (Prerequisites: CH 4523/6523). Three hours lecture. A systematic study of the basic concepts of environmental chemistry. Topics include air, water, soil chemistry, pollution, and environmental regulations.

CH 4351/6351. Analytical Chemistry Laboratory II. (1) (Prerequisite: Concurrent registration in CH 4353/6353). Three hours laboratory. Laboratory course to accompany CH 4353/6353.

CH 4353/6353. Analytical Chemistry II. (3) (Prerequisites: CH 2313 or CH 2314). Three hours lecture. Three hours laboratory. A study of instrument based methods in analytical chemistry.

CH 4404. Biophysical Chemistry. (4) (Prerequisites: PH 1123, CH 4523, MA 1723). Three hours lecture, one hour recitation. Principles of thermodynamics, solutions, electrochemistry, kinetics, transport processes, macromolecular solutions and chemical/biological properties as applied to biological systems.

CH 4411/6411. Physical Chemistry Laboratory I. (4) (Prerequisite: Prior credit or concurrent enrollment in CH 4413/6413). Three hours laboratory. Laboratory course to accompany CH 4413/6413.

CH 4413/6413. Thermodynamics and Kinetics. (3) (Prerequisites: CH 1223, PH 2213 or PH 1113, and MA 1723). Three hours lecture. A course in traditional physical chemistry. Topics include chemical thermodynamics, kinetics, and solutions.

CH 4421/6421. Physical Chemistry Laboratory II. (1) (Prerequisite: Prior credit or concurrent enrollment in CH 4423/6423). Three hours laboratory. Laboratory course to accompany CH 4423/6423.

CH 4423/6423. Quantum Mechanics and Spectroscopy. (3) (Prerequisites: CH 1223, PH 2213 or PH 1113, and MA 1723). Three hours lecture. A course in molecular physical chemistry. Topics include quantum mechanics, atomic and molecular structure, spectroscopy, and statistical thermodynamics.

CH 4511/6511. Organic Chemistry Laboratory I. (1) (Prerequisites: CH 1221 and CH 1223. Prior credit or enrollment in CH 4513). Three hours laboratory. A laboratory course to accompany CH 4513/6513.

CH 4521/6521. Organic Chemistry Laboratory I. (1) (Prerequisites: CH 4511/6511 and CH 4513/6513. Prior credit or enrollment in CH 4523). Three hours laboratory. A laboratory course to accompany CH 4523/6523.

CH 4523/6523. Organic Chemistry II. (3) (Prerequisite: CH 4513/6513). Three hours lecture. A systematic study of organic chemistry including aliphatic, aromatic, and heterocyclic compounds.

CH 4554. Integrated Organic I. (4) (Prerequisites: CH 1211 and CH 1223, or CH 1244). Three hours lecture. Three hours laboratory. Integrated lecture-lab course for chemistry majors. A systematic study of organic chemistry including aliphatic, aromatic, and heterocyclic compounds.

CH 4564. Integrated Organic II. (4) (Prerequisites: CH 4511 and CH 4513, or CH 4554). Three hours lecture. Three hours laboratory. Integrated lecture-lab course for chemistry majors. A systematic study of organic chemistry including aromatic, heterocyclic compounds, amino acids, nucleic acids, carbohydrates and lipids.

CH 4603. Undergraduate Research. (3) Nine hours laboratory. Original research project directed by a chemistry faculty member.

CH 4711. Senior Seminar. (1) (Prerequisite: CH 4141 or concurrent enrollment). One hour lecture. Submission of a written report and presentation of a seminar on either experimental results or a literature topic in chemistry.

CH 8111. Professional Chemistry. (1) One hour lecture. Professionalism in chemistry as it applies to research, with emphasis on the different methods used for disseminating research results.
CH 8711-8731. Seminar. One hour lecture. Reports on recent literature by students and staff. All graduate students in chemistry required to attend. One credit for each semester's participation. Up to a total of six credits allowed for Ph.D. candidates, and three for M.S.

Analytical Chemistry
CH 8313. Advanced Analytical Chemistry. (3) (Prerequisite: Consent of instructor.) Three hours lecture. Basic principles and problems involved with chemical analysis.

CH 8333. Advanced Instrumental Analysis. (3) (Prerequisite: CH 4353/6353 or consent of instructor.) Three hours lecture. Fourier transform and laser methods of spectroscopy, surface analysis and their application to current analytical problem.

CH 8343. Electroanalytical Chemistry. (3) (Prerequisite: consent of instructor.) Three hours lecture. Fundamentals of electrochemistry and application of electrochemical methods to analytical chemistry.

Inorganic Chemistry
CH 8203. Advanced Inorganic Chemistry I. (3) (Prerequisite: CH 4213/6213 and CH 4423/6423.) Three hours lecture. A systematic study of coordination compounds with emphasis upon the techniques.

Organic Chemistry
CH 8513. Synthetic Organic Chemistry. (3) (Prerequisite: 12 credits in organic chemistry.) Three hours lecture. The scope and limitations of commonly employed organic preparative methods. New and unusual reagents.

CH 8553. Theoretical Organic Chemistry. (3) (Prerequisite: 12 credits in organic chemistry.) Three hours lecture. A study of the mechanisms of organic reactions.

CH 8573. Natural Products. (3) (Prerequisite: 12 credits in organic chemistry.) Three hours lecture. A study of the types of compound synthesized in nature. Methods of structure determination.

Physical Chemistry
CH 8423. Molecular Structure. (3) (Prerequisite: consent of instructor.) Three hours lecture. An introduction to various methods for studying molecular structure. Methods covered include quantum mechanics, statistical mechanics, molecular spectroscopy, and nuclear chemistry.

Dave C. Swalm School of CHEMICAL ENGINEERING

Office: 330 Swalm Chemical Engineering Building
Professors Rogers and White; Associate Professors Bricka, Elmore (Interim Head), Hill, Toghiangi and R. Toghiangi; Assistant Professors French, Hernandez, and Walters

CHE 1101. CHE Freshman Seminar. (1) One hour lecture. Seminar focusing on student and professional development for chemical engineering freshmen.

CHE 2114. Mass and Energy Balances. (4) (Prerequisite: CH 1223 and credit or registration in MA 1723.) Three hours lecture. Application of systems of units, material balances, heats of reaction, energy balances, and chemical equilibria to typical industrial problems.

CHE 2213. Chemical Engineering Analysis. (3) (Prerequisite: credit or registration in MA 1721.) Two hours lecture. Introduction to the analysis of chemical engineering processes using numerical techniques and statistical techniques with the application of modern computational tools available to engineers.

CHE 3113. Chemical Engineering Thermodynamics I. (3) (Prerequisites: CH 1223 and PH 2213, co-requisites: MA 2733 and CHE 2114.) Three hours lecture. The thermodynamic properties of substances, energy relationships, applications of the first and second law of thermodynamics, flow processes, power cycles, refrigeration and liquefaction.

CHE 3123. Chemical Engineering Thermodynamics II. (3) (Prerequisites: MA 2743; grade of C or better in CHE 2114 and CHE 3113.) Three hours lecture. Treatment of non-ideal effects. High pressure behavior of pure substances. Thermodynamics of ideal and non-ideal mixtures, phase equilibria and chemical equilibria.

CHE 3203. Fluid Flow Operations. (3) (Prerequisites: PH 2213 and credit or registration in both CHE 2114 and MA 1723.) Three hours lecture. Fundamentals of fluid flow behavior in chemical processes emphasized by extensive calculations. Design of fluid flow systems.

CHE 3213. Heat Transfer Operations. (3) (Prerequisites: MA 2743; a grade of C or better in either CHE 3203 or EM 3313; and credit or registration in both CHE 3113 and MA 3253.) Three hours lecture. Fundamentals of heat transfer in chemical engineering processes and process equipment. Special emphasis given to the economics of heat exchanger design and heat recovery.

CHE 3222. Chemical Engineering Laboratory I. (2) (Prerequisites: a grade of C or better in either CHE 3203 or EM 3313; and a grade of C or better in CHE 3213.) Four hours laboratory. Experiments in chemical engineering unit operations related to fluid flow and heat transfer. Experimental design/statistical treatment of data. Health/safety concerns in the laboratory.

CHE 3223. Mass Transfer Operations. (3) (Prerequisites: C or better in CHE 3203; Credit or registration in CHE 3213.) Three hours lecture. Quantitative relationships for equilibrium stage operations such as extraction and distillation. Applications of principles of mass transfer, diffusion, and absorption. Application to equipment design.

CHE 3322. Chemical Engineering Laboratory II. (2) (Prerequisites: C or better in CHE 3222, C or better in CHE 3213, C or better in CHE 3233.) Four hours laboratory. Experiments in chemical engineering unit operations related to heat transfer, mass transfer, kinetics, and process control. Statistical design of experiments. Instrumentation and data acquisition.

CHE 3331. Professional Development Seminar. (1) (Prerequisite: Chemical Engineering majors with junior standing.) One hour lecture. A seminar focused on professional development and topics of interest/concern to the chemical engineering professional.

CHE 3413. Engineering Materials. (3) (Prerequisites: CH 1223 and PH 2213.) Three hours lecture. The physical, chemical, and mechanical properties of engineering materials. The influence of these properties on the behavior of materials that have been placed in service.

CHE 4113/4113. Chemical Reactor Design. (3) (Prerequisites: a grade of C or better in both CHE 3123 and MA 3253.) Three hours lecture. The fundamentals of chemical reaction kinetics with applications.

CHE 4134/6134. Process Design. (4) (Prerequisite: IE 3913, a grade of C or better in the following: CHE 3123, CHE 3213, and CHE 3223.) Three hours lecture. Two hours laboratory. Design and analysis of chemical and environmental engineering processes utilizing momentum, energy, and mass transport principles.

CHE 4193/6193. Automotive Engineering. (3) Three hours lecture. Fundamentals of automotive engineering, including power units, mechanical systems, electrical systems, and industrial and systems engineering aspects. (Same as ECE 4193/6193, IE 4193/6193, and ME 4193/6193.)

CHE 4223/6223. Process Instrumentation and Control. (3) (Prerequisites: CHE 4113, a grade of C or better in CHE 3233.) Three hours lecture. Measurement of process variables; characteristics of control elements; automatic control instruments; dynamic behavior of process equipment; process control systems.

CHE 4233/6233. Chemical Plant Design. (3) (Prerequisites: CH 4134 and CHE 4113.) Three hours lecture. Application of scientific and engineering principles to the design and economic evaluation of industrial chemical plants.

CHE 4313/6313. Transport Phenomena. (3) (Prerequisite: a grade of C or better in the following courses: CHE 3213, MA 2535, and either CHE 3203 or EM 3313.) Three hours lecture. Fundamental principles of momentum, heat and mass transport. Relationships between transport processes and the physical property distributions in fluids and solids.

CHE 4423/6423. Fundamentals of Industrial Corrosion. (3) (Prerequisite: CHE 3413.) Three hours lecture. Identifying and eliminating the different types of corrosion that lead to the failure of engineering structures.

CHE 4513/5513. Pulp and Paper Manufacturing Processes. (3) (Prerequisite: CHE 2114 and consent of instructor.) Three hours lecture. A study of pulping and paper making processes with emphasis on application of basic engineering techniques to special problems of pulp and paper industry.

CHE 4613/6613. Air Pollution Control Design: Theory and Practice. (3) (Prerequisite: Consent of instructor.) Three hours lecture. An introduction to the unit operations of air pollution control systems with a specific emphasis on air pollution dynamics, equipment design, and equipment operation.

CHE 4624/6624. Experimental Methods in Materials Research. (4) (Prerequisites: CHE 3413 or ABE 3813 or ME 3403 or consent of instructor.) Three hours lecture. Three hours laboratory. Introduction to research methodologies commonly used in the evaluation of treatments and mechanical testing. (Same as ABE 4624/6624 and ME 4624/6624.)

CHE 4673/6673. Industrial Microbiology. (3) Three hours lecture. Introduction to microbial anatomy, physiology, and genetics. Use of microorganisms and their by-products. Identification and control of biofouling, biocorrosion, and biodegradation of products and processes. (Same as BIO 4673/6673.)

CHE 4703/6703. Gas Hydrates. (3) (Prerequisites: Consent of instructor.) Three hours lecture. A study of gas hydrate principles. New energy potential, sequestration, greenhouse gas sequestration, unique chemical processing capabilities.

CHE 8011. Chemical Engineering Seminar. (1) (Prerequisite: Graduate standing.) Library assignments and reports on the current chemical engineering literature.

CHE 8113. Advanced Chemical Engineering Thermodynamics. (3) (Prerequisites: CHE 3123 and CHE 4113 or equivalent.) Three hours lecture. Advanced study of fundamental laws of thermodynamics as applied to unit operations, non-ideal fluids and solutions, chemical equilibria, electrochemistry and similar topics.

CHE 8123. Chemical Kinetics and Dynamics. (3) (Prerequisite: consent of instructor.) Three hours lecture. Theory and interrelations of phenomenological chemical kinetics and molecular reaction dynamics.

COMPUTATIONAL ENGINEERING

Office: 229 High Performance Computing Collaboration

Professors: Banicescu, L. Bruce, Cinnella, Horstmeyer, King, Marcum, Mastin, Moorhead, Novotny, Oppenheimer, Qatu, Rais-Rohani, and Reese

Assistant Professors: Blades, Carino, ElKadiri, Gullnet, Hamimi, Kim, Lim, Tong, Tschopp, and Wong

CME 8113. Computational Geometry. (3) (Prerequisite: consent of instructor). Three hours lecture. Computer aided geometric design techniques and their applications in engineering and general computational field simulation.

Department of COMMUNICATION

Office: 130 McComas Hall

Anthony, Brown, Cain, C. Chambers, Clevinger, J. Durst, W. Durst, Edmonds, Flick, Foley, Forde (head), Fountain, Gaywych, Goldman, A. Harris, M. Harris, Knight, Mann, McDavid, Nicholson, Roussin, Smith, Strout, Ulmer, Walton, Williams

CO 1003. Fundamentals of Public Speaking. (3) Three hours lecture. The psychological processes and adjustments necessary in preparing, organizing, wording, and delivering effective speeches.

CO 1013. Introduction to Communication. (3) Three hours lecture. To sharpen the student’s awareness and to facilitate growth in the human interaction process across a variety of communication situations.

CO 1093. Honors Oral Communication. (3) (Prerequisite: Open through invitation only). Three hours lecture. Same as CO 1003. Available only to students in the University Honors Program.

CO 1223. Introduction to Communication Theory. (3) (Prerequisite: CO 1003 or CO 2253). Three hours lecture. A comprehensive introduction to the bases of contemporary communication theory.

CO 1403. Introduction to the Mass Media. (3) Three hours lecture. How American newspapers, magazines, radio, television, and film industries are organized, what they do, and how they affect contemporary culture.

CO 1503. Introduction to Theater. (3) Three hours lecture. A comprehensive view of the theater, including plays, playwrights, directing, acting, theaters, and technicians.

CO 1533. Theater Practicum #3. (3) Three hours laboratory. Preparation for and participation in department production activities.

CO 1543. Theater Practicum #4. (3) Three hours laboratory. Preparation for and participation in department production activities.

CO 1553. Theater Practicum #5. (3) Three hours laboratory. Preparation for and participation in department production activities.

CO 1563. Theater Practicum #6. (3) Three hours laboratory. Preparation for and participation in department production activities.

CO 1903. Introduction to Cinema. (3) Three hours lecture. A multi-disciplinary study of the film, with emphasis on the relationship between the writer, director, and audience.

CO 2213. Small Group Communication. (3) (Prerequisite: CO 1003 or junior standing). Three hours lecture. A study of the problems and techniques of participation in and leadership of small groups.

CO 2253. Fundamentals of Interpersonal Communication. (3) Three hours lecture. Emphasis on two-person interactions to increase student’s understanding and appreciation of communication principles.

CO 2333. Television Production. (3) (Prerequisite: CO 1403). Two hours lecture. Two hours laboratory. Study of the principles of television production.

CO 2413. Introduction to News Writing and Reporting. (3) (Prerequisites: two semesters composition). Two hours lecture. Two hours laboratory. Practice in writing simple news stories and the place of the reporter in the news-gathering organization.

CO 2423. News Editing, Typography, and Makeup. (3) (Prerequisite: CO 2413). Three hours lecture. Editing newspaper copy, writing headlines, and using type and pictures in makeup of newspaper pages.

CO 2524. Stagecraft and Lighting. (4) (Prerequisite: CO 1503). Three hours lecture. Forty hours work on a major production. Theory and practice of set construction, scene design and stage lighting and its application to theater production.

CO 2574. Summer Theater Workshop. (4) Three hours lecture. Two hours laboratory. Daily observation and practice of acting and technical work in preparation of a production. May be repeated one semester.

CO 2613. Introduction to Oral Interpretation. (3) (Prerequisite: CO 1503). Three hours lecture. Basic principles of comprehending and communicating literature to a listening audience.

CO 3203. Communication and Group Leadership. (3) (Prerequisite: CO 2213). Three hours lecture. A study of communication as related to the functions and styles of group leadership.

CO 3293. Corporate Communication. (3) (Prerequisite: Junior standing). Study of applied communication techniques related to the development and proficiency of oral corporate communication skills.

CO 3333. Advanced Television Production. (3) (Prerequisite: CO 2333). Two hours lecture. Two hours laboratory. Advanced principles, techniques of producing and directing television programs.

CO 3343. Writing for the Media. (3) (Prerequisite: CO EN 1103 and EN 1113). Three hours lecture. Study and practice of the principles and techniques of media writing.

CO 3403. Photographic Communication. (3) (Prerequisite: Nine hours in Communication or consent of instructor). Two hours lecture. Two hours laboratory. Study and practice of techniques of photography and digital imaging as they relate to visual communication in journalism, public relations, mass media, and related fields.

CO 3413. News Gathering. (3) (Prerequisite: CO 2413 or CO 2313). Three hours lecture. Development of strategies for finding information for news stories from computerized databases, public records, and reports. Includes techniques for interviewing and covering meetings.

CO 3423. Feature Writing. (3) (Prerequisite: CO 2413). Three hours lecture. Feature markets and practice in preparing and writing features for newspapers and magazines.

CO 3443. Advanced News Writing and Reporting. (3) (Prerequisite: CO 2423). Three hours lecture. Practice in writing more complex news stories and the responsibilities of the reporter in news gathering and writing.

CO 3543. Improvisation. (3) Three hours lecture. Course is designed to develop skills in improvisation with exercises on exercises and performance.

CO 3563. Voice and Movement. (3) Three hours lecture. Course is designed for technical training of actors in performance area with emphasis on exercises.

CO 3593. Auditioning/Adagio. (3) Three hours lecture. Course designed for the development of the technical skills necessary for Professional/Graduate performance work.

CO 3713. Digital Communication. (3) (Prerequisite: CO 2413). Two hours lecture. Two hours laboratory. Processes and methods of effective digital communication.

CO 3803. Principles of Public Relations. (3) (Prerequisite: CO 1403 or consent of instructor). Three hours lecture. The role and origin of public relations in society, the identification and influence of publics, and applications of public relations principles to campaigns and organizations.

CO 3813. Public Relations Case Problems. (3) (Prerequisite: CO 3803). Three hours lecture. The written analysis, presentation, and group discussion of specific and hypothetical cases using public relations theory as a base.

CO 3823. Public Relations Copy and Layout. (3) (Prerequisites: CO 2413 and CO 3803). Three hours lecture. Practice of written communication skills used in public relations. Includes experience in writing and producing news releases, brochures, speeches and other devices.

CO 3833. Interviewing in Communication. (3) (Prerequisite: CO 1223). Three hours lecture. The communicative processes and adjustments necessary in preparing, organizing, wording, and participating in various types of interviews from the interviewer and the interviewee perspectives.

CO 3843. Media Relations. (3) (Prerequisite: CO 3833). Three hours lecture. Study of interviewing and communication skills for reporters and the issues, problems, and strategies employed by interviewees related to radio, television, and print interviews.

CO 3853. Public Relations Writing. (3) (Prerequisites: CO 2413 and CO 3803). Three hours lecture. Practice of written communication for public relations.
Emphasis on research, establishing communication goals, and writing for internal and external audiences via multiple channels.

CO 3863. Public Relations Production. (3) (Prerequisites: CO 2413 and CO 3853). Two hours lecture. One hour laboratory. Detailed exercise in the design and production of public relations materials for print, broadcast, and computer-based media.

CO 3903. Advanced Cinema Studies. (3) (Prerequisite: CO 1903 or EN 2433). Three hours lecture. Study of nonverbal cues as they affect the communication in various contexts, including art, music, and popular culture.

CO 4053/6053. Internship in Communication. (3) (Prerequisites: CO 2323 or CO 2333 for Radio/TV students or Communication majors only). Supervised work in production, sales or related fields for radio/TV students or in newspaper or magazine writing, editing or photography for journalism students.

CO 4203/6203. Nonverbal Communication. (3) (Prerequisite: CO 1223 or PSY 1013). Three hours lecture. Study of nonverbal cues as they affect the communication in various contexts, including social events, political campaigns, and dramatic productions.

CO 4213/6213. Political Communication. (3) (Prerequisite: CO 1223). Three hours lecture. Analysis and evaluation of the verbal and non-verbal dimensions of political communication in the United States since 1609.

CO 4243/6243. Rhetorical Theory. (3) (Prerequisite: CO 1223). Three hours lecture. Survey and criticism of the theories of public speaking found in the works of Plato, Aristotle, Cicero, Quintilian, and St. Augustine.

CO 4253/6253. Elements of Persuasion. (3) (Prerequisite: CO 1223). Three hours lecture. A study of the motivation of audiences and techniques of persuasive campaigns and communications.

CO 4273/6273. Intercultural Communication. (3) (Prerequisite: CO 1223 and senior standing). Three hours lecture. A study of how communication behaviors differ between cultures. Frameworks for studying intercultural communication will be provided by studying one specific culture.

CO 4313/6313. Mass Media Law. (3) (Prerequisite: Junior standing). Three hours lecture. Study and analysis of laws and regulations significantly affecting newspapers, magazines, movie pictures, and broadcasting in America.

CO 4323/6323. Mass Media and Society. (3) (Prerequisite: Junior standing). Three hours lecture. The effects of mass communication on social and cultural institutions.

CO 4373/6373. Practicum in Television News. (3) (Prerequisites: CO 2333, 15 additional hours of CO courses and consent of the instructor). Two hours lecture, two hours laboratory. Theory and practice of producing a television news program.

CO 4393. Broadcast Performance. (3) Two hours lecture. Two hours laboratory. Practice and theory of the mechanics, tools and techniques required to communicate successfully as a broadcaster.

CO 4403/6403. Journalism Ethics. (3) (Prerequisite: CO 2413). Three hours lecture. Examination of ethical problems in contemporary journalism.

CO 4423. Advanced Photo Communication. (3) (Prerequisite: CO 3403.) Two hours lecture. Two hours laboratory. Exploration of narrative and illustrative photography in PR and news. Evaluation of still vs. moving images and Web/multimedia presentation options.

CO 4504/6504. History of the Theater. (4) (Prerequisite: Junior standing). Four hours lecture. A survey of the theater with emphasis on the physical structure, production problems and theatrical personalities.

CO 4524/6524. Directing. (4) (Prerequisite: CO 2524 and junior or senior standing). Three hours lecture. Two hours laboratory. Evaluation of dramatic styles and analysis of stage composition. Supervised hours in actual directing experience.

CO 4533/6533. Advanced Acting. (3) (Prerequisite: CO 2503). Three hours lecture. Intensive study of the theories and techniques of acting in the various dramatic styles.

CO 4573/6573. Theater Management. (3) (Prerequisite: Junior standing). Two hours lecture. Two hours laboratory. Business organization and management for non-profit (secondary and university), community, and professional theater, including budgeting, publicity, public relations and box office principles.

CO 4583/6583. Playwriting. (3) (Prerequisite: Completion of freshman composition and CO 1503). Three hours lecture. Practice in the fundamentals of dramatic composition. Reading, discussion, and analysis of written work.

CO 4713. Digital Communication II. (3) (Prerequisite: CO 3713). Two hours lecture. Two hours laboratory. Advanced processes and methods of effective digital communication.

CO 4803/6803. Research in Public Relations and Advertising. (3) (Prerequisite: CO 3853 or MKT 3013 or consent of instructor). Three hours lecture. Theory and practice of primary and secondary research methods in public relations and advertising, including qualitative and quantitative methods and uses of new technologies.

CO 4813/6813. Public Relations in Organizations. (3) (Prerequisites: CO 3813 and CO 3863). Three hours lecture. Studies in using various communication techniques for image building and campaign development for profit and non-profit organizations.

CO 8213. Seminar in Communication Theory. (3) (Prerequisite: CO 2233/6223). Analysis of intra personal, interpersonal, and mass communication variables. In-depth comparative study of the scientific and theoretical models for understanding communication processes and effects.

CO 8253. Seminar in Persuasion. (3) (Prerequisite: CO 4253/6253 or equivalent). Theoretical and research literature in attitude formation and change through communication.

Department of COUNSELOR EDUCATION & EDUCATIONAL PSYCHOLOGY

Office: 508 Allen Hall

Professors: Dooley, Looby, Wong; Associate Professor: Palmer; Assistant Professors: Goldberg, Hall, Heiselt, Justice, Wells

NOTE: Several courses in Counselor Education are open to advanced undergraduates, but the courses are designed primarily for graduate work.

COE 1323. Career Planning. (3) Three hours lecture. Provides students with a basis for making career decisions and selecting an academic major.

COE 3313. Rehabilitation Services. (3) Three hours lecture. Concepts, philosophies, and methods of rehabilitation services for physically, emotionally, or mentally disabled people.

COE 3883. Student Leadership in Higher Education. (3) Three hours lecture. Explores development of student leadership and how student leaders have shaped the policies, behaviors, and culture of American society from within higher education institutions.

COE 4013/6013. Facilitative Skills Development. (3) Three hours lecture. Introduction to the theory and practice of helping with emphasis on the development of basic communication skills. Applicable to a variety of settings.

COE 4023/6023. Introduction to Counseling. (3) Three hours lecture. Overview of counseling as a profession including specialty areas. Theories and techniques used in counseling. This course is not for Counselor Education majors.

COE 4050/6050. Seminar for Guidance Counselors. (1-6) Three hours lecture. Hours to be arranged. A study of current issues and trends in the field of guidance.

COE 4303/6303. Rehabilitation of Visually Impaired Persons. (3) Three hours lecture. Special issues and procedures related to vocational rehabilitation of persons with visual impairments.

COE 4353/6353. Assistive Technology in the Rehabilitation Process. (3) (Prerequisites: Undergraduates: COE 3313. Graduates: COE 8373 or permission of the instructor). Three hours lecture. Diverse applications of technologies are reviewed for potential impact with all forms of disability. Examines various roles played by technology in total rehabilitation process.

COE 4363/6363. Introduction to Sign Language. (3) Development of basic sign language skills, study of special needs of deaf persons, and understanding use of interpreters. (Same as EDX 4953/6953).

COE 4513/6513. Paraprofessionals in Student Affairs. (3) (Prerequisite: Consent of instructor). Three hours lecture. Fundamental concepts and philosophies underpinning the paraprofessional’s role in college student affairs. Includes supervised and paraprofessional experience.

COE 4713/6713. Issues in Aging. (3) Three hours lecture. An examination and integration of gerontological issues related to mental health of the elderly.

COE 4743/6743. Gender Issues in Counseling. (3) Three hours lecture. Overview of gender issues and their relationship to the counseling process.

COE 4903/6903. Developmental Counseling and Mental Health. (3) Three hours lecture. One hour laboratory. Methods of identifying and meeting normal emotional and social needs of children and adults. Emphasis on maintaining better mental health conditions in schools.

COE 6313. Resources for Visually Impaired Persons. (3) Three hours lecture. Survey of issues, techniques, and resources for independent living, orientation and mobility, and communication of visually impaired persons.

COE 6323. Sensory Aid Technology. (3) Three hours lecture. Survey of sensory devices. Includes practice with computer assistive devices designed to enhance employment and communication skills of persons with visual impairments.

COE 6373. Vocational Assessment of Special Needs Persons. (3) (Prerequisite: EPY 8263 or equivalent). Two hours lecture. Two hours laboratory. Comprehensive vocational assessment, counseling, and individual planning for special needs persons. Job/training analysis, vocational interest/aptitude tests, work samples, and situational assessment. (Same as TKT 8653).

COE 8013. Counseling Skills Development. (3) (Prerequisite: COE 8023). Three hours lecture. Theory and practice of counseling with emphasis on development of advanced skills required for assisting clients.

COE 8023. Counseling Theory. (3) Three hours lecture. Study of the major counseling theories.
COE 8043. Group Techniques and Procedures. (3) (Prerequisite: COE 8013 and 8023). Three hours lecture. Group counseling theory, dynamics, processes, and leadership functions.

COE 8053. Practicum. (3) (Prerequisites: COE 8013, 8023, and consent of department). Seminar and supervised field experience.

COE 8063. Research Techniques for Counselors. (3) Three hours lecture. Methods of research and evaluation in counseling.

COE 8073. Cultural Foundations in Counseling. (3) Three hours lecture. Examination of individual differences due to socialization acquired in distinct cultural and socioeconomic environments. Implications for counseling.

COE 8093. Seminar in Counseling. (3) (Prerequisite: COE 8023 or equivalent). Seminar in counseling trends and approaches with application to various settings and problems.

COE 8150. Academic Year Field Experience Practicum. (1-9) (Prerequisites: COE 8043, COE 8903 and EPY 8263). First semester of the supervised academic year field experience in school counseling.

COE 8163. Spirituality in Counseling. (3) Three hours lecture. Didactic instruction of developmental models and clinical interventions related to the interface of spirituality and counseling.

COE 8173. Counseling Gifted Students. (3) Three hours lecture. Counseling functions that relate to the total development of gifted students. Directed Individual Study and utilization of resources necessary for optimal growth.

COE 8183. Utilizing Art and Art Therapy in Counseling. (3) Three hours lecture. Didactic instruction of development models, theoretical approaches and practical intervention related to the interface of creative arts and counseling practice.

COE 8203. Placement and Career Development Counseling. (3) Three hours lecture. Studies of career development and academic/job placement; occupational classification schemes; trends in the world of work; compiling and utilizing career information in counseling.

COE 8293. Supervised Project. (3) (Prerequisite: Consent of department). Study of a topic in counseling or student development.

COE 8303. Family Counseling Theory. (3) (Prerequisite: COE 8023). Three hours lecture. Study of the theory and practice of family counseling.

COE 8353. Vocational Rehabilitation Counseling. (3) Three hours lecture. Rehabilitation legislation and the rehabilitation counseling process.

COE 8373. Medical Aspects of Disability. (3) Three hours lecture. Involves a detailed survey of physical disabilities, their resulting functional limitations, and rehabilitation implications. Also includes discussion of appropriate rehabilitation technology.

COE 8393. Advanced Practicum. (3) (Prerequisite: COE 8053 and consent of department). Advanced supervised field experience.

COE 8523. Student Development Theory. (3) Three hours lecture. Overview of theories of student development in higher education.

COE 8533. Literature of Student Affairs. (3) Three hours lecture. Provides an overview of student affairs in higher education through extensive reading in the field and individual study of specific aspects.

COE 8543. Legal Issues. (3) Three hours lecture. Legal and ethical issues in student affairs and counseling.

COE 8553. Student Affairs in Higher Education. (3) Three hours lecture. Overview of student development programs in higher education. Emphasis on philosophical foundations, organization, and the role of each service within a student development program.

COE 8563. Introduction to Assessment in Student Affairs. (3) Three hours lecture. Introduces the methods and tools used in Student Affairs and higher education assessment; provides opportunities to implement the use of these tools in specific settings.

COE 8573. College Counseling Services. (3) Three hours lecture. Counseling, prevention and student development services on the university and community college campuses.

COE 8623. Advanced and Ethical Issues in Counseling. (3) Three hours lecture. Advanced study of professional, legal, and ethical issues in counseling.

COE 8633. Psychosocial Rehabilitation. (3) Three hours lecture. Counseling techniques that assist in the community adjustment of seriously mentally ill clients.

COE 8703. Community Counseling. (3) Three hours lecture. Overview of the history, philosophy, trends, and practices in community counseling.

COE 8730. Internship. (1-9) (Prerequisite: COE 8053). Supervised field experience.

COE 8740. Academic Year Field Experience Semester II - Internship. (1-9) (Prerequisite: COE 8150 or its equivalent). Second semester of the supervised academic year field experience in school counseling. (Variable credit.)

COE 8750. Internship. (1-9) (Prerequisite: Consent of department). Supervised field experience for Ed.S students.

COE 8763 Counseling the Sexually Abused Client. (3) (Prerequisite: COE 8023). Three hours lecture. Diagnosis and treatment of persons who have been sexually abused.

COE 8773. Counseling the Chemically Dependent Client. (3) Three hours lecture. Information about the etiology, diagnosis, and treatment of chemical dependence.

COE 8783. Counseling the Chemically Dependent Family. (3) (Prerequisite: COE 8773.) Three hours lecture. Provide information on the effects of chemical dependence on the family and counseling programs for this disorder.

COE 8813. Counseling Elderly Clients. (3) Three hours lecture. Concepts, attitudes, and skills needed to provide counseling for elderly clients.

COE 8903. School Counseling Services. (3) Three hours lecture. Overview of a comprehensive school counseling program.

COE 8923. Seminar in School Counseling. (3) (Prerequisites: COE 8903). Three hours lecture. Overview of effective, comprehensive school counseling programs, program accountability, and best practice models in school counseling.

COE 8913. Counseling Supervision. (3) (Prerequisite: COE 8730 and 8013). Three hours lecture. Theory and practice of providing counseling supervision for practicing counselors and student development professionals.

COE 9033. Advanced Seminar. (3) Three hours lecture. Advanced study of a topic in counseling.

COE 9043. Advanced Group Work and Systems. (3) (Prerequisites: COE 8023, COE 8013, COE 8043, and Educational Specialist or Doctoral standing, or consent of instructor). One hour lecture. Four hours laboratory. Advanced studies in group counseling theory, systems theory, group leadership, and standards of training and practice for group workers.

COE 9053. Advanced Multicultural Counseling. (3) (Prerequisites: COE 8013, COE 8023, COE 8043, COE 8053, COE 8063 or an equivalent course, COE 8073 or an equivalent course, COE 8730, and Educational Specialist or Doctoral standing or consent of instructor). Three hours lecture. The course emphasizes advanced multicultural knowledge, skill development, and research competencies for counselors.

COE 9083. Advanced Assessment Techniques for Counseling. (3) (Prerequisites: COE 8063 and EPY 8124 or equivalent courses; Educational Specialist or Doctoral standing or consent of instructor). Three hours lecture. Advanced knowledge, skill and practice in selecting, administering, scoring, and interpreting personality, behavioral, career, and family assessments.

COE 9740. Advanced Doctoral Practicum. (1-9) (Prerequisite: Consent of department). First supervised field experience for doctoral students.

COE 9750. Internship. (1-9) (Prerequisite: Consent of department). Second supervised field experience for doctoral students.

CRIMINOLOGY

Office: 207 Bowen Hall
Professors Dunaway;
Assistant Professor Haynes, Matthews, Rader & Weiss

CRM 1003. Crime and Justice in America. (3). Three hours lecture. A survey of the basic concepts and approaches in criminology, including patterns of crime, causes of crime, and an examination of the criminal justice system.

CRM 2003. Crime, Justice, and Inequality. (3). (Prerequisites: CRM 1003 and SO 1003 or consent of instructor). Three hours lecture. Survey of issues pertaining to race, class, gender, and crime, focusing on discrimination, structural barriers, and the place of inequality within the criminal justice system.

CRM 3103. Contemporary Issues in Criminal Justice. (3). (Prerequisites: CRM 1003 and SO 1003 or consent of instructor). Three hours lecture. The interrelationships of law enforcement, prosecution, and the courts, particularly how each affects the correctional process.

CRM 3113. Community Crime Prevention and Policy. (3). (Prerequisites: SO 1003 and CRM 1003 or consent of instructor). Three hours lecture. An in-depth analysis of crime control policy and community sanctions, focusing on policy implementation, effectiveness, alternatives and prevention efforts.

CRM 3316. Criminology Internship. (Prerequisite: 24 hours of coursework within the criminology major and a minimum GPA of 2.5 and consent of instructor). Six hours practicum. Practicum within selected corrections agencies, individually supervised performance and self-development in relation to clients, agency workers, and provisions of correctional services.

CRM 3320. Field Work. (1-6) (Prerequisite: CRM 3316) One to six hours practicum with selected corrections agencies, individually supervised performance and self-development in relation to clients, agency workers, and provisions of correctional services.

CRM 3343. Gender, Crime, and Justice. (3) (Prerequisite: CRM 1003 and SO 1003 or consent of instructor). Three hours lecture. Gender differences in
cultural behavior, victimization, and criminal justice processing, emphasizing the unique experiences of women in all of these areas. (Same as SO 3343).

CRM 3353. Race, Crime and Justice. (3) (Prerequisite: CRM 1003 and SO 1003 or consent of instructor). Three hours lecture. Racial differences in criminal behavior, victimization, and criminal processing, emphasizing the unique experiences of racial minorities in these areas (Same as SO 3353).

CRM 3363. Globalization and Crime. (3). (Prerequisites: CRM 1003 and SO 1003 or consent of instructor). Three hours lecture. Examines the international differences in crime and justice, exploring topics such as illegal immigration, human trafficking, organized crime and terrorism.

CRM 3503. Violence in the United States. (3) (Prerequisite: CRM 1003 and SO 1003 or consent of instructor). Three hours lecture. In-depth study of violence, including types of violence, categories of offenders and victims, its social causes, and potential solutions. (Same as SO 3503).

CRM 3603. Criminological Theory. (3). (Prerequisites: CRM 1003 and SO 1003 or consent of instructor). Three hours lecture. Survey of the major sociological and criminological explanations of crime. (Same as SO 3603).

CRM 4233/6233. Juvenile Delinquency. (3) (Prerequisites: Six hours of Sociology or related courses and consent of instructor). Three hours lecture. Critical study of problems, causes, ways of handling; attitudes, roles and relationships of persons involved, including youthful offender, social worker, court and law enforcement officials. (Same as SO 4233/6233).

CRM 4243/6243. Drugs, Crime and Control. (3) (Prerequisites: SO 1003 and CRM 1003 or consent of instructor). Three hours lecture. Focus on the social factors which give rise to illicit drug use, patterns and trends in drug crime and strategies to control drug crime. (Same as SO 4243/6243).

CRM 4253/6253. White Collar Crime and Elite Deviance. (3) (Prerequisites: SO 1003 and CRM 1003 or consent of instructor). Three hours lecture. An overview of the sociological and criminological literature in the area defined as ‘White Collar Crime’ (Same as SO 4253/6253).

CRM 4323/6323. Victimization. (3) (Prerequisite: CRM 1003 and SO 1003 or consent of instructor). Three hours lecture. Survey of contemporary correctional systems and practices. Emphasis placed on the formal organization and functioning of penal systems (same as SO 4513/6513).

CRM 4523/6523. Law and Society. (3) (Prerequisites: SO 1003 and CRM 1003 or consent of instructor). Three hours lecture. Explores the social origins of law and how law can both maintain social order and bring about social change (Same as SO 4523/6523).

CRM 4803. Senior Seminar in Criminology. (3) (Prerequisites: CRM 3603 or consent of instructor). Three hours lecture. A capstone course which integrates knowledge from criminology course work. Students will apply their knowledge of criminological theory and policy to crime and justice issues.

COOPERATIVE EDUCATION PROGRAM

Office: 335 McCain
Associate Director: Angie Chestman
Senior Coordinators: Lisa Gooden-Hunley, Edie Irvin and Charlie Wilder

CP 2103. First Work Semester. (3) (Prerequisite: Approval of the Cooperative Education Office, acceptance by employing organization, and admission to the University).

CP 2203. Second Work Semester. (3) (Prerequisite: CP 2103).

CP 3303. Third Work Semester. (3) (Prerequisite: CP 2203).

CP 3403. Fourth Work Semester. (3) (Prerequisite: CP 3303).

CP 4503. Fifth Work Semester. (3) (Prerequisite: CP 4303).

CP 4603. Sixth Work Semester. (3) (Prerequisite: CP 4503).

CP 4703. Seventh Work Semester. (3) (Prerequisite: CP 4603).

CP 4803. Eighth Work Semester. (3) (Prerequisite: CP 4703).

CP 8013. First Work Semester. (3) (Prerequisite: Approval of the Cooperative Education Office, acceptance by employing organization, and admission to the University and Graduate School).

CP 8023. Second Work Semester. (3) (Prerequisite: CP 8013).

CP 8033. Third Work Semester. (3) (Prerequisite: CP 8023).

CP 8043. Fourth Work Semester. (3) (Prerequisite: CP 8033).

CP 8053. Fifth Work Semester. (3) (Prerequisite: CP 8043).

Department of COMPUTER SCIENCE and ENGINEERING

Office: 300 Butler Hall
Professors Banicesu, Hodges, Reese (Interim Head) and Vaughn;
Associate Professors Allen, Dampier, Dundass, Hansen, Jankun-Kelly, Luke, Ramkumar and Swan;
Assistant Professors Niu, Perkins, Yuan, and Zhang;
Instructors Crompton, Henderson, and Watkins

CSE 1002. Introduction to CSE. Two hours lecture. Introduction to the computer science and software engineering curricula, profession, and career opportunities. Historical perspective; support role of the department. Ethics, team building, problem solving.

CSE 1213. Computer Programming with Fortran. (3) (Prerequisite: MA 1313 or equivalent). Three hours lecture. Problem solving methods, algorithm development, debugging and documentation in the Fortran programming language; applications. (Not recommended to students with credit in CSE 1233 or CSE 1253 or equivalent).

CSE 1233. Computer Programming with C. (3) (Prerequisite: MA 1313 or equivalent). Three hours lecture. Problem-solving methods, algorithm development, debugging and documentation in the C Programming language; applications. (Not recommended to students with credit in CSE 1213 or CSE 1253 or equivalent).

CSE 1273. Computer Programming with Java. (3) (Prerequisite: MA 1313 or equivalent). Three hours lecture. Problem-solving methods, algorithm development, debugging and documentation in the Java programming language; applications. (Not recommended to students with credit in CSE 1213 or CSE 1233 or equivalent).

CSE 1384. Intermediate Computer Programming. (4) (Prerequisite: CSE 1284 with a grade of C or better). Three hours lecture. Three hours laboratory. Object-oriented problem solving, design, and programming. Introduction to data structures, algorithm design and complexity. Second course in sequence designed for CSE, CPE, and CE majors.

CSE 2383. Data Structures and Analysis of Algorithms. (3) (Prerequisite: CSE 1384 and MA 1713 both with a grade of C or better). Three hours lecture. Elementary data structures and their associated algorithms. Trees, graphs, hash tables, relational data model, file organization. Advanced software design and development.

CSE 2813. Discrete Structures. (3) (Prerequisite: CSE 1284 with a grade of C or better and MA 1313 or equivalent). Three hours lecture. Concepts of algorithms, induction, recursion, proofs; topics from logic, set theory, combinatorics, graph theory fundamental to study of computer science.

CSE 3213. Software Engineering Senior Project I. (3) (Prerequisite: CSE 4214 with grade of C or better). Six hours laboratory. Software requirements elicitation and specification, cost estimation, scheduling, development of project management and quality assurance plans, reviews.

CSE 3223. Software Engineering Senior Project II. (3) (Prerequisite: CSE 4214 with grade of C or better). Six hours laboratory. Team work, software design, construction, implementation of project management and quality assurance plans, and configuration management.

CSE 3324. Distributed Client/Server Programming. (4) (Prerequisite: CSE 2383 with a grade of C or better). Three hours lecture. Three hours laboratory. Design of software systems for use in distributed environments. Client/Server models, multi-threaded programming, server-side web programming, graphical user interfaces; group projects involving client/server systems.

CSE 3813. Introduction To Formal Languages and Automata. (3) (Prerequisite: CSE 2383 and CSE 2813, both with a grade of C or better). Three hours lecture. Theoretical foundations of computer science; formal languages and automata, properties of context-free languages; Turing machines; introduction to computability and complexity.

CSE 3981. Social and Ethical Issues in Computing. (1) (Prerequisite: Senior standing.) One hour lecture. Study of major social and ethical issues in computing, including history of computing, impact of computers on society, and the computer professional’s code of ethics.

CSE 4153/6153. Data Communications and Computer Networks. (3) (Prerequisites: CSE 1384 or ECE 3732, and ECE 3724, both with a grade of C or better). Three hours lecture. The concepts and practices of data communications and networking to provide the student with an understanding of the hardware and software used for data communications. (Same as ECE 4833/6833).

CSE 4163/6163. Designing Parallel Algorithms. (3) (Prerequisites: CSE 3324 or CSE 4733/6733 with a grade of C or better). Three hours lecture. Techniques for designing algorithms to take advantage efficiently of different parallel architectures. Includes techniques for parallelizing sequential algorithms and techniques for matching algorithms to architectures.
CSE 4241/6214. Introduction to Software Engineering. (4) (Prerequisite: CSE 2383 with a grade of C or better). Three hours lecture. Two hours laboratory. Introduction to software engineering; planning, requirements analysis and specification, design; testing; debugging; maintenance; documentation. Alternative design methods, software metrics, software project management, reuse and reengineering.

CSE 4223/6223. Managing Software Projects. (3) (Prerequisite: CSE 4214/6214 with a grade of C or better). Three hours lecture. Concepts in software project management functions such as planning, organizing, staffing, directing and control, estimating, scheduling, monitoring, risk management, and use of tools.

CSE 4233/6233. Software Architecture and Design Paradigms. (3) (Prerequisite: CSE 4214/6214 with a grade of C or better). Three hours lecture. Topics include cryptography, software security, database security, network security, electronic commerce, system threats, and risk avoidance procedures.

CSE 4283/6283. Software Testing and Quality Assurance. (3) (Prerequisite: CSE 4214/6214 with a grade of C or better). Three hours lecture. Topics include methods of testing, verification and validation, quality assurance processes and techniques, methods and types of testing, and ISO 9000/SEI CMM process evaluation.

CSE 4383/6383. Cryptography and Network Security. (3) (Prerequisite: CSE 4153/6153). Three hours lecture. Basic and advanced concepts in cryptography and network security; symmetric and asymmetric cryptography, key management, authentication, access control and network security protocols, network systems security.

CSE 4413/6413. Principles of Computer Graphics. (3) (Prerequisites: CSE 2383 with a grade of C or better and MA 3113). Three hours lecture. Graphics hardware; algorithms; graphics primitives; windowing and clipping; transformations; 2D graphics; shading; hidden surfaces; standards.

CSE 4503/6503. Database Management Systems. (3) (Prerequisites: CSE 2383 and CSE 2813, both with a grade of C or better). Three hours lecture. Modern database models; basic database management concepts; query languages; database design through normalization; advanced database models; extensive database development experience in a team environment.

CSE 4613/6613. Bio-computing. (3) Three hours lecture. Essential programming skills for computational biology. Problem-solving and use of specialized bio-computing libraries. (Credit will not be given to students matriculating in computer science, computer engineering, or software engineering degree programs).

CSE 4623/6263. Computational Biology. (3) (Prerequisites: BCH 4113/6113 or equivalent and CSE 2138 or CSE 4163/6163) Three hours lecture. Computational analysis of gene sequences and protein structures on a large scale. Algorithms for sequence alignment, structural and functional genomics, comparative genomics, and current topics.

CSE 4633/6633. Artificial Intelligence. (3) (Prerequisite: CSE 2383 and CSE 2813 with a grade of C or better). Three hours lecture. Study of the computer in context with human thought processes. Heuristic programming; search strategies; understanding and modeling of the software development process, validating and comparing software engineering methods, and tools for data analysis.

CSE 4633/6633. Artificial Intelligence. (3) (Prerequisite: CSE 2383 and CSE 2813 with a grade of C or better). Three hours lecture. Study of the computer in context with human thought processes. Heuristic programming; search strategies; understanding and modeling of the software development process, validating and comparing software engineering methods, and tools for data analysis.

CSE 4663/6663. Human-Computer Interaction. (3) (Prerequisite: CSE 3813 for Computer Science majors with a grade of C or better, consent of instructor for non-majors). Three hours lecture. Conceptual models formed by users, as aspects of computer systems which affect users, interface design and evaluation, and examples and critiques of specific interfaces.

CSE 4713/6713. Programming Languages. (3) (Prerequisites: ECE 3724 and CSE 3813, both with a grade of C or better). Three hours lecture. An introduction to programming language specification and analysis. Additional topics include control structures, data types and structures, run-time environments, binding strategies, compilers, and interpreters.

CSE 4723/6723. Compiler Construction. (3) (Prerequisite: Credit or registration in CSE 4713/6713). Formal treatment of context-free programming language translation and compiler design concepts, including: lexical, syntactic and semantic analysis; machine-dependent code generation and improvement; and error processing.

CSE 4733/6733. Operating Systems I. (3) (Prerequisite: CSE 2383 and ECE 3724, both with a grade of C or better). Three hours lecture. Historical development of operating systems to control complex computing systems; process management, communication, file system techniques; file system concepts and operation; data communication, distributed process management.

CSE 4743/6743. Operating Systems II. (3) (Prerequisites: CSE 4733/6733 with a grade of C or better). Three hours lecture. Integrated treatment of hardware and software concepts in operating systems design; procedure implementation; creation and control of processes; name and space management.

CSE 4833/6833. Introduction to Analysis of Algorithms. (3) (Prerequisites: CSE 2383, CSE 2813, and MA 2733, all with a grade of C or better). Three hours lecture. Study of complexity of algorithms and algorithm design. Tools for analyzing efficiency; design of algorithms, including recurrence, divide-and-conquer, dynamic programming, and greedy algorithms.

CSE 6753. Foundations in Computer Organization. (3) (Prerequisite: CSE 1213 or CSE 1233 or CSE 1273 or CSE 1284 with a grade of C or better, or consent of instructor). Three hours lecture. Foundational concepts of computational algorithm design and analysis. (No credit for students in Computer Science, Computer Engineering, or Software Engineering degree programs.)

CSE 8011. Seminar. (1) One hour. Reports on recent advances and problems in computer science by guest speakers, faculty and students; student participation, general discussion.

CSE 8080. Directed Project in Computer Science. (1-3) Hours and credits to be arranged. An individual professional project open only to candidates for the Master of Science degree (project option). Formal written and oral project reports are required.

CSE 8153. Advanced Data Communications. (3) (Prerequisite: CSE 4153/6153 or equivalent). Three hours lecture. A study of advanced concepts and practices of data communications with particular emphasis on Local Area Networks and Transmission Control Protocol/Internet Protocol (TCP/IP).

CSE 8163. Parallel and Distributed Scientific Computing. (3) (Prerequisite: CSE 4163/6163). Three hours lecture. Algorithms for distributed scientific computing; performance evaluation; scheduling and load balancing issues for scientific applications; architectural and compiler support for parallelism; and parallel programming models.

CSE 8233. Software Engineering Project Management. (3) (Prerequisite: CSE 4214/6214). Three hours lecture. Management of the engineering of software products including estimating, planning, process management, and special topics.

CSE 8243. Software Specification. (3) (Prerequisite: CSE 4214/6214). Three hours lecture. Writing software specifications, transforming specifications into code, and verifying transformations using formal methods.

CSE 8253. Software Design. (3) (Prerequisite: CSE 4214/6214). Three hours lecture. Software design principles, attributes, models, and methodologies; object-oriented designs; real-time system design; user interface design; design verification; reusability issues; tools; design issues.

CSE 8263. Software Verification and Validation. (3) (Prerequisites: CSE 3813 and either CSE 4214/6214 or CSE 8253). Three hours lecture. The theory and practice of ensuring high-quality software products, including quality assessment, proof of correctness, testing, and verification and validation methodology.

CSE 8273. Software Requirements Engineering. (3) (Prerequisites: CSE 4214/6214 with a grade of C or better). Three hours lecture. An in-depth study of current research and practice in requirements elicitation, requirements analysis, requirements specification, requirements verification and validation, and requirements management.

CSE 8413. Visualization. (3) (Prerequisite: CSE 4413/6413). Three hours lecture. Essential algorithms for three-dimensional modeling and rendering techniques; viewing transformations, illumination, surface modeling; methodologies for visualization of scalar and vector fields in three dimensions.

CSE 8433. Advanced Computer Graphics. (3) (Prerequisites: CSE 4413/6413). Three hours lecture. Realistic, three-dimensional image generation; modeling techniques for complex three-dimensional scenes; advanced illumination techniques; fractal surface modeling; modeling and rendering of natural phenomena.

CSE 8613. Cognitive Models of Skill. (3) (Prerequisite: Graduate standing). Three hours lecture. Introduction to cognitive modeling, with a focus on computational models of skill acquisition and expert skill.

CSE 8673. Machine Learning. (3) (Prerequisite: CSE 4633/6633). Three hours lecture. Introduction to machine learning, including computational learning theory, major approaches to machine learning, evaluation of models, and current research.

CSE 8733. Advanced Systems Programming. (3) (Prerequisite: CSE 4733/6733). Three hours lecture. Concepts of multi-programming, multi-processing, time-sharing; topics to include interruptibility, priority scheduling, error recovery procedures, storage management, input-output.

CSE 8813. Theory of Computation. (3) (Prerequisite: CSE 3813). Three hours lecture. Study of abstract models of computation, unsolvability, complexity theory, formal grammars and parsing, and other advanced topics in theoretical computer science.

CSE 8833. Algorithms. (3) (Prerequisites: CSE 4883/6883). Three hours lecture. Advanced techniques for designing and analyzing algorithms: advanced data structures; case studies, NP-completeness including reductions; approximation algorithms.

CSE 9133. Topics in High Performance Computing. (3) (Prerequisite: Consent of Instructor). Three hours lecture. Reading and study of current work related to the area of high performance computing. Intended for doctoral students. (May be taken for credit more than once.)

CSE 9633. Topics in Artificial Intelligence. (3) (Prerequisite: Consent of instructor). Three hours lecture. Reading and study of current work related to the area of artificial intelligence. Intended for doctoral students. (May be taken for credit more than once.)

College of VETERINARY MEDICINE

CVM 2443. Essentials of Biotechnology. (3) Three hours lecture. An introduction to principles and applications of biotechnology. (Same as FO 2443)

CVM 3101. Veterinary Technology Medical Terminology. (1) One hour lecture. Veterinary medical terminology, focusing on fundamental recognition, interpretation and usage of medical terms.

CVM 3013. Small Animal Diseases and Management. (3) (Prerequisite: Admission to the junior year of the Veterinary Medical Technology Program). Three hours lecture. Pathophysiology, transmission, diagnostic process, clinical management and prevention of canine and feline diseases, as well as emergency and critical care.

CVM 3014. Applied Anatomy and Physiology for Veterinary Technologists. (4) Three hours lecture. Three hours laboratory. Study of anatomical and physiological systems of animals commonly encountered by veterinary technologists with emphasis on species differences and clinical applications. (Offered to students enrolled in the Veterinary Technology Program only.)

CVM 3022. Animal Technical Skills & Nursing Care. (2) (Prerequisite: Admission to the junior year of the Veterinary Medical Technology Program). One hour lecture. Two hours laboratory. Principles of small animal medical management topics and techniques, behavior, and overview of critical care techniques for small animals.

CVM 3032. Food Animal Diseases and Management. (2) (Prerequisite: Admission to the junior year of the Veterinary Medical Technology Program). Two hours lecture. Diseases, husbandry, preventative health care, epidemiology, public health and client education for the food animal species.

CVM 3031. Food Animal Technical Skills & Nursing Care. (1) (Prerequisite: Admission to the junior year of the Veterinary Medical Technology Program). Two hours laboratory. Fundamentals of handling of the food animal species. Breed identification, specimen collection, physical exam, medication administration and other nursing care procedures relevant to the species.

CVM 3042. Equine Diseases and Management. (2) (Prerequisite: Admission to the junior year of the Veterinary Medical Technology Program). Two hours lecture. Diseases, husbandry, preventative health care and client education for the equine species.

CVM 3041. Equine Technical Skills & Nursing Care. (1) (Prerequisite: Admission to the junior year of the Veterinary Medical Technology Program). Two hours lecture/laboratory. Fundamentals of handling of the equine species. Breed identification, specimen collection, physical exam, medication administration and other nursing care procedures relevant to the species.

CVM 3051. Laboratory Animal Health Management. (1) (Prerequisite: Admission to the junior year of the Veterinary Medical Technology Program). One hour lecture. Diseases, husbandry and preventative health care for the Laboratory animal species.

CVM 3061. Laboratory Animal Technical Skills. (1) (Prerequisite: Admission to the junior year of the Veterinary Medical Technology Program). Two hours laboratory. Fundamentals of the handling of the laboratory animal species. Species and breed identification, specimen collection, physical exam, medication administration and other nursing care procedures.

CVM 3111. Parasitology for Veterinary Technologists. (1) (Prerequisite: Admission to the junior year of the Veterinary Medical Technology Program). Two hours lecture/laboratory. Parasites of veterinary and public health importance, including gross and microscopic morphology, transmission, and control.

CVM 3112. Animal Handling, Husbandry, and Nutrition (2). (Prerequisites: admission to the veterinary medical technology program). One hour lecture. One hour laboratory. General handling and restraint, basic husbandry techniques, and the nutritional needs for companion animals and production animals.

CVM 3121. Hematology for Veterinary Technologists. (1) (Prerequisite: Admission to the junior year of the Veterinary Medical Technology Program). One hour lecture. Structure and function of normal blood cells, cellular and humoral immunity, mechanisms of hemostasis, blood group serology, transfusion medicine and vaccinology.

CVM 3122. Clinical Pathology Laboratory Techniques. (2) (Prerequisite: Admission to the junior year of the Veterinary Medical Technology Program). Two hours lecture. Two hours laboratory. Procedures in hematology, serology and ELISA methodology, cytology, urology, chemistries, and microbiology (culture and sensitivity).

CVM 3141. Anatomical Pathology Laboratory Techniques. (1) (Prerequisite: Admission to the junior year of the Veterinary Medical Technology Program). Two hours lecture/laboratory. Veterinary anatomical pathology laboratory including necropsy, sample collection and submission, and disposal of animal tissues.

CVM 3201. Dental Principles for Veterinary Technologists. (1) (Prerequisite: Admission to the junior year of the Veterinary Medical Technology program). One hour laboratory. Students are expected to become proficient in dental techniques of all small animal species, instrumentation, and dental radiography positioning in additions to common dental disorders

CVM 3202. Diagnostic Imaging for Veterinary Technologists. (2) (Prerequisite: Admission to the junior year of the Veterinary Medical Technology Program). Two hours laboratory. Principles and techniques in veterinary surgical nursing and anesthesia.

CVM 3232. Pharmacology & Toxicology for Veterinary Technologists. (2) (Prerequisite: Admission to the junior year of the Veterinary Medical Technology Program). Two hours lecture. Characteristics, classification and usage of veterinary pharmaceuticals. Introduction to and application of dosage and formulation calculations. Overview of common toxics, clinical signs and associated treatments.

CVM 3243. Basics of Practice Procedures and Management. (3) (Prerequisite: Admission to the junior year of the Veterinary Medical Technology Program). Three hours lecture. Veterinary practice economics, personnel management, professional and client communications, inventory control, and marketing techniques.

CVM 4003. Internship Experience (3) (Prerequisite: admission to the senior year of the Veterinary Medical Technology Program). Three hours practicum. Students choose three facility to complete a three week internship. Choices include zoos, laboratory, research, equine, emergency, and small animal. Facility is approved by director.

CVM 4101. Veterinary Technology Academic Elective (1) (Prerequisite: admission to the senior year of the Veterinary Medical Technology Program). One hour practicum. The student will work one on one with a faculty member in areas of academic standard, course design, laboratory/lecture preparation, and other aspects of undergraduate programs.

CVM 4102. Professional Development for Veterinary Technologists (2). (Prerequisite: admission to the senior year of the Veterinary Medical Technology Program). Three hours lecture. Professional, ethical, and legal considerations of clinical practice. Professional development, career opportunities, and advancements in veterinary technology. Interdisciplinary, teams and human-animal bond in community and practice.

CVM 4103. Large Animal Clinical Experience (2). (Prerequisites: admission to the senior year of the veterinary medical technology program). Three hours clinical instruction. Supervised rotation through the MSU-CVM Large Animal Clinics (Equine and Food Animal) and Large Animal Ambulatory Rotation.

CVM 4113. Large Animal Clinical Experience II (3) (Prerequisite: CVM 4103). Three hours clinical instruction. Supervised advanced rotation through the MSU-CVM Large Animal Clinics (Equine and Food Animal) and Large Animal Ambulatory Rotation.

CVM 4201. Clinical Experience Elective (1) (Prerequisite: admission to the senior year of the Veterinary Medical Technology Program). One hour practicum. This course allows senior students in an elected clinical experience, either within MSU-CVM or at an outside approved facility; animal clinic/hospital, laboratory, research

CVM 4206. Small Animal Clinical Experience (6). (Prerequisites: admission to the senior year of the veterinary medical technology program). Six hour practicum. Students will rotate through 3 weeks in Community Veterinary Services, 1 week in laboratory animal, 1 week in shelter medicine, and 1 week in internal medicine.

CVM 4213. Small Animal Surgery & Anesthesia Clinical Experience. (3) (Prerequisite: admission to the senior year of the Veterinary Medical Technology Program). Three hours clinical instruction. Supervised rotation through the Small Animal Emergency/ Critical Care unit. Students participate in all technical aspects of the patients.

CVM 4223. Small Animal Primary Care Clinical Experience. (3) (Prerequisite: admission to the senior year of the Veterinary Medical Technology Program). Three hours clinical instruction. Supervised rotation through the Primary Care Service of the Small Animal Clinic. Students participate in all technical aspects of patient care and management.
CVM 4333. Emergency/ICU Clinical Experience (3) (Prerequisite: admission to the senior year of the Veterinary Medical Technology Program). Three hours lecture. Supervised rotation through the Small Animal Emergency/ICU Critical Care unit. Students participate in all technical aspects of the patients.

CVM 4501. Diagnostic Laboratory Experience (1). (Prerequisites: admission to the senior year of the veterinary medical technology program). One hour practicum. Supervised rotation through the discipline areas of the State Diagnostic Laboratory in PEAR, MS.

CVM 4511. Biomedical Research Experience Elective (1) (Prerequisite: admission to the senior year of the Veterinary Medical Technology Program). One week rotation at the Laboratory Animal Facilities, University of Mississippi Medical Center. Principles of animal research and application animal welfare regulations.

CVM 4601. Animal Emergency & Referral Center Elective (1) (Prerequisite: admission to the senior year of the Veterinary Medical Technology Program). One week practicum. Supervised rotation through the Animal Emergency and referral Center in Flowood. Students participate in technical aspects of referral and emergency and critical care nursing.

CVM 4701. Application & Process for VTNE (1) (Prerequisite: admission to the senior year of the Veterinary Medical Technology Program). One hour lecture. VTNE application process and how to review for the national board examination.

Doctor of Veterinary Medicine

YEAR 1: Fall

CVM 5011. Professional Development I. (1) (Prerequisite: Enrollment in the professional veterinary degree program). One hour lecture. This course will include COPE, personality profiles and understanding personality, dealing with stress, and study skills.

CVM 5023. Immunology and Mechanisms of Infectious Agents. (3) (Prerequisite: Enrollment in the professional veterinary degree program). Two hours lecture. The immunological basis of host resistance to infectious agents. Topics include the pathogenesis and diagnosis of infections caused by bacteria, viruses, fungi, protozoa, and helminths.

CVM 5036. Veterinary Physiology. (6) (Prerequisite: Enrollment in the professional veterinary degree program). Six hours lecture. Presentation of fundamental concepts, principles and issues in veterinary physiology specifically related to cellular physiology, muscle and nerve function, cardiovascular, respiratory, urinary, digestive, endocrine and reproductive physiology.

CVM 5073. Veterinary Histology. (3) (Prerequisite: Enrollment in the professional veterinary degree program). Two hours lecture. Two hours laboratory. Basic microscopic anatomy of cells, tissues, organs, and organ systems.

YEAR 2: Fall

CVM 5013. Veterinary Neurosciences. (3) (Prerequisite: Enrollment in the professional veterinary degree program). Two hours lecture. One hour laboratory for the entire course. Basic anatomical and physiological concepts foundational to understanding animal behaviors and veterinary neurology.

CVM 5021. Professional Development II. (3) (Prerequisite: Enrollment in the professional veterinary degree program). One hour lecture. This course will include presentations and discussions on ethics, jurisprudence, business, and professionalism.

CVM 5022. Veterinary Epidemiology. (2) (Prerequisite: Enrollment in the professional veterinary degree program). Two hours lecture. Presentation of basic concepts and principles of epidemiology and the relationship to animal and human health.

CVM 5044. Veterinary Pathology. (4) (Prerequisite: Enrollment in the professional veterinary degree program). Four hours lecture. Introduction to the host response to endogenous and exogenous injury. Emphasis will be on general and systematic anatomic pathology.

CVM 5074. Veterinary Anatomy II. (4) (Prerequisite: CVM 5064 and enrollment in the professional veterinary degree program). Six hours lecture/lab combination. Study of anatomy through dissection with integration of embryological, radiographic, microscopic, and visual perception. Thorax, alimentary system, abdomen, urogenital system, pelvic cavity, and mammary gland.

CVM 5093. Veterinary Agents of Infectious Disease. (3) (Prerequisite: CVM 5023). Three hours lecture. A systematic presentation of viruses, bacteria, and fungi causing diseases of importance in veterinary medicine.

YEAR 2: Fall

CVM 5213. Introduction to Veterinary Anesthesiology. (3) (Prerequisite: Enrollment in the professional veterinary degree program). Two hours lecture. Two hours laboratory. Introduction to principles of anesthesia for the common veterinary species. Course includes equipment, drugs, methods of administration, monitoring, and methods for specific disease states.

CVM 5212. Veterinary Clinical Pathology. (3) (Prerequisite: Enrollment in the professional veterinary degree program). Three hours lecture. This course covers the basic concepts of hematology, clinical chemistry, and cytology. The interpretation of laboratory methods used in evaluation will also be covered.

CVM 5133. Veterinary Preventive Medicine. (3) (Prerequisite: Enrollment in the professional veterinary degree program). Three hours lecture. Management and prevention of animal diseases that impact animal and human health.

CVM 5143. Theriogenology. (3) (Prerequisite: Enrollment in the professional veterinary degree program). Two hours lecture. Two hours laboratory. The pathogenesis, diagnosis, pathology, medical and surgical treatment, and prevention of diseases related to the urogenital system of domestic species.

CVM 5152. Toxicology. (2) (Prerequisite: Enrollment in the professional veterinary degree program). One hour lecture. Two hours laboratory. Diagnosis and management of animal intoxications.

CVM 5153. Equine Medicine & Surgery I. (3) (Prerequisite: Enrollment in the professional veterinary degree program). Three hours lecture. Two hours laboratory. Clinical reasoning, principles of diagnosis and the medical and surgical management of multi-systemic disorders involving the equine cardiovascular, endocrine, gastrointestinal, immune and urinary systems.

CVM 5185. Small Animal Medicine and Surgery I. (5) (Prerequisite: Enrollment in the professional veterinary degree program). Four hours lecture. Two hours laboratory. This course covers diagnosis and treatment of medical and surgical conditions of the cardio-respiratory, dermatological and urogenital systems.

YEAR 3: The Clinical Problem

Services and Practices

CVM 5214. Laboratory Services. (4) Four hours practicum. Supervised rotation through the Diagnostic Laboratory of the Animal Health Center. Responsibilities include diagnostic techniques and data interpretation in clinical pathology, pathology, parasitology and bacteriology.

CVM 5224. Radiology. (4) Four hours practicum. Supervised rotation in Radiology. Areas of study include radiographic and ultrasound techniques and interpretation and radiotherapy.

CVM 5234. Anesthesiology. (4) Four hours practicum. Supervised rotation in Anesthesiology. Areas of study include preanesthetic patient evaluation, anesthetic induction, maintenance and monitoring and postanesthetic patient management.

CVM 5266. Equine Medicine & Surgery. (6) Six hours practicum. Supervised rotation through the Equine unit of the Large Animal Clinic. Students participate in the receiving, analysis, and management of patients referred for care.

CVM 5284. Ambulatory/Large Animal Primary Care (4) (Prerequisite: Enrollment in professional veterinary degree program.) Four hours practicum. Supervised clinical rotation through the Ambulatory/Large Animal Primary Care service. Students participate in large animal medicine and surgery in a field setting.

YEAR 4: Career Options

CVM 5302. Professional Development IV. (2) One hour lecture. Three hours laboratory. Advanced communications skills. Professional writing and public speaking to the scientific audience.

CVM 5310. Small Animal Emergency and Critical Care Medicine. (4-6) Variable hours, four to six hours practicum. Supervised clinical rotation in the small animal intensive care and emergency services. Emphasis on the evaluation and management of the critically ill or injured animal.

CVM 5380. Small Animal Internal Medicine 2. (6-8) Variable hours practicum. Advanced supervised rotation through the Small Animal Clinic. Students participate in the receiving, analysis, and management of patients referred for medical care.

CVM 5392. Pharmacy. (4) Two hours practicum. Supervised clinical rotation in the pharmacy of the Animal Health Center. Students participate in all activities of these units.

CVM 5420. Advanced Rotation in Radiology. (2,4) Two to four hours practicum. (Prerequisite: CVM 5204). (May be repeated for credit). Areas of study include advanced radiographic and ultrasound techniques and interpretation and use of radioactive isotopes in therapy.

CVM 5430. Advanced Rotation in Anesthesiology. (1-6) Variable hours practicum. (Prerequisite: CVM 514) (May be repeated for credit). Advanced rotation in anesthesiology. Areas of study include pre-anesthetic patient evaluation, and advanced techniques in anesthetic induction, anesthetic maintenance, patient monitoring and post-anesthetic care.

CVM 5454. Advanced Rotation in Small Animal Surgery. (4) Four hours practicum. (Prerequisite: Consent of instructor). (May be repeated for credit). Students assume primary responsibility for the receiving, diagnosis, treatment and management of small animal surgery receiving.

CVM 5464. Advanced Rotation in Equine Medicine and Surgery. (4) Four hours practicum. (Prerequisite: CVM 5266). (May be repeated for credit). Students assume primary responsibility for patient diagnosis and care in small animal internal medicine.

CVM 5510. Veterinary Medicine/Animal Industry Externship 1. (1-6) Variable hours practicum. Rotation through private industry dealing with one of the major animal commodities. Rotation may include poultry, catfish, swine, dairy, beef or other commercial animal operation.

CVM 5520. Veterinary Medicine/Animal Industry Externship 2. (1-6) Variable hours practicum. Rotation through private industry dealing with one of the major animal commodities. Rotation may include poultry, catfish, swine, dairy, beef or other commercial animal operation.

CVM 5530. Veterinary Medicine/Animal Industry Externship 3. (1-6) Variable hours practicum. Rotation through private industry dealing with one of the major animal commodities. Rotation may include poultry, catfish, swine, dairy, beef or other commercial animal operation.

CVM 5540. Veterinary Medicine/Animal Industry Externship 4. (1-6) Variable hours practicum. Rotation through private industry dealing with one of the major animal commodities. Rotation may include poultry, catfish, swine, dairy, beef or other commercial animal operation.

CVM 5550. Veterinary Medicine/Animal Industry Externship 5. (1-6) Variable hours practicum. Rotation through private industry dealing with one of the major animal commodities. Rotation may include poultry, catfish, swine, dairy, beef or other commercial animal operation.

CVM 5553. Pharmacology II. (3) Three hours lecture. There is an emphasis on antimicrobial therapy. The course also addresses regulatory issues, vaccination, and the management of disease syndromes.

CVM 5560. Advanced Clinical Rotation 1. (1-6) Variable hours practicum. (May be repeated for credit). Supervised rotation through one of the defined units of the Animal Health Center. Students assume primary responsibility for patient diagnosis and care.

CVM 5570. Advanced Clinical Rotation 2. (1-6) Variable hours practicum. (May be repeated for credit). Supervised rotation through one of the defined units of the Animal Health Center. Students assume primary responsibility for patient diagnosis and care.

CVM 5580. Advanced Clinical Rotation 3. (1-6) Variable hours practicum. (May be repeated for credit). Supervised rotation through one of the defined units of the Animal Health Center. Students assume primary responsibility for patient diagnosis and care.

CVM 5602. Comparative Endocrinology I. (2). (Prerequisite: Enrollment in Phase II of the professional veterinary degree program). Two week practicum. An in-depth analysis including the pathophysiology, diagnosis, and treatment of endocrine disease in veterinary species, with emphasis on small animal patients.

CVM 5604. Professional Development III. (4) Four hours lecture. Comprehensive review for National Board Examinations. Will be graded on a Pass/Fail basis.

CVM 5622. Veterinary Diagnostic Toxicology. (2) (Prerequisite: Consent of instructor). Two hours lecture. Phase 2 elective emphasizes diagnosis and treatment of animal poisoning including environmental toxins.

CVM 5632. Advanced Large Animal Techniques. (2) (Prerequisite: Consent of instructor). Four hours laboratory. Provides students hands-on techniques experience required in a progressive large animal/equine referral practice or an internship position at a veterinary hospital.

CVM 5640. Shelter Medicine Spay Neuter. (0-6) (Prerequisite: CVM 5246). Variable hour practicum. This course will provide in-depth understanding and practical experience in dealing with issues surrounding pet overpopulation, responsible pet ownership, shelter medicine and surgery.

CVM 5644. Applied Gross Anatomy. (4) (Prerequisite: Consent of instructor). Eight hours laboratory. Phase 2 elective emphasizes review and further study of anatomy with relation to clinical and diagnostic applications.

CVM 5654. Applied Veterinary Parasitology. (4) Four hours practicum. (Prerequisite: Consent of Instructor). Provides opportunities to use problem-solving skills in the diagnosis, treatment, and control of both newly emerging and commonly encountered parasitic diseases.

CVM 5662. Clinical Neurology. (2) (Prerequisite: Consent of instructor). Two hours lecture. Phase 2 elective emphasizes basic procedures and concepts required to diagnose and manage neurological diseases.

CVM 5672. Veterinary Dentistry. (2) Two hour practicum. (Prerequisite: consent of instructor). Phase 2 elective emphasizing diagnostic and therapeutic approach to dentistry in small animals and equine species.

CVM 5682. Veterinary Ophthalmology. (2) (Prerequisite: Consent of instructor). Two hours lecture. Phase 2 elective emphasizing the diagnosis and treatment of ophthalmic diseases.

CVM 5692. Veterinary Art and Business Management. (2) (Prerequisite: Consent of instructor). Two hours lecture. Lecture, group discussion, and focused independent study of the art and business of veterinary medicine. This course will emphasize non-technical veterinary skills. (Phase 2 elective).

CVM 5714. Advanced Small Animal Dermatology. (4) Three hour lecture. One hour laboratory. Advanced study of small animal dermatology. Emphasis will be on disease conditions with primary impact on the integumentary system of small animals.

CVM 5722. Small Ruminant Production Medicine. (2) (Prerequisite: CVM 5276). Two hours practicum. An elective focused on sheep and goat production. Experience in common surgery/treatment procedures provided. Small ruminant production medicine topics and current literature review discussed.

CVM 5754. Advanced Small Animal Surgery. (4) One hour lecture. Three hour practicum. Exercises to provide additional understanding and “hands-on” experience for students interested in orthopedic surgery, neurosurgery, plastic and reconstructive surgery, and other selected soft tissue procedures.

CVM 5764. Advanced Equine Reproduction. (4) (Prerequisite: Consent of instructor). Four hours lecture. Phase 2 elective emphasizing review of basic anatomy, reproduction and exposure to advanced diagnostic and therapeutic modalities.

CVM 5772. Canine Theriogenology. (2) Two hour practicum. (Prerequisite: Consent of instructor). Advanced study of canine reproduction. Review of basic diagnostics and procedures followed by an introduction to assisted reproductive technology (ART).

CVM 5784. Clinical Behavioral Medicine. (4) (Prerequisite: Consent of Instructor). Four hours lecture and discussion. Case oriented study of normal and abnormal behaviors and underlying influences in domestic animals, with focus on dogs, cats, and horses.

CVM 5802. Practical Small Animal Oncology. (2) (Prerequisite: Enrollment in the professional veterinary degree program). Two week practicum. Practical clinical oncology at the general practice level to include an overview of individual disease behaviors and diagnostic techniques and an introduction to therapy modalties.

CVM 5814. The Feline Patient. (4) Four hours lecture. Lecture, group discussion, and focused independent study on a variety of feline-related topics, with emphasis on medical problems which are unique to the cat.

CVM 5844. Clinical Pharmacology. (4) Four hours lecture. Use of pharmacological agents in the treatment of disease syndromes. This course will be placed on therapeutic alternatives for the treatment of specific diseases or syndromes.

CVM 5854. Aquarium Health Management. (4) (Prerequisite: Consent of instructor). Concepts and techniques for the maintenance of common aquarium species. This course will provide students opportunities to develop selected skills relating to aquarium medicine.

CVM 5864. Bovine Production Medicine. (4) (Prerequisite: Enrollment in the CVM professional curriculum). Four hours lecture. Reproductive and nutritional management, record-keeping, data analysis, herd health programs, and
Graduate-Level Courses

CVM 4134/6134. Aquatic Animal Health Management. (4) (Prerequisite: Consent of instructor). Three hours lecture. Three hours laboratory. The course covers an in-depth understanding of issues related to aquatic and terrestrial ecosystems.

CVM 4513/6513. Environmental Toxicology. (3) (Prerequisites: 8 hours biological sciences and 8 hours chemistry). Three hours lecture. The dispersion and toxicological effects of environmentally-relevant toxicants (such as agrochemicals, petroleum and industrial pollutants) within organisms, and aquatic and terrestrial ecosystems.

CVM 4523/6523. Basic Neuroscience. (3) Three hours lecture. This course is a targeted study of the mammalian nervous system, stressing cellular and molecular elements/function, neuronal development and regulation.

CVM 6602. Comparative Endocrinology II. (2). (Prerequisite: Enrollment in a veterinary graduate degree program; instructor approval). Two week practicum. An in-depth analysis including the pathophysiology, diagnosis, and treatment of endocrine disease in veterinary species, with emphasis on small animal patients.

CVM 8011. Seminar. (1) One hour lecture. A seminar which provides the student with a forum for presentation of current topics in veterinary medical research.

CVM 8031. Current Topics in Molecular Mechanisms of Disease. (1) 1.5 hours discussion. The molecular biology of pathogens, hosts and their interactions are covered by students presenting recently published papers. This course can be taken six times.

CVM 8041. Advanced Clinical Radiology Seminar. (1). (May be repeated for credit. Prerequisite: Consent of instructor). A bi-weekly seminar to present, discuss, and interpret radiographic, ultrasound, CT scan, and other advanced diagnostic imaging findings of current and archived clinical cases.

CVM 8051. Advanced Clinical Pathology Seminar. (1). (May be repeated for credit). (Prerequisite: Course leader approval). Bi-weekly seminar to present, discuss, and interpret laboratory analysis results. Topics include: biopsy, toxicology, and/or necropsy findings and other findings of current and archived clinical cases.

CVM 8091. Current Topics in Production Animal Medicine. (1) 1.5 hour discussion. (Prerequisite: Consent of Instructor). A weekly seminar to address issues of current interest in production animal medicine (i.e., cattle, swine, poultry, aquaculture.) May be repeated four times for credit.

CVM 8101. Case Studies in Scientific Research Ethics. (1) One hour seminar. Practical application of research ethics using case scenarios to reflect discussions on data ownership, plagiarism, authorship, conflict of interest, and other regulatory compliance related issues. (Same as PH 8101)

CVM 8113. Advanced Diseases of Poultry. (3) Three hours lecture. Advanced study of the major poultry diseases; the mechanisms of each disease, diagnosis, prevention, and control.

CVM 8134. Advanced Fish Diseases. (4) Prerequisite: CVM 6134 or permission). Three hours lecture. Three hours laboratory. Detailed investigations into the mechanisms involved in the development and management of infectious and non-infectious diseases in fish.

CVM 8143. Epidemiology/Biostatistics. (3) Three hours lecture. Fundamental principles of descriptive and analytical epidemiology.

CVM 8153. Histopathology of Fish Diseases. (3) (Prerequisite: CVM 4134/6134 or equivalent). Three hours lecture. (Prerequisite: CVM 6134 or equivalent). Study of the pathophysiology response of fish to a variety of environmental, infectious, parasitic and neoplastic diseases based upon histologic interpretation of case materials.

CVM 8190. Aquatic Diagnostic Investigation. (1-9) (Prerequisite: CVM 6134, equivalent, or consent of instructor). Variable hours practicum. (May be repeated for credit). A practical exercise in diagnosis and therapeutic recommendation for health management and maintenance in aquatic animal medicine.

CVM 8301. Advanced Topics in Comparative Immunology. (1) 1.5 hours discussion. Current controversies, discoveries, and experimental approaches in comparative immunology will be covered by students’ presentations. This course can be taken up to 4 times for a maximum of 6 credit hours.

CVM 8303. Advanced Immunology. (3) (Prerequisite: BIO 6413 or equivalent, or consent from the instructor). Three hours lecture. Advanced theory and concepts of immunology, structure and function of immune mechanisms are discussed in detail.

CVM 8315. Immunological Techniques. (5) Two hours lecture. Six hours laboratory. An in-depth course to teach the student a variety of modern methods of immunology. (Same as BIO 8315).

CVM 8323. Zoonotic Disease in Public Health. (3) Three hours lecture. Major zoonotic diseases affecting humans, their role in bioterrorism, and CDC categories A and B disease are studied with focus on epidemiology and prevention.

CVM 8333. Food Safety and Security in Public Health. (3) (Prerequisite: enrolled in graduate school, MPH program, or consent of instructor). Three hours lecture. Epidemiology and risk factors for illness from microbial food contaminants. Pre and post-harvest interventions will be addressed. (Same as FHN 8333)

CVM 8403. Principles of Pharmacology and Pharmacokinetics. (3) Three hours lecture. This course addresses basic principles of how the body reacts to the presence of a drug or toxin and the mathematical expression of drug residues.

CVM 8513. Applied Veterinary Epidemiology. (3) Three hours lecture. Applications of qualitative veterinary epidemiology in animal and human health. Includes uses of epidemiologic methodology in field investigations and disease control programs.

CVM 8624. Proctology. (4) (Prerequisite: BIO 1144 or equivalent). Three hours lecture, two hours laboratory. This course will cover current concepts in morphology and identification, life cycle, and host-parasite relationships of helminthic parasites.

CVM 8624. Proctology. (4) (Prerequisite: BIO 1144 or equivalent). Three hours lecture, two hours laboratory. This course will cover the morphologic identification, life cycles, epidemiology and control of protozoans in vertebrates.

CVM 8701. Veterinary Histopathology Seminar. (1) (Prerequisite: CVM 5044 or permission of instructor). Three hours lecture. The course will examine and discuss current and archived topics relevant to veterinary pathology and diagnostic medicine. Emphasis on the characterization of disease using histopathology.

CVM 8721. Gross Veterinary Pathology Seminar. (1) (Prerequisite: CVM 5044 or consent of instructor). Three hours lecture. Weekly seminar on the gross pathologic lesions of diseases. Emphasis will be on classical diseases and gross changes encountered and brief discussion of pathogenesis and etiology. (May be repeated for credit)

CVM 8735. Mechanisms of Disease. (5) (Prerequisites: Acceptance to Dual Degree DVM/MS Program or Consent of Instructor). Five hours lecture. The course covers basic mechanisms of disease production in mammals. Topics include host response to microbial and toxic injury.

CVM 8743. Emerging Infectious Diseases and Zoonoses. (3) (Prerequisite: Acceptance to dual degree program or consent of instructor). Five hours seminar. An advanced discussion of emerging and currently relevant veterinary health issues with an emphasis on zoonoses.

CVM 8801. Seminars in Veterinary Anesthesiology. (1) (Prerequisite: DVM or equivalent degree, or consent of instructor). One hour seminar. Topics include physiology and pharmacology in veterinary anesthetic practice, anesthesia equipment, and anesthetic techniques.

CVM 8802. Canine Stereotaxic Surgery. (2) (Prerequisite: consent of instructor). Two hours lecture. Advanced study of canine reproduction. Review of basic diagnostics and procedures followed by an introduction to assisted reproductive technology (ART).

CVM 8803. Advanced Small Animal Clinical Neurology. (5) (Prerequisite: Must already have registrable veterinary degree and consent of instructor). Five hours practicum. Advanced-level study of neurologic disease in small animals, with an emphasis on case management, oral and written presentation skills, and teaching internship.

CVM 8812. Equine Reproductive Ultrasound. (2) (Prerequisite: Consent of instructor). One hour lecture. Two hours laboratory. Advanced study of ultrasonic diagnostics of the equine urogenital systems in the male and female.

CVM 8825. Large Animal Urogential Surgery, (5) (Prerequisite: Consent of instructor). Three hours lecture. Four hours laboratory. Urogenital surgery of the male and female in the equine and bovine species.

CVM 8890. Economic and Performance Medicine. (1-9) Variable hours practicum. (May be repeated for credit). (Prerequisite: Consent of instructor). Advanced training in the identification and management of health related problems in commercial food animal production units.

CVM 8961. Nobel Topics in Physiology/Medicine and Chemistry. (1) (Prerequisite: Graduate standing and consent of instructor). One hour seminar. Course provides historic and current understanding of topics awarded with a Nobel Prize. May be repeated three times for credit. (Same as GNS 8961 and FO 8961)

CVM 8973. Scientific Writing. (3) (Prerequisite: Graduate standing and consent of instructor). Three hours lecture. The course provides advanced training...
in research proposal, grant proposal, and manuscript writing. (Same as ADS 8973)

CVM 8983. Advanced Biotechnology. (3) Prerequisite: BCH 6603, BCH 6613, BCH 6713 or consent of instructor). Three hours lecture. Advanced biotechnology course with an emphasis on environmental, biopharmaceutical, industrial, and medical technologies. (Same as FO 8983).

DIVISION of TECHNOLOGY

MERIDIAN CAMPUS ONLY

DTF 4923. Technology Career Seminar. (3) (Prerequisite: DTF 4613). Three hours lecture. Critical evaluation of current issues in technology, examination of career opportunities and approved project completion status.

DTF 4936. Technology Field Practicum I. (6) (Co-requisite: DTF 4926). The course provides students opportunities to apply contemporary practices by completing a minimum of 340 supervised hours in an approved industry.

DTF 4946. Technology Field Practicum II. (6) (Prerequisite: DTF 4936 or concurrent enrollment in DTF 4936). The course provides students opportunities to apply contemporary practices by completing a minimum of 340 supervised hours in an approved industry.

DTM 4213. Manufacturing Regulatory Agencies. (3) Three hours lecture. An introduction to the effects that regulatory agencies, both public and private, have on contemporary manufacturing operations.

DTM 4313. Transportation and Packaging. (3) Three hours lecture. A study of internal and external product transportation for a manufacturing facility. Emphasis on the reduction of time and cost to include protective packaging.

DTM 4413. Facilities Operations. (3) Three hours lecture. An introduction to the many facets of manufacturing facility operations. Emphasis on key areas such as maintenance, employee services, and public utility optimization.

DTM 4553. Production Standards & Measurement. (3) Three hours lecture. A study to focus upon the application of theoretical and contemporary methods of manufacturing production standards and appropriate measurement techniques.

Department of FINANCE and ECONOMICS

Office: 312 McCool Hall

Professors Grimes, and Liano; Associate Professors Blair, R. Campbell, Highfield (head), Kelly, Milla, Rezek, Rogers, and Thomas; Assistant Professors Cline, Lin, Roskerley, Wade, and Young; Instructors He, Metz, Smith, and Steen

EC 1033. Economics of Social Issues. (3) Three hours lecture. Basic economic principles introduced and developed through the study of important social issues such as unemployment, health care, poverty, crime, pollution, inflation, and government debt. (Not open to students with prior credit in Principles of Economics).

EC 2113. Principles of Macroeconomics. (3) (Prerequisite: Sophomore standing.) Three hours lecture. Introduction to macroeconomics: free enterprise principles, policies, institutions; national income, employment, output, inflation, money, credit, business cycles, and government finances.

EC 2123. Principles of Microeconomics. (3) (Prerequisite: EC 2113 and Sophomore standing.) Three hours lecture. Introduction to microeconomics: emphasizes American industrial structure, demand and supply, pricing and output, income distribution, factor pricing, international trade.

EC 3113. Intermediate Macroeconomics. (3) (Prerequisites: EC 2113 and EC 2123). Measurement and determination of national income, employment, and output; economic significance of consumption, saving, investment, foreign trade, money and prices, fiscal and monetary policy.

EC 3123. Intermediate Microeconomics. (3) (Prerequisites: EC 2113 and EC 2123). Theory and application of microeconomics; demand, supply, optimal consumer choice, production, cost, profit-maximizing pricing and output decisions, employment of resources, externalities, efficiency and welfare.

EC 3333. Managerial Economics. (3) (Prerequisites: EC 2113 and EC 2123). Three hours lecture. The application and use of economic models in analyzing and solving selected problems of the firm such as product pricing, product mix, demand forecasting, market analysis.

EC 3423. Economics of Regulation and Antitrust, (3) (Prerequisites: EC 2113 and EC 2123). Three hours lecture. Examination of the evolution and composition of the economic relationship between government and business in the U.S., focusing on regulation and antitrust.

EC 3513. Comparative Economic Policy. (3) (Prerequisites: EC 2113 and EC 2123 or consent of instructor). Three hours lecture. Comparative analysis of major government policies, economic structure, institutions around the world, emphasis on the organization, production, distribution of goods and resources...

EC 4043. Survey of Economics. (3) (Prerequisite: Senior or Graduate standing). Three hours lecture. Introduction to macro and microeconomics, national income, money, business cycles, government policy, international trade, supply and demand, distribution of income, markets, pricing, and output. (Not open to BACC or BBA Business majors).

EC 4183/6183. U.S. Economic History. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. An intensive study of economic change in the United States and its impact on political and social development. (Same as HI 4183/6183).

EC 4223/6223. Labor Law and Employment Policy. (3) (Prerequisites: Three credit hours of economics or consent of instructor). Three hours lecture. Examination of the legal and regulatory environment of the employment relationship in today’s American economy; including, unionization, equal employment opportunity, occupational health and safety.

EC 4233. Labor Economics. (3) (Prerequisites: EC 2113, EC 2123 and EC 3123.) Three hours lecture. Labor market behavior of households and firms. Emphasizes wage determination, optimal employment decisions, income distribution, unionization, human capital, and discrimination.

EC 4303/6303. International Economic Development. (3) (Prerequisites: EC 2113 and EC 2123). An analysis of problems facing developing economies and policies designed to promote economic growth with an emphasis on income distribution, trade, agriculture, industry, and technology.

EC 4313/6313. Introduction to Regional Economic Development. (3) (Prerequisites: EC 2113 and EC 2123 or consent of instructor). Three hours lecture. Regional economic differences; location theory (industrial, agricultural, and residential); Land use patterns; Belt areas; Structure; growth and methods of analysis; National assistance for regional economic development.

EC 4333/6333. Applied Regional Economic Development. (3) (Prerequisite: EC 4313/6313). Three hours lecture. Economic analysis and effects of regional resources and development potentials, economic factors affecting industrial location decisions, planning and organization of industrial development.

EC 4433/6433. State and Local Finance. (3) (Prerequisites: EC 2113 and EC 2123). Three hours lecture. Fiscal and economic effects of state and local budgets; alternative tax and expenditure models; fiscal administration and budgeting with emphasis on local economic development.

EC 4523/6523. History of Economic Thought. (3) (Prerequisites: EC 2113 or consent of instructor). Three hours lecture. Survey of economic ideas from Ancient Greece to present, emphasizing the changing foci and methodologies of economics relative to economic problems perceived at the time.

EC 4643/6643. Economic Forecasting and Analysis. (3) (Prerequisites: EC 2113, EC 2123 and BQA 2113 (or equivalent) or consent of instructor.) Three hours lecture. Forecasting tools and procedures; estimation techniques; regression, exponential smoothing, decomposition, frontier analysis, etc. Real-world data, business applications, and model building are emphasized.

EC 8103. Economics for Managers. (3) (Prerequisites: EC 2113 and EC 2123, or EC 8043). Three hours lecture. Primarily for masters-level candidates. Exposition of the fundamental theoretical and analytical tools of economics used by business managers engaged in decision making.

EC 8113. Labor Theory and Analysis. (3) (Prerequisites: Graduate Standing). Three hours lecture. Theoretical and empirical examination of labor market processes and policy; Wage determination, resource allocation, labor mobility, human capital investment, discrimination and income distribution.

EC 8133. Econometrics I. (3) (Prerequisites: AEC 8413 or consent of instructor). Econometric theory and methods. Topics include the classical linear regression model, maximum likelihood estimation, generalized least squares, and estimation with panel data.

EC 8143. Econometrics II. (3) (Prerequisite: EC 8133). A continuation of EC 8133. Topics include advanced theories of simultaneous equations estimation methods, time series econometrics, and estimation with qualitative and limited dependent variables.

EC 8163. Microeconomics I. (3) (Prerequisite: EC 3123 or EC 8103 or equivalent). Three hours lecture. Survey of demand analysis, production, cost, and supply relationships, analysis of pricing under competitive and noncompetitive conditions, analysis of income distribution with emphasis on input pricing.
Department of Electrical and Computer Engineering

Office: 216 Sirmall Electrical Engineering Building
Professors Younan (Head), L. Bruce, Donohoe, Fowler, Grzybowski, King, Mazzola, Molen, Moothart, Rajala, and Winton; Associate Professors J. Bruce, Du, Ginn, Koshka, Reese and Topsakal; Assistant Professors Abdelwahed, Follot, Fu, Jones, Li and Morris

EC 1002. Introduction to Electrical & Computer Engineering. (2) (Prerequisite: Credit or registration in MA 1713). One hour lecture. Three hours laboratory. Three hours lecture. What is means to be an engineer, engineering ethics, engineering modeling, the design process, areas of ECE, communication skills, and the rise of new paradigms.

EC 1003. University Mathematics I. (3) (Prerequisite: Grade of C or better in either ECE 3413 or CSE 1384 and credit registration in ECE 3313). Three hours lecture. Fundamentals of electric circuits and network analysis. Transient analysis and frequency response of networks. Introduction to operational amplifiers. AC power.

EC 1102. Introduction to Electronic Circuits. (3) (Prerequisite: Grade of C or better in ECE 3413 or credit registration in MA 2352). Three hours lecture. Waveguides and cavity resonators, fiber optics, antennas, electromagnetic compatibility, analytical and numerical solution techniques in electromagnetics.

EC 3183. Electrical Engineering Systems. (3) (For non-Electrical Engineering majors). Three hours lecture. Theory of semiconductor devices; energy conversion of solar cells; electronic control systems; and industrial and systems engineering aspects. (Same as CHE 3324 and ECE 3714). Three hours lecture. Three hours laboratory. Synchronous and asynchronous microprocessors, state machines and programmable controllers; National Electric Code and electrical safety.

EC 3213. Introduction to Solid State Electronics. (3) (Prerequisite: Grade of C or better in ECE 3413). Three hours lecture. Introduction to quantum mechanics and solid state physics. Physical principles of pn junctions, bipolar transistors, field effect transistors. Applications include electro-optics, integrated circuits, gaseous electronics.

EC 3283/6283. Principles of VLSI Design. (Prerequisite: Grade of C or better in both ECE 3724 and ECE 3424). Two hours lecture. Three hours laboratory. Design and dynamic CMOS circuit design using state-of-the-art CAD tools, with emphasis on digital system cells and architecture.

EC 4273/6273. Microelectronics Device Design. (Prerequisite: Grade of C or better in ECE 3424). Three hours lecture. Theory of semiconductors in equilibrium and non-equilibrium, bipolar, advanced theory of p-n junctions, bipolar junction transistor and advanced theory and operation of field dependent devices.

EC 4283/6283. Microelectronics Process Design. (Prerequisite: Grade of C or better in ECE 3424). Three hours lecture. Introduction to device fabrication technologies, semiconductor parameter measurement techniques, and the processes of design relative to modern microelectronics technology.

EC 4313/6313. Antennas. (Prerequisite: Grade of C or better in ECE 3323 or consent of instructor). Three hours lecture. Introduction to electromagnetic radiation, antenna design and analysis, antenna performance measures, antenna types, antenna arrays.

EC 4323/6323. Electromagnetic Compatibility. (Prerequisite: Grade of C or better in ECE 3323 or consent of instructor). Three hours lecture. Introduction to electromagnetic interactions, passive sensors, multiphysical and hyperspectral optical sensors, active sensors, imaging radar, SAR, Lidar, digital image processing, multimedia resource applications. (Same as CHE 4413/6413, ECE 4413/6413, and CSE 4413/6413). Three hours lecture. Two hours laboratory. Networking and security for information systems, digital signal processing, and image processing technologies.

EC 6243/6423. Introduction to Remote Sensing Technologies. (Prerequisite: Senior or graduate standing, or consent of instructor). Three hours lecture. Remote sensing systems, aerial and spaceborne systems, and satellite data analysis. Applications include agriculture, environmental monitoring, and military and security applications.

EC 6252. EE Design I. (2) (Prerequisite: Grade of C or better in each of ECE 3434, ECE 3443, and ECE 3724; grade of C or better in one of either ECE 3323 or ECE 3614; co-registration in GE 3513; and consent of instructor). One hour lecture. Three hours laboratory. Lectures on design, teaming, entrepreneurship, project management, product development, and project management. A grade of C or better is required for all other design projects. Students must select mentor, perform project design, document and present orally.

EC 6252. EE Design II. (2) (Prerequisite: Grade of C or better in ECE 4512). One hour lecture. Three hours laboratory. Prototyping, documentation, and oral presentation of an engineering design project. Lectures on legal aspects and industry standards and practices of professional ethics and technical skills.

EC 6242. EE Design I. (2) (Prerequisite: Grade of C or better in both CSE 3324 and ECE 4743; grade of C or better in either ECE 3434 or ECE 3443; co-
registration in GE 3513; and consent of instructor). One hour lecture. Three hours laboratory. Lectures on teaming, project management, engineering standards, economics, and technical and professional issues. Student must select faculty mentor, perform project design, and present orally.

ECE 4542. CPE Design II. (2) Prerequisite: Grade of C or better in both ECE 3434 and ECE 4532. One hour lecture. Three hours laboratory. Development of design, teaming, presentation, and entrepreneurial skills. Teams must complete their project designs, and present written and oral results.

ECE 4613/6613. Power Transmission Systems. (3) Prerequisite: Grade of C or better in ECE 3614. Three hours lecture. Transmission of power from generator to distribution system; transmission line design; load flow; symmetrical components; balanced and unbalanced faults; stability and control.

ECE 4633/6633. Power Distribution Systems. (3) Prerequisite: Grade of C or better in ECE 3614. Three hours lecture. Distribution of power from transmission system to users; primary and secondary feeders; voltage regulation; distribution transformers, protective device coordination; system design; load management.

ECE 4643/6643. Power Systems Relaying and Control. (3) Prerequisite: Grade of C or better in ECE 4613. Three hours lecture. Protection objectives and fundamentals; inputs; protection of generators, transformers, busses and lines; stability and control.

ECE 4653/6653. Introduction to Power Electronics. (3) Prerequisite: Grade of C or better in both ECE 3614 and ECE 3424 or equivalent. Three hours lecture. Introduction to power electronic circuits, with emphasis on design and analysis of power semiconductor converters including DC-DC converters. PWM inverters, and DC power supplies.

ECE 4663/6663. Insulation Coordination in Electric Power Systems. (3) Prerequisite: Credit or registration in ECE 4613. Three hours lecture. Lightning phenomena; switching surges and temporary system overvoltages; laboratory generation and application of high voltages and currents; basic insulation levels; surge arresters; system insulation design.

ECE 4673/6673. Fundamentals of High Voltage Engineering. (3) Prerequisite: Grade of C or better in either ECE 3424 or CSE 4153 and grade of C or better in both CSE 3324 and MA 3113. Three hours lecture. Advanced study of high-voltage engineering. Computer aided design workstations will be used to give students access to state-of-the-art design techniques.

ECE 4733/6733. Digital System Design. (3) Prerequisite: Grade of C or better in ECE 3724. Credit or registration in ECE 3424. Two hours lecture. Three hours laboratory. Detailed design and implementation of a stored-program digital computer system. Designs for the CPU, I/O subsystems, and memory organizations. ALU design and computer arithmetic.

ECE 4733/6733. Embedded Systems. (3) Prerequisite: Grade of C or better in either ECE 3424 or CSE 4153 and grade of C or better in both CSE 3324 and ECE 3434. Three hours lecture. Three hours laboratory. Advanced study of embedded systems design using contemporary practice. Interrupt-driven, reactive, real-time, object-oriented, and distributed client/server embedded systems.

ECE 4743/6743. Digital System Design. (3) Prerequisite: Grade of C or better in ECE 3724. Credit or registration in ECE 3424. Two hours lecture. Three hours laboratory. Hierarchical digital design using available design software. Computer aided design workstations will be used to give students access to state-of-the-art design techniques.

ECE 4753/6753. Introduction to Robotics. (3) Prerequisite: Grade of C or better in either ECE 3443 or consent of instructor. Three hours lecture. Two hours laboratory. This course covers mathematical foundations (kernel methods and dynamics and hardware implementations actuators and sensors) of modern robots.

ECE 4763/6763, Information and Computer Security. (3). Prerequisite: Grade of C or better in either ECE 3424 or CSE 4153 and grade of C or better in both CSE 3324 and MA 3113. Three hours lecture. Three hours laboratory. Advanced study of embedded systems design using contemporary practice. Interrupt-driven, reactive, real-time, object-oriented, and distributed client/server embedded systems.

ECE 4743/6743. Digital Signal Processing. (3) Prerequisite: Grade of C or better in either ECE 3424 or CSE 4153 and grade of C or better in both CSE 3324 and MA 3113. Three hours lecture. Three hours laboratory. Advanced study of digital signal processing principles, concepts, and algorithms; mathematical models; image perception; image sampling and quantization, transforms, image coding.

ECE 4843. Image and Video Coding. (3) Prerequisite: ECE 4413/6413 or consent of instructor. Three hours lecture. Acoustic Phonetics, Linear Prediction, Feature Extraction, Dynamic Programming and Time-Warping, Hidden Markov Models; Statistical Language Modeling; Decision Trees; Introduction to Natural Language Processing; Implementation Issues.

ECE 8473. Digital Image Processing. (3) Prerequisites: ECE 1233, CSE 1284 and consent of instructor. ECE 4413/6413 or consent of instructor. Three hours lecture. A study of digital image processing principles, concepts, and algorithms; mathematical models; image perception; image sampling and quantization, transforms, image coding.

ECE 8483. Image and Video Coding. (3) Prerequisites: ECE 4473 or consent of instructor. Three hours lecture. Image and video coding, image transmission and compression, video-coding standards, image transmission and error control.

ECE 8503. Spacecraft Electrical Systems. (3) Prerequisite: Consent of instructor. Three hours lecture. Introduction to electrical and computer subsystems required to develop and operate satellites and space-borne instrumentation. Topics include space systems, imaging, communications, and data-handling.

ECE 8623. Stability and Control of Power Systems. (3) Prerequisite: Consent of instructor. Three hours lecture. Transient and dynamic stability; effect of excitation on stability; control of system in steady state (AGC); economic dispatch.

ECE 8663. High Voltage Engineering. (3) Prerequisite: ECE 3313. Three hours lecture. Emission, mobility, breakdown, corona, arc impulse generation, measurement, analysis, dielectric materials, design laboratory demonstration.

ECE 8713. Switching Theory I. (3) Prerequisites: ECE 4344, ECE 4713/6713, or consent of instructor. Three hours lecture. Theory of combinational and sequential (synchronous and fundamental-mode) circuits with emphasis on performance, robustness, cost, and testability objectives.

ECE 8723. Introduction to Computer Arithmetic. (3) Prerequisite: ECE 4263/6263. Three hours lecture. Fixed point number systems; algorithms and associated logic level implementations for fixed point addition, subtraction, multiplication, and division; floating-point arithmetic.

ECE 8733. Parallel Computing Architectures I. (3) Prerequisites: ECE 4713/6713, CSE 4113/6113. Three hours lecture. Study of hardware structures
Department of CURRICULUM, INSTRUCTION and SPECIAL EDUCATION

310 Allen Hall

Professors Coffey, Devlin, Greene, Minchew, Obringer, Person, and Verhok-Miller; Associate Professors: Brenner, Burroughs, Hamil, and Jayroe; Assistant Professors: Franz, Hopper, Pope, Scholtes and Thompson

EDE 4123. Teaching Elementary and Middle Level Mathematics. (3) (Co-requisites: EDE 4113, RDG 4133, and EDE 4143; admission to Teacher Education.) Two hours lecture. Two hours laboratory. Field-based. The content and process of mathematics instruction for elementary and middle grades children; teaching principles, mathematical tools, and assessment of student progress.

EDE 4143. Teaching Elementary and Middle Level Social Studies. (3) (Prerequisite: Admission to Teacher Education; Co-requisite: EDE 4113, EDE 4123, and RDG 4133.) Two hours lecture. Two hours laboratory. Field-based. The content, selection, organization and presentation of social studies content for K-8 students; assessment of student learning and effectiveness of instruction.

EDE 4883. Managing the Elementary and Middle Level Classroom. (3) (Prerequisite: Admission to Teacher Education, completion of all professional development courses, and concurrent enrollment in EDE 4886.) Three hours lecture. Developing and managing an appropriate learning environment for elementary and middle level students.

EDE 4886,4896. Elementary and Middle Level Teaching Internship. (6-6) (Prerequisites: Admission to Teacher Education, minimum GPA of 2.5 overall and in major, and completion of all professional education courses with a C or better.) Two six hour internships. A supervised observation and teaching experience in an elementary and/or middle level classroom.

EDE 8423. Elementary School Methods. (3) Three hours lecture. Seminar-type course in synthesis of methods and techniques applicable to elementary teaching. Readings, reports, research.

EDE 8433. The Elementary School Curriculum. (3) Three hours lecture. Principles of curriculum construction as they apply to the elementary school program.

EDE 8443. Seminar in Elementary Education. (3) Three hours lecture. A study of current issues in elementary education. Designed for elementary and school administration majors.

EDE 8463. Readings and Research in Children's Literature. (3) Three hours lecture. Research involving the characteristics of quality literature for children, investigation of illustrators, illustrations and role of children's literature in the school.

EDE 8473. The Elementary Social Studies Curriculum. (3) Three hours lecture. Seminar-type course to include research; trends, methods; provision for individual differences; multi-level materials.

EDE 8513. Curriculum and Program Developments in Early Childhood Education. (3) Three hours lecture. The recent and most promising developments in curriculum for preschool through primary aged children.

EDE 8523. Practicum: Language Arts and Literacy Development in Early Childhood Education. (3) (Prerequisites: RDG 4133, RDG 3113, RDG 3123, or the equivalent.) Two hours lecture. Two hours laboratory. A study of language development; the language arts curriculum for young children. Observation and participation in a preschool.

EDE 8533. Behavioral Experiences in Early Childhood Education. (3) Three hours lecture. The world of the child from preschool through early primary years with emphasis on child behavior.

EDE 8543. Mathematics Experiences in Early Childhood Education. (3) (Prerequisites: EDE 4123 or the equivalent.) Three hours lecture. Methods, materials and the preparation and use of instructional media in providing mathematical experiences for young children.

EDE 8623. Content Area Literacy Instruction. (3) Three hours lecture. Theory, research, and methods for teaching elementary school students to use literacy as a tool for learning.

EDE 8633. The Teaching of Writing. (3) Two hours lecture. Two hours laboratory. Methods and materials for teaching writing grades K-12. Formal and informal writing assessments. Writing across the curriculum.

EDE 8713. Educating Young Adults. (3) Three hours lecture. Examination of issues influencing the education of young adolescents, including instructional methods, curricular models, organizational patterns, and developmentally responsive schools. Observation/participation in 4-8 settings.

EDE 8733. Teaching Physical, Life and Earth Science in the Elementary and Middle School Classroom. (3). Three hours lecture. Theory, applied methods, and techniques for teaching K-8 physical, life, and earth science. Content knowledge, inquiry, discovery learning, and technology of teaching.

EDE 8763. Elementary and Middle Level Mathematics Education. (3) Three hours lecture. Methods and materials and the preparation and use of instructional and assessment tools to be used in providing research-based mathematical experiences for K-8 students.

EDE 8893. Readings in Elementary Education. (3) (Prerequisites: Doctoral or Specialist standing or consent of the instructor). Readings and in-depth discussions to include innovation, controversy, and authoritative studies in the field.

EDE 9413. Practicum in College Teaching. (3) Three hours practicum. Teaching of at least one course in education, under the supervision of a senior staff member. (Same as EDS 9413)

EDE 9420. Research Practicum in Early Childhood Education. (1-6) (Prerequisites: EDE 8513, EDE 8523, EDE 8533, EDE 8543). Research experi-
ences through participation, observation, and experimental projects related to early childhood settings.

Department of LEADERSHIP and FOUNDATIONS

Office: 245 Allen Hall
Professors Blendinger, Hare, and Xu;
Associate Professors Brocato, Coats, Davis, Prince, Stumpf, and Williams;
Assistant Professors Boggag, King, and Wallin

EDA 8163. Public School Finance. (3) Three hours lecture. Legal and other factors governing financial policies and practices in public schools; sources of revenue; budgeting; disbursement of funds; school plant; records; insurance.

EDA 8190. Workshop in Educational Administration and Supervision. (1-3) This course is for practicing school administrators who need courses of varying length, format, and focus in areas not covered by the regular curriculum.

EDA 8223. Seminar in Administration. (3) (Prerequisite: Administrative experience or graduate standing). Three hours lecture. Specialized study of selected topics in educational administration. Emphasis on policy development, curriculum and instruction, planning, operations, and public relations.

EDA 8273. Educational Administration and Supervision. (3) (Prerequisite: Advanced graduate standing). Three hours lecture. Fundamentals of leading and managing at the central office executive level, e.g., assistant superintendent.

EDA 8283. Educational Leadership. (3) (Prerequisite: EDL 8113). Three hours lecture. Nature of educational leadership. The roles of leadership in staff and program development, diffusion of innovations, and the uses of power in making educational decisions.

EDA 8293. Professional Development of Educational Personnel. (3) (Prerequisite: EDL 8143). Three hours lecture. Collaborative approaches to processes of individual and group professional development for instructional and non-instructional personnel, ensuring, supporting, enhancing best practices for teaching, learning, school improvement.

EDA 8323. Educational Facilities Design. (3) Three hours lecture. Studies design issues in learning environments/facilities, examines contemporary design models, their impact on learning and uses this information in the design process.

EDA 8353. Applications of Theory to Educational Administration. (3) Three hours lecture. The nature of theory, types of educational administrative theories; uses of organizational and administrative theory in administrative problem solving; applications of general systems theories in education.

EDA 8383. Ethical Decision Making in Educational Administration. (3) (Prerequisites: EDA 8283 or HED 8123). Three hours lecture. Case studies are used to probe problems in school administration. Multiple decision models and ethical concepts are applied to problems and moral dilemmas.

EDF 3413. Writing for Thinking. (3) (Prerequisites: Completion of EN 1103 and 1113 or equivalent with grade of C or better in each and junior standing). Designed to enhance participants’ writing/thinking skills and to prepare participants to use writing as a learning process with groups they teach or lead.

EDF 4243/6243. Planning for the Diversity of Learners. (3) Three hours lecture. A study of variables contributing to the creation and management of a positive learning environment for the complexity and diversity of middle and high school students.

EDF 8323. Comparative Education. (3) Three hours lecture. Contemporary educational movements in Denmark, France, Great Britain, India, Russia, and the United States; technical changes and their effects. Spring, summer semesters.

EDF 8353. Principles of Curriculum Development. (3) Three hours lecture. An examination of principles, problems, and practices influencing curriculum planning; relationships between elementary and secondary school curriculums; research in general curriculum problems.

EDF 8363. Function and Methods of Research in Education. (3) Three hours lecture. The function of research in the development and conduct of the educational program; research methods and techniques in education and the contributions of research to public education; rules and principles governing evidence and conclusions.

EDF 8383. Issues in Education. (3) Three hours lecture. A critical study of current issues in education.

EDF 8393. History of Education in the United States. (3) Three hours lecture. A history of the growth and development of education in the United States from earliest Colonial times to the present, including recent movements and trends.

EDF 9313. Philosophy of Education. (3) Three hours lecture. An examination of educational beliefs and their justification.

EDF 9373. Educational Research Design. (3) (Prerequisites: EDF 8363 and EPY 8214 or equivalents; consent of instructor). Three hours lecture. A study of various designs of research and preparation of research proposals. Fall, Spring, Summer terms.

EDF 9443. Single-Subject Research Designs for Education. (3) Three hours lecture. A detailed examination of single-subject research designs and their associated research methods including data collection and data evaluation techniques. Spring, Summer terms.

EDF 9453. Introduction to Qualitative Research in Education. (3) (Prerequisites: EDF 8363, EDF 9373). Three hours lecture. Introduction to qualitative research, including theoretical considerations and applied methods, techniques, and procedures for field based educational research.

EDF 9463. Qualitative Data Collection in Education. (3) (Prerequisite: EDF 9453). Three hours lecture. An in-depth examination of interviewing and observation as two primary qualitative data sources in educational settings.

EDF 9473. Qualitative Data Analysis and Presentation in Education. (3) (Prerequisite: EDF 9463). Three hours lecture. Examination, application, and assessment of a range of approaches to analysis and presentation in the design of qualitative research studies in educational settings.

EDUCATIONAL LEADERSHIP

EDL 8113. Contexts of Educational Leadership. (3) Three hours lecture. Exploration of the responses of educational leaders to historical, philosophical, sociocultural, democratic and educational contexts affecting leadership; school culture and climate; change processes for school improvement.

EDL 8123. Principles of Educational Leadership. (3) (Prerequisite: EDL 8113). Three hours lecture. Applying democratic processes to school governance and leadership; decision making; consensus building; empowerment; vision; mission; and school improvement.

EDL 8143. Educational Leaders as Instructional Supervisors. (3) Three hours lecture. Applying interpersonal and clinical skills, techniques and approaches in the observation, supervision, and empowerment of teachers and in the facilitation of teaching and learning environments.

EDL 8163. Educational Budgeting and Resource Allocation. (3) Three hours lecture. Administrative leadership for organization, management, allocation or resources to enhance and support teaching and learning; four modules: budgeting, facilities, personnel, student and family services.

EDL 8173. Legal and Ethical Perspectives of Leadership in Schools. (3) Three hours lecture. Examination of legal and ethical issues in educational leadership. Analysis of impact of laws and legal decisions on policy formation and decision implementation in education.

EDL 8193. Educational Environments. (3) (Prerequisites: EDF 8201 and EDF 8202). Three hours lecture. Capstone course of Master’s/Specialist AA Certification program. Theories, roles, functions of leadership in educational environments; organizational structures; community and board relationships; policy, strategic planning.

EDL 8213. Internship I: Observation and Field Applications. (3) Interns experience designated observation, authentic application, and mentorship activities at educational sites under joint supervision of university and school-based leaders.

EDL 8223. Internship II: Administrative Applications. (3) Interns observe and apply techniques of administrative leadership in authentic educational situations under joint supervision of university and school-based staff at school sites.

EDL 8233. Internship III: Instructional Applications. (3) Focus on instructional leadership experiences; designated culminating internship activities at school sites; joint supervision by university staff and school-and/or district-based leadership.

SECONDARY EDUCATION

Office: 310 Allen Hall

(For departmental information, see CURRICULUM, INSTRUCTION and SPECIAL EDUCATION.)

EDS 3633. Secondary Mathematics Education. (3) (Prerequisite: Admission to Teacher Education). Three hours lecture. Examine the concepts and tools
used to teach mathematics in the secondary classroom, connections between algebra and geometry concepts, and national and state mathematics standards.

EDS 3643. Secondary Social Studies Education. (3) (Prerequisite: Admission to Teacher Education) Three hours lecture. Fundamentals of science education including the National Science Education Standards and NSTA recommendations required for teaching science in grades 7-12.

EDS 3673. Secondary Language Arts Education. (3) (Prerequisite: Admission to Teacher Education) Three hours lecture. Essential knowledge, skills, and attitudes necessary for the successful teaching of the language arts.

EDS 4643/6643. Methods of Teaching Social Studies. (3) (Prerequisites: Admission to Teacher Education and EDS 3643). Three hours lecture. Field based. An examination of teaching methods and instructional materials and media appropriate for use in middle and secondary social studies classrooms.

EDS 4653/6653. Methods of Teaching Science. (3) (Prerequisites: Admission to Teacher Education and EDS 3653). Three hours lecture. Field based. Students will gain insight into the methods of teaching science in grades 7-12, including selection, organization, presentation and assessment by National Science Education Standards.

EDS 4873. Seminar in Managing the Secondary Classroom. (3) (Prerequisites: Admission to Teacher Education, Co-requisites: EDS 4886 and EDS 4886B). Three hours lecture. A seminar that addresses classroom management issues, theories and practices.

EDS 4886/4886B. Teaching Internship in Secondary Education. (6-6) (Prerequisite: Admission to Teacher Education, minimum GPA of 2.5 overall and in major, and completion of all professional education courses with a C or better). Professional full-day public school teaching experience in two consecutive placements. 16-week placement in diverse settings under direction of supervising teachers and university supervisor.

EDS 8103. Advanced Methodologies in Middle and Secondary Education. (3) (Prerequisite: TKT 1273 or equivalent). Three hours lecture. Using technology as instructional tools, evaluate software, consider ethical issues, design technology-based classrooms, mini-grants, and lesson modules aligned with curriculum standards.

EDS 8243. Advance Planning and Managing of Learning. (3) Three hours lecture. An advanced study of variables contributing to efficiency and competency in planning for teacher-learner activities and the creation and maintenance of positive learning environments.

EDS 8613. Middle and Secondary School Curriculum. (3) Three hours lecture. Principles of curriculum construction as they apply to the middle and secondary school and the various subject areas. Fall term.

EDS 8633. Problems of Secondary Education. (3) (Prerequisite: Master’s degree or consent of instructor). Three hours lecture. Study of critical problems in secondary education. Spring term.

EDS 8643. Directed Reading in Secondary Education. (3) Intensive supervised readings in the field of secondary education.

EDS 8653. Issues of Accountability in Schools. (3). (Prerequisite: EPY 3253 or EPY 6313 or permission of instructor). Three hours lecture. Study of the critical educational issues in school-based accountability. Particular attention will be given to the impact accountability has on student learning in the classroom.

EDS 8683. Dispositions and Reflective Practice In Teaching. (3). (Prerequisite: EDS 8623 or permission of instructor). Three hours lecture. Study of teaching behavior and reflective practices as catalysts for instructional improvement.

EDS 8713. Curriculum Adjustments. (3) Three hours lecture. Adjusting the school curriculum to meet individual pupil differences.

EDS 8886. Dimensions of Learning I. (3) (Prerequisite: admission to MATS program. EDS 8243, EPY 6313, and EDS 6633 or EDS 6653 or EDS 6673 or other methods related course). Six hours clinical instruction. Supervised observation and directed teaching in respective field of endorsement.

EDS 8896. Dimensions of Learning II. (3) (Prerequisite: admission to MATS program. EDS 8243, EPY 6313, and EDS 6633 or EDS 6653 or EDS 6673 or other methods related course). Six hours clinical instruction. Supervised observation and directed teaching in respective field of endorsement.

EDS 9413. Practicum in College Teaching. (3) Three hours practicum. Teaching of at least one course in education, under the supervision of a senior staff member. (Same as EDE 9413)

EDS 9903. Practicum in College Teaching of Secondary Education. (3) Teaching of at least one course in education under the supervision of a senior staff member. Supervision of student teachers.

SPECIAL EDUCATION

Office: 310 Allen Hall

(For departmental information, see CURRICULUM, INSTRUCTION and SPECIAL EDUCATION.)

EDX 2303. Introduction to Learning Disabilities. (3) Three hours lecture. Intelligences for learning; receptive, associative, and expressive disorders; specific learning disabilities.

EDX 3213. Psychology and Education of Exceptional Children and Youth. (3) Three hours lecture. Introduction to exceptional children and youth who deviate from the average in physical, mental, emotional, and social characteristics. Program planning is surveyed.

EDX 3223. Introduction to the Emotional/Behavioral Disorders. (3) Three hours lecture and field trips. Survey to acquaint students with emotionally disturbed and behaviorally disordered children, giving an overview of the theoretical approaches in their education.

EDX 3233. Contingency Management with Exceptional Children (3) Three hours lecture. Competency-Based Instructional Sequence and field experience. A study of the components of contingency management with emphasis on application in the field with exceptional children.

EDX 4113/6113. Diagnostic-Prescriptive Methods and Materials for Early Childhood Disabled. (3) Admission to Teacher Education required. Three hours of lecture and laboratory work including assessment and individualized programming utilizing methods and materials for EMR and LD preschool and primary level children.

EDX 4123/6123. Diagnostic-Prescriptive Methods and Materials for Elementary Age Disabled. (3) Admission to Teacher Education required. Three hours of lecture and laboratory work including assessment and individualized programming utilizing methods and materials for EMR and LD elementary school-age children.

EDX 4133/6133. Diagnostic-Prescriptive Methods and Materials for Secondary Age Disabled. (3) Admission to Teacher Education required. Three hours of lecture and laboratory work including assessment and individualized programming utilizing methods and materials for EMR and LD secondary school-age children.

EDX 4353/6353. Assistive Technology in Special Education. (3) Admission to Teacher Education required. Three hours lecture. Application of adaptive technology with microcomputers in the education of students with special needs.

EDX 4413/6413. Working with Parents of Exceptional Children. (3) Admission to Teacher Education required. Three hours lecture. A study of the development, goals, and objectives of organized parent educational groups. A study of problems of parents of children who have disabilities.

EDX 4423. Teaching the Disadvantaged Child. (3) The study of the disadvantaged child in terms of theories, cultures, and techniques of teaching and exploration of curricular innovations.

EDX 4503/6503. Teaching the Severely and Profoundly Impaired Child. (3) Admission to Teacher Education required. Two hours lecture. One hour practicum. A survey of operational models and techniques to be implemented with the Severely/Profoundly Impaired; to include curriculum, methods and administrative conceptual adjustments.

EDX 4603/6603. Children and Youth with Physical/Multiple Disabilities. (3) Admission to Teacher Education required. Three hours lecture. Educational implications and adaptations of procedures in schools, homes, hospitals and special schools for children with orthopedic and/or neurological impairments.

EDX 4613/6613. Teaching Children and Youth with Physical/Multiple Disabilities. (3) Admission to Teacher Education required. Three hours lecture. Methods and materials applicable to teaching children and youth with physical or multiple conditions which are the results of neurological or orthopedic impairment.

EDX 4623/6623. Curricular and Mobility Adaptations for Physical/ Multiple Disabilities. (3) Admission to Teacher Education required. Three hours lecture. The study of motor functions including range of motion, gait training, and other environmental adjustments that can be implemented by classroom teachers.

EDX 4873. Professional Seminar in Special Education. (3) A seminar dealing with philosophical, administrative, and curriculum issues as they relate to special education in the schools.
EDX 4868/4896. Teaching Internship in Special Education. (6,6) (Prerequisite: Admission to Teacher Education, minimum GPA of 2.5 overall and in major, and completion of all professional education courses with a C or better). Professional full-day public school teaching experience in two consecutive 8-week placements in diverse settings and grade levels under direction of supervising teachers and university supervisor.

EDX 4953/6953. Introduction to Sign Language. (3) Development of basic sign language skills, study of special needs of deaf persons, and understanding use of interpreters. (Same as COE 4363/6363).

EDX 8103. Advanced Contingency Management. (3) Three hours lecture. This course is designed to utilize the principles and procedures of contingency management and applies behavioral analysis research to design, implement, and evaluate behaviorally oriented programs.

EDX 8123. Organization and Supervision of Special Education. (3) Three hours lecture. Organizational theory of special education. Leadership behavior and role of special education supervisor; grant writing.

EDX 8133. Readings and Research in Exceptional Education. (3) Three hours lecture. Emphasis on current literature in all areas of exceptionality. Understanding and interpretation of psychological diagnosis. Individual and group research.

EDX 8143. Early Education for the Disabled. (3) Three hours lecture. Rationale; characteristics; educational approaches; exemplary programs; research in the field.

EDX 8163. Teaching Strategies for the Gifted. (3) (Prerequisite: Consent of instructor). Teaching approaches, development of special problems, selection of materials, and remediation of problems related to learning.

EDX 8173. Special Education in the Regular Classroom. (3) Three hours lecture. Provides a greater understanding of the disabled child who may be in the regular classroom and suggests methods and techniques for teaching the disabled student in the regular classroom.

EDX 8183. Seminar in Learning Disabilities. (3) (Prerequisite: EDX 3203 or equivalent). Three hours lecture. An advanced course dealing with the condition of learning disabilities. Current research dealing with causes, treatments, and prevention strategies will be studied.

EDX 8203. Practicum: Diagnosis of Special Education Populations. (3) (Prerequisite: Approval of instructor). Hours and credits to be arranged. Practicum experience utilizing a multi-disciplinary team approach to the diagnosis and educational planning for students suspected of being mildly, moderately, and multiply impaired.

EDX 8213. Practicum: Remediation of Special Education Populations. (3) One hour seminar, three hours practicum. Selection, utilization, and evaluation of specialized remedial materials and techniques with special education populations.

EDX 8303. Seminar in Mental Retardation. (3) (Prerequisite: EDX 8103). Three hours lecture. An advanced course dealing with the condition of mental retardation. Educational implication and research involving those classified as mentally retarded.

EDX 8393. Seminar in Education for the Emotionally Disabled. (3) (Prerequisite: EDX 8403). Three hours lecture. A comprehensive study of contributing factors in emotional disturbance and the educational technology of the treatment of emotionally handicapped children.

EDX 8403. Teaching the Emotionally Disabled. (3) Three hours lecture and practicum. The curriculum, methods, and principles and problems of working with the emotionally disabled.

EDX 8780. Internship in Special Education. (3-6) Three hours practicum. Supervised observation, participation, and teaching of exceptional children in classrooms and resource rooms. Supervised experiences in community, state departments, supervisory positions.

ENGINEERING GRAPHICS

Office: 260 McCain Engineering Building
Instructor Bostick

EG 1142. Engineering Graphics. (2) Two hours lecture. One hour demonstration. Presentation of sketching techniques, lettering and computer aided drafting with traditional engineering drawing topics, including orthographic projection, engineering documentation, auxiliary views, and working drawings.

EG 1143. Graphic Communication. (3) One hour lecture. Five hours laboratory. Orthographic projection, instrumental drawing, point, line, plane identities, first and second auxiliaries, computer assisted design and drafting using personal computers.

EG 1443. Technology Graphics. (3) (Prerequisite: EG 1143.) Two hours lecture. Two hours laboratory. The use of drawings to communicate ideas of manufacturing and maintenance in machining, electricity/electronics, welding, and hydraulics/pneumatics.

EG 1513. Architectural Graphics. (3) One hour lecture. Five hours laboratory. Survey of various drawing systems. Practical exercises in orthogonal multiview projection, isometric, oblique and perspective drawing systems, with emphasis on lettering, reflections and cast shadows.

EG 2513. Construction Drawing. (3) (Prerequisite: EG 1143 or EG 1513). One hour lecture. Five hours laboratory. Survey of building and construction industries; manual and computer aided drafting techniques; use of architectural graphic standards and minimum construction requirements; construction details; drawings; lettering.

EG 3113. CATIA Solid Modeling. (3) Three hours lecture. Design, assembly, and finite element analysis utilizing CATIA, a state-of-the-art 3-D solid modeling package.

ENGINEERING MECHANICS

Office: 330 Walker Engineering

EM 2413. Engineering Mechanics I. (3) (Prerequisites: Grade of C or better in MA 1723 and PH 2213). Three hours lecture. Concepts of forces, moments and other vector quantities; analysis of force systems; conditions of equilibrium; friction; centroids and moments of inertia.

EM 2433. Engineering Mechanics II. (3) (Prerequisites: Grade of C or better in EM 2413 and MA 2753). Three hours lecture. Kinematics of particles and rigid bodies, kinetics of particles and rigid bodies using force-mass-acceleration, energy, momentum methods.

EM 3213. Mechanics of Materials. (3) (Prerequisite: Grade of C or better in EM 2413 and MA 2733). Three hours lecture. Free body diagrams, equilibrium of simple structures; shear and bending moment diagrams; analysis of stress and strain; deflections of beams.

EM 3313. Fluid Mechanics. (3) (Prerequisite: Grade of C or better in EM 2413 and MA 2733). Three hours lecture. Fluid statics; analysis of fluid motion using the continuity, momentum and energy relationships; introduction to viscous flows.

EM 3413. Vibrations. (3) (Prerequisites: Grade of C or better in EM 2433, MA 3113 and MA 3253). Three hours lecture. Fundamentals of free vibration, energy methods; forced and damped vibration, single degree of freedom; two degrees of freedom.

EM 4123/6123. An Introduction to the Finite Element Method. (3) (Prerequisite: Consent of instructor). Three hours lecture. Introduction to the finite element method and formulation; use of existing computer programs, with applications to the area of mechanics.

EM 4133/6133. Mechanics of Composite Materials. (3) (Prerequisites: EM 3213 and MA 3253) Three hours lecture. Stress, strain, constitutive relations for anisotropic material, lamina properties, laminate properties, composite beams and plates.

EM 4213/6213. Advanced Mechanics of Materials. (3) (Prerequisite: EM 3213). Three hours lecture. Stress, strain, stress-strain relationships, strain energy, failure theories, curved beams, unsymmetrical bending, shear center, torsion of noncircular sections, energy principles, Castigliano’s theorem, inelastic behavior.

EM 8113. Theory of Continuous Media. (3) (Prerequisite: MA 3353 or consent of the instructor). Three hours lecture. An introduction to the general theory of continuous media and its application to the theories of elasticity and fluid mechanics.

EM 8203. Applied Elasticity. (3) Three hours lecture. Analysis of stress and strain; stress-strain relations; bending and torsion of beams; stress functions; strain energy.

EM 8313. Advanced Dynamics. (3) (Prerequisites: EM 2433 and MA 3253). Three hours lecture. Fundamental considerations, Hamilton’s principle, Lagrange’s equations, rigid body dynamics.

Department of ENGLISH

Office: 316 Lee Hall

Professors Creevy, Lyons, Myers, and Raymond (Head); Associate Professors Bentley, Dodds, Hagenston, Johnson, Little, Marsh, and West; Assistant Professors Anderson, Atkinson, Claggett, Crossley, DeGabriele, Hanshaw, Kardos, O’Donnell, O’Neill, Pierce, Pizer and Shaffer; Instructors Bogard, Campbell, Gilmer, Leonard, Price, Sanders, Sheperis, Snead, Spurlock, White, and Whitten

NOTE: Entering freshmen may enter honors or special sections of first-semester composition depending on standard and other tests. Students with ACT scores in English from 16 or below take EN 0013, from 17 to 28 take EN 1103, and of 29 and above take EN 1163 or EN 1103H (honors). International students of non-English background will be placed in composition sections appropriate to their needs as determined by TOEFL scores.

EN 0003. Developmental English. (3) Emphasizes the use of standard American English. Offered only to students required to enroll in developmental studies; prerequisite to any English courses applicable to requirements.

EN 0103. Basic English. (3) (Prerequisite: A score of 15 or 18 on the English section of the ACT). Three hours lecture. A study of grammar and mechanics as basic to composition, with emphasis on the sentence and the paragraph. Does not count toward any degree.

EN 1103. English Composition I. (3) (Prerequisite: A score of 19 or above on the English section of the ACT or EN 1003). Three hours lecture. A study of logical and rhetorical principles and organizational strategies that contribute to effective writing. 1103H. Honors section open through invitation only. The analytical study and frequent practice of interdisciplinary writing coupled with the analytical study of major literary genres - fiction, poetry, drama.

EN 1111. English Studies. (1) One hour lecture. Introduction to English Studies: a survey of the profession, including disciplinary assumptions, research processes, sub-fields, and career opportunities.

EN 1113. English Composition II. (3) (Prerequisite: EN 1103, 1163, or 1183). Three hours lecture. An expanded study of and practice in stylistics, logic, and research as contributions to analytical writing. 1113H. Honors section open through invitation only. The analytical study and frequent practice of interdisciplinary writing coupled with the analytical study of major literary genres - fiction, poetry, drama.

EN 1163. Accelerated Composition I. (3) (Prerequisite: A score of 29 or above on the English section of the ACT or consent of the instructor). Three hours lecture. An expanded study of and practice in stylistics, logic, and research as contributions to expository writing, designed for students who exhibit command of basic rhetorical principles.

EN 1173. Accelerated Composition II. (3) (Prerequisite: EN 1163 or an ACT sub-score in English of 28 or higher). Three hours lecture. An expanded study of and practice in stylistics, logic, and research as contributions to analytical writing, with emphasis on extensive study of diverse rhetorical models.

EN 2203. Introduction to Literature. (3) (Prerequisite: Completion of freshman composition). (Not open to English majors or honors students who complete EN 1183 or 1193). Three hours lecture. The critical and appreciative study of masterpieces in various genres chosen from English and world literature.

EN 2213. English Literature Before 1800. (3) (Prerequisite: Completion of freshman composition). Three hours lecture. A survey of English literature from the Medieval to the Neo-classical periods, including works by Shakespeare, Milton and Pope.

EN 2223. English Literature After 1800. (3) (Prerequisite: Completion of freshman composition). Three hours lecture. A survey of American literature and culture, including letters, sermons, essays, fiction and poetry, from the fifteenth century through the antebellum period’s “American Renaissance.”

EN 2253. American Literature After 1865. (3) (Prerequisite: Completion of freshman composition). Three hours lecture. A survey of American literature and culture, including letters, sermons, essays, fiction and poetry, from the fifteenth century through the antebellum period’s “American Renaissance.”

EN 2255. American Literature After 1865. (3) (Prerequisite: Completion of freshman composition). Three hours lecture. A survey of American literature and culture, including letters, sermons, essays, fiction and poetry, from the fifteenth century through the antebellum period’s “American Renaissance.”

EN 2273. World Literature Before 1600. (3) (Prerequisite: Completion of freshman composition). Three hours lecture. Selected writings from ancient times to 1600 in translation.

EN 2283. World Literature After 1600. (3) (Prerequisite: Completion of freshman composition). Three hours lecture. Selected works since 1600, excluding literature of the U.S., Britain, and Ireland.

EN 2434. Literature and Film. (4) (Prerequisite: Completion of English composition requirements). Three hours lecture. One laboratory. Introduction to literary and cinematic techniques, methods of analysis, and structures.

EN 2443. Introduction to Science Fiction. (3) (Prerequisite: Completion of English requirements of the student’s major field). Three hours lecture. A survey of major science fiction writers of the past two centuries, with emphasis on human experience in a technological society.

EN 3303. Creative Writing. (3) (Prerequisite: Completion of freshman composition). Three hours lecture. Basic techniques in writing fiction and poetry; meter and rhyme, metaphor and image, plot, characterization, dramatic detail.

EN 3313. Writing for the Workplace. (3) (Prerequisite: EN 1113 or equivalent). Three hours lecture. Advanced writing course focused on communication in the workplace, including correspondence, technical descriptions, instruction writing, proposals, and recommendation reports.

EN 3414. Critical Writing and Research in Literary Studies. (4) (Prerequisite: Twelve hours of English). Four hours lecture. An introduction to the application of critical theories and research methods in writing about literature, for English and English Education majors.

EN 3423. Descriptive English Grammar. (3) (Prerequisite: Twelve hours of English). Three hours lecture. Advanced course in English grammar.

EN 3513. Women and Literature: Selected Topics. (3) (Prerequisite: Completion of EN 1103). Three hours lecture. A study of literary works by or about women. Texts are selected according to theme, genre, and/or historical period. (Same as GS 3513).

EN 3523. Shakespeare and Film. (3) (Prerequisites: EN 1103 and EN 1113 or equivalent) Three hours lecture. This course offers a focused study of Shakespeare on page and screen. Specific plays and film adaptations are selected by the instructor.

EN 3533. Selected Authors. (3) (Prerequisites: EN 1103 and EN 1113 or equivalent). Three hours lecture. This course offers a focused study of the major works by selected authors. Authors and texts are selected by the instructor. (May be repeated for credit).

EN 3903. Intermediate Fiction Writing. (3) (Prerequisite: EN 3303). Three hours lecture. An intermediate course in the craft and art of fiction writing, focusing on techniques such as setting, dialogue, and characterization.

EN 4111. Portfolios and Reflective Writing. (1) (Prerequisite: Senior standing). One hour lecture. The study and practice of writing application letters/resumes and preparing academic portfolios.

EN 4223/6223. Principles of Legal Writing. (3) (Prerequisites: Junior standing and completion of English requirements). Three hours lecture. Introduction to prose of the legal profession, emphasizing rhetorical strategy and style. Advanced composition, including work with contracts, letters, regulations, memoranda of law, and briefs.

EN 4233/6233. Composition Pedagogy. (3) (Prerequisite: EN 1113 or consent of instructor). Three hours lecture. Introduction to practices and debates in college composition pedagogies. Develops practical strategies for instruction in composition, introduces historical and theoretical scholarship in rhetoric and composition.

EN 4243/6243. Writing Center Tutor Training. (3) (Prerequisite: Grade of B or better in EN 1113 and consent of instructor). Three hours lecture. Introduction to the practices and theories of college writing consultation in Writing Centers.

EN 4303/6303. Craft of Poetry. (3) (Prerequisite: EN 3303 or consent of instructor). Three hours lecture. The craft and practice of writing poetry.

EN 4313/6313. Craft of Fiction. (3) (Prerequisite: EN 3903 or consent of instructor). Three hours lecture. The craft and practice of writing fiction.

EN 4323/6323. Literary Criticism from Plato to the Present. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. A survey of literary criticism from Plato to the present.

EN 4333/6333. Southern Literature. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. A survey of southern literature from the antebellum period to the "post southern" present. Features selected works representing the diverse literary heritage of the U.S. South.

EN 4343/6343. African American Literature. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. A study of African American literature, especially that of the Twentieth Century. (Same as AAS 4343.)

EN 4353/6353. Critical Theory Since 1900. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. A study of major twentieth-century strategies of interpretation, including psychoanalysis, Marxism, structuralism, feminism, deconstruction.

EN 4403/6403. Introduction to Linguistics. (3) (Prerequisite: Twelve hours of English). Three hours lecture. The descriptive and historical study of language; linguistic analysis and comparisons; language classification; language in its social and cultural setting. (Same as AN 4403/6403)

EN 4413/6413. History of the English Language. (3) (Prerequisite: Twelve hours of English). Three hours lecture. The origin and development of the English language; past on ongoing changes in sounds and structure; influence of social history on language variation and change.

EN 4433/6433. Approaches to TESOL. (3) (Prerequisite: EN 4403 or EN 3423 or consent of instructor). Three hours lecture. Methodology of Teaching English as a Second Language, with emphasis upon theory of second language acquisition, teaching techniques, and evaluation of relevant curriculum.

EN 4443/6443. English Syntax. (3) Three hours lecture. Grammatical analysis of English with emphasis on pedagogical applications to teaching English as a foreign/second language.

EN 4453/6453 Methods in TESOL. (3) (Prerequisite: EN 4403/6403 or permission of instructor). This course covers the various practical pedagogical approaches common in TESOL programs for teaching reading, listening, speaking, and writing as well as communicative approaches.

EN 4463/6463. Studies in Second Language Acquisition. (3) (Prerequisite: EN 4403/6403 or consent of instructor). Three hours lecture. A survey of the major
EN 493/6913. American Literature: 1860-1900. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. Studies in Twain, Whitman, Dickinson, James, Crane, and others. This course cannot be taken before EN 2253.

EN 4923/6923. American Novel Since 1900. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. A study of the American novel since Dwerk. Three hours lecture. Significant trends in European and American literature since the outbreak of World War II.

EN 4943/6943. Form and Theory of Fiction. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. Theoretical aspects of fictional technique, genre, style; readings include novels, short stories, and writings about the craft of fiction. Recommended complement to creative writing courses.

EN 4953/6953. Form and Theory of Poetry. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. Poetic theory; formal conventions, techniques, and innovations in the tradition of English and American poetry. Recommended complement to creative writing courses.

EN 6013. Internship in Compositional Theory and the Teaching of College Writing. (3) (Prerequisite: Acceptance as a teaching assistant in the Department of English). Three hours lecture. Compositional theory in relation to teaching and evaluating traditional modes of writing, coordinated with at least twenty hours per week of supervised professional experience.

EN 8103. Graduate Research in English. (3) Three hours lecture. A required introduction to fields of study and to scholarly research and writing in English language and literature.

EN 8513. Studies in English Literature to 1485. (3)

EN 8523. Studies in English Literature 1485-1600. (3)

EN 8533. Studies in English Literature 1660-1832. (3)

EN 8543. Studies in English Literature 1832-1900. (3)

EN 8553. Studies in American Literature to the Civil War. (3)

EN 8563. Studies in American Literature from Civil War-1914. (3)

EN 8573. Studies in Literature since 1900. (3)

EN 8583. Selected Topics in Language and Literature. (3)

ENVRONMENTAL SCIENCE

OFFICE: 117 DORMAN HALL

PROFESSOR MASSEY

ENS 2103. Introduction to Environmental Science. (3) Three hours lecture. A survey course to acquaint the beginning students with the various issues and disciplinary contributions regarding environmental science.

ENS 4102. Practicum. (2) (Prerequisite: Permission of ENS advisor). A directed field experience of an assigned environmental problem and an associated weekly seminar.

EXERCISE PHYSIOLOGY

(For departmental information, see KINESIOLOGY)

EP 3113. Introduction to Exercise Science. (3) Three hours lecture. The course introduces the history of exercise science and examines the academic disciplines and professions comprising exercise science and kinesiology.

EP 3183. Exercise Psychology. (3) Three hours lecture. Contemporary psychological research and theory as related to human behavior and health in an exercise setting.

EP 3304. Exercise Physiology. (4) (Prerequisite: BIO 1004 or BIO 214 and CH 1043 or CH 1213). Three hours lecture. Two hours laboratory. Examines physiological systems central to exercise performance, interrelationships of those systems during exercise, and adaptations of the human body during both acute and chronic exercise.
Department of ENTOMOLOGY and PLANT PATHOLOGY

Office: 103 Clay Lyle Entomology Complex
206 Dorman Hall (Plant Pathology)

Professors Collison (Head), Baker, Baird, Brown, Caprio, Chambers, and Schneider; Associate Professors Lawrence, Ma and Sabanadzovic; Assistant Professors Lu, Musser and Riggins

EPP 2213. Introduction to Insects. (3) Two hours lecture. Two hours laboratory. Introduction to structure, function, ecology, taxonomy and evolution of the largest and most diverse group of organisms and how they impact humans and their environment.

EPP 3124. Forest Pest Management. (4) Three hours lecture. Three hours laboratory. Study of the biology, damage, survey techniques, and control of forest diseases and insects. Pest management in southern forests will be emphasized.

EPP 3423. Ornamental and Turfgrass Insects. (3) Two hours laboratory. Two hours lab. Study of the life history, damage, economic importance and control strategies pests associated with ornamental plants and turfgrass.

EPP 4113/6113. Principles of Plant Pathology. (3) (Prerequisite: BIO 1203 or consent of instructor) Two hours laboratory. Three hours laboratory. Acquiring a general knowledge of the principles of plant pathology through a study of selected plant diseases of economic importance for Mississippi.

EPP 4152/6152. Advanced Fungal Taxonomy - Fungi Imperfecti. (2) (Prerequisite: Consent of instructor) One hour lecture. Two hours laboratory. Methods and practice in identification of taxon-fungi imperfecti in different ecosystems. Includes conventional macroscopic and microscopic techniques for identification compared with molecular methods.

EPP 4154/6154. General Entomology. (4) Two hours lecture. Four hours laboratory. Fall semester. Biology of insects including morphology, physiology, development, ecology and emphasis on classification of orders and common families.

EPP 4162/6162. Advanced Fungal Taxonomy - Ascomycetes. (2) (Prerequisite: Consent of instructor) One hour lecture. Two hours laboratory. Methods and practice in identification of taxon-ascomycetes in different ecosystems. Includes conventional macroscopic and microscopic techniques for identification compared with molecular methods.

EPP 4163/6163. Plant Disease Management. (3) (Prerequisite: EPP 4113/6113) Two hours lecture. Three hours laboratory. Techniques and fundamentals of plant disease management. Disease dynamics related to management, avoidance, exclusion, eradication of pathogens; principles of plant protection, spraying techniques; biological control.

EPP 4172/6172. Advanced Fungal Taxonomy - Fleshy Basidiomycetes. (2) (Prerequisite: Consent of instructor) One hour lecture. Two hours laboratory. Methods and practice in identification of taxon-basidiomycetes in different ecosystems. Includes conventional macroscopic and microscopic techniques for identification compared with molecular methods.

EPP 4173/6173. Medical and Veterinary Entomology. (3) (Prerequisites: EPP 4154 or consent of instructor) Two hours lecture. Two hours laboratory. Essentials of the biology, disease relationships surveillance, and control of arthropods parasitic on humans and animals in the context of clinical and preventive medicine.

EPP 4182/6182. Advanced Fungal Taxonomy-Oomycetes and Zygomycetes. (2) (Prerequisite: Consent of instructor) One hour lecture. Two hours laboratory. Methods and practice in identification of taxon-oomycetes and zygomycetes in different ecosystems. Includes conventional macroscopic and microscopic techniques for identification compared with molecular methods.

EPP 4214/6214. Diseases of Crops. (4) (Prerequisite: EPP 4113/6113 or 3124) Three hours lecture. Two hours laboratory. Fundamentals and practical aspects of identification and control of selected diseases of crops grown in the southern U.S.

EPP 4234/6234. Field Crop Insects. (4) (Prerequisite: EPP 2213 or 4154) Three hours lecture. Two hours laboratory. Fall semester. Recognition, biology, distribution, damage, economic importance and methods of control of insect pests of agronomic and horticultural crops.
EPP 4244/6244. Aquatic Entomology. (4) (Prerequisite: EPP 4154 or instructors approval). Three hours lecture. Two hours laboratory. Study of basic biological and ecological principles important to aquatic insects and related arthropods, including life histories, evolutionary adaptations, community and species and identification.

EPP 4263/6263. Principles of Insect Pest Management. (3) Two hours lecture. Two hours laboratory. Discussion of pest management concepts, insect control methods, sampling, and pest management systems. Laboratory involves sampling, calibration, and other exercises related to pest management.

EPP 4335/6335. Anatomy and Physiology of Insects. (5) (Prerequisite: EPP 4154). Four hours lecture. Three hours laboratory. Spring semester. Introduction to the basic principles of structure and function of insect organ systems from a comparative and evolutionary viewpoint. (Same as PHY 6335).

EPP 4523/6523. Turfgrass Diseases. (3) (Prerequisite: EPP 4113/6113 or 3124). Two hours lecture. Three hours laboratory. Study of the life cycle, damage, economic importance and control strategies of disease turfgrasses.

EPP 4543/6543. Toxicology and Insecticide Chemistry. (3) (Prerequisite: Organic Chemistry). Two hours lecture. Two hours laboratory. Study of insecticides. Chemistry, toxicity and mode of action of major groups of insecticides. Laboratory: bioassay methods, insecticide interactions, calculations.

EPP 8111-8121. Seminar. (1) One hour. Consideration of recent advances and problems in Entomology and Plant Pathology; student participation, general discussion.

EPP 8113. Plant Nematology. (3) (Prerequisite: EPP 4113/6113). Two hours lecture. Three hours laboratory. Basic morphology, taxonomy, and nomenclature; discussion of plant pathogenic general, symptomatology, methods of isolation, control methods, and relationship of nematodes to other plant pathogens.

EPP 8123. Plant Virology. (Prerequisite: EPP 3113). Two hours lecture. Three hours laboratory. Morphology and structure of infectious entity; characteristics of plant virus groups including symptomatology, transmission, vectors, etc. Methods of assay and purification.

EPP 8133. Plant Bacteriology. (3) (Prerequisite: EPP 4113, EPP 6163 or consent of instructor). Two hours lecture. Three hours laboratory. Morphology, biology and taxonomy of plant-associated bacteria and physio-biochemical and molecular mechanisms involved in their interactions with plants; development and management of plant bacterial diseases.

EPP 8144. Transmission Electron Microscopy. (4) (Prerequisite: consent of instructor). Three hours lecture. Six hours laboratory. Introduction to TEM including life sciences (tissue) and engineering (Crystalline materials) topics. (Same as ME 8144)

EPP 8173. Clinical Plant Pathology. (3) (Prerequisites: EPP 4113/6113 and EPP 4114). Two four-hour laboratories. Clinical techniques, procedures, and experience in diagnosing plant diseases in the laboratory and field. Covers diseases caused by bacteria, fungi, MLO, nematodes, unfavourable environment and viruses.

EPP 8223. Scanning Electron Microscopy. (3) (Prerequisite: Graduate Student or consent of instructor). Two hours lecture. Three hours laboratory. Introduction to scanning electron microscopy and associated techniques.

EPP 8225. Advanced Plant Pathology II. (3) (Prerequisites: EPP 3113, BIO 4214). Three hours lecture. Infection processes, weapons utilized by pathogens in attack, and resultant alterations in ultrastructure, function and metabolism.

EPP 8272. Empirical Research in Theory and Practice. (2) Two hours lecture and two hours laboratory. Introduction to the nature, process, and societal role of research. Logical, ecological principles important to aquatic insects and related arthropods, including life histories, evolutionary adaptations, community and species and identification.

EPP 8333. Advanced Toxicology. (3) (Prerequisite: EPP 4543. Three hours lecture. Physiological and biochemical actions of pesticides and therapeutic drugs. Pesticide metabolism and resistance. Insecticide synergism. Natural toxins and venoms. (Same as PHY 8333).

EPP 8483. Ecological Genetics. (3) (Prerequisites: PO 3103 or equivalent and BIO 4113/6113 or consent of instructor). Three hours lecture. Spring semester, odd-numbered years. Introduction to the application of genetic methods and theory to the study of adaptation in natural populations. (Same as GNS 8483).

EDUCATIONAL PSYCHOLOGY

508 Allen Hall

Professors D. Morse and L. Morse; Associate Professors Doggett, Elder and Hennington; Assistant Professors McCleon and Reisener; Instructors Gainer and Taylor

EPY 2513. Human Growth and Development. (3) Three hours lecture. Psychological principles in the study of the child from birth to puberty; acquisition of motor skills; advance in perception; language, reasoning, and social behavior.

EPY 3143. Human Development and Learning Strategies in Education. (3) (Prerequisites: PSY 1013 and admission to Teacher Education or consent of department head). Three hours lecture. A study of developmental perspectives of learning with emphasis on teaching.

EPY 3253. Evaluating Learning. (3) (Prerequisite: Admission to Teacher Education). Three hours lecture. A study of instructional evaluation for the purpose of assessing individual pupil progress and general effectiveness of instruction.

EPY 3503. Principles of Educational Psychology. (3) Three hours lecture. Application of psychological principles to the educational process; topics covered include learning, humanism, motivation, cognitive development, creativity, intelligence, exceptionality, classroom management, measurement, and evaluation.

EPY 3513. Writing in the Behavioral Sciences. (3) (Prerequisite: EN 1103 and EN 1113; junior standing; EPY majors must enroll concurrently in EPY 3503). Three hours lecture. An introduction to writing skills in the behavioral sciences.

EPY 3543. Psychology of Adolescence. (3) Three hours lecture. Physical, intellectual, emotional, and social growth processes from late childhood toward early adulthood; pubertal problems; mental hygiene of adolescence; family and peer relationships.

EPY 3553. Giftedness/Creativity. (3) Three hours lecture. An introduction to giftedness and creativity emphasizing uniqueness of gifted/creative individuals; a survey of creative problem-solving approaches.

EPY 4053/6053. Psychology and Education of the Mentally Retarded. (3) Three hours lecture. Definitions, etiology, evaluation, development, and learning strategies of the mentally retarded; role of family, community, and school in programming for the mentally retarded.

EPY 4073/6073. Personality Adjustment in Educational and Related Settings. (3) Three hours lecture. Personality development with special attention to motivation, culture, and interpersonal relations; personality problems in educational settings; corrective techniques.

EPY 4113/6113. Behavioral and Cognitive Behavioral Interventions. (3) The study of behavioral and cognitive-behavioral assessments and change procedures with special emphasis on non-school settings. This course cannot be used for special education certification.

EPY 4214/6214. Educational and Psychological Statistics. (4) Three hours lecture and three hours laboratory. A course in statistics for education and educational psychology majors. Analysis, description of and inference from various types of data.

EPY 4313/6313. Measurement and Evaluation. (3) Three hours lecture. Measurement and evaluation of learning activities and achievement of elementary school pupils and high school students; standardized tests; test construction; statistical techniques.

EPY 4513. Introduction to Research in Educational Psychology. (3) Three hours lecture. Prerequisites: EPY 4214 and 3503). An introduction to conducting educational research focusing on planning and designing research for applied educational settings.

EPY 8214. Advanced Educational and Psychological Statistics. (4) (Prerequisite: EPY 4214/6214 or its equivalent.) Three hours lecture and three hours laboratory. A survey of advanced statistical methods with emphasis upon the design and analysis of research problems in education and psychology.

EPY 8223. Psychological Foundations of Education. (3) Three hours lecture. The role of psychology in a changing context of organized education; the learner, content, structure, and management of the learning situation; studies of persistent problems.

EPY 8263. Psychological Testing in Educational and Related Settings. (3) Three hours lecture. Principles and techniques involved in selecting, administering, scoring and interpreting tests of personality, interest, vocational aptitude, achievement, and intelligence.

EPY 8273. Neuropsychology. (3) (Prerequisite: Consent of instructor). Three hours lecture. Study of brain-behavior relationships with emphasis on neuroscience. Overview of assessment techniques, rehabilitation planning, and research contributions.
EPY 8293. Cognitive Development. (3) Three hours lecture. The study of cognitive/ intellectual development including the theories derived from the work of information-processing psychologists and Jean Piaget.

EPY 8493. Child Behavior and Personality Assessment. (3) (Prerequisites: EPY 8263 and consent of instructor). Three hours lecture. Selection, administration, scoring, and interpretation of behavior and personality instruments.

EPY 8533. Practicum in Teaching Educational Psychology. (3) (Prerequisite: EPY 8223). One hour lecture. Two hours practicum. Establishing objectives; selecting and organizing learning experiences; guiding and evaluating learning; supervised practicum in teaching educational psychology.

EPY 8694. Supervised Experiences in School Psychology: Assessment. (4) (Prerequisites: EPY 8933, EPY 8723, EPY 8493, and consent of instructor). Supervised assessment experiences in educational settings utilizing psychological principles and techniques in teaching/learning problems. Three hundred plus hours of supervised student experiences in a school setting.

EPY 8703. School Psychology. (3) Two hours lecture, two hours field experience. A course covering the history, current objectives, organization and administration of school psychology combined with appropriate field experience.

EPY 8723. Individual Assessment for Educational and Related Settings. (3) (Prerequisites: EPY 6073 and EPY 8263 or equivalent). Two hours lecture, two hours practicum. Training in administering individual psychometric instruments; verbal and nonverbal linguistic techniques; interpretation of scores, writing psychometric reports.

EPY 8773. Assessment and Interventions for Academic Skills Deficits. (3) Three hours lecture. Study of theories, techniques, and procedures that have been shown to prevent and remedy academic skills problems.

EPY 8780. Internship in School Psychology. (3 or 6) (Prerequisite: Consent of instructor). Supervised professional experience in an appropriate setting. Three hundred clock hours required for three semester hours credit.

EPY 8794. Supervised Experiences in School Psychology: Consultation. (4) (Prerequisites: EPY 9713, EPY 8763, and consent of instructor). Supervised consultation and intervention experiences in educational settings utilizing psychological principles and techniques in teaching/learning problems. Three hundred plus hours of supervised consultation experience.

EPY 8890. Supervised Experiences in School Psychology: Clinic Settings. (1-6) (Prerequisite: Consent of instructor). Supervised school psychology experiences in clinic settings utilizing psychological principles and techniques in teaching/learning problems.

EPY 8913. Psychology of Creative Imagination. (3) (Prerequisite: EPY 8523). A study of creative intellectual functioning and advances in thought on imagination imagery as they apply to measurement, nurture, development and related dimensions.

EPY 8933. Integrated Psycho-Educational Assessment. (3) (Prerequisites: EPY 8493, EPY 8723, consent of instructor). Two hours lecture, two hours practicum. Integration of assessment, interpretation, and report writing skills for intellective and academic assessment. Prepares students for certification by the Academic Testing Agency, and academic assessment.

EPY 9213. Advanced Analysis in Educational Research. (3) (Prerequisites: EPY 6214 and EPY 8214, or equivalent course work). Three hours lecture. An examination of quantitative problem-solving methods, with special emphasis on modern techniques for investigating multivariable research problems in education.

EPY 9313. Education Evaluation Methods. (3) Three hours lecture. (Prerequisites: EPY 8214; EDF 9373 or equivalent course work). Introduction to evaluation contract development procedures, and planning and management of program evaluation in education and related settings.

EPY 9263. Applied Research Seminar. (3) (Prerequisites: EPY 6214, EDF 8363, and EDF 9753). Three hours lecture. Study of advances in thought on research approaches and doing research in educational psychology.

EPY 9703. Contemporary, Legal, Ethical, and Professional Issues in School and Educational Psychology. (3) (Prerequisite: consent of instructor). Three hours lecture. Psychology as a profession: Foundations of practice, roles and functions, professional issues and standards with emphasis on legal and ethical means in psychology.

EPY 9713. Advanced Psychological Consulting: Theory and Practice. (3) (Prerequisite: Consent of the instructor). Two hours lecture. Two hours practicum. Systematic investigation and application of psychological consultation in schools and human service settings. Consultation as applied to individuals and organizational structures. Study of research contributions.

EPY 9723. Seminar in Contemporary School Psychology. (3) (Prerequisite: consent of instructor). Study of current issues and problems in school psychology. Includes the synthesis/refinement of students’ personal philosophy of psychological practice in human-service settings.

EPY 9730. Doctoral Internship in School Psychology. (3 or 6) (Prerequisite: consent of instructor). Supervised internship involving the theory and practice of evaluations, consultation, interventions, research, and related activities within a school, clinic, or other human service agency.
FIN 3113. Financial Systems. (3) (Prerequisites: EC 2113, EC 2123 (or AEC 2713) and junior standing). Three hours lecture. Study of interest rates, basic security valuation, money and capital markets, financial institutions and the roles financial institutions play in the financial markets.

FIN 3123. Financial Management. (3) (Prerequisites: EC 2123, ACC 2023, and BQA 2113 and junior standing). Three hours lecture. Study of objectives, tools, methods, and problems of financial management; financial analysis, planning, control, sources of funds, capital budgeting decisions, and working capital.

FIN 3203. Financial Statement Analysis. (3) (Prerequisite: ACC 2023). Three hours lecture. For non-accounting majors. A study of financial statements from an external users perspective; an analysis of statements for purposes of determining loanability and investment potential. (Same as ACC 2103).

FIN 3723. Financial Markets and Institutions. (3) (Prerequisite: FIN 3113 or equivalent.) Three hours lecture. Study of the functions of financial markets. Major topics include interest rates, their role in securities markets and financial institutions, and interest rate risk.

FIN 4011. Finance Internship Seminar. (1) (Prerequisite: Approval of Department). Examination of topics related to developing a successful career in finance during work semester.

FIN 4021. Finance Career Planning Seminar. (1) (Prerequisite: Approval of Department). Exploration and examination of issues related to successful careers in finance. Open only to students who have not completed a work semester.

FIN 4123/6123. Financial and Commodities Futures Marketing. (3) (Prerequisite: Junior standing). Three hours lecture. Discussion of the purpose, function, mechanics, analysis and application of financial and commodity futures markets in pricing and hedging opportunities. (Same as AEC 4123/6123).

FIN 4223. Intermediate Financial Management. (3) (Prerequisite: FIN 3123). Three hours lecture. Building on foundational concepts, this course provides a more in-depth coverage of financial analysis, valuation principles, the mechanics of financial markets, the role of financial institutions, and the behavior of international capital markets.

FIN 4233. Working Capital Management. (3) (Prerequisite: FIN 3123.) Three hours lecture. Analytical techniques and short-term financial management of the firm, including cash management, investment opportunities, financing requirements, budgeting and planning.

FIN 4243. Senior Seminar in Finance. (3) (Prerequisites: FIN 3723 and FIN 4223). Three hours seminar. Comprehensive case study to bring out the problems involved in organizing, financing, and managing different types of business enterprises.

FIN 4423. Investments. (3) (Prerequisite: FIN 3123). Three hours lecture. Survey of various financial instruments and their characteristics, investor choice, and an introduction to the basics of security analysis, portfolio management, and speculative markets.

FIN 4433. Security Analysis and Portfolio Management. (3) (Prerequisites: FIN 4423.) Three hours lecture. Analysis of individual investments, creation and management of investment portfolios to achieve specific investor goals, and evaluation of portfolio performance.

FIN 4723. Bank Management. (3) (Prerequisites: FIN 3113 and FIN 3723.) Three hours lecture. Study of banking environment, functional areas of banking, and tools and techniques required to effectively manage a bank in a highly competitive, dynamic environment.

FIN 4733. Advanced Bank Management. (3) (Prerequisites: ACC 3203, FIN 4423, and FIN 4723.) Three hours seminar. Applications of financial management techniques to bank corporate decision-making, use of exponential learning techniques. Computer-based analysis, simulations, and written and oral presentations.

FIN 4923/6923. International Financial Management. (3) (Prerequisite: FIN 3123 or consent of instructor). Three hours lecture. A study of the theory and actual behavior of international financial management, foreign financial markets, exchange rate movements, and foreign direct investment.

FIN 8113. Corporate Finance. (3) (Prerequisite: Graduate standing and FIN 3123 or equivalent). Three hours lecture. An examination of the interaction between financial accounting, cash flow estimation, capital budgeting, and risk and return, capital structure, and working capital management.

FIN 8223. Case Problems in Corporate Finance. (3) (Prerequisites: FIN 8112 and FIN 8122 or equivalent). Three hours seminar. Analyses of financial management cases involving working capital, financial analysis, valuation concepts, risk and return, capital budgeting, cost of capital, and financial planning.

FIN 8233. Advanced Financial Management. (3) (Prerequisites: FIN 8112 and FIN 8122 or equivalent). Three hours lecture. A study of the theory and application of valuation, risk budgeting decisions, and capital structure. Analysis of how these decisions affect firm value.

FIN 8313. Financial Management of Projects. (3) (Prerequisite: FIN 3123 or equivalent). Three hours lecture. Focuses on the financial aspects of project management. Topics include capital budgeting, risk assessment, cash flow forecasting, value estimation and identification and valuation of options embedded in the project.

FIN 8423. Portfolio Management. (3) (Prerequisites: FIN 8112 and FIN 8122 or the equivalent). Three hours lecture. Application of contemporary investment theory for decision-making purposes in portfolio management, and the formulation of portfolio policies for different types of investors.

FIN 8723. Financial Institutions Management. (3) (Prerequisites: FIN 8112 and FIN 8122, or equivalent). Three hours seminar. Cases and readings on the requirements and potential challenges of managing financial institutions in a competitive and rapidly changing environment. Computer simulations.

FIN 8733. Financial Markets, Rates and Flows. (3) (Prerequisites: FIN 8112 and FIN 8122 or equivalent). Three hours lecture. An analysis of money and capital market instruments; a study of interest rates and financial flows; the effect of public policy on credit conditions.

FIN 9233. Seminar in Corporate Finance. (3) (Prerequisites: FIN 8233 or the equivalent.) Doctoral seminar. Analysis and discussion of the literature dealing with topics in corporate finance. Also, students prepare and present research projects.

FIN 9433. Seminar in Portfolio Theory. (3) (Prerequisite: FIN 8423 or equivalent.) Doctoral seminar. Analysis and discussion of the literature dealing with topics in portfolio theory and management. Also, students prepare and present research projects.

FIN 9801. Seminar in Financial Markets and Institutions. (3) (Prerequisite: FIN 8723 or equivalent.) Doctoral seminar. Analysis and discussion of the literature dealing with topics in financial markets and institutions. Students prepare and present research projects.

Department of FOREIGN LANGUAGES

Office: 300 Lee Hall

Professors Jordan (Head), W Interpreters: Howard and Lestrade; Assistant Professors Barran-Fynnon; Gray, Khan, Moser, and Potter; Professors Debicka-Dyer, Dunlap, Little, Pruett, Russell and Vozzo

A year’s study of the same foreign language in high school will normally be considered the equivalent of one semester’s work at MSU for the purpose of determining appropriate placement; no credit hours are earned for MSU courses bypassing this manner. Students with two or more years of the same foreign language in high school are encouraged to take the Computerized Placement Tests (CPT) in Chinese, French, German, and Spanish, and the Placement Tests (PT) in Japanese and Latin administered by the Department, enabling them to earn up to 6 non-transferable MSU credit hours; the tests are free of charge and the credits earned are entered on the student’s transcript upon recommendation of the Head of Foreign Languages Department. These tests can be taken by high school seniors; during summer sessions by entering freshman, and during the add-drop period of fall and spring semesters by beginning freshman. Foreign students may not register for credit in elementary and intermediate courses of their native language.

*No student may take the placement test for credit once courses have been taken at a higher level.*

FL 4023/6023. Introduction to Literary Criticism. (3) An introduction to key theories and practices of literary analysis designed for foreign language majors.

FL 4143/6143. Classical Mythology. (3) Three hours lecture. myths and legends of Greece and Rome and their use in literature and the arts through the ages. (Same as REL 4143/6143)

FRENCH

FLF 1123. French II. (3) (Prerequisite: FLF 1113 or equivalent). Two hours lecture. Two recitations. Conversational French. Reading of graded text.

FLF 2133. French III. (3) (Prerequisite: FLF 2123 or equivalent). Three hours lecture. Rapid review of French grammar; oral-aural practice; reading of intermediate texts. Honors section available through invitation.

FLF 2143. French IV. (3) (Prerequisite: FLF 2133 or equivalent). Three hours lecture. Oral-aural practice; reading of intermediate texts. Honors section available through invitation.

FLF 3114. Advanced French Composition. (4) (Prerequisite: FLF 2143, FLF 2125 or equivalent or consent of instructor). Three hours lecture and laboratory. Required of all majors. Advanced instruction in all aspects of the written language.

FLF 3124. Advanced French Conversation. (4) (Prerequisite: FLF 2143, FLF 2125 or equivalent or consent of instructor). Three hours lecture and laboratory. Required of all majors. A continuation of FLF 3114. Advanced instruction in all aspects of the spoken language.

FLF 3143. French Civilization. (3) (Prerequisite: FLF 2143, FLF 2125 or equivalent or consent of instructor). Three hours lecture. Illustrated survey of French cultural heritage.

FLF 3313. Business French I. (3) (Prerequisite: FLF 2143, FLF 2125 or equivalent or consent of instructor). Three hours lecture. The French language as used in business practices and marketing; emphasis on acquisition and application of French commercial terminology in import/export correspondence.

FLF 3323. Business French II. (3) (Prerequisite: FLF 2143, FLF 2125 or equivalent or consent of instructor). Three hours lecture. The French language as used in exchange controls, the Bourse, the banks; acquisition of French business terminology for written and oral expression.

FLF 3513. Survey of French Literature. (3). (Prerequisite: FLF 2143 or FLF 2125 or equivalent or consent of instructor). Three hours lecture. Required of all majors. A survey of French literature from the Middle Ages to the Seventeenth Century.
FLG 3143. German Civilization. (3) (Prerequisite: FLG 2143 or equivalent.) Three hours lecture. A survey of German cultural heritage.

FLG 3153. Modern German Culture. (3) (Prerequisite: FLG 2143 or equivalent.) Three hours lecture. A survey of German culture and life today.

FLG 3313. Business German I. (3) (Prerequisite: FLG 2143). Three hours lecture. The German language as used in business; emphasis on acquisition and application of German commercial terminology on import/export correspondence.

FLG 3323. Business German II. (3) (Prerequisite: FLG 2143). Three hours lecture. The German language as used in the German stock market, trade, and exchange controls; acquisition and application of written and oral German business terminology.

FLG 4143/6143. Verwandlungen. (3). (Prerequisite: FLG 2143 or equivalent). Three hours lecture. A study of the theme of “metamorphosis” in various literary genres of the German-speaking countries.

FLG 4163/6163. History of the German Language. (3) (Prerequisite: FLG 3124). Three hours lecture. The relationship of High German to the parent Indo-European and to the remaining Germanic dialects; linguistic development from the earliest times to the present.

FLG 4303/6303. German Film. (3). (Prerequisite: FLG 2143 or equivalent). Three hours lecture. Study of films from the German-speaking countries from the early twentieth century to today.

FLG 4353/6353. German Novella. (3). (Prerequisite: FLG 2143 or equivalent). Three hours lecture. Study of novellas written in German.

FLG 4463/6463. German Drama of the 20th Century. (3) (Prerequisite: FLG 3523). Three hours lecture. Reading of works of outstanding writers and discussion of literary currents of the century.

FLG 4493/6493. Mysteries in Literature and Film. (3). (Prerequisite: FLG 2143 or equivalent). Three hours lecture. A study of the genre of mysteries in German-language literature and film.

FLG 4503/6503. German Literature to 1750. (3). (Prerequisite: FLG 2143 or equivalent). Three hours lecture. German literature from its origins to Storm and Stress.

FLG 4523/6523. German Literature from 1750 to Present. (3). (Prerequisite: FLG 2143 or equivalent). Three hours lecture. A survey of German literature from the Enlightenment to the present.

FLG 8443. Eighteenth-Century German Drama. (3) (Prerequisite: Graduate standing) Three hours lecture. A study of dramas from the Enlightenment, Sensibility, and Storm-and-Stress periods.

FLG 8483. Twentieth-Century German Short Story. (3) (Prerequisite: Graduate standing) Three hours lecture. A study of twentieth-century short prose fiction in German.

GREEK

FLL 1123. Elementary Ancient Greek II. (3) Three hours lecture. A continuation of FLL 1113.

JAPANESE

FLJ 1123. Japanese II. (3) (Prerequisite: FLJ 1113 or equivalent). Two hours lecture. Two recitations. An introduction to conversational Japanese.

FLJ 2143. Japanese IV. (3) (Prerequisite: FLJ 2133 or equivalent). Three hours lecture. Oral-aural practice; reading and discussion of intermediate texts.

LATIN

FLL 1123. Latin II. (3) (Prerequisite: FLL 1113 or equivalent). Three hours lecture. Grammar; elementary reading.

FLL 2133. Latin III. (3) (Prerequisite: FLL 1123 or equivalent). Three hours lecture. Review of Latin grammar; reading of intermediate texts.

FLL 2143. Latin IV. (3) (Prerequisite: 2133 or equivalent). Three hours lecture. Reading of intermediate texts.

RUSSIAN

FLR 1123. Russian II. (3) (Prerequisite: FLR 1113). Two hours lecture. Two recitations. Conversational Russian. Reading of graded texts.

SPANISH

FLS 1123. Spanish II. (3) (Prerequisite: FLS 1113 or equivalent). Two hours lecture. Two recitations. Conversational Spanish. Reading of graded texts.

FLS 1223. Spanish for the Green Industry II. (3) (Prerequisite: FLS 1213 or the equivalent). Three hours lecture. Conversational Spanish for students majoring in agricultural related professions.

FLS 2133. Spanish III. (3) (Prerequisite: FLS 1123 or equivalent). Three hours lecture. Rapid review of Spanish grammar; oral-aural practice; reading of intermediate texts. Honors section available through invitation.

FLS 2143. Spanish IV. (3) (Prerequisite: FLS 2133 or equivalent). Three hours lecture. Oral-aural practice; reading of intermediate texts. Honors section available through invitation.

FLS 3111. Advanced Spanish Laboratory. (1) (Prerequisite: FLS 2143 or FLS 2125). Three hours laboratory. A laboratory course to accompany FLS 3313 or to be taken separately. Required of all majors.

FLS 3113. Advanced Spanish Composition. (3) (Prerequisite: FLS 2143 or FLS 2125). Three hours lecture. Required of all majors. Instruction in written composition through study of advanced grammar and writing techniques.

FLS 3121. Advanced Spanish Conversation Practicum. (1) (Prerequisite: FLS 2143 or consent of department). One hour practicum. A practicum course to complement FLS 3233. Required of all majors.

FLS 3143. Hispanic Civilization. (3) (Prerequisite: FLS 2143 or FLS 2125). Three hours lecture. Illustrated survey of Hispanic cultural heritage.

FLS 3233. Advanced Spanish Conversation. (3) (Prerequisite: FLS 3113 or consent of instructor). Three hours lecture. Required of all majors. Advanced instruction in Spanish with emphasis on oral communication skills.

FLS 3313. Economies of the Spanish-Speaking World. (3) (Prerequisite: FLS 3113 or equivalent). Three hours lecture. Study of the economic structures and business cultures of Spanish-speaking countries, with emphasis on economic terminology.

FLS 3323. Enterprises in the Spanish-Speaking World. (3) (Prerequisite: FLS 3313 or equivalent). Three hours lecture. Designed to provide a functional command of conversational and written Spanish for business interactions in the modern world.

FLS 3513. Survey of Spanish Literature. (3) (Prerequisite: FLS 2143 or FLS 2125). Three hours lecture. Required of all B.A. majors. A survey of Spanish literature from its origin to the 18th century.

FLS 3613. Spanish Literature: Middle Ages-Golden Age. (3) (Prerequisite: FLS 2143 or equivalent). Three hours lecture. A survey of Spanish Literature from Middle Ages to the Golden Age (c. 1000-1640).

FLS 4213/6213. Modern Spanish Women Writers, (3). (Prerequisite: FLS 3113, 3233 or the equivalent, or consent of instructor). Three hours lecture. An introduction to modern Spanish women writers.

FLS 4243/6243. Modern Spanish Essay. (3). (Prerequisite: FLS 3113, 3233 or the equivalent, or consent of instructor). Three hours lecture. An introduction to modern Spanish essay.

FLS 4273/6273. Modern Spanish Drama. (3). (Prerequisite: FLS 3113, 3233 or the equivalent, or consent of instructor). Three hours lecture. An introduction to modern Spanish drama.

FLS 4283/6283. The Contemporary Spanish-American Novel and Short Story. (3) (Prerequisite: FLS 3523 or consent of instructor). Three hours lecture. A study of major contemporary Spanish-American novels and short stories.

FLS 4293/6293. Cinema in the Context of Spanish Culture. (3). (Prerequisite: FLS 3113, 3233 or the equivalent, or consent of instructor). Three hours lecture. An introduction to Spanish cinema.

FLS 4323/6323. Spanish Drama of the Golden Age. (3) (Prerequisite: FLS 3513). Three hours lecture. A study of dramatic works of Lope de Vega, Tirso de Molina, Calderon, and minor dramatic writers of the 17th century.

FLS 4423. Survey of Spanish Lyric Poetry. (3) (Prerequisite: FLS 3513). Three hours lecture. Reading and interpretation of masterpieces of Spanish lyric poetry and poetic theory from the Middle Ages to the present.

FLS 4523. The Renaissance. (3) (Prerequisite: FLS 3513). Three hours lecture. Spanish literature and thought of the Renaissance.

FLS 4543. Survey of Modern Spanish-American Literature. (3). (Prerequisite: FLS 3233 or equivalent). Three hours lecture. A survey of Spanish-American literature from Modernism to the present.

FLS 4633/6633. Introduction to Spanish Linguistics. (3) (Prerequisite: FLS 3233 or consent of instructor). Three hours lecture. Introduction to linguistic analyses and their application to the syntactic, morphological, semantic, phonological, historical, and sociolinguistic aspects of the Spanish language.

FLS 4643/6643. Spanish Phonology. (3) (Prerequisite: FLS 3233 or consent of instructor). Three hours lecture. Introduction to the articulatory classification of Spanish sounds. Discussion of the mental organization of these sounds, and the processes which transform them during speech.

FLS 4653/6653. History of the Spanish Language. (3) (Prerequisite: FLS 3513). Three hours lecture. The history of the development of the Spanish language from its origins to the present.

FLS 4853. Survey of Spanish-American Poetry. (3) (Prerequisite: FLS 3513 or equivalent). Three hours lecture. A panoramic study of the Spanish-American poetry from early to present times.

FLS 8223. Seminar in the Picarese Novel. (3) (Prerequisite: Graduate standing).

FLS 8253. Seminar in the Novel of the 19th Century. (3) (Prerequisite: Graduate standing).

FLS 8263. Seminar in the Novel of the 20th Century. (3) (Prerequisite: Graduate standing).

FLS 8283. The Contemporary Spanish-American Novel and Short Story. (3) (Prerequisite: Graduate standing). Three hours lecture. A study of major contemporary Spanish-American novels and short stories.

FLS 8333. Seminar in the Drama of the 19th Century. (3) (Prerequisite: Graduate standing).

FLS 8343. Seminar in the Drama of the 20th Century. (3) (Prerequisite: Graduate standing).

FLS 8513. Spanish Literature of the Middle Ages. (3) (Prerequisite: FLS 8663). Three hours lecture. A study of Spanish literary masterpieces and movements from Poema del Cid to the 16th Century.

FLS 8663. Old Spanish. (3) (Prerequisite: Graduate standing). Three hours lecture. A philological study of the development of Old Spanish from Vulgar Latin. Reading of texts.

Department of FOOD SCIENCE, NUTRITION and HEALTH PROMOTION

Office: 107 Herzer Building

Professors Mikel (Head), Clary, Haque, Hood, Hunt, and Silva; Assistant Professors: Byrd, Schilling, and Tidwell; Associate Professors: Behrends, Briley, Fountain, Kim Martin, Nannapaneni, and Williams

FNH 1001. First Year Seminar. (1) One hour lecture. First-year seminars explore a diverse array of topics that provide students with an opportunity to learn about a specific discipline from skilled faculty members.

FNH 1103. Introduction to Food Science, Nutrition and Health Promotion. (3) Three hours lecture. An introductory course that relates the importance of food science, nutrition and health promotion to the community to consideration of current trends in these fields.

FNH 2112. Food Products Evaluation. (2) One hour lecture. Two hours laboratory. Sensory examination of food products: common defects, causes, and remedies. Basic methods of evaluation of different types of foods.

FNH 2203. Science of Food Preparation. (3) One hour lecture. Four hours laboratory. A study of foods and the principles underlying handling and preparation of food products to maintain the highest standard of quality. (Same as HS 2203).

FNH 2233. Meal Management. (3) One hour lecture. Four hours laboratory. Planning, preparing, and serving meals; emphasis on management of time, energy, and money in relation to feeding a family. (Same as HS 2233).

FNH 2283. Child Health and Nutrition. (3) Three hours lecture. Nutrition requirements during pregnancy and lactation, and of infants and young children; birth defects from metabolic errors; related health of young children. (Same as HS 2283).

FNH 2293. Individual and Family Nutrition. (3) Three hours lecture. Fundamental principles of human nutrition and the practical application of this knowledge in the selection of adequate diets. (Same as HS 2293).

FNH 3003. Nutrition Field Experience. (3) (Prerequisite: Consent of Instructor). Supervised work experience for nutrition students in an approved situation.

FNH 3111. Food Science, Nutrition and Health Promotion Seminar. (1) One hour lecture. Preparation and presentation on specially assigned current topics in Food Science, Nutrition and Health Promotion.

FNH 3113. Wine Appreciation. (3) Three hours lecture. Principles of wine identification, evaluation and service with emphasis on the wines of Europe and the United States.
FNH 3142. Meats Judging I. (2) Spring semester. Four hours laboratory. Grading and judging meat carcasses and cuts, study of packing house operations. (Same as ADS 3142)

FNH 3163. Basic Principles of Health Promotion. (3) Three hours lecture. Basic concepts of health promotion. Role of health/fitness professionals in developing wellness/prevention oriented interventions to promote healthy lifestyles.

FNH 3263. Research Methods in Food and Nutrition. (3) (Prerequisites: ST 2023 or ST 2024 or ST 2220 or FNH 2233). Three hours lecture. Two hours laboratory. Techniques involved in evaluating essential parameters for commercial, state, and federal control of food products.

FNH 3274. Quantity Food Production and Service. (4) (Prerequisite: FNH 2233 or consent of instructor). One hour lecture. Eight hours laboratory. Principles and methods of preparation and service of food in quantity.

FNH 3283. The Food Service System. (3) Three hours lecture. Introduction to the food service system concept, functional subsystems, and management of financial and human resources.

FNH 3701. Nutrition Professional Development. (1) (Prerequisite: Junior standing and consent of instructor). Preparation for nutrition field experience, didactic internship, and careers.

FNH 4114/4114. Analysis of Food Products. (4) (Prerequisite: CH 2503). Three hours lecture. Three hours laboratory. Chemistry and technology of food products processing and chemical methods of analyzing foods and biological products.

FNH 4153/4153. Food Plant Management. (3) (Prerequisite: Senior standing or consent of instructor). Two hours lecture. One hour laboratory. A study of problems associated with the general management of food processing plants.

FNH 4146/4164. Quality Assurance of Food Products. (4) (Prerequisite: BIO 3304). Two hours lecture. Four hours laboratory. Principles, methods, and techniques involved in evaluating essential parameters for commercial, state, and federal control of food products.

FNH 4173/4173. Food Packaging. (3) (Prerequisite: Consent of instructor). Three hours lecture. Objectives and requirements of packaging; composition, characteristics, chemical and physical properties, selection and application of packaging materials and packaging packages.

FNH 4193/4193. Social-Cultural Aspects of Food. (3) Three hours lecture. A study of international, regional, and religious history, customs, beliefs and other impacts upon food preparation and consumption.

FNH 4213. Nutrition Public Policy and Promotion. (3) (Prerequisite: FNH 2293). Three hours lecture. Addresses the role of the public and private sectors in identifying and addressing the nutritional needs of various population groups.

FNH 4223/4223. Sports Nutrition. (3) (Prerequisite: FNH 2293 or consent of instructor). Three hours lecture. Integration of nutrition and exercise physiology illustrating links between training, increased demand for nutrients, appropriate intake of nutrients, beverages and supplements and performance.

FNH 4233/4233. Medical Nutrition Therapy. (3) (Prerequisite: FNH 4263/4263 or consent of instructor). Three hours lecture. The study and application of the principles of medical nutrition therapy in stress, trauma, and specific disease conditions.

FNH 4241/4241. Applied Food Chemistry. (1) (Prerequisite: BCH 3613 and prior credit or current enrollment in FNH 4243/4263). Two hours lecture. Lab work. Basic laboratory experiments to provide understanding of the function and interactions of chemical components in food.

FNH 4243/4243. Composition and Chemical Reactions of Foods. (3) Spring semester. (Prerequisites: CH 1053 and CH 2503 or equivalent). Three hours lecture. Nature and chemical behavior of food constituents including proteins, lipids, carbohydrates, minerals, water, enzymes, and pigments; properties of food systems as related to commercial preparation. (Same as ADS 4243/4263).

FNH 4253/4253. Nutritional Biochemistry of Foods. (3) (Prerequisite: CH 2503 or consent of instructor). Three hours lecture. Two hours laboratory. An introduction to the biochemical impact on the human body. (Same as BCH 4253/4253).

FNH 4263/4263. Nutrition and Chronic Disease. (3) (Prerequisites: FNH 2293, FNH 2253, or consent of instructor). Three hours lecture. The study of principles of nutrition and pathophysiology of chronic diseases and medical and nutrition management/treatment of chronic diseases and impact on nutritional status.

FNH 4273/4273. Nutritional Assessment. (3) (Prerequisites: FNH 4223 and FNH 4253 or equivalent). Two hours lecture. Two hours laboratory. Selection, utilization, interpretation, and evaluation of anthropometric, laboratory, clinical and dietary methods available for the assessment of nutritional status.

FNH 4274/4274. Advanced Food Service Management. (4) (Prerequisites: FNH 3274, FNH 4283). One hour lecture. Eight hours laboratory. Practical experience in the management of quantity food production for specialty dinners and catering, including purchasing and cost accounting.

FNH 4283/4283. Purchasing Food and Equipment for Food Service Systems. (3) Three hours lecture. Procuring food and equipment for foodservice systems.

tems. Product specifications, cost-effectiveness, value analysis, and quality standards.

FNH 4293/4293. Vitamins, Minerals and Supplements. (3) (Prerequisite: CH 2503 or equivalent with consent of instructor). Three hours lecture. Advanced human nutrition and metabolism of regulating micronutrients.

FNH 4314/4314. Meats Processing. (4) Spring semester. Three hours lecture. Two hours laboratory. Survey of the meat industry with emphasis on slaughtering, cutting, curving, cost control, and processing meats and meat products. (Same as ADS 4314/4314).

FNH 4333/4333. Food Law. (3) (Prerequisite: consent of instructor). Two hours lecture. Two hours laboratory. Role of law, mandatory and optional food regulations exercised by state, federal, and international agencies on food quality, safety, and consumerism, nutrition and food security.

FNH 4353/4353. Nutrition Throughout the Life Cycle. (3) (Prerequisite: BIO 4253/4253 or consent of instructor). Three hours lecture. Study of interrelationships of physiological, biochemical and sociological factors and nutrient needs of individuals and groups during the life cycle; infancy through the later years. (HS 4533/4535).

FNH 4393/4393. Prevention and Control of Disease. (3) Three hours lecture. Focus on the impact of preventive nutrition, including nutrition and health promotion, prevention, control, and detection of disease.

FNH 4414/4414. Microbiology of Foods. (4) (Prerequisite: BIO 3304). Two hours lecture. Four hours laboratory. Isolation and classification of the microorganisms associated with spoilage of commercial and domestic preserved foods. (Same as BIO 4414/4414).

FNH 4513/4513. Poultry Processing. (3) Two hours lecture. Two hours laboratory. Operation and study of modern processing equipment: basic and further processing including regulation and marketing of products. (Same as PO 4513/4513).

FNH 4553. Current Issues in Food Science. (3) Three hours lecture. Discussion of selected topics in the area of food science. Emphasis on topics published by the IFT’s Expert Panel on Food Safety and Nutrition and the IFT Office of Science and Public Affairs. (This course is designed for certification programs and not for students enrolled in degree programs at MSU.)

FNH 4563. Food Products Evaluation. (3) (Basic principles and applications in food product measurements, including physical (viscosity, texture), chemical (pH, acidity), microbiological (bacteria, yeast), and sensory methods will be discussed. (Same as PS 4583/4583).

FNH 4593/4593. New Food Product Development. (3) (Prerequisite: Senior Level Standing). Two hours lecture. Two hours laboratory. New product development, original idea through preliminary appraisal, economic and technological feasibility studies, laboratory developments, organoleptical and consumer testing, and revisions to final decision making.

FNH 4613/4613. Seafood Processing. (3) Two hours lecture. Two hours laboratory. A study of basic food science and technology principles directed toward seafood and aquaculture food harvesting, processing, marketing, and regulation.

FNH 4773/4773. Introduction to Environmental Health. (3) Three hours lecture. Examines the relationship of people to their environment, how the environment can influence physical well-being, and importance of environmental protection to overall community health.

FNH 8111-8141. Food Science, Nutrition and Health Promotion Seminar. (1) One hour lecture. Preparation and presentation of reports on specially assigned current topics in Food Science, Nutrition and Health Promotion.

FNH 8113. Advanced Food Microbiology. (3) (Prerequisite: FNH/BIO 4414/4414). Three hours lecture. Advanced concepts in food microbiology emphasizing food quality and safety.

FNH 8143. Advanced Food Chemistry. (3) (Prerequisite: FNH 4243/4263). Three hours lecture. Designed for students to recognize and appreciate the various colloidal phenomena encountered in foods, and to develop a knowledge of techniques employed in their investigation.

FNH 8153. Wellness and Aging. (3) (Prerequisites: PE 3303 or PSY 4403/4603 or consent of Department). Three hours lecture. A study designed to prepare practitioners to initiate, develop, and conduct programs in wellness and movement activities for the enrichment of life in older populations.
FNH 8163. Flavor and Food Acceptance. (3) (Prerequisite: CH 2503). Three hours lecture. Sensory responses with emphasis on smell, taste, tact, and appearance as related to foods. Techniques of panel and physicochemical methods of testing.

FNH 8193. Problems in Health Education. (3) Three hours lecture. Includes current information relating to various health problems in our society. Stress methods of prevention and wellness at different levels of curriculum organization.

FNH 8233. Maternal, Infant, and Child Nutrition. (3) Three hours lecture. Nutritional needs during reproduction and growth; problems in nourishing women during the reproductive period, infants, and children; indices of growth and development.

FNH 8243. Community Nutrition. (3) (Prerequisite: FNH 3213 or consent of instructor). Three hours lecture. Nutrition services and problems in the community. Supervised experience in methods for determining and implementing action programs in nutrition education.

FNH 8273. Advanced Clinical Nutrition. (3) (Prerequisite: Senior-level Medical Nutrition Therapy course). Three hours lecture. Study of advanced knowledge of principles of nutrition, pathophysiology and medical management of specific disease states and impact on nutritional status including current research.

FNH 8286. Supervised Practice Experience. (6) (Prerequisite: Admission into the Dietetic Internship/Graduate Studies Program). Supervised practice experiences in clinical, community, and food service systems settings. May be repeated for credit.

FNH 8333. Food Safety and Security in Public Health. (3) (Prerequisite: Enrolled in graduate school, MPH program, or consent of instructor). Three hours lecture. Epidemiology and risk factors for illness from microbial food contamination. Pre- and post-harvest interventions will be addressed. (Same as CVM 5333/3333).

FNH 8423. Meat Science. (3) Summer semester. (Prerequisites: CH 4513/6513 or equivalent and BIO 3304 or equivalent). Three hours lecture. Basic study of the value of meat and how this information is applied to the evaluation, processing and preservation of meat, meats and meat by-products. (Same as ADS 8423).

FNH 8523. Health Promotion Techniques. (3) Three hours lecture. Examination of techniques utilized in delivery of health promotion interventions. Emphasizes use of technology in development of activities suitable for diverse audiences and settings.

FNH 8543. Health Education for Diverse Populations. (3) Three hours lecture. This course is designed to help students identify and develop programs to overcome the health disparities that exist in diverse populations.

FNH 8563. Principles of Epidemiology and Health Science Research. (3) Three hours lecture. Development of skills to interpret epidemiological research. Evaluation of various study design commonly used in the field of epidemiology related to health sciences.

FNH 8572. Advanced Food Technology. (2) (Prerequisites: FNH 6583 and/or consent of instructor). Two hours lecture. Introduction and discussion of recent developments in Food Science and Technology including aseptic processing, microwave technology, food irradiation, separation techniques, and modified atmosphere packaging.

FNH 8613. Design and Administration of Health Promotion Programs. (3) Three hours lecture. Principles of health promotion planning models applicable to school, community, and work site programs. Investigation of existing programs and current literature.

FNH 8983. Ingredient Technology. (3) Three hours lecture. A specialized study of the major food ingredients including functionality, applications, formulations, and legal considerations for formulated products.
determinations from aerial imagery; planimetric and topographic mapping; image interpretation; GPS and GIS, applications to natural resource management. (Co-requisite: FO 4213/6213, FO 4113/6113, FO 4233/6233, FO 4231/6231, FO 4223/6223). Three hours lecture. Three hours laboratory. Application of quantitative decision-making techniques to stand-level and forest-wide management problems. Topics include land classification, forest production, optimal rotation analysis, and harvest scheduling.

FO 4343/6343. Forest Administration and Organization. (3) Three hours lecture. Hierarchy and land structuring of forest organizations. Legal aspects of administering forest land holdings.

FO 4553/6553. Natural Resource Law. (3) (Prerequisite: Junior standing or consent of instructor.) A comprehensive study of the laws relating to natural resources and forestry with emphasis on tort law, real property law, environmental law, taxation law, and contract law.

FO 4411/6411. Remote Sensing Seminar. (1) (Prerequisite: Junior Standing.) One hour lecture. Lectures by remote sensing experts from industry, academia, and governmental agencies on next-generation systems, applications, and economic and societal impact of remote sensing. May be repeated for credit up to four credits. (Same as PSS 4411/6411, ECE 4411/6411, GR 4411/6411).

FO 4411/6413. Natural Resources Policy. (3) (Prerequisite: Senior standing.) Three hours lecture. Current topics relating to natural resources policies which affect management decisions and practices in the public and private sectors of natural resources use.

FO 4423/6423. Professional Practice. (3) (Prerequisite: FO 4233/6233). Three hours lecture. Four hours laboratory. Forest resources data collection and analysis. Development of forest resource alternatives and recommendations for a specific forest property.

FO 4443/6443. International Forest Resources and Trade. (3) (Prerequisite: Consent of Instructor.) Three hours lecture. A study of the world’s wood consumption, marketing arrangements, community forestry, and forestry in economic development.

FO 4451/6451. Remote Sensing Applications Laboratory. (1) (Co-requisite: FO 4452/6452. Prerequisites: A basic image interpretation or remote sensing course or consent of instructor.) Three hours laboratory. Practical approaches to interpretation of remote sensing data. Emphasis is on computer applications for image analysis.

FO 4452/6452. Remote Sensing Applications. (2) (Co-requisite FO 4451/6451; Prerequisite: A basic image interpretation or remote sensing course or consent of instructor.) Two hours lecture. An introduction to remote sensing with emphasis on analysis and applications of digital image data in inventory, monitoring, and management of renewable natural resources.

FO 4463/6463. Forest Hydrology and Watershed Management. (3) (Prerequisite: PSS 3303, FO 3012, FO 4123/6123, FO 4121/6121 or consent of instructor). Synthesis of fundamental properties and processes of forest soils, hydrology, and water quality with emphasis on watershed and ecosystem management factors.

FO 4471/6471. GIS for Natural Resource Management. (1) (Co-requisite: FO 4472/6472. Prerequisite: Junior standing.) Three hours laboratory. Computer laboratory exercises that stress development, management, and use of digital geographic data for management of natural resources.

FO 4472/6472. GIS for Natural Resource Management. (2) (Co-requisite: FO 4471/6471. Prerequisite: Junior standing.) Two hours lecture. Introduction to geographic information systems (GIS) with emphasis on collection, encoding, storage, retrieval, and analysis of spatial data for use in management of natural resources.

FO 4483/6483. Forest Soils. (3) (Prerequisite: PSS 3303, FO 3012, FO 4123/6123, FO 4121/6121, or consent of instructor.) Three hours lecture. Synthesizes current information on fundamental properties and processes of forest soils with emphasis on applications to silviculture, soil conservation, and sustainable management of forested ecosystems.

FO 8111. Graduate Seminar. (1) Review of and discussion of current forestry issues. Presentation of student reports.

FO 8143. Advanced Forest Economics. (3) Three hours lecture. Application of current theory and techniques of economics to forestry. Emphasis is on the use of quantitative techniques to improve decision-making in forest resource management.

FO 8153. Quantitative Forest Ecology. (3) (Prerequisites: MA 1723 and ST 8114 or consent of instructor.) Three hours lecture. Analytical models, fitting model coefficients to data, life tables, spatial patterns, interspecific competition, and species diversity.

FO 8163. Nonmarket Forest Values. (3) Three hours lecture. (Prerequisite: FO 4113 or equivalent or consent of Instructor.) Three hours lecture. The course will deal with the valuation of nonmarket, non-timber outputs or amenities derived from the forest.

FO 8173. Advanced Spatial Management. (3) (Prerequisite: an introductory course in remote sensing and/or geographical information systems or consent of instructor.) Three hours lecture. Group discussion and application of integrated remote sensing, geographic information system (GIS) concepts, and computer applications to assess natural resources.

FO 8211. Graduate Seminar. (1) Review of and discussion of current forestry issues. Presentation of student research.

FO 8213. Advanced Silviculture. (3) (Prerequisite: FO 4223 or consent of instructor.) Three hours lecture and/or field trips once per week. Silvicultural practices in context of the total ecological principles in decision making process. Emphasis on silviculture of bottomland hardwoods.

FO 8223. Advanced Forest Inventory. (3) Three hours lecture. Design and analysis of forest resource inventories. Growth functions, yield tables, measures of site quality and stocking, and advanced sampling topics.

FO 8293. Professional Paper. (3) (For Master of Science non-thesis option students only). Demonstration of ability to compile, synthesize, and evaluate information, and to effectively communicate analyses and conclusions.

FO 8313. Spatial Statistics for Natural Resources. (3) (Prerequisite: ST 4313/6313 and introductory GIS course, or consent of instructor). Three hours lecture. Concepts and methods of spatial statistics as applied to natural resource monitoring and management.

FO 8891. Nobel Topics in Physiology/Medicine and Chemistry. (1) (Prerequisite: Graduate standing and consent of instructor). One hour seminar. Course provides historic and current understanding of topics awarded a Nobel Prize. May be repeated three times for credit. (Same as CVM 8961 and GNS 8961)

FO 8973. Scientific Writing. (3) (Prerequisite: Graduate standing and consent of instructor). Three hours lecture. The course provides advanced training in research proposal, grant proposal, and manuscript writing. (Same as ADS 8973 and CVM 8973).

FO 8983. Advanced Biotechnology. (3). (Prerequisite: BCH 6603, Bch 6613, BCH 6713 or consent of instructor). Three hours lecture. Advanced biotechnology course with an emphasis on environmental, biopharmaceutical, industrial, and medical technologies. (Same as CVM 8983).
of upholstered furniture design; frame construction and analysis; material selection; fasteners; joint construction; and testing standards.

FP 4253/6253. Quantitative Methods in Forest Products and Furniture. (3) (Prerequisite: MA 1613 or MA 1713, BIS 1014 or concurrent). Three hours lecture. Application of economic principles to the production and marketing of forest products; production theory of single and multiproduct firms; computer applications.

FP 4313/6313. Environmental Principles. (3) (Prerequisites: FP 3012 or consent of instructor). Three hours lecture. Environmental regulations pertaining to Forest Products industries. Handling and transport of hazardous compounds. Sources of environmental problems, fate in the environmental, and common control technologies.

FP 4323/6323. Physical Properties of Wood. (3) (Prerequisite: FP 1103, MA 1613, PH 1113, or consent of instructor). Two hours lecture. Three hours laboratory. Equation derivation; dimensional behavior; psychometry; thermal properties; electricity; moisture movement; case studies/problems.

FP 4353/6353. Forest Products Marketing. (3) (Prerequisites: FP 3012 and junior standing). Marketing and practices used by forest products and furniture producing companies as related to differentiated vs non-differentiated products by consumers.

FP 4413. Professional Practice. (3) (Prerequisite: Senior standing). Three hours independent study. Seniors will be exposed to all FP faculty members and required to prepare both written and oral reports on a variety of FP topics.

FP 4423/6423. Mechanical Properties of Wood. (3) (Prerequisite: FP 1103, MA 1613, PH 1113, or consent of instructor). Two hours lecture. Three hours laboratory. Strength and elasticity of wood and wood composites; variation in properties as function of structure, moisture, temperature and time; derivation of working stresses; structural design.

FP 8111. Research Seminar. (1) Review of current research work in wood science and technology; the scientific method; philosophy of research.

FP 8121. Research Seminar II. (1) One hour seminar. Review of current research work in wood science and technology; the scientific method; philosophy of research. This course focuses on oral communication skills.

FP 8123. Advanced Lignocellulosic Chemistry. (3) (Prerequisite: Consent of instructor). Three hours lecture. Carbohydrate chemistry; chemistry of cellulose and cellulosics, hemicellulose, lignins, extractives, and bark; pulping and bleaching chemistry; analysis of lignocellulosic materials; biodigestation of lignocellulosics; biomass products.

FP 8133. Environmental Issues in Forest Products. (3) (Prerequisite: Consent of instructor). Three hours lecture. Environmental impact, regulations, management of wood treatment by-products and chemical wastes; biodigestion minor forest products; timber residues; soil, sediment, water, air contaminations; current clean-up technologies.

FP 8213. Advanced Wood Mechanics. (3) (Prerequisite: Consent of instructor). Two hours lecture. Three hours laboratory. Study of elastic and viscoelastic behavior of wood composites; fracture in wood; stress analysis; current topics in wood mechanics.

GENERAL AGRICULTURE

GA 1111. Survey of Agriculture. (1) One hour lecture. A study of the overall function, historical beginnings, organization and operation of the agricultural industry in the United States and the world.

GENERAL ENGINEERING

Office: 250 McCain Engineering Building
Professors: L. Bruce, Rajala, and D. Reese
Instructors: Barton, Brocato, Dechert, Green, and Nelson

GE 1011. Introduction to Engineering for pre-engineers. (1) One hour lecture. Introduction to engineering disciplines. Overview of techniques for success in engineering including time management, study skills, technical communication, and career planning. Required for pre-engineering majors.

GE 1021. Engineering Success. (1) One hour lecture. This course is designed to facilitate: professional, academic, and personal development. Also, it provides an orientation to Mississippi State University.

GE 2713. Introduction to Engineering and Public Policy. (3) (Prerequisite: EN 1113 or equivalent). Three hours lecture. A multidisciplinary analysis of public policy issues involving engineering and technology and the use of policy science to explore complex policy issues. (Same as PS 2713)

GE 3011. Engineering Entrepreneurship Seminar. (1) Two hours seminar. Current topics in engineering entrepreneurship to enable students to better understand the role of the entrepreneur in creating start-up companies and leading young companies.

GE 3513. Technical Writing. (3) (Prerequisites: Completion of English composition requirements; junior standing). Three hours lecture. Instruction and practice in technical writing for scientific and engineering fields, emphasizing analysis and development of correspondence, progress and research reports, instruction, and proposals.

GENETICS

(For the interdisciplinary graduate programs in Genetics, consult the Graduate Bulletin.)

GNS 3103. Genetics I. (3) (Prerequisites: MA 1313 and BIO 1134 or BIO 2113). A comprehensive course covering a broad range of topics including transmission, population, and molecular genetics. Prokaryotic and eukaryotic cell types and plant and animal examples are used. (Same as PO 3103 and BIO 3103).

GNS 4133/6133. Human Genetics. (3) (Prerequisite: BIO 1504 or consent of instructor). Three hours lecture. Principles of Mendelian and molecular genetics as applied to humans. Description and causes of human genetic diseases and other anomalies. (Same as BIO 4133/6133).

GNS 4804/6804. Molecular Biology Methods. (4) (Prerequisite: Co-registration in BCH 4613/6613). Two hours lecture. Four hours laboratory. A comprehensive course to teach the student the modern methods of biochemistry including molecular biology. (Same as BCH 4804/6804).

GNS 6123. Animal Breeding. (3) Fall semester. (Prerequisite: PO 3103). Three hours lecture. The basis for genetic improvement of livestock, including the study of variation, heritable characteristics, mating systems and methods of estimating breeding values. (Same as ADS 4123/6123).

GNS 6713. Molecular Biology. (3) (Prerequisite: Co-registration in BCH 4613/6613). Three hours lecture. A study of basic molecular processes such as synthesis of DNA, RNA, and protein in both prokaryotic and eukaryotic cells. Offered fall semester. (Same as BCH 4713/6713).

GNS 8643. Molecular Genetics. (3) (Prerequisites: PO 3103 or BIO 3103 and Co-registration in BCH 4613/6613). Three hours lecture. Study of the gene and its expression with emphasis on structure and function in higher organisms. (Same as BCH 8643 and PHY 8643).

GNS 8961. Nobel Topics in Physiology/Medicine and Chemistry. (1) (Prerequisite: Graduate standing and consent of instructor). One hour seminar. Course provides historic and current understanding of topics awarded with a Nobel Prize. May be repeated three times for credit. (Same as CVM 8961 and FO 8961)

Department of GEOSCIENCES

Office: 108 Hilburn Hall
Professors: Mylroie, Schmitz, and Wax;
Associate Professors Brown, Cooke, Dewey, and Rodgers;
Assistant Professors Ambinaud, Clay, Dixson, Grimes, Kirkland, McNeal, Mercer, Mishra, and Sherman-Morris;
Instructors Gillham, Haney, Keeney, Miller, Moe-Hoffman, J. Mylroie, Ruffin, Owen, Vandewege, and Wallace

GEOLOGY

GG 1111. Earth Sciences I Laboratory. (1) Two hours laboratory. Laboratory for GG 1113, but may be scheduled without GG 1113. Includes study of earth materials, maps, and aerial photographs. Planned primarily as a science elective for the non-geology major.

GG 1113. Survey of Earth Sciences I. (3) Three hours lecture. Study of the Earth in space, the materials of which the Earth is composed, and the processes affecting change on the Earth. Planned primarily as a science elective for the non-geology major.

GG 1121. Earth Sciences II Laboratory. (1) Two hours laboratory. Laboratory for GG 1123, but may be scheduled without GG 1123. Includes the study of fossils, geologic maps, and geologic cross sections. Planned primarily as a science elective for the non-geology major.

GG 1123. Survey of Earth Sciences II. (3) (Prerequisite: GG 1113, or equivalent). Three hours lecture. Origin and development of the Earth through geologic time. Planned primarily as a science elective for the non-geology major.

GG 1133. Planetary Geology. (3) Three hours lecture. Process oriented examination of the planets and their satellites with emphasis on the “Earth-like” planets and moons.

GG 3133. Introduction to Environmental Geology. (3) (Prerequisite: GG 1113). Three hours lecture. A survey of the basic principles and applications of science to the study of the marine environment.
GG 4133/6313. Principles of Paleocology. (3) (Prerequisite: GG 1123 or equivalent or consent of instructor). Three hours lecture. A study of paleoecology with special emphasis on marine paleocology. May be taken with GG 4201.

GG 4153/6153. Engineering Geology. (3) (Prerequisite: GG 1113 or equivalent or consent of instructor). Two hours lecture. Two hours laboratory. Application of geologic principles to location and construction of engineering structures; engineering properties of geologic materials; engineering application of equipment used by geologists.

GG 4203/6203. Principles of Paleobiology. (3) (Prerequisite: GG 1123 or equivalent). One hour lecture. Two hours laboratory. Application of principles of paleobiology to the major rock types.

GG 4433/6333. Geowriting. (3) Three hours lecture. Weekly library research on controversial topics in geology presented in class as written professional papers.

GG 4403/6403. Gulf Coast Stratigraphy. (3) (Prerequisite: GG 4304/6304 or consent of instructor). Three hours lecture or field trips. Systematic study of the stratigraphy of the Gulf Coast; actual field experience substituted for class work, when conditions permit.

GG 4413/6413. Structural Geology. (3) (Prerequisites: GG 4123 or consent of instructor). Two hours lecture. Two hours laboratory. Application of the principles of mechanics to the forces deforming the rocks of the Earth’s crust; emphasis on structure in sedimentary rocks.

GG 4443/6433. Subsurface Methods. (3) (Prerequisite: GG 4443 and GG 4413, or equivalent). One hour lecture. Four hours laboratory. The study of subsurface geologic methods including contouring, sampling study, various types of logging, and interpretation of subsurface data.

GG 4443/6443. Principles of Sedimentary Deposits II. (3) (Prerequisite: GG 4304). Three hours lecture. Application of principles from GG 4304. Introduces facies associations produced in depositional environments, systems, and systems tracts, tectonics and sedimentation, basin classification, and sequence analysis.

GG 4503/6503. Geomorphology. (3) (Prerequisite: Consent of instructor). Three hours lecture. The origin and characteristics of land forms based on a consideration of geologic processes, stages of development, and geological structure.

GG 4523/6523. Coastal Environments. (3) (Prerequisite: GG 1113 or consent of instructor). Three hours lecture. An introduction to world coastal environments, with emphasis upon major shoreline-shaping processes, geographical variation in coastal landforms, human impacts, and environmental concerns.

GG 4613/6613. Physical Hydrogeology. (3) (Prerequisite: GG 3613 or consent of instructor). Three hours lecture. Advanced study of the interrelationship of ground water and its geologic environment with emphasis on occurrence, distribution, and movement.

GG 4623/6623. Chemical Hydrogeology. (3) (Prerequisites: CE 3523, CE 8563, or GG 4613/6613 or consent of instructor). Three hours lecture. Advanced study of groundwater and its environment with emphasis on the chemical interaction of water with porous solids and the transport of chemical constituents.

GG 8113. Geology I: Processes and Products. (3) (Prerequisite: Consent of instructor). Three hours video and online. Principles of physical geology with emphasis on earth materials and processes, rock and mineral identification, and landscape development. Primarily for K-12 science teachers.

GG 8123. Geology II: Earth, Time and Life. (3) (Prerequisite: GG 8113 or consent of instructor). Three hours video and online. Principles of historical geology with emphasis on geologic time, earth history, fossils, evolution, and extinction. Primarily for K-12 science teachers.

GG 8203. Ocean Science. (3) (Prerequisite: GG 8113 or consent of instructor). Three hours video and online. Comprehensive examination of the ocean world, focusing on the topography, physics, chemistry, and circulation of the oceans. Primarily for K-12 science teachers.

GG 8223. Advanced Paleontology. (3) (Prerequisite: GG 4203 or equivalent). Two hours lecture. Two hours laboratory and field trips. Deals with topics in advanced paleontology.

GG 8233. Environmental Geoscience. (3) (Prerequisite: GG 8113 or consent of instructor). Three hours video and online. Study of current environmental problems associated with the earth science realms: atmosphere, biosphere, hydrosphere, and lithosphere. Primarily for K-12 science teachers.

GG 8333. Planetary Science. (3) (Prerequisite: GG 8113 or consent of instructor). Three hours video and online. Examination of mineral matter and geological processes of the moon, the planets, asteroids, comets and meteors. Primarily for K-12 science teachers.

GG 8443. Advanced Structural Geology. (3) (Prerequisite: Major in geology including GG 4413 or equivalent). Three hours lecture. A study of major tectonic units and the forces involved in their formation.

GG 8561. Geoscience Seminar. (1) (Prerequisite: Graduate standing). Review of current geoscience literature; preparation and presentation of formal papers.

GG 8572. Geologic Literature. (2) (Prerequisite: Major in geology). A reading course with emphasis on library research.

GG 8613. Hydrology. (3) (Prerequisite: GG 8113 or consent of instructor). Three hours video and online. Investigation of the occurrence, distribution, movement, and chemistry of earth’s waters. Emphasis on geological controls of surface and groundwater. Primarily for K-12 science teachers.

GEOGRAPHY

(For departmental information, see GEOSCIENCES, GG.)

GR 1114. Elements of Physical Geography. (4) Three hours lecture. Two hours laboratory. Systematic study of the elements of the environmental process that form and characterize the earth’s natural landscapes. May be taken as a science elective.

GR 1123. Introduction to World Geography. (3) Three hours lecture. A survey of the world’s regions, with emphasis upon locational aspects, physical and cultural diversity, and environmental issues.

GR 1603. Introduction to Meteorology. (3) (Prerequisite: GG 1114, GG 1113, or equivalent). Three hours lecture. Descriptive study of weather with the objective of gaining appreciation of the variety of atmospheric phenomena. Explanation of daily weather events, their causes and impacts.

GR 2013. Cultural Geography. (3) Three hours lecture. Study of human occupation of the Earth, treating geographic aspects of population, settlement, origin and diffusion of cultural traits, resource utilizing systems, and political factors.

GR 2313. Maps and Remote Sensing. (3) Two hours lecture. Two hours laboratory. Fundamental principles of cartography and remote sensing, including types and applications. Attention is given to interpretation of surface features, environmental problem solving, and environmental planning.

GR 3113. Conservation of Natural Resources. (3) Three hours lecture. Consideration of the current problems associated with the conservation of soils, forests, waters, minerals, and wild life in the United States and the world.

GR 3303. Survey of Geospatial Technologies. (3) (Prerequisite: GR 2313 or consent of instructor) Three hours lecture. Geographic Information Systems, Remote Sensing and Global Positioning Systems applied to earth systems and science. Includes field excursions for hands-on experience with current technologies.

GR 3311. Geospatial Applications. (1) (Prerequisite: GR 2313 or consent of instructor). One hour lecture. Extensive investigation of the primary geospatial computer packages. Course will focus on the utilization and application of these computer packages related to current geospatial technologies.

GR 3313. Introduction to Geodatabases. (3) (Prerequisite: GR 2313 or consent of instructor). Three hours lecture. Examination of geodatabase structures utilized in Geographic Information Systems. Implementations of GIS components through spatial programming using Visual Basic applications designed for geospatial data.

GR 4123/6123. Urban Geography. (3) Three hours lecture. Historic trends in distribution and growth of urban settlements, urban location theory; economic bases, functions, and structure of cities and metropolitan areas; urban problems; planning.
GR 4203/6203. Geography of North America. (3) Three hours lecture. A regional survey of the United States and Canada with emphasis upon place names, physical landscapes, historical settlement patterns, cultural regions, and environmental issues.

GR 4213/6213. Geography of Latin America. (3) Three hours lecture. A regional survey of Latin America with emphasis upon place names, physical environments, cultural landscapes and their evolution, and environmental issues.

GR 4223/6223. Geography of Europe. (3) Three hours lecture. A regional survey of Europe with emphasis upon places, physical environments, cultural landscapes, geopolitical evolution, and environment issues.

GR 4233/6233. Geography of Asia. (3) Three hours lecture. A regional survey of Asia with emphasis upon place names, physical geography, cultural diversity and cultural landscapes, geopolitical conflicts, and environmental issues.

GR 4243/6243. Geography of Russia and the Former Soviet Republics. (3) Three hours lecture. A regional survey of the former Soviet Union republics with emphasis upon place names, physical environments, ethnic diversity, geopolitical evolution, and environmental issues.

GR 4253/6253. Geography of Africa. (3) Three hours lecture. A regional survey of the African continent with emphasis upon place names, physical geography, cultural diversity and cultural landscapes, geopolitical changes, and environmental issues.

GR 4263/6263. Geography of the South. (3) Three hours lecture. A regional survey of the South with emphasis upon physical and cultural landscapes, settlement patterns, ethnic diversity, tourism development, and environmental issues.

GR 4283/6283. Geography of Islamic World. (3) A regional survey of Islamic countries of the world with emphasis upon physical landscapes, cultural landscapes, and their evolution, geopolitical contexts and environmental issues.

GR 4303/6303. Principles of GIS. (3) (Prerequisite: Junior or graduate standing, or consent of instructor.) Two hours lecture. Two hours laboratory. Spatial analysis and topological relationships of geographic data using Geographic Information Systems (GIS) theory.

GR 4313/6313. Advanced GIS. (3) (Prerequisite: GR 4303/6303 or consent of instructor.) Two hours lecture. Two hours laboratory. Vector-based file structure and GIS queries using spatial and geodatabase attributes. Descriptive and prescriptive modeling in the raster domain including regression and linear weighted modeling.

GR 4323/6323. Cartographic Sciences. (3) (Prerequisite: Junior or graduate standing or consent of instructor.) Two hours lecture. Two hours laboratory. Principles of cartographic theory and map design. Types of maps, map projections, proportional symbols, use of color, mapping and statistics, interactive map interface, metadata, and geovisualization.

GR 4333/6333. Remote Sensing of the Physical Environment. (3) (Prerequisite: GR 3303, GR 3311 or consent of instructor.) Two hours lecture. Two hours laboratory. Examines remote sensing methods applicable to large area analyses of watershed-level drainage systems, urban landscape, landscape vegetation metrics, physical landscape structural components, and atmospheric features.

GR 4343/6343. Advanced Remote Sensing in Geosciences. (3) (Prerequisite: Either GR 4333/6333, ECE 4423/6423, or FO 4452/6452, or consent of instructor.) Two hours lecture. Two hours laboratory. Geospatial imagery and thematic analysis, theoretical basis of radiative transfer in atmosphere and water column; quantitative remote sensing techniques and geospatial product development.

GR 4353/6353. Geographic Information Systems Programming. (3) (Prerequisite: GR 3313 or consent of instructor.) Two hours lecture. Two hours laboratory. Integration of software systems, Visual Basic and ArcObject, Visual Basic Applications for ArcGIS, Geoprocessing script using Python.

GR 4402/6402. Weather Analysis I. (2) (Prerequisite: GR 1603 or equivalent.) One hour lecture. Two hours laboratory. Introduction to real-time weather information such as Dfax charts, satellite and radar imagery, and text data. Emphasis placed on nowcasting.

GR 4411/6411. Remote Sensing Seminar. (1) (Prerequisite: Junior Standing.) One hour lecture. Lectures by remote sensing experts from industry, academia, and governmental agencies on next-generation systems, applications, and economic and societal impact of remote sensing. May be repeated for credit up to four credits. (Same as PSS 4411/6411, ECE 4411/6411, FO 4411/6411)

GR 4412/6412. Weather Analysis II. (2) (Prerequisite: GR 4402/6402.) One hour lecture. Two hours laboratory. Continuation of Weather Analysis I. Advanced analysis of current weather data in Nowcasting.

GR 4422/6422. Weather Forecasting I. (2) (Prerequisite: GR 4412/6412.) One hour lecture. Two hours laboratory. Introduction to the process of creating and disseminating weather forecasts. Use of current weather data in creating daily forecasts for the local area.

GR 4432/6432. Weather Forecasting II. (2) (Prerequisite: GR 4422/6422.) One hour lecture. Two hours laboratory. Continuation of Weather Forecasting I. Emphasis placed on disseminating both oral and written forecasts for the local area.

GR 4443. Weather Prediction I. (3) (Prerequisite: GR 1603 of consent of instructor.) Three hours video and online. Examination of the complexity of weather forecasting. Emphasis on numerical weather prediction, computer models, and mesoscale analysis.

GR 4453. Weather Prediction II. (3) (Prerequisite: GR 4443 or consent of instructor.) Three hours video and online. Continuation of GR 4443. Case studies of weather events are used to develop independent weather forecasts. Emphasis on special weather events.

GR 4473/6473. Numerical Weather Prediction. (3) (Prerequisite: Consent of instructor.) This course provides students with an overview of the theory, processes, developments and applications of existing numerical weather prediction platforms.

GR 4502/6502. Practicum in Broadcast Meteorology I. (2) (Prerequisite: GR 1603 or equivalent.) One hour lecture. Two hours laboratory. Introduction to developing a weather story with emphasis on producing weather graphics for television. Study of chroma key mechanisms, and weathercast communication.

GR 4512/6512. Practicum in Broadcast Meteorology II. (2) (Prerequisite: GR 4502/6502.) One hour lecture. Two hours laboratory. Continuation of Practicum in Broadcast Meteorology I with emphasis on weather graphics production, weathercast performance, image and communication. Supported by lab practice.

GR 4522/6522. Practicum in Broadcast Meteorology III. (2) (Prerequisite: GR 4512/6512.) One hour lecture. Two hours laboratory. Emphasis placed on advanced weathercasting, including field reporting, severe weather, and building graphics. Students are assigned actual television weather shows, with performance emphasis in the lab.

GR 4532/6532. Practicum in Broadcast Meteorology IV. (2) (Prerequisite: GR 4522/6522.) One hour lecture. Two hours laboratory. Emphasis on the weathercasting job market in television. Students create actual television weather shows and focus on producing weather bulletins and assistance on a regular basis.

GR 4603/6603. Climatology. (3) (Prerequisite: GR 1114 or GR 1123, or equivalent.) Three hours lecture. Study of the elements and controls of weather and climate, distribution and characteristics of climatic regions.

GR 4613/6613. Applied Climatology. (3) (Prerequisite: GR 4603 or equivalent.) Two hours lecture. Two hours laboratory. Problem solving in today’s world. Topic: natural and cultural climatology and land use climatologies.

GR 4623/6623. Physical Meteorology. (3) (Prerequisite: GR 1603.) An investigation of cloud physics/precipitation processes and solar/terrestrial radiation, including atmospheric dynamics, atmospheric electricity, optics, and instrumentation.

GR 4633/6633. Statistical Climatology. (3) (Prerequisite: GR 4603 or GG 1114 or equivalent.) Three hours lecture. Two hours laboratory. A survey of the types of statistical weather data available. Manipulation of the data on various temporal and spatial scales.

GR 4640/6640. Meteorological Internship. (1-6) (Prerequisite: Consent of instructor.) Hours and credits to be arranged. Internship with television station, private company or government agency under supervision of instructor.

GR 4663. Satellite Meteorology. (3) (Prerequisite: GR 4603 or consent of instructor.) Three hours video and online. Study of the history, operations, and applications of satellites in weather analysis. Theory of meteorological measurements in determinations of atmospheric structure.

GR 4673. Radar Meteorology. (3) (Prerequisite: GR 4603 or consent of instructor.) Three hours video and online. Detailed analysis of the use of Doppler radar in weather operations. Emphasis on Doppler velocity measurements, clear-air return, and severe storm identification and warning.

GR 4713/6713. Synoptic Meteorology I. (3) (Prerequisite: GR 1603 or equivalent.) Two hours lecture and fundamentals laboratory. Theory of atmospheric physics. Emphasis on energy exchanges, atmospheric moisture, physical processes of atmospheric motion, air masses and fronts, and cyclogenesis.

GR 4723/6723. Synoptic Meteorology II. (3) (Prerequisite: GR 1603 and MA 1713.) Three hours lecture. Principles and derivation of meteorological theory. Emphasis on the atmosphere, atmospheric circulation systems, air mass analysis, frontogenesis and frontolysis.

GR 4733/6733. Synoptic Meteorology. (3) (Prerequisite: GR 1603 and MA 1713.) Three hours lecture. Principles and derivation of meteorological theory. Emphasis on the atmosphere, atmospheric circulation systems, air mass analysis, frontogenesis and frontolysis.

GR 4753/6753. Satellite and Radar Meteorology. (3) (Prerequisite: GR 1603.) Three hours lecture. Study of the history, the operations, and the applications of satellites and radar in weather analysis. Theory of meteorological measurements in determinations of atmospheric structure.

GR 4813/6813. Natural Hazards and Processes. (3) (Prerequisite: GR 1114 or equivalent.) Three hours lecture. A survey of natural phenomena in geology, oceanography and astronomy as applied to meteorology. Detailed study of earthquakes, volcanoes, ocean currents, and solar activity.

GR 4823/6823. Dynamic Meteorology I. (3) (Prerequisite: GR 4733/6733.) Three hours lecture. In-depth examination of the theoretical methods for determining atmospheric stability and the tools necessary to interrogate the vertical profile of the atmosphere.

GR 4842/6842. Forecasting Severe Local Storms. (2) (Prerequisite: consent of instructor.) One hour lecture. Two hours laboratory. This course provides a theoretical overview and practical application of the severe local storms forecasting process.

GR 4913/6913. Thermodynamic Meteorology. (3) (Prerequisite: GR 4723/6723 or equivalent.) Three hours lecture. Examination of the meteorological stability within the earth’s atmosphere. Focus on analysis of the various stability indices related to predicting severe weather.

GR 4923/6923. Severe Weather. (3) (Prerequisite: GR 4913/6913 or equivalent.) Three hours lecture. Descriptive study of severe and unusual weather across the earth. Explanation of variations in severe weather in both spatial and temporal scales.
GR 4933/6933. Dynamic Meteorology II. (3) (Prerequisites: GR 4823/6823 and MA 2733). Three hours lecture. Quantitative analysis and consideration of atmospheric circulation including jet streams, mid-latitude cyclones, vorticity and atmospheric kinematics.

GR 4943/6943. Tropical Meteorology. (3) (Prerequisite: consent of instructor) Three hours lecture. Topics include the dynamics and circulation of the tropical atmosphere, characteristics of tropical cyclones, and forecasting methodologies for tropical weather.

GR 4963/6963. Mesoscale Meteorology. (3) (Prerequisite: GR 4913/6913). Three hours lecture. Descriptive and physical understanding of Mesoscale processes and their relevance to the synoptic environment. A strong focus will be placed on severe Local Storms.

GS 8113. Meteorology I: Observations. (3) (Prerequisite: Consent of instructor). Three hours video and online. Principles of meteorology with emphasis on elements, controls, and forecasting of atmospheric phenomena. Concentration on daily weather observations and the movement of weather systems. Primarily for K-12 science teachers.

GR 8123. Meteorology II: Forecasting and Storms. (3) (Prerequisite GR 8113 or consent of instructor). Three hours video and online. Continuation of Meteorology I. Emphasis on the forecasting of daily weather events and on severe weather. Primarily for K-12 science teachers.

Two hours lecture. Two hours laboratory. Examination of database structures utilized in geospatial information systems. Design and use of geospatial databases through spatial programming in development and implementation of spatial models.

GR 8313. Advanced Cultural Geography. (3) (Prerequisite: Consent of instructor). Three hours lecture. Study and analysis of population distribution, densities, and movements; rural and urban settlement patterns and features; principles of cultural geography.

GR 8333. Field Techniques in Remote Sensing. (3) (Prerequisite: Either GR 4333/6333, ECE 4423/6423 or FO 4452/6542 or consent of instructor) Three hours lecture. Field spectroscopy or proximal sensing; experiment design and data collection using in situ sensor; data analysis, model calibration, and validation to quantify biophysical parameters.

GR 8400. Field Methods in Geosciences. (1-3) (Prerequisite: Consent of Instructor). Hours and credits to be arranged. May be taken twice. Provides field experience in the geosciences through planned and supervised outdoor projects and field trips.

GR 8542. Geographic Literature. (2) (Prerequisite: Major or minor in geography). A reading course with emphasis on library research.

GR 8553. Research Methods in Geoscience. (3) (Prerequisite: Consent of instructor). Three hours seminar and forum. Defining research problems, formulating hypotheses, collecting data, using analytical techniques, substantiating conclusions for geoscience topics; written and oral presentations of research projects required.

GR 8563. GIS Research Applications. (3) (Prerequisites: GR 6333, GR 6313, ST 8114 or equivalent, or consent of instructor) Two hours lecture. Two hours laboratory. This course examines the research cycle from proposal to peer-reviewed publication via case studies in GIS with applications for medical epidemiology, wildfire, and emergency management.

GR 8573. Research in Applied Meteorology. (3) (Prerequisite: Consent of instructor) Seminar. Discussion and application of current research in applied meteorology. Individual or small group projects with research presentations.

GR 8613. Hydrometeorology. (3) (Prerequisite: Consent of instructor) Three hours lecture - video and online. Hydrometeorological principles with an emphasis on flood forecasting.

GR 8633. Climate Change. (3) (Prerequisite: Consent of Instructor) Three hours lecture. In-depth examination of changes in earth’s climate through time. Focus is placed on causes, measurement, implications and complexity of climate change.

GR 8813. Advanced Hazards and Disasters. (3) (Prerequisite: Consent of Instructor) Three hours lecture. Advanced study of the processes, distribution, and impacts of hazards and disasters.

GR 8833. Weather and Society. (3) (Prerequisite: Consent of instructor) Three hours lecture. Study of the role of weather in and on society through readings, discussion and research.

GS 3513. Women and Literature: Selected Topics. (3) (Prerequisite: completion of EN 1103. Three hours lecture. A study of literary works by or about women. Texts are selected according to theme, genre, and/or historical period. (Same as EN 3513).

GS 4403/6403. Gender and Sport. (3) Three hours lecture. An exploration of how ideologies and inequalities related to gender may be constructed, perpetuated, and/or challenged in and through sport. (Same as SS 4403/6403)

GS 8963. Exploring Issues in Gender. (3) (Prerequisite: graduate standing and enrollment in the Diversity Certificate program). Three hours lecture. An intensive introduction to theories of gender structures social, economic and cultural inequalities. Designed for online Diversity Certificate program students. (Same as SO 8963)

GS 8973. Gender and Work. (3) (Prerequisite: graduate standing and enrollment in the Diversity Certificate program). Three hours lecture. An intensive examination of how gender impacts experiences of work from the home to the corporation. Designed for online Diversity Certificate program students. (Same as SO 8973)

HEALTH CARE ADMINISTRATION

HCA 3813. Healthcare Regulations. (3) (Prerequisite: BL 2413). Three hours lecture. A review of corporate systems approach to meet state and national regulatory agency mandates for the healthcare industry utilizing best practices methodologies. (Meridian campus only).

HCA 4903. Ethical Issues in Healthcare. (3) Three hours lecture. Managerial approaches into the ethical basis of patient care exploring the legal, theistic, cost-benefit, and humanist perspectives used to set corporate policy. (Meridian campus only).

HCA 4243. Managed Care. (3) (Prerequisite: MGT 314). Three hours lecture. An examination of healthcare as a progressive system of primary care to long term care. Emphasis on managing costs-best choice service for patient. (Meridian campus only).

HCA 4443. Healthcare Internship. (3) (Prerequisite: HCA 3313, and HCA 3813). Internship. A supervised work experience with a health care provider. Student will provide a written report to the assigned faculty member at completion of internship. (Meridian campus only).

HCA 4803. Healthcare Policy. (3) (Prerequisite: HCA 3813). Three hours lecture. A detailed study of the healthcare industry using an analysis of the internal resources and external environmental policies utilized by health care providers. (Meridian campus only).

HIGHER EDUCATION

(For departmental information, see COUNSELOR EDUCATION.)

HED 8113. Administration of Student Personnel Services in Higher Education. (3) Three hours lecture. One hour laboratory. A study of the organization and administration of student personnel services with emphasis on health services, placement, financial aid and student housing.

HED 8123. University and Community College Governance. (3) Three hours lecture. A comprehensive survey of the field of administration of the community college and the university.

HED 8133. University and Community College Instruction. (3) Three hours lecture. A study of teaching methods and techniques, development of course content and instructional aids, and evaluation of student performance in the university and community college.

HED 8710. Practicum in University and Community College. (1-3) Observation and supervised teaching activities in a university or community college.

HED 8723. Internship in University and Community College Education. (3) Directed off-campus experiences designed to relate ideas and concepts to problems encountered in managing higher education programs.

GENDER STUDIES

Office: 224 Allen Hall

GS 1173. Introduction to Gender Studies. (3) Three hours lecture. An introduction to theoretical concepts in Gender Studies. This course will examine the influence of the women’s movement on the academic development of Gender Studies (Same as AN 1173 and SO 1173).

GS 3033. Gender Politics. (3) Three hours lecture. Examines gender difference in law, the courts, voting, political involvement, and approaches to political power, and violence. (Same as PS 3033)
**Department of HISTORY**

Office: 214 Allen Hall

Professors Marcus (Head), Middleton, and Uzigiwev;
Associate Professors Barbier, Danms, Hay, Messer Phillips, and Wu;
Assistant Professors Brain, Gangloff, Giesen, Greene, Hersey, Hui,
Lavine, Marshall, Ridner, Ward, and Williams; Instructor Doyle

**HI 1073. Modern U.S. History.** (3) Three hours lecture. A continuation of HI 1063, covering the period from Reconstruction to the present.

**HI 1163. World History Before 1500.** (3) Three hours lecture. A survey of world history since prehistory until about 1500.

**HI 1173. World History Since 1500.** (3) Three hours lecture. A survey of world history since about 1500 until the present.

**HI 1213. Early Western World.** (3) Three hours lecture. A survey of western world history from ancient times to about 1600.

**HI 1223. Modern Western World.** (3) Three hours lecture. A continuation of HI 1213, covering the period from the 17th century to the present.

**HI 1313. East Asian Civilizations to 1300.** (3) Three hours lecture. A survey of China and Japan and their peoples through a multi-disciplinary approach from pre-history until the thirteenth century.

**HI 1323. East Asia Civilizations Since 1300.** (3) Three hours lecture. A survey of China and Japan and their peoples through a multi-disciplinary approach from 1300 to the present.

**HI 3013. African American History to 1865.** (3) Three hours lecture A historical examination of the life and culture of African Americans in the United States from European colonization to the end of the Civil War. (Same as AAS 3013).

**HI 3023. African American History since 1865.** (3) Three hours lecture. A historical examination of the life and culture of African Americans in the United States from the beginning of Reconstruction to the present. (Same as AAS 3023).

**HI 3133. History of U.S. Popular Culture.** (3) Three hours lecture. An historical analysis of the development of popular culture, related industries and their impact on American society.

**HI 3183. World Environmental History.** (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A historical analysis of the interaction of humans and the natural world from the Neolithic period to the present.

**HI 3333. Mississippi History.** (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A survey of Mississippi history examining economic, social, political, geographical, and cultural aspects of the state's past.

**HI 3363. History of U.S. Transportation.** (3) Three hours lecture. Course examines the history of transportation in the United States from the colonial period to the present and its role in constructing an American identity.

**HI 3613. History of Life Sciences.** (3) Three hours seminar. A survey of the historical development of the life sciences in Western culture since 1800, with respect to their social, intellectual, and political contexts.

**HI 3703. The Western Church: Beginning to Reformation.** (3) (Prerequisites: Completion of any 1000-level history course in history of philosophy and religion.) Three hours lecture. An examination of the institutions, doctrines, and spirituality of the Western Church and their impact on Western European politics, society, and culture. (Same as REL 3703).

**HI 3743. History of England.** (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A survey of English history from its origins to the present.

**HI 3763. Hitler and Nazi Germany.** (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A study of Adolf Hitler’s personality and rise to power; and examination of the theory and practice of National Socialism.

**HI 3773. History of the Holocaust.** (3) (Prerequisite: Completion of any 1000-level history course or consent of the instructor). Three hours lecture. An examination of the role of perpetrators, victims, and bystanders during the Holocaust.

**HI 3783. Modern European Imperialism.** (3) (Prerequisites: Completion of any 1000-level history course or consent of the instructor). Three hours lecture. The course surveys European imperialism from 1815 to the post-colonial world.

**HI 3813. Modern Latin America.** (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. An introduction to the modern history of the major Latin American nations and their importance to the United States.

**HI 3853. The United States and Latin America.** (3) (Prerequisite: Completion of any 1000-level history course.) Three hours lecture. History of foreign policies and diplomatic relations in the nineteenth and twentieth centuries with an emphasis on strategic and security issues.

**HI 3893. 20th Century World History.** (3) (Prerequisite: completion of any 1000 level history course). Three hours lecture. Study of the world since 1900 concentrating on the themes of imperialism, nationalism, war and industrialization.

**HI 3903. Historiography and Historical Method.** (3) (Prerequisites: Junior or senior standing). Three hours lecture. The writings and interpretations of leading European and American historians, bibliographical aids, methods of research, preparation of bibliographies, practice in writing a research paper.

**HI 4103/6103. Colonial America.** (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. Study of the earliest English settlements to 1740. Emphasis on Puritanism, interaction with other people, expansion and forming of societal and political institutions.

**HI 4113/6113. U.S. History 1783-1825.** (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. America from the beginnings of the Jacksonian movement, its political, economic and social battles, through trans-continental expansion and the Mexican War.

**HI 4123/6123. Civil War and Reconstruction 1850-1877.** (3) (Prerequisites: Completion of any 1000-level history course). Three hours lecture. America from the formation of the movement and the Civil War, the political and military battles of the War, and the struggle to reunify the nation.

**HI 4143/6143. Revolutionary America.** (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. American provinces from 1740 until 1783. Emphasis on maturation, pluralism, role in British empire, religion, Enlightenment, and causes, ideology, and conduct of the Revolution.

**HI 4153/6153. U.S. History 1877-1917.** (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A survey of political, economic, social, and constitutional developments.

**HI 4163/6163. U.S. 1917-1945.** (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A study of all major aspects of American government and life through World War II.

**HI 4173/6173. U.S. History Since 1945.** (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A survey of all major aspects of American government and life since the end of World War II.

**HI 4183/6183. U.S. Economic History.** (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. An intensive study of economic change in the United States and its impact on political and social development. (Same as EC 4183/6183).

**HI 4193/6193. U.S. Environmental History.** (3) (Prerequisite: Completion of any 1000-level history course). A survey of the impact of the environment in shaping the American culture, literature, politics, and economy from European colonization to the present.

**HI 4203/6203. Diplomatic History of the U.S.** (3) (Prerequisites: Completion of any 1000-level history course). Three hours lecture. A study of American foreign policy from the founding of the Republic to the present time.

**HI 4213/6213. History of Grand Strategy & International Security.** (3) (Prerequisite: Completion of any 1000-level history course). Three hours seminar. A discussion of the historic literature of grand strategy and key events in the history of international relations.

**HI 4223/6223. Intelligence Gathering in the 20th Century.** (3) (Prerequisite: Completion of any 1000-level history course or consent of instructor). Three hours lecture. A discussion of myth/reality of intelligence gathering and its use as a military and diplomatic tool.

**HI 4233/6233. American Military History.** (3) (Prerequisites: Completion of any 1000-level history course). Three hours lecture. A survey of the military history of the United States from colonial times to the present.

**HI 4243/6243. American Life and Thought.** (3) Three hours lecture. A survey of the changing lives and ideas of Americans from colonial to modern times. Family life, religion, recreation, dress, communities, social theories, medicine.

**HI 4253/6253. Religion in America.** (3) (Prerequisite: Completion of any 1000 level history course). Three hours lecture. Surveys history of religion in America, emphasizing interaction with social and political developments. (Same as REL 4253/6253).

**HI 4263/6263. America’s Viet Nam War.** (3) (Prerequisite: Completion of any 1000 level history course). Three hours lecture. Analysis of the U.S. conduct of Viet Nam War including topics such as: Cold War context, presidential decision-making, military doctrine, domestic opposition, and legacy.

**HI 4273/6273. Women in American History.** (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A study of the economic, political, and social activities of women in American history. Emphasis on Southern women.

**HI 4283/6283. History of Southern Women.** (3) Three hours lecture. The lives and images of women in the South from colonial times to the present. Native American, African-American, and European-American women to be studied.

**HI 4293/6293. History of Gender and Science.** (3) Three hours seminar. Historical survey of scientific research on sex, the role of gender in the culture of science, and the contributions of women to scientific practice.

**HI 4303/6303. The Old South.** (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. Development of the Old South from colonization through the time of the Civil War.

**HI 4313/6313. The New South.** (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. Southern life from Reconstruction times to the present.
HI 4323/6323. The American West. (3) (Prerequisites: Completion of any 1000-level history course). Three hours lecture. A survey of the western frontier in American history from colonial times to 1900.

HI 4333/6333. Native American History to 1830. (3) (Prerequisite: completion of any 1000-level history course). Three hour lecture. Native American history to 1830, concentrating on the theme of survival and adaptation to changes wrought by contact with European peoples.

HI 4363/6363. African-American History and Culture. (3) (Prerequisite: Completion of any 1000 level history course). African-Americans from their African origins to the present, emphasizing black-white relations in the making of America. (Same as AAS 4363.)

HI 4373/6373. History of Modern Civil Rights Movement. (3) (Prerequisite: Completion of any 1000 level history course). Three hours lecture. A history of the Black struggle for equality in the United States between 1930 and 1970. (Same as AAS 4373.)

HI 4383/6383. Native American History Since 1830. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. Study of American Indians from the present with emphasis on the loss of Indian autonomy and the struggles to regain it.

HI 4393/6393. Rural America. (3) Examines the transformation and cultural significance of rural America from the colonial era to the early 21st century.

HI 4403/6403. The Ancient Near East. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A survey of the civilization of Mesopotamia, Egypt, and Syria-Palestine from prehistoric times to the end of the Persian period. (Same as MEC 4403/6403 and REL 4403/6403).

HI 4493/6493. Terrorism in America. (3) Three hours lecture. Survey of the impact of domestic and international terrorism on American politics, society, and foreign policy since 9/11 and the Civil War.

HI 4583/6583. China Since 1800. (3) (Prerequisite: Completion of any 1000-level history course or consent of instructor). Three hours lecture. China’s tumultuous centuries of imperial decline, foreign assault, and nationalist and communist revolutions. Cultural and social transformations and the quest for institutional and economic modernization.

HI 4593/6593. Japan Since 1600. (3) (Prerequisite: Completion of any 1000-level history course or consent of instructor). Three hours lecture. Examines the major political, cultural, economic, military and diplomatic events that have brought Japan from sheltered feudalism to international preeminence.

HI 4603/6603. Medieval Civilization. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. An intensive study of medieval institutions and culture.

HI 4613/6613. History of the Soviet Union. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. The political, social, cultural, and economic development of the Soviet Union from its pre-Revolutionary origins to its collapse in 1991.

HI 4643/6643. Renaissance and Reformation. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. The Renaissance and its relation to religion, politics, and social life; origins of the Reformation movement and its impact on 16th and 17th century life.

HI 4653/6653. The History of Science and Technology. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. Science and technology from Newton to the present, emphasizing the relationship between scientific innovation and technological application.

HI 4673/6673. Europe, 1789-1914. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A study of the political, economic, and intellectual foundations of nineteenth century society.

HI 4683/6683. Europe: The First World War to Hitler. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. European development from the beginning of the First World War to the beginning of the Second World War.

HI 4693/6693. Europe: The Second World War to the Cold Market. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. European development from the beginning of the Second World War to the present time.

HI 4713/6713. Tudor and Stuart England. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. The development of English institutions during the Tudor and Stuart periods.

HI 4723/6723. History of Britain Since 1688. (3) Three hours seminar. Historical survey of Britain since 1688 with particular emphasis on political, economic and cultural change and relations between the component nationalities with the United Kingdom.

HI 4743/6743. Evolution of International Politics. (3) Three hours seminar. Historical survey of international politics since the 18th century within its economic, cultural and military context.

HI 4753/6753. History of Russia. (3) (Prerequisite: Completion of any 1000-level history course.) Three hours lecture. The political, social, cultural, and economic development of Russia from Kievan to Soviet times.

HI 4763/6763. History of Modern Germany. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. The history of German institutions in modern times.

HI 4773/6773. History of Modern France. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. The history of French institutions in modern times.

HI 4783/6783. African Civilization to 1800. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. This is a survey course which traces the major developments in Africa to 1880. (Same as AAS 4783.)

HI 4793/6793. Modern Africa. (3) (Prerequisite: Completion of any 1000-level history course or consent of instructor). Three hours lecture. This course traces Africa’s history from 1830 to the present. It discusses how Africa lost and regained its sovereignty and the dilemma of independence. (Same as AAS 4793.)

HI 4833/6833. Colonial Latin America. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A survey of Latin America in the colonial era: geographical setting, native cultures, conquest and colonization, Portuguese and Spanish colonial administration, cultural development.

HI 4843/6843. Latin-American Republics. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. Modern Latin-American republics from the wars of independence to the present day, with special attention to Inter-American relations.

HI 4853/6853. Modern Mexico. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. The political, economic, and social development of the Mexican nation from Independence through the age of dictators to the Great Revolution and its aftermath.

HI 4903/6903. The Far East. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A study of the impact of western civilization on China, Japan, and India in the nineteenth and twentieth centuries.

HI 4983. African Americans and the Law. (3) Three hours lecture. Analysis of the legal and constitutional history of African Americans from the codification of slavery and discrimination in the North to the rise of segregation. (Same as AAS 4983.)

HI 8063. Racism and the Color Line. (3) (Prerequisite: graduate standing and enrollment in the Diversity Certificate program). Three hours lecture. An analysis of race relations and racial inequality in the United States. Designed for online Diversity Certificate program students. (Same as AAS 8603)

HI 8773. Issues in Women’s History. (3) (Prerequisite: graduate standing and enrollment in the Diversity Certificate program). Three hours lecture. An analysis of major issues in American women’s history. Designed for online Diversity Certificate program students.

HI 8793. Race and Cultural Diversity in the Workplace. (3) (Prerequisite: graduate standing and enrollment in the Diversity Certificate program). Three hours lecture. An analysis of concepts, issues, and laws relating to race and cultural diversity in public and private organizations. Designed for online Diversity Certificate program students. (Same as AAS 8793)

HI 8803. Graduate Colloquium. (3) (Prerequisite: Graduate standing). Three hours lecture. Topical focus to be determined by the faculty member conducting the colloquium. (May be taken for credit more than once).

HI 8923. Historiography and Historical Method. (3) (Prerequisite: Graduate standing). Three hours lecture. The writings and interpretations of leading European and American historians; bibliographical aids in history; methods of research; preparation of bibliographies; practice in writing a research paper.

HI 8973. Colloquium in U.S. Environmental and Agricultural History. (3) Three hours lecture. A review of the major themes in the agricultural history and historiography of the United States.

Directed Readings
HI 8103. Readings in Colonial American History. (3)
HI 8113. Readings in U.S. History, 1783-1825. (3)
HI 8153. Readings in U.S. History, 1877-1917. (3)
HI 8163. Readings in Contemporary United States. (3)
HI 8203. Readings in American Diplomatic History. (3)
HI 8233. Readings in American Military History. (3)
HI 8263. Readings in American Economic Developments. (3)
HI 8273. Readings in Women in Southern History. (3)
HI 8303. Readings in the Old South. (3)
HI 8313. Readings in the New South. (3)
HI 8323. Readings in the American West. (3)
HI 8353. Readings in African-American History & Culture. (3)
Hi 8443. Readings in Renaissance and Reformation. (3)  
Hi 8503. Readings in European History, 1600-1789. (3)  
Hi 8523. Readings in European History, 1789-1914. (3)  
Hi 8533. Readings in European History, 1914-Present, (3)  
Hi 8613. Readings in English History, 1485-1714. (3)  
Hi 8623. Readings in English History Since 1714. (3)  
Hi 8753. Readings in Russian History, (3)  
Hi 8763. Readings in the Far East, (3)  

Seminars  
Hi 8813. Seminar in U.S. History Before 1877. (3)  
Hi 8823. Seminar in U.S. History Since 1877. (3)  
Hi 8833. Seminar in Southern History. (3)  
Hi 8853. Seminar in European History Before 1789, (3)  
Hi 8863. Seminar in European History Since 1789. (3)  
Hi 8873. Seminar in History of Science and Technology. (3)  
Hi 8883. US Agricultural History, 1500-2000. (3) Three hours seminar. An intensive study of agricultural and rural development in the United States and its impact on social, economic, and political changes.  
Hi 8893. Seminar in History of Int’l National Security and Internal Safety. (3)  
Hi 8933. Colloquium in Colonial and Revolutionary America. (3) A review of the major themes in the history and historiography of North America for the colonial period through the independence of the United States.  
Hi 8943. Colloquium in U.S. History from 1787-1877. (3) A review of the major themes in the history and historiography of the United States from the ratification of the Constitution to the end of Reconstruction.  
Hi 8953. Colloquium in U.S. History from 1877-1945. (3) A review of the major themes in the history and historiography of the United States from the end of Reconstruction to the end of the World War II.  
Hi 8963. Colloquium in U.S. History from 1945-present. (3) A review of the major themes in the history and historiography of the United States from the end of World War II until the present.  

SHACKOULS HONORS COLLEGE  
Office: 210C Griffiths Hall  
Specialized Honors courses are offered under HON numbers; departmental Honors courses are listed under departmental abbreviations and numbers. The titles of departmental Honors courses clarify their equivalency to regular courses in relation to transfer credits and Core Curriculum and degree requirements. The sections available for honors credit are identified in the MSU Master Schedule each semester.  
HON 1081-2091. Honors Forum. (1) One hour lecture. Weekly meeting of honors students. Discussion led by faculty and/or students on various topics.  
The following course, HON 3183, may be taken only by students who have the consent of the instructor. Since the content of the course will vary from year to year, the student should check with the instructor for more information.  
HON 3183. Interdisciplinary Seminar in the Humanities. (3) An investigation of an interdisciplinary problem or theme in man’s experience. Lectures, readings, discussions, and reports.  
HON 3193, 3198. Internship. (3-8) (Prerequisites: Junior standing or consent of instructor). Individual work experience in a governmental or public agency, under the guidance of an MSU faculty member.  
ADVANCED PLACEMENT CREDIT. (See Index) May be utilized to earn Phase I or II in the Honors College. Honors students may petition to use AP credit for a given subject to meet Honors requirements after successfully completing an MSU honors course in the same subject core area - humanities/fine arts, social sciences, natural sciences, or mathematics. For example: a student with AP credit for Calculus I may petition for six hours of HON credit after completing Honors Calculus II, or a student with AP credit for history may petition for six hours after completing an honors economics, history, psychology, sociology or political science course.  

DEPARTMENTAL HONORS COURSES. Honors sections of departmental courses are identified by the letter “H” before the section number and/or with the word “Honors” in the title of the course. The course numbers are consistent with those listed in the Core Curriculum Requirements (see Index) and in degree program requirements. Honors sections are identified in both the departmental schedule and in the master schedule of the Shackouls Honors College, listed in alphabetical order in the printed schedule and on the university Web site.  
HONORS CREDIT. In a conventional course for which there is not an honors counterpart, usually an upper division course, students may seek the opportunity to do a special project for honors credit. Such initiative yields an agreement between the student and the professor and, ultimately, notation of the successful completion of the project on the student’s transcript.  

School of HUMAN SCIENCES  
Office: 105 Lloyd-Ricks; Interim Director: Walter Taylor  
Professor Cheek, Taylor and Worthy; Associate Professor Miller;  
Assistant Professors Phillips and Wilmoth; Instructors Duncan and Fason  
HS 1711. Professional Protocol. (1) One hour lecture. The essentials of professional protocol and accepted standards of social usage.  
HS 1523. Visual Design in Dress. (3) Three hours lecture. Application of basic art principles to selection and design of clothing; physical, cultural, social, aesthetic, and psychological aspects of dress.  
HS 1701. Survey of Human Sciences. (1) One hour lecture. Introduction to the field of human sciences through a study of its history and the variety of professional careers available.  
HS 1802. Professional Seminar I. (2) Two hours lecture. Overview of individual development and the family life cycle with emphasis on professional opportunities in the field.  
HS 1813. Individual and Family Development through the Lifespan. (3) Three hours lecture. Introduction to individual and family development through the lifespan, conception to death, focusing on social and emotional development, contextual influences on development, and application.  
HS 2203. Science of Food Preparation. (3) One hour lecture. Four hours laboratory. A study of foods and the principles underlying handling and preparation of food products to maintain the highest standard of quality. (Same as FHN 2203).  
HS 2283. Child Health and Nutrition. (3) Three hours lecture. Nutrition requirements during pregnancy and lactation, and of infants and young children; birth defects from metabolic errors; related health of young children. (Same as FHN 2283).  
HS 2293. Individual and Family Nutrition. (3) Three hours lecture. Fundamental principles of human nutrition and the practical application of this knowledge in the selection of adequate diets. (Same as FHN 2293).  
HS 2553. Fashion Merchandising. (3) Three hours lecture. A survey of the entire fashion industry as it relates to fashion merchandising.  
HS 2593. Apparel/Sewn Product Analysis and Evaluation. (3) Two hours lecture. Two hours laboratory. Analysis of design and construction entities that affect cost, consumer perception, consumer satisfaction, marketability and profits of various items of apparel/sewn products.  
HS 2603. Interior Design Fundamentals. (3) Three hours lecture. Introduce a practical approach to the application of interior design in the built environment. (For non-interior design students) (Same as ID 2603).  
HS 2664, Textiles for Interiors. (4) (Prerequisite: CH 1043). Three hours lecture, two hours laboratory. Testing and evaluation of interior textiles, including upholstery, window, wall, and soft floor coverings; bedding; and bath and tabletop products.  
HS 2803. Pre-natal and Infant Development. (3) Two hours lecture. Two hours laboratory. Biological and environmental influences; behavioral and developmental patterns, from the onset of pregnancy to toddlerhood.  
HS 2813. Child Development. (3) (Prerequisite: HS 1813). Two hours lecture. Two hours laboratory. Developmental characteristics of children with emphasis on the early years; implications for care and guidance.  
HS 3303. Consumer Economics. (5) (Prerequisite: MA 1313). Three hours lecture. Economic principles as applied to consumer situations, and the consumer’s relation to the American and world economy.  
HS 3553. Fashion Retailing. (3) (Prerequisites: HS 2553 and either ST 2113 or BQA 2113, or consent of instructor). Two hours lecture. Two hours laboratory. Specific problems, procedures and practices in fashion retailing.  
HS 3563. Visual Merchandising. (3) (Prerequisite: HS 2553 or consent of instructor). Two hours lecture. Two hours laboratory. Principles of window and interior display, individual and group participation in designing and executing displays for commercial and educational purposes.  
HS 3573. Historic Costume. (3) (Prerequisite: Junior Standing). Two hours lecture. Two hours laboratory. Survey of costume from prehistoric to modern times with emphasis on social, cultural, political, and technological changes impacting fashion, preservation, documentation, and exhibition of artifacts.  
HS 3593. Merchandising and Promotion Strategies. (3) (Prerequisite: HS 2553 and junior standing, or consent of instructor). Three hours lecture. A study of fashion presentation techniques and production requirements in the primary, secondary and retail settings.
HS 3673. Environments for Special Needs. (3) (Prerequisite: HS 2613 or consent of instructor). Three hours lecture. Laws, attitudes, conditions, specifications, and environmental issues affecting private and public spaces. (Same as ID 3673).

HS 3803. Child Care Procedures. (3) (Prerequisites: HS 2813). Two hours lecture. Two hours laboratory. Selection of appropriate equipment and supplies; program planning for nursery school and day care centers.

HS 3813. Lifespan Theory. (3) (Prerequisites: HS 1813 or HS 2813). Three hours lecture. An in-depth exploration of human development theories, research and methodology used in the study of individuals across the lifespan.

HS 3823. Designing Child Care Programs. (3) (Prerequisites: HS 2813 and junior standing). Two hours lecture. Two hours laboratory. Designing programs for nursery-age children with emphasis on children’s development characteristics as related to self-concept and learning experiences.

HS 3833. Human Development in the Context of Leisure and recreation. (3) Three hours lecture. Introduces historical, theoretical, and empirical content focused on leisure and recreation as a context for human development across the lifespan.

HS 4193/6193. Social and Cultural Aspects of Food. (3) Three hours lecture. A study of international, regional and religious history, customs, beliefs and other impacts upon food preparation and consumption.

HS 4313/6313. Family Resource Management. (3) (Prerequisite: Junior/Se- nior writing or consent of instructor). Three hours lecture. Decision-making in the family and operation of the household as affected by family values, philosophies, resources, and socio-economic conditions.

HS 4323/6323. Consumer Issues and Policy. (3) (Prerequisite: HS 3303 or consent of instructor). Three hours lecture. An assessment of policies and programs relating to information, product safety, and channels of appeal for the individual, family, and community.

HS 4333/6333. Families, Legislation and Public Policy. (3) (Prerequisites: Junior/senior writing or consent of instructor). Three hours lecture. An examination of the impact of legislation and public policy on the well being of the family with emphasis on policy and family change.

HS 4343/6343. Apparel Design II. (3) (Prerequisite: HS 1533 or consent of instructor). Four hours laboratory. Advanced problems and techniques for clothing construction; creative expression through application of techniques of flat pattern design.

HS 4403/6403. Introduction to Gerontology. (3) (Prerequisites: HS 1813 and junior/senior writing, or consent of instructor). Three hours lecture. An introduction to the dynamics of the aging process and strategies for maximizing life satisfaction during aging.

HS 4424/6424. Teaching Methods in Agriculture and Human Sciences. (4) (Prerequisite: Junior standing in CALS major). Three hours lecture. Two hours laboratory. Planning, implementing, selecting teaching techniques, developing teaching plans; teaching agricultural/human science topics; using instructional technologies; evaluating learner progress. (Same as AIS 4424).

HS 4440/6440. Workshop in Human Sciences. (1-3). This course addresses current issues in human sciences.

HS 4450/6450. Work Experience in Human Sciences Related Occupations. (6) Work experience in two phases of occupational human sciences, development of a program of work, and incorporating the work experience into curricula.

HS 4513/6513. Social-Psychological Aspects of Clothing. (3) (Prerequisite: Three hours course in Sociology or Psychology and junior standing). Three hours lecture. An introduction to the sociological and psychological aspects of wearing apparel; human’s response to and use of clothing as an aspect of behavior at different life stages.

HS 4533. Merchandise Planning and Buying. (3) (Prerequisites: HS 3533 and HS 3573). Three hours lecture. Capstone course in planning, buying and managing inventory in a fashion retail environment.

HS 4563. Intermediate Textiles. (3) (Prerequisite: HS 2523). Two hours lecture. Two hours laboratory. A basic study of dyes, color applications, finishes and physical testing used in manufacturing textiles.

HS 4583/6583. Entrepreneurship for Human Sciences. (3) Three hours lecture. An introduction to the principles and practices of small businesses that have potential for home-based businesses with emphasis on business, marketing, and management skills necessary for operation of these businesses.

HS 4593/6593. Creative Design Techniques. (1) (Prerequisite: HS 1533 or consent of instructor). Two hours lecture. Two hours laboratory. Application of techniques—dyeing, knitting, crochet, embroidery, beading, etc.—for creation and embellishment of garments and accessories. Also utilization of multicultural and historic design inspirations.

HS 4683/6683. Current Housing Problems of Families. (3) (Prerequisite: Junior standing). Three hours lecture. Analysis of current housing problems confronting families, their historical development, government policies and remedial measures.

HS 4701. Internship Placement Seminar. (1) (Prerequisite: Junior standing and consent of instructor). One hour lecture. Preparation for an internship in a chosen specialization.

HS 4702. Human Sciences Senior Seminar. (2) (Prerequisite: Senior standing in Human Sciences). Two hours lecture. Examination of current societal issues and trends using an integrative approach. Emphasis on professional development and effectiveness in Human Sciences.

HS 4710/6710. Study Tour. (1-3) Experiential learning through travel in the United States or abroad focusing on specialized areas of study in human sciences.

HS 4723/6733. Computer-Aided Design for Human Sciences. (3) Two hours lecture. Two hours laboratory. Applications of computer-aided design for interior design, fashion merchandising, child development, human sciences education, consumer economics, foods and nutrition.

HS 4750. Internship. (5-8) (Prerequisite: Minimum of senior standing in major and consent of instructor). Individual work experience in an approved setting under supervision of Mississippi State University faculty.

HS 4763. Apparel, Textiles and Merchandising Internship. (3) (Senior standing, 2.0 GPA and consent of instructor). Individual work experience in an approved apparel, textiles or merchandising related setting under supervision of Mississippi State University faculty.

HS 4803/6803. Parenting. (3) ((Prerequisite: HS 1813 and junior/senior writing, or consent of instructor). Three hours lecture. Study of the child as a part of the family in a dynamic transactional system. Emphasis on economics, stress, practical problems and child services.

HS 4813. Adult Development: The Middle Years. (3) (Prerequisite: HS 1813 or consent of instructor). Three hours lecture. Theory and perspectives on adulthood in contemporary society, adjustment to internal and environmental changes, role structures, supportive networks and public policy issues.

HS 4823/6823. Development and Administration of Child Service Programs. (3) (Prerequisites: HS 2813 and Junior standing, 2.0 GPA and consent of instructor). Two hours lecture. Two hours laboratory. A pre-professional development approach to the special needs of the hospitalized infant, child, and adolescent.

HS 4834/6843. Family Interaction. (3) (Prerequisites: HS 4853 or consent of instructor). Three hours lecture. Interaction within functional families; focus on the family as a system, on diversity and roles, and on effective interactions.

HS 4853/6853. The Family: A Human Ecological Perspective. (3) (Prerequisite: HS 1813 and Junior/senior writing, or consent of instructor). Three hours lecture. An examination of the impact of internal and external factors on the development of individual and family relationships throughout the life cycle.

HS 4866/6866. Consumer Aspects of Aging. (3) (Prerequisite: HS 3303 or consent of instructor). Three hours lecture. Analysis of the decisions, issues and research related to the consumer aspects of aging from a global and national perspective.

HS 4873/6873. Positive Youth Development. (3) (Prerequisite: HS 1813 and Junior/senior writing, or consent of instructor). Three hours lecture. An introduction to the graduate program, faculty research, and effectiveness in Human Sciences. (Same as HDFS 4873). Three hours lecture. An in-depth examination of particular HDFS topics of current interest to faculty and students. Critical evaluation of current research.
INTERNATIONAL BUSINESS

Office: 308 McCool Hall

IB 1001. Introduction to International Business. (1) (Prerequisite: International Business major). Introduction to International Business prepares the entering class academically and professionally for successful performance.

IB 3900. Internship Work. (1-6) (Prerequisite: approval of the International Business Director). Business topics examined by student during work semester. Evaluations are assigned on satisfactory/unsatisfactory basis.

IB 3913. Principles of International Business. (3) (Prerequisites: Senior standing in business or consent of instructor.) An overview of the major forms of international business: Exports and imports, overseas investments, production and marketing operations, licensing, financing and other international business services.

INTERIOR DESIGN

Office: 125 Etherege
Director and Associate Professor Miller; Assistant Professors Crompton and L. Miller; Instructor Carroll

ID 1683. Interior Design Graphics. (3) One hour lecture. Four hours laboratory. Introduction to basic manual drafting and tools/techniques used by interior designers in executing and reading graphic language in two dimensional form.

ID 1694. Interior Design Studio I. (4) (Prerequisite: ID 1683). Two hours lecture. Four hours laboratory. Introduction to the basic principles and elements of design using practical and abstract applications in creative problem solving analyzing spatial form and function.

ID 2103. CAD for Interior Design. (3) (Prerequisite: ID 1683 or consent of instructor). Two hours lecture. Two hours laboratory. Introduction to computer-based design technology as applied in the interior design field.

ID 2203. Rendering. (3) (Prerequisite: Sophomore Standing). Six hours studio. A course dealing with the concepts, techniques, and media used in executing interior and exterior renderings.

ID 2603. Interior Design Fundamentals. (3) Three hours lecture. Introduce a practical approach to the application of interior design in the built environment. (For non-interior design students) (Same as HS 2603).

ID 2615. Interior Design Studio II. (5) (Prerequisite: ART 1123 and ID 1694). Three hours lecture. Four hours laboratory. Introduction to design theory and its application in the development of criteria for interior environments.

ID 2633. Interior Materials, Treatments and Resources. (3) (Prerequisite: HS 2604 or concurrent enrollment). Three hours lecture. Materials, equipment, services and resources available to the interior designer for meeting clients' needs.

ID 3363. 3D CAD/Modeling in Interior Design. (3) (Prerequisite: ID 2103). Two hours lecture. Two hours laboratory. Advanced computer graphic communication for the interior designer for the development of technical and perspective drawings created in presentation formats using 3D imaging.

ID 3603. Digital Design for Interiors. (3) Three hours lecture. Introduce innovative software application programs for interior design students to create graphic presentations, portfolios and digital illustrations of interior elements.

ID 3611. Portfolio Presentation: Methods and Media. (1) (Prerequisites: ID 2615, ART 1213, ART 1133, ID 1683). One hour lecture. Portfolio presentation techniques for the professional practice of interior design.

ID 3614. Interior Design Studio III. (4) (Prerequisite: ID 2615). Two hours lecture. Four hours laboratory. Integration of the total living environment, through the application of the design elements and technical aspects of the field.

ID 3624. Interior Design Studio IV. (4) (Prerequisite: ID 3614). Two hours lecture. Four hours laboratory. Actual practice in the commercial design field through the execution of commercial design problems.

ID 3633. Interior Design Detailing and Construction Documents. (3) (Prerequisite: ID 2103 and ID 3614). Two hours lecture. Two hours laboratory. Systematic integration of building systems, construction, technology, and materials on interior systems. Detailing of these systems is an extension of the design process.

ID 3643. History of Interiors I. (3) Three hours lecture. A survey of furniture styles, ornament, designers, and accessories associated with period interiors from the early Egyptians through 1850.

ID 3653. History of Interiors II. (3) (Prerequisite: ID 3643 or consent of instructor). Three hours lecture. Defining advancement/evolution of design philosophies in furniture and interiors of the late 19th and 20th centuries; addressing presentation skills and techniques for interior design professionals.

ID 3663. Color and Lighting for Interiors. (3) (Prerequisite: ID 2615). One hour lecture. Four hours laboratory. Concentrated study of color and light relationships as they apply to the visual, technical and functional aspects of interior spaces.

Department of INDUSTRIAL AND SYSTEMS ENGINEERING

Office: 260 McCain Engineering Building
Professors Bowden (head), Bullington, Greenwood and Usher; Associate Professors Babski-Reeves, B. Eksioglu, and Jin; Assistant Professors S. Eksioglu and Strawderman; Instructors Dalton

IE 1911. Introduction to Industrial Engineering. (1) Three hours laboratory. Concepts of industrial engineering, emphasizing the total systems approach. Introduction to analysis and design of general and industrial systems.

IE 3121. Industrial Ergonomics Laboratory. (1) (Prerequisite: Undergraduate co-requisite: IE 4613, and IE 3123; Graduate co-requisite: IE 4613). Three hours laboratory. Application of human factors/ergonomics concepts in structured assignments involving data collection, analysis, and report generation. Hands-on experience with sophisticated testing equipment.

IE 3123. Industrial Ergonomics. (3) (Undergraduate Co-requisite: IE 4613, IE 3123; Graduate Co-requisite: IE 4613). Three hours lecture. Analysis of work tasks; ergonomic design principles for manual work design, workplace design, and work environment design; work measurements; and design of wage payment plans.

IE 3323. Manufacturing Processes. (3) (Prerequisites: Grade of C or better in IE 3913, Co-requisite: CHE 3413). Two hours lecture. Three hours laboratory. Manufacturing processes and materials; interrelationship of product design, material properties, and processing methods; robotics and CAM systems; economic factors in material, process, and equipment selection.

IE 4123/6123. Psychology of Human-Computer Interaction. (3) (Prerequisite: PSY 3713 or CSE 4633/6663 or IE 4113/6113 or consent of the instructor). Two hours lecture. Two hours laboratory. Exploration of psychological factors that interact with computer interface usability. Interface design techniques and usability evaluation methods are emphasized. (Same as CSE 4673/6673 and PSY 4743/6743).

IE 4193/6193. Automotive Engineering. (3) Three hours lecture. Fundamentals of automotive engineering, including power units, mechanical systems, electrical systems, and industrial and systems engineering aspects. (Same as CHE 4193/6193, ECE 4193/6193 and ME 4193/6193).

IE 4333/6333. Production Control Systems I. (3) (Prerequisite: Grade of C or better in IE 4613). Three hours lecture. Principles, analysis, and design of production and inventory planning and control. Demand forecasting, aggregated planning, inventory scheduling, production planning and control systems.

IE 4353/6353. Materials Handling. (3) (Prerequisite: Junior or senior standing). Three hours lecture. Analysis and design of materials handling systems and components. Introduction to facilities design.

IE 4733/6733. Automation. (3) Two hours lecture. Three hours laboratory. Introduction to the various technologies used in both design and manufacturing automation.

IE 4513/6513. Engineering Administration. (3) (Prerequisite: Junior or graduate standing in engineering). Three hours lecture. Study of problems confronting the engineering manager. Includes: Organization and communication theory, internal and external relationships and responsibilities, and designing and implementing managerial systems.

IE 4533/6533. Project Management. (3) (Prerequisites: Grade of C or better in IE 4613). Three hours lecture. Use of CPM, PERT, and GERT for planning, managing and controlling projects. Computer procedures for complex networks.

IE 4543/6543. Logistics Engineering. (3) (Prerequisite: IE 4613 and senior or graduate standing. Co-requisite: IE 4733 or MA 4733). Three hours lecture. Analysis of complex logistics networks. Integration or supply, production, inventory, transportation and distribution. Strategies for reducing logistics costs and lead times. Customer-supplier partnerships.

IE 4553/6553. Engineering Law and Ethics. (3) (Prerequisite: Senior standing in engineering). Three hours lecture. The engineer and his relations to the law, to the public, and the ethics of his profession. Includes contracts, patents, copyrights, trademarks, agreements, engineering specification and proposals, insurance.

IE 4573/6573. Process Improvement Engineering. (3) Three hours lecture. Introduction to quality and productivity improvement methodologies and tools. The design and implementation of continuous improvement systems in organizations.

IE 4613/6613. Engineering Statistics I. (3) (Prerequisite: MA 1723). Three hours lecture. Introduction to statistical analysis. Topics include: probability, probability distribution, data analysis, parameter estimation, statistical intervals and statistical inferences.

IE 4623/6623. Engineering Statistics II. (4) (Prerequisite: Grade of C or better in IE 4613). Three hours lecture. Continuation of IE 4613/6613. Introduction to engineering applications of regression, experimental design and analysis, and nonparametric methods.

IE 4653/6653. Industrial Quality Control I. (3) (Prerequisite: IE 4613). Three hours lecture. The theory and application of statistical quality control: statistical process control and statistical acceptance sampling.

IE 4733/6733. Linear Programming. (3) (Prerequisites: MA 3113). Three hours lecture. Theory and application of linear programming: simplex algorithm, revised simplex algorithm, duality and sensitivity analysis, transportation and assignment problems algorithms, integer and goal programming. (Same as MA 4733/6733).

IE 4753/6753. Systems Engineering and Analysis. (3) (Prerequisite: Grade of C or better in IE 3913 and in IE 4613). Three hours lecture. Systems concepts, methodologies, models, and tools for analyzing, designing, and improving new and existing human-made systems.

IE 4773/6773. Systems Simulation I. (3) (Prerequisites: Grade of C or better in IE 4613 and in IE 4934 or equivalent programming course). Three hours lecture. The principles of simulating stochastic systems with an emphasis on the statistics of simulation and the use of Monte Carlo techniques and control systems.

IE 4915. Design of Industrial Systems. (5) (Prerequisite: Grade of C or better in the following courses: IE 3124, IE 3323, and IE 4333). Two hours lecture. Eight hours laboratory. The fundamental procedures and techniques in design of operational systems. Emphasis on the development of sub-systems and total systems.

IE 4923/6923. Six Sigma Methods and Project. (3) (Prerequisites: IE 4623/6623 and IE 4653/6653). One hour lecture. Four hours laboratory. Introduction of six sigma and problem solving methodologies. Application of learned methodologies in selecting, performing and completing a process involvement project.

IE 4934/6934. Information Systems for Industrial Engineering. (4) (Prerequisite: Grade of C or better in IE 1911 or consent of instructor). Three hours lecture.
INS 5303. Employee Benefits. (3) Three hours lecture. A comprehensive study of employee benefit plans available to employers, including the principles and concepts necessary to design and implement successful employee benefit programs.

INS 4503/6503. Enterprise Risk Management. (3) (Prerequisites: INS 3103). Three hours lecture. A study of the principles, concepts and techniques to manage pure risk exposures which organizations face while pursuing their objectives.

INS 8113. Insurance Education. (3). (Prerequisite: Consent of Instructor). Three hours lecture. Examination of insurance principles for high school teachers. Coverage will include a broad array of related topics to help prepare teachers for the classroom.

INTERNATIONAL STUDENT EXCHANGE

Office: 608 Allen Hall

ISE 1103. Introduction to Global Studies. (3) (Prerequisite: Admission into the International Studies Certificate Program) Three hours lecture. This course provides an overview of global studies to broaden students’ cultural perspectives so that they are more prepared to develop a well-rounded world view.

ISE 4100-4200. International Student Exchange. (Prerequisite: Acceptance into the International Student Exchange Program). Grades from the host institution will be transferred and recorded at MSU after each semester the student participates in the program.

ISE 4103. Cross-Cultural Leadership. (3) (Prerequisite: ISE 1103 and completion of an approved study abroad) Three hours lecture. Students will examine cross-cultural leadership styles while culminating their international experiences, demonstrating how these experiences are pertinent to their futures and overall global awareness.

ISE 6100-6200. International Student Exchange. (Prerequisite: Acceptance into the International Student Exchange Program). Grades from the host institution will be transferred and recorded at MSU after each semester the student participates in the program.

Department of KINESIOLOGY

Office: 216 McCarthy Gymnasium

Department Head Brown; Professor Abadic; Associate Professors Gilliland and Lambeth; Assistant Professors: Agiovlasitis, Hale, Kavazis, Knight, Love, Morse, Vickers, Wax and Webb; Instructors Drye, Grant, Funderburk, Joe, Wiley, and Young.

KI 2023. Foundations of Health Education. (3) (Prerequisite: KI 1803) Three hours lecture. Introduction to the discipline of health education. Examination of fundamental concepts and required competencies of the health educator in a variety of settings.

KI 2213. Emergency Health Care. (3) Three hours lecture. Provides students with knowledge and practical experience necessary to prevent, recognize, and provide basic care for injuries and sudden illnesses until advanced medical care arrives.

KI 2603. Medical Terminology. (3) Three hours lecture. A working knowledge of terminology related to the human body through descriptive definitions, practical applications, and medical abbreviations will be developed.

KI 3273. Athletic Training. (3) (Prerequisites: BIO 1004 or 2004). Two hours lecture. Two hours laboratory. Prevention and treatment of injuries prevalent in athletics, physical education and adult fitness programs.

KI 3633. Rehabilitation Techniques in Sport. (3) (Prerequisites: KI 2373). Two hours lecture. Two hours laboratory. Investigate aspects of physiotherapy utilized in treatment of injuries. Course will be supported with assistance of Oktibbeha County Hospital.

KI 8303. Research in Kinesiology. (3) Three hours lecture. Study of the methods and techniques used in kinesiological research. During the course of the semester students prepare a research proposal.

KI 8313. Interpretation of Data in Kinesiology. (3) Three hours lecture. Statistical interpretation of qualitative and quantitative data in the various disciplines of kinesiology.

KI 8710. Internship. (3-6) Opportunity for practical experience in the sport industry, fitness/wellness programs, or clinical rehabilitation settings.

Department of LANDSCAPE ARCHITECTURE

Office: Landscape Architecture Facility

Professors Artunc (Head) and Melby; Associate Professors Brzuszek, Walker, and Wilkerson; Assistant Professors Fulford, Gallo, Schauwecker, and Seymour; Adjunct Faculty Dumas

LA 1153. Introduction to Landscape Architecture. (3) Six hours studio/lab. Acquaints students with the profession’s design vocabulary, application, types of work, and initial experiences dealing with the creation of and evaluation of three dimensional space.

LA 1333. Landscape Systems and Plant Communities. (3) One hour lecture. Four hours laboratory. The nature, scope and relevancy of landscape systems and their respective plant communities as they relate to land planning and landscape architectural design.

LA 1433. Landscape Architecture Creativity. (3) One hour lecture. Four hours studio/lab. An exploration of the creative process and methods of expanding conceptual thinking in designed and built projects.

LA 1533. Presentation Methods and Media. (3) Six hours studio. A review of various types of architectural drawings used in landscape architecture. Emphasizes on basic hand graphic tools and drawing techniques and their use in design.

LA 1701. Introduction to Landscape Contracting. (1) Two hours laboratory. A survey of the construction industry with emphasis on landscape contracting and the roles of principals involved. Opportunities in the landscape industry.

LA 1711. Landscape Contracting Internship I. (1) (Prerequisites: LA 1701; completion of 12 hours; 2.0 GPA). Internship of planned, progressive and supervised experiential learning with a landscape contracting firm.

LA 1803. Landscape Architecture Appreciation. (3) Three hours lecture. A survey of landscape architecture encompassing design, construction, management, maintenance and practice. Emphasis on development and improvement of home, neighborhood and community environment. (For non-majors.)

LA 2334. Plant Specifications For Small Properties. (3) (Prerequisite: PSS 3473). One hour lecture. Six hours studio. Plant selection, design and specifications for small properties in response to environmental conditions and user needs.

LA 2453. Site Inventory and Analysis. (3) One hour lecture. Four hours studio/lab. The collection, presentation, and use of pertinent site related data. Conventional non-technical methods of presentation of data and computer generated formats are considered and analyzed.

LA 2554. Landscape Architecture Design Studio I. (4) (Prerequisites: LA 1153, LA 1223, LA 1333, & LA 1533). Eight hours studio/lab. A landscape architectural design process applied to sustainable site planning. Emphasis on green infrastructure and application of design principles to site design elements.

LA 2644. Construction II: Grading (4). (Prerequisites: LA 2544). Two hours lecture. Four hours studio. Land surveying, landscape architecture grading, roadway design and alignment, basic staking and layout, and earth volume estimation.

LA 2652. Landscape Architecture Precedent Studies. (2) (Prerequisite: LA 2654) On-site travel study to experience and document notable landscape architecture projects, methods of construction, and professional office visits.

LA 2654. Landscape Architecture Design II: Neighborhood Context. (4) (Prerequisite: LA 2554). Eight hours studio. Emphasis on design at the neighborhood scale, including block and street network design.

LA 2701. Landscaped Contracting Seminar I. (1) (Prerequisite: LA 1711). One hour lecture. Weekly seminar to investigate topics related to modern landscape practices experienced in LA 1711 LC Internship I. Formal presentations of internship case studies.

LA 2711. Landscape Contracting Internship II. (1) (Prerequisites: LA 1711, LA 2701, and 2.00 GPA). Internship of planned, progressive and supervised experiential learning with a landscape contracting firm.

LA 3534. Landscape Architecture Construction III - Hydrology. (4) (Prerequisite: LA 2644). Two hours lecture. Four hours studio/lab. Calculations for storm-water management, best management practices, surface and subsurface drainage systems, basic hydrology and erosion and sediment control design and practices.

LA 3554. Landscape Architecture Design III – Small Town/Rural Context. (4) (Prerequisites: LA 2644 and LA 2654). Eight hours studio. Emphasis on design at the Community/Town scale, including place theory and aesthetics.

LA 3603. Design of the Golf Environment. (3) (Prerequisite: LA 1803). Three hours lecture. Defining site development concerns of a golf complex, addressing areas of history, design, construction and maintenance.

LA 3652. Case Studies of Executed Works in Landscape Architecture. (2) (Prerequisite: LA 3654). Special five to ten day on-site observation visit for the study of notable LA projects and construction methods with lectures.

LA 3654. Landscape Architecture Design IV: Urban Design. (4) (Prerequisite: LA 3554) Eight hours studio/lab. Emphasis on urban planning and design, including consideration of urban fabric, building typologies, transit, streetscapes, pedestrian circulation, open space, hydrology, and natural systems.

LA 3701. Landscape Contracting Seminar II. (1) (Prerequisite: LA 2711). One hour lecture. Weekly seminar to investigate topics related to modern landscape practices experienced in LA 2711 LC Internship II. Formal presentations of internship case studies.

LA 3711. Landscaping Contracting Internship III. (1) (Prerequisites: LA 2711, LA 3701, and 2.50 GPA). Internship of planned, progressive and supervised experiential learning with a landscape contracting firm.

LA 3713. Landscape Contracting I. (3) (Prerequisites: ABE 1073 and EG 1513). Two hours lecture. Laboratory. Study of the nature, scope, and application of the varied construction materials used in landscape projects; and, the construction processes related to landscape development.

LA 3721. Landscape Contracting Field Trip I. (1) (Prerequisite: LA 1701). Five to ten day trip to visit landscape contracting firms and observe construction work.

LA 3742. Landscape Architecture Internship. (2) (Prerequisite: Satisfactory completion of semester six of B.A. program with an overall G.P.A. of 3.0 in the Junior Year). Supervised experiential learning with a professional office or private practice.

LA 4344. Landscape Architecture Construction IV. (4) (Prerequisites: LA 3724 or consent of instructor). Two hours lecture. Four hours laboratory. Preparation of landscape architectural construction plans, details, and specifications for outdoor lighting, for irrigation, and for septic systems.

LA 4523/6523. Applications for GIS for Landscape Architects. (3) (Prerequisite: LA 1223 or consent of instructor). One hour lecture. Four hours studio/lab. Applying geographical information systems technology to the practice of Landscape Architecture.

LA 4701. Landscape Contracting Seminar III. (1) (Prerequisite: LA 3712). One hour lecture. Weekly seminar to investigate topics related to modern landscape practices experienced in LA 3712 LC Internship III. Formal presentations of internship case studies.

LA 4721. Landscape Contracting Field Trip II. (1) (Prerequisite: LA 3721). Five to ten day trip to visit with landscape contracting firms and observe completed projects.

LA 4723. Professional Practice of Landscape Architecture. (3) Three hours lecture. Office management, contracting, budgeting, design proposals, supervision of construction contracts, professional liability, and professional ethics.

LA 4724. Landscape Contracting II. (3) (Prerequisites: LA 3713 or LA 4334). Two hours lecture. Four hours laboratory. Analysis of legal, financial, and management aspects of landscape contracts; and quantity surveying, cost estimation, and critical path management of landscape construction projects.

LA 4744. Landscape Contracting IV. (4) (Prerequisite: LA 4724 and PSS 4414). Two hours lecture. Two hours laboratory. Application levels studies of post-construction management practices of landscape projects.

LA 4753/6753. Sustainable Landscape Management. (3) An examination of methods for sustainable land management. Ecological systems, services, and processes providing the foundation for decision-making in land management.

LA 4754. Design V - Regional. (4) (Prerequisite: LA 3654) Eight hours studio. Application of spatial analytical techniques, Geographic Information Systems (GIS), and Low Impact Development (LID) strategies to landscape architecture at the regional scale.

LA 4844/6844. Sustainable Communities. (4) Three hours lecture. Two hours studio/lab. Theory and practices that minimize resource use and pollutant production in the human landscape. (Same as AR 4844/6844).

LA 4854. Landscape Architecture Capstone Studio. (4) (Prerequisites: LA 3544, LA 4723 and LA 4754). Eight hours studio. Emphasis on development of an approved terminal project used to demonstrate competency in proposal development, design process, site planning, detail design and construction detailing.

LA 8512. Landscape Architecture Graduate Studio I. (2) (Prerequisite: admission to the Master of Landscape Architecture). Four hours studio. Emphasis on holistic approaches to sustainable watershed planning and management.

Course deals specifically with prevention of destruction of habitat, biological stress, and hydrologic changes.

LA 8522. Landscape Architecture Graduate Studio II. (2) (Prerequisite: admission to the Master of Landscape Architecture). Four hours studio. Application of spatial analytical techniques and Geographic Information Systems to the execution of landscape planning problems in the Mississippi region.

LA 8532. Landscape Architecture Graduate Studio III. (2) (Prerequisite: second year standing in the Master of Landscape Architecture). Four hours studio. Emphasis on community based planning and design, including consideration of natural resource planning, main street revitalization, open space planning, community design, and small town planning.

LA 8613. Research Methods in Landscape Architecture. (3) Three hours lecture. Application of research methods specific to problems in Landscape Architecture.

LA 8711. Seminar in Watershed Planning and Management. (1) (Prerequisite: admission to the Master of Landscape Architecture program or consent of the instructor). One hour seminar. Examination of major elements of watershed planning and management pertinent to landscape architecture, with particular emphasis on emerging trends in the field.

LA 8721. Seminar in Landscape Management. (1) (Prerequisite: admission to the Master of Landscape Architecture program or consent of the instructor). One hour seminar. Examination of major elements of landscape management pertinent to landscape architecture, with particular emphasis on emerging trends in the field.

LA 8731. Seminar in Community Based Planning. (1) (Prerequisite: second year standing in the Master of Landscape Architecture program or consent of the instructor). One hour seminar. Examination of major elements of community-based planning pertinent to landscape architecture, with particular emphasis on emerging trends in the field.

LA 8741. Seminar in Landscape Architecture Thesis. (1) (Prerequisite: second year standing in the Master of Landscape Architecture program or consent of the instructor). One hour seminar. Preparation of a detailed proposal, selection of the student’s thesis committee, and submission of the proposal to the Graduate Studies Committee for review and approval.

THE LEARNING CENTER

Office: 267 Allen Hall

LSK 0003. Developmental Reading. (3) Three hours lecture. Emphasizes and develops basic reading skills. Offered to students required to enroll in developmental studies. Credit received for this course will not be applicable toward any degree.

LSK 0023. Developmental Studies Laboratory. (3) Six hours laboratory. Computer tutorials and study skills for intermediate algebra, basic English and effective reading. Designed especially for students who have attended the Summer Developmental Program.

LSK 0103. Intermediate Reading. (3) (Prerequisite: Score of 15 to 19 on the reading section of the ACT.) Three hours lecture. Emphasizes and develops intermediate reading skills, including comprehension, vocabulary development, and reading rate. Credit received for this course will not be applicable toward any degree.

LSK 1001. Freshman Seminar. (1) One hour seminar. Multi-disciplined, campus-wide approach to orientation to the university, and strategies for employing personal and university resources.

LSK 1011. Study Skills for College. (1) Development of study principles and skills needed for college.

LSK 1013. Effective Reading. (3) (Designed to prepare a student to comprehend college level reading materials.) Three hours lecture. Comprehension and vocabulary improvement through the use of computer-aided-instruction and directed group activities.

LSK 1023. College Reading and Study Skills. (3) Three hours lecture. Development of reading and study skills needed for college.

LSK 1033. Fundamentals of Achievement. (3) (Restrictions: Specifically for students on academic suspension or students failing to maintain satisfactory academic progress) Three hours lecture. Fundamentals focus is on student behaviors and attitudes that are most consistently identified with achieving success in college including time management, testing, memory, and communication.

LSK 1131. Fundamentals of Success. (1) (Prerequisite: LSK 1033) One hour lecture. The student behaviors and attitudes that were developed in Fundamentals of Achievement are built upon to strengthen the positive academic and life habits created.

LSK 2010. Praxis: Academic Core Enrichment—PACE. (1-3). (Restrictions: Education Majors). One to three variable credit hours lecture. PACE is designed to provide education majors with a thorough review of the basic skills necessary to pass the PRAXIS I Pre-Professional Skills Test in reading, writing, and mathematics.

LSK 2013. Speed Reading. (3) Three hours lecture per week. Development of techniques for increasing rate of comprehension for all types of reading material.
MA 2323. Calculus III. (3) (Prerequisite: Grade of C or better in MA 2725). Three hours lecture. Further methods of integration; parametric equations; vector calculus. Honors section available through invitation.

MA 2743. Calculus IV. (3) (Prerequisite: Grade of C or better in MA 2733). Three hours lecture. Differential calculus of functions of several variables; multiple integration; vector calculus. Honors section available through invitation.

MA 3053. Foundations of Mathematics. (3) (Prerequisite: MA 2723). Three hour lecture. The logical structure of mathematics; the nature of a mathematical proof; applications to the basic principles of algebra and calculus.

MA 3113. Introduction to Linear Algebra. (3) (Prerequisite: MA 2723). Three hours lecture. Vector spaces; matrices; linear transformations; systems of linear equations; characteristic values and characteristic vectors.

MA 3123. Introduction to Statistical Inference. (3) (Prerequisite: ACT Math subcore 24, or grade of C or better in MA 1313). Two hours lecture. Two hours laboratory. Basic concepts and methods of statistics, including descriptive statistics, probability, random variables, sampling distribution, estimation, hypothesis testing, introduction to analysis of variance, simple linear regression. (Same as ST 3123).
Three hours lecture. Rigorous development of the differentiability and related topics in calculus. (Same as ST 4573/6573.)

MA 4533/6533. Introductory Probability and Random Processes. (3) (Prerequisites: MA 3113 and MA 2743). Three hours lecture. Probability, law of large numbers, central limit theorem, sampling distributions, confidence intervals, hypothesis testing, linear regression, random processes, correlation functions, frequency and time domain analysis. (Credit can not be earned for this course and MA/ST 4523/6523.)

MA 4543/6543. Introduction to Mathematical Statistics I. (3) (Prerequisite: MA 2743.) Three hours lecture. Combinatorics; probability, random variables, discrete and continuous distributions, generating functions, moments, special random variables, distributions, independence, distributions of functions of random variables. (Same as ST 4543/6543.)

MA 4573/6573. Introduction to Mathematical Statistics II. (3) (Prerequisite: MA 4543/6543.) Three hours lecture. Continuation of MA/ST 4543/6543. Transformations, sampling distributions, limiting distributions, point estimation, interval estimation, hypothesis testing, likelihood ratio tests, analysis of variance, regression, chi-square tests. (Same as ST 4573/6573.)

MA 4633/6633. Advanced Calculus I. (3) (Prerequisite: MA 2743 and MA 3053). Three hours lecture. Theoretical investigation of functions; limits; differentiability and related topics in calculus.

MA 4643/6643. Advanced Calculus II. (3) (Prerequisite: MA 4633/6633). Three hours lecture. Rigorous development of the definite integral; sequences and series of functions; convergence criteria; improper integrals.

MA 4733/6733. Linear Programming (3) (Prerequisites: MA 3113). Three hours lecture. Theory and application of linear programming; simplex algorithm; revised simplex algorithm; duality and sensitivity analysis; transportation and assignment problem algorithms, integer and goal programming. (Same as IE 4733/6733.)

MA 4753/6755. Applied Complex Variables. (3) (Prerequisite: MA 2743). Three hours lecture. Applications to Taylor and Laurent expansions; Cauchy theorems and integrals; residues; contour integration; introduction to conformal mapping.

MA 4933/6933. Mathematical Analysis I. (3) (Prerequisite: MA 4633/6633 or equivalent). Three hours lecture. Metric and topological spaces; functions of bounded variation and differentiability in normed spaces.

MA 4943/6943. Mathematical Analysis II. (3) (Prerequisite: MA 4933/6933). Three hours lecture. Riemann-Stieltjes integration, sequences and series of functions; implicit function theorem; multiple integration.

MA 4953/6953. Elementary Topology. (3) (Prerequisite: MA 4633/6633). Three hours lecture. Topology of a topological space, metric space, continuity in metric spaces and topological spaces; sequences; accumulation points.

MA 8123. Modern Higher Algebra II. (3) (Prerequisite: MA 8113). Three hours lecture. A continuation of the topics introduced in MA 8113.

MA 8203. Foundations of Applied Mathematics I. (3) (Prerequisites: MA 3113, MA 3253 or consent of instructor.) Three hours lecture. Principles of applied mathematics including topics from perturbation theory, calculus of variations, and partial differential equations. Emphasis of applications from heat transfer, mechanics, fluids.

MA 8213. Foundations of Applied Mathematics II. (3) (Prerequisite: MA 8203). Three hours lecture. A continuation of MA 8203 including topics from wave propagation, stability, and similarity methods.

Courses numbered MA 8273, 8283, 8293 and 8313 have as prerequisites at least one of the courses MA 4633/6633, MA 4153/6153, 4753/6753.

MA 8273. Special Functions. (3) Three hours lecture. Infinite products: asymptotic series, origin and properties of the special functions of mathematical physics.

MA 8283. Calculus of Variations. (3) Three hours lecture. Functionsals: weak and strong extrema; necessary conditions for extrema; sufficient conditions for extremum; constrained extremum; direct methods; applications.

MA 8293. Integral Equations. (3) Three hours lecture. Equations of Fredholm; symmetric kernels; Hilbert-Schmidt theory; singular integral equations; applications; selected topics.

MA 8313. Ordinary Differential Equations I. (3) Three hours lecture. Linear systems of differential equations; existence and uniqueness; second order systems; systems with constant coefficients; periodic systems; matrix comparison theorems; applications and selected topics.

MA 8323. Ordinary Differential Equations II. (3) (Prerequisite: MA 8313). Three hours lecture. Existence, uniqueness, continuation of solutions of nonlinear systems; properties of solutions of linear and nonlinear equations including boundedness, oscillation, asymptotic behavior, stability, and periodicity; application.

MA 8333. Partial Differential Equations I. (3) (Prerequisite: MA 4733/6733 or consent of instructor). Three hours lecture. Solution techniques; existence and uniqueness of solutions to elliptic, parabolic, and hyperbolic equations; Green’s functions.

MA 8343. Partial Differential Equations II. (3) (Prerequisite: MA 8333). Three hours lecture. A continuation of the topics introduced in MA 8333.

MA 8633. Numerical Solution of Systems of Nonlinear Equations. (3) (Prerequisites: MA 4313/6313 and MA 4723/6723). Three hours lecture. Basic concepts in the numerical solution of systems of nonlinear equations with applications to unconstrained optimization.

MA 8843. Numerical Solution of Partial Differential Equations I. (3) (Prerequisites: MA 4313/6313, MA 4323/6323, and MA 4733/6733 or consent of instructor). Three hours lecture. Basic concepts in the finite difference and finite element methods; methods for parabolic, hyperbolic and elliptic equations; analysis of stability and convergence.

MA 8633. Real Analysis I. (3) (Prerequisite: MA 4943/6943). Three hours lecture. Lebesgue measure and Lebesgue integrals; convergence theorems, differentiation and integration.

MA 8643. Real Analysis II. (3) (Prerequisite: MA 8633). Three hours lecture. General measures; the Radon-Nikodym theorem and other topics.

MA 8663. Functional Analysis I. (3) (Prerequisite: MA 8633). Three hours lecture. Hilbert spaces; Banach spaces; locally convex spaces; Hahn-Banach and closed graph theorems; principle of uniform boundedness; weak topologies.

MA 8673. Functional Analysis II. (3) (Prerequisite: MA 8663). Three hours lecture. Continuation of topics introduced in MA 8663.

MA 8713. Complex Analysis I. (3) (Prerequisite: MA 4943/6943 or consent of instructor). Three hours lecture. Series; analytic continuation; Riemann surfaces; theory of residues.

MA 8723. Complex Analysis II. (3) (Prerequisite: MA 8713). Three hours lecture. Theory, boundary; Introduction to Topology I. (3) (Prerequisite: MA 4643/6643 or MA 4953/6953). Three hours lecture. Basic topology; introduction of homotopy and homology groups.

MA 8923. Introduction to Topology II. (3) (Prerequisite: MA 8913). Three hours lecture. Continuation of topics introduced in MA 8913.

MA 8981. Teaching Seminar. (1) One hour lecture. Preparation for service as instructors in mathematics and statistics courses; includes practice lectures and exam preparation. (May be taken for credit more than once.)

MA 9313. Selected Topics in Ordinary Differential Equations. (3) (Prerequisite: MA 8313 and consent of instructor). (May be taken for credit more than once.) Three hours lecture. Topics to be chosen from such areas as Bifurcation Theory, Biological Modeling, Control Theory, Dynamical Systems, Functional Differential Equations, Nonlinear Oscillations, and Quantitative Behavior.

MA 9333. Selected Topics in Partial Differential Equations. (3) (Prerequisite: MA 8333 and consent of instructor). (May be taken for credit more than once.) Three hours lecture. Topics to be chosen from such areas as Bifurcation Theory, Boundary Integral Methods, Evolution Equations, Maximum and Variational Principles, and Spectral Methods.

MA 9413. Selected Topics in Numerical Analysis. (3) (Prerequisite: Consent of instructor). (May be taken for credit more than once.) Three hours lecture. Current topics in Numerical Analysis. The subject matter may vary from year to year.

MA 9633. Selected Topics in Analysis. (3) (Prerequisite: MA 8643 and consent of instructor). (May be taken for credit more than once.) Three hours lecture. Topics will be chosen from areas of analysis of current interest.
ME 1111. Introduction to Mechanical Engineering. (1) (Prerequisite: Freshman standing or consent of instructor). One hour lecture. Introduction to the mechanical engineering curriculum, the profession, and career opportunities. Historical perspective; the support role of the department, college, and university; student roles and responsibilities.

ME 3103. Experimental Measurements and Techniques. (3) (Prerequisites: credit or registration in ME 3523 and a technical junior-level writing course) Two hours lecture. Two hours laboratory. Measurements: their accuracy and usefulness; reporting; uncertainty analysis and design of experiments; data acquisition; measurements of length, area, volume, temperature, pressure, flow, strain and force.

ME 3113. Engineering Analysis. (3) (Prerequisites: CSE 1233, Grade of C or better in MA 3113, MA 3253, and PH 2213). Three hours lecture. Analysis of engineering problems requiring the use of engineering fundamentals and mathematical techniques of analysis with computer applications.

ME 2133. Modeling and Manufacturing. (3) (Prerequisite: Sophomore standing). Two hours lecture. Three hours laboratory. Elementary drafting and design techniques using solid modeling software, introduction to manufacturing options.

ME 3313. Heat Transfer. (3) (Prerequisites: Grade of C or better in EM 3313, MA 2523, and ME 3533 or ME 3513). Three hours lecture. A study of the fundamentals of heat transfer; processes; steady and transient conduction in solids; thermal radiation; and convective processes.

ME 3403. Materials for Mechanical Engineering Design. (3) (Prerequisites: Grade of C or better in CH 1223 and EM 2413, Co-require EM 3213). Three hours lecture. Behavior, testing and processing of engineering materials. Emphasis is placed on the interrelation of design with processing and material selection.

ME 3423. Mechanics of Machinery. (3) (Prerequisites: Grade of C or better in EM 2433 and ME 3113). Three hours lecture. Analysis of mechanisms for motions, velocities, accelerations, and forces.

ME 3513. Thermodynamics I. (3) (Prerequisites: Grade of C or better in CH 1223, MA 2733, and PH 2213). Three hours lecture. Definitions; properties of a pure substance; work and heat; First and Second Laws; entropy; ideal gases.

ME 3523. Thermodynamics II. (3) (Prerequisite: Grade of C or better in ME 3513). Three hours lecture. Mixtures of ideal gases; irreversibility and availability; vapor power cycles; gas power cycles; refrigeration cycles; flow through nozzles and turbine blades; combustion; chemical equilibrium.

ME 3533. Thermodynamics. (3) (Prerequisite: MA 1723). Three hours lecture. Definitions; work and heat; pure substances; fundamental laws; processes; externally reversible cycles; entropy; vapor and gas power cycles; heat transfer.

ME 3613. System Dynamics. (3) (Prerequisites: Grade of C or better in EM 2433, ME 3113, EM 3313, and ECE 3183). Three hours lecture. Mathematical description of mechanical, electrical, hydraulic and pneumatic systems. Transient and frequency response of linear systems.

ME 4113/6113. Professional Development Seminar. (1) (Prerequisite: Senior Standing or consent of instructor). Two hours laboratory. Preparation toward professional licensure, professional development trends, introduction of forensic engineering, impact of engineering on global societal challenges.

ME 4113/6113. Material Selection in Design. (3) (Prerequisite: ME 3403 or equivalent). Three hours lecture. Principles of materials selection related to mechanical design requirements.

ME 4123/6123. Failure of Engineering Materials. (3) (Prerequisite: EM 3213). Three hours lecture. The failure of constituent materials used in real-world case studies is the focus. Experimental and analytical techniques for failure analysis are demonstrated. (Same as CE 4323/6323)

ME 4133/6133. Mechanical Metallurgy. (3) (Prerequisite: ME 3403 or equivalent). Three hours lecture. The mechanical and metallurgical fundamentals of metals are discussed. Mechanical fundamentals cover the stress and strain relationships and metallurgical fundamentals cover the microstructure.

ME 4193/6193. Automotive Engineering. (3) Three hours lecture. Fundamentals of automotive engineering, including power units, mechanical systems, electrical systems, and industrial and systems engineering aspects. (Same as CHE 4193/6193, ECE 4193/6193 and IE 4193/6193).

ME 4223/6223. Mechanical Systems Analysis. (3) (Prerequisites: EM 3413 or ME 3613 and senior standing). Three hours lecture. Fourier methods, shock spectra, signature analysis, relation to specific phenomena and malfunctions; acoustical aids; field measurement analysis; random functions, correlations; mobility and impedance methods.

ME 4301. Thermo-fluids Laboratory. (1) (Prerequisites: ME 3102, EM 3313, ME 3313, ME 3523, a technical junior-level writing course) Two hour laboratory.
ME 8011. Graduate Seminar. (1) Presentation and discussion of research and current mechanical engineering literature by students, faculty, and visiting lecturers. Attendance required for students in Mechanical Engineering Graduate Program.

ME 8144. Transmission Electro Microscopy. (4) (Prerequisite: consent of instructor). One hour lecture. Six hours laboratory. Introduction to TEM including life sciences (tissue) and engineering (Crystalline materials) topics. (Same as EPP 8144)

ME 8223. Inelasticity. (3) (Prerequisite: EM 8113 and EM 8203). Three hours lecture. This course covers plasticity, creep, viscoelasticity, and inelastic behavior in relation to microstructure-property relations, constitutive modeling at different length scales, and computational simulations. (Same as CE 8323)

ME 8313. Conductive Heat Transfer. (3) Three hours lecture. Closed form analytical and approximate numerical solutions to one, two, and three dimensional steady-state and transient problems in conduction heat transfer.

ME 8333. Convective Heat Transfer. (3) Three hours lecture. Analytical and empirical methods of solution of problems in laminar and turbulent, natural and forced convective heat transfer. Stability; thermal boundary layer techniques; multiphase systems.

ME 8353. Advanced Energy Conversion. (3) (Prerequisite: Graduate standing in Mechanical Engineering or consent of instructor.) Three hours lecture. Physical process in advanced energy conversion technologies, with practical application to devices/energy cycles. Emphasis on fuel cells, photovoltaics, and related materials engineering issues.

ME 8363. Computational Heat Transfer. (3) (Prerequisite: Consent of Instructor). Three hours lecture. Application of numerical techniques to elliptic and parabolic problems in engineering heat transfer and fluid flow. Discretization techniques; linearization; stability analysis. (Same as ASE 8363).

MEC 2233. Introduction to Old Testament Archaeology. (3) Three hours lecture. A survey of the Old Testament in the light of archaeological research. This approach is chronological-historical-archaeological. (Same as REL 2233)

MEC 3473. Islam. (3) A survey of Islamic history, beliefs and practices, law, theology, philosophy, and mysticism. (Same as REL 3473)

MEC 3540. Archaeological Travel and Participation Program. (1-6) Participation in excavations in the Near East and related lecture program. (Same as AN 3540 and REL 3540).

MEC 3553. Near Eastern Archaeology. (3) Three hours lecture. Introduction to the contributions made by archaeological research to ancient Near Eastern history and prehistory, with special emphasis on the Syro-Palestinian area. (Same as AN 3553 and REL 3553).

MEC 4403/6403. The Ancient Near East. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A study of the origins and development of civilizations in Mesopotamia, Egypt, and Syria-Palestine from prehistoric times to the end of the Persian period. (Same as HI 4403/6403 and REL 4403/6403).

Department of MANAGEMENT and INFORMATION SYSTEMS

Office: 302 McCool Hall
Professors Barnett, Chrisman, Lehman, A. Pearson, R. Pearson (Head), Shim, Spencer, Taylor, and Warkentin; Associate Professor Kellermans, Long, Otondo, and Templeton
Assistant Professors Holt, Maret, Marler, Sainsbury and Vardaman

MGT 3114. Principles of Management and Production. (4) (Prerequisites: EC 2113, BQA 2113, and junior standing). Four hours lecture. Management principles in better organizations including planning, organizing, leading, and controlling as well as the purposes, methods, tools, and procedures of production management.

MGT 3213. Organizational Communications. (3) (Prerequisites: EN 1113 and junior standing). Three hours lecture. Application of communication principles through preparation of effective documents and presentations. Includes study and application of team communication, multicultural communication, technology usage, and ethical considerations.

MGT 3323. Entrepreneurship. (3) (Prerequisite: EC 2123 or consent of instructor). An introduction to the processes involved in owning and managing a business. Includes the entrepreneurial activities normally associated with starting and operating a business.

MGT 3333. Field Studies in Entrepreneurship. (3) (Prerequisite: MGT 3323 or consent of instructor). Three hours lecture. Students, working in groups under the direction of their professor, will assess the problems of an embryonic or operating entrepreneurial organization and recommend appropriate solutions.

MGT 3413. Production Management. (3) (Prerequisite: MGT 3114 and BQA 2113). Three hours lecture. Purposes, methods, tools, and procedures of production/operations management: systems used in large and small firms.

MGT 3813. Organizational Behavior. (3) (Prerequisites: MGT 3114). Three hours lecture. Study of behavioral theories used by managers to assist them in better understanding, anticipating, and influencing behavior in an organizational setting.

MGT 3823 Socially Responsible Leadership. (3) (Prerequisite: Junior-level academic standing). Three hours lecture. Study of leadership in organizations, with emphasis on the ethical challenges facing leaders and the impact of leaders' behavior on followers, organizations, and organizational stakeholders.

MGT 4153. Management Seminar. (3) (Prerequisite: Senior standing). Presents for analysis, discussion, and solution case-problems of actual situations met in day-to-day operation of business enterprises which require managerial action.

MGT 4533. Advanced Human Resource Management. (3) (Prerequisite: MGT 3513 or consent of instructor). Three hours lecture. Study of problems in the field of human resource management emphasizing development of the ability to analyze problems and to apply management fundamentals to human resource.

MGT 4543. Compensation Management. (3) (Prerequisite: MGT 3513). Three hours lecture. Compensation fundamentals, practices, and problems including wage level determinants, wage & salary structures, merit rating, methods of wage payments, fringe benefits, & controls.

MGT 4563. Staffing in Organizations. (3) (Prerequisites: MGT 3114 and MGT 3513). Three hours lecture. Study of the staffing function in organizations, with emphasis on human resource planning, recruitment and selection.

MGT 4713. Quality in Organizations. (3) (Prerequisites: MGT 3114). Three hours lecture. An introduction to theories and tools associated with quality management in organizations. Considers the managerial, employee, organizational, and cultural changes required to enhance quality.

MGT 8063. Survey of Management. (3) (Prerequisite: Graduate standing). Three hours lecture. Survey of management principles and techniques including: objective, policies, functions, leadership, organization, and production control procedures and systems as applied to all fields of business.

MGT 8111. Human Resources Issues. (1) (Prerequisite: MGT 8063 or equivalent). One hour lecture. Survey of nature and influences of human resource management in organizations. Case studies are used to apply and reinforce theory.

MIDDLE EASTERN CULTURES

Professor and Head Jacobs; Associate Professor Hardin
Office: 204 Cobb Institute of Archaeology

MEC 2233. Introduction to Old Testament Archaeology. (3) Three hours lecture. A survey of the Old Testament in the light of archaeological research. This approach is chronological-historical-archaeological. (Same as REL 2233)

MEC 3473. Islam. (3) A survey of Islamic history, beliefs and practices, law, theology, philosophy, and mysticism. (Same as REL 3473)

MEC 3540. Archaeological Travel and Participation Program. (1-6) Participation in excavations in the Near East and related lecture program. (Same as AN 3540 and REL 3540).

MEC 3553. Near Eastern Archaeology. (3) Three hours lecture. Introduction to the contributions made by archaeological research to ancient Near Eastern
MG 8112. Leadership Skills for Managerial Behavior. (2) (Prerequisite: MGT 8063 or MGT 3114 or equivalent). Two hours lecture. Survey of major behavior tools used by managers to help them understand and influence behavior in an organizational setting.

MG 8122. Business Consulting Project. (2) (Prerequisite: MGT 8121 or equivalent). Two hours lecture. A group-based, consulting project on strategic issues currently facing a participating organization. (Prerequisites: BQA 8123 Strategic Business Consulting, TQM 8133, TQM 8141, and/or MGT 1112). A group-based, consulting project on strategic issues currently facing a participating organization. Two hours lecture. A group-based, consulting project on strategic issues currently facing a participating organization.

MG 8213. Graduate Seminar in Communications. (3) (Prerequisite: MGT 3114). Three hours lecture. Communication orientation to the managerial function. Includes study of verbal and nonverbal communication, persuasion, semantics, upward, downward and horizontal communication, communication skills, and communication programs.

MG 8413. Operations Research Problems. (3) (Prerequisites: BQA 8443 and MGT 4413 or consent of instructor). Three hours lecture. Survey of major quantitative and operations research techniques useful in business decision-making, planning, and control, practice in model formulation and solution using the computer.

MG 8613. Managing in the Global Business Environment. (3) Three hours lecture. Analysis of the global environmental elements which impact and are impacted by organizations: global politics and economics, culture, international competition, natural resources, technology.

MG 8813. Organizational Behavior. (3) Three hours lecture. A study of the major behavioral theories and technologies as they relate to an organizational setting. Theory and research in the major organizational behavior areas will be emphasized.

MG 8823. Organization Development. (3) (Prerequisite: MGT 3114). Study of the ways organizations can better adapt to the challenges of a modern society. The focus is on innovation, change, and action-oriented research.

MG 9143. Development of Management Theory. (3) (Prerequisite: Approval of instructor). Three hours lecture. Doctoral Seminar. A survey analysis and synthesis of the classical idea which have influenced the development of management and current management theory.

MG 9533. Seminar in Human Resource Management Literature. (3) (Prerequisite: Approval of instructor). Three hours lecture. Doctoral Seminar. A survey analysis and synthesis of the classical idea which have influenced the development of management and current management theory.

MG 9813. Seminar in Organizational Behavior. (3) (Prerequisite: Approval of instructor). Three hours lecture. Doctoral Seminar. A survey analysis and synthesis of the classical idea which have influenced the development of management and current management theory.

MG 9913. Seminar in Strategy Formulation. (3) (Prerequisite: Approval of instructor). Three hours lecture. Doctoral Seminar. A survey analysis and synthesis of the classical idea which have influenced the development of management and current management theory.

MG 9933. Seminar in Strategy Implementation. (3) (Prerequisite: Approval of instructor). Three hours lecture. Doctoral Seminar. A survey analysis and synthesis of the classical idea which have influenced the development of management and current management theory.

MKT 2211. PGM Level I Seminar. (1) (Prerequisite: enrollment in the PGM program or permission of instructor). One hour lecture. This course introduces the PGM program and helps students work through Level I checkpoint material as designated by the PGA of America.

MKT 2221. Golf Professional Development I. (1) (Prerequisite: Enrollment in the PGA Golf Management program or consent of instructor). Two hour lab. Introduction to PGA PGM program course materials. Practical applications of golf tournament operations; introduction to teaching golf and golf club performance; and customer relations material.

MKT 2311. PGM Level II Seminar. (1) (Prerequisite: completion of Level I of the PGA of America requirements or permission of the instructor). One hour lecture. This course introduces the PGM program and helps students work through Level II checkpoint material as designated by the PGA of America.

MKT 2231. Golf Professional Development I. (1) (Prerequisite: Completion of MKT 2221). One hour lecture. This course prepares students for creating, administering, and evaluating golf tournaments. Students will also be introduced to golf car fleet management.

MKT 2241. Golf Professional Development II. (1) (Prerequisite: Completion of MKT 2231). One hour lecture. This course introduces students to business planning, financial forecasting, and budgeting as it relates to golf operations. Students will also be introduced to strategies in dealing with customers.

MKT 2251. Golf Form and Technique Analysis. (1) (Prerequisite: Completion of MKT 2241 and completion of PGA PGM Level 1). One hour lecture. Study of the golf swing, developing methods to improve a golfer’s playing ability, and managing a teaching operation.

MKT 3013. Principles of Marketing. (3) (Prerequisite: junior standing). Three hours lecture. A general survey of the functions, processes, institutions and costs in distribution of goods and services from producers to users.

MKT 3213. Retailing. (3) (Prerequisite: MKT 3013 and Junior standing). Three hours lecture. Survey of the nature, procedure and results of trade at the retail level.

MKT 3513. Marketing Internship. (3) (Prerequisites: Junior standing and MKT 3013). Students will work with an approved business as an intern. Course available only on MSU-Meridian campus.

MKT 3933. International Marketing. (3) (Prerequisites: MKT 3013, and senior standing in business/marketing.) Three hours lecture. Study of the marketing function in the global marketplace, including the techniques and strategies required when marketing in various cultural, economic, legal and political environments.

MKT 4033. International Transportation. (3) Three hours lecture. Understanding the role of transportation in global logistics and global economy.

MKT 4113. Personal Selling. (3) (Prerequisite: Junior standing). Three hours lecture. Psychology of personal selling; planning and presentation; the sales approach; the interview; closing the sale.

MKT 4123. Advertising. (3) (Prerequisite: MKT 3013 or consent of instructor). Three hours lecture. A course dealing with the role of advertising in society, the relation of advertising to other business activity, and the use of advertising as communication.

MKT 4143/6143. Sales Management. (3) (Prerequisites: MKT 3013 and MKT 3114 or MKT 8097). Three hours lecture. Application of scientific management to the selling and distribution of consumer and industrial goods.

MKT 4213/6213. Internet Marketing. (3) (Prerequisite: MKT 3013 or MKT 8097). Three hours lecture. Introduction to practical marketing use of Internet technologies, including basic principles, impact on business and society, and strategic implications.

MKT 4233/6233. Golf Merchandising Management. (3) (Prerequisite: PGM Major, MKT 3213). Three hours lecture. Development of marketing strategies for the organization, operation, and maintenance of operations in the golf shop and golf course environment.

MKT 4313/6313. Physical Distribution Management. (3) (Prerequisites: BQA 2113 and MKT 3013). Functions of physical distribution in business management; analysis of shippers, distribution problems in relation to carrier types, services and functions; methods of reducing distribution costs, use of internal and external data in warehouse and factory location; study of rate of structure and rate changes.

MKT 4333. International Supply Chain Management. (3) Three hours lecture. Analysis of supply chains and the importance to the global economy.

MKT 4413. Consumer Behavior. (3) (Prerequisite: MKT 3013). A study of the nature and dynamics of consumer markets, and the significance of these markets to marketing executives.

MKT 4513. Resort-Convention Marketing. (3) (Prerequisite: MKT 3013). Three hours lecture. A study of marketing problems unique to resorts and convention centers. Special emphasis is placed on quantitative techniques for pricing, services, event booking, and positioning. Course available only on MSU-Meridian campus.

MKT 4533. Marketing Research. (3) (Prerequisites: BQA 3123 and MKT 3013). Three hours lecture. Study of modern marketing research techniques and their applications. Scope and purpose of marketing research: planning of surveys; collecting and analysis of data; preparation of reports.

MKT 4613. Services Marketing. (3) (Prerequisite: MKT 3013). Three hours lecture. A study of the unique problems associated with the marketing of services and of alternative strategies with which to improve service marketing effectiveness.

MKT 4813. Marketing Management. (3) (Prerequisites: Marketing Graduating Senior). Marketing from managerial viewpoints: critical analysis of functions of marketing opportunity assessment, marketing planning and programming, marketing leadership and organization, evaluating and adjusting marketing effort.
MKT 8072. Survey of Marketing. (2) (Prerequisite: Graduate standing; EC 8043, equivalent or concurrent enrollment). Two hours lecture. Survey of product, price, promotion, and distribution decisions in for-profit and non-profit settings; external environmental factors affecting marketing decisions; focus on strategic decision making.

MKT 8153. Strategic Marketing Management. (3) (Prerequisites: MKT 3013 or MKT 8072 or equivalent). Three hours lecture. Market strategic analysis, research and planning necessary to effectively match marketing strategies with changing macro, micro and organizational environments.

MKT 8313. Marketing Policies. (3) (Prerequisite: MKT 3013). Three hours lecture. A graduate survey of marketing focused on the analysis and planning necessary to effectively match marketing programs with competitive, economic, social, political and ethical environments.

MKT 8323. Problems in Marketing. (3) (Prerequisite: MKT 8112 or equivalent). Seminar. Identification of current marketing problems and the specification, evaluation and modification of strategies for their resolution, with emphasis on the use of conceptual modeling.

MKT 8333. Seminar in Marketing—Pricing and Product Strategies. (3) (Prerequisite: MKT 8313). Intensive analysis of pricing and product strategies as key functional marketing variables. Emphasis on understanding traditional military leadership values.

MKT 8333. Seminar in Marketing—Promotion and Distribution Strategies. (3) (Prerequisite: MKT 8313). Intensive analysis of promotion and distribution strategies as key functional marketing variables. Emphasis on understanding traditional military leadership values.

MKT 8533. Research Design and Execution. (3) (Prerequisite: Consent of instructor). Introduction, designing and executing valid quantitative research projects, developing valid, reliable data collection instruments, correctly analyzing, interpreting data. Wide-range applicability. Master-doctoral-level.

MKT 8543. Quantitative Marketing Seminar. (3) (Prerequisites: MKT 8131 and BQA 8443 or consent of instructor). Development of marketing strategy and the solution of marketing problems using quantitative methods.

MKT 9333. Advanced Marketing Theory. (3) (Prerequisite: MKT 8313). Seminar. A critical examination of the evolution of marketing concepts, terminology, principles, and theory, through analysis of the literature in the field.

MILITARY SCIENCE

Office: 2nd Floor, YMCA Building

MAJ Cardone, MAJ Bowman, MAJ Harbor, CPT Anthony, ILT Guadagno, MSG Wood, SFC Minor

MS 1112. Introduction to ROTC. (2) One hour lecture. Two hours laboratory. Increases self-confidence through team study and activities in basic drill, physical fitness, rappelling, first aid, and basic marksmanship. Students learn fundamental concepts of leadership.

MS 1122. Introduction to Leadership. (2) One hour lecture. Two hours laboratory. Applies principles of effective leadership, develops communications skills to improve individual performance and group interaction, and relates organizational ethical values to the effectiveness of leaders.

MS 2113. Advanced Leadership. (3) Two hours lecture. Two hours laboratory. Applies leadership and problem-solving principles to complex case studies/simulations. Examines principles of subordinate motivation and organizational skills.

MS 2123. Tactics and Office Skills. (3) Two hours lecture. Two hours laboratory. Introduces basic tactics. Examines national and Army values. Applies principles of ethical decision-making. Examines the legal and historical foundations, duties and functions of officers.

MS 2256. Introductory Leadership Course. (6). (The equivalent of MS 1112, MS 1122, MS 2122; or MS 1113 and MS 2223). Summer leadership training course designed to introduce students to all facets of the military with a focus on understanding traditional military leadership values.

MS 2523. Military Leadership I. (3). Three hours lecture. A study of leadership skills and concepts. This course is designed for students who are not pursuing a military commission. (Same as AS 2523).

MS 2523. Military Leadership II. (3). Three hours lecture. A study of leadership skills and concepts. This course is designed for students who are not pursuing a military commission. (Same as AS 2523).

MS 3113. Advanced Military Skills I. (3) (Prerequisites: MS 1112, MS 1122, MS 2122, and MS 2112 or instructor’s consent.) Fall semester. Three hours lecture. Two hours laboratory. Detailed instruction on problem solving, squad offensive and defensive tactics, to include specialized operations. Additional instructional materials for specialized operations orders.

MS 3123. Advanced Military Skills II. (3) (Prerequisites: MS 1112, MS 1122, MS 2112, MS 2122, MS 3113 or instructor’s consent.) Spring Semester. Three hours lecture. Two hours laboratory. Advanced instruction on platoon tactical operations and small unit patrolling. Discussion on the operation and employment of weapons in the platoon.

MS 3376. Advanced Leadership Course. (6) (Prerequisite: MS 3113 and MS 3123). Summer leadership training course designed to train and to evaluate cadet’s leadership ability and officer potential. (Summer)

MS 4114/6114. Leadership Challenges and Goal-Setting. (4) (Prerequisite: Military Science Senior Status or consent of instructor). Three hours lecture. Three hours laboratory. Plan, conduct and evaluate activities of the ROTC organization. Develop confidence in skills to lead people and manage resources. Apply Army policies and programs. (Fall)

MS 4124/6124. Transition to Lieutenant. (4) (Prerequisite: Military Science Senior Status or consent of instructor). Three hours lecture. Three hours laboratory. Theory and practice of the laws of war, leadership, and resolving ethical problems.

Department of MUSIC

Music Building

Professors Brown (Head), Damm, Edwards-Henry, and Johns; Associate Professors Human and Sebb; Assistant Professors Aarhus, Huff, Baker, Taylor, Peterson, Patilla, Sobaskie and Wascoe;

Instructors Falcone, Lance and Murphy

Music

MU 1003. Fundamentals of Music Theory. (3). Three hours lecture. Development of skills for music reading, writing, listening, and analyzing. Topics will include pitch, rhythm, meter, scales, and basic harmony.

MU 1010. Recital Hour. (0) Minimum one (1) hour weekly. Performance and critique experiences in applied music. Required for music majors.

MU 1103. African American Music. (3) Three hours lecture. A study of African musical and cultural traditions with focus on the impact of these traditions on the development and advancement of African American Music. (Same as AAS 1103.)

MU 1111-1121. Piano Class. (1) Two hours laboratory. Beginning piano for non-music majors.

MU 1113. History and Appreciation of Music. (3) Three hours lecture. Historical development of music and the composers of the different eras; individual investigation of related special topics; individual and directed listening to musical examples.

MU 1131. Voice Class. (1) Two hours laboratory. Class study of Voice Production.

MU 1141. Seminar for Voice Majors. (1) One hour seminar. Acquiring the skills to pronounce and sing vocal text correctly in various languages by the use of the International Phonetic Alphabet (IPA). Music education majors only.

MU 1162. Music History I. (2) Two hours lecture. An introduction to musical styles and an intensive study of the music and composers of the Medieval and Renaissance periods, emphasizing listening and score-study. (Primarily for music majors.)

MU 1211. Guitar Class. (1) Two hours laboratory. Class study of guitar-playing techniques at the beginning level.

MU 1413. Music Theory II. (3) Three hours lecture. Further elements of harmony, including seventh-chords, non-chord tones, chromatic vocabulary. Small forms. Co-requisite: MU 1521 or consent of instructor.

MU 1521. Ear Training II. (1) Two hours laboratory. Aural identification, singing and dictation of diatonic melodies, triads, simple intervals and rhythms. Co-requisite: MU 1413 or consent of instructor.

MU 2011. Third Year Woodwind Ensembles. (1) (Audition required). One to five rehearsals per week. The study and performance of significant woodwind literature. May be repeated for credit more than once.

MU 2111-2121. Piano Class. (1) Two hours laboratory. Beginning piano for instrumental and vocal music majors.

MU 2322. Music History II. (2) (Prerequisite: Grade of C or better in MU 1162 or permission of instructor). Two hours lecture. An intensive study of the music and composers of the Baroque and Classical periods, Monteverdi through Beethoven, emphasizing listening and score-study. (Primarily for music majors.)

MU 2323. Music History III. (3) (Prerequisite: Grade of C or better in MU 2322 or permission of instructor). Three hours lecture. An intensive study of Nineteenth and Twentieth Century Western Art music and composers and music of non-Western cultures, emphasizing listening, score-study, writing and speaking. (Primarily for music majors.)

MU 2411. Guitar Ensemble. (1) (Audition required). One to five rehearsals per week. The study and performance of guitar ensemble literature. May be repeated for credit more than once.
MU 2511. Marching Band. (1) (Audition required). One to five rehearsals per week. The study and performance of significant marching band literature. May be repeated for credit more than once. (Fall semester only).

MU 2551. Percussion Ensemble. (1) (Audition required). One to five rehearsals per week. The study and performance of significant percussion literature. May be repeated for credit more than once.

MU 2571. Wind Ensemble. (1) (Audition required). One to five rehearsals per week. Study, rehearsal, and performance of select literature from the wind band repertory. May be repeated for credit more than once.

MU 2611. Concert Choir. (1) (Audition required). One to five rehearsals per week. The study and performance of significant choral literature. May be repeated for credit more than once.

MU 2613. Music Theory III. (3) (Prerequisite: Grade of C or better in MU 1413; Co-requisite: MU 2721). Three hours lecture. Chromatic vocabulary, including augmented sixth chords, Neapolitans and modulation. Late Romantic and early 20th Century innovations such as extended tertian chords and substitution chords.

MU 2721. Ear Training III. (1) (Prerequisite: Grade of C or better in MU 1521; Co-requisite: MU 2613). Two hours laboratory. Aural identification, singing and dictation of diatonic melodies with chromatic inflection, seventh chords and rhythms.

MU 2731. Chamber Singers. (1) (Audition required). One to five rehearsals per week. The study and performance of significant choral literature. May be repeated for credit more than once.

MU 2813. Music Theory IV. (3) (Prerequisite: Grade of C or better in MU 2613; Co-requisite: MU 2921). Three hours lecture. 16th century counterpoint, 18th century counterpoint, and 20th century practices. Modes, artificial scales, non-triad chords, complex meter, changing meter, asymmetrical divisions.

MU 2851. Brass Ensembles. (1) (Audition required). One to five rehearsals per week. The study and performance of significant brass literature. May be repeated for credit more than once.

MU 2911. Jazz Ensemble. (1) (Audition required). One to five rehearsals per week. The study and performance of significant jazz ensemble literature. May be repeated for credit more than once.

MU 2921. Ear Training IV. (1) (Prerequisite: Grade of C or better in MU 2721; Co-requisite: MU 2831). Two hours laboratory. Aural identification, singing and dictation of modes, artificial scales, non-triad chords, modulating melodies, compound intervals.

MU 3111-3121. Piano Class. (1) (Prerequisite: grade of C or better in MU 2121 or equivalent or permission of instructor). Two hours laboratory. Intermediate piano for instrumental and vocal music majors; continuation of MU 2121.

MU 3112-3122. Piano Class. (2) (Prerequisite: Prior credit or concurrent enrollment in MU 1213-1413). Two hours laboratory. Functional keyboard skills for music majors who read and play intermediate to advanced-level piano repertoire.

MU 3123 Creative Arts for Elementary and Middle Levels. (3) (Prerequisite: Admission to Teacher Education) Three hours lecture. An exploration of musical and artistic elements utilizing a variety of multicultural music, dance, drama and aesthetic visuals. (Same as EDE 3443)

MU 3201. Collaborative Piano Ensemble. (1) (Prerequisite: late intermediate to early advanced piano skills. Audition required). One to five rehearsals per week. The study and performance of vocal/piano and instrumental piano repertoire. May be repeated for credit more than once.

MU 3333. Orchestration. (3) Three hours lecture. Basic arranging/orchestration techniques for chorus and band. The student will learn the practical ranges of instruments and the creation and maintenance of a positive learning environment in music classrooms.

MU 3412. Conducting. (2) Two hours lecture. The elements of conducting, baton technique, and interpretation.

MU 3442. Advanced Conducting. (2) (Prerequisite: MU 3412 or consent of instructor). One hour lecture. Two hours laboratory. Continuation of MU 3412 with emphasis on interpretation of significant instrumental and choral literature.

MU 4313. Form and Analysis. (3) (Prerequisites: MU 2214/2224). Three hours lecture. A comparative survey for music majors of the principal formal designs found in instrumental and vocal literature with emphasis on compositional techniques and harmonic structure.

Band
Office: Band Hall
Director: Elva Kaye Lance

MU 2511. Marching Band. (1)
MU 2561. Symphonic Band.
MU 2571. Wind Ensemble (1)

Choral
Office: Choral Building
Training in the correct principles of singing. Stress on tone quality, enunciation, pronunciation, even scale and musicianship. Repertoire for each of the choral groups during a four-year period is designed to provide participants with opportunity to study and perform standard and contemporary compositions.

Chorus
MU 2611. Concert Choir. (1)
MU 2631. Starkville Community Choir. (1)

Vocal Ensembles
MU 2731. Chambers Singers. (1)

MU 2811. Woodwind Ensemble. (1)
MU 2411. Guitar Ensembles (1)
MU 2551. Percussion Ensemble. (1)
MU 2851. Brass Ensemble. (1)
MU 2911. Jazz Ensemble. (1)
MU 3201. Collaborative Piano Ensemble (1)

APPLIED MUSIC
Variable credit 1 or 2 hours credit: 3 hours practice per week per hour of credit. May be repeated for credit.

All students of applied music will be given proficiency examinations which will be held at the end of each semester. All Music Majors are required to perform in Student Recital on their major instrument at least once each semester. (Does not apply in the first semester of the freshman year or during the teaching internship semester).

MUA 1010, 2010, 3010. Piano (prerequisites: MU 1213 or composition; MU 1212 or MU 3121 for piano; or consent of instructor)
MUA 1050, 2050, 3050. Voice
MUA 1110, 2110, 3110. Flute
MUA 1150, 2150, 3150. Clarinet
MUA 1210, 2210, 3210. Saxophone
MUA 1250, 2250, 3250. Oboe
MUA 1310. Bassoon
MUA 1350, 2350, 3350. Trumpet
MUA 1410, 2410, 3410. Horn
MUA 1450, 2450, 3450. Trombone
MUA 1510, 2510, 3510. Euphonium
MUA 1550, 2550, 3550. Tuba
MUA 1610, 2610, 3610. Percussion
MUA 1650. Strings
MUA 1710, 2710, 3710. Guitar
MUA 1810, 2810, 3810. Music Composition

(Please note: In MUA 1213 for composition or consent of instructor.) Individual instruction for instruments, voice, or composition. See department guidelines regarding exam procedure and recital performance.

MUSIC EDUCATION
MU 3001. Practicum in Music Education. (1) Two hours laboratory. Observation, discussion, and critique of elementary and secondary school music classroom settings.
MU 3212. Brass Techniques. (2) Two hours lecture. Study of brass winds with emphasis on embouchure, techniques, and teaching problems.
MU 3213. Performance Assessment in Music Education. (3) (Prerequisite: Admission to Teacher Education) Three hours lecture. Limited to music majors. Methods and materials of performance assessment in music education.
MU 3221. Woodwind Class. (1) Two hours laboratory. Study of woodwinds with emphasis on embouchure, techniques, and teaching problems.
MU 3222. Woodwind Techniques. (2) Two hours lecture. Study of woodwinds with emphasis on embouchure, techniques, and teaching problems.
MU 3231. String Class. (1) Two hours laboratory. Study of strings with emphasis on bowing, techniques, and teaching problems.
MU 3242. Percussion Class. (2) Two hours lecture. Detailed study of percussion instruments with emphasis on teaching problems, training materials, and performance literature.
MU 3243. Planning and Managing Learning in Music Education. (3) (Prerequisite: Admission to Teacher Education). Three hours lecture. Study of variables contributing to efficiency and competency for teacher-learner activities and the creation and maintenance of a positive learning environment in music classrooms.
MISSISSIPPI STATE UNIVERSITY

MUE 3262. Instrumental Class. (2) One hour lecture. Two hours laboratory. Instrumental experiences for vocal and piano majors.

MUE 3333. Introduction to Piano Pedagogy. (3) Two hours lecture. Two hours laboratory. Methods, materials, curriculum building, and philosophical bases for teaching beginning piano. Required of all piano pedagogy students.

MUE 4873. Professional Seminar in Music Education. (3) (Prerequisites: Admission to Teacher Education and senior standing). Three hours lecture. A seminar dealing with professional, administrative, and curriculum issues as they relate to music education in the schools.

MUE 4886, 4896. Teaching Internship in Music Education. (6, 6) (Prerequisite: Admission to Teacher Education, minimum GPA of 2.5 overall and in major, and completion of all professional education courses with a C or better). Professional full-day public school teaching experience in two consecutive placements or one 16-week placement in diverse settings under direction of supervising teachers and university supervisor.

PHYSICAL EDUCATION

(For departmental information, see KINESIOLOGY)

PE 1001. Racquetball. (1) Two hours laboratory. Emphasis is on rules, knowledge, skill development, and team tactics necessary to successfully participate in an organized game.

PE 1011. Badminton. (1) Two hours laboratory. Emphasis is on rules, knowledge, skill development, and team tactics necessary to successfully participate in an organized game.

PE 1021. Volleyball. (1) Two hours laboratory. Emphasis is on rules, knowledge, skill development, and team tactics necessary to successfully participate in an organized game.

PE 1031. Tennis. (1) Two hours laboratory. Emphasis is on rules, knowledge, skill development, and team tactics necessary to successfully participate in an organized game.

PE 1041. Aerobics. (1) Two hours laboratory. Assessment, development and maintenance of physical fitness through aerobic exercises to music.

PE 1051. Beginning Karate. (1) Two hours laboratory. The essential principles both physical and psychological will be stressed. Emphasis is placed on organization of karate techniques and training methods.

PE 1061. Fitness Walking/Jogging. (1) Two hours laboratory. An exercise and activity class emphasizing walking and/or jogging to develop and maintain fitness and weight control.

PE 1071. Soccer. (1) Two hours laboratory. Emphasis is on rules, knowledge, skill development, and team tactics necessary to successfully participate in an organized game.

PE 1081. Beginning Golf. (1) Two hours laboratory. Instruction and laboratory experience in the development of individual skills for participation in golf.

PE 1091. Contemporary Dance. (1) Two hours laboratory. A non-major course designed to develop skills in contemporary dance routines.

PE 1101. Karate for Intermediates. (1) (Prerequisite: PE 1051 or prior Karate experience having attained the rank of Yellow Belt). Two hours laboratory. Current events of the American Karate world. Advanced free-fighting and self-defense techniques. Emphasis on form and technique.

PE 1111. Physical Development. (1) Two hours laboratory. This course is designed to develop understanding in the conceptual knowledge of fitness and physical conditioning and maintenance of human wellness. (May be taken up to four times for credit.)

PE 1121. Advanced Physical Development. (1) Two hours laboratory. A continuation of PE 1111. This course is designed to further the understanding in the conceptual knowledge of fitness and physical conditioning and maintenance of human wellness. (May be taken up to four times for credit.)

PE 1141. Fitness and Conditioning. (1) Two hours laboratory. This course provides the student with the necessary cognitive and laboratory experiences to make personal decisions specific to fitness and conditioning. (May be taken up to four times for credit.)

PE 1151. Strength Training. (1) Two hours laboratory. Principles and practices of strength training with particular emphasis on specificity of design and management of load, repetitions, rate of exercise and recovery time.

PE 1161. Modern Dance. (1) (Prerequisite: Consent of Department Head). Two hours laboratory. Laboratory experience including a wide range of fundamental exercises and techniques, movement patterns, and dance choreography.

PE 1181. Training Techniques for Physical Conditioning. (1) Two hours laboratory. Provides the student with theoretical and laboratory experiences in the development of muscular strength, flexibility, and cardiovascular endurance. (May be taken up to four times for credit.)

PE 1202. Teaching Team Sports. (2) One hour lecture. Two hours laboratory. Theory of and participation in non-traditional and traditional team sports. Analysis of skills, discussion of developmental appropriateness, terms, basic rules, and teaching strategies.

PE 1212. Teaching Individual and Dual Sports. (2) One hour lecture. Two hours laboratory. Theory of and participation in non-traditional and traditional individual and dual sports. Analysis of skills, discussion of developmental appropriateness, terms, basic rules, and teaching strategies.

PE 1222. Teaching Lifetime Activities. (2) One hour lecture. Two hours laboratory. Activities, methods and theories within outdoor education. Introduction of concepts, activities, technologies and teaching methods for strength training, aerobic conditioning, fitness and stress management.

PE 1232. Teaching Rhythms. (2) One hour lecture. Instruction, demonstration, skill development, and teaching techniques in the areas of square, folk, and contemporary dance.

PE 1321. History and Appreciation of Dance. (3) Two hours lecture, two hours laboratory. A course designed to acquaint students with the history of dance and to develop a greater sensitivity, appreciation and understanding of this art.

PE 2043. Introduction to Sport Studies. (3) Three hours lecture. This course is designed to familiarize the student with historical, philosophical, educational, psychological, biological, sociological, and career emphases related to sport studies.

PE 3033. Basketball/Football Officials. (3) Three hours lecture. A course designed to qualify officials for major sports officiating in Mississippi. Rules, rules interpretation, and mechanics of officiating for the major sports are covered.

PE 3111. Advanced Military Physical Fitness. (1) (Prerequisites: MS 3113, MS 3123, MS 4113, MS 4123). One hour laboratory. Develops the physical fitness including training officer in the Army through emphasis of individual fitness programs and examination of the role of exercise/fitness. (May be taken up to four times for credit.)

PE 3123. Principles and Methods of Elementary School Health and Physical Education. (3) Admission to Teacher Education required. Three hours lecture. Principles and methods of teaching health and physical education to elementary school children.

PE 3133. Adapted Physical Education. (3) (Prerequisite: Consent of the instructor). Two hours lecture. Two hours laboratory. A study of the psychomotor domain with emphasis on identifying handicapping problems and developing instructional strategies for remedializing these problems.

PE 3153. Methods of Elementary Physical Education. (3) Three hours lecture. Designed to provide students with knowledge and practical experience that will enhance their effectiveness in teaching physical education to pre-school through fifth grade students.

PE 3163. Sport Psychology. (3) Three hours lecture. Analysis of the competitive sport process, with study of how personality and situational variables affect motivation, anxiety, and aggression in sport.

PE 3313. Sport Physiology. (3) (Prerequisites: BIO 1004 or BIO 2004). Two hours lecture. Two hours laboratory. Athletic performance physiology applicable to physical education and coaching. Physiological concepts of sports performance including training methods, bioenergetics, ergogenics, and nutrition for athletes is examined.

PE 3422. Coaching Football. (2) Two hours lecture. Theoretical study of football fundamentals, positions, styles of offensive and defensive rules, signal methods, generalship, and team play.

PE 3432. Coaching Basketball. (2) Two hours lecture. Theoretical study of basketball from a coaching standpoint. Fundamental and team play; methods of teaching fundamentals stressed; team organization.

PE 3452. Coaching Softball and Baseball. (2) Two hours lecture. Theoretical study of softball and baseball fundamentals and coaching techniques.

PE 4163/6163. Principles and Methods of Secondary School Health and Physical Education. (3) (Prerequisite: Senior standing and PE 3153). Admission to Teacher Education required. Three hours lecture. This course is designed to emphasize contemporary teaching methods in all areas of health and physical education in the secondary school.

PE 4173. Tests and Measurements in Health and Physical Education. (3) Admission to Teacher Education required. Three hours lecture. Test construction, test administration, and statistical procedures for evaluating test results in health and physical education.

PE 4283. Sport Biomechanics. (3) (Prerequisites: BIO 1004 or BIO 2004). Three hours lecture. Qualitative and quantitative analyses of selected athletic performance and human movement utilizing observation and other measurement techniques to detect and correct faults limiting sport performance.

PE 4413. Basic Driver and Traffic Safety Education I. (3) (Prerequisite: Valid driver’s license, two years driving experience). Two hours lecture. Two hours laboratory. Critical analysis of traffic accidents, attitude factors, essential knowledge of automobile operations and traffic laws and regulations; laboratory experiences for developing driving skills.

PE 4423. Driver and Traffic Education Methods II. (3) (Prerequisite: PE 4413). Two hours lecture. Two hours laboratory. Professional preparation of college students who plan to teach driver education in secondary schools; methods of teaching and administering programs; scheduling, financing, and public relations.
Department of PHYSICS and ASTRONOMY

Office: 125 Hilburn Hall

Professors Novotny (Head), Afanasjevs, Dunne, Ma, Monts, Su, and Winger; Associate Professors Arnoldus, Clay, Kim and Wang; Assistant Professors Berg, Dutta, Pierce, and Rupak; Adjunct Linder, Luthe, Rykaczewski, Singh, Y. Su, and Tao; Instructors Winter and Worthy

When both PHY 2414 and PHY 2424 are taken at the same community college they will equate to PH 1113, PH 1123 and PH 1133. When both PHY 2514/2515 and PHY 2524/2525 are taken at the same community college they will equate to PH 2213, PH 2223, and PH 2233.

PE 4853. Motor Learning and Skill Analysis. (3) (Prerequisite: PE 3223 and full admission to Teacher Education). Three hours lecture. Designed to provide students with an understanding of how movement is produced and controlled and the principles that underlie the learning of motor skills.

PE 4873. Professional Seminar in Physical Education. (3) (Prerequisites: Admission to Teacher Education and senior standing). Three hours lecture. A seminar dealing with legal, professional, administrative, and curricular issues as they relate to physical education and athletics in the schools.

PE 4883/6883. School Health Education. (3) (Prerequisites: Admission to Teacher Education). Three hours lecture. Preparation for prospective teachers in planning, implementing and evaluating all aspects of comprehensive school health education.

PE 4886, 4896. Teaching Internship in Physical Education. (6.6) (Prerequisites: Admission to Teacher Education, minimum GPA of 2.5 overall and in major, and completion of all professional education courses with a C or better). Supervised observation and directed teaching in respective field of endorsement.

PE 8103. Developing Coaching Expertise. (3). This course will provide graduate students with an in-depth analysis and practical knowledge of the growth and development of coaches from novice to expertise.

PE 8113. Curriculum Construction in Physical Education. (3) Three hours lecture. Principles, problems, and procedures in the development of a physical education curriculum are considered. Special emphasis is placed upon developing a course of study in physical education for a chosen situation.

PE 8163. Seminar in Physical Education. (3) The course gives a complete review of current literature in physical education.

PE 8193. Professional Preparation in Physical Education. (3) Three hours lecture. This course covers NASPE guidelines for professional preparation. Special areas are professional roles, academic advisement, and professional writing skills.

PE 8203. Psychological Aspects of Sport. (3) Three hours lecture. An in-depth analysis of the principles, methods and outcomes of sport psychology.

PE 8213. Problems in the Administration of Athletics. (3) Three hours lecture. Interscholastic athletic program; place of athletics in education, program organization and administration, budget, equipment, facilities, public relations, legal liability, and eligibility and contest regulations.

PH 1011. Physical Science Laboratory 1. (1) Two hours laboratory. Experiments in mechanics, sound, light, electricity, and magnetism. Recommended lab to accompany PH 1013.

PH 1013. Physical Science Survey 1. (3) Three hours lecture. Topics include mechanics, sound, light, electricity, and magnetism. Recommended laboratory PH 1011.

PH 1021. Physical Science Laboratory 2. (1) Two hours laboratory. Experiments in chemistry, heat, astronomy and energy. Recommended lab to accompany PH 1023. Could also accompany PH 1063.

PH 1023. Physical Science Survey 2. (3) Three hours lecture. Topics include chemistry, heat, astronomy and energy. Recommended laboratory PH 1021.

PH 1063. Descriptive Astronomy. (3) Three hours lecture. Night observation. The solar system; description and evolution of stars and the universe; methods of obtaining astronomical information; applications of astronomical knowledge.

PH 1113. General Physics I. (3) (Prerequisites: MA 1313 and MA 1323 or registration in MA 1713). Two hours lecture, one hour drill, two hours laboratory. Noncalculus-based study of the fundamental laws of mechanics, fluids, and relative motion.

PH 1123. General Physics II. (3) (Prerequisite: PH 1113). Two hours lecture, one hour drill, two hours laboratory. Noncalculus-based study of electromagnetic theory and magnetism and selected topics in modern physics.

PH 2213. Physics I. (3) (Prerequisite: Grade of C or better in MA 1713). Three hours lecture. Calculus-based course emphasizing Newtonian mechanics and conservation laws. Honors section available.

PH 2223. Physics II. (3) (Prerequisites: PH 2213 and MA 1723). Two hours lecture, one hour recitation, two hours laboratory. Calculus-based introduction to gravitation, electricity and magnetism. Laboratory emphasizes concepts of force and motion, conservation laws, and simple electrical circuits. Honors section also available through invitation only.

PH 2233. Physics III. (3) (Prerequisite: PH 2223). Two hours lecture, one hour recitation, two hours laboratory. Calculus-based course in simple harmonic motion, waves, optics and an introduction to modern physics. Laboratory emphasizes optics and electronics.

PH 3613. Modern Physics. (3) (Prerequisites: PH 2233 or PH 1133; MA 2733, or registration in MA 2733). Three hours lecture. Special relativity, quantum physics, atomic, nuclear, and solid state physics.

PH 4013/6013. Selected Topics in Physics for Teachers. (3) Two hours class work, three hours laboratory. For teachers. Basic concepts of physics. Will include discussion and clarification of material from currently adopted public school textbooks.

PH 4023/6023. Astronomy for Teachers. (3) Two hours class work. Three hours laboratory. For teachers. An introduction to the physical universe with emphasis on observational astronomy.

PH 4033/6033. Demonstrations and Concepts for Physics Teachers I. (3) (Prerequisite: Consent of instructor). Two hours lecture, three hours laboratory. Topics are those normally covered in first semester high school physics. Equal emphasis on theory, problems, demonstrations, and laboratory.

PH 4043/6043. Demonstrations and Concepts for Physics Teachers II. (3) (Prerequisite: Consent of instructor). Two hours lecture, three hours laboratory. Topics are those normally covered in second semester high school physics. Equal emphasis on theory, problems, demonstrations, and lab.

PH 4113/6113. Electronic Circuits for Scientists. (3) (Prerequisites: PH 1133 or PH 2223 and MA 2733). Two hours lecture and three hours laboratory. DC and AC circuits. Resistors, capacitors, inductors, diodes and transistors in basic analog circuits. Topics include filters, tuned circuits, power supplies, amplifiers and oscillators.

PH 4213/6213. Intermediate Mechanics I. (3) (Prerequisites: PH 1133 or PH 2233 and MA 2733). Three hours lecture. Plane statics and dynamics of particles and systems of particles with emphasis on both derivation and application of principles involved.

PH 4223/6223. Intermediate Mechanics II. (3) (Prerequisite: PH 4213/6213). Three hours lecture. Statics and dynamics of particles in three dimensional space using vector notation; Lagrange’s equations, introduction to the special theory of relativity.

PH 4323/6323. Electromagnetic Fields I. (3) (Prerequisites: PH 1133 or PH 2233 and MA 2743). Three hours lecture. Electrostatics, dielectrics, electric current, magnetostatics, electromagnetic induction, magnetic properties of matter.

PH 4333/6333. Electromagnetic Fields II. (3) (Prerequisite: PH 4323/6323). Three hours lecture. Maxwell’s equations, propagation of electromagnetic waves in free space and in matter, reflection and refraction, radiation.

PH 4433/6433. Computational Physics. (3). (Prerequisites: PH 3613 and MA 3253). Three hours lecture. An introduction to modern methods of computation physics including topics such as: solution of differential equations, numerical matrix methods, and Monte Carlo simulation.

PH 4513/6513. Intermediate Optics. (3) (Prerequisites: PH 1123 or PH 2233 and MA 2733). Three hours lecture. Geometrical optics and physical optics.

PH 4613/6613. Nuclear and Particle Physics. (3) (Prerequisite: PH 3613). Three hours lecture. Special theory of relativity; nuclear structure; radioactivity; nuclear reactions; nuclear forces; fission; fusion; high energy particle and astrophysics. Experimental apparatus and techniques.

PH 4713/6713. Introduction to Quantum Mechanics. (3) (Prerequisites: PH 3613 and MA 3253). Three hours lecture. Principles of quantum mechanics, Heisenberg uncertainty principle, angular momentum; the Schrödinger wave equation in one and three dimensions.

PH 4723/6723. Applications of Quantum Mechanics. (3) (Prerequisite: PH 4713/6713). Three hours lecture. Introduction to perturbation theory and quantum statistics. Topics selected from multi-electron atoms, diatomic molecules, solid state and nuclear physics.
PH 4813/6813. Introduction to Solid State Physics. (3) (Prerequisite: PH 3613). Three hours lecture. Crystal structure, crystal diffraction and the reciprocal lattice, crystal binding, free electron gas, energy bands, and semiconductors.

PH 6053. Physical Science for Teachers. (3) (Prerequisite: consent of instructor). Three hours video and online. Topics are those normally covered in middle school physical science. Major emphasis on theory, demonstrations, laboratory, and problem solving. (Intended for K-12 science teachers. Course can be used to satisfy degree requirements in a non-degree program).

PH 8013. Modern Topics for Physics Teachers. (3) (Prerequisites: Consent of instructor). Two hours lecture, three hours laboratory. Historical development of special relativity and quantum physics with particular emphasis on topics and experiments in atomic and nuclear physics.

PH 8213. Mechanics. (3) (Prerequisite: A good undergraduate training in physics and mathematics—consent of instructor). Coordinate systems and transformations, tensors, and matrices. Particle dynamics, variational principles, Lagrange’s and Hamilton’s equations, rigid body motion, special relativity in mechanics.

PH 8223. Methods of Theoretical Physics I. (3) (Prerequisite: Consent of instructor). Topics will vary, but may include linear vector spaces, tensor analysis, group theory, function spaces and orthogonal polynomials.

PH 8243. Methods of Theoretical Physics II. (3) (Prerequisite: PH 8233). Topics will vary but may include analytic functions, Fourier analysis, Green’s functions, integral transforms, partial differential equations and integral equations.

PH 8313. Electromagnetic Theory (3) (Prerequisite: PH 4333 or equivalent). Maxwell’s theory of electromagnetic. Boundary value problems in electrodynamics, static multipole moments, theory of dielectrics, magnetostatics, plane electromagnetic waves, simple radiating systems. (Same as ECE 8313).

PH 8623. Nuclear Physics II. (3) (Prerequisites: PH 8613, PH 8743). Elementary particle theory and interpretation of experimental data.

PH 8743. Quantum Mechanics I. (3) (Prerequisites: PH 4723 and MA 3313). Schrödinger theory, spherically symmetric systems, matrix mechanics, angular momentum and spin, time-independent perturbation theory.

PH 8813. Solid State Physics. (3) (Prerequisite: PH 8743). Theoretical interpretation of thermal, electric, and magnetic properties of solids.

PH 3113. Philosophy of Law. (3) Three hours lecture. A philosophical analysis of the concepts of law, liberty, justice, responsibility, and punishment from the rival ethical perspectives of deterrence and retribution.

PH 3123. Philosophy of Religion. (3) (Prerequisite: Three hours of philosophy). Three hours lecture. A critical inquiry into the rational justification of central theistic beliefs, with emphasis on the traditional philosophical arguments for and against the existence of God. (Same as REL 3123).

PH 3133. Seminar in Philosophy. (3) Three hours lecture. (Prerequisites: Completion of fifteen hours of PHI courses, including PHI 1113). The study of selected philosophy essays and practice in philosophical composition.

PH 3143. Nineteenth-Century Philosophy. (3) (Prerequisites: Three hours of philosophy or Junior standing or consent of instructor). Three hours lecture. A study of the major philosophical movements and figures of the nineteenth century.

PH 3153. Aesthetics. (3) Three hours lecture. Theories of art and the nature of beauty, designed to enhance the student’s sensitivity and cultural awareness.

PH 4013/6013. Contemporary Philosophy and Architecture. (3) (Prerequisites: Junior standing or consent of instructor). Three hours lecture. An examination of modernism and postmodernism in philosophy and architecture. (Same as ARC 4333/6333).

PH 4123/6123. Contemporary Continental Philosophy. (3) (Prerequisite: 3 hours PHI or junior standing). Three hours lecture. A survey of the most important trends in 20th and 21st century continental philosophy and their influence on culture, politics, art architecture, and literature.

PH 4143/6143. Philosophy of Science. (3) Three hours lecture. An analytical examination of the essential ingredients of science concluding with the effect of scientific values on contemporary culture.

PH 4153/6153. American Philosophy. (3) (Prerequisite: Junior standing). Three hours lecture. Speculative and practical philosophies beginning with the early colonial settlers, and terminating with pragmatism, Santayana and Whitehead.

PH 4163/6163. Research Ethics. (3) Three hours lecture. This course examines ethical issues that are generated by the tensional balancing of personal commitment against public good in the practice of scientific research.

PH 4213/6213. Theories of Inquiry. (3) (Prerequisite: Junior/Senior standing or consent of instructor). Three hours lecture. A historical and topical examination of rival traditions and theories of inquiry. Special attention will be paid to the concepts of knowledge, warrant, and truth.

PH 4313/6313. Feminist Interpretations of Western Social and Political Philosophy. (3) (Prerequisite: Junior/senior standing or consent of instructor). Three hours lecture. A survey of modern and contemporary social and political philosophical texts, which emphasizes recent feminist interpretations, analyses, and revision of traditional philosophical positions.

PH 8101. Case Studies in Scientific Research Ethics. (1) One hour seminar. Practical application of research ethics using case scenarios to direct discussions on data ownership, plagiarism, authorship, conflict of interest, and other regulatory compliance related issues. (Same as CVM 8101)

ANIMAL PHYSIOLOGY

(For the interdisciplinary graduate programs in Animal Physiology, consult College of Agriculture and Life Sciences section of this Bulletin, and the Graduate Bulletin.)

PHY 6112. Equine Reproduction. (2) One hour lecture. Two hours laboratory. A study of equine reproductive activities and the principles for managing the mare, stallion, and foal. (Same as ADS 4112/6122).

PHY 6114. Cellular Physiology. (4) (Same as BIO 4114/6114).

PHY 6335. Anatomy & Physiology of Insects. (3) (Same as EPP 6335).

PHY 6514. Animal Physiology. (4) (Same as BIO 4514/6514).

PHY 6611. Practice in Physiology of Reproduction. (1) (Prerequisite: BIO 1504). Three hours laboratory. Artificial insemination and rectal palpation of reproductive organs of cattle; semen collection, evaluation, processing and handling. (Same as ADS 4611/6611).

PHY 6613. Physiology of Reproduction. (3) (Prerequisite: BIO 1504). Three hours lecture. Anatomy and physiology, reproductive cycles, production, evaluation and preservation of gametes; gestation; endocrine regulations; managed production. (Same as ADS 4613/6613).

PHY 6623. Physiology of Lactation. (3) (Prerequisite: BIO 1504). Two hours lecture. Two hours laboratory. Anatomy, physiology and pathology of the mammary gland; nervous and endocrine control of lactation; theories of milk secretion, modern methods of milking, factors affecting lactation. (Same as ADS 4623/6623).

PHY 6843. Poultry Physiology. (3) (Prerequisite: PO 4833/6833 or consent of instructor). Two hours lecture. Two hours laboratory. Physiology of the fowl with emphasis on integration of body functions. (Same as PO 6843).
PHY 8133. Endocrinology (3) Three hours lecture. Study of factors by which cells communicate: the traditional endocrine system, autocrine, paracrine and neuroendocrine secretion. Physiological and genetic control of synthesis and secretion.

PHY 8243. Advanced Physiology of Reproduction. (3) (Prerequisite: ADS 4613/6613). (Same as ADS 8243).

PHY 8333. Advanced Toxicology. (3) (Prerequisite: EPP 4543/6543 or elementary biochemistry). (Same as EPP 8333).

PHY 8433. Bone, Muscle and Fat Deposition in Animals. (3) (Prerequisite: BCH 4613/6613). (Same as ADS 8433).

PHY 8623. Physiology of Digestion and Metabolism. (3) (Prerequisite: CH 4523/6523). (Same as PO 8823).

PHY 8633. Homeostatic Regulations and Physiological Stress. (3) (Prerequisites: PHY 8113 and BIO 4514/6514). (Same as ADS 8633).

PO 8811-8841. Animal Physiology Seminar. (1) Four one-hour seminars.

Department of POULTRY SCIENCE

Office: 114 Hill Poultry Science

Professors Hargis*, McDaniel, Mikul (head), Pechles, Rosen*, Thaxton
Associate Professor Corzo; Assistant Professors Branton*, Collier*, Evans*, Kicss, Olanrewaju*, Purswell*, Roush*

PO 3011-3021. Seminar. (1) One hour seminar. Preparation and presentation of specially assigned current problems in poultry science.

PO 3103. Genetics I. (3) (Prerequisites: MA 1313 and BIO 1134 or BIO 2113 or equivalents). Two hours lecture. Two hours laboratory. Principles of heredity, genetic material, and gene expressions. (Same as BIO 3103, GNS 3103).

PO 3313. Commercial Poultry Production. (3) Three hours lecture. An introduction to practical management problems encountered in the production of commercial eggs, broiler production, and breeding flocks.

PO 3323. Poultry Judging. (3) Two hours lecture. Two hours laboratory. Breed type and variety characteristics including production and exhibition qualities: judging live, dressed poultry, poultry products; organization and operation of poultry contests and shows.

PO 3333. Advanced Poultry Judging. (3) Two hours lecture. Two hours laboratory. Advanced study of breed type and characteristics: intensified training in judging for production and exhibition qualities.

PO 3353. Poultry Production Internship. (3) (Prerequisite: Consent of instructor). Structured, progressive experiential learning with the live production division of a poultry integrator.

PO 3363. Poultry Processing Internship. (3) (Prerequisite: Consent of instructor). Structured, progressive experiential learning with the processing division of a poultry integrator.

PO 3834. Microbiology of Food Animal Production. (4) Two hours lecture. Four hours laboratory. Provides training in common food animal industry techniques utilizing basic microbiological methodologies including aseptic technique, isolation of pure colonies and identification of unknown samples.

PO 4031-4041. Seminar. (1) One hour seminar. Preparation and presentation of specially assigned current problems in poultry science.

PO 4313/6313. Management of Commercial Layers. (3) Three hours lecture. Management of laying flocks as related to production of edible eggs; including housing, cage design, equipment, feeding techniques, lighting, molting and other factors involved with efficient production.

PO 4324/6324. Avian Reproduction. (4) Three hours lecture. Two hours laboratory. Principles of avian reproductive physiology and applications in poultry management to maximize reproductive performance. Reproductive characteristics of several bird species are included.

PO 4333/6333. Broiler Production. (3) Three hours lecture. Practical management problems encountered in the production of broilers including breeding, housing, brooding, diseases, and feeding; field trips to intensified broiler areas.

PO 4373. Hatchery Management Laboratory. (3) Six hours laboratory. Fundamental principles of hatchery design, incubator layout, ventilation and humidity control, fertility and hatchability problems that relate to hatchling chicks.

PO 4413/6413. Poultry Nutrition. (3) Three hours lecture. Study of the digestion, absorption, and metabolism of nutrients in avian species. Special emphasis is given to practical nutritional needs of commercial poultry flocks.

PO 4423/6423. Feed Manufacturing. (2) Two hours lecture. Two hours laboratory. Mill design and equipment; procurement, storage and quality control for ingredients and complete feeds; formulation of practical type poultry rations.

PO 4513/6513. Poultry Processing. (3) Two hours lecture. Two hours laboratory. Operation and study of modern processing; basic and further processing including regulation and marketing or products. (Same as FNH 4513/6513).

PO 4523/6523. Advanced Poultry Processing. (3) (Prerequisite: PO 4513/6513). Three hours lecture. Study of preparation of poultry for consumption including all pertinent technology, product flow, equipment and applicable regulations.

PO 4833/6833. Avian Anatomy. (3) Two hours lecture. Two hours laboratory. Anatomy of the fowl with emphasis on morphology and organization of the avian body structures.

PO 4843/6843. Avian Physiology. (3) (Prerequisites: PO 4833/6833 or consent of instructor). Two hours lecture. Two hours laboratory. Physiology of the fowl with emphasis on integration of body functions. (Same as PHY 6843).

PO 8123. Methods in Nutrition Research. (3) (Prerequisites: ST 8114 or equivalent). Two hours lecture. Three hours laboratory. Application of analytical methods used in research techniques; practice in writing research proposals, conducting a research project, and preparing research findings suitable for scientific publication.

PO 8443. Avian Nutrition. (3) Three hours lecture. Study of the nutrient functions, dietary relationships, deficiency symptoms, distribution in feedstuffs and quantitative requirements of nutrients.

PO 8513. Poultry Food Science Readings. (3) (Prerequisite: PO 6513 or 3 hours in related courses offered in Animal Science, Dairy Science or Horticulture). One hour lecture. Six hours library research weekly. An intensive study of poultry food science literature dealing with chemical, microbial, physical and organoleptic attributes of eggs and poultry meats. (Same as FNH 8513).

Department of POLITICAL SCIENCE and PUBLIC ADMINISTRATION

Office: 105 Bowen Hall

Professors Breaux, Buchanan, Morrison (head), Shaffer, and Wiseman; Associate Professor Emison, Goodman and Travis; Assistant Professors Ainudson, Cavanaugh, French, Mellin, McThomas, Patrick, Radin, Shoup, Stanishevski, and Stich; Instructor Waide

Public Policy and Public Administration

PPA 8103. Seminar in Public Administration. (3) (Prerequisite: consent of instructor). Detailed examination of the major elements of the field of public administration, with emphasis on emerging trends in the field.

PPA 8123. State Government Administration. (3) Seminar in the practice and principles of state government administration, including judicial and legislative administration.

PPA 8133. City and County Management. (3) Seminar focus on small town and county management in quasi-bureaucratic settings. Detailed consideration of problem solving capabilities as they relate to different forms of local government structure.

PPA 8143. Civil Rights and Affirmative Action. (3) (Prerequisite: consent of the instructor). A seminar which examines the various civil rights laws and acts and court decisions related to affirmative action in the workplace and public policy.

PPA 8153. Seminar in Privatization. (3) (Prerequisite: Consent of instructor). Three hours lecture. Examination of the theoretical and practical issues of public-private partnerships.

PPA 8193. Seminar in Intergovernmental Relations. (3) (Prerequisite: 9 hours of graduate work). Three hours lecture. Examines the current day functioning of the American federal system. Focuses upon national-state, national-local, interstate, state-local and interlocal relationships as well as fiscal federalism.

PPA 8400. Public Administration Internship. (1-6) Hours and credits to be arranged. (Prerequisite: Consent of instructor). Individual work experience under faculty guidance in a governmental or public agency. Scholarly paper on approved topic required. Student evaluations are assigned on satisfactory/unsatisfactory basis.

PPA 8703. Government Organization and Administrative Theory. (3) Detailed survey of organization theories and managerial techniques as they relate to the public sector.

PPA 8713. Public Personnel Management. (3) Course considers major developments in the issues and management practices affecting personnel such as affirmative action, unions, and civil service reforms.

PPA 8723. Public Budgeting and Financial Management. (3) Analysis of current financial and budgetary techniques as they apply to the public sector. Capital budgeting, debt administration, and financial management.

PPA 8733. Public Program Evaluation. (3) Techniques and analytical methods of assessing governmental program success. Special emphasis will be given to program designs, data collection and quantitative applications.

PPA 8743. Administrative Law. (3) (Prerequisite: PS 4703/6703). Three hours lecture. An environmental study of the legal nature and effect of policies and attitudes of government toward business, especially the power and limitations of regulatory agencies.

PPA 8803. Research Methods for Public Affairs. (3) Stress on research designs and methods, survey research and other techniques and measuring data. Focus on applied approaches for mathematically analyzing governmental data. (Same as PS 8803).
POLITICAL SCIENCE

PS 1316. Mississippi Model Security Council Internship III. (1) (Prerequisite: PS 1341) Hours arranged. Internship experience as participant in Mississippi Model Security Council as delegate, country adviser, council president, or United Nations Secretary General.

PS 1381. Mississippi Model Security Council Internship IV. (1) (Prerequisite: PS 1381) Hours arranged. Internship experience as participant in Mississippi Model Security Council as delegate, country adviser, council president, or United Nations Secretary General.

PS 1513. Comparative Government. (3) Three hours lecture. Survey of various governmental systems. 1513H. Honors section open through invitation. Introduction to comparative political inquiry including developing, democratic and authoritarian political systems.

PS 2403. Introduction to Political Theory. (3) Three hours lecture. An examination of selected thinkers, text, ideas, and periods in the history of political thought.

PS 2703. Introduction to Public Policy. (3) (Prerequisite: PS 1113 or consent of instructor). Three hours lecture. An examination of the formulation and implementation of public policy and the roles of government institutions and actors in policy making.

PS 2713. Introduction to Engineering and Public Policy. (3) (Prerequisite: EN 1113 or equivalent). Three hours lecture. A multidisciplinary analysis of public policy issues involving engineering and technology and the use of policy sciences to explore policy issues. (Same as GE 2713)

PS 4083. Senior Honors Research in Political Science. (3) (Prerequisite: Senior standing, and consent of department head). Topic to be selected by the student under the guidance of an honors faculty advisor.

PS 4093. Senior Honors Thesis in Political Science. (3) (Prerequisites: PS 4083, and consent of department head). Thesis writing on the topic researched in PS 4083.

PS 4464. Political Analysis. (4) (Prerequisite: 6 hours in political science). Three hours lecture. Two hours laboratory. Philosophical and historical foundations of political analysis; constructing and executing research designs; measuring political phenomena; elementary methods of data analysis; games, models, and simulations.

American Politics

PS 3013. Political Leadership. (3) Analysis of political leadership, emphasizing characteristics of successful leadership and opportunities available to students for leadership in the political arena.

PS 3033. Gender and Politics. (3) Three hours lecture. Examines gender differences in law, the courts, voting, political involvement, approaches to political power, and violence. (Same as GS 3033)

PS 3063 Constitutional Powers. (3) (Prerequisites: PS 1113 and sophomore standing). Three hours lecture. A study of the constitutional system; constitutional modification, federal courts and judicial review, separation of the powers, federalism, congressional and presidential powers, and contact clause.

PS 3073. Civil Liberties. (3) (Prerequisite: Junior standing or consent of instructor). Three hours lecture. Political and civil rights, individual rights, national security and individual freedoms; war and the Constitution; equal protection, criminal procedure; administrative procedure.

PS 3183. Law and Politics. (3) (Prerequisite: Sophomore standing or consent of instructor). Three hours lecture. Study of the politics of selected features of the legal system and the political uses of law as a tool for social control.

PS 3193. Intergovernmental Relations. (3) (Prerequisites: PS 1113 or PS 1193). Three hours lecture. Historical, prescriptive, and empirical studies of federalism with emphasis upon recent development in federal-state-local relationships.

PS 4113/6113. State Government. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. A study of the functional system; constitutions, political parties, lobbying, and the state budget process. 4113H. Honors section open through invitation only.

PS 4163/6163. The Chief Executive. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. Historical and comparative study of chief executives, including governors and mayors, with special emphasis on the Presidency.

PS 4173/6173. Legislative Process. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. Organization, work, and procedure of legislative bodies; other law-making activity.

PS 4193/6193. Mississippi Judicial System. (3) (Prerequisite: PS 1113). Three hours lecture. A study of the interrelationship of the actors within Mississippi's judicial system. Emphasis is placed on judicial decision-making, selection process, and resource allocation.

PS 4203/6203. Political Parties and Electoral Problems. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. The development and operation of American political parties, with special attention to electoral problems.
PS 4213/6213. Campaign Politics. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. Survey of the theory of political campaigns, the strategies and techniques they employ, and their effects on voters.

PS 4223/6223. The Dynamics of American Democracy. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. Analysis of factors affecting the translation of public opinion into public policy within a national institutional context.

PS 4233/6233. Interest Groups. (3) (Prerequisite: PS 1113 or consent of instructor). Three hours lecture. The study of the politics and practices of interest groups within the American political process.

PS 4253/6253. Southern Politics. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. Survey of the politics of the Confederate and border states; examination of party development, leadership, and impact of the South in national politics.

PS 4263/6263. Mississippian Government and Politics. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. A study of the organization, powers, processes and policies of state government in Mississippi.

PS 4273/6273. African American Politics. (3) (Prerequisite: PS 1113). Three hours lecture. The nature, processes, structures, and functions of African American politics in the domestic arena and international arena. (Same as AAS 4273.)

PS 4283/6283. Public Opinion. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. The nature of public opinion; the influence of the press; pressure groups and propaganda techniques; the means of political communication.

PS 4293/6293. Political Behavior. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. Examination of the foundations and types of individual political activity; emphasis on psychological, social and cultural factors influencing personal political behavior.

PS 4703/6703. Principles of Public Administration. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. Bureaucratic politics and power; administrative responsibility in a pluralist democracy; public administrative organization; public personnel administration; and public budgeting.

PS 4743/6743. Environmental Policy. (3) (Prerequisites: PS 1113, PS 2703, or consent of instructor). Three hours lecture. History, development, and practice of environmental policy in the United States.

International Politics
PS 4303/6303. U.S. Foreign Policy. (3) (Prerequisite: PS 1313 or consent of instructor.) Three hours lecture. An examination of the decision-making processes, institutions and structures that influence the formulation and execution of past and current U.S. foreign policy.

PS 4313/6313. Principles of International Law. (3) (Prerequisites: PS 1313 and junior standing). Three hours lecture. The nature, sources and scope of international law as found in custom, international convention, the teachings of authoritative writers, and judicial decisions.

PS 4333/6333. Theories of International Relations. (3) (Prerequisites: PS 1313 and junior standing). Three hours lecture. This course critically examines traditions and techniques they employ, and their effects on voters. Interpersonal and international relations; the role of the individual in world politics.

PS 4353/6353. International Political Economy. (3) (Prerequisite: PS 1313 or consent of instructor). Three hours lecture. This course will systematically address the relationship between politics and economics in an international context.

PS 4383/6383. National Security Policy. (3) (Prerequisites: PS 1313 and junior standing). Three hours lecture. An examination of those policies and issues affecting American national security with attention to the institutions, organizations and processes which shape them.

PS 4393/6393. The Global Context. (3) (Prerequisite: Junior standing or consent of instructor). Three hours lecture. Examination of selected issues of current importance to international relations.

Political Theory
PS 4423/6423. 20th Century Political Thought. (3) (Prerequisites: PS 2403 or consent of instructor). Three hours lecture. An examination of selected thinkers, text, and ideas in the history of political thought from the late 19th Century to the present.

PS 4433/6433. American Political Theory. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. Major schools of political thought in America from the colonial to the contemporary period.

PS 4453/6453. Western Political Theory: Plato to Marx. (3) (Prerequisite: PS 1113 or PS 2403). Three hours lecture. Chronological survey of central thinkers, texts, ideas, and movements in Western political thought from Plato to Marx.

Comparative Politics
PS 4543/6543. African Politics. (3) (Prerequisites: PS 1513 and junior standing). Three hours lecture. Contemporary sub-Saharan Africa; prospects for political development or decay. Role of parties, bureaucracy and mil- tary and their relation to elite formation and political integration. (Same as AAS 4543.)

PS 4553/6553. West European Politics. (3) (Prerequisites: PS 1513 and junior standing). Three hours lecture. Governments of countries of Western Europe with emphasis upon England, France, Germany, Italy, and Spain.

PS 4593/6593. Latin American Politics. (3) (Prerequisites: PS 1513 and junior standing). Three hours lecture. Background, organization, and structure of the governments of the various Latin American countries.

PS 4623/6623. Politics of the Third World. (3) (Prerequisites: PS 1513 and junior standing). Three hours lecture. Political processes of developing nations. Prospects for development and decline considered. Relationship between political, economic and cultural dimension during the process of social change.

Master of Political Science
NOTE: See latest Graduate Bulletin for admission information into the Political Science Department’s M.A., M.P.P.A., or Ph.D. graduate programs.

PS 8153. Seminar in Campaign Politics. (3) (Prerequisite: Consent of instructor). Analysis of conduct and phases of political campaigns; and their effect on voters and the political system generally.

PS 8203. Seminar in Comparative Government. (3) (Prerequisites: PS 1513 and nine hours of related courses, or consent of instructor). Special research problems dealing with governmental organization and administration in the major nations of the modern world.

PS 8513. Readings in Local Government and Politics. (3) (Prerequisite: Consent of instructor). Reading assigned material in local government and politics and making reports thereon under the supervision of a member of the graduate faculty.

PS 8523. Readings in State Government and Politics. (3) (Prerequisite: Consent of instructor). Reading assigned material in state government and politics and making reports thereon under the supervision of a member of the graduate faculty.

PS 8533. Readings in National Government and Politics. (3) (Prerequisite: Consent of instructor). Reading assigned material in an appropriate subfield of national government and making reports thereon under the supervision of a member of the graduate faculty.

PS 8543. Readings in Comparative Government and Politics. (3) (Prerequisite: Consent of instructor). Reading assigned material in an appropriate subfield of comparative government and making reports thereon under the supervision of a member of the graduate faculty.

PS 8553. Readings in International Relations. (3) (Prerequisite: Consent of instructor). Reading assigned material in an appropriate subfield of international relations and making reports thereon under the supervision of a member of the graduate faculty.

PS 8803. Research Methods for Public Affairs. (3) Stress on research designs and methods, survey research and other techniques and measuring data. Focus on applied approaches for mathematically analyzing governmental data. (Same as PPA 8803.)

PS 8813. Quantitative Methods for Public Affairs. (3) (Prerequisites: PS 8803 or PPA 8803). Detailed consideration of selected quantitative analytic models and their application to public sector management and policy problems. (Same as PPA 8813.)

PS 8903. Public Policy. (3) (Prerequisites: PS 8803, PS 8813, PS 8903). Application of quantitative and qualitative methods to policy formulation and implementation; seminar emphasizes contemporary issues such as strategic planning, leadership and managerial control. (Same as PPA 8903.)

PS 9103. American Political Institutions. (3) (Prerequisite: consent of instructor). Three hours lecture. Seminar addressing theoretical and empirical issues pertaining to the dynamics of American political institutions. (Same as PPA 9103.)

PS 9893. American Political Behavior. (3) (Prerequisite: PPA 9803 and consent of instructor). Three hours lecture. Seminar in American political behavior including public opinion, socialization, participation, and voting behavior. (Same as PPA 9893.)
PSS 2343. Floral Design. (3) Two hours lecture. Two hours studio. The history and appreciation of floral art through exploration of design principles, plant materials, and compositional floral forms.

PSS 2351. Techniques in Flowershop Management. (1) (Prerequisite: PSS 2343. Floral Design). Two hours laboratory. Demonstrations and practice of fundamentals which are essential in the operation of a retail flower shop.

PSS 2423. Plant Materials I. (3) Two hours lecture. Two hours laboratory. Characteristics, identification and landscape uses of ornamental trees, shrubs, vines, flowers and grasses adapted to Southern conditions.

PSS 4113/6113. Agricultural Crop Physiology.* (3) (Prerequisite: CH 1043 and BIO 2113). Three hours lecture. Online course. Physiology of agricultural plants, including water relations, respiration, photosynthesis and growth and development.

PSS 3023. Retail Floristry Operation and Management. (3) Three hours lecture. To identify and understand the basic principles of retail floristry management and the operation of a florist business.

PSS 3043. Fruit Science. (3) Three hours lecture. Principles and practices involved in the production of deciduous trees and small fruits.

PSS 3133. Introductory Weed Science. (3) (Prerequisites: BIO 1203, CH 1213 or CH 1053). Three hours lecture. Managing weeds; basic weed biology; methods of controlling weeds, introductory herbicide technology, weed control systems, and the fate of herbicides in the environment.

PSS 3301. Soils Laboratory. (1) (Prerequisite: Prior credit or current enrollment in PSS 3303). Two hours laboratory. General treatment of selected phases of the subject matter.

PSS 3303. Soils. (3) (Prerequisite: One semester (preferably two) of inorganic chemistry, CH 1043.) Three hours lecture. General treatment of all phases of the subject including plant fertilizers.

PSS 3313. Interior Planting Design and Maintenance. (3) Two hours lecture, two hours laboratory. Identification of plant materials for interior planting and principles of design, installation and maintenance, preparation of cost estimates and maintenance contracts for interior plantings.

PSS 3343. Wedding Floral Design. (3) (Prerequisite: PSS 2343). One hour lecture. Four hours laboratory. Application of design principles to wedding floral design.

PSS 3411. Turf Seminar I. (1) One hour lecture. Class discussions with invited turf industry representatives. Topics will include turf industry overview, turf care opportunities, writing a resume, and job interviews. May be repeated for credit.

PSS 3413. Floristry Internship. (3) (Prerequisites: PSS 2343, PSS 2351 and consent of Retail Floristry Management faculty). Individual work experience in a floral industry enterprise with an approved employer under faculty supervision.

PSS 3421. Turf Seminar II. (1) One hour lecture. Review of turfgrass literature and presentations of scientific articles. May be repeated for credit.

PSS 3423. Agronomy Internship. (3) (Prerequisites: Junior standing and consent of Agronomy Faculty). Individual work experience in an agronomic or environmental organization with an approved employer under faculty supervision. May be repeated for credit under approved conditions.

PSS 3433. Horticulture Internship. (3) (Prerequisite: Consent of the Floriculture and Ornamental Horticulture faculty). Individual work experience in a horticulture or allied industry organization with an approved employer under faculty supervision. This course may be repeated under approved conditions.

PSS 3443. Permanent Botanical Floral Design. (3) (Prerequisite: PSS 2343) One hour lecture. Four hours laboratory. Application of design theory and principles to non-perishable, dried, and preserved floral products.

PSS 3473. Plant Materials II. (3) (Prerequisite: PSS 2423). Two hours lecture. Two hours laboratory. Continuation of PSS 2423.

PSS 3511. Seminar. (1) (Prerequisite: Nine credits in horticulture). One hour lecture. Review of horticultural literature, and presentation and discussion of scientific articles.

PSS 3633. Sustainable and Organic Horticulture.* (3) Three hours lecture. Online course A study of the basic knowledge of the principles and practices of sustainable and organic alternative horticulture management systems.

PSS 3923. Plant Propagation. (3) (Prerequisite: BIO 1203). Two hours lecture. Two hours laboratory. Basic principles in the propagation of horticultural plants.

PSS 4043/6043. International Horticulture.* (3) (Prerequisite: PSS 1313). Three hours lecture. Online course. Worldwide overview of horticultural export, marketing, and international trade issues and individual country analyses of specific fruit, vegetable and ornamental crops.

PSS 4103/6103. Forage and Pasture Crops. (3) Two hours lecture. Two hours laboratory. Origin, uses, and ecology of forage plants, establishment, nutritive value, use, yield and maintenance of forage plants as related to morphology, physiology and pasture and fertilizers.

PSS 4123/6123. Grain Crops. (3) (Prerequisite: Junior standing). Two hours lecture. Two hours laboratory. Corn, small grain, practice in commercial grading given in laboratory.

PSS 4133/6133. Fiber and Oilseed Crops. (3) (Prerequisite: Junior standing). Three hours lecture. Production and utilization of fiber and oilseed crops. Emphasis on cotton growth, development and production in Mississippi.

PSS 4143/6143. Advanced Fruit Sciences. (3) (Prerequisite: PSS 3043 or equivalent). Three hours lecture. Three hours laboratory. A study of the latest advances in pomology and interpretation of current research findings and their application to modern fruit growing.

PSS 4223/6223. Seed Production. (3) (Prerequisite: Junior standing). Two hours lecture. Two hours laboratory. Principles and practices, special emphasis on production of varietally pure seeds; agronomic factors in harvesting, drying, storage, treating and marketing seed.

PSS 4313/6313. Soil Fertility and Fertilizers. (3) (Prerequisites: PSS 3303 and Junior standing). Three hours lecture. Fundamentals and concepts of soil fertility; sources and responses of crops to plant nutrients; soil fertility evaluation and management through fertilization.

PSS 4314/6314. Soil Microbiology. (4) (Prerequisite: BIO 3304). Three hours lecture. Three hours laboratory. Soil microorganisms and their importance in ammonification, nitrification, and other biological processes. (Same as BIO 4324)

PSS 4323/6323. Soil Classification. (3) (Prerequisite: PSS 3303). Three hours lecture. Fall semester, odd-numbered years.Origin, development, and classification of soils including identifying soils and soil identification in the laboratory.

PSS 4333/6333. Soil Conservation and Land Use. (3) (Prerequisite: PSS 3303). Two hours lecture. Three hours laboratory. Soil identification, topographic relationships and soil-water resources; their characteristics, quality, suitability, and management; conservation practices; using soil maps to determine land use.

PSS 4341/6341. Controlled Environment Agriculture Laboratory.* (1) (Co-requisite: PSS 4343 for horticulture majors). Two hours laboratory. Online course. An experiential study of the principles and practices of controlled environment operation and management.

PSS 4343/6343. Controlled Environment Agriculture. (3) (Prerequisites: BIO 21133 and PSS 3303; co-require for horticulture majors: PSS 4341). Three hours lecture. Online course. A detailed review and explanation of principles and practice of controlled environments operation and management.

PSS 4353/6353. Arboriculture and Landscape Maintenance. (3) Three hours lecture. Two hours laboratory. Care of ornamental trees and shrubs, including pruning, bracing, surgery, transplanting, and fertilization.

PSS 4363/6363. Sustainable Nursery Production.* (3) (Prerequisites: PSS 2423 and PSS 3303). Three hours lecture. Online course. Nursery crop production including site selection and planning, plant nutrition, water relations and irrigation, shipping, and managing and people resources.

PSS 4373/6373. Geospatial Agronomic Management. (3) (Prerequisites: PSS 3303 and PSS 3133). Two hours lecture. Three hours laboratory. This class will utilize the basic tools of geographical information systems and geographical positioning systems to analyze agronomic case studies.

PSS 4411/6411. Remote Sensing Seminar. (1) (Prerequisite: Junior standing). One hours lecture. Lectures by remote sensing experts from industry, academia, and governmental agencies on next-generation systems, applications, and economic and societal impact of remote sensing.

PSS 4443/6443. Turf Management. (4) (Prerequisite: Junior Standing). Three hours lecture. Two hours laboratory. Comprehensive study of turfgrasses, their establishment, and the varied management strategies employed for golf and sports turf, home lawns and commercial turf, and sod production.

PSS 4423/6423. Golf Course Operations. (3) (Prerequisite: PSS 4414/6414). Two hours lecture. Two hours laboratory. Scheduling maintenance practices, golf course construction and renovation with emphasis on operation and care of specialized turf equipment.

PSS 4443/6443. Athletic Field Management. (3) (Prerequisite: PSS 3303. PSS 4414, or consent of instructor). Two hours lecture. Two hours laboratory. A comprehensive study of athletic fields, including construction, maintenance, renovation and management. Emphasis will be placed on interactions between soil properties and sports turf performance.

PSS 4444/6444. Plant Tissue Culture. (4) (Prerequisite: BIO 4214 and CH 1053 or equivalent). Three hours lecture. Three hours laboratory. A comprehensive study of plant cell, tissue and organ culture with emphasis on practical applications of tissue culture in various areas of plant science.

PSS 4453/6453. Vegetable Production. (3) (Prerequisite: PSS 3303 and PSS 4021 or BIO 4204). Two hours lecture. Two hours laboratory. Principles and practices of commercial vegetable production.

PSS 4483/6483. Intro to Remote Sensing Technologies. (3) (Prerequisite: Senior or graduate standing, or consent of instructor). Three hours lecture. Electromagnetic interactions, passive sensors, multispectral and hyperspectral optical sensors, active sensors, imaging radar, SAR, Lidar, digital image processing, natural resource applications (Same as ECE 4423/6423 and ABE 4483/6483).

PSS 4503/6503. Plant Breeding. (3) (Prerequisite: PO 3103). Two hours lecture. Two hours laboratory. Application of genetic principles to the improvement of economic crop plants; history, methods and procedures of plant breeding.

PSS 4553/6553. Plant Growth and Development.* (3) Three hours lecture. Online course. Structure of plant developmental processes and how environmental factors interact to affect and control plant growth and development.

PSS 4603/6603. Soil Chemistry. (3) (Prerequisite: PSS 3303). Two hours lecture. Three hours laboratory. Introduction to the basic chemistry of soils, including: mineral weathering/formation, ion exchange, adsorption, oxidation/reduction, acidity, salinity/alkalinity, and soil reactions of environmental importance.
PSS 4613/6613. Floriculture Crop Programming. (3) (Prerequisite: PSS 4343/6343). Two hours lecture. Two hours laboratory. A detailed study of the techniques involved in the production of the major commercial flower crops.

PSS 4633/6633. Weed Biology and Ecology. (3) (Prerequisites: BIO 2103, PSS 3133. Junior standing or consent of instructor). Two hours lecture. Three hours laboratory. Classification and population responses to agricultural production.

PSS 4813/6813. Herbicide Technology. (3) (Prerequisites: PSS 3133 and Junior standing). Two hours lecture. Three hours laboratory. Classification and use of herbicides. A detailed look at herbicide application-field use and factors influencing herbicide activity. Credit may not be given for this course and PSS 4813/6813.

PSS 4823/6823. Turfgrass Weed Management. (3) (Prerequisite: PSS 3133 and Junior standing). Two hours lecture. Three hours laboratory. Classification and use of herbicides with emphasis on herbicides used in turfgrasses. Credit may not be given for this course and PSS 4813/6813.

PSS 8123. Crop Ecology and Analysis. (Prerequisite: BIO 4214/6214 or consent of instructor). Three hours lecture, three hours laboratory. The geographic distribution, use, and adaptation of field crops as influenced by soil, climate, and other environmental factors.

PSS 8163. Environmental Plant Physiology. (3) Three hours lecture. The influences of physical factors of the environment on growth and development of crops.

PSS 8203. Seed Physiology. (3) (Prerequisite: PSS 4234/6234 or approval of instructor). Three hours lecture. Physiology of seed maturation, germination, dormancy, and deterioration; relation of seed quality to growth and development of plants.

PSS 8323. Advanced Soil Chemistry. (3) (Prerequisite: CH 4413 and preferably CH 4423 or approval of instructor). Three hours lecture. Application of the fundamental laws of colloid chemistry to inorganic and organic soil colloids with special emphasis on chemical equilibria, elution, cation, cation exchange. Gouy-Chapman theory and electrokinetics.

PSS 8333. Advanced Soil Fertility. (3) (Prerequisite: Graduate standing). Two hours lecture. Three hours laboratory. Advanced course in soil fertility; special emphasis on all soil conditions affecting plant growth. Experimental techniques in plant nutrition and in soil fertility will be utilized.

PSS 8343. Modeling Watershed Hydrology. (3) (Prerequisite: PSS 3301/3303 or CE 4513 or consent of instructor). Two hours lecture. Three hours laboratory. Simulation modeling of watershed hydrology and point/non-point source pollution, including rainfall, availability and quality, calibration/verification, sensitivity analysis, TMDL calculations, and other modeling issues.

PSS 8511. Seminar. (1) (Prerequisite: Graduate standing). One hour lecture. Review of scientific literature and presentation of scientific papers.

PSS 8513. Advanced Plant Breeding. (3) (Prerequisite: PSS 4503/6503 or equivalent). Three hours lecture. An intensive review of methods of plant improvement and the application of these methods to modern plant breeding. (Same as GNS 8113.)

PSS 8523. Nutrition of Horticultural Plants. (3) (Prerequisites: PSS 3303 and PSS 3301 and BIO 4214/6214 or equivalent). Three hours lecture. Principles of mineral nutrition applied to diverse horticultural plants.

PSS 8543. Biometrical Genes in Plant Breeding. (3) (Prerequisites: PSS 4503/6503 and ST 8114). Three hours lecture. Analysis and interpretation of experiments for estimation of hereditary parameters. Emphasis on mating designs, sensitivity analysis, and statistical procedures. (Same as GNS 8543.)

PSS 8553. Phytohormones and Growth Regulation. (3) (Prerequisites: BIO 4214/6214 and CH 2503). Three hours lecture. Plant growth regulating compounds; synthesis, metabolism, and effects on plant growth and development.

PSS 8563. Post-Harvest Physiology of Horticultural Plants. (3) (Prerequisites: Organic Chemistry and BIO 4214/6214 or equivalent). Three hours lecture. The nature, evaluation, and control of chemical and physiological changes that occur after harvest of horticultural products.

PSS 8573. Morphology of Horticultural Plants. (3) (Prerequisite: BIO 4204/6204). One hour lecture. Four hours laboratory. Development of the floral and vegetative organs of horticultural plants.

PSS 8631. Topics in Genomics. (1) (Prerequisites: PSS/BCH 8623 or BCH 4713/6713 or BCH 8643 or consent of instructor). Two hour discussion and presentation. Review and discussion of classic and current genomics literature; individual presentation of a seminar highlighting an area of genomics research. (Same as BCH 8631)

PSS 8634. Environmental Fate of Herbicides. (4) (Prerequisites: CH 4513/6513, PSS 4813/6813). Three hours lecture. Three hours laboratory. Fate of herbicides; soil adsorption/desorption, leaching, runoff, microbial, chemical, and photolytic degradation, and plant metabolism, environmental factors that influence these processes.

PSS 8645. Field Applications of Weed Sciences Principles I. (5) (Prerequisite: PSS 6633 and PSS 6813 or consent of instructor). Three hours lecture. Four hours laboratory. Field weed identification; herbicide symptomology; problem solving in turf, field corn, rice, sorghum and pastures; application equipment calibration.

PSS 8653. Genomes and Genomics. (3) (Prerequisites: BCH 4113/6113 or BCH 4713/6713 or consent of instructor). Overview of genome structure and evolution with emphasis on genomics, the use of molecular biology, robotics, and advanced computational methods to efficiently study genomes. (Same as BCH 8653)

PSS 8665. Field Applications of Weed Sciences Principles II. (5) (Prerequisite: PSS 8646 or consent of instructor). Three hours lecture. Four hours laboratory. Field weed identification; herbicide symptomology; problem solving in turf, field corn, rice, sorghum and pastures; application equipment calibration.

PSS 8811-8831. Seminar. (1) (Prerequisite: Graduate standing). Review of literature on assigned topics; preparation of formal papers and presentation of them at staff seminars.

Department of PSYCHOLOGY

Office: 110 Magruder Hall
Professors Bradshaw, Carskaden, Doane, Giesen, Klein, and Morse;
Associate Professors Adams-Price, Armstrong, and Jacquin;
Assistant Professors Eakin, Keeley, McKinney, Moss, Sinclair and Williams

PSY 1013. General Psychology. (3) Three hours lecture. The study of human behavior, heredity and growth; motivation: feeling and emotion; frustration; conflict; learning; language; thinking, attention; sensation; perception; intelligence; aptitudes; social influences. 1013H. Honors section open through invitation only. Intensified study of human behavior, heredity, motivation, emotion, frustration, conflict, learning, sensation, perception, intelligence, experimental methodology, and social interaction.

PSY 1021. Careers in Psychology. (1) (Prerequisite: PSY 1013). One hour lecture. Introduction to professions and career opportunities in the field of psychology by university faculty and practicing professionals.

PSY 3003. Environmental Psychology. (3) (Prerequisite: PSY 1013 or consent of instructor). Three hours lecture. Study of the social and physical environmental factors and their effects on behavior. Theory, research, and application will be examined.

PSY 3023. Applied Psychology. (3) (Prerequisite: PSY 1013 or consent of instructor). Three hours lecture. Principles, techniques, and results of psychology applied to a wide range of problems in daily life and work.

PSY 3073. Psychology of Interpersonal Relations. (3) Three hours lecture. (Prerequisite: Junior standing). Examination of psychological principles, theories and research which apply to various types of human interaction.

PSY 3104. Introductory Psychological Statistics. (3) (Prerequisite: PSY 1013, MA 1313). Three hours lecture. Two hours laboratory. An introduction to the techniques and practices in statistical analyses used in psychological experimentation and evaluation along with practical experience in statistical software packages.

PSY 3203. Psychology of Gender Differences. (3) (Prerequisite: PSY 1013 or consent of instructor). Three hours lecture. Survey of the biological, physiological, and sociocultural factors which influence the psychological differentiation of the genders.

PSY 3213. Psychology of Abnormal Behavior. (3) (Prerequisite: PSY 1013). Three hours lecture. Behavioral patterns and causes of deviant behavior from childhood through later maturity. Etiology and symptomatology are emphasized.

PSY 3314. Experimental Psychology. (4) (Prerequisite: PSY 3104). Two hours lecture. Four hours laboratory. Introduction to the methods and techniques of research design. Practical experience in conducting experiments, analyzing data, and writing scientific reports.

PSY 3343. Psychology of Learning. (3) (Prerequisite: PSY 1013). Three hours lecture. Survey of a variety of learning situations. Consideration of the variables and conditions which influence the learning process.

PSY 3353. Motivation. (3) (Prerequisite: PSY 1013). Three hours lecture. Study of the role of motivation in behavior theory; biological and psychological bases; historical and contemporary views.
PSY 3363. Behavior Modification. (3) (Prerequisite: PSY 1013). Three hours lecture. Intensive examination of the principles and procedures used to modify the behavior of humans in contemporary situations.

PSY 3413. Human Sexual Behavior. (3) (Prerequisite: PSY 1013 or consent of instructor). Three hours lecture. Varieties of sexual behavior. Research methods and findings; typical behaviors; homosexuality; sexual disorders; sexual assault and sexual victims; treatments; pornography and prostitution; sexual risk perception.

PSY 3503. Health Psychology. (3) (Prerequisites: PSY 1013). Three hours lecture. Overview of research on psychophysiological disorders and related interventions. Emphasis is placed on chronic physical disorders and their relationship to psychological functioning.

PSY 3623. Social Psychology. (3) (Prerequisites: PSY 1013 or consent of instructor). Three hours lecture. Human behavior as a product of social interaction; social perception; social norms and roles; group processes, interrelationship of personality, culture, and group.

PSY 3713. Cognitive Psychology. (3) (Prerequisite: PSY 1013 or consent of instructor). Three hours lecture. Introduction to the basic areas of cognitive psychology, including perception, attention, memory, reasoning, and language.

PSY 3723. Cognitive Neuroscience. (3) (Prerequisite: PSY 1013 or consent of instructor). Three hours lecture. Introduction to cognitive neuroscience including how the function of neural systems inform our understanding of perception, attention, working memory, memory storage, and higher-order thought.

PSY 3803. Introduction to Developmental Psychology. (3) (Prerequisite: PSY 1013). Three hours lecture. A survey and evaluation of current theory and research concerning development from infancy to young adulthood. Cognitive, social, and emotional development is emphasized.

PSY 4223/6223. Drug Use and Abuse. (3) (Prerequisite: PSY 1013). Three hours lecture. Study of the basic principles of clinical psychologists. Includes an introduction to psychopharmacology and basic treatment strategies.

PSY 4323. History of Psychology. (3) (Prerequisite: PSY 1013 and junior standing). Three hours lecture. A discussion of people, events, and theoretical and empirical contributions relevant to development of psychology.

PSY 4333. Introduction to Clinical Psychology. (3) (Prerequisites: PSY 3213 and PSY 3803 or consent of instructor). Three hours lecture. Survey of assessment techniques, intervention procedures, professional issues of contemporary clinical psychology. Emphasis placed on the Boulder (scientist-practitioner) model.

PSY 4343. Clinical Child Psychology. (3) (Prerequisite: PSY 3213; PSY 3314 or PSY 3803). Three hours lecture. Overview of childhood disorders and related interventions.

PSY 4353/6353. Psychology and the Law. (3) (Prerequisite: PSY 1013 and junior standing). Three hours lecture. Examination of the roles of psychologists in the legal systems; application of psychological theory and research to issues in the legal system.

PSY 4364. Advanced Forensic Psychology Lab. (4). (Prerequisite: PSY 3314 and consent of instructor). Ten hours research laboratory per week (hours to be arranged). Course provides students with direct experience planning, conducting, analyzing, and presenting research in the forensic psychology area. May be repeated for credit.

PSY 4373/6373. Forensic Psychology. (3) (Prerequisite: PSY 1013 and junior standing). Three hours lecture. Examines topics related to the application of clinical psychology to legal matters.

PSY 4403/6403. Biological Psychology. (3) (Prerequisite: PSY 1013). Three hours lecture. Nervous, endocrine, and immune systems of the body as they affect behavior and adjustment. Emphasis upon the role of the central and peripheral nervous systems.

PSY 4423/6423. Sensation and Perception. (3) (Prerequisite: PSY 1013, PSY 4403). Three hours lecture. Survey of basic sensory mechanisms and perceptual phenomena. Sensory mechanisms reviewed will include vision, audition, olfaction, gustation, and touch with emphasis on vision and audition.

PSY 4523/6523. Industrial Psychology. (3) (Prerequisite: PSY 1013). Three hours lecture. Applications of psychological principles and methods to industry emphasizing employee selection, placement, merit rating, training, human relations, and measurement and improvement of employee morale.

PSY 4624. Advanced Social Psychology Research Lab. (4) (Prerequisites: PSY 3314 and PSY 3623 or consent of instructor). Ten hours laboratory, research hours to be arranged. Course provides students with direct experience planning, conducting, analyzing, and presenting research in the social psychology area.

PSY 4643/6643. Social Cognition. (3) (Prerequisite: PSY 3623 or consent of instructor). Three hours lecture. Examination of how people perceive, categorize and reason about other people and themselves.

PSY 4653/6653. Cognitive Science. (3) (Prerequisite: CSE 4633/6633 or PSY 4713 or PH 4343 or AN 4623/6623 or EN 4463/6463). Three hours lecture. The nature of human cognition from an interdisciplinary perspective, primarily utilizing a computational model, including insights from philosophy, psychology, linguistics, artificial intelligence, anthropology, and neuroscience. (Same as CSE 4653/6653).

PSY 4726. Internship in Psychology I. (6) (Prerequisite: Consent of instructor). A minimum of 20 hours per week of professional experience in a human service or other field setting. One hour of seminar and group supervision.

PSY 4733/6733. Memory. (3) Three hours lecture. (Prerequisite: PSY 1013). Introduction to theoretical and practical aspects of memory. Discussion of laboratory, computer models of memory, memory self-concepts, everyday memory, and clinical memory problems.

PSY 4736. Internship in Psychology II. (6) (Prerequisite: Consent of instructor). A minimum of 20 hours per week of professional experience in a human service or other field setting. One hour of seminar and group supervision.

PSY 4743/6743. Psychology of Human-Computer Interaction. (3) (Prerequisites: PSY 3713 or CSE 4663/6663 or IE 4113/6113 or consent of the instructor). Two hours lecture. Two hours laboratory. Exploration of psychological factors that interact with computer interface usability. Interface design techniques and usability evaluation methods are emphasized. (Same as CSE 4673/6673 and IE 4123/6123).

PSY 4753/6753. Applied Cognitive Psychology. (3) (Prerequisite: PSY 3713 or IE 4113 or consent of instructor). Three hours lecture. Human perceptual, cognitive and motor capabilities and limitations are described with particular emphasis on the implications of developing effective, user-friendly man-machine systems.

PSY 4903/6903. Seminar in Psychology. (3) (Prerequisite: PSY 1013). In-depth examination of particular topics of current interest to faculty and students. Critical evaluation of current research.

PSY 4983/6983. Psychology of Aging. (3) (Prerequisite: PSY 1013). Three hours lecture. A description and analysis of the development and changes occurring in individuals from early adulthood through late life.

PSY 8111. Scientist-Practitioner Applications. (1) (Prerequisite: Consent of instructor). Two hours laboratory. A minimum of two hours per week in supervised service delivery and research activities of clinical psychologists.

PSY 8131. Scientist-Practitioner Applications. (1) (Prerequisite: Consent of instructor). Two hours laboratory. A minimum of two hours per week in supervised service delivery and research activities of clinical psychologists.

PSY 8141. Scientist-Practitioner Applications. (1) (Prerequisite: Consent of instructor). Two hours laboratory. A minimum of two hours per week in supervised service delivery and research activities of clinical psychologists.

PSY 8151. Scientist-Practitioner Applications. (1) (Prerequisite: Consent of instructor). Two hours laboratory. A minimum of two hours per week in supervised service delivery and research activities of clinical psychologists.

PSY 8214. Quantitative Methods in Psychology II. (4) (Prerequisite: PSY 3103). Three hours lecture. Three hours laboratory. Advanced experimental design and methods with emphasis on analysis of variance.

PSY 8313. Developmental Psychology. (3) (Prerequisite: PSY 3803). Three hours lecture. Human growth processes and related developmental tasks in areas such as creative ability, language, social competence, and bodily fitness.

PSY 8323. Psychopathology. (3) (Prerequisites: PSY 3213). In-depth coverage of contemporary systems of psychiatric diagnosis, and biological, psychological, and social theories of the etiology of psychological disorders.

PSY 8333. Systems of Psychotherapy. (3) (Prerequisite: Consent of instructor). Three hours lecture. A comparative introduction to the theories, techniques, and outcomes of major approaches to psychotherapy.

PSY 8354. Intelligence Testing. (3) (Prerequisite: Consent of the instructor). Three hours lecture. Two hours laboratory. Administration, scoring and interpretation of the standard psychometric instruments used in evaluating individual intellectual functioning.

PSY 8364. Personality Appraisal. (4) (Prerequisite: PSY 8323). Three hours lecture. Two hours laboratory. Administration, scoring and interpretation using standard self-report and projective methods of individual personality assessment. Current research is also explored.

PSY 8383. Behavior Therapy. (3) (Prerequisite: Consent of instructor). Three hours lecture. A survey of contemporary literature relating to the theory, techniques, and outcomes of behavior therapy. Emphasizes placed on systematic desensitization and operant conditioning techniques.

PSY 8454, 8464. Professional Practicum. (4) (Prerequisite: Departmental consent). A minimum of 300 hours per semester of supervised professional psychology experience in an approved setting.

PSY 8503. Learning. (3) (Prerequisite: PSY 3343). Three hours lecture. Current theories and learning models; methods and results of experimental studies of human and animal learning.

PSY 8513. Psychological Research. (3) (Prerequisite: PSY 3314). Three hours lecture. Practicum in the techniques of planning and execution of various areas of psychological research.
PSY 8533. Introduction to Clinical Practicum in Psychology. (3) (Prerequisite: Consent of instructor). One hour lecture. Two hours practicum. Intensive introduction to clinical interviewing, as well as the research literature in clinical psychology.

PSY 8573. Psychopharmacology. (3) (Prerequisites: PSY 4403 and PSY 8323). Three hours lecture. Overview of research on pharmacological and combined treatments for psychological disorders. Emphasis is placed on psychological disorders in an adult setting.

PSY 8613. Advanced Social Psychology. (3) (Prerequisite: PSY 3623). Three hours lecture. Examination of research and theories of attraction and liking. Emphasis upon reinforcement theory, gain-loss theory, and dissonance theory.

PSY 8703. Personnel Psychology. (3) (Prerequisite: Consent of instructor.) Three hours lecture. Study of theories and methods of psychology as applied to work setting design, personnel management, and organizational behavior with special emphasis on personnel psychology.

PSY 8713. Issues and Methods in Cognitive Psychology. (3) (Prerequisite: Graduate Standing). Three hours lecture. Exploration of theoretical issues and research methods in current Cognitive Psychology.

PSY 8723. Cognitive Models of Skill. (3) (Prerequisite: Graduate standing). Three hours lecture. Introduction to cognitive modeling, with a focus on computational models of skill acquisition and expert skill (Same as CSE 8613).

PSY 8731. Applied Cognitive Science Research Seminar. (1) One hour seminar. Presentations of research in applied cognitive science.

PSY 8803. Advanced Quantitative Methods for Industrial/Organizational and General Psychology. (3) (Prerequisites: PSY 8214). Three hours lecture. Study of advanced analytic and multivariate quantitative methods applied to contemporary problems and research in industrial/organizational and general psychology.

READING EDUCATION

RDG 3313. Practicum: Diagnosis and Remediation of Reading Disability. (3) (Prerequisite: RDG 3213). The supervised diagnostic teaching of reading in a public school setting.

RDG 3413. Middle Level Literacy I. (3) (Prerequisites: Admission to Teacher Education, RDG 3113 and RDG 3213; Co-requisites: RDG 3423 and EDE 3223). Three hours lecture. Field experience. Literacy teaching and learning for upper elementary and middle school. Emphasis on reading instruction, strategy instruction, and assessment.

RDG 3423. Middle Level Literacy II. (3) (Prerequisites: Admission to Teacher Education, RDG 3113 and RDG 3213; Co-requisites: RDG 3413 and EDE 3223). Three hours lecture. Field experience. Instructional strategies and materials for teaching literacy in the elementary and middle school. Focus on writing, comprehension and teaching diverse students.

RDG 3513. Developing Reading Strategies in the Secondary School Content Areas. (3) Basic theories and techniques needed by content area teachers for teaching reading to secondary school students. Admission to Teacher Education required.

RDG 4113/6113. Middle Level Literacy Development and Instruction. (3) (Prerequisite: RDG 3113). Three hours lecture. Advanced theory and applied methods, techniques, and analyses of literacy strategies for the middle years learner (Same as EDE 4113/6113).

RDG 4133. Integrating Language Arts Instruction in the Content Areas. (3) (Co-requisite: EDE 4113, EDE 4123, and EDE 4143; Admission to Teacher Education.). Two hours lecture. Two hours laboratory. Field-based. Selection, organization, and teaching, and assessment for integrating language arts across the content areas - K-8; general effectiveness of and reflection about instructional practices.

RDG 8153. Psychology of Reading. (3) Three hours lecture. Analysis of reading patterns; conditions favorable and unfavorable to progress in reading skill; the readiness concept; problems of levels. Prevention and correction of reading handicaps.

RDG 8453. Research in Reading. (3) Three hours lecture. The function of research in the development of reading programs; contribution of research to reading.

RDG 8593. Issues and Innovations in Reading. (3) Issues and innovations related to trends, methodology, and materials in teaching of reading.

RDG 8713. Teaching Struggling Readers and Writers. (3) Two hours lecture. Two hours laboratory. Practicum experience teaching struggling elementary school literacy learners; identifying literacy learning strengths and difficulties; teaching to improve achievement.

REAL ESTATE FINANCE

Office: 312 McCool Hall

(For departmental information, see FINANCE and ECONOMICS)

REF 3333. Principles of Real Estate. (3) (Prerequisite: Junior standing). Three hours lecture. A survey of the activities involved in the acquisition, transfer, operation, and management of real estate.

REF 3433. Real Property Evaluation. (3) (Prerequisite: REF 3333). Three hours lecture. Methods, evaluation procedures, and techniques of appraising commercial and residential real property under various value-influencing conditions; case problems for appraisal.

REF 4153. Real Estate Investments. (3) (Prerequisites: REF 3333 and FIN 3123). Three hours lecture. Direct investment in real estate. Sources of funds; risk analysis; typical policies and procedures of investing and financing real estate.

REF 4333/6333. Real Estate Law. (3). (Prerequisite: BL 2413 or consent of instructor). Three hours lecture. The legal principles applicable to real estate, including types of ownership and interests, mortgages, restrictions, and regulations. (Same as BL 4333/6333).

RELIGION

(For departmental information, see PHILOSOPHY and RELIGION.)

REL 1103. Introduction to Religion. (3) Three hours lecture. Religion seen as a human search for meaning in life or response to the holy. Studied through basic structures and modes of expression.

REL 1213. Introduction to the Old Testament. (3) Three hours lecture. A survey of Old Testament literature with attention to archaeological findings and the cultural setting.

REL 2233. Introduction to Old Testament Archaeology. (3) Three hours lecture. A survey of the Old Testament in the light of archaeological research. The approach is chronological-historical-archaeological. (Same as MEC 2233)

REL 3123. Philosophy of Religion. (3) (Prerequisite: Three hours of philosophy). Three hours lecture. A critical inquiry into the rational justification of central theistic beliefs, with emphasis on the traditional philosophical arguments for and against the existence of God. (Same as PHI 3123).

REL 3203. The Prophets of Ancient Israel. (3) Three hours lecture, seminar. A study of the message and function of prophetic traditions within ancient Israel and in contemporary ancient Near Eastern societies.

REL 3223. World Religions: Part II. (3) Three hours lecture. A history and comparative study of beliefs and the cultural impact of the great theistic religions of the West.

REL 3323. Hindu Mythology. (3) Three hours lecture. A survey of Hindu literature portraying the activities of gods, goddesses, and sages, and their relevance to Hindu theology and religious practice.

REL 3453. Hinduism & Buddhism. (3) Three hours lecture. Introduction to and critical-historical survey of significant texts, doctrines, themes, and thinkers in the main indigenous Indian religion traditions.

REL 3473. Islam. (3) A survey of Islamic history, beliefs and practices, law, theology, philosophy, and mysticism. (Same as MEC 3473)

REL 3540. Archaeological Travel and Participation Program. (1-6) Participation in excavations in the Near East and related lecture program. (Same as AN 3540).
REL 3553. Near Eastern Archaeology. (3) Three hours lecture. Introduction to the contributions made by archaeological research to ancient Near Eastern history and prehistory, with special emphasis on the Syro-Palestinian area. (Same as AN 3553 and MEC 3553).

REL 3703. The Western Church: Beginning to Reformation. (3) (Prerequisite: Completion of any 1000-level course in history or philosophy and religion). Three hours lecture. An examination of the institutions, doctrines, and spirituality of the Western Church and their impact on Western European politics, society, and culture.

REL 4123/6123. Scandinavian Mythology. (3) (Prerequisite: Junior standing or consent of instructor). Three hours lecture. A survey of the myths and legends of Scandinavia in English translation. (Same as FL 4123/6123).

REL 4143/6143. Classical Mythology. (3) Three hours lecture. Myths and legends of Greece and Rome and their use in literature and the arts through the ages. (Same as FL 4143/6143).

REL 4253/6253. Religion in America. (3) (Prerequisite: HI 1063 or HI 1073). Three hours lecture. Surveys history of religion in America, emphasizing interaction with social and political developments. (Same as HI 4253/6253).

REL 4403/6403. The Ancient Near East. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A study of the origins and development of civilizations in Mesopotamia, Egypt, and Syria-Palestine from prehistoric times to the end of the Persian period. (Same as HI 4403/6403 and MEC 4403/6403).

SO 1003. Introduction to Sociology. (3) Three hours lecture. The nature and development of culture; social aspects of personality; analysis of community life, population trends, social classes, institutions, processes, and organization; culture change. Honors section open through invitation only.

SO 1173. Introduction to Gender Studies. (3) Three hours lecture. An introduction to theoretical concepts in Gender Studies. This course will examine the influence of the women’s movement on the academic development of Gender Studies (Same as AN 1173 and GS 1173).

SO 1203. Marriage and Family. (3) Three hours lecture. A study of dating, mate selection, marriage and parenthood, with emphasis on the contemporary American family. (Same as AS 2203 and AN 2203).

SO 2203. Cultural and Racial Minorities. (3) (Prerequisite: Three hours in an introductory social science). Three hours lecture. Origins of minority groups and racial attitudes. Biological and cultural concepts of race and minority groups; problems of adjustment in interracial and multiethnic societies. (Same as AAS 2203 and AN 2203).

SO 3003. Social Inequality. (3) (Prerequisite: SO 1003). Three hours lecture. Investigates the nature, causes, and consequences of social inequality and stratification, the relationships among class, race, and gender inequalities in cross-cultural perspective.

SO 3013. Society and the Individual. (3) (Prerequisite: SO 1003). Three hours lecture. A study of interpersonal relationships and the individual. Emphasis is placed on the structural aspects of socialization and the social construction of reality.

SO 3053. Organizations in Modern Society. (3) (Prerequisite: SO 1003). Three hours lecture. Examines the nature and types of formal organizations, their impact on, and outcomes for, individuals and society; organizational structures, processes, environments and effectiveness.

SO 3103. Social Theory I. (3) (Prerequisite: Nine hours of sociology, CSE 1013 or equivalent and junior standing). Lecture course. Study of European and American sociological theory—intellectual antecedents as well as social-cultural context.

SO 3213. Introduction to Social Research. (3) (Prerequisites: Nine hours of sociology and junior standing). Three hours lecture. A survey of the general field of research and methodology, including an examination of the various types of research designs, techniques, and procedures.

SO 3313. Deviant Behavior. (3) (Prerequisite: SO 1103 or its equivalent or consent of instructor). Three hours lecture. An introduction to the social and cultural factors related to human deviance. Special attention is given to the study of various theories of deviance.

SO 3323. Contemporary Woman. (3) Three hours lecture. Introductory course for the Concentration in Women’s Studies. Major topics are women’s heritages, identity, culture, and vulnerabilities.

SO 3333. Society and Religion. (3) Three hours lecture. Religion as an institution. Examines the social origins of religion and its functions, both positive and negative, in social movements, social control and politics. (Same as REL 3333).

SO 3343. Gender, Crime, and Justice. (3) (Prerequisite: CRM 1003 and SO 1003 with consent of instructor). Three hours lecture. Gender differences in criminal behavior, victimization, and criminal justice processing, emphasizing the unique experiences of women in all of these areas. (Same as CRM 3343).

SO 3353. Race, Crime, & Justice. (3) (Prerequisite: CRM 1003 and SO 1003 or consent of instructor). Three hours lecture. Racial differences in criminal behavior, victimization, and criminal processing, emphasizing the unique experiences of racial minorities in these areas (Same as CRM 3353).

SO 3503. Violence in the United States. (3) (Prerequisites: CRM 1003 and SO 1003 or consent of instructor). Three hours lecture. In-depth study of violence, including types of violence, categories of offenders and victims, its social causes, and potential solutions. (Same as SO 3503).

SO 3603. Criminological Theory. (3). (Prerequisites: CRM 1003 and SO 1003 or consent of instructor). Three hours lecture. Survey of the major sociological and criminological explanations of crime. (Same as CRM 3603).

SO 4113/6113. Social Organization and Change. (3) (Prerequisites: SO 1003 and junior standing). Three hours lecture. An intensive examination of recent research focused on the prediction, explanation and control of social change with attention to trends in developing countries.

SO 4123/6123. Poverty Analysis: People, Organization and Programs. (3) (Prerequisites: SO 1003 and junior standing). Three hours lecture. Historical perspectives; problems of definition and measurement; socio-cultural situations contributing to deprivation; delineation of poverty groups; social consequences of poverty; poverty programs and organizations.

SO 4173/6173. Environment and Society. (3) (Prerequisite: AN 1103 or SO 1003 or consent of instructor). Three hours lecture. A study of the interaction between human society and the environment including the social aspects of environmental problems. (Same as AN 4173/6173).

SO 4203/6203. The Family in the United States. (3) (Prerequisite: SO 1203). Three hours lecture. A study of the American family as an institution, with emphasis on change and interrelationships with other institutions.

SO 4223/6223. Comparative Family Systems. (3) (Prerequisite: SO 1203). Three hours lecture. A systematic study of family patterns in selected cultures of the world.

SO 4233/6233. Juvenile Delinquency. (3) (Prerequisites: CRM 1003 and SO 1003 or consent of instructor). Three hours lecture. Critical study of problems, causes, ways of handling; attitudes, roles and relationships of persons involved, including youthful offenders, social workers, court and law enforcement officials. (Same as CRM 4233/6233).

SO 4243/6243. Drugs, Crime and Control. (3) (Prerequisites: SO 1003 and CRM 1003 or consent of instructor). Three hours lecture. Focus on the social factors which give rise to illicit drug use, patterns and trends in drug crime and strategies to control drug crime. (Same as CRM 4243/6243).

SO 4253/6253. White Collar Crime and Elite Deviance. (3) (Prerequisites: SO 1003 and CRM 1003 or consent of instructor). Three hours lecture. An overview of the sociological and criminological literature in the area defined as ‘White Collar Crime’ (Same as CRM 4253/6253).

SO 4273/6273. Sociology of Education. (3) (Prerequisites: SO 1003 and junior standing). Three hours lecture. A sociological analysis of education as a social institution, its role in the larger society, the organization of schooling, and the social dynamics of classrooms.
SO 4303/6303. Urban Sociology. (3) (Prerequisites: SO 1003 and junior standing). Three hours lecture. A sociological and ecological study of urban areas emphasizing the processes of population, environment, technology and social organization.

SO 4323/6323. Victimization. (3) (Prerequisites: CRM 1003 and SO 1003 or consent of instructor). Three hours lecture. A critical study of victims, examining theories of victimization, the social construction of victimization, the relationship between victimization and social deviance, and victim prevention efforts. (Same as CRM 4323/6323).

SO 4333/6333. Sociology of Sport. (3) (Prerequisites: SO 1003 and junior standing). Three hours lecture. Examination of sport as a social institution in American society, its contributions to society and to participants.

SO 4413/6413. Aging and Retirement in American Society. (3) (Prerequisite: Nine hours of sociology or related courses). Three hours lecture. A study of the social and economic aspects of aging and of the social problems in American society as they apply to the aged and retired groups.

SO 4423/6423. Health and Society. (3) (Prerequisite: Three hours in sociology). Three hours lecture. Examines health and the health care structure of the United States as it relates to our culture, norms and social institutions.

SO 4433/6433. Sociology of Death and Dying. (3) (Prerequisite: Three hours in sociology). Three hours lecture. Practical application of sociological analysis and methods conducting social research projects. Includes selection of methods and analytical techniques, data collection, ethics, and report writing.

SO 4713/6713. Methods in Population Research. (3) Review and evaluation of censuses, vital statistics, and demographic surveys and their uses, with emphasis on measurement, methods, and analytical techniques.

SO 4733/6733. Community: Organization and Relationships. (3) (Prerequisites: SO 1003 and junior standing). Three hours lecture. Rural-urban approach to community; types of local societies and community organizations; perspectives in community study.

SO 8113. Graduate Theory II. (3) Focus on post-19th century theory and antecedents. Delineation of the basic postures in the discipline and relative relations of these postures to theory development.

SO 8213. Research Design. (3) (Prerequisite: SO 8274). Three hours lecture. Emphasis on overall design, plan, structure, and strategy. Also limitations of theory, measurement, sampling and statistical testing in research.

SO 8223. Techniques of Survey Research. (3) (Prerequisite: SO 8213). Scheduling of construction, sampling, field procedures, techniques of analysis, presentation of statistical materials.

SO 8233. Qualitative Analysis. (3) (Prerequisite: SO 8213). Three hours lecture. Qualitative approaches to understanding social behavior. Exposure to all phases of qualitative research: epistemology, design, field work, ethics, and writing research reports.

SO 8243. Spatial Analysis of Social Data. (3) (Prerequisite: SO 8284, equivalent or consent of instructor). Three hours lecture. Spatial theories of society; relevant digital databases; procedures for visualizing data; exploratory spatial data analysis; local and global spatial regression models.

SO 8274. Graduate Social Statistics I. (4) (Prerequisite: ST 2113 or equivalent). Two hours lecture, two hours laboratory. Probability, hypothesis testing, tests of means and proportions, contingency table analysis, analysis of variance, bivariate linear regressions correlation; data analysis and interpretation using current statistical software.

SO 8284. Graduate Social Statistics II. (4) (Prerequisite: SO 8274). Three hours lecture. Two hours laboratory. Hypothesis testing, analysis of variance, multiple linear regression and correlation, causal models, exploratory factor analysis; data analysis and interpretation using current statistical software.

SO 8293. Structural Equations Modeling with Latent Variables in Sociology. (3) (Prerequisites: SO 8284 or equivalent). Three hours lecture. The application of structural equation modeling techniques to sociological problems containing unobserved variables, focusing on estimation and interpretation of model parameters with errors of measurement.

SO 8343. Complex Organizations. (3) Theory and research in organizations. Nature and types of organizations; determinants and consequences of organizational growth; organizational effectiveness; production, authority, and control systems in organizations.

SO 8403. Seminar in Race Relations. (3) Three hours lecture. Contributions of anthropology, sociology and psychology to the field of race relations. Critical analysis of recent studies, current racial theories and programs.

SO 8413. Seminar in Social Stratification. (3) Three hours lecture. Critical analyses of theories and research on social class and related social structures. Explores race/gender/class stratification and policies to alter income, wealth inequality.

SO 8423. Seminar in Deviant Behavior. (3) Examination of relation between social conditions, social problems, deviance, and deviant careers. The organization of social control activities, and the social differentiation of deviant populations.

SO 8433. Seminar in Criminology. (3) Exploration of conceptual, methodological, and substantive problems of research in the field of criminology. The classification of criminals and criminal careers receives special emphasis.

SO 8503. Seminar in the Family. (3) An advanced seminar on the family institution, emphasizing theoretical and conceptual frameworks, topics of current concern to family sociology, and major literature in the area.

SO 8523. Symbolic Interaction and Social Structure. (3) Review of classic and current sociological literature in symbolic interaction and development of self as process and product of social structure.

SO 8703. Seminar in Population. (3) (Prerequisite: SO 4703/6703 or equivalent). Development of population dynamics; theories of optimum population; population policies and programs; zero population growth; interrelationship of population phenomena with socioeconomic developments.

SO 8723. Advanced Demographic Analysis and Research. (3) Techniques of population and migration estimations and projections; and methods of estimating basic demographic measures from incomplete data.

SO 8900. Fields of Sociology. (Hours and credits to be arranged up to 3 hours.) A seminar in selected areas of sociological research and practice.

SO 8983. Seminar in Race Relations (3) (Prerequisite: graduate standing and enrollment in the Diversity Certificate program). Three hours lecture. Contributions of anthropology, sociology, and psychology to race relations. Critical analysis of recent studies, current racial theories and programs. Designed for online Diversity Certificate program students.

SO 8963. Exploring Issues in Gender. (3) (Prerequisite: graduate standing and enrollment in the Diversity Certificate program). Three hours lecture. An intensive introduction to theories of gender structures social, economic and cultural inequalities. Designed for online Diversity Certificate program students. (Same as GS 8963)

SO 8973. Gender and Work. (3) (Prerequisite: graduate standing and enrollment in the Diversity Certificate program). Three hours lecture. An intensive introduction to theories of gender structures social, economic and cultural inequalities. Designed for online Diversity Certificate program students. (Same as GS 8973)

SPORT STUDIES

(For departmental information, see KINESIOLOGY)

SS 2003. Foundations of Sport Industry. (3) Three hours lecture. Overview and analysis of the body knowledge in sport management, including an examination of sport and sport-related organizations.

SS 3103. Sport Sponsorship. (3) Three hours lecture. The sponsorship process; it relates to athletics and commercial sport operations; creation and application of sponsorships to specific sport scenarios.

SS 3203. Sport Law. (3) Three hours lecture. This course addresses the influence of torts, contracts, employment-related issues, and intellectual property on the sport industry.

SS 4203. Funding of Sport. (3) Three hours lecture. Foundation of fiscal management concepts in the sport industry, including finance, economics, accounting, and general business practices.
STATISTICS

(For departmental information, see MATHEMATICS AND STATISTICS.)

ST 2113. Introduction to Statistics. (3) (Prerequisite: ACT Math subscore 24, or grade of C or better in MA 1313). Two hours lecture. Two hours laboratory. Introduction to statistical techniques: descriptive statistics, random variables, probability distributions, estimation, confidence intervals, hypothesis testing, and measurement of association. Computer instruction for statistical analysis. (Same as MA 2113.)

ST 3122. Introduction to Statistical Inference. (3) (Prerequisite: ACT Math subscore of 24 or grade of C or better in MA 1313). Two hours lecture. Two hours laboratory. Basic concepts and methods of statistics, including descriptive statistics, probability, random variables, sampling distributions, estimation, hypothesis testing, introduction to analysis of variance, simple linear regression. (Same as MA 3123.)

ST 4111/6111. Seminar in Statistical Packages. (1) One hour lecture. Introduction to the statistical computer packages available at MSU.

ST 4211/6211. Statistical Consulting. (1) (Prerequisite: Consent of the department). (May be repeated for credit.) Provides students with the opportunity to participate as statistical consultants on real projects; consultants are required to attend a weekly staff meeting.

ST 4213/6213. Nonparametric Methods. (3) (Prerequisite: An introductory course in statistical methods). Three hours lecture. Nonparametric and distribution-free methods, including inferences for proportions, contingency table analysis, goodness of fit tests, statistical methods based on rank order, and measures of association.

ST 4243/6243 Data Analysis I. (3) (Prerequisite: MA 2743. Co-requisite: MA 3113). Three hours lecture. Data description and descriptive statistics, probability and probability distributions, parametric one-sample and two-sample inference procedures, simple linear regressions, one-way ANOVA. Use of SAS. (Same as MA 4243/6243.)

ST 4253/6253 Data Analysis II. (3) (Prerequisites: MA 4243/6243 and MA 3113). Three hours lecture. Multiple linear regression; fixed, mixed and random effect models; block designs; two-factor analysis of variance; three-factor analysis of variance; analysis of covariance. Use of SAS. (Same as MA 4253/6253.)

ST 4313/6313. Introduction to Spatial Statistics. (3) (Prerequisite: Grade of C or better in ST 3123 or equivalent). Two hours lecture. Two hours laboratory. Spatial data analysis; kriging, block kriging, cokriging; variogram models; median polish and universal kriging for mean-nonstationary data; spatial autoregressive models; estimation and testing; spatial sampling.

ST 4523/6523. Introduction to Probability. (3) (Prerequisite: MA 2733). Three hours lecture. Basic concepts of probability, conditional probability, independence, random variables, discrete and continuous probability distributions, moment generating function, moments, special distributions, central limit theorem. (Same as MA 4523/6523.)

ST 4543/6543. Introduction to Mathematical Statistics I. (3) (Prerequisite: MA 2743). Three hours lecture. Combinatorics; probability, random variables, discrete and continuous distributions, generating functions, moments, special distributions, multivariate distributions, independence, distributions of functions of random variables. (Same as MA 4543/6543.)

ST 4573/6573. Introduction to Mathematical Statistics II. (3) (Prerequisite: MA 4543/6543). Three hours lecture. Estimation, sampling distributions, point estimation, interval estimation, hypothesis testing, likelihood estimation, analysis of variance, regression, chi-square tests. (Same as MA 4573/6573.)

ST 8114. Statistical Methods. (4) (Prerequisite: MA 1313). Three hours lecture. Two hours laboratory. Fall and Spring semesters. Descriptive statistics; sampling distributions; inferences for one and two populations; completely random, block, Latin square, split-plot designs; factorials; simple linear regression; chi-square tests.

ST 8214. Design and Analysis of Experiments. (4) (Prerequisite: ST 8114) Three hours lecture. Three hours laboratory. Offered Spring semester. Procedures in planning and analyzing experiments; simple, multiple, and curvilinear regression; factorial arrangement of treatments; confounding; fractional replication; block designs; lattices; split-plots.

ST 8253. Regression Analysis. (3) (Prerequisite: ST 8114 or equivalent.) Three hours lecture. Fall and Spring semesters. Simple linear regression analysis and related inferences, remedial measures, multiple and polynomial regression, use of indicator variables, variable selection methods, and use of computer.

ST 8263. Advanced Regression Analysis. (3) (Prerequisite: ST 8253). Three hours lecture. Continuation of ST 8253, including variable selection methods, optimization techniques, biased estimation methods such as ridge regression, non-linear regression, model validation methodology, indicator variables, design models.

ST 8313. Introduction to Survey Sampling. (3) (Prerequisite: ST 8114). Three hours lecture. Topics include: design, planning, execution, and analysis of sample surveys; simple random, stratified random, cluster, and systematic sampling; ratio and regression estimation.

ST 8353. Statistical Computations. (3) (Prerequisite: ST 8114). Three hours lecture. Applications of computer packages, including data screening, t-tests and Hotelling’s T², analysis of designed experiments, regression analysis, contingency table analysis, projects, and report writing.

ST 8413. Multivariate Statistical Methods. (3) (Prerequisite: ST 8253). Three hours lecture. Multivariate normal; multiple and partial correlation; principal components; factor analysis; rotation; canonical correlation; discriminant analysis; Hotelling’s T²; cluster analysis; multidimensional scaling; multivariate analysis of variance.

ST 8453. Applied Probability. (3) (Prerequisite: ST 4543/6543). Three hours lecture. An introduction to the applications of probability theory. Topics include: Markov Chains, Poisson Processes, and Renewal, Queueing, and Reliability theories. Other topics as time permits.

ST 8603. Applied Statistics. (3) (Prerequisite: ST 4253/6253 or equivalent). Three hours lecture. Advanced analysis of experimental data. Topics include: mixed and random models, incomplete block design, changeover trials, experiments, analysis of covariance, and repeated measures design.

ST 8613. Linear Models I. (3) (Prerequisites: ST 4253/6253 and 4573/6573). Three hours lecture. Random vectors, multivariate normal, distribution of quadratic forms, estimation and statistical inferences relative to the general linear model of full rank, theory of hypothesis testing.

ST 8633. Linear Models II. (3) (Prerequisite: ST 8613). Three hours lecture. Continuation of ST 8613, including generalized inverses; general linear model not of full rank, related inferences; applications; computing techniques; design models, and hypothesis testing; variance-component models.

ST 8853. Advanced Design of Experiments I. (3) (Prerequisite: ST 8603 or ST 8214). Three hours lecture. Noise reducing designs; incomplete block designs; factorial experiments, Yates’ algorithms, confounding systems; fractional replicates; pooling of experiments; nested designs; repeated measurement designs; messy data analyses.

ST 8863. Advanced Design of Experiments II. (3) (Prerequisites: ST 8853 and ST 8613). Three hours lecture. Continuation of ST 8853, including analysis of covariance, split-plot designs and variants, applications of the general linear model, response surface methodology, randomization models, pseudo-factors, and cross-over design.

ST 8913. Recent Developments in Statistics. (3) (Prerequisite: Consent of instructor). New results in statistical theory and/or statistical methodology; advanced work organized around topics not usually considered in the other courses.

ST 8951. Seminar in Statistics. (1) (Prerequisite: Consent of instructor). (May be repeated for credit). Review of literature on assigned topics; discussions and presentations of papers.
### SOCIAL WORK

**Office:** 207 Bowen Hall

**Associate Professor Crudden; Assistant Professor Burson; Instructors Edwards and Pilkington**

**SW 2313. Introduction to Social Work/Social Welfare. (3)** Three hours lecture. A study of professional social work and the historical and philosophical development of social work and social welfare.

**SW 2323. Social Welfare Policy II. (3) (Prerequisite: SW 2313).** Three hours lecture. The course provides an analysis and evaluation of social welfare policies as institutional responses to social problems, social justice, and human needs.

**SW 3003. Social Work with At-Risk Populations. (3)** Three hours lecture. Examines the role and interaction of social workers with vulnerable groups. Includes concepts of racism, sexism, homophobia, oppression, affirmative action, and xenophobia.

**SW 4013. Human Behavior and the Social Environment I. (3)** Three hours lecture. Examines biological, psychological, social-structural, and cultural aspects of human development from conception through young adulthood from a social systems perspective, emphasizing diversity and oppression.

**SW 3023. Human Behavior and the Social Environment II. (3) (Prerequisite: SW 3013).** Three hours lecture. Focus on processes involved in engaging client systems, assessment, conceptualization, evaluation, and termination in preparation for generalist social work practice.

**SW 3513. Social Work Practice I. (3) (Prerequisites: SW 3513 and SW 2313).** Three hours lecture. Examines biological, psychological, social-structural, and cultural aspects of human development from middle adulthood to death from a social systems perspective, emphasizing diversity and oppression.

**SW 3213. Research Methods in Social Work. (3) (Prerequisite: ST 2113).** Three hours lecture. A survey of research methodology in social work practice, including an examination of the various types of research design, techniques, and procedures.

**SW 3513. Social Work Practice I. (3) (Prerequisites: SW 2313 and SW 3013).** Three hours lecture. The course emphasizes problems solving methods utilizing communication theories and skills working with individuals, families, groups, and communities in preparation for generalist social work practice.

**SW 3523. Social Work Practice II. (3) (Prerequisites: SW 3513).** Three hours lecture. The course focuses on processes involved in engaging client systems, assessment, conceptualization, evaluation, and termination in preparation for generalist social work practice.

**SW 3533. Social Work with Communities and Organizations. (3) (Prerequisite or Co-requisite: SW 3523).** Three hours lecture. The course focuses on processes involved in problem solving with emphasis upon groups and larger systems in generalist social work practice.

**SW 4623. Social Work with the Aged. (3) (Consent of instructor).** Three hours lecture. Assessment of parent and society's responsibilities in meeting physical, social, psychological, and legal needs of children and examining the delivery, policies, systems, and services.

**TKB 1012. Keyboarding. (2) One hour lecture. Two hours laboratory. Keyboard mastery; letter writing; vertical and horizontal centering; manuscript writing; tabulation. No credit allowed if student has earned high school credit. Students with no high school credit will be allowed to remove this deficiency during the freshman year.**

**TKB 1123. Document Formatting/ Information Processing. (3) (Prerequisite: TKB 1012 or equivalent).** Two hours lecture. Two hours laboratory. Review of keyboarding principles, development of speed/accuracy using computer software, and mastery of formatting and word processing competencies required to produce business documents.

**TKB 1312. Information Resource Management. (3) Two hours lecture. Development of guidelines for establishment, implementation, and maintenance of records control programs in various organizations.**

**TKB 2112. Document Production. (2) (Prerequisite: TKB 1122 or equivalent).** One hour lecture. Two hours laboratory. Development of speed and accuracy using computer software, advanced application of formatting skills using computer software, machine dictation and transcription.

**TKB 2122. Introduction to Database Management. (2) (Prerequisite: TKT 1273 or BIS 1012 or CSE 1013 and keyboarding proficiency).** One hour lecture. Two hours laboratory. An exploration of database management technology as it applies to business applications in today's contemporary business environment. Provides hands-on technology experience with database management software.

**TKB 2312. Introduction to Spreadsheet Design and Analysis. (2) (TKT 1273 or BIS 1012 or CSE 1013 and keyboarding proficiency).** One hour lecture. Two hours laboratory. An exploration of electronic spreadsheet technology applied to business applications in today's contemporary business environment. Provides hands-on computer technology with most widely used spreadsheet software.

**TKB 2543. Word Processing—Concepts, Procedures, and Applications. (2) (Prerequisite: TKB 1122 or instructors consent).** Two hours lecture. Two hours laboratory. Concepts and applications in word processing using microcomputers.

**TKB 3133. Administrative Management & Procedures. (3) (Prerequisite: TKT 1273 or equivalent and junior standing).** Three hours lecture. Principles of effective administrative management and procedures. Planning and directing workplace activities, systems, and technology; selecting and training employees; developing professional leadership and communication skills.

**TKB 4283/6283. Advanced Office Systems. (3) (Prerequisite: TKT 1273 or BIS 1012 or CSE 1013; TKB 2132, TKB 2122; and keyboarding proficiency).** One hour lecture. Two hours laboratory. An exploration of computer technology as it applies to the office. Provides hands-on microcomputer experience with integrated business software and graphics.

**TKB 4543/6543. Advanced Information Processing. (3) (Prerequisite: TKB 1123 or instructor’s consent).** Two hours lecture. Two hours laboratory. Applications in advanced word processing and desktop publishing.

**TKB 4563. Introduction to Data Networks. (3) (Prerequisite: TKB 1273).** Three hours lecture. Strategies in supporting the users of data networking systems and exploration of the associated networking hardware and software that are appropriate for the office environment.

**TKB 4583/6583. Graphics and Web Design. (3) (Prerequisites: TKT 1273 or BIS 1012 or CSE 1013 and keyboarding proficiency).** Two hours lecture. Two hours laboratory. Principles and development of graphics and web design.

### BUSINESS TECHNOLOGY

**TKI 1213. Introduction to Industrial Technology. (3).** Three hours lecture. Study of fundamental industrial safety and health principles preparing the student for working in industry.

**TKI 1223. Wood, Polymer, and Composite Processing. (3) (Prerequisites: EG 1443 and TKI 1213).** Two hours lecture. Two hours laboratory. The planning, operation, and control of the processing of natural and synthetic polymers and associated composites.

**TKI 1813. Basic Industrial Electricity and Electronics I. (3) (Prerequisite: TKI 1213 and MA 1313).** One hour lecture. Four hours laboratory. Study of fundamental direct current, industrial electrical and electronic principles with experimentation and project construction.

**TKI 2113/ Introduction to PLC/CNC Programming. (3). (Prerequisite: TKI 1813).** Three hours lecture. Study of fundamental methods in the programming of industrial PLC and CNC controllers, with regard to language and logic.

**TKI 2123. Introduction to CNC Programming. (3). (Prerequisites: EG 1443 and MA 1325).** Two hours lecture. Two hours laboratory. Study of fundamental concepts and techniques in the construction and programming of numerical controlled machines.
TKI 2323. Forging, Welding and Founding. (3) (Prerequisite: EG 1443 and concurrent or credit in TKI 1813). Six hours laboratory. Practice in hand forging, annealing, hardening and tempering of tool steel, casting, gas and electric welding; plasma arc cutting.

TKI 2413. History and Appreciation of the Artcrafts. (3) Three hours lecture. Growth and development of the artcrafts through the ages; instructional applications, practical designs; demonstrations and projects in artemial, leather, ceramics, and other handicraft areas.

TKI 2813. Basic Industrial Electricity & Electronics II. (3) (Prerequisites: MA 1323 and TKI 1813). One hour lecture. Four hours laboratory. Study of fundamental alternating current, industrial, electrical and electronic principles with experimentation and project construction.

TKI 3043. Industrial Safety. (3) (Prerequisite: TKI 1213) Three hours lecture. Principles and procedures relating to appraisal, organization and administration of safety programs in industrial plants including implementation of occupational safety and health legislation.

TKI 3063. Industrial Human Relations. (3) (Prerequisite: Junior standing). Three hours lecture. The application of psychological principles to teacher-pupil relationships, employer-employee relationships, and other human relationships in business and industry.

TKI 3103. Advanced Industrial Electricity and Electronics. (3) (Prerequisite: TKI 2813). One hour lecture. Four hours laboratory. Continuation of TKI 1813. Study of and experimentation with industrial electronic, transistor, and integrated circuitry.

TKI 3183. Machine Metal Processing. (3) (Prerequisite: TKI 2123 and junior standing) Six hours laboratory. Machine tool (drill, grinder lathe, mill and shaper) operation; bench metal production measurements, calculations, and chipless machining; project construction.

TKI 3223. Industrial Materials Technology. (3) (Prerequisite: CH 1043 and junior standing). Two hours lecture. Two hours laboratory. An investigation of the mechanical and characteristic properties of industrial materials. The influence of these properties on manufacturing and product service requirements; practice.

TKI 3243. Industrial Metrology. (3) (Prerequisites: TKI 2123, BQA 2113 & Junior Standing). Two hours lecture. Two hours laboratory. Study of fundamental and advanced methods employed for measurement in industry.

TKI 3343. CAD/CAM. (3) (Prerequisite: TKI 3183) Two hours lecture. Two hours laboratory. Basic intermediate drafting and design techniques using CAD and CAM software, with special emphasis placed on tolerancing, dimensioning, and manufacturing processing routes and selection.

TKI 3363. Motion and Time Study. (3) Two hours lecture. Two hours laboratory. A study of the techniques for analysis of production systems, the design of work stations, and the development of time standards. (For non-IE students) (Same as IE 3113).

TKI 3383. Forecasting and Cost Modeling. (3). (Prerequisite: BQA 2113, ACC 2013 and junior standing) Two hours lecture. Two hours laboratory. Use of the higher functions of spreadsheet software to undertake costing of manufacturing process routes and to forecast changes in manufacturing scenarios.

TKI 4103. Industrial Control Systems. (3) (Prerequisite: TKI 3103). One hour lecture. Four hours laboratory. Application of basic and advanced industrial electronic principles to industrial control systems and processes.

TKI 4113/6113. Industrial Fluid Power. (3) (Prerequisites: PH 1113, TKI 2913 and junior standing). One hour lecture. Four hours laboratory. A practical study of fluid power concepts, components, and systems as relates to modern industrial applications and to appropriate scientific principles. Hands-on laboratory activities.

TKI 4203/6203. Automated Systems. (3) (Prerequisite: TKI 2113 and TKI 4103). Two hours lecture. Two hours laboratory. An advanced study of automated systems and applications for the Industrial Technician.

TKI 4213/6213. Survey of Energy Sources and Power Technology. (3) (Prerequisite: three semester hours physical science or other physics and junior standing). Three hours lecture. Scientific and applied approaches to energy conversion, transmission, utilization, and conservation. Internal-external combustion, nuclear, fluid, hydroelectric, solar, etc. Current energy problems; lab demonstrations; activities.

TKI 4223/6223. Quality Assurance. (3) (Prerequisites: BQA 2113 and junior standing) Three hours lecture. Concepts and procedures to design, plan, assure and audit quality and quality systems.

TKI 4233/6233. Maintenance Management. (3) (Prerequisite: TKI 4223/6223). Three hours lecture. Understanding of the concepts and practices of Total Productive Maintenance Management, to give a proactive production maintenance strategy for the future.

TKI 4263/6263. Manufacturing Technology & Processing. (3) (Prerequisite: TKI 3363). One hour lecture. Four hours laboratory. Interpretation of modern industry duplicates the life cycle of an industrial enterprise in a laboratory environment.

TKI 4303/6303. Industrial Robotics. (3) (Prerequisite: TKI 4103). Two hours lecture. Two hours laboratory. A study of industrial robotics and applications for production supervisors.

TKI 4363/6363. Manufacturing Systems. (3) (Prerequisites: TKI 4223/6223 and MGT 3114). Three hours lecture. Understanding and application of the basic concepts of modern manufacturing process management systems, with regards to quality, just-in-time, lean manufacturing and six sigma.

TKI 4413/6413. Evolution of Technology. (3). (Prerequisites: EN 3313 and Senior Standing). Three hours lecture. A discussion and appraisal of modern technology and how the technology we have today evolved from the past and how it now affects mankind in industry.

TECHNOLOGY TEACHER EDUCATION

TKT 1273. Computer Applications. (3) Three hours lecture. The process of incorporating computer applications.

TKT 3001. Practicum in Technology Teacher Education. (1) One hour practicum. Field-based observation of secondary technology students and participation in classroom activities.

TKT 4153/6153. Teaching Business Technology. (3) (Prerequisite: Admission to teacher education for teacher education majors). Three hours lecture. A study of objectives, materials, and teaching methods appropriate for business technology courses.

TKT 3173. Teaching Business Education Skills Subjects. (3) (Prerequisite: Acceptance to teaching internship). Three hours lecture. A study of objectives, materials, and teaching methods appropriate for business education skills subjects.

TKT 3213. Call Center Management. (3) (Prerequisite: TKT 1273 or equivalent and junior standing). Three hours lecture. Presents the strategic, financial and tactical knowledge and skill needed to manage an effective and efficient call center.

TKT 3463. Computer Repair and Maintenance. (3) (Prerequisite: TKT 1273 or BUS 1012 or CSE 1013 and keyboarding proficiency). Two hours lecture. Two hours laboratory. An exploration into hardware functions, operating system and software installation, diagnostic and troubleshooting techniques, and safety.

TKT 3623. Designing Technology Training. (3) (Prerequisite: TKT 1273 or BUS 1012 or CSE 1013 and keyboarding proficiency, TKB 2132, TKB 2122). Three hours lecture. Learning strategies, design and development of technology training programs for organizations.

TKT 4103/6103. Delivery of the Vocational-Technical Instructional Program. (3) Three hours lecture. Methods and techniques of instructing vocational-technical students in the classroom and laboratory setting.

TKT 4143/6143. History and Philosophy of Vocational and Technology Education. (3) Three hours lecture. History and development, aims and purposes of vocational education.

TKT 4183/6183. Coordination of Part-Time Education. (3) Three hours lecture. Principles of promotion, organization, and operation of part-time cooperative classes in vocational education: instruction in analyzing needs, preparing schedule of processes, developing instructional materials.

TKT 4213/6213. Teaching Basic Business Subjects. (3) (Prerequisite: Acceptance to teacher education.) Three hours lecture. Objectives, materials, and methods of teaching basic business subjects.

TKT 4253/6253. Evaluation and Measurement of Students in Vocational Education and Technology. (3) Three hours lecture. Construction, selection, interpretation, and uses of cognitive and psychomotor evaluation instruments used in vocational-technical programs.

TKT 4314/6314. Content and Methods of Teaching Technology Discovery. (4) Three hours lecture. Two hours laboratory. The course explores concepts, methods, and techniques for managing and organizing materials appropriate for teaching Technology Discovery.

TKT 4323/6323. Content and Methods of Teaching Computer Discovery. (3) Three hours lecture. A study of the objectives, the instructional materials and methods appropriate for teaching Computer Discovery.

TKT 4333/6333. Content and Methods of Teaching Career Discovery. (3) Three hours lecture. A study of the objectives, the instructional materials and methods appropriate for teaching Career Discovery.

TKT 4343. Information Technology Project Management. (3) (Prerequisite: TKT 1273 or BUS 1012 or CSE 1013 and keyboarding proficiency). Three hours lecture. Concepts, skills, tools and techniques involved in information technology project management as it applies in today’s contemporary business environment.

TKT 4463/6463. Methods of Teaching Information and Communication Technology I. (3) (Prerequisite: keyboarding proficiency using the touch method) Three hours lecture. A study of objectives, materials, and teaching methods appropriate for teaching Information and Communication Technology I.

TKT 4623. Delivery and Education of Technology Training. (3) (Prerequisite: TKT 3623). Three hours lecture. Advanced design, live and computer-based
strategies, development, delivery, and evaluation of technology training programs for organizations.

TKT 4833. Senior Seminar in Information Technology Services. (3) (Prerequisites: TKT 3213, TKT 3463, TKB 4283, TKT 4623, and senior standing). Three hours seminar. Field experience under supervision of university staff for directed experience and report in end-user support, project management, and administration.

TKT 4713/6713. Authoring for Instruction. (3) Three hours lecture. (Prerequisite: TKT 1273 or consent of instructor). An introduction to the application of authoring languages for instructional purposes.

TKT 4733/6733. Managing a Multimedia Learning Environment. (3) Three hours lecture. The course examines the process of designing, managing and maintaining a multimedia learning environment.

TKT 4743/6743. Elements of Electronic Desktop Publishing. (3) (Prerequisites: TKB 2543, 4543 or consent of instructor). Two hours laboratory and two hours lecture. Design applications utilizing electronic desktop publishing technologies.

TKT 4753/6753. Teaching and Presenting with Multimedia. (3) (Prerequisite: TKT 4743/6743 or consent of instructor). Three hours lecture. The course deals with the process of using multimedia applications to present instruction and information.

TKT 4813/6813. Introduction to Instructional Systems. (3) Three hours lecture. Introduction to the field of Instructional Systems and the practice of scholarly writing in the field.

TKT 4863/6863. Methods of Teaching Information and Communication Technology II. (3) (Prerequisite: and TKT 4463/6463 and keyboarding proficiency using the touch method or consent of instructor) Three hours lecture. A study of objectives, materials, and teaching methods appropriate for Information and Communication Technology II.

TKT 4873. Professional Seminar in Vocational/Technical Education. (3) (Prerequisites: Admission to Teacher Education and senior standing). Three hours lecture. A seminar dealing with legal, professional, administrative, and curriculum issues as they relate to vocational/technical education.

TKT 4886, 4896. Teaching Internship. (6,6) (Prerequisite: Admission to Teacher Education, minimum GPA of 2.5 overall and in major, and completion of all professional education courses with a C or better). Professional full-day public school teaching experience in two consecutive placements or one 16-week placement in diverse settings under direction of supervising teachers and university supervisor.

TKT 8200. Internship in Career and Technology Education. (1-6) Opportunity under supervision of regular university staff for directed experience and reporting in the major area of interest.

TKT 8213. Content and Methods of Teaching in Career and Technology Education. (3) Three hours lecture. The content of various types of courses in career and technical education; instruction in appropriate techniques and methods.

TKT 8223. Analysis of Workforce Education Programs and Survey Research. (3) Three hours lecture. An examination of workforce development from national and international perspectives and methods and issues in workforce education survey research.

TKT 8243. Research Problems in Instructional Systems & Workforce Development. (3) Three hours lecture. The course explores issues and problems that impact instructional systems and workforce development and assesses the use of research findings for instructional decision making.

TKT 8263. Philosophy and Administration of Career and Technology Education. (3) Three hours lecture. Development of competencies needed in the leadership, administration, management, and supervision of local programs in technology, and career and technical education.

TKT 8273. Contemporary Issues in Curriculum Planning in ISWD. (3) Three hours lecture. Assessment of the contemporary issues that impact curriculum planning in instructional systems and workforce education.

TKT 8723. Instructional Design for Industry. (3) Three hours lecture. Techniques, strategies, and development of instruction for industry.

TKT 8733. Telecommunications: Applications in Scholarship. (3) Three hours lecture. The study and application of telecommunications to professional scholarship and research endeavors; includes data search mechanisms applicable to and in support of graduate program demands.

TKT 8743. Interactive Media. (3) Two hours lecture. Two hours laboratory. Investigation and development of a variety of computer-interactive instructional media.

TKT 8753. Technology Issues for School Administrators. (3) Three hours lecture. Investigates the trends and issues in instructional systems that impact school administrators.

TKT 8763. Seminar in Planning for Instructional Technology. (3) Three hours lecture. An analytical study of techniques and strategies contributing to the establishment and effective operation of functional instructional technology.

TKT 8773. Teaching and Training with Multimedia. (3) Three hours lecture. The process of developing instructional and training materials including adapting existing materials to fit specific objectives and methods in a multimedia learning environment.

TKT 8793. Directed Project in Instructional Technology. (3) Design, development, and presentation of a complex, comprehensive instructional product integrating learning theories with contemporary and/or emerging technologies. Evaluation by jury.

TKT 8803. Design and Evaluation of Instructional Software. (3) Two hours laboratory. Two hours laboratory. (Prerequisite: TKT 4273/6273 and hypermedia authoring experience). Analysis, synthesis, and evaluation of instructional software designed for and applied to varied learning situations.

TKT 8813. Issues in Distance Education. (3) Three hours lecture. This course investigates such issues as administration, implementation, instructional challenges, and evaluation in distance education environments including interactive video and online courses.

TKT 8833. Design and Implementation of Data Networks. (3) Three hours lecture. This course explores the design and implementation of data networking systems that are appropriate for instructional and research environments.

TKT 9213. Foundations, Trends and Issues in Workforce Development, Technology and Leadership Education. (3) Three hours lecture. This course examines the foundations, trends and issues in workforce, technology and leadership education and their impact on teaching and learning.

**ANIMAL HEALTH SCIENCES**

Office: College of Veterinary Medicine (Wise Center)

VS 1012. Introduction to Veterinary Medicine Careers. (2) Two hours lecture. A survey of careers available to graduate veterinarians.

VS 2033. Diseases of Poultry. (3) (Prerequisite: VS 2014 or course in poultry physiology). Two hours lecture. Two hours lecture-demonstration and laboratory. Survey of cause, effects, diagnosis, prevention, and control of common poultry diseases.

VS 3014. Anatomy and Physiology. (4) Three hours lecture. Two hours laboratory. A survey of structure and function of animal body systems and a study of their interrelationships.

**VETERANS TRANSITION PROGRAM**

VTP 1001. Veteran/Service Member Transition (1) (Prerequisite: Veteran or Service member, and currently enrolled in the V-TAC program) One hour lecture. Introduction of skills that veterans and current military members need to transition to a college academic life style.

Department of WILDLIFE, FISHERIES and AQUACULTURE

Ofice: 109 Thompson Hall

Professors Avery, Burger, D’Abramo, Demarais, Dibble, Jackson, Kaminski, Leopold (Head), Li, Miranda**, Schramm**, Tucker; Associate Professors Hunt, Jones, Minchew, Vilella and Wise; Assistant Professors Belant, Godwin*, Greenway, Griffin*, Guyton, Jones, Mischek, Minnis, Riffell, Strickland, Wang and West (* - adjunct faculty; ** - U.S.D.I.)

WFA 1102. Wildlife and Fisheries Professions. (1) (Prerequisite: Freshman or Sophomore standing). Two hour lecture. Orientation to the interdisciplinary and applied nature of wildlife and fisheries management and related fields, emphasizing the department, college, and university; student roles and responsibilities; and career opportunities.

WFA 3013. Human-Wildlife Conflicts Internship. (3) (Prerequisite: consent of instructor) Professional experience in human-wildlife conflict management or research.

WFA 3031. Introductory Wildlife/Fisheries Practices. (1) (Prerequisite: Junior standing). Field exercises and practical exposure to research and management of wildlife and fish species and habitats in Mississippi.
WFA 3133. Applied Aquatic and Terrestrial Ecology. (3) (Prerequisites: BIO 1134 and BIO 1144). Two hours lecture. Four hours laboratory, alternate weeks. The application of ecological principles which serve as a basis for the management of wildlife and fisheries in terrestrial and aquatic habitats.

WFA 4121. Wildlife and Fisheries Biometrics Laboratory. (1) (Prerequisite: ST 3123; Co-requisite: WFA 4122). Four hours laboratory. Alternate weeks. Application of basic statistical analytical tools to address wildlife and fisheries management/research questions.

WFA 4122 Wildlife and Fisheries Biometrics. (2) (Prerequisite: ST 3123; Co-requisite: WFA 4121). Two hours lecture. Application or basic statistical analytical tools to address wildlife and fisheries management/research questions.

WFA 4133/6133. Fisheries Science (3) (Prerequisite: ST 3123 or equivalent). Two hours lecture. Four hours laboratory, alternate weeks. Study of the biological parameters of fish populations.

WFA 4153/6153. Principles of Wildlife Conservation and Management. (3) Two hours lecture. Four hours laboratory on alternate weeks. Principles of game management; habitat improvement; wildlife techniques; public relations.

WFA 4173/6173. Fish Physiology. (3) Two hours lecture. Four hours laboratory, alternate weeks. Basic anatomy and physiology of major systems in fish: integration of the physiological systems as they function during development, growth and maturation.

WFA 4183/6183. Principles and Practices of Aquaculture. (3) Two hours lecture. Two hours laboratory, alternate weeks. Principles and applications to the farming of marine and freshwater species of fish, crustaceans, and mollusks throughout the world.

WFA 4193/6193. Crustacean and Molluscan Aquaculture. (3) Two hours lecture. Four hours laboratory, alternate weeks. General biology and methods associated with the culture of crustaceans and molluscan species grown throughout the world.

WFA 4221/6221. Limnology Laboratory. (1) (Prerequisite: WFA 3133 or consent of instructor; Co-requisite: WFA 4222/6222). Four hours laboratory skills required to evaluate freshwater ecosystems.

WFA 4222/6222. Limnology. (2) (Prerequisite: WFA 3133 or consent of instructor; Co-requisite WFA 4223/6221). Two hours lecture. The physical, chemical and biological processes underlying the function and productivity of freshwater ecosystems.

WFA 4232/6223. Identification of Aquatic and Terrestrial Plants. (3) (Prerequisite: WFA 3133 or equivalent). Two hours lecture. Four hours laboratory. Identification, taxonomy, ecology and management of freshwater and cover plants.

WFA 4243/6243. Wildlife Techniques. (3) (Prerequisite: Junior or Senior standing or consent of instructor). Two hours lecture. Four hours laboratory. Contemporary research and management techniques and tools for wildlife populations and habitats.

WFA 4253/6253. Application of Spatial Technologies to Wildlife and Fisheries Management (3) (Prerequisite: Sr. standing or consent of Instructor). Two hours lecture. Four hours laboratory weekly. Practical Application of Global Positioning Systems and Geographic Information Systems to Wildlife and Fisheries Management.

WFA 4263/6263. Wildlife Diseases. (3) Two hours lecture. Four hours laboratory, alternate weeks. Effects and management of parasites and diseases in wild bird and mammal populations. (Same as CVM 4263/6263).

WFA 4273/6273. Ecology and Management of Human-Wildlife Conflicts. (3) (Prerequisites: WFA 1102 and WFA 3133, or consent of instructor) Three hours lecture. Ecological principles and management approaches to resolve human-wildlife conflicts.

WFA 4283/6283. Human-Wildlife Conflict Techniques. (3) (Prerequisites: WFA 1102 and WFA 3133, or consent of instructor) Three hours lecture. Discussion, demonstration, and application of techniques used to resolve human-wildlife conflicts.

WFA 4313/6313. Fisheries Management. (3) (Prerequisite: WFA 3133 or consent of instructor). Two hours lecture. Laboratories alternate weeks. Principles of fisheries management and methods for assessment and analysis of fish populations and aquatic habitats.

WFA 4323/6323. Wildlife Nutrition and Physiology. (3) Two hours lecture. Four hours laboratory. Alternate weeks. Nutrition and physiology of aquatic and terrestrial wildlife, with emphasis on understanding life history strategies and functional adaptations to habitat and environmental variation.

WFA 4333/6333. Fish and Shellfish Nutrition. (3) (Prerequisites: CH 2503 and CH 2501 or BCH 3613). Three hours lecture. Fundamental and applied aspects of the nutrition of fish, crustacean, and mollusk species including feeding behavior, nutritional ecology, energetics, and nutrient requirements.

WFA 4343/6343. Pond and Stream Management. (3) (Prerequisite: Junior or Senior standing or consent of instructor). Two hours lecture. Four Hours Laboratory alternate weeks. Ecological foundations and management techniques for fisheries in small impoundments and streams.

WFA 4353/6353. Fish and Wildlife Policy and Law Enforcement. (3) (Prerequisite: Sr. standing or consent of instructor). Three hours lecture. A survey of the major content areas of fish and wildlife policy and law enforcement. Emphasis is on the fundamentals of conservation policies and laws.

WFA 4363/6363. Wildlife and Fisheries Administration and Communication. (3) (Prerequisite: Junior standing) Two hours lecture. Three and one-half hours lab. Administrative and communicational techniques and skills in the workplace and political environments of wildlife and fisheries organizations.

WFA 4373/6373. Principles and Practice of Conservation in Agricultural Landscapes. (3) (Prerequisites: WFA 1213 or consent of instructor). Two hours lecture. Four hours laboratory, alternate weeks. Introduces theoretical background for ecological conservation in agricultural landscapes with focus on the role of USDA Farm Bill programs in achieving conservation goals.

WFA 4383/6383. Wetlands Ecology and Management. (3) Two hours lecture. Four hours laboratory, alternate weeks. Hydrology, soils and biogeochemistry of wetlands; structure and function of important wetland types; wetland management for wildlife and fisheries; wetland creation and restoration.

WFA 4394/6394. Waterfowl Ecology and Management. (4) (Prerequisite: WFA 3133, WFA 4153, senior standing, or consent of instructor). Three hours lecture. Four hours laboratory. Annual ecology of North American waterfowl, habitat, population ecology, and management, waterfowl identification, field trips, management plan, and current issues.

WFA 4423/6423 Herpetology. (3) (Prerequisites: Eight hours of zoology). Two hours lecture. Four hours laboratory, alternate weeks. Evolution, systematics, biology and ecology of reptiles and amphibians.

WFA 4433/6433. Mammalogy. (3) (Prerequisite: Eight hours of zoology). Two hours lecture. Three hours laboratory. Evolution, systematics, and ecology of mammals, with emphasis on North American groups.

WFA 4443/6443. Ornithology. (3) (Prerequisite: Eight hours of zoology). Two hours lecture. Three hours laboratory. Recent and fossil avifauna of the world; its origin, distribution, classification, and biology.

WFA 4453/6453. Ichthyology. (3) (Prerequisites: Eight hours of zoology). Two hours lecture. Three hours laboratory. Structure, evolution, classification, and life histories of fishes of the world with emphasis on North American freshwater forms.

WFA 4463/6463. Human Dimensions of Fish and Wildlife Management. (3) (Prerequisite: Jr. standing, or consent of instructor). Three hours lecture. Survey of the major content areas of human dimensions. Emphasis on the considerations and implications associated with measuring, evaluating and influencing people’s attitudes and behaviors.

WFA 4473/6473. Wildlife and Fisheries Practices. (3) (Prerequisite: Senior standing) Two hours lecture. Four hours laboratory. The integration of principles of ecology, wildlife and fisheries techniques and policies for effective planning and implementation of natural resource management.

WFA 4483/6483. Seminar in Tropical Biology. (3) (Prerequisites: WFA 3133 or consent of instructor). One hour lecture. Four hours laboratory. An introduction to the composition and function of tropical ecosystems of the New World.

WFA 4484/6484. Upland Avian Ecology and Management. (3) (Prerequisites: WFA 3133 and WFA 4153 and senior standing or consent of instructor). Three hours lecture. Four hours laboratory. The application of ecological principles to management of wildlife populations, focusing on avian species and communities inhabiting upland ecosystems.

WFA 4494/6494. Large Mammal Ecology and Management. (3) (Prerequisites: WFA 3133 and WFA 4153 and senior standing). Three hours lecture. Four hours laboratory, alternate weeks. Ecological principles and applied methods used in management of large mammals.

WFA 4512/6512. Advanced Topics in Human-Wildlife Conflicts. (2) (Prerequisites: WFA 4273/6273, WFA 4283/6283, or consent of instructor) Two hours lecture. Discussion, synthesis, and presentation of current issues in Human-Wildlife conflicts. Development of manuscripts and research proposal.

WFA 4521/6521. Advanced Topics in Human-Wildlife Conflicts II. (1) (Prerequisite: WFA 4512/6512) One hour lecture. Conduct data collection, analysis, interpretation, and writing of scientific manuscripts in instructor-approved area of human-wildlife conflicts.

WFA 8134. Research Methods in Wildlife and Fisheries Sciences. (4) (Prerequisites: Graduate standing; ST 8114). Three hours lecture. Four hours laboratory. Graduate level introduction to application of scientific methods to wildlife and fisheries ecology and management.

WFA 8144. Theory of Wildlife Population Ecology. (4) (Prerequisite: WFA 3133, ST 3133 or consent of instructor.) Three hours lecture. Two hours laboratory, workshops. Theory of wildlife populations ecology including demography, life history strategies, population regulation, predation, and competition. Basic methods of data collection and population sampling.

WFA 8154. Quantitative Applications in Wildlife Population Ecology. (4) (Prerequisite: WFA 8144, ST 8114 or consent of instructor). Three hours lecture. Four hours laboratory weekly. Application of basic statistical analytical tools to address natural resource management research questions.

WFA 8212. Communication Skills in Wildlife and Fisheries. (2) (Prerequisite: Graduate student status in the Department of Wildlife and Fisheries). Two hours lecture. Effective strategies for professional communication to scientific and lay audiences in the fields of wildlife, fisheries, and other natural resources sciences and management.

WFA 8223. Management of Impounded River Ecosystems (3) (Prerequisites: WFA 6135/4135 or equivalent). A survey of guidance and criteria for managing reservoirs and associated riparian environments to enhance fisheries. Focus is on managing fish and their environment.
**WFA 8243. Conservation Biology.** (3) (Prerequisites: WFA 3133, BIO 3103 or consent of instructor). Three hours lecture. Theory and applications of conservation biology, measures of biodiversity, ecological geography, measures and treatments of decline.

**WFA 8273. Advanced Fisheries Management.** (3) (Prerequisites: WFA 4133/6133 and WFA 4313/6313 or consent of instructor) Three hours lecture. Field exercises during spring break. Advanced treatment of the multidimensional aspects of fisheries management in a global setting with emphasis on setting realistic objectives and establishing appropriate strategy.

**WFA 8343. Conceptual Ecology and Natural Resource Management.** (3) (Prerequisites: WFA 3133 or equivalent or consent of instructor). Three hours lecture. A forum to discuss current literature and theory that advances the study of community ecology and its application to natural resource management.

**WFA 8344. Wildlife Habitat Analysis and Management.** (4) (Prerequisite: WFA 4313 or consent of instructor). Three hours lecture. Four hours laboratory alternate weeks. Identification, ecology, analysis and management of plant communities of value to upland and wetland game species of North America.

**WFA 8413. Advanced Fishery Science.** (3) (Prerequisites: WFA 4133/6133 and ST 3123, or equivalents). Two hours lecture. Two hours laboratory. Estimation and interpretation of vital statistics of fish populations: analysis of fishery data using computers; models for assessment of fish stocks.

**WFA 8423. Applied Bayesian Statistics in Ag/Natural Resources.** (3). Two hours lecture. Four hours laboratory, alternate weeks. Bayesian statistics and Bayesian hierarchical models in wildlife, fishery, agricultural and other natural resource management applications.

**WFA 8424. Applied Aquatic Biogeochemistry.** (3). (Prerequisite: Instructor discretion). Two hours lecture. Two hours laboratory. Theory and application of aquatic biogeochemistry and water quality principles in aquatic systems through lecture and literature discussions. Laboratory sessions will encompass real-world techniques in water quality sampling and analysis.
IV. FACULTY, EMERITI and STAFF
2009-2010

GILES DISTINGUISHED PROFESSORS
Dr. Janice E. Chambers
Dr. Keith Coble
Dr. Arthur G. Cosby
Dr. Louis R. D’Abramo
Dr. Robert L. King
Dr. J. Elton Moore
Dr. James Newman, Jr.
Dr. Allison Pearson
Dr. David R. Shaw
Dr. Rattasingham Shivaji
Dr. W. Glenn Steele
Dr. Rayford B. Vaughan, Jr.

FACULTY

JAMES VINCENT AANSTOOS, Associate Research Professor, Geosystems Research Institute, Ph.D., Purdue University, 1996
CRAIG J. ALARCON, Assistant Professor, Asst Dir Bands, Band, DMA, University of Iowa, 2007
BEN R. ABADIE, Professor, Department of Kinesiology, EdD, University of Southern MS, 1986
SHERIF Y. ABDULWAED, Assistant Professor, Electrical and Computer Engineering, Ph.D., Foreign Institution, 2002
LARRY T. ABERNATHY, Assistant Research Professor, Social Science Research, Ph.D., University of Southern MS, 1994
MATTIE LOU ABRAHAM, Assistant Professor, General Library, MLS, University Of Texas At Austin, 1971
JAMES H. ADAMS, Associate Professor, Instructional Syst & Workforce Devl, EdD, Oklahoma State University, 2000
WILLIAM L. ADAMS, Extension Instructor, Animal & Dairy Science, MS, Mississippi State University, 1987
CAROLYN E. ADAMS-PRICE, Associate Professor, Psychology, Ph.D., West Virginia University, 1988
NOEL D. ADDY, Associate Professor, School of Accountancy, Ph.D., University of Florida, 1985
ANATOLIS ANAFAJIELS, Professor, Physics & Astronomy, Ph.D., Foreign Institution, 1999
STAMATIS AGIOVLASITIS, Assistant Professor, Department of Kinesiology, Ph.D., Oregon State University, 2007
KWERU G. ALISON, Assistant Professor, Political Science and Public Adm, Ph.D., Clemson University, 2009
ERIN YONG AKIN, Clinical Instructor, CVM Clinical Science Department
VLADIMIR J. ALARCON, Assistant Research Professor, Geosystems Research Institute, Ph.D., Mississippi State University, 2000
AHMAD Z. ALBANA, Associate Research Professor, Electrical and Computer Engineering, Ph.D., Southern Illinois Univ-Carbondale, 2010
VAN L. ALEXANDER, Associate Extension Professor, 4-H Youth Development, MEED, Mississippi State University, 1993
ALBERT J. ALLEN, Professor, Agricultural Economics, Ph.D., Mississippi State University, 1977
EDWARD B. ALLEN, Associate Professor, Computer Science and Engineering, Ph.D., Florida Atlantic University, 1995
PAUL W. ALLEN, Lecturer, Meridian Division of Business, DBA, Mississippi State University, 1994
PETER J. ALLEN, Assistant Professor, FWRC - Wildlife and Fisheries, Ph.D., University of California-Davis, 2003
THOMAS WARD ALLEN, Asst Extension/Research Prof, Delta Research and Extension Center, Ph.D., Auburn University, 2003
SHIRINDHI S. AMBINAKUDIGE, Assistant Professor, Geosciences, Ph.D., University of Mississippi, 2003
TERRY L. AMBURGEY, Professor, FWRC - Forest Products, Ph.D., North Carolina State University, 1994
ELTON P. AMBURN, Associate Research Professor, Geosystems Research Institute, Ph.D., University Of North Carolina, 1994
VALENTINE G. ANANTHARAJ, Assistant Research Professor, Geosystems Research Institute, Ph.D., Mississippi State University, 2010
PATRICE NICOLE ANDERSON, Lecturer, Art, BFA, Mississippi State University, 1997
THOMAS P. ANDERSON, Assistant Professor, English, Ph.D., Vanderbilt University, 2002
WILLIAM CHADWICK ANDERSON, Visiting Assistant Professor, Art, MFA, Mississippi State University, 2002
GARY LEE ANDERTON, Lecturer, Eng - Vicksburg Center, Ph.D., University Of Texas At Austin, 1997
GORDON L. ANDREWS, Extension Professor, Delta Research and Extension Center, Ph.D., Mississippi State University, 1972
KELLI MCPEAL ANTHONY, Instructor, Communication, MA, University Of Alabama, 2001
KENNETH VANCE ANTHONY, Lecturer, Curriculum,Instruction & Special Ed, Ph.D., Mississippi State University, 2009
RAMON A. ARANCIBIA, Assistant Research Professor, Pontotoc Ridge-Flatwoods Branch Exp. Ph.D., Louisiana State University/A&M, 2003
TODD MARLOW ARCHER, Assistant Professor, CVM Clinical Science Department, DVM, Mississippi State University, 2006
KEVIN J. ARMSTRONG, Associate Professor, Psychology, Ph.D., Illinois Institute of Technology, 1992
REBECCA P. ARMSTRONG, Instructor, Psychology, MS, University of Southern MS, 1985
ANTONYRAJ AROCKIASAMY, Assistant Research Professor, Ctr for Advanced Vehicular Systems, Ph.D., Foreign Institution, 1999
SADIK C. ARTUNC, Professor and Head, Landscape Architecture, MLA, University Of Michigan-Ann Arb, 1979
THEOSIBE BUFORD ATKINSON, Assistant Professor, English, Ph.D., Louisiana State University/A&M, 2001
DANIEL H. AUSTIN, Lecturer, English, MA, Mississippi State University, 2008
FRANK W. AUSTIN, Associate Professor, CVM Pathobiology/Population Med Dep, Ph.D., Louisiana State University/A&M, 1988
JIMMY L. AVERY, Extension Professor, Delta Research and Extension Center, Ph.D., Louisiana State University/A&M, 1997
GARY R. BACHMAN, Asst Extension/Research Prof, Coastal Research & Extension Center, Ph.D., Ohio State University, The, 1998
R. HART BAILEY, Associate Professor, CVM Pathobiology/Population Med Dep, Ph.D., Texas A&M University-Main Camp, 1994
PETER STUART BAIN, Associate Professor, Art, MFA, Virginia Commonwealth Universi, 2000
JANET P. BAIRD, Extension Instructor, Center for Governmental Technology, MBA, Mississippi State University, 1996
RICHARD E. BAIRD, Professor, Entomology and Plant Pathology, Ph.D., University Of Tennessee-Knoxvi, 1984
GERALD T. BAKER, Professor, Entomology and Plant Pathology, Ph.D., Oregon State University, 1982
JASON COLBY BAKER, Assistant Professor, Department of Music, DMA, The University Of North Texas, 2004
BRIAN S. BALDWIN, Professor, Plant and Soil Sciences, Ph.D., New Mexico State Univ, 1989
MICHAEL B. BALLARD, Professor, General Library, Ph.D., Mississippi State University, 1983
DOUGLAS JOHN BAMMANN, Professor, Mechanical Engineering, Ph.D., University of Illinois-Urbana, 1991
ALEJANDRO BANDA, Associate Clinical Professor, CVM MS Poultry Diagnostic Lab, Ph.D., University of Georgia, 2002
JOANNA BANICESECU, Professor, Computer Science and Engineering, Ph.D., Polytechnic University, 1996
ROBERT STEVEN BANIK, Instructor, Mathematics & Statistics, MS, Mississippi State University, 2007
ERICA D. BARNES, Clinical Instructor, CVM Clinical Science Department, DVM, Mississippi State University, 2003
MARY KATHRYN BARBIER, Associate Professor, History, Ph.D., University Of Southern Ms, 1998
SIMONA M. BARBU, Lecturer, Department of Music, MMED, Southern Methodist Univers, 2006
DANNY ALAN BAREFIELD, Extension Professor, Agricultural Economics, Ph.D., Texas A&M University-Main Camp, 1993
H. MICHAEL BARNES, Professor, FWRC - Forest Products, Ph.D., State Univ Of Ny Coll Environ', 1973
BARRY J. BARNETT, Professor, Agricultural Economics, Ph.D., University Of Kentucky, 1993
TIMOTHY RAY BARNETT, Professor, Management & Information Systems, DBA, Mississippi State University, 1999
BEATRIZ BARRANTES-MARTIN, Assistant Professor, Foreign Languages, Ph.D., Arizona State University, 2005
AMY K. BARTON, Instructor, Dean of Engineering, MA, Mississippi State University, 1999
AMY M. BASS, Lecturer, AOE - Academic Outreach, MS, Mississippi State University, 1999
TOBY GLENN BATES, Assistant Professor, Meridian Division of Arts & Science, Ph.D., University of Mississippi, 2006
BRITTANY S. BAUGHMAN, Assistant Clinical Professor, CVM MS Veterinary Diagnostic Lab, DVM, Mississippi State University, 2003
DEBBIE J. BEARD, Assistant Research Professor, Chemistry, Ph.D., Mississippi State University, 1995
JASON M. BEHRENDS, Asst Extension/Research Prof, Food Sci Nutrition Hlth Promo, Ph.D., Texas A&M University-Main Camp, 2004
JERROLD L. BELANT, Assistant Professor, FWRC - Wildlife and Fisheries, Ph.D., University of Alaska Fairbanks, 2006
BELINDA BENNETT-OTT, Lecturer, Meridian Division of Business, DBA, Mississippi State University, 1998
BETHANY S. BENTON, Assistant Clinical Professor, CVM MS Veterinary Diagnostic Lab, DVM, Mississippi State University, 2003
JAMES D. BENTON, Lecturer, Meridian Division of Business, DBA, Mississippi State University, 1998
MATTHEW A. BENTON, Assistant Professor, Psychology, MS, Texas A&M University, 2006
GARY J. BENTON, Lecturer, Meridian Division of Business, DBA, Mississippi State University, 1999
BARBARA T. BENTON, Lecturer, Meridian Division of Business, DBA, Mississippi State University, 1999
GARY L. BENTON, Lecturer, Meridian Division of Business, DBA, Mississippi State University, 1999
RONNIE W. WHITE, Extension Professor and Leader, School of Human Sciences, EdD, Mississippi State University, 1993
THOMAS D. WHITE, Professor, Civil and Environmental Engineering, Ph.D., Purdue University, 1961
REBECCA MCLAUCHLIN WHITTEN, Instructor, English, MA, University of North Alabama, 2001
HOLLY G. WILEY, Instructor, Department of Kinesiology, Ph.D., Mississippi State University, 1987
Gerald W. WILKERSON, Associate Professor, Landscape Architecture, MLA, Louisiana State University/A&M, 1988
S. T. WILLARD, Professor and Head, Biochemistry & Molecular Biology, Ph.D., Texas A&M University-Main Camp, 1996
KENNETH O. WILLEFORD, Professor, Biochemistry & Molecular Biology, Ph.D., University of California-Riverside, 2003
CARRICK C. WILLIAMS, Assistant Professor, Psychology, Ph.D., Michigan State University, 2007
FRANKIE KEELS WILLIAMS, Associate Professor and Head, Leadership and Foundations, Ph.D., Univ Of South Carolina, 1996
BYRON WILLIAMS, Associate Extension/Research Prof, Food Sci Nutrition Hlth Prom, Ph.D., Mississippi State University, 2004
KEVIN DONALD WILLIAMS, Assistant Professor, Communication, MA, University of Oklahoma, 2005
LAKIESHA NICOLE WILLIAMS, Assistant Professor, Ag & Bio Engineering, Ph.D., Mississippi State University, 2006
MARK-ANDREW WILLIAMS, Assistant Professor, Plant and Soil Sciences, Ph.D., Kansas State University, 2001
MICHAEL V. WILLIAMS, Assistant Professor, History, Ph.D., University of Mississippi, 2002
RONALD DANIEL WILLIAMS, Assistant Professor, Food Sci Nutrition Hlth Prom, Ph.D., University of Alabama, 2006
EMILY G. WILLIAMSON, Instructor, Biological Sciences, MS, University of Mississippi, 1987
ROBERT W. WILLS, Associate Professor, CVM Pathobiology/Population Med Dep, Ph.D., Ohio State University, 1996
JOE D. WILMOTH, Assistant Professor, School of Human Sciences, Ph.D., Oklahoma State University, 2005
FLOYD JEE WILSON, Clinical Professor, CVM MS Veterinary Diagnostic Lab, DVM, University of California-Davis, 1970
Gloria R. Wilson, Lecturer, Communication, EDS, Mississippi State University, 1997
Kathy Brandwood Wilson, Lecturer, Meridian Division of Education, MED, Mississippi State University, 1979
Jeffrey A. Winger, Professor, Physics & Astronomy, Ph.D., Iowa State University, 1987
Joshua Brian Winter, Instructor, Physics & Astronomy, MS, Mississippi State University, 2002
Raymond S. Winton, Professor, Electrical and Computer Engineering, Ph.D., Duke University, 1972
David O. Wipf, Professor, Chemistry, Ph.D., Indiana University Bloomington, 1989
David J. Wise, Extension/Research Professor, Delta Research and Extension Center, Ph.D., Mississippi State University, 1962
Dwayne A. Wise, Professor, Biological Sciences, Ph.D., Florida State University, 1972
William M. WiseMAN, Professor & Director, Stennis Inst of Govt and Comm Dev, Ph.D., Mississippi State University, 1986
Margaret Turner Wixon, Lecturer, AOCE - Academic Outreach, MED, Delta State University, 2002
SHELLRILLA A. WIGUL, Lecturer, Curriculum,Instruction & Special Ed, MS, Mississippi State University, 1984
Mary Katherine WolVERTON, Lecturer, Aerospace Engineering, MS, Mississippi State University, 1984
Robert E. WOLVERTON, Associate Professor, General Library, EdD, Mississippi State University, 1990
Robert E. WOLVERTON, Professor, Foreign Languages, Ph.D., University Of North Carolina, 1954
Daniel Wai Chung Wong, Professor and Head, Biochemistry & Molecular Biology, Ph.D., University of Georgia, 1987
Lucy WONG, Instructor, Counseling & Educational Psychology, MS, Hofstra University, 2007
Stanley Clyde WoodSON, Lecturer, Eng - Vicksburg Center, Ph.D., University of Illinois-Urbana, 1993
Mark C. WorThy, Instructor, Physics & Astronomy, MS, University of Alabama -Huntsville, 1994
Sheri L. WorthY, Professor, School of Human Sciences, Ph.D., Texas Tech University, 1997
Darren Wozny, Associate Professor, Meridian Division of Education, Ph.D., Iowa State University, 2002
Carol P. Wright, Lecturer, AOCE - Academic Outreach, EDS, Mississippi State University, 1997
Ronald D. WYMAN, Associate Professor, History, Ph.D., Purdue University, 1968
DANIEL WAI CHUNG WONG, Professor and Head, Counseling & Educational Psychology, Ph.D., University of Georgia, 1987
RICHARD D. WENDELL, Associate Professor, Electrical and Computer Engineering, Ph.D., Duke University, 1979
William M. Wiseman, Professor, History, Ph.D., Foreign Institution, 1993
John E. Wyatt, Associate Professor, Instructional Syst & Workforce Devl, Ph.D., Foreign Institution, 2002
Nita Keys Wyman, Lecturer, The Learning Center, MA, MS University For Women, 1968
Kang XIA, Associate Professor & Director, Mississippi State Chemical Lab, Ph.D., Univ Of Mississippi, 2002
KUI XIE, Assistant Professor, Instructional Syst & Workforce Devl, Ph.D., University Of Oklahoma, 2006
Ming Xiu, Assistant Professor, Aerospace Engineering, Ph.D., Univ Of Missouri-Rolla, 2002
XiangSheng Xu, Professor, Mathematics & Statistics, Ph.D., University Of Texas At Austin, 1988
Xingzhuo Yang, Assistant Professor, Mathematics & Statistics, Ph.D., North Carolina State Univ At R, 2004
Haibo Yao, Assistant Research Professor, Geosystems Research Institute, Ph.D., University Of Illinois-Urbana, 2004
Shantia Yarahmadian, Assistant Professor, Mathematics & Statistics, Ph.D., Indiana University Bloomington, 2008
Marlena Catheriné Yost, Instructor, Biological Sciences, Ph.D., Mississippi State University, 2008
Nicolas H. YouNan, Professor and Head, Electrical and Computer Engineering, Ph.D., Ohio State University, 1988
Carlton C. Young, Assistant Professor, Meridian Division of Education, Ph.D., University of Alabama - Birmingham, 2007
Glen E. Young, Instructor, Department of Kinesiology, MS, Mississippi State University, 1994
Sarah Keita Young, Lecturer, Sociology, MSW, University Of Michigan-Ann Arbor, 2007
Chien Yu, Associate Professor, Instructional Syst & Workforce Devl, Ph.D., Ohio State University, The, 1998
Fei Yu, Assistant Professor, Ag & Bio Engineering, Ph.D., University Of Minnesota-Twin Cities, 2007
ChangHue YUN, Assistant Professor, Computer Science and Engineering, Ph.D., University of Pittsburgh, 2006
RuiPing Yuan, Instructor, Curriculum,Instruction & Special Ed, MA, Teachers Coll Of Columbia Univ, 1989
Meihet Cedin Yuecke, Assistant Professor, FWRC - Forestry, Ph.D., Mississippi State University, 2002
GuoChao Zhang, Assistant Professor, Chemistry, Ph.D., Purdue University, 2002
Guochang Zhang, Assistant Research Professor, Chemical Engineering, Ph.D., Foreign Institution, 2000
Hua Zhang, Associate Professor, Mathematics & Statistics, Ph.D., University of Southern CA, 1998
Jilei Zhang, Professor, FWRC - Forest Products, Ph.D., Purdue University, 1995
Li ZhaGuo, Assistant Professor, Civil and Environmental Engineering, Ph.D., Virginia Tech & State University, 2000
Li ZHANG, Assistant Professor, General Library, MED, University of South Florida, 2002
Siong Zhang, Assistant Professor, Computer Science and Engineering, Ph.D., Brown University, 2006
Yang Zhang, Assistant Research Professor, Cvm For Advanced Vehicul Systems, Ph.D., University of Mississippi, 2007
Zhenyu Zhang, Associate Research Professor, CVM MS Veterinary Diagnostic Lab, Ph.D., Kansas State University, 1997
Meng ZHAO, Assistant Professor, Mathematics & Statistics, Ph.D., Clemson University, 2007

EMERITI FACULTY

A. Jerald Ainsworth, Professor Emeritus of Basic Sciences
JimmY D. AKERS, Professor Emeritus of Electrical and Computer Eng.
TIP HENRY Allen, JR, Professor Emeritus of Political Science
Earl G. Alley, State Chemist and Professor Emeritus of Chemistry
Tom AltHen, Professor Emeritus of Animal and Dairy Sciences
Ronald G. AltHeg, Professor Emeritus of Biological Sciences
Gale R. AmMerrman, Professor Emeritus of Food Science and Tech.
Neil AMos, Professor Emeritus of Curriculum and Instruction
Robert G. Anderson, Professor Emeritus of Communication
Ann P. Andrews, Instructor Emerita of English
Cecil Hunter Andrews, Professor Emeritus of Plant and Soil Sci.
Dale Howard Arner, Professor Emeritus of Wildlife and Fisheries
Kirk Arnett, Professor Emeritus of Information Systems
Robert W. AnH, Professor Emeritus of Economics
Andrew W. Baird, Professor Emeritus of Sociology
Bryan Baker, JR, Professor Emeritus of Animal Science
Everard G. Baker, Associate Professor Emeritus of Chemical Eng
Billie J. Ball, Professor and Department Head Emeritus of Electrical and Computer Engineering
Jack L. Bartlett, Professor Emeritus of Art
Ben F. Barrentine, Professor Emeritus of Biochemistry, Animal Science, and Chemistry
Lida K. Barrett, Professor Emeritus of Mathematics and Statistics and Dean Emerita of the College of Arts and Sciences
Charles B. SAkin, Professor Emeritus of Agronomy
William E. BAtSON, Professor Emeritus of Plant Pathology
Leslie E. B.Uman, Professor Emeritus of Physics
Habib B.A.Zari, Professor Emeritus of Business and Industry
H. Joe Bearden, Professor Emeritus and Department Head Emeritus of Dairy Science
J. Thomas Bell, Professor Emeritus in the Academic Program of the College of Veterinary Medicine
William D. Bell, Associate Professor of History and Chairman Emeritus of the Division of Arts and Sciences, Meridian Campus
A. Wayne Bennett, Dean Emeritus of the James Worth Bagley College of Engineering, Professor Emeritus of Electrical and Computer Engineering
George Bennet, Professor Emeritus of Aerospace Engineering
Gary Benton, Professor Emeritus or Education
Richard D. Benton, Professor Emeritus of Electrical and Computer Engineering
Eula M. BettiN, Associate Professor and Associate Dean Emerita of University Libraries
KRISNAPRASAD G. BHANSALI, Professor Emeritus of Political Sci
Calvin T. Bishop, Professor Emeritus of Landscape Arch.
JoE M. BlackBone, Professor Emeritus of Educational Leadership
Mac ALAN Blaine, Professor Emeritus of Plant and Soil Sciences
BenJamin Blaine, Professor Emeritus of Foreign Languages
Donald J. Blasingame, Emeritus Extension Plant Pathologist
Louis H. Blum, Professor Emeritus of Sociology, Anthropology, and Social Work
Donald Boatwright, Associate Professor Emeritus of Aerospace Engineering
Charles W. Bobbitt, Professor Emeritus of Civil Engineering and Director Emeritus of the Water Resources Research Institute
William Bonney, Professor Emeritus of English
Martha O. Booth, Assistant Professor Emeritus of University Libraries
Charles W. BouC håll, Professor Emeritus of Mechanical Eng.
Albert H. Boyd, Professor and Department Head Emeritus of Plant and Soil Sciences
Charles R. Boyd, Professor Emeritus of Human Sciences
LEROY H. BOYD, Professor Emeritus of Animal and Dairy Sciences
Mike BOYD, Professor Emeritus of Animal and Dairy Sciences
John A. BOyle, Professor Emeritus of Biochemistry and Molecular Biology
HARRY A. JACOBSON, Professor Emeritus of Wildlife and Fisheries
D. CLAYTON JAMES, Distinguished Professor Emeritus of History
MARY A. JASPER, Associate Professor Emerita of Industrial Engineering
IRVIN A. JECOAT, Professor Emeritus of Chemical Engineering
ROBERT JENKINS, Professor Emeritus of History
DAVID P. JENNINGS, Professor Emeritus of Veterinary Medicine
GARY P. JOHNSON, Professor Emeritus of Educational Leadership
LARRY RAY JOHNSON, Professor Emeritus of Industrial Engineering
W. C. JOHNSON, Associate Professor Emeritus of Industrial Technology
E. WILLIAM JONES, Professor Emeritus of Mechanical Engineering
GEORGE WASHBURN, Professor Emeritus of Botany
GORDON C. JOHNSTON, Professor Emeritus of Curriculum & Instruction
E. WYN JONES, Professor Emeritus of the Research Program in the College of Veterinary Medicine
GORDON E. JONES, Professor Emeritus of Physics and Astronomy and Associate Dean Emeritus of the College of Arts and Sciences
WILLIAM FRANK JONES, Professor Emeritus of Agronomy
WILLIAM F. JONES, Professor Emeritus of Plant and Soil Sciences
BOB L. KARR, Professor Emeritus of Forestry
JOHN MORGAN KAYE, Assistant Professor Emeritus of Geology and Geography
DONALD M. KEADY, Professor Emeritus of Geology and Geography
ROBERT KEIRNS, Assistant Professor Emeritus of Veterinary Medicine
THOMAS F. KELLOGG, Professor Emeritus of Biochemistry
MAURICE V. KENNEDY, Professor Emeritus of Biochemistry
JESSE MARIA LOPEZ, Professor Emerita of Foreign Languages
JOE KIATHENA, Professor and Head Emeritus of Educational Psychology
LOIS T. KILGORE, Professor Emerita of Home Economics
WALLACE E. KILLECRAS, Professor Emeritus of Agricultural Econ.
EMMETT A. KIMBROUGH, JR., Professor Emeritus of Agric. and Biological Engineering
PAMELA C. KIRK, Professor Emerita of Health, Physical Education, Recreation and Sport
JEAN V. KISENCHEK, Associate Professor Emeritus of Human Sciences
WILLIAM E. KIGHT, Adjunct Professor Emeritus of Agronomy
HAROLD A. KOELLING, Professor Emeritus of Chemical Engineering
THEODOR KOHLES, Professor Emeritus of Financial Economics
RICHARD D. KOSEK, Professor Emeritus of Physics and Astronomy
CHIANG-HAI KUO, Professor Emeritus of Chemical Engineering
MARK E. KURTZ, Professor Emeritus of Plant and Soil Sciences
JAMES D. LANCASTER, Distinguished Professor Emeritus of Agronomy
SAMUEL B. LAND, Professor Emeritus of Forestry
WARD A. LANE, Professor Emeritus of Curriculum and Instruction
MARION L. LASTER, Professor Emeritus of Entomology and Entomologist
TROY J. LASWELL, Professor Emeritus of Geology and Geography
DAVID LAUGHLIN, Professor Emeritus of Agricultural Economics
MOZELLE P. LEACH, Professor Emeritus of Curriculum and Instruction
C. K. LEE, Associate Dean Emeritus for International Programs and Professor Emeritus of Education
JOHN E. LEE, JR., Professor and Head Emeritus of Agricultural Econ.
STEPHEN A. LEMAY, Professor Emeritus of Marketing
GEORGE R. LEWIS, Professor and Director of Library Services Emeritus
HARVEY S. LEWIS, Dean Emeritus of Business and Industry, and Professor Emeritus of Finance
R. RAINLEY LITTLE, Associate Professor Emeritus of Computer Science and Engineering
JOHN FLOWERS LOCKE, Professor Emeritus of Botany
ANA MARIA LOPEZ, Professor Emerita of Foreign Languages
MARIANO LOPEZ, Professor Emeritus of Foreign Languages
NED B. LOWELL, Professor and Head Emeritus of Educational Leadership
CHARLES V. LUCAS, Professor Emeritus of Mathematics and Statistics
ROBERT A. HERSHBARGER, Peter K. Luken Chair of Insurance and Professor Emeritus of Finance and Economics
DUANE E. LYON, Professor Emeritus of Forest Products
DONALD J. MABRY, Professor Emeritus of History
CAMERON R. MAN, Professor and Head Emeritus of Landscape Arch.
RICHARD A. MARGITZ, Associate Professor Emeritus of Anthropology
JOHN F. MARSZALEK, Distinguished Professor Emeritus of History
EDWARD CURTIS MARTIN, JR., Professor Emeritus of Landscape Arch.
DIAN L. MARTIN, Professor Emeritus of Plant and Soil Sciences
JAMES H. MARTIN, Professor Emeritus of Food Science and Technology
ROBERT J. MARTIN, Specialist Emeritus, Mississippi Cooperative Extension Service
C. WAYNE MAYS, Professor Emeritus of Mathematics and Statistics
RALPH KENNETH MATHES, JR., Professor and Department Head Emeritus of Agricultural and Biological Engineering
GERALD A. MATHEWS, Associate Professor Emeritus of Computer Sci.
MARY E. MAULDIN, Associate Professor Emerita, University Libraries
NATALIE MAYNOR, Professor Emerita of English
WILLIAM H. McCARTY, Professor Emeritus of Plant and Soil Sciences
WILLIAM A. McCLELLAN, Professor Emeritus of English
J. CLEON MCCULLOUGH, Associate Dean Emeritus and Professor Emeritus of Continuing Education
WILLIE LEE McDaniel, JR., Provost & Vice President Emeritus for Academic Affairs and Professor Emeritus of Engineering
JOE H. MCGIBBERRY, Executive Director Emeritus of Extension and Outreach
JEWEL CHESTER MCKEE, JR., Professor Emeritus of Electrical Engineering, Vice President Emeritus of Research and Graduate Studies
BLAIR MCKINLEY, Professor Emeritus of Animal and Dairy Sciences
BARBARA P. MCLAURIN, Professor Emeritus of Human Sciences
WILLIAM H. McLOUGHLIN, Professor Emeritus of Industrial Engineering
JOHN C. McWHORTER, III, Professor and Head Emeritus of Aerospace Engineering
D. DWIGHT MERCER, Professor and Dean Emeritus of Veterinary Med.
EDWARD E. MENDLE, Professor Emeritus of Animal Sciences
DAVID B. MILLER, Professor Emeritus of Electrical and Computer Engineering
HOWARD W. MILLER, Professor Emeritus of Animal and Dairy Sciences
JAMES E. MILAM, Professor Emeritus of Wildlife and Fisheries
JAMES G. MILLER, Dean Emeritus of Veterinary Medicine
JAMES P. MINYARD, Jr. Professor Emeritus, Chemistry and State Chemist Emeritus, Mississippi State Chemist
LUCEILLE L. MITLIN, Assistant Professor Emerita, Library
E. JAMES MOAK, Professor Emeritus of Forestry
DAVID MORRITT, Professor Emeritus of Educational Leadership and Dean Emeritus of Meridian Branch
LAMAR MOODY, Professor and Head Emeritus of Edu. Leadership
ARNOLD J. MOORE, Dean of Education and Professor Emeritus of Educational Leadership
CHARLES N. MOORE, Professor Emeritus and Head Emeritus of Business Information Systems and Quantitative Analysis and Business Law
GLOVER MOORE, Professor Emeritus of History
WILLIAM F. MOORE, Emeritus Extension Plant Pathologist
EDNA RUTH MORGAN, Emeritus Director of Extension Marketing and Head Emeritus of Marketing, Quantitative Analysis and Business Law
VICTOR NASH, Professor Emeritus of Agricultural Economics
T. EVAN NEBERK, Professor Emeritus of Entomology and Plant Pathology
WILLIAM W. NEEL, Professor Emeritus of Entomology
LYLE ENGNAR NELSON, Professor Emeritus of Agroforestry
WALTER B. NEWSOM, Professor Emeritus of Management
BEVERLY R. NORMENT, Professor Emeritus of Entomology and Plant Pathology
RALPH NULL, Professor Emeritus of Social Work
ELIZABETH A. NYBAKKEN, Associate Professor Emerita of History
EARL CLARENCE O'DEN, Professor Emeritus of Chemical Engineering
DAVID A. O'NAN, Professor Emeritus of Health, Physical Education, Recreation, and Sport
E. C. O'NEAL, Professor Emeritus of Health, Physical Education, Recreation and Sport
JESSE OSWALT, Professor Emeritus of Industrial Engineering
WILL HOYT OWEN, JR., Assistant Professor Emeritus of Accountancy
JOHN K. OWENS, Professor Emeritus of Aeropace Engineering and Professor Emeritus of Education and Director Emeritus of the College of Business and Industry
D. EVETT PETRY, Distinguished Professor Emeritus of Plant and Soil Sci.
DOUGLAS A. R. PEYMAN, Professor Emeritus and Department Head Emeritus of Psychology and Director Emeritus of Marketing
ROBERT L. PHILIPS, JR., Professor Emeritus of English
TRAVIS D. PHILLIPS, Professor Emeritus of Agricultural Economics
HARRIET N. PITRE, Distinguished Professor Emeritus of Botany and Plant Pathology
HAL M. POLK, Associate Professor Emeritus of Music Education
NOEL POLK, Professor Emeritus of English
WALTER K. PORTER, JR., Associate Director Emeritus of the Mississippi Agricultural and Forestry Experiment Station and Emeritus Professor of Agronomy.
MARTHA PRATT, Instructor Emerita of Mathematics and Statistics
JAMES A. PRICE, Assistant Professor Emeritus of Biological Sciences
MELVILLE STANTON PRIEST, Professor Emeritus of Hydraulic Eng.
CHARLES H. PYNE, Associate Professor Emeritus of Anthropology
JANOS RADVANYI, Professor Emeritus of History
RANDALL P. RAFFERTY, Associate Professor Emeritus of University Libraries
ERNESTINE RAINNEY, Professor Emerita of Curriculum and Instruction
DERO SAUNDERS KAMENY, Professor Emeritus of Dairy Production
CARLETON D. RANNEY, Head of the Delta Research and Extension Center Emeritus
FREDDEE RASBERRY, Professor Emeritus of Plant and Soil Sciences
ALEXANDRA C. RAY, Professor Emeritus of Entomology
DENNIS F. RAY, Professor Emeritus of Management
JERRY R. REED, Professor Emeritus of Mathematics and Statistics
PATRICE REEVES, Professor Emeritus of Human Sciences
RALPH L. REEVES, Associate Professor Emeritus of Technology and Education
T. GLEN RIVES, Professor Emeritus of Counselor Education
OSWALD RENDON-HERRERO, Professor Emeritus of Civil Engineering
GEORGE S. RENT, Professor Emeritus of Sociology, Anthropology and Social Work, Associate Provost Emeritus for Academic Affairs
BETTE M. RICE, Associate Professor Emerita of University Libraries
DOUGLAS P. RICHARDS, Professor Emeritus of Forestry, Head Emeritus of Forest and Wildlife Research Center
KITTYTE-DELLE ROBBINS-HERRING, Professor Emerita of Foreign Languages
GAINES MADISON ROGERS, Dean Emeritus of the College of Business and Industry and Professor Emeritus of Finance
JERRY W. ROGERS, Professor Emeritus of Computer Engineering
WILLIAM H. ROGERS, Professor Emeritus of Animal and Dairy Sciences, Professor Emeritus of Food Science Technology and Director Emeritus of the Food Science Institute
F. VIRGINIA ROHDE, Professor Emeritus of Mathematics
CLIFFORD ALLISON ROSE, Professor Emeritus of Physics and Astronomy
ROY D. ROSS, Associate Professor Emeritus of Forestry and Associate Director Emeritus of the Forest and Wildlife Research Center
VICTOR S. ROTH, Professor Emeritus of Agriculture
J. WILLIAM RUSH, Associate Dean Emeritus of the College of Business and Industry
ERNEST EVERETT RUSSELL, Professor Emeritus of Geology and Geography and Curator of the Mississippi Natural History Museum
AVIS J. RUTHVEN, Professor Emerita of Educational Psychology and Director Emerita of Graduate Education
CLIFFORD G. RYAN, Associate Professor Emeritus of History
MARVIN L. SALIN, Professor Emeritus of Biochemistry and Molecular Biology
PATRICIA L. SANDERSON, Associate Professor Emerita of Finance and Economics
ALICE H. SANFORD, Associate Professor Emerita of Curriculum and Instruction
EMERITI FACULTY

JAMES R. SAPPINGTON, Professor Emeritus of Agricultural Information Science and Education
JOHN V. SAUNDERS, Professor Emeritus of Sociology
JUNE K. SCHMITZ, Professor and Associate Dean Emeritus for Technical Services
ROBERT M. SCHOLTES, Professor Emeritus of Curriculum and Instruction
CLARENCE D. SCHULTZ, Associate Professor Emeritus of Poultry Sci.
CHARLEY SCOTT, Dean Emeritus of the Graduate School
ROY SCOTT, Distinguished Professor Emeritus of History
A. D. SEAL, Associate Director Emeritus of the Mississippi Agricultural and Forestry Experiment Station and Professor Emeritus of Agricultural Economics
TERRY SELLERS, JR., Professor Emeritus of Forest Products
GARY A. SHAFER, Professor Emeritus of Architecture
CHARLES W. SHANNON, Professor Emeritus of Food Science and Tech
AUBREY W. SHIELDS, Professor Emeritus of Civil Eng
WILLIAM STEVE SHEPARD, Professor Emeritus of Aerospace Engineering and Director Emeritus of the Diagnostic Instrumentation Analysis Laboratory
MIRIAM J. SHIBUYA, Professor Emeritus of History
ADNAN SHINDALA, Professor Emeritus of Civil Engineering, B.S.
FREDA SHIREY, Professor Emeritus of Agricultural and Biological Engineering
WILLIAM ASBURY SIMMONS, Professor Emeriti of Aeronautical Engineering
JAMES H. SIMPSON, Professor Emeritus of Agricultural Economics
HARRY CHARLES SIMRALL, Associate Director of the College of Engineering and Professor Emeritus of Electrical Engineering
MERRIL S. SIMRALL, Professor Emeritus of Military History
LINDA K. SMITH, Professor Emerita of Music Education
ROBERT W. SMITH, JR., Professor Emeritus of Poultry Science
WILLIAM M. SMYER, Professor Emeritus of Industrial and Systems Engineering
SUSAN SNELL, Associate Professor Emerita of English
RONALD W. SNOW, Research Professor Emeritus
JEAN K. SNYDER, Associate Dean Emerita of the College of Agriculture and Home Economics and Professor and Head Emeritus of Home Economics
CARLTON H. SOLLIE, Professor Emeriti of Sociology
JIMMY L. SOLOMON, Professor Emeritus of Mathematics, Head Emeritus of Mathematics and Statistics, and Dean Emeritus of the College of Arts and Sciences
CHARLES A. SPARROW, Professor Emeritus of Chemical Engineering
PAUL W. SPKES, Professor Emeriti of Mathematics and Graduate Coordinator Emeritus of Mathematics and Statistics
CHARLES L. SPARRISON, Professor Emeritus of Psychology
JAMES A. SPENCER, Professor Emeritus of Plant Pathology
EARL A. STENNIS, Professor and Department Head Emeritus of Agricultural Economics
A. KENT STIFFLER, Professor Emeritus of Mechanical Engineering
ELIZABETH STIFFLER, Professor Emerita of Home Economics
RICHARD L. STILL, Assistant Professor Emeritus of Business Law
BRIANNA STOJANOVIC, Professor Emeritus of Psychology and Microbiology and Head Emeritus of the McKay Food and Enology Laboratory
ELISABETH J. STOJANOVIC, Associate Professor Emerita of Sociology and Anthropology
KATHY ANN STOJANOVIC, Assistant Professor Emerita of Home Economics
MICHAEL J. SULLIVAN, Professor Emeritus of Biocatalysis and Biochemistry
PAULA W. SUNDERMAN, Associate Professor Emerita of English
MARGARET E. SWAIN, Professor Emerita of Social Work
HELEN C. TAKACS, Professor Emerita of Computer Science
ZOLTAN TAKACS, Professor Emeritus of Foreign Languages
DAVID TATUM, Professor Emeritus of Plant and Soil Sciences
CLAYBONE TAYLOR, Professor Emeritus of Physics and Astronomy, Professor Emeritus of Electrical Engineering, and Dean Emeritus of Continuing Education
CLYDE E. TAYLOR, Professor Emeritus in the Office of Special Programs of the College of Veterinary Medicine
FRED W. TAYLOR, Professor Emeritus of Forest Products
GARY N. TAYLOR, Professor Emeritus of Entomology and Computer Graphics
ROBERT P. TAYLOR, JR., Professor Emeritus of Mechanical Engineering and Associate Dean Emeritus of the Bagley College of Engineering
MEREDITH MINGA TAYLOR, Associate Professor Emeritus of Mathematics
EARL WALTER TERRELL, Professor Emeritus of Industrial Education
HELEN H. TERRELL, Professor Emerita of Business Education
CHARLES HILL THOMAS, Professor Emeritus of Poultry Science
EARL R. THOMAS, Professor Emeritus of Sociology
JAMES R. THOMSON, Jr., Professor and Director of Teaching Internship and Certification
J. GIPSON WELLS, Professor Emeritus of Sociology
ELISABETH WELLS-PARKER, Professor Emerita of Psychology
WILLIAM THOMAS WEST, Professor and Head Emeritus of Music Education and Director Emeritus of Bands
FRED R. WERF, Professor Emeritus of Plant and Soil Sciences
CHARLES H. WHITE, Professor Emeritus of Food Science, Nutrition and Health Promotion
EMILIE C. WHITE, Professor and Architecture Branch Librarian Emerita of University Libraries
JACK H. WHITE, Associate Professor Emeritus of English and Director Emeritus of the University Honors Program
LARRY R. WHITE, Associate Professor Emeritus of Finance
DAVID D. WIER, Professor Emeritus of Electrical Engineering
SAMAUL T. WILKES, Professor Emeritus of Educational Leadership
CLYDE V. WILLIAMS, Associate Professor Emeritus of Curriculum and Instruction
JERRY D. WILLIAMS, Professor Emeritus of Music Education
MICHAEL R. WILLIAMS, Professor Emeritus of Entomology and Plant Pathology
ROBERT L. WILLIAMS, Specialist Emeritus, Mississippi Cooperative Extension Service
ROBERT I. WILLMAN, Associate Professor Emeritus of History
GENE D. WILLS, Professor Emeritus of Soil and Plant Sciences
CLIFTON ARLE WILSON, Professor Emeritus of Aeronautical Engineering
JAMES R. WILSON, Professor Emeritus of Educational Psychology
ROBERT P. WILSON, Professor Emeritus of Biochemistry and Molecular Biology
WILLIAM W. WILSON, Giles Distinguished Professor Emeritus of Chemistry
ANN E. WILTROUT, Professor Emerita of Foreign Languages
R. S. WOODFORD, Professor Emeritus of Accounting
JAMES M. WOOLINGTON, Professor Emeritus of Psychological and Brain Sciences
WALTER E. WOOLINGTON, Professor Emeritus of Educational Psychology
B. S. WOFFORD, Professor Emeritus of Accounting
D. J. WOODWARD, Associate Dean Emeritus of the College of Agriculture and Home Economics
JAMES W. WOODWARD, Professor Emeritus of Agricultural Economics
STEVEN WOODWARD, Professor Emeritus of MIS
WILLIAM STEVE SHEPARD, Professor Emeritus of Agricultural Engineering and Director Emeritus of the Diagnostic Instrumentation Analysis Laboratory
VIRGINIA R. WOLFORD, Clinic Nurse, Student Health Center, MSIT, University of Mississippi
GEORGE M. WALKER, Professor Emeritus of Agricultural Information Science and Education
J. L. WALL, Professor Emeritus of Mathematics and Statistics
TIMOTHY A. TRAUGOTT, Professor Emeritus of Forestry
LARRY E. TREVAHAN, Professor Emeritus of Plant Pathology
J. DONALD TROTTER, Associate Vice President Emeritus for Strategic Initiatives
JAMES S. TURNER, Professor Emeritus of Curriculum and Instruction
SUSANJA J. TURNER, Professor and Associate Dean Emerita of University Libraries
ORJA POUND TURNIEFSED, Professor Emerita of Music Education
JOE P. UNDERWOOD, Professor Emeritus of Counseling, Educational Psychology and Special Education
B. M. VAUGHAN, Associate Professor Emeritus of Agricultural Education
RICHARD J. VASEK, Professor Emeritus of Technology & Education and Associate Dean Emeritus of the College of Education
CHARLES E. VAUGHAN, Professor Emeritus of Agronomy
GEORGE L. VERRALL, Associate Professor Emeritus of Economics and Head Emeritus of Finance and Economics
STEPHEN V. WALDHALM, Professor Emeritus of Veterinary Medicine
GEORGE M. WALKER, Professor Emeritus of Agricultural Information Science and Education
DIANE E. WALL, Associate Professor Emeritus of Political Science & Public Administration
JAMES E. WALL, Professor Emeritus of Technology & Education and Associate Dean Emeritus of the College of Education
BILLY C. WARD, Professor Emeritus of Veterinary Medicine
ZAHIR U. WARSII, Professor Emeritus of Aerospace Engineering
THOMAS ARNOLD WASSON, Professor Emeritus of Music Education
JAMES RAY WATSON, Professor Emeritus of Biological Sciences
WILLIAM F. WATSON, JR., Professor Emeritus of Forestry
GEORGE B. WELCH, Professor Emeritus of Agricultural and Biological Engineering
ADMINISTRATIVE and PROFESSIONAL STAFF
CLIFTON F. ABBOTT, Research Associate III (L.PS), Geosystems Research Institute, BS, Mississippi State University, 1995
ERIEE ABBOTT, Graphic Artist, Office of University Relations
JIMMY W. ABRHAM, Associate VP & Executive Direc, Alumni Activities, Ph.D., University of Mississippi, 1985
WILLIAM W. ADEKSON, Project Director, School of Human Sciences, BS, University of Mississippi, 1996
STEPHANIE WAID AGNEW, Instructional Technology Spec, General Library, MSIT, University of Mississippi, 2003
BRANDY NICOLE AKERS, Senior Accountant, HPC, BCA, University of Georgia, 2005
JENNIFER NICHOLE ALBERSON, Project Coordinator, MASEP
ROBERT A. ADAMS, Dairy Herder, Coastal Plain Experiment Station
JENNIFER C. ALLARD, Program Director, Alumni Activities, MSIT, University of Mississippi, 2003
FRANK WHISLER, Professor Emeritus of Plant and Soil Sciences
JILLIAN L. ANDERSON, Administrative Assistant, MSIT, University of Mississippi, 2003
BRENTA B. ANDERSON, Specialist Emeritus of Accounting
MARY J. ANDOL, Business Manager, Food Sci Nutrition Hlth Promo, BBA, Mississippi State University, 1991
WILLIAM L. ANDERSON, Director Emeritus of the Diagnostic Instrumentation Analysis Laboratory
CHARLES G. ANDERSON, County Extension Director III, DeSoto County Extension Serv, 1989
STEVE ANDERSON, University Academic Advising Center, MPPA, Mississippi State University, 1999
VIRGINIA A. ALBERSON, Project Coordinator, MASEP
JAMES W. ALEXANDER, Director Emeritus of the University Honors Program, BS, University of Alabama, 1997
ROBERT M. ALEXANDER, Professor Emeritus of Agricultural Information Science and Education
J. L. ALLSUP, Coordinator, EDS, Mississippi State University, 1997
CHRISTOPHER RYAN AKERS, Research Associate III (L.PS), School of Human Sciences, Ph.D., University of Georgia, 2007
J. R. ANDERSON, Associate Professor Emeritus of English and Director Emeritus of the University Honors Program
LARRY R. WHITE, Associate Professor Emeritus of Finance
DAVID D. WIER, Professor Emeritus of Electrical Engineering
SAMAUL T. WILKES, Professor Emeritus of Educational Leadership
CLYDE V. WILLIAMS, Associate Professor Emeritus of Curriculum and Instruction
JERRY D. WILLIAMS, Professor Emeritus of Music Education
MICHAEL R. WILLIAMS, Professor Emeritus of Entomology and Plant Pathology
ROBERT L. WILLIAMS, Specialist Emeritus, Mississippi Cooperative Extension Service
ROBERT I. WILLMAN, Associate Professor Emeritus of History
GENE D. WILLS, Professor Emeritus of Soil and Plant Sciences
CLIFTON ARLE WILSON, Professor Emeritus of Aeronautical Engineering
JAMES R. WILSON, Professor Emeritus of Educational Psychology
ROBERT P. WILSON, Professor Emeritus of Biochemistry and Molecular Biology
WILLIAM W. WILSON, Giles Distinguished Professor Emeritus of Chemistry
CINDY P. ADAMS, Recruiting Coordinator, Meridian - Recruiting/Marketing, BBA, Mississippi State University, 1985
EMILIE C. WHITE, Professor Emerita of Foreign Languages
JAMES M. WOOLINGTON, Professor Emeritus of Educational Psychology and Professor Emeritus of Psychology
DANIEL W. ADAMS, Professor Emeritus of Accounting
CHARLES G. ANDERSON, County Extension Director III, DeSoto County Extension Serv, 1989
J. R. ANDERSON, Associate Professor Emeritus of English and Director Emeritus of the University Honors Program
MISSISSIPPI STATE UNIVERSITY

PATRICIA B. MOHAN, Business Manager, Police, BS, Mississippi State University, 1990

AMITIKA MOTA, Postdoctoral Associate (Eng), Ctr for Advanced Vehicular Systems, BS, Foreign Institution, 2002

ANDRO MUNDO, Postdoctoral Associate (L,P,S), Chemical Engineering, BS, Foreign Institution, 2005

TRACI L. MONGEON, Extension 4-H Agent I, Choctaw County Extension Service, MS, Mississippi State University, 1998

ADAM D. MONROE, Computer Programmer, Enterprise Information Systems

WILLIAM A. MONROE, Research Associate II (L,P,S), Electron Microscopy

ELIZABETH MONTGOMERY, Research Associate II (L,P,S), Plant and Soil Sciences, BS, Mississippi State University, 2001

MELISSA E. MONTGOMERY, Advancement Coordinator, CVM Office of the Dean, MSIT, Mississippi State University, 2003

JACQUE D. MOODY, Program Coordinator, Holmes Cultural Diversity Center, MSIT, Mississippi State University, 2007

EDWIN E. MOORE, Sr. Systems Analyst & Team Lead, Enterprise Information Systems, MS, Mississippi State University, 2007

GARY D. MOORE, Graphic Designer, Design Research Informatics Lab, BFA, Mississippi State University, 2007

JAYME ILENE MOORE, Technical Assistance Spec, Early Childhood Institute, AAS, Hinds Community College-Raymond, 2007

JOHN PHILIP MOORE, Field Project Manager, Engineering Extension, MS, Kettering University, 1993

KEVIN MOORE, Procurement Manager, Physical Plant Administration, MBA, Mississippi State University, 2006

LYnda K. MOORE, Athletic Academic Counselor, Athletic Academic Advising, BA, Stetson University, 1997

MARY LINDA MOORE, Area Extension Agent II, Alcorn County Extension Service, MS, Mississippi State University, 1997

MELINDA K. MOORE, Accountant, AOC - B & F

NATHAN ALEXANDER MOORE, Director of Development, MS State University Foundation, MPPA, Mississippi State University, 2009

REUBEN B. MOORE, Associate Director, MAPES Administration, Ph.D., Mississippi State University, 1986

SUMMER C. MORD, Coord Access Services, General Library, BS, Mississippi State University, 2000

JANA D. MORGAN, Coordinator, CM MS Poultry Diagnostic Lab, BS, Louisiana Tech University, 2001

LISA S. MORGAN, Independent Study Facilitator, AOC - Independent Study

MELISSA RENEE MORGAN, Extension 4-H Agent I, Copiah County Extension Service, MS, Mississippi State University, 2006

ADRIENNE R. MORGAN, Learning & Development Spec, Human Resource Management, MS, Mississippi State University, 2010

SHELynn MORRIS, Program Coordinator, Office of the Graduate School, BA, University of West Virginia, 2009

NICHOLAS ROBERT MORSE, Assist Compliance Admin, Regulatory Compliance & Safety, BA, Illinois State University, 2004

EMILY R. MORSE, Extension 4-H Agent I, Kemper County Extension Service, BS, Middle Tennessee State University, 2000

COSMO MOLSEY, Associate Director, Student Housing - Administration, MS, Mississippi State University, 1999

PHILIP F. MOSS, Assistant Director, Office of Admissions & Scholarships, MS, Mississippi State University, 1999

MELISSA ANN MOTT, Research Associate I (Eng), Ctr for Advanced Vehicular Systems, AA, Gadsden State Community College, 1983

PAMELA MYRICK MOTTLEY, Technical Assistant, Early Childhood Institute, BA, MS, Ohio University, 1980

MARK J. MOWDY, Area Extension Agent IV, Franklin County Extension Service, MS, Mississippi State University, 1987

JYOTHI MUDHAGUNU, Program Analyst, MPPA

CHERYL ELAINE MUELLER, Coordinator, Early Childhood Institute, BS, Eastern Michigan University, 1974

FRED A. MUHAMMAD, Senior Histotechnologist, CVM MS Veterinary Diagnostic Lab

DANIEL MULLEN, Head Football Coach, Athletics - Football, MS, Wagner College, 1999

JACQUELINE CARSON MULLEN, Assistant Director, Student Union-Campus Activities Blvd, MED, Univ Of South Carolina, 2006

TAIRI L. MULLAN, Director, Dean of Students, MS, Mississippi State University, 2006

PAMELA MURPHY, Software Architect, nSPARC

GARY L. MYERS, Dean & Professor, College of Arts & Sciences, Ph.D., University Of Houston, 1986

JESSICA ANN MYERS, Accountant, FWRC - Director, BBa, Mississippi State University, 2008
A. MAJOR DIVISIONS and STAFFS

BUDGET and PLANNING

http://www.vpbp.msstate.edu/

Responsible for accounts payable, budget, cost accounting, financial records, campus mail services, payroll, procurement and contracts, receiving and property control, sponsored programs accounting, student accounting and receivables, travel and treasury services.

Don Zant, B.S., Vice President for Budget and Planning
J. Wayne Bland, M.C.S., Assoc. Vice President for Budget and Planning

CONTROLLER and TREASURER’S OFFICE

http://www.controller.msstate.edu

The Controller and Treasurer’s Office primary mission is to (1) provide financial service to the University community and its customers, (2) protect the University’s financial resources and (3) insure compliance with both internal and external financial regulations, policies and procedures.

Kevin Edelblute, M.B.A., Controller and Treasurer
Betty Gentry, B.S., Assistant Controller for Treasury Services
Jane Kinard, B.P.A., Assistant Controller for Accounts Receivable and Collections
Denise Peeples, M.B.A., Assistant Controller for Sponsored Programs Accounting
Ken Stewart, M.C.S., Associate Controller for Budget, Records, Reporting & Payroll
June Dempsey, B.P.A., Assistant Controller for Budget & Payroll
Amy Burchfield, C.P.A., Financial Records Manager

CONTINUING EDUCATION

(For functions, organizations, and programs of the Division of Continuing Education, see PART II. THE COLLEGES and SCHOOLS.)

Mark Binkley, Ph.D., Director of Continuing Education

FOREST and WILDLIFE RESEARCH CENTER

http://fwrc.msstate.edu

The Forest and Wildlife Research Center (FWRC) was authorized by the Mississippi Legislature with passage of the Renewable Natural Resources Act of 1994. The FWRC mission is to conduct research and technical assistance programs relevant to the efficient management, utilization, and protection and enhancement of the forest, wildlife, fisheries, and aquatic resources of the state and region. Within the scope of this mission, the FWRC has responsibilities for developing through research: (1) natural resource management systems which ensure the optimal production of goods and services while protecting, sustaining and enhancing the forest and aquatic environments; (2) harvesting and manufacturing technologies that promote efficient utilization of the state’s timber resources; (3) biological and economic data bases which address specific problems and opportunities related to the state’s forest, wildlife, aquatic and fisheries resources, including environmental issues related to those resources; and (4) policy analyses which provide options for renewable resources management and use in Mississippi.

The research center is composed of the Departments of Forestry, Wildlife and Fisheries, Forest Products, the Mississippi Water Resources Research Institute, and the Franklin Furniture Institute. The agency’s base research program involves approximately 250 separate research activities and covers project work in 25 research areas in forestry, forest products, wildlife, fisheries, water, and other areas of natural resources. Thus research program serves a diverse number of clients which includes forest landowners, forest-based industries, federal and state agencies, private agencies and various forest resources user groups. Faculty in the Forest and Wildlife Research Center hold joint appointments in the College of Forest Resources, the College of Veterinary Medicine, Mississippi Agricultural and Forestry Experiment Station, and MSU Extension.

Forest and Wildlife Research Center
George M. Hopper, Ph.D., Director
James P. Shepard, Ph.D., Associate Director

VI. OTHER DIVISIONS, UNITS, and AGENCIES

Forestry

Andy Ezell, Ph.D., Professor and Interim Head

Forest Products
Rubin Shmulsky, Ph.D., Professor and Head

Wildlife and Fisheries
Bruce D. Leopold, Ph.D., Professor and Head

Mississippi Water Resources Research Institute
George M. Hopper, Ph.D., Director

Franklin Furniture Institute
William Martin, Director

MISSISSIPPI AGRICULTURAL and FORESTRY EXPERIMENT STATION

http://www.mafes.msstate.edu

The Mississippi Agricultural and Forestry Experiment Station (MAFES) operates under mandates of the U.S. Congress (1862 and 1887) and the Mississippi Legislature (1888) for the purpose of conducting scientific research in agriculture, forestry and related sciences. The foundation mission of MAFES is to improve the state’s agricultural and aquacultural industries and the well-being of all Mississippians.

The success of agricultural research in the first 100 years has resulted in a highly complex food, fiber and fuel system that is the envy of the world – but one that is also characterized by the continuing emergence of new problems and opportunities. Thus, the foremost challenge of MAFES is maintaining a continuum of research discovery and education to keep Mississippi’s agricultural producers viable and competitive in a global economy.

MAFES Headquarters (MSU Campus): The Leveck Animal Research Center, the Bearden Dairy Research Center, the R.R. Foil Plant Research Center and the Black Belt Branch Station at Brooksville provide field laboratories for on-campus scientists and represent all of the important plant and animal commodities produced in the State.

On-campus departments conducting research to meet these needs are: Agricultural Economics; Agricultural and Biological Engineering; Plant and Soil Sciences; Animal and Dairy Sciences; Biochemistry and Molecular Biology; Entomology and Plant Pathology; Food Science Nutrition and Health Promotion; Human Sciences; Poultry Science; the Social Science Research Center; Landscape Architecture, Veterinary Medicine, Life Science Biotechnology Institute and the Wildlife and Fisheries Aquaculture unit.

Off-campus activities are conducted through four regional research and extension centers and associated branch experiment stations in the various soil and types-of-farming areas of the State. Research efforts involve cooperative projects with scientists from on-campus departments and other branch stations, as well as collaboration with state and federal agencies, producers and private industry sponsors.

Central MS Research and Extension Center: The Brown Loam Branch Station near Raymond carries out an extensive program of beef cattle crossbreeding and management, forage, and field crop studies. At the Coastal Plain Branch Station near Newton, long-standing programs of field crops research blend with studies of wildlife management and Natural Resource Conservation. The Truck Crops Branch Station at Crystal Springs serve a populous of urban-rural area with research on both commercial greenhouses and home garden fruit and vegetable crops and ornamentals.

Coastal Research and Extension Center: The Seafood Processing Research Laboratory at Pascagoula was established in cooperation with the National Marine Fisheries Service and operates to develop processing technologies to enhance the utilization of later marine fishery resources and improve seafood quality and safety. The South MS Branch Station units at Poplarville, White Sand, McNeill and Beaumont conduct research on beef cattle, field and forage crops, agro-forestry, ornamentals and vegetables.

Delta Research and Extension Center: The Delta Branch Station at Stoneville employs an integrated, multidisciplinary approach to discover, develop, and demonstrate new technologies and improved germplasm for enhanced profitability and productivity of agricultural enterprises in the Yazoo River-Mississippi River Delta. Its research programs on the major crop and animal production systems of the Delta Counties (cotton, rice, soybean and catfish) are recognized nationally and internationally. Both the Southern Regional Aquaculture Center and the National Warmwater Aquaculture Research Center are located here.
North MS Research and Extension Center. The North MS Branch Station at Holly Springs emphasizes research on soil erosion management, and crop production systems using conservation tillage methods suitable for the soils of the region. The Horticulture Research and Education Unit at Verona conducts cultivar evaluations and cultural practices studies with vegetable, ornamental, and medicinal herbs crops. The Northeast MS Branch Station at Verona conducts conservation tillage systems research and variety evaluations for the major field crops of the region. The Pontotoc Ridge-Flatwoods Branch Station at Pontotoc emphasizes sweet potato production and field crops. The Prairie Research Unit at Prairie focuses on utilizing forages in the economic and efficient production of beef, with emphasis on herd health management and improved conception and nutrition.

Extensive collaborative relationships with other state and federal agencies enhance the productivity and applicability of MAFES' research programs on-campus and off-campus. Representative participating entities include USDA/Agricultural Research Service (Small Grain Nurseries, Pasture Research Laboratory, Forage Research Unit, Corn Research Unit, Small Fruits Research Station, Southern Field Crop Insect Management Laboratory, Cotton Physiology and Genetics Research Unit, Southern Weed Science Laboratory, Field Crops Mechanization Research Unit, Soybean Production Research Unit, U.S. Cotton Ginning Laboratory, Soil Sedimentation Laboratory and Boll Weevil Research Laboratory); USDA/Natural Resources Conservation Service (Artificial Wetland and Global Change Monitoring Station); NOAA/National Weather Service; MS Department of Agriculture and Commerce; MA Department of Wildlife, Fisheries and Parks; USDA/APHIS Animal Damage Control Unit; USDA/ Forest Service (Southern Hardwoods Laboratory); Tennessee Valley Authority; Mississippi Power Company; U.S. Army Corps of Engineers; and U.S. Department of Commerce (National Marine Fisheries Service).

Research programs of MAFES are both basic and applied. Basic research deals with long-range, fundamental opportunities or problems in agriculture and the development of new knowledge. Applied research is directed toward early solution of problems of immediate concern facing farmers, processors and marketers of agricultural products, and all citizens of the state, whether urban or rural.

Research facilities to support the broad scope of research conducted by MAFES include chemical, biological, engineering, and computer laboratories; greenhouses and growth chambers; land for crops, orchards and forests; pastures and building facilities for beef and dairy cattle, sheep, hogs, and poultry; ponds and related facilities for aquaculture and the farm machinery and other equipment required to enable our scientists to conduct effective research programs. In addition, facilities and personnel of ARS, USDA and other federal and state agencies are strategically co-located to augment the total research effort.

While the primary mission of MAFES is agricultural and natural resource research for the State, its presence on the campus adds strength to the teaching and extension programs. Most department heads and many other staff members have joint appointments involving teaching, research, and/or extension activities, and teach or administer instructional programs in agriculture, engineering, and art and sciences. Agriculture students at Mississippi State University have the opportunity to observe and participate in research, and MAFES provides graduate research assistantships and other part-time employment for many students.

MAFES Operates on state and federally appropriated funds supplemented by income from sales of products from the research projects. Grants and contracts from private industry and from other sources provide additional funds.

MISSISSIPPI STATE UNIVERSITY EXTENSION SERVICE
The Mississippi State University Extension Service provides research-based information and educational programs in agriculture and natural resources, 4-H youth development, family and consumer matters, and enterprise and community resource development to improve the economic, social, and cultural well-being of Mississippian.

As part of a three-way partnership of the U.S. Department of Agriculture, the land-grant university system, and individual counties, it provides information and educational programs in all of the state’s 82 counties. MSU Extension also cooperates with Alcorn State University, Mississippi’s other land-grant institution.

The Extension Service supports positive change for individuals, families, and communities by providing practical, directly applicable information and educational opportunities using the latest information technologies and proven teaching techniques. To achieve its mission, the Extension Service develops and uses volunteers to assist with program delivery, collaborates with many other organizations, and maintains a culturally diverse, staff responsive to the needs of people at all socioeconomic levels.

Programs are conducted primarily by county Extension agents supported by specialized area agents and state-level and area specialists responsible for gathering, interpreting, and disseminating information about the latest research findings and technological developments.

Agriculture and its related enterprises are of major economic importance in Mississippi. Also directly affecting quality of life are the relationship between people and their environment and the continuing need for human resource development. The Extension Service directs its programs and resources accordingly and continues to pursue innovative ways to help families, youth, and communities adjust and thrive in an ever-changing world.

COUNTY PERSONNEL
Each of the 82 counties has a core Extension Staff to address 4-H youth development and community needs. In addition, there are program assistants working in targeted nutrition programs. The total number of professionals is approximately 200.

UNIVERSITY LIBRARIES
http://library.msstate.edu/

The University’s major library collections and functions are housed in the Mitchell Memorial Library, which occupies a central location on the campus. The University Libraries provide access to over 88,000 periodical/journal titles in print and electronically. The Special Collections Department contain materials of historical value, including 491 manuscript collections, church and business records. The Congressional and Political Research Center houses the papers of a number of public figures important to Mississippi - most notably those of U.S. Senator John C. Stennis. The Archives of the University includes papers of the University’s presidents and other officers, college, division and departmental records, faculty papers, records of committees and university related organizations. The Library provides an environment for education technology activities and a learning center of techniques related to digital multimedia in the Instructional Media Center. The Library’s Computer Commons lab is open until 2 a.m., Sunday through Thursday, until 8 p.m. on Friday, and until 6 p.m. on Saturday.

The University Libraries supports branch libraries for the College of Architecture, Art and Design, College of Veterinary Medicine, MSU Meridian Campus and Jackson 5th Year Architecture Program.

Frances N. Coleman, Dean of Libraries

UNIVERSITY REGISTRAR
http://www.msstate.edu/dept/registrar

The Office of the University Registrar is responsible for supervising the scheduling of classes, managing the registration of students in courses, recording grades, and maintaining academic records and transcripts of all students and alumni of the University.

Bobby R. Stokes, B.S., M.B.I.S., Registrar

B. INTERNAL SERVICE UNITS

INFORMATION TECHNOLOGY SERVICES
http://www.its.msstate.edu/

The mission of Information Technology Services (ITS) is to enable learning, service, and research through an advanced information technology environment. The mission is fulfilled through three operational units within ITS - Information Technology Infrastructure, User Services, and Enterprise Information Systems. ITS supports and operates the University’s voice, data, video and wireless networks and provides a broad array of computing and information technology resources and services for students, faculty, and staff, including Internet, Internet2, and National Lambda Rail access. The ITS Help Desk is available to answer questions and help with computer-related problems. A comprehensive suite of workshops is offered to aid faculty and staff in learning new hardware and software. See www.its.msstate.edu for more information.

Mike Rackley, B.S., M.B.I.S., Registrar, Information Technology Services

Rene Hunt, B.A., M.C.S., Director, Enterprise Information Systems

Timothy Griffin, B.S., Director, Information Tech. Infrastructure

Steve Parrott, B.S., Director, User Services

OFFICE of INSTITUTIONAL RESEARCH and EFFECTIVENESS
http://oire.msstate.edu

The Office of Institutional Research and Effectiveness (OIRE) provides appropriate and timely information to decision makers at Mississippi State University, the Board of Trustees of State Institutions of Higher Learning, the Federal government, and other constituents. OIRE is also responsible for providing leadership necessary for maintaining Mississippi State University’s accreditation with the Southern Association of Colleges and Schools (SACS) and facilitating the development and implementation of assessment programs emphasizing continuous improvement in fulfilling MSU’s overall teaching, research, and service mission.

The Institutional Research staff analyzes and prepares reports relevant to evaluating faculty workload, student credit hours produced and departmental data vital in the allocation of university resources. The office assists the university community through its research, consulting, and survey activities. Evaluation and Test Service utilizes optical scanning equipment to score and analyze faculty-constructed tests, processes, questionnaires and student evaluation of instruction.

The Institutional Effectiveness staff facilitates the development and implementation of assessment programs emphasizing continuous improvement in fulfilling MSU’s overall teaching, research, and service mission. The staff uses organizational assessment tools to help departments and units improve key processes, assess institutional needs, and develop institutional effectiveness plans that achieve the goals outlined in Mississippi State’s strategic plan.

Timothy N. Chamblee, Ph.D., Director

POLICE DEPARTMENT
http://www.msstate.edu/dept/policy/

It is the mission of the Police Department to support the university and its community by providing effective and efficient services that assist in establishing a safe and secure environment.
The department is staffed 24 hours a day with highly trained officers to enforce the laws, and university rules and regulations. Additionally, police officers actively work with the campus community in providing crime prevention information and addressing crime, safety, and security issues.

Georgia Lindley, Chief of Police

C. RESEARCH UNITS

OFFICE of the VICE PRESIDENT for RESEARCH and ECONOMIC DEVELOPMENT

Office: 617 Allen Hall
http://www.research.msstate.edu

The Office of Research and Economic Development is the administrative unit for the coordination of all basic and applied research of the University in the areas of Architecture, Art and Design; Biological and Physical Sciences; Education; Engineering; Business and Economics; Humanities and the Social Sciences. Units include the following: Intellectual Property and Technology Licensing, Laboratory Animal Veterinarian, Radvanyi Chair in International Studies, the Mississippi State Chemical Laboratory, and Centers and Institutes: Advanced Prototyping Experimentation Laboratory, Center for Educational and Training Technology, Center for Safety and Health, Center for Science, Math and Technology, Electron Microscope Center, Geosystems Research Institute, Institute for Neurocognitive Science and Technology, National Strategic Planning and Analysis Research Center, Research and Curriculum Unit, Social Science Research Center (Mississippi Alcohol Safety Education Program). In addition, there are separately organized research units in the various schools and colleges. Interdisciplinary research is promoted and coordinated by the Office of Research and Economic Development.

With a core of excellent scientists, engineers, and economists, aided by numerous graduate research assistants, Mississippi State University contributes to the economic growth of the state. Extensive resources are available to assist economic, industrial, and governmental organizations desiring help in discovery, design, and the development of new products. The Office of Research and Economic Development and the Division of Agriculture, Forestry and Veterinary Medicine work together in the performance of their missions to do basic and applied research.

David R. Shaw, Ph.D., Vice President for Research and Economic Development
Melvin C. Ray, Ph.D., Associate Vice President for Economic Development
Ray Vaughn, Ph.D., Associate Vice President for Research
Teresa Gammill, Ph.D., Assistant Vice President for Research

OFFICE of TECHNOLOGY COMMERCIALIZATION

Office: 403 Bost Extension Building
http://otec.msstate.edu

The Office of Technology Commercialization identifies, protects, markets, and licenses intellectual properties developed by Mississippi State University faculty, staff, and students. The OTC should be contacted early in the development of the intellectual property in order to assure all IP rights are protected. Please contact the OTC whenever you think your idea is patentable and you are considering a proposal, presentation or publication.

Chase C. Kasper, M.B.A., Interim Director

OFFICE of LABORATORY ANIMAL RESOURCES

Office: 2008A Wise Center

The Office of Laboratory Animal Resources is a University-wide resource that provides veterinary care, technical support, compliance monitoring, and program direction and planning for regulated animals used in biomedical research and teaching, and some agricultural research. The Vice-President for Research serves as the Institutional Official for regulated animal research and is advised by the University’s Institutional Animal Care and Use Committee (IACUC) to ensure that the programs of animal care and use conform to local, state, and Federal regulations and guidelines for animal care and use. The programs of animal care and use in the College of Arts and Sciences and the College of Veterinary Medicine maintain international accreditation through the Association for the Assessment and Accreditation of Laboratory Animal Care (AAALAC). Mississippi State University maintains an Animal Welfare Assurance with the Office of Laboratory Animal Welfare within the Public Health Service (NIH).

Lucy H. Senter, DVM, M.S., DACLAM, Director of Lab Animal Resources and University Veterinarian

RADVANYI CHAIR in INTERNATIONAL SECURITY STUDIES

Office: 244 Magruder
http://www.msstate.edu/chair/radvanyi

On June 11, 1996, the endowed Chair in International Security and Strategic Studies was established with Dr. Janos Radvanyi as the first chair holder. On June 22, 1998, Dr. Malcolm Portera, President, Mississippi State University, named the Chair in Dr. Radvanyi’s honor, the Radvanyi Chair in International Security Studies. The Chair manages the Center for International Security and Strategic Studies (CISS) which devotes full attention to vital global problems, with special emphasis on the complex security issues of the post-communist Era. It alerts to America’s vulnerability by not having a reliable defense against hostile missile attacks. The Chair is studying U.S. counter terrorism policy and is monitoring German-European and American relations and the insight of the workings of the European Union and Asian Security issues. The Chair, through its Executive Lecture Forum (ELF) provides a unique outreach program, hosting internationally respected speakers from around the globe to address the membership. Its publications reach government agencies, think-tanks, and major libraries. This exclusive lecture forum counts as its members Mississippi business executives, academicians, and state government representatives, and meets on a regular basis, several times a year. Through the Chair, both students and faculty are provided with a wide range of opportunities to gain awareness of international, political, economic, and cultural issues.

Janos Radvanyi, Ph.D., Chair

OFFICE of REGULATORY COMPLIANCE and SAFETY (ORCS)

Office: 70 Morgan Avenue and 1207 Hwy 82 W
http://www.orc.msstate.edu

Regulatory Compliance and Safety is a unit of the Office of Research and Economic Development. ORC has two major functions: (1) to provide support and training in the regulatory requirements for the conduct of scientific research, instruction and extension programs in the areas of human subjects research, animal care and use, and recombinant DNA technology and (2) to oversee programs in lab safety, fire safety, biological safety, radiological safety, chemical hygiene and hazardous waste management.

The three regulatory committees include the Institutional Review Board (IRB) which monitors the use of humans in research, the Animal Care and Use Committee (IACUC) and the Institutional Biosafety Committee (IBC). Each area has a compliance administrator who assists researchers in meeting compliance requirements, facilitating committee reviews and monitoring compliance.

Each safety program has a safety officer. The Safety Officer oversees the safety program for teaching and research labs, reviews Worker’s Comp data, and coordinates First Aid/CPR and Defensive Driving training. The Biosafety Officer provides support and training in the handling and containment of infectious organisms and recombinant DNA. The Radiological Safety Officer administers the University’s radioactive materials license and x-ray registrations. The Chemical Hygiene Officer manages the University’s chemical disposal program and provides general and chemical laboratory safety services and training.

Kacey J. Strickland, Director
Patricia D. Cox, Ph.D., Assistant Director
Jonathan E. Miller, Assistant Director
SPONSORED PROGRAMS ADMINISTRATION

Office: 133 Etheredge Hall
http://www.spa.msstate.edu

Sponsored Programs Administration (SPA) is a component of the Office of Research and Economic Development. This office is responsible for the administration of external proposal activities and post-award and post-award contractual negotiations of fiscal and administrative matters. Services provided by Sponsored Programs Administration include: Review the proposal for consistency with University mission and policies; Review the budget for compliance with University policies, Cost Accounting Standards and sponsor guidelines; Prepare the required “Representations and Certifications;” Verify that all required reviews have been conducted on proposals that involve research using animals, human subjects, radioisotopes, biohazards, creation of hazardous waste, conflict of interest, and department; Verify that all appropriate arrangements have been made and documented for projects involving extra space allocation, renovation, new courses, campus housing, etc.; Review RFP terms and conditions and if, appropriate or necessary, prepare an exceptions letter to submit with the proposal; Assign a proposal log number; Prepare a transmittal letter to the sponsoring agency; Forward the proposal, transmittal letter, etc. to the sponsor; Distribute a copy of the proposal, transmittal letter, etc. to the Principal Investigator’s immediate cognizant administrative unit (e.g. department head, center director or director of research); Maintain records of proposal activities for periodic reporting to the President, Board, etc.; and assist faculty and staff in administrative problem-solving associated with their sponsored projects.

Richard Swann, Director

MISSISSIPPI STATE CHEMICAL LABORATORY

Office: 1145 Hand Lab
http://www.mscl.msstate.edu

The State Chemical Laboratory was established in 1892 with the control of fertilizer quality as its primary responsibility. Subsequent legislation added duties in the areas of animal feed control, pesticide control, food control, paint and varnish control, and petroleum products control.

In 1970 the Legislature redefined and clarified the purpose and operations of the Mississippi State Chemical Laboratory under the Office of the State Chemist. Four divisions were established: the Chemical Regulatory Division, the Petroleum Products Division, the Industrial and Agricultural Services Division, and the Research Division. Operation of the first two divisions was continued practically unchanged from the practice of many years. The Industrial Agricultural Services Division and the Research Division are an expansion of services formerly performed by the Chemical Regulatory Division.

The Chemical Regulatory Division carries out regulatory control programs in food, animal feeds, fertilizers, economic poisons, and paints and varnishes.

The Petroleum Products Division conducts regulatory control testing on petroleum and related products.

The Industrial and Agricultural Services Division provides laboratory analysis and scientific and engineering consultation to industries and individuals residing in or doing business in the state. The guiding principle in services shall be that they contribute to the economic growth of Mississippi or to the welfare of its citizens. Charges are assessed for all services and are self-supporting but nonprofit.

The Research Division conducts self-supported, grant, or contract research having immediate or potential influence on the economic growth and promotion of agriculture or industry in Mississippi, or on improvement of the Laboratory’s analytical capabilities.

Kevin L. Armbrust, Ph.D., State Chemist; Associate Professor of Chemistry
Jose Rodriguez, Ph.D., Director, Chemical and Petroleum Programs
Kang Xia, Ph.D., Director, Research

CENTERS and INSTITUTES

CENTER for ADVANCED VEHICULAR SYSTEMS (CAVS)

http://www.cavs.msstate.edu

CAVS is an interdisciplinary center comprised of engineering, research, development, and technology transfer teams focused on enhancing human and payload mobility. The CAVS activities are centered around material science, manufacturing process modeling, computational mechanics, computational fluid dynamics, multi-scale modeling, vehicular systems engineering, design optimization, human factors and ergonomics, alternative powered systems, and intelligent electronic systems. While CAVS projects generate timely solutions relevant to regional manufacturers, CAVS research seeks to expand knowledge that is essential for sustained economic development. Through direct involvement in various activities at CAVS, students gain valuable experience that leverages on their classroom learning. CAVS also serves as the academic department for the college’s graduate program in Computational Engineering. In support of its mission, CAVS also offers a direct interface to manufacturers and industries throughout the state and region via the CAVS Engineering Extension, located in Canton, Mississippi. The services offered by the CAVS Engineering Extension include discrete event simulation, Six Sigma, lean manufacturing, and metrology.

As a result of CAVS’ application-driven, team-oriented approach to research we have contributed to:
- improved vehicle performance and reduced design cycle time and cost;
- timely generation of knowledge on the behavior and capabilities of missile, flight, naval, vessels and other physical systems;
- analysis of behavior and performance of engineering systems (including humans) under adverse or catastrophic conditions;
- development of high-fidelity simulation tools and training;
- simulation and design systems to both enable and support designers and manufacturers of land, sea, air, and space vehicular systems.

Roger L. King, Ph.D., Director
Zachary Rowland, M.S., Deputy Director

CENTER for EDUCATIONAL and TRAINING TECHNOLOGY

Office: 309 Bost
http://www.cett.msstate.edu

The Center for Education and Training Technology was created in 1996 as a university level center to provide for the development and implementation of innovative software-based technologies focused at enhancing teaching and learning at all educational levels. The Center operates with an interdisciplinary approach drawing expertise from various colleges and departments from across the University, state and federal agencies, and corporate America. The goals and objectives of the Center are met through the efforts of the two working groups, the Professional Development Group and the Interactive Software Development Group. Beyond technology development, major emphasis is placed on improving education through providing training and staff development related to the effective use of information technologies and the integration of those technologies into the learning environment.

R.D. Brook, Ed.D., Director

CENTER for SAFETY and HEALTH

Office: Suite B, 2151 Hwy 18; Brandon, Mississippi 39042
http://csh.msstate.edu

The Center for Safety and Health is a federal grant program. It was created in 1978 as a part of the Mississippi State Board of Health. In 1992 it was relocated to the Mississippi Workers’ Compensation Commission. In 1994, it was transferred to Mississippi State University and designated a center.

The purpose of the Center is to provide assistance to small and medium size high hazard business employers in Mississippi by helping them come into compliance with the regulations of the U.S. Department of Labor, Occupational Safety and Health Administration (OSHA). The services provided by the Center are free of charge, confidential, and conducted only at the request of the business employers. During the consultation visit, an opening conference is held to define the consultation procedure, and explain employer’s recordkeeping and program requirements. Also during the opening conference the employers’ obligations
are addressed. The employer must agree to correct all identified imminent danger and serious hazards. During a conducted tour of the survey site or facility, production processes, methods of operation, and facilities are assessed for potential and observed hazards. Health and safety conditions present in the workplace are evaluated by the use of appropriate monitoring equipment. A closing conference is held to review the observed safety and health hazards and to suggest initial corrective measures. The consultant then prepares a report to describe any hazards as related to applicable standards and to make recommendations for correction and/or control measures.

Kelly M. Tucker, B.S., Director/Program Manager
Jennifer Dale, B.S., Assistant Director

CENTER for SCIENCE, MATHEMATICS and TECHNOLOGY
Office: 94 President’s Circle
http://csmt.msstate.edu

The Center for Science, Mathematics and Technology was created in 1996 to facilitate multidisciplinary research with a focus on science and mathematics education. Concentrating on human resource development issues in preparing people for work, in gender equity, in curriculum reform and in environmental education, the Center has actively pursued research projects in teacher enhancement, advanced technology and faculty development from extramural sources. Under supervision of the Vice President for Research, the Center will continue to undertake collaborative research projects with other Mississippi State University departments and units supporting educational reform, faculty enhancement, environmental education, and encouraging participation of women and minorities in science, engineering, mathematics and technology.

Sandra H. Harpole, Ed.D., Director

ELECTRON MICROSCOPE CENTER
See Institute for Imaging & Analytical Technologies

GEOSYSTEMS RESEARCH INSTITUTE (GRI)
Office: HPCC, Research Park
http://www.gri.msstate.edu

The GeoSystems Research Institute (GRI) integrates academic and operational campus units active in research and educational activities in resource management through use of geospatial technologies. GRI’s focus is in agriculture, forestry, water resources, information technology, visualization techniques and computational modeling, and recently has expanded to include geospatial applications in any suitable domain, such as climate, weather, and oceanography to support state and local government issues, and economic development.

The GeoSystems Research Institute currently supports the research efforts of faculty from 22 departments within 6 Colleges/units within Mississippi State University, and collaborates with other public and private research institutions.

The mission of the Institute is to understand Earth’s natural and managed systems to provide comprehensive solutions for socioeconomic and environmental requirements. Its vision is to be a world leader in advancing the state-of-the-art in development and integration of spatial technologies and resource management.

GRI’s objectives are to:

- Increase the fundamental understanding of Earth’s natural and managed resource systems through use of geospatial technologies.
- Develop resource management capabilities and visualization techniques to enhance computationally-intensive decision support systems.
- Increase the productivity of renewable resources through the application of science and advanced technologies.
- Develop management strategies to enable sustainable economic development, human and natural community viability, and resource conservation.
- Develop advanced computational systems capable of knowledge discovery and simulating and visualizing geospatial environments.
- Utilize research and technologies to improve local, regional, and national socioeconomic development.
- Develop and maintain an informed public receptive to the use of geospatial information.

Robert J. Moorhead, Ph.D., Director
Wes Burger, Ph.D., Associate Director
Robert Ryan, Associate Director
Bill McAnally, Ph.D., Associate Director
Mike Carron, Ph.D., Associate Director

NORTHERN GULF INSTITUTE (NGI)
Administrative Office: HPC2, Research Park
Program Office: Stennis Space Center, Bay St. Louis, MS
http://www.northerngulf institute.org

The Northern Gulf Institute (NGI) is a NOAA Cooperative Institute that develops, operates, and maintains an increasingly integrated research and transition program focused on filling priority gaps and reducing limitations in current Northern Gulf of Mexico awareness, understanding and decision support. The institute is a collaboration led by MSU that includes the University of Southern Mississippi, Louisiana State University, Florida State University, and the Dauphin Island Sea Lab.

The mission of the NGI is to conduct high-impact research and education programs in the Northern Gulf of Mexico region focused on integration - integration of the land-coast-ocean-atmosphere continuum; integration of research to operations; and integration of individual organizational strengths into a holistic program. The program shall measurably contribute to the recovery and future health, safety, resilience and productivity of the region, through sustained research and applications in a geospatial and ecosystem context.

NGI research focuses on four themes:

Ecosystem Management – Characterize Northern Gulf of Mexico Coastal Wetland and Fisheries Habitats, including Restoration Strategies.

Geospatial Data Integration and Visualization in Environmental Science – Develop significant results at the intersection of inland/watershed-coastal waters and resources, with a particular focus on the research, development, prototype testing, and transition of scientifically-based geospatial observations, integration and improved access to data, and increased use of effective visualization technology.

Climate Change and Climate Variability Effects on Regional Ecosystems - Contribute to Northern Gulf of Mexico Climate Assessment and Impact Models.

Coastal Hazards - Strengthen the Integration of Watershed, Estuarine and Coastal Models in the Northern Gulf of Mexico.

Michael Carron, Ph.D., Director
Bill McAnally, Ph.D., Co-Director

RESEARCH and CURRICULUM UNIT
for WORKFORCE DEVELOPMENT and VOCATIONAL and TECHNICAL EDUCATION
Office: 103 Russell Street
http://info.rcu.msstate.edu/

The Research and Curriculum Unit for Workforce Development and Vocational and Technical Education (RCU) is jointly sponsored by the Mississippi Department of Education, Office of Vocational Education and Workforce Development, and the Office of Research of Mississippi State University.

The mission of the RCU is to provide leadership in state workforce development efforts and coordinate those efforts with secondary and community/junior college vocational technical education curriculum development. The RCU cooperates with other state agencies in uniting and coordinating workforce development efforts. It provides instructional leadership in vocational and technical education activities, working with state-wide curriculum frameworks and initiatives. Professional development activities are provided for educators across the state, enhancing their ability to provide optimal utilization and implementation of materials and research findings for the classroom. Research activities include assistance with state-wide vocational-technical assessments, reporting, and innovations. The RCU staff works with personnel from local school systems, community/junior colleges, state universities, the Mississippi Department of Education, the U.S. Office of Education, and other agencies and organizations.

Julie Jordan, M.S., Director
SCIENCE and TECHNOLOGY RESEARCH CENTER

Office: John C. Stennis Space Center

The Science & Technology Research Center (STRC) has been located at The John C. Stennis Space Center (SSC) in Hancock County, MS, since the mid sixties. It provides research coordination and fact-finding assistance as a liaison office to all MSU faculty with Federal and State Agencies at SSC and elsewhere on the Mississippi Gulf Coast. Additionally, STRC coordinates research projects through the Mississippi Research Consortium (MRC) for MSU, UM, JSU, and USM.

Glade Woods, Director

INSTITUTE for DIGITAL BIOLOGY

http://www.idb.msstate.edu

The mission of the Institute for Digital Biology (IDB) is to improve the human condition by improving the security of health, food, fuel, the environment and the economy of the State of Mississippi and the nation. The IDB is a unique multidisciplinary institute dedicated to excellence in research, education and service in the analysis of the function and expression of genes with an emphasis on economically important species. We focus on collaborations across disciplines to increase our understanding of complex biological systems related to health, energy, the environment, and food and agriculture using a systems biology approach. The IDB provides undergraduate and graduate students with a unique opportunity to learn and conduct research in an interdisciplinary environment addressing problems of critical importance. The AgBase database, generated and maintained by the IDB, is a major worldwide repository for functional genomics data for agricultural species, agricultural pathogens, and foodborne pathogens. Researchers from around the world submit their data to AgBase for curation and publication on the institute web site. The IDB provides services to researchers across the state, nation and world in the use of the institute’s data resources and computational methods. The IDB facilitates economic development by building collaborative relationships with science- and technology-oriented government agencies. Educational activities of the IDB include a Computational Biology Certificate program and the Digital Biology Learning Community.

Susan M. Bridges, Co-Director
Shane C. Burgess, Co-Director

FRANKLIN FURNITURE INSTITUTE

212 Franklin Center
http://www.ffi.msstate.edu

The Franklin Furniture Institute (FFI), formerly the Institute of Furniture Manufacturing and Management (IFMM), was organized at Mississippi State University in 2001. FFI’s mission is to help build sustainability and enhance the international competitiveness of the furniture industry and its suppliers and retailers, while enhancing the economic growth of the state and region. FFI’s vision is to be a nationally-recognized center of knowledge and outreach to the home furnishings industry. As a collaborative effort of interdisciplinary MSU units, FFI includes representatives from the colleges of Forest Resources, Bagley Engineering, Business, and Architecture, Art and Design. FFI partners with external collaborators including Mississippi Development Authority, U.S. Department of Commerce, American Home Furnishings Alliance, Mississippi Furniture Association, Mississippi Manufacturers Association, NE MS Community Development Foundation, and the Tupelo Furniture Market.

Supporting comprehensive furniture research, technical support, outreach and testing to the furniture industry’s value chain in the state and the surrounding region, FFI provides assistance in areas such as marketing, brand building, lean manufacturing, business planning, logistics and supply chain management, product design, workforce training, and IT assessments. FFI has also developed an Export Resource Service which provides home furnishings industry with strategies that will assist them in becoming more competitive in the global marketplace. Targeted at the furniture industry and its suppliers (transportation, logistics, retailers, and components suppliers including lumber companies), ERS works to expand export opportunities to the region by providing businesses with current industry essentials to help them obtain the information they need to sell in overseas markets.

William V. “Bill” Martin, Director

SOCIAL SCIENCE RESEARCH CENTER

Office: 1 Research Blvd., Suite 103
http://www.ssrc.msstate.edu

The Social Science Research Center (SSRC) was established at MSU in 1950 to promote, enhance and facilitate social science research and scholarly activities. Organized as a university-wide Center, it reports to the Vice Presidents for Research and Economic Development and Agriculture, Forestry and Veterinary Medicine. Housed in the Thad Cochran Research and Technology Park, it offers researchers an array of opportunities and options, state-of-the-art facilities, and support units to enhance their research endeavors. It fosters a rigorous, independent, and interdisciplinary environment and seeks to ensure objective, relevant and unbiased analyses of social, economic, political, human resource, and social-environmental problems.

The SSRC relies on the expertise, talents, and entrepreneurial skills of its scientists, who provide the impetus and direction of its research program. Fellows and associates, supported by an administrative staff and student assistants, conduct both sponsored and unsponsored projects.

It contributes to the university’s educational program by involving students in research projects and offers a vehicle for unique social research and public service programs that do not fit traditional academic structures. The SSRC follows the land grant tradition by serving Mississippi and the nation through research, education and public service.

Arthur G. Cosby, Ph.D., Director

INDUSTRIAL OUTREACH SERVICE

Office: 137 ICET (205 Research Blvd.)
http://ios.msstate.edu

The MSU Industrial Outreach Service (IOS) is an outreach unit of the James Worth Bagley College of Engineering that provides services to business and industry. The primary mission of IOS is to assist Mississippi businesses in becoming more competitive in the global economy, with a focus on small- to medium-sized manufacturers. Secondary missions include supporting the development of new industries for the state, and fostering faculty and student engagement with business and industry. To accomplish these missions IOS provides technical assistance and management training to businesses and partners with industry organizations and economic development groups.

Joe D. Jordan, Ph.D., Director

T.K. MARTIN CENTER for TECHNOLOGY and DISABILITY

Office: T.K. Martin Center
http://www.tkmartin.msstate.edu

The T.K. Martin Center for Technology and Disability at Mississippi State University was created in 1994 as a unique entity which provides direct clinical service in assistive technology for individuals with disabilities in an environment that promotes application and research.

The T.K. Martin Center for Technology and Disability works with individuals to provide evaluation, prescription and training of a variety of assistive technologies, from design and fabrication of mechanical devices to computer based technologies. The Center collaborates with other University Centers, Institutes and Departments on research issues involving new technologies and technology integration issues.

The T.K. Martin Center for Technology and Disability is located adjacent to the Longest Student Health Center.

Janie Cirlot-New, M.S., CCC/SLP, Director
INSTITUTE for NEUROCOGNITIVE SCIENCE and TECHNOLOGY
See Institute for Imaging & Analytical Technologies

INSTITUTE FOR IMAGING AND ANALYTICAL TECHNOLOGIES
Clay Lyle Entomology Building and Premier Health Complex
FAT is a university core facility which meets MSU's missions in research, teaching and service by housing major research instrumentation that is available to faculty, staff, students, and outside users. Instrumentation includes technologies for diverse microscopy (light, confocal, atomic force, and electron) and microanalysis (e.g. X-ray diffraction) applications, in addition, to the magnetic resonance imaging machine used to visualize detailed internal structures. These technologies provide MSU, the State of Mississippi and the local community with premier resources that facilitate scholarly research, enable high-quality undergraduate and graduate education, enhance impact of outreach, and promote economic development.

Director: Dr. Giselle Thibaudeau, 662-325-3019

MISSISSIPPI TRANSPORTATION RESEARCH CENTER
Office: 235 Walker Hall
http://www.cee.msstate.edu/transportation-research-center.html
The Mississippi Transportation Research Center (MTRC) was established in 1997 as a partnership between the Mississippi Department of Transportation and MSU. The purpose of the center is to provide an efficient point-of-contact for solicitation, evaluation, execution and administration of selected research and technology development efforts or services to be performed at MSU and other state universities. The center promotes the transportation industry within the state of Mississippi and provides educational opportunities for MDOT personnel in order to advance their professional standing through formal advanced degrees, professional engineering registration and professional advancement. Research through the center is being conducted at MSU, University of Mississippi, University of Southern Mississippi, and Jackson State University. Research projects include: pavement materials design, construction and evaluation; transportation issues including intermodal policy and planning and design, accident detection, seat belt use, and user cost and training in bridge design.

Thomas D. White, Ph.D., Director, Technical Programs
Dennis D. Traux, Ph.D., Director, Center Operations

FOREST and WILDLIFE RESEARCH CENTER
Measurements and Spatial Technologies Laboratory (MSTL)
http://www.cfr.msstate.edu/forestry/mstl/mstl.htm
This facility is committed to excellence in teaching and research in measurement and spatial technologies used for natural resource assessment and monitoring. The MSTL houses both Unix and PC servers and workstations that provide measurements and spatial technologies software (GIS, image analysis, statistics, modeling) for a broad range of applications. It also maintains an extensive collection of geospatial (imagery and GIS) and natural resource inventory data for use in both teaching and research in the CFR/FWRC.

MSTL affiliated faculty, staff and students are involved in a wide variety of research projects in topical areas such as: forest inventory, forest/tree growth and yield modeling, forest health, invasive species, and wildlife habitat assessments. Much of this research enhances support of resident instruction in the Department of Forestry. Courses offered in measurements and spatial technologies include: Forest Measurements, Forest Description and Analysis, Computer Applications for Forest Resources, Spatial Technologies for Natural Resource Management, Remote Sensing Applications, and GIS for Natural Resource Management. Graduate level courses are also offered in Advanced Spatial Technologies, Advanced Forest Inventory, Quantitative Ecology, Spatial Statistics for Natural Resources, and special problems in measurements and spatial technologies. Graduate programs are offered that lead to Masters and Doctor of Philosophy degrees with concentration in forest measurements, biometrics and spatial technologies and modeling.

MSTL faculty: David L. Evans, Joseph (Zhaofei) Fan, Thomas G. Matney, and Emily B. Schultz.
MSTL manager: H: Alexis Londo

SCHOOLS and COLLEGES

SCHOOL of ARCHITECTURE RESEARCH
Office: 240 Giles
Research in the discipline of architecture aims to improve the quality of life and ranges from the development of more efficient, safer, less expensive, more durable building materials and components, to the design of environmentally sensitive, energy efficient, and economically viable communities.

There are currently five research centers in the School of Architecture; three located on the Starkville campus, one in Biloxi, and one in Jackson. The Carl Small Town Center provides research and service assistance to small towns through downtown redevelopment and other community design initiatives. It addresses quality of life issues, such as economic diversification, town planning, conservation of architectural and historic resources, and affordable housing. The Center for Community Design and Planning promotes the transportation industry within the state of Mississippi and beyond. The Educational Design Institute is a collaborative initiative between the College of Education and the School of Architecture, and is charged with exploring changes in educational delivery and rethinking how schools, environs, plan, design, manage, and use their facilities. The Gulf Coast Community Design Studio works with elected officials, city and regional planning departments, neighborhood groups, and non-profit organizations to provide leadership and design assistance to Mississippi Gulf Coast communities damaged or destroyed by Hurricane Katrina. The Jackson Community Design Center is an urban research center providing visioning, planning, and technical assistance to organizations that work to make mid-size American cities, viable, healthy urban environments.

Faculty research activities focus on programming, planning and design, anthropometric modeling and evaluation, architectural theory and history, visual imagery, post-occupancy evaluation, and the technological evaluation of materials and methods, energy efficiency, and construction.

David C. Lewis, Ph.D., Associate Dean for Research and Director, D.R.I.L., Digital Research and Imaging Laboratory
David Perkes, M. Arch., Director, Gulf coast Community Design Studio
John Poros, M. Arch., Director, Carl Small Town Center
Chris Cosper, AIA, Director Educational Design Institute
Jasson Callender, Director Jackson Community Design Center

COLLEGE of ARTS and SCIENCES

BIOLOGICAL and PHYSICAL SCIENCES RESEARCH INSTITUTE
Office: 208 Allen Hall
Support for research activities in the biological and physical sciences comes both from the University and from outside sources, including state and federal agencies, private industry, and foundations. Some projects are carried out by staff members working independently or with graduate students, while other projects are multidisciplinary in nature and are conducted in cooperation with staff members from other colleges in the University, the Mississippi Agricultural and Forestry Experiment Station and the Mississippi State Chemical Laboratory. Staff members also participate in multi-institutional projects in cooperation with personnel from the University of Mississippi, the University of Southern Mississippi and Gulf Coast Research Laboratory.

The results of the research efforts are published in appropriate scientific journals and, in the case of graduate student participation, become the basis of theses and dissertations.

The research staff of 21 consists of faculty and staff members from the departments of Biological Sciences, Chemistry, Geosciences, Mathematics, Statistics, and Physics and Astronomy.
CENTER for COMPUTATIONAL SCIENCES
Office: 2 Research Boulevard  
http://www.ccs.msstate.edu

The Center for Computational Sciences (CCS) is part of a coalition of member centers and groups housed at the HPCC (formerly known as the Engineering Research Center) that share a common core objective of advancing the state-of-the-art in computational science and engineering using high-performance computing; a common approach to research that embraces a multi-disciplinary, team-oriented concept; and a commitment to a full partnership between education, research, and service.

The mission of CCS is to foster interdisciplinary research in both the fundamental understanding and application of all the natural sciences. In particular, CCS strives to model and develop integrated computational environments and crosscutting tools which allow a comprehensive, cross-disciplinary approach to problem-solving. The CCS contributes to the state of Mississippi in numerous ways. Firstly, this program generates a better-educated populace and a better-trained work force by educating the state of Mississippi in numerous ways. Secondly, this program creates a multitude of varied industries and businesses. Secondly, the CCS introduces MSU scientists from diverse fields to different research and new methodologies. This uniquely positions our scientists to fashion multi-disciplinary proposals. Such multidisciplinary approaches to problem-solving are often requirements in requests for proposals from federal agencies and industries. CCS thus creates new opportunities for leveraging resources within MSU as well as drawing resources to MSU.

Ratnasingham Shivaji, Ph.D., Director

THE COBB INSTITUTE of ARCHAEOLOGY
Office: Cobb Institute Building  
http://www.cobb.msstate.edu

The Cobb Institute of Archaeology was founded in July, 1971, at Mississippi State University by Mr. Cully A. Cobb (Class of 1908) and Mrs. Lois Dowdle Cobb, for instruction and research in Archaeology with emphasis upon the origins of Western European Civilization and the Indians of the South, particularly Mississippi. The Institute was endowed by the Cobb’s to complement the university’s activities in archaeological instruction, research and service.

The Institute provides active support for the instructional programs in archaeology offered through the Department of Anthropology and Middle Eastern Cultures. Research and field work are actively pursued, primarily in the Middle East and the Southeastern United States. The Institute actively supports an archaeological field school offered in alternate summers in the Middle East and Mississippi. The Institute is housed in two specially designed archaeological buildings which include classrooms, archaeological laboratories, environmentally controlled artifact storage areas, and a museum in which archaeological exhibits are made available to students and the public.

Joe D. Seger, Th.D. Director

THE JOHN C. STENNIS INSTITUTE of GOVERNMENT
Office: The Depot Building  
http://www.sig.msstate.edu

The John C. Stennis Institute of Government performs a threefold mission: (1) to enhance the efficiency and effectiveness of Mississippi State and local governments through basic and applied research, training, technical assistance and service; (2) to provide technical assistance and research for both rural development in Mississippi and regional activities in the Southeast; and (3) to promote civic education and citizen involvement in the political process. The Stennis Institute’s programs relating to state and local government include the State Executive Development Institute for key state officials, the Governing Institute for Mayors, and technical assistance to state agencies and local governments. The Institute’s research on rural development includes an assessment of local of state and national programs.

Funds for The Stennis Institute of Government come partially from interest on more than $1.7 million that has been raised by the Mississippi State University Development Foundation as a memorial to Senator John C. Stennis, but primarily from grants and contracts from outside sources.

W. Martin Wiseman, Ph.D., Director

UNIVERSITY/INDUSTRY CHEMICAL RESEARCH CENTER
Office: 1115 and 3338 Hand Lab  
http://www.msstate.edu/dept/chemistry/

The University/Industry Chemical Research Center (UICRC) began doing contract work for industries in 1982. The UICRC has the following major goals: 1) to assist Mississippi industry by performing chemical research to aid in their product development; 2) to work on chemistry related problems for any industry; 3) to teach graduate and undergraduate students techniques of industrial chemistry; 4) to help attract chemical based industry into the state; and 5) to help train B.S., M.S., and Ph.D. Chemists and attract visiting scholars and postdoctoral fellows for specific functions for industry.

The UICRC conducts grant and contract research and can work with most industries to develop mutually satisfactory agreements involving any necessary secrecy arrangements. It is also possible to work on short or long term projects and to arrange feasibility studies before binding contracts are written.

Edwin A. Lewis, Director  
Charles U. Pittman, Ph.D., Research Director

COLLEGE of BUSINESS and INDUSTRY
GRADUATE STUDIES and OUTREACH
Office: 200 McCool Hall  
http://www.business.msstate.edu/bizservices/

Graduate Studies and Outreach is the external liaison for the College of Business. The major function of the Outreach division of this office is to serve as point of contact between the College and the business and public sector.

This office serves a variety of functions. It is the coordinating center of funded research for the College and offers administrative services to faculty in the preparation and development of research proposals. The office also assists faculty in locating organizations for student projects, affording the opportunity to combine real world experience with academic learning.

The Technology Resource Institute (TRI) promotes university public/private partnerships that enhance economic development throughout the state. While housed in the College of Business, TRI is funded by a grant from the Economic Development Administration as part of that agency’s University Center program. This Institute serves as liaison with appropriate faculty or service agencies and assists in resolving business issues.

The Small Business Development Center (SBDC) provides counseling in Oktibbeha County and surrounding counties to people who own a small business or are interested in starting one. The SBDC assists small businesses through direct counseling, training, and community planning. The Center’s services are provided at minimal, if any, costs.

Lynne D. Richardson, Ph.D., Dean  
Barbara Spencer, Ph.D., Associate Dean and Director, Graduate Studies and Outreach; Technology Resource Institute  
Preston “Hamp” Beatty, Director, Small Business Development Center

COLLEGE of EDUCATION
BUREAU of EDUCATIONAL RESEARCH and EVALUATION
http://www.educ.msstate.edu.research
Office: 309 Allen

The Bureau of Educational Research and Evaluation (BERE) was authorized by the Board of Trustees in the Spring of 1966. This research organization is an integral part of the College of Education and is a cooperating unit of the MSU Office of Research and Economic Development.
The major functions of the Bureau are:
1. To engage in basic and applied research pertaining to all phases of education.
2. To consult with faculty and students about problems of research design and analysis as well as identify potential funding opportunities.
3. To provide aid in dissemination of research findings.
4. To assist faculty/staff in the development of proposals for research and program development in the College of Education.
5. Promote research discussion and foster collaboration among faculty and students within the College of Education.
6. Serve as a resource in collecting and analyzing data to support unit accreditation activities.

J. Elton Moore, Associate Dean for Research and Assessment
Iva. B. Ballard, Research Associate II

CENTER for EDUCATIONAL PARTNERSHIPS (CEP)
400 Morrill Road
The Center for Educational Partnerships is an integral part of the College of Education, functioning as a facilitator of technical and support services to the public school districts of Mississippi.

Major functions of the Center include:
1. Providing administrative support for the Program for Research and Evaluation of Public Schools, Inc (PREPS, Inc.) PREPS is a private nonprofit consortium composed of 88 public school districts.
2. Providing administrative support for the Mississippi Writing/Thinking Institute. The Institute is a state-wide project chartered by the National Writing Project.
3. Providing administrative support for the World Class Teaching Project. The Project is a state-wide initiative intended to support the certification of Mississippi teachers through the National Board of Professional Teaching Standards.
4. Providing administrative support for the America Reads - Mississippi Project. This project is intended to support and enhance the reading performance of elementary students in participating schools located in the State’s 14 Level 1 accredited school districts.
5. Providing administrative support for the Educational Design Institute. This project focuses on improving the educational design of education facilities and offering educational planning consultation and other services to school districts.
6. Administering the Mississippi Superintendent Mentor Program. The Mentor program provides training and consultation for newly selected Mississippi school superintendents.
7. Providing assistance in the development of a National Center for the Community College.

Cynthia Ward, Ed.D., Executive Director

REHABILITATION RESEARCH and TRAINING CENTER on BLINDNESS and LOW VISION
Office: 150 Industrial Education Building
http://www.blind.msstate.edu
The Rehabilitation Research and Training Center (RRTC) on Blindness and Low Vision was established in 1981 at Mississippi State University to serve all states and territories of the U.S. It is cooperatively sponsored by the National Institute on Disability and Rehabilitation Research (NIDRR) and the College of Education. The mission of this National Center is to enhance employment and independent living outcomes for individuals who are blind or visually impaired through research, training, education, and dissemination. The programs of the RRTC are based on the two following assumptions:
1. All blind and severely visually impaired people have a right to work at a wage comparable with non-disabled persons and in careers which provide satisfaction and opportunity for advancement and;
2. Many persons who are blind or visually impaired may obtain satisfying gainful employment through the utilization of findings and products produced by research and training programs.

Brenda Cavenaugh, Ph.D., CRC, Interim Director and Research Professor

COLLEGE of ENGINEERING

INSTITUTE FOR CLEAN ENERGY TECHNOLOGY (ICET)
Office: 205 Research Boulevard
http://www.icet.msstate.edu
The Institute for Clean Energy Technology (ICET) at Mississippi State University is a multidisciplinary group of scientists and engineers focused on measurement technologies and engineering scale testing for energy and environmental systems. Established in 1979, the Institute has a tradition of excellence in diagnostic instrumentation development, including imaging and laser-based techniques, and in the utilization of these systems in large-scale applications.

Current initiatives within ICET include processing legacy waste within the US Department of Energy’s national security complex, solutions to greenhouse gas emissions, conventional and alternative energy sources and technologies, environmental monitoring and remediation, and robust instrumentation to characterize difficult real-world environments. ICET is at the forefront of developing advanced diagnostic technologies.

ICET’s research results and partnerships with industry are designed to enhance economic development. The Institute offers students non-traditional educational experiences through a multidisciplinary approach to research.

W. Glenn Steele, Ph.D., P.E., Interim Director
Charles A. Waggoner, Ph.D., Deputy Director
Jeffrey S. Lindner, Ph.D., Associate Director
Yi Su, Ph.D., Associate Director

HIGH PERFORMANCE COMPUTING COLLABORATORY (HPC2)
Office: 2 Research Boulevard
http://www.hpc.msstate.edu
The High Performance Computing Collaboratory (HPC2), an evolution of the MSU NSF Engineering Research Center for Computational Field Simulation, at Mississippi State University is a coalition of member centers and groups that share a common core objective of advancing the state-of-the-art in computational science and engineering using high performance computing. Members share a common approach to research that embraces a multi-disciplinary, team-oriented concept, and a commitment to a full partnership between education, research and service. The mission is to serve the university, state and nation through excellence in computational science and engineering.

The HPC2 is comprised of four independent centers with the common characteristics of a multi-disciplinary, team-oriented effort that is strategically involved in the application and advancement of computational science and engineering using high performance computing.

Center for Advanced Vehicular Systems (CAVS)
Roger King, Director

Center for Computational Sciences (CCS)
Ratnasingham Shivaji, Director

GeoResources Institute (GRI)
Robert Moorhead, Director

Northern Gulf Institute (NGI)
Michael Carron, Director

The HPC2 mission is to serve the University, State, and Nation through excellence in computational science and engineering. Our goal is to become the nation’s premier interdisciplinary high-performance computing research facility.

William B. (Trey) Breckenridge III, HPC2 Resources and Operations Administrator
Jennifer Easley, Business Manager

EMERGING MATERIALS RESEARCH LABORATORY (EMRL)
Office: 412 Simrall Engineering Building
The Emerging Materials Research Laboratory (EMRL), a unit within the Department of Electrical and Computer Engineering, was established to serve as a center of development in the State of Mississippi in the field of wide-bandgap semiconductor technology. This exciting field is where
the next generation of advanced semiconductor devices will be developed, and EMRL will ensure that the State of Mississippi plays an active role in this important field of research.

The Emerging Materials Research Laboratory is housed in a class 10,000 clean room with class 1,000 work stations. The principal equipment of EMRL is a high-temperature, RF-induction-heated Chemical Vapor Deposition (CVD) system for growing state-of-the-art single-crystal silicon carbide. Materials characterization capabilities include electrical characterization and photoluminescence spectroscopy.

Yaroslav Koshka, Ph.D., Director

GLOBAL CENTER FOR DESICCANT TECHNOLOGY (GCĐT)
Office: 210 Carpenter Engineering Building

The Global Center for Desiccant technology is a partnership of equipment manufacturers, users, and academe to foster research, development, validation, design, and applications of gas-fired desiccant technology. The Center will pursue desiccant topics collectively funded by affiliates and will make such information available to the HVAC industry. Additionally, research into topics of a proprietary nature and equipment testing with confidentially maintained are possible by contract with individual sponsors.

B. Keith Hodge, Ph.D., Director

HIGH VOLTAGE LABORATORY (HVL)
Office: 115 Simrall Engineering Building

The Mississippi State University High Voltage Laboratory is part of the Department of Electrical and Computer Engineering and serves as an independent, non-industrial, university center for high voltage engineering. The mission of the High Voltage Laboratory includes research, evaluation/testing, and education activities. The principal objective of this laboratory is to meet the research and evaluation/testing needs of industry, utilities, and government, and to provide the necessary environment for an academic program associated with high voltage engineering.

The main laboratory of the High Voltage Laboratory is the largest high voltage laboratory among North American universities. This unique laboratory is comparable in size to many industrial facilities and is equipped with the following energy sources: 3000kV, 57kW lightning-switching impulse generator; 60Hz, 1000kV, 1000 kVA conventional test transformer, 100kV, 150kV and 250kV transformer test sets; a 1050kV, 7kW dc test set: high frequency pulse generator, 20-40 kHz, ±3600V, 200C.

Current research projects include: lightning protection of electrical power transmission and distribution lines and substations; lightning protection of marine vehicles and other objects; an electrical breakdown mechanism in high voltage polymer insulation; lightning impulse performance of composite insulation; electrical degradation of high voltage polymer insulators and cables.

The High Voltage Laboratory offers short courses in the area of high voltage engineering. The lecturers at the short courses are recognized as experts in their field of high voltage engineering. They are from the U.S. as well as internationally-recognized institutions and industries.

S. Gryzbowki, Ph.D., Director

INDUSTRIAL ASSESSMENT CENTER (IAC)
Office: 210 Carpenter Engineering Building

The primary mission of the Industrial Assessment Center is to serve the energy-related needs of small and medium-sized manufacturers within a geographic radius of approximately 150 miles of the Mississippi State University Campus. This is accomplished by analyzing the operating characteristics and energy requirements of manufacturing facilities to identify and recommend specific opportunities to conserve energy and/or utilize alternate energy sources, to improve productivity and minimize waste production, and to report the findings to the manufacturer together with estimates of their implementation costs, payback periods, and returns on investment. The Center fulfills its mission through site visits to plants which are carried out by the Center director or student teams under the supervision of the assistant director.

B. Keith Hodge, Ph.D., Director
Mary C. Emplaincourt, M.S., Assistant Director

MISSISSIPPI ENERGY RESEARCH CENTER (MERC)
Office: 210 Carpenter Engineering Building

Sponsored by the Division of Energy within the Mississippi Economic and Development Authority, the purpose of the Mississippi Energy Research Center is to develop, implement and coordinate energy and energy related research programs in Mississippi. This mission is accomplished by developing appropriate policies and procedures (a) for identification of priority research problems (b) for collaborating with local and state government agencies, utilities, industry, other universities, federal government agencies and the Legislature in the formation of their research programs (c) for selection of projects to be funded; and (d) for the transfer of technology which is produced by the research.

B. Keith Hodge, Ph.D. Director

RASPET FLIGHT RESEARCH LABORATORY (RFRL)
Office: Aerospace Technology & Development Building (ATD) http://ae.msstate.edu/rfrl

The Raspet Flight Research Laboratory (RFRL) is one of the premier university flight research facilities in the country. Established at Mississippi State University in 1948 by Dr. August Raspet, this aeronautical research laboratory possesses a rich heritage in full-scale flight vehicle development and testing, advanced composites development and fabrication, computer-controlled manufacturing, and testing of prototype composite applications. The RFRL is an integral part of the Department of Aerospace Engineering. In addition to externally funded research, the RFRL makes significant contributions to the educational goals of the department and the University as a superior training ground and research facility for MSU students at the graduate and undergraduate level. The RFRL is one of very few university-based laboratories with the capability to design, build, and test prototypes of full-scale manned and unmanned aircraft. The RFRL has engaged in a broad spectrum of composite prototyping and flight test activities, ranging from the development and fabrication of the first turbine powered composite aircraft and the first all-graphite turbofan business jet to the development of an Ultra Light UAV sensor platform. The RFRL also plays a major role in meeting university goals in the area of economic development.

Pasquale “PC” Cinnella, Ph.D., Interim Director

DIVISION OF AGRICULTURE, FORESTRY, and VETERINARY MEDICINE

CENTER for ENVIRONMENTAL HEALTH SCIENCES
Office: r1102 Wise Center http://www.cvm.msstate.edu/ehs/index.html

The Center for Environmental Health Sciences provides a research focus for university activities directed towards maintaining and improving the quality of environmental health in Mississippi, the nation, and the world. Its goal is to facilitate the development, implementation, and administration of focused and of multi-disciplinary efforts in research and training in the areas of environmental health, with primary consideration of human health impacts. One of the primary focus areas in environmental health is discerning the effects of environmentally relevant chemicals on organisms, and, conversely, the effects that organisms have on these chemicals. The Center provides an interdisciplinary mechanism for uniting researchers from different MSU administrative units to work on common problems which require interdisciplinary solutions. Participants have appointments in the College of Veterinary Medicine, the College of Arts and Sciences and the Mississippi Agricultural and Forestry Experiment Station. Major disciplines represented are biochemical toxicology, neurotoxicology, cardiovascular toxicology, immunotoxicology, analytical chemistry, exposure science and computational toxicology. The Center unites MSU faculty members with appropriate expertise into teams which can respond to environment health issues when general or specific needs arise.

Janice E. Chambers, Ph.D., D.A.B.T., A.T.S., Director
D. OTHER UNITS

FLOW CYTOMETRY FACILITY

Office: Wise Complex, Room R2217

The Flow Cytometry Facility is a University-wide facility supported by the College of Veterinary Medicine. The facility has a two-fold purpose: providing flow cytometry support of scientists at Mississippi State University and consultation on research problems involving flow cytometry. The facility is staffed by two trained technicians.

Lesya Pinchuk, M.D., Ph.D., Director

FOOD SCIENCE INSTITUTE

Office: 105 Herzer
http://www.fshp.msstate.edu

The Food Science Institute was authorized by the Board of Trustees of the Institution of Higher Learning in 1968 and designated as the “Flagship” for food-related issues in Mississippi. The Institute, located within the Division of Agriculture, Forestry, and Veterinary Medicine, is composed of numerous faculty from various departments to address the many issues related to the broad area of food science. The general area of food science encompasses food safety, value-added processing, culinary innovation, nutrition, health promotion, food marketing, sensory analysis, food engineering, and food entrepreneurship. Both undergraduate and graduate programs including Master of Science and Doctor of Philosophy programs are available in the Department of Food Science, Nutrition and Health Promotion; Plant and Soil Sciences; Microbiology; Aquaculture; and Poultry Science.

The major goals of the Food Science Institute are:
1) Stimulate and coordinate new innovative fundamental and applied research and technology transfer in food science.
2) Serve as an economic engine for the state with constant industry interaction to enhance cutting edge technology adoption.
3) Assist faculty and staff in exploring opportunistic research areas with associated extramural funding potential.
4) Be recognized by the industry, regulatory agencies, and academia as the leader in food science-related matters in the southeast.

William Benjy Mikel, Ph.D., Director

THE MISSISSIPPI QUARTERLY

Office: 213 Lee Hall
http://missq.msstate.edu

The Mississippi Quarterly is a publication of the College of Arts and Sciences and the Office of Research. Founded in 1948, it is a refereed, scholarly journal which publishes articles on the life and culture of the South, past and present.

Noel Polk, Ph.D., Editor
Laura E. West, MLS, Managing Editor

OFFICE of the STATE CLIMATOLOGIST

Office: 201 Hilburn Hall
http://www.msstate.edu/dept/geosciences/stateclimatologist.htm

A State Climatologist for Mississippi was appointed in the Department of Geosciences at MSU in 1983. The State Climatologist serves as the focal point for climatic information and analysis within the state. The State Climatologist communicates data and information, performs research, and monitors current climate conditions and places events in historical perspective. The State Climatologist in Mississippi has the distinction of being an American Association of State Climatologists-Recognized State Climatic Office.

Charles L. Wax, Ph.D., State Climatologist for Mississippi

MISSISSIPPI DEPARTMENT of AGRICULTURE and COMMERCE - BUREAU of PLANT INDUSTRY

Office: Mississippi Department of Agriculture and Commerce Building on Stone Boulevard
http://www.mdac.state.ms.us

The Bureau of Plant Industry is a division of the Mississippi Department of Agriculture and Commerce.

The Bureau is established under the Mississippi Plant Act, Sections 69-25-1 through 69-25-47, Mississippi Code 1972, and is responsible for protecting the agricultural and horticultural interests of the state from the introduction into and dissemination within the state of injurious insects and plant diseases. The Bureau of Plant Industry is the Plant Protection and Quarantine Division of the Mississippi Department of Agriculture and Commerce. An Advisory Board is established by law to advise the Commissioner of Agriculture on matters regarding the Bureau, especially in adopting rules and regulations.

The Bureau is responsible for administration and enforcement of:
2) Regulation of Professional Services - Sections 69-19-1 through 69-25-47.
5) Crop Spraying and Licensing of Aerial Applicators - Sections 69-21-1 through 69-21-27.
8) Mississippi Commercial Feed Law - Sections 75-45-151 through 75-45-195.
9) Mississippi Pure Seed Law - Sections 69-3-1 through 69-3-27.
10) Mississippi Fertilizer Law - Sections 75-47-1 through 75-47-39.

Headquarters Staff:
Butch Alpe, B.S., Director
John Campbell, M.B.A., State Entomologist
Tommy McDaniel, M.S., Director, Pesticide Division
Benny Graves, M.S., Director, Plant Pest Division
Fabian Watts, M.S., Director, Seed Division
Steve Moore, M.S., Branch Director, Worker Protection Standard
Kenneth Calcote, B.S., Branch Director, USDA Programs
Denise Clanton, B.S., Branch Director, Boll Weevil Program
Zack Chesser, M.S., Branch Director, Pesticide Registration; Feed, Fertilizer, and Lime

MISSISSIPPI STATE CLIMATOLOGY LABORATORY

Office: 314 Hilburn Hall

The MSU Climatology Laboratory is the focal point of the Broadcast and Professional Meteorology Programs within the Department of Geosciences. The Climatology Lab is equipped with state-of-the-art meteorological hardware and software systems in support of the teaching, research, and service missions of the department. In support of our broadcast component, the laboratory houses Weather Central and Accuweather graphics production machines, a GR3-level radar system, as well as a full digital studio with linear and non-linear editing capabilities. Daily weather forecasts developed in the Climatology Lab are disseminated through WMSV (FM 91.1), Bulldog Weather (Local TV-18), WOBV-TV (Starkville), and through live “webcasts” (http://www.msstate.edu/dept/geosciences/webcast.htm).

The Climatology Lab also serves as a base of operations for the North Mississippi Severe Storms Intercept Team. Members of this group are highly trained operational meteorology students who pursue severe local storms in order to provide the National Weather Service and local community with the most up-to-date severe weather information.

Recent research supported by the Climatology Lab includes topics in
Climatic Impacts on Mississippi Agriculture, Suicide and Climate, Population Biases Associated with Tornado Events, The Role of the Earth’s Surface on Climate, and a Thermodynamic Climatology of SE Tornado Events. The Climatology Lab also supports the Office of the State Climatologist and is opened on a limited basis to tour groups.

MISSISSIPPI STATE SEED TESTING LABORATORY
www.mdac.state.ms.us

The State Seed Testing Laboratory is a facility operated by the State Department of Agriculture in cooperation with Mississippi State University. Its primary function is to test official seed samples submitted by inspectors of the State Department of Agriculture in connection with the enforcement of the Mississippi Pure Seed Law. The laboratory also serves as the official testing laboratory for the Mississippi Seed Improvement Association.

In addition, the laboratory operates as a service department for farmers and seed merchants. Seeds submitted for analysis are tested for purity, germination and noxious weeds. Seed merchants are charged a nominal fee. Resident farmers are entitled to have one sample of each kind tested free in any calendar year, but for each additional sample a small fee is charged.

The State Seed Testing Laboratory is in the Mississippi Department of Agriculture and Commerce Building on the west side of Stone Boulevard along with the Bureau of Plant Industry.

Fabian Watts, M.S., Director/Seed Division

USDA, ARS, CROP SCIENCE RESEARCH LABORATORY
http://www.ars.usda.gov/main/site_main.htm?modecode=64-06-00-00

In the Crop Science Research Laboratory of the U.S. Department of Agriculture basic and applied research is conducted by scientists representing many scientific disciplines. The major objectives of the research programs are to provide increased crop production with greater efficiency by developing cropping systems, pest resistant strains with improved agronomic traits, and decision-making models to reduce costs and conserve natural resources.

Major research lines include corn host plant resistance, genetics and precision agriculture, waste management and forage research.

Johnnie N. Jenkins, B.S., M.S., Ph.D., Director

USDA, FOREST SERVICE, SOUTHERN RESEARCH STATION

Two research units of the Southern Research Station, U.S. Department of Agriculture, Forest Service are located in the Forestry Sciences Laboratory, 201 Lincoln Green, in the southwest portion of the campus, and one in Thompson Hall. Basic and applied research on the ecology and physiology of seeds of forest tree species as well as the study of hydrologic and forest soil processes are conducted by staff of the Center for Bottomland Hardwoods Research. The Forest Inventory and Analysis Unit personnel conduct the continuous forest resources inventory for the mid-south states. The Wood Products Insect Research Team personnel conduct basic and applied research on termites.

For more information about these Units, the Southern Research Station, or the Forest Service, please visit our web site: http://www.fs.usda.gov/

Center for Bottomland Hardwoods Research
Tracy Hawkins, Ph.D. – Research Ecologist
Forest Inventory and Analysis
David V. Few, B.S. – Supervisory Forester
Wood Products Insect Research
Terence L. Wagner, Ph.D. – Supervisory Research Entomologist

USDA, ARS, POULTRY RESEARCH UNIT

The South Central Poultry Research Laboratory of the U.S. Department of Agriculture was dedicated May 29, 1965. Located on the west side of the campus on Spring Street, it is a center for the study of disease, environmental, and waste management factors that affect the poultry industry. Research facilities include the office-laboratory building, environmental chambers, disease isolation units and seven poultry research houses. The research is being conducted by specialists in the fields of engineering, molecular biology, poultry science, and veterinary science of Agricultural Research Service, U.S.D.A., in cooperation with Mississippi State University and other interested universities.

Scott L. Branton, D.V.M., Ph.D, Veterinary Medical Officer; Research Leader

USDA/APHIS/WS NATIONAL WILDLIFE RESEARCH CENTER
103 Scales Building
http://www.aphis.usda.gov/wildlife_damage/nwrc

The National Wildlife Research Center (NWRC) is the research arm of the Wildlife Services program of the U.S. Department of Agriculture/Animal and Plant Health Inspection Service. NWRC is the U.S. federal organization responsible for conducting research to resolve conflicts between human and wildlife. The NWRC Mississippi field station was established by Congressional mandate in 1988 to develop methods for reducing bird depredations at aquaculture farms in the southern United States. Personnel at the NWRC Mississippi field station study the biology, impact, and management of a variety of captive and free-ranging avian species, including cormorants, pelicans, and wading birds.

Fred L. Cunningham, DVM., Project Leader/Supervisory Wildlife Research Biologist; Fred.L.Cunningham@aphis.usda.gov

USDA/APHIS/ WILDLIFE SERVICES
200 Thompson Hall

The U.S. Department of Agriculture, Animal and Plant Health Inspection Service, Wildlife Services (WS) program is legislatively mandated to provide assistance in the prevention and control of wildlife damage. WS programs are directed toward the protection of agriculture, property, industrial resources, and public health and safety, and natural resources. Services include technical assistance or direct operational control. Technical assistance consists of advice, recommendations, training, information transfer, or materials provided to others for the resolution of problems. In contrast, direct operational control activities are conducted by WS personnel through cooperative wildlife damage management programs. These two types of assistance are available upon request to anyone.

Kris Godwin, M.S., State Director, kris.godwin@aphis.usda.gov

UNIVERSITY PRESS of MISSISSIPPI

The University Press of Mississippi was founded in 1970 to encourage the dissemination of the results of research and study through the publication of scholarly works. Functioning as the scholarly publishing arm of the state-supported universities in Mississippi, the University Press is governed by a Board of Directors made up of two representatives from each of the eight state universities, one representative from the Board of Trustees of Institutions of Higher Learning, and the director of the Press, ex officio.

The University Press normally publishes approximately 65 books each year. Primary areas of interest are history, literature, culture, African American studies, and regional topics but manuscripts in all areas of study are welcomed.

Administrative offices of the University Press are located in the Education and Research Center of Mississippi, 3825 Ridgewood Road, Jackson, Mississippi.
Admissions and General Information (requirements and application questions): Director of Admissions, P.O. Box 6334; (662) 325-2224

Privacy Act

Notification to Students of Their Privacy Rights under the Family Education Rights and Privacy Act (General Education Provisions Act, Sec.438, Pub. L. 90-247, Title IV , as Amended) by Mississippi State University.

The purpose of this notification is to inform eligible students at Mississippi State University about the university’s policy concerning the privacy rights of students under the stated Act. Specifically, this notification (1) informs students of their rights under the Act, (2) defines directory information and the conditions for its release, and (3) specifies the location on campus of the policy statement and how copies of it may be obtained.

I. Subject to limitations specified in the Act, eligible students are assured the following rights pertaining to their educational records.
   A. The right to inspect and review their records, to request reasonable explanations and interpretations of them.
   B. The right to seek correction of the records through a request to amend them or through a formal hearing.
   C. The right to control the disclosure of personally identifiable information from their records.
   D. The right to file complaints with the Family Education Rights and Privacy Act (FERPA) Compliance Officer at Mississippi State University.
   E. The right to file complaints with the Family Educational Rights and Privacy Act Office (FERPA), Department of Health, Education and Welfare, 330 Independence Ave. S. W., Washington, DC 20201, concerning alleged failures by Mississippi State University to comply with the requirements of Section 438 of the Act.

II. Directory Information is treated as general information and will be released upon request unless a written request that it not be released is received by the University Registrar (278 Garner Hall or P. O. Box 5268, Mississippi State, MS 39762) within thirty (30) days from the beginning of any period of registration. Directory Information instructions received by this date will be reflected in the printed student directory. Instructions received after this date will be noted in the on line directories but not the printed directories. Students may update the release instructions of directory information on line via MyBanner/OnCampus at any time.

III. The information about eligible students treated as Directory Information is defined in Academic Operating Policy (AOP) 12-13 Academic Records (November 8, 2000 / Revised December 1, 2006). This document also contains the University’s policy concerning the privacy rights of students and the procedures for implementing this policy and available on the University’s Web site at: http://www.msstate.edu/dept/audit/mainindex.html

2012 DISCLOSURE STATEMENTS - Student Right-to-Know Act (P.L. 101-542)

Graduation Rate of Entering Freshmen

1. Mississippi State University is pleased to provide the following information regarding our institution’s graduation/completion rates. This information is provided in compliance with the Higher Education Act of 1965, as amended. The rates reflect the graduation status of students who enrolled during the 2003-04 school year and for whom 150 percent of the normal time-to-completion has elapsed. During the school year of 2003-04, 1,659 first-time, full-time, degree seeking undergraduate students entered Mississippi State University. After six years (as of August 31, 2009), the proportion of students who had graduated from our institution or completed their programs was 61.4 percent. (MSU reported this data to the Integrated Postsecondary Education Data System (IPEDS) March 16, 2009.)

2. While reviewing this information, please bear in mind: (1) The graduation/completion rate is based on six years of attendance that equates to 150 percent of our longest programs; (2) Since we are a four year degree granting institution our primary mission is to award earned degrees, not to prepare students to transfer to other institutions, therefore, we have elected not to report our transfer-out rate; (3) The graduation/completion rate does not include students who left the University to serve in the armed forces, on a religious church missions, or in the foreign service of the federal government. This information will be updated once annually and will be presented on our Web site at http://www.registrar.msstate.edu/Policies/policies.html and in the annual Bulletin of Mississippi State University.

3. Questions related to this report should be directed to the University Registrar, Mississippi State University, P. O. Box 5268, Mississippi State, MS 39762. Email to registrar@registrar.msstate.edu or telephone 662-325-2663.

Other Right-to-Know Information

1. The information Mississippi State University is required to provide by Federal Law can now be found at the Web addresses listed below:
   2. University Policies Relating to Students and Student Records* may be located at http://www.msstate.edu/dept/audit/mainindex.html.
   *All MSU students are responsible for knowing and abiding by these policies.
   3. Consumer Information Regarding Student Financial Aid may be located at http://www.sfa.msstate.edu/policies/
   4. Mississippi State University Annual Security Report** may be located at http://www.msstate.edu/web/security.html

**This report includes statistics for the previous three years concerning reported crimes that occurred on campus; in certain off-campus buildings or property owned and controlled by MSU; and on public property within, or immediately adjacent to and accessible from the campus. This report also includes institutional policies concerning campus security, such as alcohol and drug use, crime prevention, the reporting of crimes, sexual assaults, and other matters. If you have questions or wish to have a paper copy of any of the above information, please contact the Dean of Students Office at 662-325-3611.
