I. THE TOTAL UNIVERSITY

I. INTRODUCTION

A. The Setting. Mississippi State University forms part of a cohesive town-university community with the growing agricultural-commercial-industrial town of Starkville. Located in the eastern part of north-central Mississippi, it is 125 miles northeast of Jackson and 23 miles west of Columbus; it is served by Highways 82, 12, and 25 and by feeder air service through the Golden Triangle Regional Airport 14 miles east. Away from urban complexities, the community enjoys many intellectual, cultural, and recreational advantages; the MSU-Starkville Civic Symphony and Chorus; the Starkville Community Theater; the University Lyceum series, bringing professional musical, dramatic, and artistic groups and performers to the campus; the Lecture Series; exhibition and recital activities by local and visiting artists; public radio and public television programs through the Mississippi Authority for Educational Television; performances by popular musical groups of regional and national celebrity; frequent intercollegiate athletic events in modern facilities, and a variety of recreational opportunities on playing fields and courts, in neighboring forests, fields, and lakes, and along the nearby Tennessee-Tombigbee Waterway.

B. The University. Mississippi State University is a comprehensive, doctorate-degree-granting university offering to a diverse and capable student body a wide range of opportunities and challenges for learning and growth; to the world of knowledge, vigorous and expanding contributions in research, discovery, and application; to the State and its people in every region, a variety of expert services. Mississippi State University is designated as a Doctoral/Extensive institution by the Carnegie Foundation for the Advancement of Teaching. It is representative of the American Land-Grant tradition and distinctive in its own character and spirit, born of its Mississippi heritage and the vision and loyal perseverance of those who have labored in its development. Mississippi State University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools (1866 Southern Lane, Decatur, Georgia 30033-4097; telephone (404) 679-4501) to award baccalaureate, master’s, specialist, and doctoral degrees.

An able faculty, drawn from the best in all parts of the nation, strive earnestly to demonstrate excellence in teaching, while producing in their lives and in their specialty scholarly books, articles, and conferences for the University, and the State. They thus ensure for their students instruction that is in immediate touch with current knowledge and thought. A body of energetic researchers, both faculty and other, assisted by an effective research administration, places Mississippi State among the first one hundred universities in the nation in research and development in the sciences and engineering. The University’s service agencies are similarly distinguished, earning the respect and support of their various constituents throughout the State, as well as in other states and in foreign countries.

C. The History. The University began as The Agricultural and Mechanical College of the State of Mississippi, one of the national Land-Grant Colleges established after Congress had passed the Morrill Act in 1862. It was created by the Mississippi Legislature on February 28, 1878, to fulfill the mission of offering training in “agriculture, horticulture and the mechanical arts . . . without excluding other scientific and classical studies, including military tactics.” The College received its first students in the fall of 1880 in the presidency of General Stephen D. Lee. In 1887 Congress passed the Hatch Act, which provided for the establishment of the Agricultural Experiment Stations (1888). Two legislation of the Federal rural program provided funds for extending the mission of the College: in 1914, the Smith-Lever Act called for “instruction in practical agriculture and home economics to persons not attendant or resident,” thus creating the state-wide effort which led to Extension offices in every county in the State; and, in 1917, the Smith-Hughes Act provided for the training of teachers in vocational education.

By 1932, when the Legislature renamed the College as Mississippi State College, it consisted of the Agricultural Experiment Station (1887), the College of Engineering (1902), the College of Agriculture (1903), the School of Industrial Pedagogy (1909), the School of General Science (1911), the College of Business and Industry (1915), the Mississippi Agricultural Extension Service (1915), and the Division of Continuing Education, (1919). Further, in 1926 the College had received its first accreditation by the Southern Association of Colleges and Schools. By 1958, when the Legislature again renamed the College, as Mississippi State University, the Office of Graduate Studies had been organized (1936), doctoral degree programs had begun (1951), the School of Forest Resources had been established (1954), and the College of Arts and Sciences had been created (1956).

The School of Architecture admitted its first students in 1973, the College of Veterinary Medicine admitted its first class in 1977, and the School of Accountancy was established in 1979.

D. Purposes. As a Land-Grant institution, Mississippi State University is dedicated to the three broad purposes already mentioned—learning, research, and service: learning, on-campus and off-campus, to enhance the intellectual, cultural, social, and professional development of its students; research, both to extend the present limits of knowledge and to bring deeper insight, understanding, and usefulness to existing knowledge; and service, to apply knowledge and the fruits of research to the lives of people.

Fulfilling these purposes is the chief work of the large number of educational units that make up the total university, including, among others, the academic departments, schools, and colleges; Continuing Education; the Mississippi State University Extension Service, and the Mississippi Agricultural and Forestry Experiment Station.

The quality of the faculty, staff, and administrators ensures the high quality of the instruction, research, and service provided. The quality of the University’s programs ensures that its students receive a well-designed and comprehensive education that will assist them to lead constructive lives and achieve their personal and professional goals.

From its beginnings, Mississippi State University has been known as “The People’s University”; through its state-wide efforts, it keeps that character. The main campus in Starkville is augmented by a degree-granting center in Meridian and a program center at the Stennis Space Center, a Master of Science degree in Engineering at the Waterways Experiment Station in Vicksburg, ten branch stations of the Mississippi Agricultural and Forestry Experiment Station, and offices of the MSU Extension Service in almost every county of the state. The University thus makes available degree and non-degree courses, programs, and services to all citizens, regardless of race, age, sex, or economic condition.

Statement of Institutional Purpose

Mississippi State University was founded as a land-grant institution in 1878 to meet the needs of the people, institutions, and organizations of the state, the region, and the nation through undergraduate and graduate education, basic and applied research, and service to institutions and organizations. The University’s fundamental purpose is to develop knowledgeable and skilled people who engage in the pursuit of intellectual truth, help constitute a democratic society, contribute to economic growth and prosperity. Mississippi State is committed to performing basic research to expand the bounds of knowledge, to using applied research to translate knowledge into practice, to providing service to institutions and organizations, and to providing education to its students.

Educational Philosophy - Mississippi State’s primary responsibility is to provide a high quality educational opportunity to all adequately prepared students in the state and region. It seeks to inculcate in its students a lifelong love of learning; an appreciation of the cultural, intellectual, and historical impact of the search for truth and knowledge; the opportunity for professional specialization and emotional and social development through out-of-class experiences. All students are expected to master the skills that enable them to communicate clearly, to use mathematics, and to understand their cultural heritage and that of others. The University seeks to develop in its students the ability to think independently, to accept responsibility for themselves, the University, and the State. They thus ensure for their students instruction that is in immediate touch with current knowledge and thought. A body of energetic researchers, both faculty and others, assisted by an effective research administration, places Mississippi State among the first one hundred universities in the nation in research and development in the sciences and engineering. The University’s service agencies are similarly distinguished, earning the respect and support of their various constituents throughout the State, as well as in other states and in foreign countries.

Academic Freedom and Responsibility - Freedom of inquiry and expression is fundamental to the idea of a university and to a democratic society. Mississippi State affirms this principle and vigorously defends it. At the same time, faculty are obligated to exercise good judgment, to maintain the highest professional and personal standards of intellectual integrity, and to ensure that the free exchange of ideas is marked by both accuracy and relevance. Information to the subjects or issues under consideration. Mississippi State recognizes the value of diverse opinions in decision making and pursues its mission in an atmosphere of shared governance and open communication. Faculty and staff are involved in policy formulation and in imple-
menting the learning, research, and service missions of the University. Faculty and staff also recognize their shared accountability for the performance of the University in carrying out its mission.

Curricular Offerings - Mississippi State offers high quality education at the bachelor’s, master’s, professional, and doctoral levels. The University offers a liberal education for all students in a broad-based curriculum of the sciences, the arts and the technological disciplines to prepare them for productive careers and positions of leadership. Methods of inquiry and critical thinking are emphasized to prepare students to solve complex societal problems and to engage in lifelong learning and exploration. As a comprehensive land-grant university, Mississippi State serves both in-state and out-of-state students through instruction in engineering and agriculture, along with significant elements of the humanities, sciences, arts, business, and education. Besides a comprehensive range of undergraduate academic programs, the University offers outstanding graduate programs, capitalizing on the unique ability of a research university to expand the horizons of its students.

Traditional and Non-Traditional Education - The University affirms its mission to address education as a lifelong process by providing appropriate opportunities for continuing education and interacting with the pre-college educational system to prepare students for university study. Mississippi State continually assesses both traditional and innovative educational delivery systems in order to provide education in the most efficient and effective ways to as many citizens as possible.

Research - Research is an integral part of the mission of Mississippi State. It expands the frontiers of human knowledge and provides practical application of that knowledge. The University fosters research in which, together with students, can establish and maintain high quality research. The University makes available the results of its research to improve the well-being of the citizens of the State and to enhance the competitiveness of the state and nation in a global society. Research is essential to the instructional mission of the University. It brings state-of-the-art knowledge into the classroom and inspires superior undergraduate and graduate teaching and learning.

Responsibility to Constituencies - Mississippi State is responsive to numerous and rapidly changing constituencies. The University provides rigorous education to the state’s citizens, preparing students for careers and positions of leadership in state, regional, national, and world institutions and organizations. Mississippi State’s public service mission stresses problem-solving, economic development, social and ethical responsibility, and aesthetic awareness among the individuals, governments, businesses, and communities it serves. Recognizing its legal and ethical responsibilities, the University is committed to enhancing the cultural, artistic, and intellectual life of these multiple constituencies. This commitment includes sharing expertise through co-operation, extension, technical assistance, professional development, and technology transfer.

E. The University Today. Mississippi State University now comprises the following academic units: the College of Agriculture and Life Sciences including the School of Human Sciences; the School of Architecture; the College of Arts and Sciences; the College of Business and Industry including the School of Accountancy; the Division of Continuing Education; the College of Education; the College of Engineering including the Swalm School of Chemical Engineering; the College of Forest Resources; the Office of Graduate Studies; the College of Veterinary Medicine. In addition, the Mississippi Agricultural and Forestry Experiment Station, operating branch stations throughout the State, conducts research in a variety of areas and assists in the University’s teaching and service functions. Finally, the Mississippi State University Extension Service offers programs and services to the people of the State through campus and county offices and personnel. Supporting the academic and educational programs of the total University are the Mitchell Memorial Library and branch libraries.

Within the framework of the University, several units perform specialized teaching, research, or service activities. Among these are the University Honors Program, the Biological and Physical Sciences Research Institute, the Division of Business Research, the Bureau of Business Research and Evaluation, the Engineering and Industrial Research Station, the Food Science Institute, the Institute for the Humanities, the Research Center at the John C. Stennis Space Center, the Diagnostic Instrumentation and Analysis Laboratory, the Remote Sensing Program, the Social Science Research Center, the Water Resources Research Institute, the Cobb Institute of Archaeology, Engineering Services, the Division of Business Services, the Raspet Flight Research Laboratory, the Research and Development Unit for Vocational-Technical Education, the B. McCay Food and Entomology Laboratory, the Office of Planning, Evaluation, and Institutional Effectiveness, the John C. Stennis Institute of Government, the Forest Products Utilization Laboratory, the Engineering Research Center, the Southern Forest Experiment Station, the Division of Plant Industry, the State Seed Testing Laboratory, the State Chemical Laboratory, the Bell Weevil Research Laboratory, the South Central Poultry Research Laboratory, the Community/Economic Development Center, the Center for Environmental Studies, the Center for Robotics, Automation and Artificial Intelligence, the Research Services Biosafety Office, the Electron Microscope Center, Hazardous Waste Office, Laboratory Animal Veterinarian, Radiological Safety Office, the University-Industry Chemical Research Center, the Research and Training Center for Blindness and Low Vision, the Mississippi Quarterly, the Center for International Security and Strategic Studies, and the Center for International Programs.

Mississippi State University operates an off-campus, degree-granting center in Meridian where both undergraduate and graduate programs are offered and a program center at the Stennis Space Center. In cooperation with the U.S. Army Engineer Waterways Experiment Station, the College of Engineering offers the Master of Science degree to qualified students in Vicksburg. At the request of the U.S. Navy, the College of Education offers the Master of Science degree in Counseling at the U.S. Naval Base in Roosevelt Roads, Puerto Rico.

The Board of Trustees of State Institutions of Higher Learning has designated Mississippi State University as a comprehensive, doctoral degree-granting university. These designations, in concert with the University’s original Land-Grant mission, make Mississippi State University a major contributor to the educational system of the State. For over a century, the State has benefited from the University and its graduates, most of whom have remained in Mississippi and aided the State’s economic, social, and educational development. Through its membership in such organizations as the Southern Regional Education Board, the Southern Association of Colleges and the American Council on Education and the National Association of State Universities and Land-Grant Colleges, Mississippi State University is justly recognized for its educational and technological contributions to the national and international communities. The commitment of faculty, administrators, and staff personnel is to continue the high quality of teaching and research, and service to Mississippi and her people and to people beyond the borders of this State and nation.

Past Presidents of the College/University

1. General Stephen D. Lee (1880-1899)
2. John Marshall Stone (1899-1900)
3. John Crumpton Hardy (1900-1912)
5. William Hall Smith (1916-1920)
6. David Carlisle Hull (1920-1925)
8. Hugh Critz (1930-1934)
9. George Duke Humphrey (1934-1945)
10. Fred Tom Mitchell (1945-1953)

F. The Grounds, Buildings, and Facilities. The grounds of the University comprise about 4,200 acres, including farms, pastures, and woodlands of the Experiment Station. The net investment in buildings and grounds is approximately $450 million.

II. ADMISSION TO THE UNIVERSITY

A. ENROLLMENT SERVICES

Enrollment counselors visit high schools and community/junior colleges to assist students in making a smooth transition to Mississippi State University by answering questions about admissions, financial aid and scholarships, on-campus housing, academic programs, fees and expenses, new student orientation, cooperative education, extracurricular activities, ROTC, and other areas of concern. Prospective students and their parents are encouraged to visit the campus. To meet students or to get an overall view of what the campus is like. To make an appointment, write to the Office of Enrollment Services, Box 6334, Mississippi State, MS 33762, or call 662-325-3076. The web address is: www.enroll.msstate.edu, and fax requests may be sent to 662-325-1MSU.

All new students (freshmen and transfers) entering the University are encouraged to participate in the summer orientation program. The purpose of the program is to enable the student to become familiar with the University, its activities, and its academic programs. The student participates in small
group activities, selects courses, completes schedules, receives academic advisement, and completes registration except for the payment of tuition and fees.

**Invitation to Parents.** At the time of student orientation, parents are invited and urged to attend a program designed to acquaint them with University policies, student activities, campus life, academic programs, and other interest areas. They also are given the opportunity to meet and talk with academic deans and department heads and with staff members in the Division of Student Affairs.

Prior to the beginning of each semester, there is an orientation program for those who are admitted to the University too late to participate in the summer programs. Students who for other reasons cannot attend orientation at an earlier date may attend these sessions.

For additional information, write to the Director of Enrollment Services, Box 6334, Mississippi State, MS 39762, or telephone 662-325-3076. Find the Office of Enrollment Services on the World Wide Web at www.enroll.msstate.edu.

## B. ADMISSIONS

**DISCLAIMER**

Until further notice, the admission information contained in this Bulletin most accurately describes the admissions policies, regulations, requirements and procedures of the University and the Board of Trustees of Institutions of Higher Learning. The University reserves the right to delete, substitute, change or supplement any statement in this Bulletin without prior notice.

**Applications.** For consideration for admission for the fall term, freshmen applications must be received by May 1. Transfer applicants must submit applications by August 1 for consideration for the fall term. Applicants to the School of Architecture, Professional Golf Management, and the College of Veterinary Medicine have early application deadlines. Other departments may also have application deadlines. Contact the specific department for details.

Out-of-State residents and International students must submit a $25.00 non-refundable application fee. The application for admissions cannot be processed until this fee is received.

Mississippi State University may void enrollment in the following situations: if an original transcript is not received; if a student is not eligible for readmission to any college formerly attended; or if any document is fraudulent or altered.

Applicants may meet general admission requirements to the University and not meet the requirements for a specific department. Applicants should contact the academic department to which they are applying for additional requirements.

For admission information or to inquire further about university admission requirements, contact the Office of Admissions, Mississippi State University, P.O. Box 6305, Mississippi State, MS 39762. Telephone: 662-325-2224. Fax: 662-325-7360. E-mail: admit@admissions.msstate.edu. Students may apply online by visiting our website at www.msstate.edu. All applications must be submitted electronically.

### 1. Freshman Entrance Requirements

**a. Regular Admission.**

1. Submit application for admission. For consideration for admission for the fall term, freshmen applications must be received by May 1.
2. Out-of-State applicants and International students must submit a $25 non-refundable application fee.
3. Must have graduated from an approved secondary school.
4. Submit an official American College Test (ACT) score or Scholastic Aptitude Test (SAT) scores.
5. Submit a high school transcript to Mississippi State University, as well as an official transcript upon graduation from high school. If the applicant has attended another college, he/she should request those transcripts also be sent to the Office of Admissions.
6. Must have earned in grades 9-12, at a minimum, the units shown in the following table:

<table>
<thead>
<tr>
<th>Subject</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>English</td>
<td>4</td>
</tr>
<tr>
<td>Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>Science</td>
<td>3</td>
</tr>
<tr>
<td>Social Science</td>
<td>3</td>
</tr>
<tr>
<td>Advanced Electives</td>
<td>2</td>
</tr>
<tr>
<td>Computer</td>
<td>1/2</td>
</tr>
</tbody>
</table>

The high school course requirements above are applicable to high school students graduating after spring 1996. Students graduating prior to spring 1996 will be screened for admission under admission standards previously in effect.

Full admission to Mississippi State University will be granted to high school graduates who complete high school courses with one of the following:
- A minimum 3.20 grade-point average on the required high school courses.
- A minimum 2.50 grade-point average on the required high school courses or standing in the top 50 percent of the class and a composite score of 16 or higher on the ACT or a combined score of 760 or higher on the SAT.
- A minimum 2.0 grade-point average on the required high school courses and a composite score of 18 or higher on the ACT or a combined score of 860 or higher on the SAT.
- A satisfactory qualifier under the National Collegiate Athletic Association standards for student-athletes who are full qualifiers under Division I guidelines.

Mississippi residents who fail to meet the full admission standards as listed above may, as a result of review, be admitted to the fall or summer semester.

The review shall involve a consideration of high school performance, ACT/SAT scores (if available), placement testing, and a special interests and skills, as well as other non-academic factors.

Entering freshmen with a high school grade point average of less than 2.5 in the pre-college core courses listed above and a composite ACT score of 20 or below will be placed in the undeclared major and will be advised by the University Academic Advising Center for 30 hours of core classes.

---

*Four units of Mathematics are recommended for Engineering majors, to include Trigonometry.*
b. Admission with Deficiencies.

If the initial review indicates inadequate readiness in English, reading, or mathematics, Mississippi students will be required to participate in counseling and testing, which will be held on campus (and other designated locations) prior to the beginning of the summer session. Students who successfully complete the counseling and testing program will be admitted to the University, with the requirement that they participate in the year-long Academic Support Program.

Mississippi students who fail to successfully complete the counseling and testing program may be given admission with the requirement that they enroll in the Summer Developmental Program. This is an intensive program that concentrates on those high school subject areas (writing, reading, and mathematics) essential to success in first-year college courses. Students who successfully complete this summer program will be allowed to continue in the fall term, with mandatory participation in the Academic Support Program during their freshman year. Developmental courses taken during the Summer Developmental Program are remedial and neither count toward a degree nor are computed in a student’s grade point average.

Students who fail to successfully exit the Summer Developmental Program will be counseled to explore other post-secondary opportunities.

A student athlete must meet the requirements of the Southeastern Conference and the National Collegiate Athletic Association (N.C.A.A.).

Mississippi State University neither awards credit nor accepts transfer-college-credit based solely on ACT, SAT, or other comparable tests commonly administered to high-school students primarily for college admissions purposes. Documents and other proof that students have met the University entrance requirements are kept on file in the Admissions Office, Room 111, Allen Hall.

c. Early Admission. A superior secondary-school student may be admitted to the freshman class as an EARLY ADMISSION if he or she (a) has earned a minimum of fifteen (15) acceptable credits, (b) has earned a standard composite ACT score of 25 or an SAT combined score of 1130, (c) ranks in the upper twenty-five (25) percent of his or her high-school class, and (d) is recommended for early admission in a letter from his or her high-school principal.

d. Special Program for Academically Talented Students (SPATS). Academically talented students who (a) have finished at least their junior year in high school, as judged by their high-school officials, (b) in the judgment of parents and high-school administrators are mature enough to profit from a summer’s work in college, and (c) have a standard composite score of 25 on the American College Test, may apply for admission to a special summer program in which they may earn regular college credit.

A SPATS student may take a maximum of 6 credit hours (two courses) each summer term, selected from a list available for credit under this program. Courses taken must not be the equivalent of those which the student will take in the senior year of high school. Students are expected to return to high school and finish a normal senior year. The courses may not be substituted for high-school credits to meet college admission requirements. Credit is reserved until the student has graduated from high school. Information concerning the program and application forms may be obtained by writing to: Director, Special Program for Academically Talented Students, Box 5247, Mississippi State, MS 39762.

e. Admission by Examination. An applicant who has not graduated from high school may substitute the General Educational Development Test (high school level) for the requirement of high school graduation. The GED will substitute for the requirement of high school graduation only, and not for the other requirements for freshman admission. Therefore, applicants who took the GED must submit an acceptable ACT/SAT score. An interview is required, along with review of other information. Applicants who hold the GED and who cannot meet other requirements for freshman admission may enroll at Mississippi State as transfers after meeting the normal requirements for transfer admission from another regionally accredited institution.

f. Admission to the College of Veterinary Medicine. (See College of Veterinary Medicine section in Part II.)

2. Special Non-Degree Classification

An applicant who is twenty-one (21) years old and who does not meet the regular freshman admission requirements, may apply to the Admissions Office for non-degree seeking status. Students in this category will be advised by and will schedule classes through the University Academic Advising Center. Applicants must demonstrate adequate preparation for the courses they plan to schedule. SND students may schedule a maximum of twelve (12) semester hours during a regular term and three (3) semester hours during a five-week summer term. To move from the SND status, students should satisfactorily complete twelve (12) semester hours with a C or better average in core courses that are applicable to a degree at MSU. Students wishing to gain reclassification to a traditional major should discuss this during their initial meeting with one of the professional advisors in the University Academic Advising Center. For students admitted to a degree program, a minimum of eighteen (18) semester hours of credit earned while in the SND classification may be counted toward a baccalaureate degree, pending approval by the dean of the college or school from which the degree is sought.

Degree-seeking adult applicants with previous college attendance must meet regular transfer student requirements and, therefore, may not apply for admission under the Special Non-Degree option.

Non-degree seeking adult applicants with previous college attendance who do not meet regular transfer requirements may be allowed to schedule courses for self-improvement and/or job enhancement only. Applicants should file a letter of intent with the Director of Admissions to enroll under this option.

3. Admission of Transfer Students

1. Submit application for admission. Transfer applicants must submit applications by August 1 for considerations for admission for the fall term.
2. Out of state applicants and International students must submit a $25 non-refundable application fee.
3. Submit an official final transcript from each college or university attended. An applicant may not ignore previous college attendance and must list all colleges attended on the application for admission. An applicant who misrepresents information or fails to provide information about prior college attendance will be subject to disciplinary action, including dismissal from the University.
4. Submit an official high school transcript and ACT or SAT scores if they seek admission under Option 1.
5. Be in good standing at the last college or university attended.

Admission Option 1:
1. Submit a high school transcript and ACT or SAT scores showing that the applicant qualified initially as a freshman enrolee (see Freshman Entrance Requirements).
2. Earn an overall 2.0 GPA (as computed by Mississippi State University) on all courses attempted at a regionally accredited institution of higher learning.

Admission Option 2:
Any applicant who does not meet freshman requirements may attend a regionally accredited institution of higher learning and complete the core courses listed below and earn an overall 2.0 GPA (as computed by Mississippi State University) on all hours attempted. Official transcripts from all institutions attended must be submitted.

The applicant must complete the following 24 semester hours of college work at a regionally accredited college:
- 6 semester hours of English composition
- 3 semester hours of college algebra or higher level mathematics
- 6 semester hours of laboratory science
- 9 semester hours of transferable electives

Admission Option 3:
Any applicant who does not meet freshman requirements may attend a regionally accredited institution of higher learning and earn a A.A., B.S. or equivalent from the regionally accredited institution with a 2.0 GPA (as computed by Mississippi State University). Official transcripts from all institutions attended must be submitted.

Although the transfer applicant may meet general admissions requirements to the University, he/she may not meet the requirements for a specific department. Applicants should contact the academic department for additional requirements.

Transfer work earned from a non-regionally accredited institution is not acceptable at Mississippi State University and applicants from these institutions must meet the admission requirements as an entering freshman.

International transfer students must meet the requirements in section 4.

Transfer Credits. Credits transferred from regionally accredited institutions are reproduced on the permanent records of Mississippi State University. Credits earned at another institution while on disciplinary suspension or dismissal may never be transferred or posted to the Mississippi State University record. In the case of students receiving VA benefits, enrollment certificates submitted to the Veterans Administration will reflect proper credit for previous education and training. This is done as a convenience for the student in providing him or her with an accurate consolidated record of his or her entire college career. This action is evidence that the credits are considered valid. Validity, however, is not to be confused with acceptability or applicability.

The Office of Admissions will accept academic transfer hours from other regionally accredited institutions. Depending on the course of study, technical credit may or may not be accepted. Remedial and Vocational credit will not be accepted. To meet graduation requirements, a transfer student must have an overall C (2.00) average, calculated by the method currently in use at Mississippi State University, on all courses transferred and rescheduled at all institutions attended, including Mississippi State University. Excess quality points earned at other institutions cannot be used to offset any deficiencies at Mississippi State. Acceptance of junior or community college work is limited to one half the total requirements for graduation in a given curriculum. The last half of the total hours applied toward graduation must be earned in a senior college.

Applicability of transfer work depends upon the equivalence of transfer credits with the requirements of a particular curriculum. Applicability varies from curriculum to curriculum, not only for transfer students from other institutions but for students transferring from one school or curriculum to another within Mississippi State University. In either case, the upper limit of the number of applicable credits is the number of accepted credits. Applicability is determined by the dean of the college or school to which one is admitted.

Non-traditional credits awarded by another college or university will be evaluated in terms of current policy at Mississippi State University. Unless the basis for awarding the credit is readily identifiable, no credit will be allowed until such time as the student, through the awarding institution, can establish the credibility of the work. Credits for ACT, SAT, CLEP General, or other comparable tests will not be accepted as transfer credit.

4. Admission of International Students

Undergraduate international students must submit the following documents in order to be considered for admission:

1. International application form
2. $25.00 non-refundable application fee
3. Certified, translated copies of all transcripts, mark sheets and diplomas. Mississippi State University may void enrollment if an original transcript is not received; if a student is not eligible for readmission to any college formerly attended; or if any document is false or fraudulent.
4. Mississippi State’s Declaration of Financial Support form
5. Bank or employer letter documenting financial support
6. Required test scores (see below)

TOEFL Requirement: All undergraduate international students must submit an acceptable score on the Test of English as a Foreign Language (TOEFL). The university minimum is 525, for paper based test or 195 for computer based tests but many departments have established higher requirements for their own students. TOEFL scores must be no more than two years old and must be verifiable. Completion of intensive English training or English Composition courses at a U.S. college does not waive the TOEFL requirement. Only students who are citizens of Australia, Bahamas, Canada, England, Guyana, New Zealand, Trinidad and Tobago, and Ghana and The Gambia are automatically exempt from this requirement. Citizens of South Africa, Botswana, Lesotho, and Swaziland are only exempt if English is listed as the first language on the Senior Certificate.

Freshman Admission Requirements: Diploma from secondary school or secondary leaving examination, Scholastic Aptitude Test (SAT) score of 980 or higher and appropriate TOEFL score.

Transfer Admission Requirements:

Option A: One year of successful study at a foreign university and appropriate TOEFL score.
Option B: Meet freshman admission requirements and maintain a quality point average of 2.00/4.00 or higher (as evaluated by Mississippi State University) on all college level work attempted.
Option C: Appropriate TOEFL score and 24 semester hours of transferable credit from a regionally accredited U.S. college, with a quality point average of 2.00/4.00 or higher, as evaluated by Mississippi State University, including all of the following credits:
9 semester hours of English Composition
3 semester hours of College Algebra (or a higher mathematics)
6 semester hours of laboratory science

Transfer Credit from Foreign Universities: The Office of Admissions certifies appropriate transfer credit from foreign universities. These courses are recorded on the Mississippi State University permanent record with the grade of S, rather than with letter grades. However, these courses are treated as graded courses (rather than pass-fail courses) in satisfying degree requirements. The student’s dean has the discretion to apply this transfer credit toward degree requirements or to reject any or all of it, just as with domestic students. Students may be asked to supply course descriptions, syllabi, tests, or other documentation to the dean or department to justify the applicability of a transferred course toward a particular degree requirement. No transfer credit will be awarded for English composition courses completed in colleges or universities outside the United States of America.

English as a Second Language Course: Courses in English as a Second Language (ESL) are considered developmental and are not transferable. They may not be used to satisfy any of the requirements for admission listed above. English courses taken at universities in non-English-speaking countries are considered to be ESL courses unless specific documentation is provided that literature, rather than language acquisition, was the primary focus of the course.

Deadlines for Submission of Materials: International students who are already inside the United States should submit all required materials for admission at least two months prior to the date of expected enrollment. Students who are outside the United States should apply at least four months in advance of enrollment. Undergraduate international application forms, required declaration of financial support forms, and additional information are available from the following address:

Director of Admissions
Box 6305
Mississippi State, MS 39762 USA

5. Admission to Teacher Education

The College of Education is responsible for all teacher education at Mississippi State University. All students who expect to qualify to teach must be formally admitted to the teacher education program. For specific information, see “Admission Procedures in the College of Education” in the College of Education section of the catalog.
6. Graduate Admissions

Any person admitted to Graduate Studies for any purpose must hold a bachelor’s degree; normally the undergraduate degree must be awarded by an institution having regional accreditation. A prospective applicant, who holds a bachelor’s degree from an educational institution that does not have regional accreditation, may request consideration from the Academic Dean of the College or School to which they wish to apply. Such a request to the Academic Dean would be made prior to making application for admission.

The Academic Dean of the College or School may prescribe specific undergraduate level courses as prerequisites to admission without regard to the accreditation status of the institution awarding the bachelor’s degree. The Academic Dean of the College or School has the authority to grant admission to all graduate programs in that College or School.

Graduate program areas may prescribe requirements in addition to the above conditions described for regular admission. See the current Graduate Bulletin for additional requirements.

Meeting minimum requirements for admission does not necessarily guarantee admission into a program. Each applicant must compete with all other applicants for availability in the respective programs.

Graduate applicants should consult the Graduate Bulletin or write for information and application materials to this address:

Office of Admissions
Mississippi State University
P.O. Box 6305
Mississippi State, MS 39762

MSU gives preference to self-managed applications. Applicants are encouraged to submit all required materials in one envelope. See Graduate Bulletin for additional information.

C. LEGAL RESIDENT STATUS

Students are classified as in-state or out-of-state for the purpose of paying University fees. The initial classification will be made by the Admissions Office at the time a student’s application for admission is processed. The burden of proof for establishing residency resides with the applicant. If a student misrepresents his or her status, he or she shall be responsible for paying the fees he or she would have otherwise been required to pay and will be subject to disciplinary action or dismissal from school. The University Registrar is authorized to change a student’s residence status upon receipt of evidence that the student is improperly classified.

The following state laws and regulations apply to determining the residential status for the purpose of enrolling and paying fees at a state supported institution of higher learning:

No student may be admitted to any institution of higher learning as a resident of Mississippi unless his residence has been in the State of Mississippi preceding his/her admission.

A student who has entered the State of Mississippi from another state and enters an educational institution is considered a nonresident. Even though he/she may have been legally adopted by a resident of Mississippi, or may have been a qualified voter, or landowner, or may otherwise have sought to establish legal residence, such a person will still be considered as being a nonresident of Mississippi if he/she has entered this state for the purpose of enrolling in an educational institution.

Legal Residence of a Minor. The residence of a person less than twenty-one (21) years of age is that of the father. After the death of the father, the residence of the minor is that of the mother. If the parents are divorced, the residence of the minor is that of the parent who was granted custody by the court, or, if custody was not granted, the residence continues to be that of the father. If both parents are deceased, the residence of the minor is that of the last surviving parent at the time of that parent’s death, unless the minor lives with a legal guardian of his or her person duly appointed by a proper court of Mississippi, in which case his or her residence becomes that of the guardian.

Legal Adoption of a Minor. Even though a minor may be legally adopted by a resident of Mississippi, he or she remains a nonresident if the parents are domiciled outside the State of Mississippi.

Legal Residence of an Adult. The residence of an adult is that place where he or she is domiciled; that is, the place where he or she actually resides with the intent of remaining there indefinitely, or of returning there permanently when temporarily absent.

Removal of Parents from Mississippi. If the parents of a minor who is enrolled as a student in an institution of higher learning move their legal residence from the State of Mississippi, the minor is immediately classified as a nonresident student.

Twelve Months of Residence Required of Adult Students. No student may be admitted to any institution of higher learning as a resident of Mississippi unless he or her residence, as defined herein above, has been in the State of Mississippi for a continuous period of at least twelve (12) months before becoming 21 years old, and immediately preceding registration for the period concerned (see factors regarding residency below).

Residence Status of a Married Person. A married person may claim the residence of his or her spouse, or may claim independent resident status as any other adult.

Children of Parents Who are Employed by Institutions of Higher Learning. Children of parents who are members of the faculty or staff of any institution under the jurisdiction of the board of trustees may be classified as residents without regard to the residence requirement of twelve (12) months, for the purpose of attendance at the institution where their parents are faculty or staff members. Full-time faculty and staff are also considered residents. Children or spouses of full-time faculty and staff are not automatically considered residents for tuition purposes at the College of Veterinary Medicine.

Military Personnel Assigned an Active Duty Station in Mississippi. Members of the armed forces on extended active duty and stationed within the State of Mississippi, except those military personnel whose active duty assignment in the State of Mississippi is for educational purposes, may be classified as residents, without regard to the residence requirement of twelve (12) months, for the purpose of attending state-supported institutions of higher learning and junior colleges of the State of Mississippi. Resident status of such military personnel who are not residents of Mississippi, as defined under “Legal residence of an adult,” shall terminate upon their reassignment for duty in the continental United States outside the State of Mississippi.

Children of Military Personnel. The resident status of children of members of the armed forces on extended active duty shall be that of the military parent for the purpose of attending state-supported institutions of higher learning and junior colleges of the State of Mississippi during the time that their military parents are stationed within the State of Mississippi and shall be continued through the time that military parents are stationed in an overseas area with last duty assignment within the State of Mississippi. The resident status of minor children shall terminate upon reassignment under Permanent Change of Station Orders of their military parents for duty in the continental United States outside the State of Mississippi, excepting temporary training assignments en route from Mississippi.

Certification of Residence of Military Personnel. A military person on active duty stationed in Mississippi who wishes to avail himself or herself of the provisions of these regulations must submit a certificate from his or her military organization showing the name of the military member; the name of the dependent (if a dependent); the name of the organization of assignment and its address (may be in the letterhead); that the military member will be on active duty stationed in Mississippi on the date of registration at the date of registration at the state-supported institution of higher learning or junior college of the State of Mississippi; and the signature of the Commanding Officer, the Adjutant or the Personnel Officer of the unit of assignment with signer’s rank and title. A military certificate must be presented to the registrar of the state-supported institution of higher learning or junior college of the State of Mississippi each semester or trimester at (or within ten (10) days prior to) registration each semester for the provisions hereof to be effective.

Aliens. All aliens are classified as nonresidents except that alien students with permanent resident status, temporary resident status, or refugee status can establish Mississippi residence by meeting the other normal requirements for legal residence under these regulations.
In addition to state laws and regulations, the University has established certain IHL Board approved regulations concerning the payment of non-resident tuition. Mississippi State University (except the College of Veterinary Medicine) may waive a percentage of the non-resident tuition for the following groups of students:

1. Those who are currently awarded athletic scholarships.
2. Those who are currently awarded band scholarships.
3. Those who are currently awarded choral scholarships.
4. All graduate students holding assistantships. (Rules applicable to these awards may be found in the Graduate Studies Bulletin or in the Graduate Assistant Handbook. Both publications are available on the MSU Web: www.msstate.edu/dept/grad/publications.
5. Children of Mississippi State University alumni. (Application deadline is April 1) (For this purpose, an alumnus or alumna is defined as one who has earned a minimum of 48 MSU undergraduate credit hours or 30 MSU graduate credit hours of course work or received a degree from Mississippi State University. Graduate students must maintain a B (3.0) grade point average to continue eligibility for this award. STUDENT AFFAIRS OP 91.178. Policy on Out-of-State Tuition Waivers is available on the MSU Web: www.msstate.edu/dept/audit/mainindex.
6. Non-resident students who are certified participants in The Academic Common Market.

Academic Common Market. Academic Common Market out-of-state tuition waivers are available for specific academic programs for students from certain states. Application must be made first with the awarding state. The student must be a legal resident of that state and approved for a specific major at MSU. Both undergraduate and graduate students are eligible to apply. A qualified student must maintain full time status. The waiver is 100 percent of out-of-state tuition and will remain at this level unless the student’s field of study changes, or a student no longer has full time status.

To be eligible for the non-resident waiver during the first semester of enrollment, applications and resident verification must be submitted to and approved by the Office of the Provost and Vice President for Academic Affairs prior to the first day of class. For more information about submission and deadlines, please contact that office at 662-325-3742.

Students seeking information on the Academic Common Market waiver should write to the Academic Common Market at the Southern Regional Education Board, 592 10th Street, N.W., Atlanta, GA 30318-5790. The SREB website may be accessed at www.sreb.org/programs/acm/acmindex.asp.

Petition for Change of Residency Classification. A person who enters the State of Mississippi from another state and enters an educational institution is considered a non-resident. Any person who has attained twenty-one (21) years of age and has thereafter actually established residency and resided within the State of Mississippi for twelve (12) consecutive months after attaining twenty-one (21) years of age upon sworn affidavit and other representation, and who can prove financial independence, may petition for a change in residency classification for the purposes of fees and tuition assessment. Residency changes are not retroactive.

1. The institution may make reasonable inquiry into the validity of the petitioner’s claim.
2. Such petition for change of residency must be received prior to the first day of class of the term for which the student is applying for residency.

Factors Regarding Residency
Although domicile and residency for educational purposes are largely matters of intention, this intention is determined objectively from the facts and circumstances surrounding a claim of in-state residency. Some of the factors relevant to determining residency include:

- Actual physical residence of habitation
- Length of actual physical residence- Residence used for income tax, loan, banking and other purposes
- Voter registration
- Motor vehicle registration (Persons moving into the state on a permanent basis have thirty days to register vehicles.)
- Driver’s license held (Persons moving into the state on a permanent basis have sixty days to acquire driver’s licenses.)
- State to which personal income taxes or other taxes paid
- Status of income sources
- Location of bank, savings and other accounts

Responsibility for Reporting Change. It is the individual student’s responsibility to report immediately to the Registrar any change which will affect his or her residence status under these regulations.

D. THE COOPERATIVE EDUCATION PROGRAM

The Cooperative Education Program is a special way of going to college. Increasing numbers of students in various fields are taking advantage of the opportunity the program offers for combining practical experience with formal schooling in a five-year program of alternating semesters of study and gainful work with a cooperating employer. For the qualified student, the program can provide an expanded college education and a direct avenue to a career.

The work under this program is in, or closely related to, the student’s field of study. Upon completing at least 52 weeks of alternating work experience in the program and becoming academically eligible for graduation, a co-op student may be designated a Cooperative Education Graduate. Permanent job offers to graduates of the Cooperative Education Program often provide substantially higher starting salaries and more responsible positions than for regular four-year graduates. The co-op student is not obligated for permanent employment with his or her employer, nor is the employer obligated to hire him or her upon graduation.

A high-school graduate becomes eligible to begin a work assignment after satisfactorily completing one year at Mississippi State University; during this year he or she must establish at least a 2.50 average (on a 4.00 grading system). The student must be at least 18 years of age to begin the first work semester. Co-op credit hours may not be used to satisfy University-wide degree requirements.

A junior-college or senior-college transfer student who has at least a 2.50 overall average (on a 4.00 grading system), is eligible for participation. A student interested in the program who plans to transfer to Mississippi State University should communicate with the Cooperative Education office for application materials.

Qualified students majoring within the following colleges and schools are eligible to participate:

| College of Business and Industry
| Agriculture and Life Sciences
| School of Architecture
| College of Arts and Sciences
| School of Accountancy
| College of Education
| College of Engineering
| College of Forest Resources

The program requires a semester-to-semester rotation. Once a student has accepted employment with one of the cooperating organizations, he or she is expected to regularly rotate each semester from work—to school—to work, etc. Approximate change dates are January 1, May 15, and August 15.

Co-op students are required to pay a $25.00 registration fee for applicable work semesters. Co-op students may optionally elect to pay part-time student activity fees and a Sanderson Center usage fee during scheduled work semesters. Part-time student activity fees cover use of student facilities, participation in intramural sports, admission to intercollegiate athletic events, the student newspaper (Reflector), student health services, and other benefits. Optional activity fees are calculated at the current hourly rate times three (3) hours. Assessment of optional activity fees may be requested and paid at the cashier’s office. Co-op students are not required to purchase a yearbook (Reveille) and the yearbook fee is not included in the activity fee for part-time students. Co-op students may purchase a yearbook, pending availability, from the Reveille office. (All fees are subject to change by action of the Board of Trustees of State Institutions of Higher Learning, State of Mississippi.)

Those interested in learning more about the opportunity of participating in this program with one of the many cooperating industrial, business, or governmental organizations should write to the Director, Cooperative Education Program, Box 6046, Mississippi State, Mississippi 39762 or review the
Mississippi State University, pay Mississippi State University tuition and study abroad.

E. NATIONAL STUDENT EXCHANGE

The National Student Exchange program is a consortium of 174 colleges and universities in the United States and extends beyond the borders of the United States to include some Canadian Provinces. Mississippi State University is a member of this program.

The NSE program provides the opportunity for the eligible student to attend a college or university in another state for up to one calendar year without having to pay for the high cost of out-of-state tuition. Students register, pay tuition and fees at Mississippi State University as they usually do; they do not pay tuition and fees at the host campus, but are responsible for room and board.

Mississippi State University students who participate in the National Student Exchange program remain as degree-seeking, registered students at Mississippi State University. Any financial aid that is normally available can be applied to the exchange obligations. Because NSE is an officially approved program of the university, all courses with their respective credit hours and earned grades will be recorded on the Mississippi State University transcript and be calculated in the GPA.

For further information, contact the NSE Coordinator in the Office of Academic Affairs, 608 Allen Hall or (662) 325-3742. You may also review the web site www.nse.org.

INTERNATIONAL STUDY PROGRAMS

COOPERATIVE CENTER FOR STUDY ABROAD (CCSA)

Both undergraduate and graduate students may earn academic credit in courses identified to meet MSU degree requirements by the major department. CCSA courses in diverse disciplines are offered in English-speaking countries abroad – England, Scotland, Ireland, New Zealand, Australia, Kenya and Barbados. Consortium faculty members from the twenty-two American member institutions include outstanding MSU faculty members.

Costs of program participation vary according to location and time.

For more information: Cooperative Center for Study Abroad

Laval University Foreign Language Study Abroad

The Department of Foreign Languages offers a French language program in Quebec City, with the option of an internship in a Canadian business firm. Students will have the unique opportunity to attain fluency in French, while gaining experience in an international setting. The French language program at Laval University is specially designed for non-native French speakers. Courses are taught every morning, Monday through Friday, for a period of four hours by carefully selected native French speakers. A 3-day review session and introduction to Quebec City will precede the start of classes. Students will be awarded 7 credit hours for the language component of the program. In addition, 2-5 credit hours may be earned from MSU upon completion of a project agreed upon by the student and the director of the program. Honors credit may be arranged for this program.

For more information contact, Brent Funderburk, Box 5182, Mississippi State, MS 39762. 662-325-8926 or brent@ra.msstate.edu.

Pueblo, Mexico Foreign Language Study Abroad

The Department of Foreign Languages will offer FLS 2133 and FLS 2143 in Pueblo, Mexico. This unique opportunity helps students sharpen language skills and satisfy the foreign language requirement with six hours of credit in Spanish. Classes held each morning provide a basic review of grammar, readings at an intermediate level, and intensive oral-aural practice. Special assignments and afternoon activities with native “accompanant es” will help to involve students linguistically, socially, and culturally in their Mexican history and folklore of Mayan, Aztec, and Toltec civilizations. The opportunity to study the Spanish language in its natural setting is a unique and unforgettable experience.

For more information contact, Dr. Edmond Emplaincourt, Box FL, Mississippi State, MS 39762. 662-325-3480.

San Jose, Costa Rica Foreign Language Study Abroad

Specially recommended for Foreign Language majors, International Business double-degree majors, double majors and minors. Limited to 15 students. Participants take two upper-division courses, Advanced Spanish, and Business Spanish at the University of Costa Rica. Taught specifically for our students in the morning by faculty from UCR. Each course will carry three credit hours. In the afternoon, participants have internships in businesses selected and supervised by the Chamber of Commerce of Costa Rica. Three hours of credit in FLS will be given for a project on the internship. Total credit hours is 9.

For more information contact, Dr. Edmond Emplaincourt, Box FL, Mississippi State, MS 39762. 662-325-3480.

Bahamian Field Program
The Bahamian Field Program was developed at MSU, in cooperation with the Bahamian Field Station (BFS) on San Salvador Island, Bahamas, to present MSU undergraduate and graduate students the opportunity to do field research in a cultural and physical environment unlike that found in Mississippi. Faculty, in addition to mentoring undergraduate and graduate students, have been able to develop additional research projects of their own. The program is generally run over the winter break, after Christmas but prior to the start of the Spring semester, and occasionally between the spring semester and the start of summer school. The BFS is affiliated with MSU, which grants MSU students and faculty reductions in costs and increased access to field sites.

The field course begins with structured field trips to expose students to the environment of living and fossil reefs, caves, beaches, inland water bodies, archaeological sites, lagoons, and other sites of natural history significance. Evening lectures are given, and labs are used to analyze samples. As students gain a greater familiarity with the island’s many environments, they make decisions about doing research projects with faculty, graduate students, other students, or alone. The remainder of the time on the island is used to execute these research projects. Students are encouraged to schedule free time to enjoy both the Bahamian culture and the scenic landscapes. All students are required to keep a journal and submit it at the end of the trip.

For more information contact, John Mylroie, Box 5448, Mississippi State, MS 39762. 662-325-7294 or jmylroie@geosci.msstate.edu.

**COLLEGE OF BUSINESS AND INDUSTRY**

**International Business Academic Internship**

The International Internship is an agreement among Mississippi State University, the International Business Academic Programs’ student and a company in this area. The intern work experience builds skills in business application and provides cultural immersion while living abroad. A business resume, passport, and academic achievement are required to participate.

For details, see the Director of International Business Programs, John Lox, Box 5582, Mississippi State, MS 39762. 662-325-7005 or jlox@cobian.msstate.edu.

**Global Engineering Educational Exchange**

The Global Engineering Education Exchange is a consortium of US engineering institutions with counterpart institutions in Europe, Latin America, and Asia to provide reciprocal opportunities for undergraduate and graduate students to receive academic and practical training in each other’s countries with no net exchange of funds between participating universities. Students spend a complete term at the international institution. Courses are selected with an academic advisor to apply toward MSU engineering degrees. Students pay tuition and fees at MSU. Scholarships and other financial aid can still apply. Many institutions are available where English is the language of instruction.

For more information you may contact, Dr. Roger King, Box 9571, Mississippi State, MS 39762. 662-325-3912 or rking@ece.msstate.edu.

**III. DEGREES, REQUIREMENTS, ADVISEMENT, THE ACADEMIC PROCESS, GRADUATION**

**A. DEGREES, DEGREE REQUIREMENTS, and SCHEDULING**

1. **Baccalaureate Degrees Offered.** The University awards the following baccalaureate degrees: Bachelor of Arts (B.A.), Bachelor of Business Administration (B.B.A.), Bachelor of Fine Arts (B.F.A.), Bachelor of Science (B.S.), Bachelor of Landscape Architecture (B.L.A.), Bachelor of Music Education (B.M.Ed.), Bachelor of Architecture (B.Arch.), Bachelor of Accountancy (B.P.A.), and Bachelor of Social Work (B.S.W.) (Master’s, Specialist, and Doctor’s degrees are listed and described under Office of Graduate Studies later in this catalog, and in the Graduate Bulletin.)

2. **University-Wide Requirements.** In order to complete a baccalaureate degree, a student must (1) satisfactorily complete the curriculum requirements, (2) make an overall C average on all hours scheduled and rescheduled at all institutions attended, including Mississippi State University, (3) make a C average on all hours scheduled and rescheduled at Mississippi State University, (4) complete in residence at Mississippi State University no less than 1/4 of his/her degree program in junior and senior subjects (courses numbered 3000 through 5000) approved by the dean of the college or school in which he or she is enrolled, and (5) complete the last 32 hours of course work taken to fulfill degree requirements in residence at Mississippi State University. (Any exception to the 32 hour residence requirement must be made in writing with the Dean prior to taking course work at another institution.)

   a. **Board of Trustees Core Curriculum.** All students who enter Mississippi State University as first-time entering freshmen in the fall semester of the 1984-85 academic year, or later, must meet the common core curriculum requirements approved by the Board of Trustees, Institutions of Higher Learning of the State of Mississippi, to qualify for any bachelor’s degree. This core curriculum consists of:

   - English Composition .......................................................... 6 semester hours
   - College Algebra .......................................................................... 3 semester hours
   - Laboratory Science ...................................................................... 6 semester hours
   - Humanities and Fine Arts .................................................. 9 semester hours
   - Total: ........................................................................................... 24 semester hours

   (Note: These requirements are included in the University Core Curriculum which follows.)

   b. **University Core Curriculum.** All students graduating after January 1, 1990, in order to receive any bachelor’s degree from Mississippi State University, must earn a minimum of 45 semester hours of credit (or equivalency) in courses making up the University Core Curriculum, as follows. (Specific courses to satisfy the Core Curriculum will vary by academic major.)

   Students may obtain list from their advisor or Dean’s office of courses SELECTED from the following approved to meet individual Degree requirements.

   - English Composition .......................................................... 6 semester hours
   - Mathematics and Natural Sciences ...................................... 15 semester hours

   Refer to Core Curriculum Requirements—Numbers and Course Titles for approved choices.
## Core Curriculum Requirements—Numbers and Course Titles

**NOTE:** Students must check course descriptions of core classes for prerequisites and/or grade requirements.

### Total: 45 semester hours

- At least one upper-level (junior/senior) course in which writing is the major component. Consult an advisor in your major.
- At least one course in which use of the computer is the major component. Departments determine the course acceptable for their majors.
- Six hours must be humanities and three hours must be fine art.
- At least one upper-level (junior/senior) course in which writing is the major component. Consult an advisor in your major.
- At least one course in which use of the computer is the major component. Departments determine the course acceptable for their majors.
cure a registration permit from the Registrar's Office. Former students who have attended another college for at least one quarter or semester must provide the Registrar's Office official transcripts from all other institutions attended prior to receiving a registration permit. Provisional permits may be eligible to re-enter that institution, if they desire to return to Mississippi State University. Students who have attended another institution are required to average, they may be readmitted only on the recommendation of their dean and with the approval of the provost.

issued to former MSU students whose MSU and cumulative GPA's are 2.0 or higher.

summer sessions. A student with an overall cumulative GPA of 3.5 or higher may take one course in addition to the normal load in each of the two

The normal load for an undergraduate student in a regular semester is 15-18 credit hours. Mississippi State University has estab-

All readmission students must meet the academic standing guidelines outlined in section 4-Academic Standing. If their GPA is less than the required

5. Advisement and Registration. Every student in the University is provided with an academic advisor. A student who has selected a specific major will find the names of the advisors for that major listed under the name of the department or the major subject in the appropriate college or school section in Part III of this catalog. A student who is uncertain of his or her choice of major may register as Undeclared. In addition, advisors are assigned in the appropriate colleges for students wishing to pursue degrees in General Agriculture, General Business, General Liberal Arts, and General Science.

Before registering for any semester, each student is responsible for consulting his or her advisor to work out and secure approval for a specific schedule of courses. With the signed schedule, the student then enters his/her schedule in the computer by using the MSU-INFO system or Student/Faculty Web System, resolves conflicts, and the student is officially enrolled in each class on the perfected schedule.

A student who for any reason has been unable to register during these scheduled registration periods may still do so up to the last day for registration and adding courses as listed in the Academic Calendar, but may find the choices of courses and sections limited.

6. Readmission. Students who have previously attended Mississippi State University and who wish to re-enter must apply for readmission and secure a registration permit from the Registrar’s Office. Former students who have attended another college for at least one quarter or semester must be eligible to re-enter that institution, if they desire to return to Mississippi State University. Students who have attended another institution are required to provide the Registrar’s Office official transcripts from all other institutions attended prior to receiving a registration permit. Provisional permits may be issued to former MSU students whose MSU and cumulative GPAs are 2.0 or higher.

All readmission students must meet the academic standing guidelines outlined in section 4-Academic Standing. If their GPA is less than the required average, they may be readmitted only on the recommendation of their dean and with the approval of the provost.

Students readmitted with an MSU or cumulative average less than 1.95 will be readmitted on academic probation.

7. Student Load. The normal load for an undergraduate student in a regular semester is 15-18 credit hours. Mississippi State University has established undergraduate student course limits based on cumulative and MSU grade point averages. The limits are as follows:

(1) Students whose GPA is below a 1.95 GPA are limited to 14 semester hours including ensemble and academic support/developmental classes.
(2) Students whose GPA is between a 2.0 and 2.99 GPA are limited to 19 semester hours excluding music ensemble classes.
(3) Students between a 3.0 and 4.0 GPA may elect to take up to 24 semester hours. Students in this category must secure permission of their advisor and academic department head to schedule more than 19 semester hours.

(4) Entering freshmen and transfer students without an established GPA will be limited to 19 semester hours.

With the dean’s approval, a student with a 3.5 or higher GPA in the preceding semester may take one course in addition to the normal load during one of the summer sessions. A student with an overall cumulative GPA of 3.5 or higher may take one course in addition to the normal load in each of the two summer sessions.
Independent study or extension courses will be included in determining the maximum number of hours a student may take on campus, if registration therein overlaps any period of regular enrollment at the University. Such credits earned by either independent study or extension, in excess of the loads specified above must be approved by the student’s dean; these hours will count in certifying a student’s full time or part time enrollment status for financial aid or other purposes.

For purposes of reporting a student as full-time to the Board of Trustees, Veterans Administration, Social Security or other similar agencies, an undergraduate student must be enrolled in at least twelve (12) semester hours and a graduate student must be enrolled in at least nine (9) or more semester hours at the time the report or certification is submitted. This applies to fall and spring semesters only.

(1) A student’s enrollment status is classified according to the following chart:

<table>
<thead>
<tr>
<th>Regular Fall-Spring Semesters</th>
<th>Summer School term</th>
</tr>
</thead>
<tbody>
<tr>
<td>Undergraduate Students</td>
<td></td>
</tr>
<tr>
<td>12 sem. hrs.</td>

</tr>
<tr>
<td>or more</td>
<td></td>
</tr>
</tbody>
</table>

(2) Concurrent enrollment in independent study, off-campus centers and other institutions will be considered as part of a student’s load, and must be approved by his or her dean before it may apply toward meeting degree requirements. All MSU course hours will count in certifying a student’s full time or part time enrollment status for financial aid or other purposes.

8. College/School Changes. A student changing from one college or school to another must complete all arrangements for the transfer prior to beginning the new course of study. Before making the change the student must submit his/her request to the Office of the Registrar or the college or school in which the student is currently or was last enrolled. Transfer to a new college or school is subject to approval by the new dean.

9. Schedule Changes - Fall and Spring Semesters. A student has through the fifth class day into the semester to add a course and through the tenth class day to drop a course without being assessed a fee or academic penalty. After the tenth class day through the 30th class day, a student who elects to drop a course must receive the approval of his/her advisor, will be assigned a "W" on his/her academic record, and be assessed a $50.00 fee. After the 30th class day, a student cannot drop courses except in documented cases of serious illness, extreme hardship, or failure of the instructor to provide significant assessment of his/her performance. A request to drop a course after the 30th class period must be approved by the student's advisor and academic dean (Dean of Graduate Studies for graduate students). A student receiving permission to drop will receive a "W" on his/her academic record and be assessed a $50.00 fee after the last day to drop a course.

Summer Terms. A student has through the third class day into a 5-week summer term and through the sixth class day into a 10-week summer term to drop a course without being assessed a fee or an academic penalty. A student may not add a course after the third class day into a 5-week summer session or after the sixth class day into a 10-week summer session. After the third class day through the 14th class day in a 5-week summer term and the sixth class day through the 28th class day in a 10-week summer term, a student who elects to drop a course must receive the approval of his/her advisor, will be assigned a "W" on his/her academic record, and be assessed a $50.00 fee. After the 14th class day into a 5-week summer term and after the 28th class day into a 10-week summer term, a student cannot drop a course except in documented cases of serious illness, extreme hardship, or failure of the instructor to provide significant assessment of his/her performance. A request to drop a course during this period must be approved by the student’s advisor and academic dean (Dean of Graduate Studies for graduate students). A student receiving permission to drop will receive a "W" on his/her academic record and be assessed a $50.00 fee.

Undergraduate/Graduate Policy. Regardless of these and/or other University policies, a student’s dean may remove a course (or courses) from a student’s schedule at any time during a period of enrollment in case of special circumstances such as accident, illness or scheduling errors. Requests for such changes should be directed to the student’s dean. A student will not be permitted to drop a course after the 30th day of classes because of a heavy course load, a change of major, or the likelihood of poor grades. All requests must be documented in writing.

10. Auditing. During registration and the first ten days of class in the semester, students are not permitted to enter classes as auditors unless authorized by the Dean of the College or School and by the Registrar, upon recommendation of the instructor concerned. A student may not change from credit to audit or audit to credit status after the tenth day of class. A course being audited counts as part of the regular load on the same basis as if taken for credit. Auditors are not required to take tests and/or examinations or to prepare other written assignments. Otherwise, conformity to regular attendance expectations.

11. Pass-Fail Option. An undergraduate student who has successfully passed fifteen (15) semester hours may elect, with the approval of his or her academic dean, to schedule courses under the pass-fail option. This program is open to undergraduate students only and is limited to a maximum of four (4) courses, no more than two (2) of which may have the same course title.

A student may register under the pass-fail option for only one course per semester and must meet the prerequisites for the course or have permission of the instructor teaching it. A change from pass-fail enrollment to enrollment for a regular grade, or vice-versa, must be made by the deadline date for adding courses published in the University calendar.

Courses taken to satisfy University core requirements may not be scheduled under the pass-fail option, nor may courses that are specified by course title in the curriculum in which a student is currently enrolled. In the event that a student changes majors, credit for any courses passed and required in the new major may be allowed with the approval of the student’s dean. The instructor shall be informed which students are enrolled in his or her course under the pass-fail option, and he or she shall report a regular grade at the time progress grades are submitted and either S for satisfactory or U for unsatisfactory at the end of a term or semester. A grade of A, B, or C will be considered as satisfactory and a grade of I (incomplete) will be allowed. Other than a grade of I, only a grade of S, U, or W will be recorded on a student’s permanent record.

The number of hours passed will be applied toward the hours required for graduation; however, neither a passing nor a failing grade will be considered in the computation of the grade point average.

12. Assessment. Students may be required to undergo testing for the purpose of assessing institutional effectiveness.

13. ROTC Course Credit Toward Academic Degrees. All ROTC courses are bona fide University courses. The total number of ROTC hours allowed as elective credit toward a specific degree varies. Most schools and colleges at the University accept six (6) or more hours of ROTC courses offered toward degrees conferred. The advanced ROTC courses are options for meeting social/behavioral science core requirements. A student should contact the appropriate college, school, or department to determine allowable ROTC course credit toward a particular degree.

14. Military Credit. Mississippi State University offers credit for training and experience in the Armed Services to currently enrolled students. Those wishing to receive this credit must furnish the University Registrar’s Office with a DD214 (discharge papers), a DD295, or a Certificate of Achievement. The student’s dean will determine applicable credit toward a degree. Air Force veterans may request Community College of the Air Force transcripts by

*Enrollment status for any semester or summer term is based on the total number of hours attempted during that term. For the summer term, the enrollment status is calculated on the combined number of hours attempted during the three (3) summer terms.*
writing directly to their Registrar at CCAF/RRRA, Simler Hall, Suite 128, 130 W. Maxwell Blvd., Maxwell AFB, AL 36112-6613. The transcript should be forwarded to the Office of Admissions.

**B. ACADEMIC RECORDS**

1. Confidentiality and Disposal of Student Records

   The University recognizes that the maintenance of student information and educational records is necessary and vital to assist the student’s education and development and to provide opportunities for University research and policy formulation. The University recognizes its obligation to exercise discretion in recording and disseminating information about students to insure that their rights of privacy are maintained.

   The University will furnish annual notification to students of their right to inspect and review their educational records; the right to request amendment of educational records considered by them to be inaccurate or misleading or that violate privacy or other rights; and of their right to a hearing should the University decline to amend such records. This annual notice will be published in the University’s Bulletin. The University utilizes The Guide for Retention and Disposal of Records as published by American Association of Collegiate Registrars and Admissions Officers as the policy for disposal of student records.

   The following guidelines have been developed to insure the privacy rights of students. For the purposes of this policy statement a student is defined as an individual who has been admitted and has been in attendance in a component unit of the University. Classification as a student in one component unit of the University (e.g., an undergraduate program) does not infer that the person has been accorded the rights outlined below in other component units (i.e., graduate school, professional schools, branch campus).

2. Student Access to Records

   Students have the right to be provided a list of the type of educational records maintained by the University which are directly related to the student; the right to inspect and review the contents of these records; the right to obtain copies of these records; the right to a response from the University to reasonable requests for explanation and interpretation of these records; the right to an opportunity for a hearing to challenge the content of these records; and if any material or document in the educational record of a student includes information on more than one student, the right to inspect and review only the part of such material or document as relates to the student.

   Students do not have access to: financial records of their parents; confidential letters and statements of recommendation which were placed in the educational record prior to January 1, 1975, provided such letters or statements were solicited or designated as confidential and are not used for purposes other than those for which they were specifically intended; confidential recommendations, if the student signed a waiver of the right of access, respecting admission or employment applications, and the receipt of an honor or honorary recognition.

   Students do not have access to: instructional, supervisory, and administrative personnel records which are not accessible or revealed to any individual except a substitute; Campus Security records which are maintained apart from educational records, which are used solely for law enforcement purposes, and which are not disclosed to individuals other than law enforcement officials of the same jurisdiction; employment records except when such employment requires that the person be a student; and the Alumni Office records.

   Students do not have access to physical or mental health records created by a physician, psychiatrist, psychologist or other recognized professional acting in his or her capacity or to records created in connection with the treatment of the student under these conditions which are not disclosed to any one other than individuals providing treatment. These records may be reviewed by a physician or appropriate professional of the student’s choice.

3. Procedures for Access

   Students should contact the appropriate office to inspect and review their records. An office may require that a University official be present when a student inspects and reviews his educational records. Any questions concerning a student’s access to records should be directed to the Registrar.

4. Release of Directory Information

   Directory information may be released by the University without the student’s written consent. Directory information is identified in Academic Operating Policy and Procedure AOP 12.13 Academic Record. It also includes email addresses. Participation in recognized activities and sports, height and weight of members of athletic teams, dates of attendance, degrees and awards received, the most recent previous educational agency or institution attended, and other similar information is considered directory information.

   A student may deny the release of directory information by requesting that the information not be released. The student who is in attendance must notify the Registrar’s Office in writing to deny the release of this information. To deny the release of participation in recognized activities the student must notify the Provost and the Academic Dean in writing. To deny the release of athletic information the student must notify the Directory of Athletics in writing. To deny the release of directory information a student must give the above notification prior to registration. A former student, one who is not in attendance, must contact the appropriate offices above to deny the release of directory information.

   Student Directory Information will be made available to private businesses, religious organizations, and other non-university organizations in the following manner: (1) the Campus Directory for the current school year is available for purchase in the MSU Bookstore. While the Campus Directory is believed to be accurate (some students may have requested their names not be listed), the University is not responsible for inaccuracies in the data; (2) a list or computer labels will not be available to any non-university group; (3) appeals will be handled by a subcommittee composed of the Registrar, the Director of Admissions, and the Dean of Office of Graduate Studies.

5. Release of Educational Records

   The University will release a student’s educational record(s) upon the student’s written request. The student must:
   1. Specify the records to be disclosed.
   2. Include the purpose or purposes of the disclosure.
   3. State the party or parties and the address to whom the information is to be disclosed.

   The student shall, upon request, receive a copy of the record that is to be disclosed. It is University policy to furnish single copies of a student’s record at no charge except for the standard transcript fee, if applicable.

   The University may release students’ educational records to the following without prior written consent:
   1. University officials who have a legitimate educational interest in the records. University officials are defined as teachers, administrative personnel and other employees except personnel of the security or law enforcement unit of Mississippi State University who in the performance of their normal duties require access to student records. If University officials are required in the performance of their duties to review the educational records of a student, this will be considered to be a legitimate educational interest.
   2. Officials of another school in which the student intends to enroll upon request of the transfer school.
   3. Government representatives of the Comptroller general of the United States, the Secretary of Education, the U.S. Commissioner of Education, the Director of the National Institute of Education, the Assistant Secretary for Education, State educational authorities, and State officials to whom such information is specifically required to be reported or disclosed by State law adopted prior to November 19, 1974.
   4. Appropriate authorities in connection with financial aid with the understanding that only the necessary records will be released.
   5. Organizations conducting studies for, or on behalf of, the University or its agencies for the purpose of developing, validating, or administering predictive tests, administering student aid programs, and improving instruction and student life provided that the studies will not permit the personal iden-
tification of students and their parents by individuals other than representatives of the organization and provided that the personally identifiable information furnished will be destroyed when no longer needed for the purposes for which the study was conducted.

6. Accrediting organizations to carry out their accrediting functions.

7. Parents of a dependent student as defined in section 152 of the Internal Revenue code of 1986. University officials may release educational records to parents on the basis of written certification from the parent that the student is a dependent as defined under the Code.

8. Comply with a judicial order or lawfully issued subpoena with the understanding that the student will be notified in advance insofar as possible.

9. Appropriate parties to protect the health and safety of the student or other individuals in emergencies with the understanding that only information essential to the emergency situation will be released, that information will only be released to a party who would be in a position to deal with the emergency, and that the student will be notified insofar as possible of the information released, the purpose for the release, and to whom the information was released.

No personal information on a student will be released without a statement from the University to the party receiving the information that no third party is to have access to such information without the written consent of the student.

This policy is adopted pursuant to the Family Educational Rights and Privacy Act of 1974, as amended (20U.S.C. #8 1232g), and is not intended to impose any restrictions or grant any rights not specifically required by this Act.

6. Disciplinary Suspension and Expulsion

The following information will be recorded on a student's academic record:

1. Permanent Expulsion - a “W” grade will be recorded on the permanent record for each course on the student’s schedule at the time of expulsion. “Permanent Expulsion” and the effective date will also be placed on the permanent record. This will remain on the permanent record indefinitely or until an appeal is held by the Dean of Students and the expulsion is approved for removal. In a case of appeal and approval by the Dean of Students to remove the expulsion, the words “Permanent Expulsion” will be replaced by the word “Withdrew”.

2. Disciplinary Suspension - a “W” grade will be recorded on the permanent record for each course on the student’s schedule at the time of suspension. “Disciplinary Suspension” and the effective date will also be recorded on the permanent record. Students may petition the Dean of Students to have “Disciplinary Suspension” removed from the permanent record. If the Dean of Students approves the request, the words “Disciplinary Suspension” will be replaced by the word “Withdrew”.

3. Credits earned at another institution while on disciplinary suspension or dismissal may never be transferred or posted to the Mississippi State University record.

C. CREDITS, GRADES, and STANDING

All credits earned at Mississippi State University are in semester hours. In most curricula, taking an average load of 16-18 hours for a regular semester will enable a student to make normal progress toward graduation.

Year or quarter hours transferred from another institution are converted into semester hours for purposes of uniformity in determining graduation requirements.

Transfer credits are accepted only from institutions accredited by or in candidate status with a regional accrediting body, such as the Southern Association of Colleges and Schools.

A total of not more than 25 per cent of any curriculum may be earned by advanced standing examinations, College-Level Examination Program (CLEP), evaluated military service credits, correspondence, tutorial, extension, and USAFI courses. Evaluated military service credits are classified as extension work, and USAFI credits are classified as correspondence work.

Not more than 20 per cent of any curriculum may be earned through correspondence courses. Correspondence courses must be approved by the dean before being taken by students in residence.

1. Credit by Examination

a. Advanced Placement Examinations. Students entering Mississippi State University for the first time are allowed credit on the advanced placement examination administered by the College Entrance Examination Board. Grades of Satisfactory (S) appear on the transcript for courses in which advanced placement credit is earned. These courses do not affect grade-point averages. Applicability of such credit to a specific degree is to be determined by the appropriate dean. The following table provides the details on how credit is presently assigned in the various subject areas by the deans.

</table>
As more high schools develop Advanced Placement courses, Mississippi State University will consider their inclusion in this listing for credit. Advanced Placement credit earned by approved testing may be applied to UHP credentials if the student successfully completes an MSU honors course in the same subject matter, i.e., both credits for testing and for graded courses may apply to UHP Phases I and II. (For example: AP credit for Composition I and Honors Composition II or AP credit for Calculus I and Honors Calculus II would yield six hours for each subject area.)

### b. Advanced Standing Examinations
Applications for advanced standing examinations must be submitted to the Provost and Vice President for Academic Affairs; application forms are available in that office and must be filled out in quintuplicate. The Academic Calendar, published in the annual Catalog and the Bulletin of the summer school, will specify the final date for filing applications. The applicant must be a regularly enrolled student in residence on the campus, when he or she files the application and takes the examination.

Advanced standing examinations must be taken within two weeks from the date of approval by the Provost and Vice President for Academic Affairs and the grade card (signed by the instructor who graded the examination, the head of the department, and the student’s dean), fee slip, a copy of the examination questions, and the examination paper must likewise be filed in the office of the Provost and Vice President for Academic Affairs within the same two-week period; otherwise, the student’s application becomes null and void.

After an application is approved, the instructor whose name appears on the application form, and the student, will be notified. It is the responsibility of the student to make arrangements with the instructor as to the time and place of the examination. The student must appear for the examination on the date agreed upon.

Grades of C or better are passing grades and will be recorded on the student’s permanent record. No student is permitted to take more than one advanced standing examination during any semester or summer term, and only fifteen hours of credit so earned will count toward graduation.

Credits earned through an advanced standing examination in any course considered prerequisite for an advanced course will be applied toward graduation hours and the grade-point average only if the examination is passed before the advanced class has been completed. Under no circumstances will any credit earned by advanced standing examinations count toward graduation if the student already has credit for the course or its equivalent on his or her high school record.

### c. College-Level Examination Program (CLEP)
A total of not more than 25 per cent of any curriculum may be earned by advanced standing examinations, College-Level Examination Program (CLEP), evaluated military service credits, correspondence, tutorial, extension, and USAFI courses. Evaluated military service credits are classified as extension work, and USAFI credits are classified as correspondence work. Mississippi State University serves as an open testing center for both the General and Subject Examinations. Academic credit on the Subject Examinations is awarded to students who are enrolled at the University and who make a scaled score of 50 or above. Credit is neither awarded nor accepted for transfer credit for the General Examinations. Credit is considered the same as extension credit and is subject to the same limitations. The applicability of credit toward degree requirements is determined by the dean and/or department head concerned. At present, the only courses for which credit may be obtained through the CLEP Program are those:

MISSISSIPPI STATE UNIVERSITY

For further information about CLEP and a form for application to take the tests, please write to: Computer Based Testing, P.O. Box 9747, Mississippi State, MS 39762, or call 662 325-6610.

2. Course Evaluation

a. Each course will have a syllabus describing the general content and objectives of the course, the method to be used for the final course evaluation and assignment of grades. The syllabus should be presented to students during the first week of classes.

b. Dead days are defined as the last three class days immediately preceding the first day of the official university examination period as established by the university calendar. During the period of designated dead days the following regulations shall apply:

1. No tests of any form may be given. This regulation includes unannounced or “pop” quizzes.

2. No term papers, presentations, projects, or other out-of-class assignments may fall due during the dead days or thereafter. Any exceptions to this must be noted in the course syllabus with students being informed of such at the beginning of the semester and given an opportunity to complete such prior to the dead days. In addition, routine or daily assignments that are part of a normal class operation may be made as long as these have been noted in the syllabus and students informed at the beginning of the semester.

3. Grades and Quality Points

The class work of the student will be rated according to the following pattern of values:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
<th>Per Credit Hour</th>
</tr>
</thead>
<tbody>
<tr>
<td>A Excellent</td>
<td>4</td>
<td></td>
</tr>
<tr>
<td>B Good</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>C Satisfactory</td>
<td>2</td>
<td></td>
</tr>
<tr>
<td>D Poor</td>
<td>1</td>
<td></td>
</tr>
<tr>
<td>F Failure</td>
<td>0</td>
<td></td>
</tr>
<tr>
<td>I Incomplete</td>
<td>0</td>
<td></td>
</tr>
<tr>
<td>S Satisfactory</td>
<td>2</td>
<td></td>
</tr>
<tr>
<td>U Unsatisfactory</td>
<td>0</td>
<td></td>
</tr>
<tr>
<td>W Withdrawn Without Penalty</td>
<td>-</td>
<td></td>
</tr>
</tbody>
</table>

The quality-point average shall be determined on the basis of semester hours scheduled and rescheduled in which grades of A, B, C, D, and F are recorded. However, a student may not earn credits or quality points for a course or its equivalent in which he or she has already earned a grade of A or B.

A grade of I (incomplete) may be submitted in lieu of a final grade when the student, because of illness, death in his or her immediate family, or similar circumstances beyond his or her control, is unable to complete the course requirements or to take final examinations. A grade of I will not be submitted for reasons other than previously described. Except for circumstances noted above, an I grade will not be given to extend the semester so that a student may complete a required assignment(s).

Undergraduate students who receive an I grade must complete all work within thirty (30) calendar days from the date of the student’s next enrollment. A student who receives an I grade may make up only that part of course work not completed because of an emergency. If a grade of I is not resolved into a passing grade within the allotted time, the grade becomes an F.

Graduate students who receive a grade of I must complete all work no later than the last day of class of the next semester (excluding summer) whether the student is enrolled or not. Failure of graduate students to remove an I grade during the specified time will result in an automatic grade of “F.”

Once a grade of I has been converted to an “F” because of the student’s failure to complete necessary course work or a lapse of the allowable time, no additional grade change will be allowed except under extreme circumstance(s) as recommended by the deans and approved by the Vice President for Academic Affairs. In the case of students receiving VA benefits, all courses scheduled will appear on the permanent record and a final grade will be recorded for each course. If the student withdraws from school and/or drops a course, the last date of attendance will be recorded.

4. Academic Standing

a. Minimum standards of scholarship are prescribed by the University for determining whether a student is to be continued or discontinued. This determination is made at the end of the fall and spring semesters, at the end of the summer session, or any part of a semester in which the student has been enrolled. While the academic standing of a student is determined by the MSU Cumulative Grade Point Average (GPA), students must earn a 2.0 GPA on both the MSU and overall cumulative GPA’s to earn a degree.

1. Students whose cumulative MSU GPA falls between 1.95 and 1.99 at the end of any term will enter the following term on academic alert. Students whose cumulative MSU GPA is less than 1.95 at the end of any term will enter the next term on academic probation and will remain on probation until the GPA reaches 1.95 or higher. The course load for students on probation is restricted to 13 hours.

In addition to meeting with their faculty advisor, it is recommended that probationary students visit The Learning Center for evaluation and/or additional academic assistance.

2. Students with a semester GPA of less than 2.0 who have been enrolled at MSU for at least two terms who fail to meet the following minimum MSU Cumulative GPA’s will be suspended.

<table>
<thead>
<tr>
<th>Classification</th>
<th>MSU Cumulative GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Seniors</td>
<td>1.9</td>
</tr>
<tr>
<td>Juniors</td>
<td>2.1</td>
</tr>
<tr>
<td>Sophomores</td>
<td>2.3</td>
</tr>
<tr>
<td>Freshmen</td>
<td>1.0</td>
</tr>
</tbody>
</table>

   No student will be suspended for failing to achieve the required grade point average without first having had at least one semester of probationary notice (not necessarily the immediate preceding semester).

   Academic suspension shall be for at least one regular (fall or spring) semester. The student will be readmitted on academic probation following the expiration of the first suspension. A student who attends another university during a suspension from MSU must have maintained a 2.0 GPA (calculated by MSU standards) on all transfer work since leaving MSU. Students who fail to meet these criteria may be readmitted only on the recommendation of their dean and with the approval of the Provost. A student may continue in school during the second term of summer session, irrespective of his or her record during the first term. For this determination a student who officially withdraws from the University in such a manner that the grade point average is unchanged has not completed the semester.

3. A student who has one academic suspension and who does not earn a current semester GPA of 2.0 or higher and has less than the required MSU Cumulative GPA will be placed on academic dismissal. A student who becomes an academic dismissal is not automatically or routinely readmitted. The Vice President for Academic Affairs may approve the readmission of a student on academic dismissal upon the recommendation of the student’s academic dean based on a written petition by the student. Readmission will not normally be granted until the student has been absent from the University for one calendar year. Application for readmission should be made with the student’s dean no later than fifteen days prior to final registration.
4. Appeal for waiver of suspension or dismissal because of unusual circumstances should be made through the student’s academic dean, with final approval by the Vice President for Academic Affairs.

b. Veterans’ Academic Status. The following regulations, in addition to those above, apply to all students receiving U.S. Dept. Veterans Affairs benefits:

1. A student must maintain an acceptable cumulative GPA to be in good standing. If the cumulative average falls below the acceptable level, the student will be placed on “first probation.” During the probation semester, the student must improve his cumulative GPA or benefits will be suspended at the end of the semester. However, if the cumulative GPA improves but, an acceptable level is still not achieved a “second probation” semester will be allowed. Should the standards of progress not be achieved at the end of the second probation semester, benefits will be suspended and students will not receive further benefits until approved by the VA.

**ACCEPTABLE STANDARDS of PROGRESS**

<table>
<thead>
<tr>
<th>Semester</th>
<th>Cumulative GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>1.00</td>
</tr>
<tr>
<td>2</td>
<td>1.50</td>
</tr>
<tr>
<td>3</td>
<td>1.75</td>
</tr>
<tr>
<td>4</td>
<td>2.00</td>
</tr>
</tbody>
</table>

A student must maintain at least a 2.00 cumulative GPA after the fourth semester or he/she will be placed on first probation and follow the order of procedure as outlined above.

2. Based on VA rules and regulations, students receiving VA educational benefits will receive benefits for courses that apply toward a degree program only. **NOTE:** Any change in student status, such as drops/adds, major changes or withdrawals from the University, must be reported to the VA Supervisor located in the Registrar’s Office.

c. Academic Amnesty. Students who have not been enrolled in any post-secondary institution for five years may apply for admission or readmission under the academic amnesty policy through their academic dean’s offices. Academic Amnesty may be applied to a student’s record only once. Students admitted under this policy must complete current curriculum requirements in residence to earn a degree. (AOP 12.19 applies.)

d. Academic Fresh Start. Students who have not been enrolled in any post-secondary institution at any time for at least 24 consecutive months may petition for admission or readmission through their academic dean’s offices under the academic fresh-start policy. All college credits earned prior to being granted academic fresh start will be eliminated from the computation of the student’s grade point average and may never be used toward graduation at Mississippi State University. (AOP 12.17 applies.)

**D. CLASS ATTENDANCE**

Upon registration the student accepts the responsibility of attending all classes and doing any work the instructor may prescribe. When absence from class is essential, it is the responsibility of the student to make arrangements satisfactory to the instructor with regard to work missed. These arrangements should be made prior to the absence when possible.

Instructors shall record and report the absences of all students on both the midterm (where applicable) and final grade reports submitted to the Registrar. The same procedure will be followed by the instructor when at any time, in the opinion of the instructor, the student is not making satisfactory progress. The absences and last dates of attendance (where applicable) will become a part of the student’s file in the Registrar’s Office. Instructors may report absences to the Division of Student Affairs at any time they feel it appropriate to do so and are expected to report students with continued, consecutive absences.

**E. WITHDRAWAL**

Any student leaving the University prior to the end of the period of enrollment, except for temporary absences, should initiate withdrawal procedures at his/her Academic Dean’s office. By completing this procedure, the student may prevent future difficulties in obtaining transcripts, or in reentering the University, and will avoid having F’s automatically recorded for all courses taken during the semester.

A student who withdraws after the 10th day of classes will receive a grade of W for each course scheduled. No withdrawals will be allowed during the last two weeks before the beginning of final examinations for the fall and spring semesters, and during the last week prior to the beginning of examinations for each five week/ten week summer term.

The withdrawal of any student shall not be effective on a date prior to the last day of class attendance.

In highly unusual circumstances resulting from extreme hardship, a student may petition to withdraw retroactively from a semester within one calendar year. The request for withdrawal will be considered only when accompanied by appropriate documentation of the situation (e.g. medical emergency or administrative error) which was related to the student’s recorded academic performance for the semester in question. Such requests must be approved by the student’s advisor, department head, dean, and the Provost. For cases other than administrative error in which final grades were recorded, the student’s instructors should be consulted before a final decision is rendered and should be notified after the decision is made. In no case will more than one semester’s work be retroactively withdrawn during a student’s matriculation at Mississippi State University.

**F. CLASSIFICATION OF STUDENTS**

Students are classified according to the total hours earned:

- Freshman: 29 or fewer semester hours
- Sophomore: 30-59 semester hours
- Junior: 60-89 semester hours
- Senior: 90 or more semester hours

**G. UNIVERSITY HONORS PROGRAM**

The University Honors program is a challenging variation of the standard curriculum, through which many undergraduate students throughout the University enrich their academic experiences. For many courses, both required and elective, Honors sections have been established. These are limited enrollment sections taught by selected senior faculty members. There are Honors courses and seminars in addition to these sections of regular courses. To enroll in Honors courses, one must have been admitted to the program. Requirements for joining the program and a full explanation of its phases and offerings are explained below.

Students who complete Phase I and/or Phase II of the University Honors Program are identified as participants in the Program, and their achievement is noted in all official University records.

The Honors Program exists primarily to offer outstanding academic experiences to highly qualified students. Courses applicable to every degree program are available through the UHP; and Honors students benefit from priority scheduling in pre-registration. The Honors sections differ from regular sections because the smaller classes--five to fifteen students--focus on individualized instruction that emphasizes each student’s training and experience. The most outstanding members of the faculty teach Honors courses; therefore, UHP sections are more challenging and interesting than the regular sections for which they substitute. Many students find the courses appealing because they are guided to inquire beyond what they have studied previously. Freshmen and sophomores take courses applicable to basic curriculum requirements for all majors; juniors and seniors take seminars and advanced courses. Seniors may intern in a governmental or research agency in Washington or Jackson, or conduct research and write an Honors thesis. (Consult the index for Honors courses.)
The University Honors Program is a university-wide program that reports to the Provost. It equally serves all eight colleges/schools and cooperates with all academic departments in tailoring programs for talented students. Credits offered through the Honors Program support the unique Honors design sequence in the School of Architecture, the programs for Schilling, Hearin-Hess, Stennis, Truman, and Rhodes preparatory scholars; the Early Admissions Programs of the College of Vet Medicine; and the President’s Scholars Programs in the Departments of Nuclear and Mechanical Engineering. Individual departmental courses in five colleges offer field trips and exchanges with other regional, national, and international institutions. Advanced students frequently conduct independent research and special projects in their major fields for Honors credit. Recent notable curricular additions are a guide to honors options in Biomedical-Engineering, the College of Engineering Entrepreneurial Seminar, and study abroad programs in technical fields.

The UHP provides experiential study programs under the auspices of the University. The program supports several study-travel programs in Europe, the Far East, Canada, and the Caribbean, as well the Honors Semester Program under the auspices of the National Collegiate Honors Council. The Honors Program also offers diverse study opportunities in England, Scotland, Ireland, New Zealand, Barbados, Kenya, and Australia through its membership in the Cooperative Center for Study Abroad.

The University Honors Program has an important role in the cultural and social lives of hundreds of students and faculty members. The Honors Forum and co-sponsored programs with every college and with the Cultural Diversity Center, the President’s Commission on the Status of Women, the Stennis Institute, the Women’s Study Program, the Black Student Association, the Institute for the Humanities, the Architecture lecture series, the Presidential Forum, the Mock United Nations, the Lectern Series, and the Center for International Security and Strategic Studies offer Honors students unique opportunities. Only a few examples of former participants are Hartmut Michel, 1988 Nobel Laureate in Chemistry; Harvey Hart, Architect; Dr. Christian Barnard; playwright Beth Henley; writers Alex Haley and Ellen Gilchrist; historians William McFeely; Edwin R. Newman, journalist; Shirley Chishom; Board Chairman of Arthur Anderson; Von Graham; Editor of Inostroznaya Literature, Nicolai Anastasiev; Bauco van der Wal, director of the Anne Frank Center in Amsterdam; Takashi Miyazaki, Consul General of Japan; Gunther Van Well, Ambassador of West Germany; Emmanuel de Margerie, Ambassador of France, Rita Kimova, Ambassador of Czech-Slovak Republic, and many government officials including former U.S. Ambassadors Robert Pugh, the late Senator John C. Stennis, former Senator Amy Tuck, and former State Representative Scott Ross (UHP alumnus). The UHP also has co-sponsored presentations and symposia on W. B. Yeats, Eudora Welty, William Faulkner, Haley’s Comet (American Astroligical Society), Caribbean ecology, Emily Dickinson, and Gabriel Garcia Marquez, exhibitions of agrarian art and the works of William Dunlap, Walter Anderson, Marrie Hull, and Maude Gatewood, and performances by notables such as Sarah Johnson, violinist; John Paul, harpsichordist; the Vienna Chamber Trio, Ballet Mississippi, the Alvin Ailey Dance Company, the National Shakespeare Company, and Malagro Vargas.

Students’ achievements in every realm of university life confirm an advocacy that study and personal development are complementary in the under-graduate experience. UHP students hold leadership roles in the Student Association, Housing and Residence Life, the Greek system, the bands, and every major honorary society, including Phi Kappa Phi, The Society of Scholars, Whos Who, Mortar Board, Golden Key, Cardinal Key, Omicron Delta Kappa, and college organizations. In recent years, the editors of The Reflector and The Revisor have been UHP students. The slate of elected officers of the Student Association has been dominated by UHP leaders in the past five years.

Students are central to the Honors Program. They elect representatives to the Honors Council, which advises the Director and plans activities of the program. The UHP has earned national recognition for its participation in regional and national meetings of the National Collegiate Honors Council, to which students have traveled with expenses paid to such cities as New Orleans, Chicago, and Miami. The Council supervises the Honors House, where all Honors students have access to electric typewriters, a xerox machine, and a video system. The 1989 facility also provides a separate Council office, a browsing library, and a seminar room. The students form intramural teams and organize social activities such as film showings, dances, and picnics. At the end of each academic year, outstanding students are honored at an awards ceremony.

Outstanding faculty contribute significantly to students’ opportunities to learn from teaching and research that have yielded numerous awards for that faculty. The Giles Distinguished Professors serve as the faculty advisory group for the program; winners of the John Grisham Master Teacher Awards, the Burlington Northern Teaching Awards, and the MSU Alumni Association Awards routinely teach lower division honors classes and serve as mentors for students; conducting independent research. Students conduct separate evaluations of all honors courses and make the results available to all students selecting honors courses; students also select outstanding UHP faculty members for recognition each year.

Entering freshman have the opportunity to apply to live in Hull Hall, the only co-residential facility that houses both freshmen and upper division students who are qualified for admission to the University Honors Program. The Office of Housing and Residence Life makes assignments on the basis of first come, first served applications. Residents have access to both academic and co-curricular programming intended to offer the most productive orientation to a total university experience.

To apply for theHonors Program, an entering freshman should have a minimum composite ACT of 26 and/or an outstanding academic record of grades and rank in class. The UHP offers detailed information on admission requirements to more than twenty courses each semester stressing the importance of individual advising and access for all interested students at any class level. A transfer student should have a 3.40 QPA on at least fifteen hours of course work. Transferred Honors credits may be applied to UHP certifications. Anyone who enters the Program must maintain a 3.40 average, but an individual may enroll in a single course or selected courses, pursue certification in Phase I or Phase II or both, and earn recognition as a “University Honors Scholar”. Inquiries regarding the UHP should be directed to:

Director, University Honors Program
P.O. Box EH/FAX 662-325-0086
E-Mail: Director, jwhite@honors.msstate.edu
Admission, bgardner@honors.msstate.edu
Mississippi State, Mississippi 39762

Application to the Honors Program may be made online at www.msstate.edu/dept/uhp. The regularly offered Honors courses are listed on pages 424-425, however, the diversity of the program is reflected in topics of advanced departmental courses and UHP seminars. Some of the recent topics include:

- Alternate Energy Sources
- Interdisciplinary Seminar on the 1920's
- Endangered Species: Ecosystems, Aesthetics, Economics
- The Soviet Mind in Film and Literature
- Science and Pseudoscience
- Scientific, Social, and Ethical Impact of Biochemical Research
- Utopias, Dystopias, and Contemporary America
- Vietnam and American Politics and Literature
- Words in Collision
- The U.S.S.R.
- Cell Biology
- Ascent of Man
- Land and Society
- Art, Architecture, Music
- Agrarian Film
- French Civilization
- Australian Film and Literature'
- Literature of Imperialism
- Mythology
- Physical Geography
- Literature of the Caribbean

After qualifying for a Freshman Academic Scholarship and gaining admission to the Honors Program, an entering freshman may compete for one of fifty Honors Program Scholarships. The Honors Program Scholarship is one of the few awards that can be added to a Freshman Academic Scholarship. Recipients receive widespread recognition and play a dynamic role in the UHP. The Stewart Bridgford Honors Scholarships are awarded to students accepted for admission to the University Honors Program who have earned the status of National Merit Scholar. All scholarship inquiries and applications must be directed to the Office of Student Financial Aid and Scholarships.
H. RECOGNITION OF ACADEMIC ACHIEVEMENT

Recognition for outstanding academic achievement is accorded to full-time students each regular semester (does not apply to students in College of Veterinary Medicine). For these purposes, a student must complete at least twelve (12) semester hours of course work toward graduation, with no incomplete grades nor grades lower than C. The levels of recognition are as follows:

- **President's Scholars.** Students who achieve a 3.80 average or above.
- **Dean's Scholars.** Students who achieve a 3.5 to a 3.79 average.

I. GRADUATION and COMMENCEMENT

1. **Commencement.** Candidates should submit formal application for degrees during registration for the period of enrollment in which they expect to complete their degree requirements, but not later than the last day to apply, as published in the Academic Calendar. Candidates will not be allowed to participate in the commencement ceremony until requirements have been met for a degree. Payment of debts to the University is a requirement for the granting of degrees and awarding of diplomas. All University holds must be cleared before a student can graduate.

2. **Graduation with Honors.** Students completing the requirements for baccalaureate degrees with exceptional scholastic averages and with a minimum of one-half the total hours required for their degrees at Mississippi State University may be graduated with honors. The levels of recognition will be recorded on the students' diplomas and permanent records.

   In determining eligibility for recognition, the grade point average will be figured on the basis of all hours attempted. If a student's last period of enrollment raises his or her average to the level required for honors, or to a higher level of honors, this notation will be made on the diploma and transcript.

   The hours may include, not only residence credit, but also correspondence and extension credit to the extent permitted by the University regulations for graduation.

   Transfer students must achieve the specified grade point average in two senses: (1) on all hours attempted at all institutions attended and (2) on all hours attempted at Mississippi State University. The level of attainment will be determined by either the overall average or the Mississippi State University average, whichever is lower. The grade-point values currently in use at Mississippi State University will be used to calculate the quality-point average on all transfer credits.

   The levels of recognition and the grade point averages required for each are as follows: **Summa Cum Laude—3.80,** **Magna Cum Laude—3.60,** and **Cum Laude—3.40.**

IV. STUDENT HOUSING

A. GENERAL INFORMATION

A student desiring a definite room reservation for the fall semester must submit a completed housing application and a nonrefundable $50 application fee to the Department of Housing and Residence Life. Reservations must be made in the full name of the student as it appears on the application for admission or readmission. A nine-month housing contract must be signed and returned to the Department of Housing and Residence Life once an assignment is offered and accepted.

Priority is given to students retaining their assigned room and paying required fees. Students wishing to request one another as roommates should submit applications at the same time to the Department of Housing and Residence Life or together in the same envelope by mail. Both students wishing to room together MUST request each other in writing. Mutual requests received by April 1 have priority.

MSU students cannot cancel their housing contract and room assignment after the residence halls officially open each semester. The residence hall contract is for both semesters (nine months) if the student is enrolled in school. The residence halls open several days before the first day of classes.

Requests for private rooms will be accepted and honored as space for assignments is available. First priority will be given to double occupancy assignments. The rate for a private assignment will be higher than for a double room. Check with the Department of Housing and Residence Life for rates.

All room changes must be approved by the residence director. A student who makes an unauthorized change must pay a $25 penalty and move back to the assigned space. The assigned occupants are financially responsible for all property in the room, including doors and windows.

The University reserves the right to inspect rooms and to move any student to another assignment for reasons of space management or for the maintenance of order. At the beginning of each school term, students without roommates may choose one of three options: 1) move together voluntarily with another student who is without a roommate; 2) be reassigned with another student who is without a roommate; or 3) pay the private room rate if private rooms are an option. Whatever the option chosen, the student must coordinate his/her actions with his/her residence director.

The Residence Hall Fee covers any University holiday which occurs as a one-day extension of a normal weekend (i.e., an all-day suspension of classes on a Monday or a Friday); the fee does not cover a holiday of longer duration (i.e., Winter and Mid-semester – “Spring Break”). The University closes all residence halls during holiday periods. Students may check into Herbert Hall for $10.00 per night during holidays and break periods if space is available.

B. HOUSING APPLICATION PROCESS

Freshman and transfer students may submit housing applications after August 1, 2002 for the 2003-2004 academic year. Assignment of transfer students and currently enrolled off-campus students will not be made until after assignment of returning residence hall students has been completed at the end of spring semester, and into summer, as space is available. Freshman and transfer students will receive their assignments after summer orientation.

Please contact the Department of Housing and Residence Life for more information: Box 9502, Mississippi State, MS 39762; Phone: (662) 325-3555, 325-HOME (4663); Fax: (662) 325-4667; Email: housing@affairs.msstate.edu; Website: www.msstate.edu/dept/housing.

C. FACILITIES

All single student residence halls are air-conditioned. All halls have card-access security systems. The following are provided in all single student rooms: closet or wardrobe space, beds, desks, chairs, microwave/refrigerator/freezer, telephone line, (with voice mail and caller ID), ethernet port, and super basic cable TV. There is no additional charge for utilities.

All single student apartments are air-conditioned and include stove; refrigerator; dining room, living room, and bedroom furniture; telephone line (with voice mail and caller ID), ethernet port, and super basic cable TV. There is no additional charge for utilities. University Drive apartments are not ethernet connected.

D. FRESHMAN STUDENTS

Freshman students are housed in separate residence halls, where specially designed programs are carried out during the year under the direction of student leaders and hall staff. All students are housed in double rooms. Approximately 1500 spaces are available. If all spaces in the freshman halls are filled, freshmen will be assigned to upperclass halls.
E. UPPERCLASS AND GRADUATE STUDENTS

Approximately 2000 spaces are available in traditional residence halls, and 139 spaces are available in 3-person apartments. Arbour Acres is an all private room complex. Rent for Arbour Acres and University Drive Apartments is paid monthly and includes the December break and spring break at no additional charge. Additionally, a limited number of 1-bedroom apartments are available for graduate students.

F. FACILITIES FOR STUDENTS WITH FAMILIES

Aiken Village is for married couples living together, single parents with children living with them, and families. One adult in each unit must be enrolled as a full-time student. The complex is located approximately one mile from the center of the campus, is made up of 59 one-bedroom units, 207 two-bedroom units, and an office-laundry-pre-school building. Each unit is equipped with stove, water heater, forced-air furnace, electric refrigerator, ceramic tile bath and tub-shower; local telephone service, super basic cable TV, a 220 volt outlet in the living room (also in larger bedroom of the two-bedroom units) for air conditioner; individual meters for gas and electricity. Apartments have at least one air conditioner. Window units up to 30K can be accommodated. A second unit must be installed by University personnel. (Suggested sizes: For one-bedroom-not less than 10,000 BTU, 220 V; for two-bedroom-not less than 14,000 BTU, 220V.)

Once a couple or family is assigned to an apartment, a $200 deposit is due. Mail is delivered six days per week by the Starkville Post Office. Address all communications for information to the Department of Housing and Residence Life, Box 9502, Ms State, Mississippi 39762.

V. SERVICES

A. LIBRARIES

The Mississippi State University Library System is composed of the Main Library (Mitchell Memorial Library) and its library branches which include Architecture, the College of Veterinary Medicine, the Jackson Center Library and the Meridian Campus.

The University Libraries include a collection of over 1,994,239 volumes and over 16,036 journal/serial titles, including 1,412 electronic subscriptions. The Libraries regularly receive many of the publications of leading universities and scholarly societies. An approval plan in support of teaching and research greatly strengthens the collection. The Library, already a 95% Government Documents Depository, is also a United Nations Depository.

The Libraries have significantly increased electronic access to bibliographic and full text information held locally as well as at remote sites. Through Galaxy and/or the Libraries’ webpage, patrons have access to a wide variety of over 148 databases, many of which provide full-text articles from journals not owned by the Libraries. The Access Services Electronic Reserves program further supports teaching and research. Membership in a number of consortiums within the state and region extends the collection. These memberships include RUDZU, a consortium of fourteen (14) Association of Southeastern Research Libraries.

 Expedited electronic document delivery services in support of research materials and journal articles not available in the Libraries’ immediate collections are obtained via Infotrieve in support of graduate students, researchers and faculty. Initial work in partnership with the University’s Engineering Research Center, has begun toward the development of the University’s Geospatial Digital Library.

The resources of the Special Collections Department include materials of research value on the local, state, regional and national levels. Among the valuable documentation in the Archives of the University are papers of the university’s presidents and other officers, college, division and departmental records, faculty papers, records of committees and university related organizations. The Manuscripts Division includes many significant collections, especially in the areas of journalism, civil rights, agricultural, and political history. Among the most important are the Turner Caldey Papers, Holding and Betty Werlein Carter Papers, Mississippi Republican Party Papers, and the Delta and Pine Land Papers. The Mississippiana Collection contains significant works about Mississippi and by Mississippi authors and a large rare book collection. The Congressional and Political Research Center houses the papers of Senator John C. Stennis, Congessmen G. V. “Sonny” Montgomery, David Bowen, Charles Griffin, Mike Epsy, and Chip Pickering as well as papers of Wiley Carter and Wayne Weidie, aides to Senator Thad Cochran and Representative Gene Taylor respectively. The Center is working with the Stennis Institute of Government and the Stennis Center for Public Policy to produce newsletters, seminars and other programs to promote research and interest in all levels of government. Other notable papers within the department include those of Norma Fields, Eugene Butler, Norman Bradley, Bill Monor, Sid Salter, Mark Bolton and John Grisham.

The Templeton Music Collection, a unique collection of ragtime, blues, show tunes and war song sheet music is highly recognized and used by musicians, scholars and researchers throughout the region and nation. Digitized portions of this collection are available on the web.

The Library computer lab contains approximately eighty-five Pentium IV 1.6 gigahertz PC’s with 17-inch color monitors, and five G4 Mac computers. Students who want to use the sound capabilities of the Web may plug their own headphones into headphone jacks on the PC’s and Macs. The lab also offers two laser printers and a color laser printer. As the University’s newest and largest computer lab, the Computer Commons is open until 2:00 a.m., Sunday through Thursday and closes at 8:00 p.m. On Friday and Saturday.

The Instructional Materials/Media Center (IMC) provides an environment for educational technology activities and a learning center to utilize techniques related to digital multimedia. The staff provides assistance in identifying, digitizing, and organizing content materials including resources from the Libraries’ collections for use in web page design or presentation. IMC houses eight computers with CD-ROM players, four computers with flatbed scanners that can be used for scanning documents, pictures, photographs, etc., two typewriters, five TV/VCR stations for students to listen to music as required for various courses. Two of these stations also have record players. Music composition stations consist of electronic keyboard/s attached to Macintosh computers. The IMC also provides small listening areas with TVs and VCRs for groups to view videos for classes.

The Libraries, a charter member of the Southern Library Network (SOLINET), hold memberships in the American Library Association, Association of College and Research Libraries, the Networked Digital Library of Theses and Dissertations (NDLTD), EDUCAUSE, EPSCORESIG libraries, CNI and CLR, and was a founding member of SPARC. The Libraries are one of five supporting regional libraries within the National Agricultural Library Aquaculture Library Network, established to link the research and extension activities of the Regional Research Centers with the Network. The Main Library plays a major role in Mississippi’s statewide consortium MAGNOLIA (Mississippi Alliance for Gaining New Opportunities through Library Information).

B. BOOKS and SUPPLIES

The MSU Bookstore is operated on behalf of the University by Follett College Stores Corporation. The store’s primary function is to provide students, faculty and staff with textbooks, reference and trade books, and related supplies.

The newly remodeled Bookstore is located on the ground floor of the Student Union Building. It stocks all course required texts and supplies, carries a complete stock of school supplies and a selection of paperback books and insignia items. In addition, Apple and IBM computers, related hardware, and software packages are available at substantial educational discounts.

During the academic year, the Bookstore is open Monday through Friday from 8:00 a.m. to 6:00 p.m. Reduced hours are observed during the summer months and between academic semesters. The Bookstore extends its hours of operation concurrent with campus activities such as home football games.

C. UNIVERSITY DINING SERVICES

The University operates a variety of campus dining facilities which provide the student with a wide range of menu choices, atmospheres, and prices. The campus community may choose from the newly remodeled Perry Cafeteria, the Union Food Court, the Pegasus Dining Room in the Wise Center, the State Fountain, Gooch’s, McArthur Court in McArthur Hall, and Food for Thought in Mitchell Library, as well as a full service Catering Department.
D. JOHN C. LONGEST STUDENT HEALTH CENTER

The Longest Student Health Center is designed to provide comprehensive, accessible, high-quality and economic healthcare to students during college years. The Center is open during regular school sessions to all Mississippi State University students who pay the student health fee.

The Center is staffed with qualified family practice physicians and registered nurses to provide primary medical care for students. Ancillary services include pharmacy, laboratory, x-ray, and physical therapy. Other services offered include nutrition counseling and health education. The health fee covers the physician's professional charge for an unlimited number of clinic visits. Ancillary services are provided on a fee-for-service basis. Ambulance service is available through Oktibbeha County Hospital.

Those who need more specialized care than the Center can provide will be referred to the appropriate resource.

Clinic hours: 8:00 a.m. - 5:00 p.m., Monday - Friday. The Center is closed on Saturday and Sunday and during regularly scheduled student holidays.

Health records are to be sent directly to the Longest Student Health Center, where they are kept confidential. Health records are not part of the school records and will be kept indefinitely for future reference.

The Student Health Center does accept insurance assignments from health insurance companies recognizing the Center as an authorized provider of health care. Medicare does not recognize the Center as an authorized provider and will pay only to the patient or physician. A Student Accident and Sickness Insurance Plan has been developed specifically for Mississippi State University students and is intended as a supplement to the care provided by the Student Health Center. Sponsored by the Student Association, it is a voluntary plan for students and their dependents.

Information on student health services and student health insurance is available by writing to Director, John C. Longest Student Health Center, P. O. Box 6338, Mississippi State, MS 35762; telephoning (662) 325-2431; or emailing health@stafairs.msstate.edu. Visit our Web page at: http://msstate.edu/dept/health/

E. INTERNATIONAL SERVICES OFFICE

The International Services Office (ISO), a unit of the Division of Student Affairs, is charged with the responsibility of immigration matters as they relate to students and exchange visitors. This includes advising and providing information to students, research scholars, visiting professors, and MSU faculty and administrators about rules and regulations of the Immigration and Naturalization Service (INS), maintenance of lawful status, work authorization, and other matters which affect the international community at Mississippi State University.

The Department of State's Exchange Visitor Program is administered in this office, providing DS 2019 documents for qualified J-1 visitors. Through liaison with community organizations and businesses, cultural experiences for international participants are facilitated and encouraged. Semia nnual orientation programs for new students are conducted by the ISO. An ISO-administered electronic mail bulletin provides current information regarding immigration regulations, university deadlines, campus and community activities, issues of importance on a national or international scale which affect some or all of MSU's international community, opportunities for employment, and other matters of interest to the subscribers. The ISO is located in the Callejas International Center at 15 Morgan Avenue.
F. THE COUNSELING CENTER

The Counseling Center, located in the YMCA Building, offers a variety of services free to all full-time students, Monday through Friday, from 8:00 a.m. to 5:00 p.m. Appointments may be made in person or by calling 325-2091. The center also provides walk-in services for urgent concerns, as well as on-call services for serious crises 24 hours per day, 7 days per week, when the University is open. The Counseling Center also offers very brief crisis intervention and referral services to faculty and staff. If a counselor is needed after regular business hours, contact campus police at 325-2121.

STAFF: The Counseling Center staff is composed of competent professionals with extensive training in counseling psychology, social work, and counseling who are experienced in facilitating personal growth and development. They respect the ability of each individual to make actualizing choices.

PERSONAL COUNSELING: Many university students have personal concerns which may interfere with their academic success. The Counseling Center staff provides an atmosphere in which students may discuss problems with the assurance that all counseling information is confidential and would be released only with the student’s written consent.

GROUP COUNSELING: The Counseling Center provides a variety of small group experiences ranging from personal growth groups, to study skills groups, to vocational exploration workshops. Students who wish to improve communication or interpersonal skills may participate in growth groups where they can experiment with new types of behavior in a safe and accepting environment. For those students experiencing academic difficulty, study skills groups provide instruction and supervised activity designed to improve study skills and habits. Students can gain insight regarding their interests, abilities, and decision-making styles, as well as the world of work, while participating in vocational exploration workshops.

CAREER COUNSELING: Counselors assist students in making thorough self-appraisals of interests, abilities and personality traits so that they may utilize this information in making wise career choices. Counselors interpret test data and assist the student in viewing alternatives.

OUTREACH AND CONSULTATION: Counseling staff provide psycho-educational outreach to the MSU campus and local communities, as well as psychological consultation to students, faculty, and staff. Check out our web site at www.msstate.edu/dept/cts for more information.

TESTING: The Counseling Center serves as the University’s testing center for national testing programs such as ACT, CEEB, GRE, LSAT, CLEP, GMAT, MCAT, and MAT. Applications for these tests, which are available at the Counseling Center, should be completed and fees paid well in advance of the desired testing date. Other tests used in counseling are also administered at the Counseling Center. These include personality tests, and tests of ability, and other instruments as needed to assist students.

COMPUTER-BASED TESTING (CBT): Counseling and Testing Services also administers the University’s Computer Based Testing program located at 54 Magruder Street. Students and community members may call 325-6610 to register for computerized applications of the GMAT, GRE, Praxis, and TOEFL. See our web site at www.msstate.edu/dept/cts/testing.

G. THE TEACHING and LEARNING CENTER

The major purpose of The Learning Center (TLC) is to help Mississippi State University students improve their academic performance. TLC offers both credit courses and non-credit services, available to all students of the University. Graduate and undergraduate students are served, including both strong students and those having problems in their courses. Any person who desires to enroll in TLC programs or to inquire about the programs should come to 267 Allen Hall or call 325-2957.

Credit Classes. The primary focus of the credit classes of the Teaching/ Learning Center is to assist in retention of students by strengthening their reading and study efficiency. The credit course, LSK 1023 College Reading and Study Skills, is intended primarily for freshmen and sophomores. This course emphasizes development of specific study skills and critical reading and thinking abilities. In addition, TLC offers a speed reading course, LSK 2013, and a one-hour study skills course, LSK 1011, that focuses on specific learning skills.

Non-credit Laboratory Services. The heart of TLC services is the TLC Laboratory. Assistance is available in grammar and punctuation, study methods, writing effective essay examinations, spelling, outlining techniques, writing research papers, vocabulary improvement, reading effectiveness, critical reading, technical reading, English as a Second Language, mathematics, and preparation for professional examinations. Any student of the University may receive these services free simply by coming to TLC to request assistance.

H. CAREER SERVICES CENTER

Career Services is one of the two major components of the Career Center. Career Services provides comprehensive services to Mississippi State University students and alumni relative to issues related to the career planning process. Assistance is provided that compliments the career decision process in the form of personality and interest inventories, career counseling, resume writing, resume critiques, and mock interviewing. In addition, special events are hosted by Career Services that provide students and alumni with enhancements related to the job search process. Major events held on a regular basis include Career Day and Education Interview Day each fall/spring semester, and special emphasis workshops including dining etiquette, dressing for success and evaluating job offers.

The capstone Career Services activity is the on-campus interview program connecting students with employers who come to the campus to interview prospective employees. Students should register with Career Services three (3) semesters prior to the expected date of graduation. Advanced internet technology is utilized to gain maximum exposure for students and alumni. The Career Services office also administers internships, summer employment and part-time employment for currently enrolled students.

I. LAUNDRY and DRY CLEANING

The University-owned and operated laundry and dry-cleaning facility provides students, faculty, and staff with quality wash, dry and fold; wash, starch and press; dry cleaning; minor alterations; repair; uniform rental; linen rental services; Priority One service, and a 24 hour laundromat.

J. THE HOLMES CULTURAL DIVERSITY CENTER

The Holmes Cultural Diversity Center, formerly known as the Office of Minority Affairs (established in 1979) strives to create a campus atmosphere where individuals will value and respect all members of the university and surrounding communities from different cultural, ethnic, economic and racial backgrounds. The Center provides support and encourages students, to assist them in achieving academic efficiency, to make a smooth transition to college life, and to grow in their awareness and appreciation of different cultures. In addition, the Center coordinates and/or co-sponsors cultural programming and cultural diversity/sensitivity sessions, among other efforts.

K. INFORMATION TECHNOLOGY SERVICES

The Division of Information Technology Services (ITS) manages computing, networking, system development and telecommunications services for students and university departments. The mission of ITS is “to enhance learning, service and research through an advanced information technology environment.”

www.its.msstate.edu
campus network resources and the Internet. Dial-Up Network Access accounts are set up and managed by Telecommunications. This department also operates the Campus Card Office and the University’s declining-balance spending account system, MoneyMate.

Systems and Networks • 117 Allen Hall • (662) 325-0728. Systems and Networks is responsible for the planning, deployment, support, and operation of the University’s information technology infrastructure. This infrastructure is comprised of the campus fiber optic backbone, departmental and building networks, the campus wireless data network, wide area network connections (including Internet and Internet2), and large scale computer, server, and information resources. The Network Operations Center in Allen Hall is the focal point for oversight of the campus network which encompasses over 140 campus buildings, numerous off-campus locations, and several thousand PC, Macintosh, and UNIX workstations. This facility also houses the Internet and Internet2 gateways, a dial-up modem pool, and several large-scale UNIX, Novell, and Windows servers used by academic, research, and administrative units of the University. Systems and Networks also maintains general-use Computer Labs in Butler Hall, Mitchell Memorial Library, and several of the Residence Halls. The Butler Hall and Mitchell Memorial Library facilities are open to all students, faculty, and staff, providing PC, and Macintosh workstations with a robust array of applications software. The Residence Hall facilities are open only to students living in campus housing.

Information Systems • 117 Allen Hall • (662) 325-0610. Information Systems is responsible for application development, maintenance, and support of the hardware and software systems throughout the University. Systems supported range from small departmental applications to the comprehensive, integrated Enterprise Resource Planning system (Banner) for financial, human resources, and student administration. Information Systems is composed of the following units: Data Administration, Business Administration, and Student Systems. Responsibilities include database administration and the system design, programming, implementation, and ongoing maintenance and support of the various information systems utilized by students, faculty, and staff.

L. STUDENT SUPPORT SERVICES

The department of Student Support Services (SSS) is a federally funded program through the U.S. Department of Education. It is a TRIO program designed to assist eligible low income college students, first generation college students, and college students with disabilities to succeed in completing their college education. A limited number of students can be served under the federal grant program. The primary mission of SSS is to enhance educational opportunities for eligible students to improve their academic and social skills, increase their retention toward graduation and as appropriate, facilitate their entrance into graduate and/or professional schools. Additionally, Student Support Services verifies legitimacy of students who identify themselves as having disabilities. Students with disabilities who need academic accommodations must identify themselves to SSS, provide appropriate documentation of their disability, and make their requests known to the department. Documentation guidelines can be obtained from SSS. Student Support Services staff reviews the documentation, assesses the needs of students with disabilities, and makes recommendations to the faculty and the University regarding the needs. The department serves as a resource and clearing house for dissemination of information related to disabilities and compliance with section 504 of the 1973 Rehabilitation Act and the Americans with Disabilities Act (ADA). For additional information or services visit Student Support Services, 01 Montgomery Hall or call (662) 325-3335.

VI. STUDENT and CAMPUS LIFE

A. THE COLVARD UNION

The Colvard Union, named for former President Dean W. Colvard, serves as the community center of the Mississippi State campus. The Union organizes and implements many social, cultural, educational, and recreational activities and events for the MSU community throughout the year. The Campus Activities Board (CAB) and Music Maker Productions develop and coordinate a variety of programs that include films, speakers, concerts, musical performances, holiday programs, craft fairs, skills presentations, and the like. The Colvard Student Union makes available to the campus community meeting and conference rooms, reception rooms, the multi-purpose Ballroom, the Small Auditorium, the Art Lounge, display space, banquet and dining rooms, and food service in the Union Food Court. The Union also houses the Office of Student Life, the CAB and Music Maker offices, Union Station Hair Designers, and the MSU Bookstore.

The Union Information Desk, located on the second floor, is open daily until 10:00 p.m.; it furnishes information about activities and events happening in the Union and around campus. Adjacent to the Information Desk is the Campus Outreach & Service Learning Center, and the Ticket Office which distributes tickets to campus concerts during the year.

B. THE STUDENT ASSOCIATION

The Student Association exists to serve all Mississippi State University students. The five officers, who are elected during the spring semester, are the leaders of the SA. These officers include the president, vice president, secretary, treasurer, and attorney general. They not only work to ensure that established policies and programs are successfully continued, but also initiate improvements in MSU’s student government.

The president and the SA cabinet comprise the executive branch of the Mississippi State Student Association. These cabinet members are selected to work with their student committees to implement programs and services which will benefit the entire student body. The vice president heads the legislative branch and presides over the SA Senate. These are fifty senators elected to represent the various colleges and schools, as well as areas of student residence.

The judicial branch of the SA includes the Judicial Board, which is made up of seven students appointed by the SA president and approved by the senate. The Judicial Board rules in cases involving student discipline and other matters dealing with MSU students.

All students are automatically members of the SA when they enroll at MSU. Students who want to learn more about the SA and become involved should visit the SA office located behind the State Fountain and Bakery in the lower level of Perry Hall Cafeteria or call 325-3917.

C. STUDENT PUBLICATIONS

Students of the University are responsible for producing two major publications. The Reflector, the campus newspaper, appears twice weekly during the regular term. Edited and managed by students, it provides a wide range of news, features, and commentary of interest to the campus community. Its editorial offices are in the Student Media Center.

The Reveille, the annual yearbook, is published each year by a selected student staff to provide for the participants a lasting record of life in the University. The Reveille offices are in the Student Media Center.

The Bulldog, is an on-line publication that is the University’s official student handbook. It provides a wide range of information about the campus and field life, regulations governing student conduct, the disciplinary process for students in the University, and student organizations.

D. STUDENT ORGANIZATIONS

Mississippi State University has more than 300 registered organizations, grouped as follows: Departmental/Academic (95), Fraternities (17), Sororities (10), Honorary (40), International/Ethnic (16), Fine/Performing Arts (11), Political (4), Recreation/Hobby (24), Religious (27), Residence Life (17), Service (34), and Publications (4).

Organizations which represent the interests of a large segment of or the entire campus include: The Student Association (SA), the Residence Hall Association (RHA), the Inter-Fraternity Council (IFC), the National Pan-Hellenic Council (NPHC) Undergraduate Council, the Black Student Alliance (BSA), the Pahellenic Council (PH), the Campus Activities Board (CAB), The Reflector (newspaper), and The Reveille (yearbook). The name and phone number of the advisor of each organization on campus are listed on the MSU website and in the SA Office (lower level of Perry Cafeteria).
E. SOCIAL SORORITIES and FRATERNITIES

Seventeen national social fraternities have established chapters at the University; twelve have chapter houses on the campus, and two have bought or leased houses off campus. Self-governance of the fraternities is provided by the Interfraternity Council, composed of the president and one delegate from each of the national fraternities. The national fraternities at Mississippi State University are: Alpha Gamma Rho, Alpha Kappa Lambda, Alpha Phi Alpha, Beta Theta Pi, Delta Chi, FarmHouse, Iota Phi Theta, Kappa Alpha Order, Kappa Sigma, Lambda Chi Alpha, Phi Beta Sigma, Phi Delta Theta, Phi Gamma Delta, Pi Kappa Alpha, Sigma Alpha Epsilon, and Zeta Tau Alpha.

Eleven national women’s social sororities have established chapters at Mississippi State University; six have built chapter houses on the campus. Pan-Hellenic Council is the self-governing body for sororities and is composed of two delegates from each sorority. State’s sororities include: Alpha Kappa Alpha, Chi Omega, Delta Delta Delta, Delta Gamma, Delta Sigma Theta, Delta Xi Phi, Kappa Delta, Phi Mu, Sigma Gamma Rho, Zeta Phi Beta, and Zeta Tau Alpha.

Included among the 28 Greek organizations at MSU seven historically African-American chapters: Alpha Kappa Alpha, Delta Sigma Theta, Sigma Gamma Rho, and Zeta Phi Beta sororities, and Alpha Phi Alpha, Iota Phi Theta, and Phi Beta Sigma fraternities. These organizations belong nationally to the National Pan-Hellenic Council (NPHC), and they are represented on campus by the NPHC Undergraduate Council, their self-governance body.

F. PROFESSIONAL and HONORARY FRATERNITIES

More than seventy professional and honorary fraternities are active on the campus. They include: Alpha Epsilon Delta Pre-Med (Pre-Medical), Alpha Kappa Delta Sociological (Sociology), Alpha Lambda Delta (Freshman Scholarly), Alpha Pi Mu (Industrial Engineering), Alpha Theta Chi (Leadership), Assoc. of Economic Scholars, Alpha Theta Chi, Beta Beta Beta Biological (Biology), Blue Key National Honor Fraternity (Activities), Cardinal Key (Leadership), Chi Sigma Iota (Counseling), Elder Statesmen (Upper-Classmen), Eta Kappa Nu (Electrical Engineering), Gamma Beta Phi (Educational Service), Gamma Iota Sigma (Business), Gamma Sigma Delta, Golden Key (Student Leadership), Kappa Delta Pi (Education Honorary), Kappa Omicron Nu (Leadership/Home Economics), Kappa Pi (Home Economics), Lambda Pi Eta (Communication), Lambda Sigma, (Sophomore Collegians), Mortar Board (Leadership), Mu Kappa Iota (Marketing), Omicron Delta Kappa (Leadership), Phi Alpha Theta (History), Phi Delta Kappa (Educational), Phi Eta Sigma (Freshman Scholarly), Phi Gamma Phi (Scholastic Honor), Phi Sigma Pi, Phi Theta Kappa Alumni (Transfer Students), Pi Delta Phi (French), Pi Omega Pi (Business Education), Pi Sigma Alpha (Government), Psi Chi (Psychology), Sigma Gamma Epsilon (Earth Science), Sigma Gamma Tau (Aerospace Engineering), Sigma Tau Delta (English), Society of Scholars in Arts and Science, Tau Beta Pi (Engineering), Theta Tau (Professional), University Honors Council (General Scholarship), Upsilon Pi Epsilon (Computer Science).

G. LYCEUM, SPEAKERS FORUM, BLACKFRIARS

Numerous groups and agencies to enrich the cultural life of the campus. Important among these are the Lyceum series, the Lectern program, and Blackfriars Drama Society, which utilize the excellent theater and gallery in McComas Hall.

For many years, the Lyceum series has brought the community a select and varied program of musical, dramatic, dance, and other artistic offerings, including symphony orchestras, ballet companies, traveling theatrical companies, and noted individual artists and performers. The Lyceum is supported by student fees, season ticket sales, an allocation from the University, and private contributions and managed by the student-faculty Performing Arts Committee.

The Speakers Forum series, managed by a committee of the Campus Activities Board, brings to the campus speakers of current interest to students and faculty. The Speakers Forum Committee is made up entirely of students. Admission to the lectures is typically free to students.

The Blackfriars Drama Society, supported by the Department of Communication, usually presents at least two major plays each semester, as well as programs of student-directed one-act plays. In addition, in the fall of each year Blackfriars plays host to the M. S. U. Drama Festival.

H. MUSICAL ORGANIZATIONS

A broad selection of musical ensembles is available for students with a wide variety of musical backgrounds and interests. The groups perform numerous concerts on and off campus throughout the year, and are featured at university-wide events such as Homecoming, Discovery MSU, and football and basketball games. All groups are available for credit, and several offer scholarships and out-of-state tuition waivers for satisfactory participation.

Instrumental ensembles offering one semester hour credit include the Famous Maroon Band, the Symphonic and Concert Bands, the Wind Ensemble, the Stage Band (one ensemble), and the Basketball Pep Band. A variety of smaller woodwind and brass ensembles are available to students for one semester hour credit.

Vocal ensembles offering one hour credit include the Concert Choir and the University Madrigal Singers, in which membership is by audition.

The Starkville/MSU Symphony Orchestra is open to string, wind, and percussion players from MSU as well as the Starkville community and surrounding areas. This group performs several concerts each year, but does not offer credit for participation.

The Starkville/MSU Symphony Chorus is open to students, faculty, and members of the community. The group reherses weekly and performs a wide variety of music in several concerts throughout the year. Credit is not offered for participation.

For information concerning music ensembles at Mississippi State University contact the Department of Music Education.

I. RELIGION

Since Mississippi State University is a non-sectarian institution, it seeks to provide a climate of freedom in which the private and corporate religious life of the students can be expressed. Students and others within the campus community are free to worship or not to worship, in accord with their convictions and beliefs.

The Chapel of Memories, with its George D. Perry Carillon Tower, in the center of the campus, is open to individual students for meditation and prayer throughout the day and evening. It may also be reserved through the Director of Facilities Use (Humphrey Coliseum) for weddings, funerals, initiations and beliefs.

The University Common Ministry, composed of ministers engaged in campus ministry at the University, has been serving the needs of students since December 20, 1978. In addition, more than 25 active student religious groups are registered with the Office of Student Life.

In addition to the practice of religion within the student religious groups, an opportunity to learn about religions of the world is provided through credit courses in the Department of Philosophy and Religion, as well as non-credit courses offered through the church-related groups.

J. RECREATIONAL SPORTS

The Department of Recreational Sports conducts a comprehensive program of leisure services. The program consists of men’s, women’s, and co-recreational sports; fitness programs and activities; tennis and racquetball court reservations, equipment check-out services; informal recreation programming; sport club opportunities; and special events.

The Joe Frank Sanderson Center opened in the Summer of 1998 and offers a wide range of recreational opportunities for Mississippi State students, faculty, and staff. The state-of-the-art facility includes six basketball/volleyball courts; eight racquetball courts; a fitness room complete with weight and
cardiovascular work-out equipment; jogging track; and an indoor swimming pool. The department also operates the RecPlex, a sports field complex with playing areas for softball, flag football, and soccer.

The Intramural Sports program offers competition for men and women in a variety of activities including badminton, basketball, flag football, racquetball, soccer, softball, tennis, table tennis, and volleyball.

K. INTERCOLLEGIATE ATHLETICS

Mississippi State University is a member of the Southeastern Conference, which includes in its membership twelve of the leading universities of the South. Regulations regarding participation in athletics are subject to the action of the National Collegiate Athletic Association and the Southeastern Conference. Intercollegiate sports for men include football, basketball, baseball, track, tennis and golf. Intercollegiate sports for women include basketball, volleyball, tennis, golf, cross-country, track, soccer and softball. Overall supervision of intercollegiate athletics is provided by Larry O. Templeton, Director of Athletics.

Campus athletic facilities include Scott Field (football stadium), with a current capacity of 41,200 and the Leo Seal M Club Center, the John H. Bryan Athletic Administration Building, a multi-purpose coliseum which seats 10,200 for basketball, four practice football fields, a six-court tennis complex, an indoor tennis practice facility, a lighted baseball park with a capacity of 6,700, an all-weather running track, a soccer field, a softball field, an indoor practice facility for basketball and volleyball, and a physical fitness complex which contains approximately half a football field covered with astro turf, a weight room, a training room, a team meeting room, and a locker room.

VII. TUITION and REQUIRED FEES FOR 2003-2004

Except for tuition and required fees for the College of Veterinary Medicine stated hereafter, the following fees apply to students enrolled full time during the fall or spring term.

Tuition and Required Fees are assessed on a per credit hour basis at the prevailing rates as determined by The Institution of Higher Learning, the government board of the University. These rates are subject to change without notice.

<table>
<thead>
<tr>

</tbody>
</table>

Note: Final registration includes payment of fees. Enrollment is not completed until fees are paid.

Tuition and required fees (Hourly, Rounded)

Undergraduate (for 1-11 hours)
- Resident: $161.50 per hour
- Non-resident fee: $204.50 per hour

Graduate (for 1-8 hours)
- Resident: $215.25 per hour
- Non-resident fee: $272.75 per hour

A student will be considered full-time for tuition and fee purposes when registered for 12 or more hours undergraduate and 9 or more hours graduate. Part-time (on-campus) students registered for from 1 to 11 hours undergraduate and 1-8 hours graduate will be charged at the pre-credit-hour rate for tuition and required fees.

Audit Charges

There are no extra fees for auditing a course; tuition is the same whether a course is taken as an audit or for credit.

International Student Charges

All international students are assessed an Administrative Programming fee of $100.00 each fall, spring, and summer term. Sponsored international students whose programs of study are administered through the International Services Office are assessed an additional Administrative Service Fee of $200 each fall, spring, and summer term. Health insurance for international students will be assessed at the prevailing rate for the fall semester and for the spring/summer semester. All international students are required to pay the International Health Insurance Fee unless an acceptable, alternative policy can be proven and accepted by the International Services Office, preferably prior to registration. Health insurance charges will not be removed after the 10th class day.

Sponsored International Student Charges

The International Services Office will administer the program of study for international students who receive all or most of their financial support in the form of scholarships, grants, or awards from U.S. government agencies, private and/or international agencies, or foreign employers, and students whose financial support is administered by foreign embassies and third-party billed by Mississippi State University, assessing a fee of $200 each fall, spring and summer term.

Tuition Waivers

Mississippi State University employees who have appropriate approval may have tuition and required fees remitted for up to six (6) hours per semester with a maximum of 18 hours per calendar year. Employees are required to pay tuition and required fees for any additional hours taken during the enrollment period and other assessments to their student account. Students, faculty and staff are responsible for service fees incurred if tuition waiver approval is not finalized on a timely basis.

Senior citizens (65 or over) may take courses without paying tuition and required fees, although registration is on a space available basis and must be completed after classes begin.

Unpaid balances from previous semesters

Any outstanding and past due amounts owed to the University must be paid in full before a student may register for additional courses or make schedule changes. All payments received on student accounts will be applied to charges in the same order in which the charges were incurred. A student who has a hold on his/her record because of an overdue account may not receive a transcript or a diploma until the account is cleared.

---

1 The University reserves the right to refuse acceptance of checks presented by students who have had previously returned checks. In such cases payment must be made by cash, money order, certified bank check or credit card.
OTHER INFORMATION

Student Activities

All students, by payment of tuition and required fees, are eligible for use of facilities, participation in intramural sports, admission to intercollegiate athletic events, the student newspaper, student health services and other benefits.

Billing

Billing statements are available to students on about the 15th of each and every month via the University’s web page. These statements contain a comprehensive summary of most charges to the students account by the University. It is the responsibility of the student to maintain a current billing addresses via the web.

Service Charges

There is a 25 day grace period to make payment on billed charges. There will be a service charge at the rate of 1.5% assessed per month on any charges outstanding greater than 25 days from billing. As a rule, the regular monthly due date falls on the 9th of each month.

Attorney and Collection Fees

Students who do not pay their fees by the end of the term may be turned over to an outside collection agency for assistance in collecting. The prevailing collection cost rate will be added to the amount owed by the student to cover the collection agency cost. If an Attorney’s services are needed to collect an unpaid balance, the student shall be responsible for payment of the attorney’s fees, plus all court and other collection cost incurred.

Course Participation Fees

Fees in addition to tuition are associated with some courses which require the use of special equipment, facilities or materials. These fees, which vary from course to course, will be collected as part of registration.

Schedule Change Fees

Courses may not be added after the first ten class days of a semester. Any change in class schedules between the 10th class day and two weeks before the end of a semester will incur a charge of $50 per drop. Schedule changes made after initial registration and payment of fees may generate additional charges to students. Such additional charges are subject to the same payment schedules and penalties as the initial charges, and additional charges should be paid promptly to avoid service fees.

Other fees

Fees which may be incurred by students include Thesis/Dissertation Binding Fee, $12; Microfilm Fee, Dissertation, $55, Thesis, $45; Copyright $35; Student Identification Card Replacement Fee, $10; and Spouse Identification Card, $16 per semester (allows student spouse to attend campus events in same manner as student), and Professional Golf Management Fee, $350.

Housing Fees

To live in a residence hall, students must sign a nine-month housing contract. Rent is payable at a rate of $1270.00 per semester for both the fall and spring semesters, based on double occupancy. Private rooms may be rented when space is available for $1675.00 per semester.

PAYMENT and REFUNDS

Current tuition and required fees should be paid at the established monthly due date. Partial payments of an account balance are permitted during the semester/term. However, a monthly service fee (1.5%) will be assessed on charges unpaid by the due date (approximately 25 days from the billing date). All service charges may be avoided by paying the full account balance each month by the payment due date. IF mailing your payment, please mail at least five (5) business days prior to the date to insure it is received and credited to your account by the payment due date.

You are responsible for payment of all tuition and fee charges unless you either CANCEL YOUR SCHEDULE OR WITHDRAW FROM SCHOOL. See refund schedule published in the Master Schedule or on the web, click on Refund Policy for details of refund amounts at various stages of cancellation or withdrawal. Failure to take appropriate withdrawal action may result in significant payment obligations.

Accepted Forms of Payment: Personal or corporate checks, money orders, cashiers’ checks, and credit cards (American Express, Discover, MasterCard, Visa). PLEASE PROVIDE YOUR SOCIAL SECURITY NUMBER WITH ALL PAYMENTS. Cash payments may be made only at cashier windows. DO NOT mail or place cash payments in drop boxes.

Payment of fees by students receiving financial aid or scholarships

Students who receive a scholarship or need-based financial aid from the University are expected to use their financial aid or scholarship award to complete payment of tuition and required fees. The remaining balance of scholarship and financial aid funds is available to be used for other educational expenses only after tuition and fees have been paid. A “Memo” balance of Financial Aid on your statement may not prevent service fees after the first billing for the term. Only timely filing of your Financial Aid will assure a timely disbursement to prevent service fees.

Refunds of tuition and fees

During the first 10 class days of an academic semester, courses dropped result in a 100% tuition and fees refund. No refunds are made for courses dropped after the 10th class day.

Drop Policy For First And Second 5 Week Terms

Drops for first five week and second five week summer terms will be refunded at 100% during the first three class days. After the third class day, no refunds are made for individual courses dropped. The ten week term will be refunded at 100% during the first five class days. A refund schedule for withdrawals may be obtained from the Registrar.

Student Accounts. A financial record for each student is kept in the Account Services Office in Garner Hall. The information is considered confidential; however, the records of students will be available for examination by authorized representatives of the Government.

COLLEGE of VETERINARY MEDICINE - 2003/2004

To inquire about tuition and fee information, please contact the College of Veterinary Medicine at 662-325-1129 or visit our website at www.cvm.msstate.edu.

The College of Veterinary Medicine shall require a $500.00 deposit from all new entering students into the (DVM) program. This deposit will be due as described in the letters of invitation from the College and shall be applied to the regular tuition of the student and is not refundable. These rates are based on 2002/2003 fees and are subject to change without notice.

Doctor Veterinary Medicine:  
Vested (includes all tuition and fees) \$2,213.35  
Non-vested (includes all tuition and fees) \$9,863.35

Determination of the Professional Education Fee assessed to each student is based on documentation of participation in the State of Mississippi tax system up to and including the previous calendar year prior to acceptance into the DVM Program. PEF status is determined upon admission into the program, and PEF status will not change. To be exempt from paying the Professional Education Fee, a student must prove four years of participation in the State of Mississippi tax system.

Overdue Accounts  
The administrative authorities of the University will withhold the transcripts and diplomas, degree certification, letters of good standing, and other certification of enrollment and deny readmission of any student who incurs an overdue financial obligation to the University.

If a financial hold is released based upon a financial agreement and the terms and conditions of that agreement are not met, we reserve the right to void the current term class schedule without notice and without promise of reinstatement of the same class schedule.

Student Obligation: Students who do not pay their fees by the end of the term may be turned over to an outside collection agency for assistance in collecting. The prevailing collection cost rate will be added to the amount owed by the student to cover the collection agency cost. If an Attorney’s services are needed to collect an unpaid balance, the student shall be responsible for payment of the attorney’s fees, plus all court and other collection costs incurred.

Use of Checks in Payment of University Fees and other Charges; Banking Facilities  
Payment by Check. The University will accept checks in payment of amounts due to the University for University fees, residence hall or housing rentals, utility bills, laundry services, and other University charges.

The University reserves the right to defer payment on the balance of any check tendered in excess of the amount due the University, until the check has had time to clear for payment through banking channels. A student may be dropped from enrollment when a check tendered in excess of the amount due the University, until the check has had time to clear for payment through banking channels. A student may be dropped from enrollment when a check offered to the University is not honored by the bank on which it is drawn.

The University expects that each debt created by a returned check will be promptly and fully corrected. Failure to respond to a notice concerning a returned check may result in legal action, the denial of readmission, and the withholding of records. The maximum penalty allowed by law will be charged for any check returned by your bank for any reason. Returned checks are considered non-payment and will result in the voiding of scheduling and assessment of appropriate fees. The University reserves the right to refuse acceptance of checks presented by students who have had previously returned checks. In such cases payment must be made by cash, money order, certified bank check, or credit card.

Banking Facilities. Automated teller machines are located in the One Stop on east Lee Boulevard and on the ground floor of Colvard Union. These machines offer 24 hour banking services for students, faculty and staff. There are four banks located in downtown Starkville. These banks offer full banking services to all students of Mississippi State University.

3. To view your current account detail, select View Your Account Detail.
4. To make a payment by credit card, select Make a Payment by Credit Card.

VIII. STUDENT FINANCIAL AID

General Information

Many Mississippi State University students receive various types of financial aid to help pay the costs associated with attending college. The following information is provided to inform students and their families of the estimated costs of attending MSU, the types of financial aid available to help pay these costs, some of the general aid eligibility requirements, and the aid application procedures. The information contained in this section is accurate as this document went to print. Please visit our website at: www.msstate.edu/dept/SFA for further information and updates.

I. Student Expenses - The Cost of Attending MSU - 2003-2004

The following list of basic university expenses covers those for a full-time, undergraduate student living in a residence hall on campus for a nine month academic year. Note: These costs are average costs, based on the 2002-2003 school year costs and are subject to change.

<table>
<thead>
<tr>
<th>Category</th>

<td>$16,790.00</td>
</tr>
</tbody>
</table>

* Students participating in the University’s Seven Day Meal Plan will incur an additional $695.00 in costs (in addition to the above estimated meal costs).
II. Sources of Financial Aid

Federal Sources of Financial Aid Programs are “need based” or “non need based” as determined by the federally mandated needs analysis formula.

A. Federal Sources of Financial Aid

1. Pell Grants - A federal student aid program designed to provide a foundation of gift aid to students who demonstrate financial need. All undergraduate students enrolled for their first undergraduate degree are eligible to apply for Pell Grants. Pell Grants awards for the 2002-2003 year ranged from $400 to a maximum of $4,000. Depending on Congressional allocations, Pell Grant amounts may change each year.

2. Federal Work-Study - A program of part-time employment for students who demonstrate financial need. Eligible students may work up to 18 hours per week during regular school sessions.

3. Stafford (subsidized and unsubsidized) Student Loans - Long-term loans may be provided by participating banks and/or other lending institutions for students who need assistance in meeting educational expenses. Subsidized loans are based upon financial need. Unsubsidized loans are not based upon financial need.

4. Perkins Student Loans - A program of long-term, low-interest loans to students who demonstrate financial need to meet college expenses. No interest accrues, nor does payment begin, until after the borrower ceases to be at least a half-time student.

5. Supplemental Educational Opportunity Grants - A federally sponsored program to provide gift aid for undergraduate students with exceptional financial need. Funds are limited. Apply early each year.

6. Parent Loan for Undergraduate Students (PLUS) - PLUS Loans are for the parents of dependent students. Parents may borrow on behalf of their eligible dependent student. PLUS Loans are non-need based in that parents are eligible to be certified by the school if other funds have not covered the student’s cost of attendance.

7. Leveraging Educational Assistance Partnership Program (LEAP) - A federal and state sponsored program to provide gift aid for undergraduate students with exceptional financial need. Funds are limited. Apply early each year.

B. Institutional Sources of Financial Aid

1. Academic Scholarships - These awards are provided by the University to recognize outstanding academic and personal achievement by students attending MSU. Scholarship amounts range from $100 to $8,000 per academic year and are awarded on a competitive basis by the University Scholarship Committee.

2. Regional Scholarships - These awards provide for payment of out-of-state fees for non-residents attending the University. Awards are made by the University Scholarship Committee on a competitive basis, depending on a student’s academic and personal achievement.

3. Out-of-State Fee Waivers - Changes are effective for students beginning with the Fall 2001 term. Previously enrolled students will qualify for different waiver amounts and quality point averages as stated under the Bulletin guidelines for the term they initially enrolled.

a. Child of Alumni Waiver - This scholarship waives 50% of the Non-Resident Fee for sons and daughters of alumni. Minimum qualifications for an entering status is 48 semester hours of work completed at MSU. A student must maintain a 3.0 cumulative quality point average to renew the 50% waiver. A student may receive a 25% waiver if the cumulative quality point average drops below 3.0 but a 2.5 or better GPA must be maintained. If the cumulative quality point average ever drops below 2.5, the waiver will be permanently lost. The basis of the cumulative quality point average is monitored at the end of the fall semester.

b. ACT/SAT Waiver - This scholarship waives 100% of the out-of-state tuition normally paid by non-Mississippi residents that are entering freshmen who have an ACT composite score of 26 or above or a combined SAT score of 1170 or above, and a high school GPA of 3.0 or above. The fee waiver may be renewed if the recipient maintains a cumulative grade point average of 3.0 or higher. If the cumulative quality point average drops below 3.0 but above 2.5, the student can receive a 50% waiver. If the quality point average drops below 2.5, the student loses the entire out of state waiver. The loss is permanent. Cumulative quality point averages are monitored at the end of each fall semester.

c. Community College Transfer Waiver - This scholarship waives 100% of the out-of-state tuition normally paid by non-Mississippi residents that are community college transfer students with 60 or more semester hours and a 3.5 or higher cumulative grade point average. The waiver will be renewed if the recipient maintains a cumulative grade point average of 3.0 or higher. If the cumulative grade point average drops below 3.0 but above 2.5, the student can receive a 50% waiver. If the cumulative grade point average drops below 2.5, the student loses the entire out-of-state waiver. The loss is permanent. Cumulative grade point averages are monitored at the end of each fall semester.

4. Undergraduate Tuition Remission Policy for Children of Faculty and Staff - The partial tuition remission policy applies to all single dependent children of full time faculty and staff. See tuition remission policy for any restrictions that may apply.

5. Departmental Scholarships -Colleges and Departments within the University offer scholarships designed to assist students majoring in a specific discipline. Most are competitively awarded and renewable.

6. Emergency Short-Term Loans - The University has available for students a means of borrowing small sums of money to meet emergency expenses during the academic year. Such loans are repayable during the same semester in which the loan is made. Application is made to the Dept. of Student Financial Aid and Scholarships.

7. CIOS - A program of long-term, low interest student loans to students who demonstrate financial need to meet college expenses.

8. Summers Scholarship - Students who are residents of Attala, Carroll, Choctaw, Montgomery, or Webster counties in the state of Mississippi may be eligible for this scholarship.

9. A portion of student tuition and fee charges is used for scholarships, tuition waivers and other operating costs.

C. State and Other Sources of Financial Aid

1. Army/Air Force ROTC Four-Year Scholarships - Scholarships available to students interested in commissions as officers in either the Army or the Air Force. Scholarships are based on ACT scores and high-school grades, not financial need. Visit the following web pages for further information. Army ROTC: www.mstate.edu/dept/militaryscience/info. Air Force: www.mstate.edu/dept/afrotc.

2. The Mississippi Tuition Assistance/Mississippi Eminent Scholars Grant (MTAG/MEG) and other state aid programs are available to residents of the state of Mississippi. Information about these programs can be obtained from the Mississippi Office of Student Financial Aid in Jackson, MS. Phone: 1.800.327.2980.

III. To Apply for Financial Aid at MSU

For the 2003-2004 academic year the following forms MUST be completed by the student:

A. Federal Student Aid - (Federal Pell Grant, Federal SEOG, LEAP Federal WorkStudy, Federal Perkins Loan, Federal Stafford Subsidized and Unsubsidized Student Loans and the Federal PLUS Loan). Applicants must complete the Free Application for Federal Student Aid (FAFSA) each year. The FAFSA can be submitted in paper form or over the web at www.FAFSA.ed.gov and should be submitted as soon as possible after January 1st each year for the coming school year. Any required verification or tax documents should be delivered to the Department of Student Finan-
A. Scholarship Criteria:
1. All scholarship awards, academic, and regional, are made in accordance with guidelines established by the MSU Scholarship Committee.
2. Students currently enrolled at MSU and college transfer students are evaluated primarily on the basis of their cumulative grade-point averages.
3. Entering freshmen are evaluated on the basis of their ACT composite scores, high school grade point average, high school class standing and leadership attributes.
4. Some Academic Scholarships are not automatically renewed. Students will compete for available scholarships in subsequent years.
5. Students from Attala, Carroll, Choctaw, Montgomery, and Webster Counties in the state of Mississippi may be eligible to apply for the E. H. Sumners Scholarship Program.
6. Students from Attala, Carroll, Choctaw, Montgomery, and Webster Counties in the state of Mississippi may be eligible to apply for the E. H. Sumners Scholarship Program.
7. Federal student aid recipients who begin attending classes during a semester and who cease attending or performing academic activities prior to the end of the semester, and never complete an Official Withdrawal Form are considered by the federal government to have unofficially withdrawn. If University records indicate that a student did begin attending classes but subsequently unofficially withdrew, the University will notify the Department of Student Financial Aid and Scholarships at Mississippi State University upon learning that additional educational resources/benefits (scholarships, tuition waivers, etc.) have been awarded or received.
8. Because the amount of financial assistance awarded usually reflects the financial situation of the student's family, the University does not make a public announcement of the amount of financial aid awarded.
9. All appeals must be in writing and include the student's name, social security number, telephone number and all the facts and documentation upon which the appeal is based. The appeals letter must be received by Student Financial Aid and Scholarships at least five (5) days prior to the last day to register during the spring and fall semesters and prior to registration day for each summer session. The University Scholarship Appeals Committee has authority over all appeals and its decisions are final.

B. Federal Programs of Financial Aid

1. All Federal student aid funds are awarded on the basis of criteria established by the United States Congress and the Department of Education, as required by Title IV of the Higher Education Act of 1965, as amended.
2. Priority in the awarding of some need-based aid is given to students with the greatest financial need first, within the availability of funds. Funds that are limited are awarded until depleted. Applicants are encouraged to apply early each year.
3. The family of a student is expected to make a maximum effort to assist the student with college expenses. Financial assistance from the University and other sources should be viewed only as supplementary to the efforts of the family. In determining the extent of a student's financial need, the University will take into account the financial support which may be expected from income, assets, and other resources of the parents and of the students as required by Federal Regulations.
4. Students themselves are also expected to use all available resources for their college expenses. This includes savings accounts, trust funds, etc.
5. The total amount of financial assistance offered by the University and other sources must not exceed the amount of financial need as determined by the Department of Student Financial Aid and Scholarships. The University does not make a public announcement of the amount of financial aid awarded. The University will clearly state the total yearly cost of attendance. (See costs listed under “Students Expenses” or visit our website at www.sfa.msstate.edu.)
6. All financial assistance is awarded on an annual basis and no award implies automatic renewal from year to year. A new FAFSA, MTAG/MEG, and the entering application must be submitted each year. Other applications may also be required. Always check with the granting agency to determine application procedures and deadline dates.

C. Satisfactory Academic Progress for Purposes of Student Financial Aid

1. To define reasonable standards for measuring academic progress in order for students to remain eligible for financial aid under Title IV.
2. Policy

Mississippi State University, as required by federal law, defines and enforces minimum standards for Satisfactory Academic Progress. Students receiving federal financial aid and Summers funds must conform to these minimum standards of Satisfactory Academic Progress.

Students receiving federal financial assistance and Summers funds must enroll in courses leading to, and earning credit toward, a degree. These satisfactory academic progress standards will include an evaluation of each student's progress in terms of quality and quantity of progress toward the degree. Students who are not successfully completing appropriate courses will not be considered to be making satisfactory academic progress and will not be eligible for further federal financial aid. These satisfactory academic progress standards supersede any award letter that the student might have received. This policy applies to all Title IV federal financial aid programs at Mississippi State University and the Summers Scholarship Program.

For details regarding this satisfactory academic progress policy and other consumer information, visit our website at www.sfa.msstate.edu.

D. Withdrawal from School

1. Treatment of Student Aid Funds when a Student Withdraws from School

Students who choose to withdraw from the University prior to the end of an enrollment period (semester) should follow the University's guidelines for withdrawing from school. An Official Withdrawal Form must be completed and submitted to the proper office before a student can be considered officially withdrawn. Information concerning the details of withdrawal procedures can be found in the MSU Bulletin or by contacting the University Registrar.

Federal student aid recipients who begin attending classes during a semester and who cease attending or performing academic activities prior to the end of the semester, and never complete an Official Withdrawal Form are considered by the federal government to have unofficially withdrawn. If University records indicate that a student did begin attending classes but subsequently unofficially withdrew, the University will
consider the Unofficial Withdrawal date to be the midpoint of the semester (unless documentation exists of a later date of academic activity by the student).

When a federal student aid recipient withdraws, officially or unofficially, after attending at least the first class day, the University will return, and the student aid recipient will be required to repay, a prorated portion of funds received based upon a federally required calculation (see Return of Title IV Funds section below).

If University records show a federal student aid recipient never attended a class and/or never performed an academically related activity for a semester or term, then the recipient never established eligibility for any aid funds that may have been disbursed for that semester or term. In addition, any student aid recipient who withdraws, drops all classes, or voids his/her schedule, etc., with an effective date prior to the first day of class for a semester or term did not establish eligibility for any aid funds that may have been disbursed for that semester or term. In either case, the student aid recipient must repay the entire amount of aid disbursed for that semester or term.

If a student did not receive any federal student aid but did receive other types of aid funds, and subsequently officially withdraws, refunds and repayments will be based upon the University’s refund schedule which can be found in the University catalog.

2. Return of Title IV (Federal) Funds When a Student Withdraws

Under the Higher Education Amendments of 1998, the amount of aid a student has earned for the enrollment period is based on the length of time the student remains enrolled for that period. Therefore, the percentage of the enrollment period completed is also the percentage of aid the student has earned.

If a student withdraws on or before the 60% point of the enrollment period, the percentage of aid earned is equal to the percentage of time completed. (Conversely, the percentage of aid unearned is equal to the percentage of time not completed, up to the 60% point.)

A student who remains enrolled beyond the 60% point of the enrollment period has earned 100% of the aid for that period. (There would be no unearned aid.)

Repayment of the Unearned Amount is calculated as follows:

School will return the lesser of:
- total amount of unearned aid; or
- institutional charges x unearned %

Student will return:
- remaining balance of unearned aid plus any amount the school returned that exceeds the amount of institutional charges that are credited back to the withdrawing student based upon the Institutional Refund Policy calculation.

The unearned amount of aid must be returned to the applicable Title IV aid programs in the following order:
- Unsubsidized Stafford Loan
- Subsidized Stafford Loan
- Federal Perkins Loan
- Federal Plus Loan
- Federal Pell Grant
- Federal SEOG

With the exception of any amount owed to the school, students and/or parents who are required to return a portion or all of their loan proceeds, are allowed to repay the unearned amount according to the terms of the loan.

Examples of Return of Funds calculations are available in the Department of Financial Aid and Scholarships.

Note: The information contained in this section is subject to change, without notice, in order to comply with federal, state, or university requirements.

IX. SCHOLARSHIPS, MEMORIALS, and LOANS

UNIVERSITY SCHOLARSHIPS

Mississippi State University is committed to the recognition of outstanding students whose academic credentials confirm their potential for success as university students. Outstanding students may be eligible for various scholarships and honors.

Numerous privately funded scholarships support the University Scholarship Program to recognize continued academic success. Please visit our web site at www.msstate.edu/dept/sfa for information regarding eligibility criteria and application information. Once an application is submitted, consideration will be given for all of the applicable awards as follows:

**Daryl Ray Arnold Memorial Endowed Scholarship** - established by Danny and Peggy Arnold. Candidates must be full-time students enrolled in the College of Business & Industry or the Department of Microbiology in the College of Arts & Sciences at MSU. Must have demonstrated academic achievement, a minimum of 3.0 GPA and be active participants in student activities. Priority will be given to eligible Kappa Sigma fraternity members.

**Attala MSU Alumni Chapter Annual Scholarship Fund** - established by the Attala Chapter of the Mississippi State University Alumni Association. Candidates must be residents of Attala County in Mississippi and be entering freshmen at MSU for the upcoming fall semester. Must have demonstrated academic achievement at high school level, be of good moral character, demonstrated leadership ability and financial need.

**Robert G. Barnett Foundation Scholarship** - established by the Robert G. Barnett Foundation. Candidates must be full-time students enrolled at Mississippi State University. Scholarship is available to all classifications - freshman through senior. Current students must have demonstrated academic achievement by maintaining a minimum of 2.5 GPA (based on a 4.0 scale). Must be graduates of either Indianola Academy or Indianola Gentry High School in south Sunflower County in Mississippi.

**The Birmingham Alumni Chapter Scholarship Fund** - established by the Birmingham Chapter of the Mississippi State University Alumni Association. Applicants must be full-time entering freshman students at MSU with a minimum high school GPA of 3.0, be residents of the Birmingham, Alabama area, be of good moral character, have demonstrated leadership ability, and have financial need.

**The Black Voices Scholarship** - established by the Black Voices Alumni Association. Applicants must be full-time student at MSU, active member of the Black Voices Choir.

**Bolivar County Alumni Scholarship** - established by the Bolivar County Alumni Chapter. This award is available to entering freshmen from Bolivar County based on a minimum GPA of 3.0, good moral character, leadership qualities, financial need.

---

*Unless otherwise directed in the separate lists or descriptions, address inquiries to the Department of Student Financial Aid and Scholarships, P. O. Box 6005, Mississippi State, MS 39762.*

Sterling H. Floore, Sr. Academic Excellence Endowment—established by the Noxubee County Chapter of the of the Mississippi State University Alumni Association to honor Mr. Sterling H. Floore; awarded to students from Noxubee County or with ties to that county.

M. D. L. and Sophronia Alice Gholston Memorial Scholarship—established by Mr. and Mrs. L. E. Gholston,

Girol Scholarships—established by Mrs. Fred (Lora Mae) Girol, awarded to Mississippi residents who complete pre-veterinary requirements at Mississippi State University and who have been accepted into the College of Veterinary Medicine for the following fall semester.

Golightly Foundation Scholarship—established by Mrs. Wilma G. Person and Miss Annie L. Golightly as a memorial to their parents and brothers; awarded to students on the basis of scholarship and financial need.

Minor S. and Helen D. Gray Scholarship Fund—established by Mr. Calvin H. Gray in honor of his father and mother, Minor S. Gray and Helen D. Gray.

Perrin H. and Lela Grissom Scholarship in Agriculture and Home Economics—established by Mr. Perrin H. Grissom (B.S., 1939; M.S., 1940) and Mrs. Lela Grissom; awarded to students in all classifications; based on academic achievement, character, leadership ability, and financial need.

James Hand, Jr. Memorial Scholarship—established by James Hand, III and Kathleen Hand Carter in memory of their father, James Hand, Jr.; awarded to students from Sharkey County, with students from south Delta having second preference and students from the Delta at large, third preference on the basis of need and merit.

Wyatt B. Hodges-George D. Perry Memorial Scholarship in Golf—established by Mr. and Mrs. Alfred M. “Skip” Sears, Jr. (B.S., 1971) and their two daughters, Maggie and Katherine, in memory of Mr. Sears’ grandfather, Mr. Wyatt B. Hodges, and Mr. George D. Perry (B.S., 1919); awarded to undergraduate students in Turfgrass Management and Professional Golf Management; based on academic achievement, involvement in extracurricular activities, character, leadership ability, and financial need.

Kirby Wesley Holloway Memorial Scholarship—established by Mrs. Roberta Thompson Holloway in memory of her husband, Kirby Wesley Holloway; awarded to juniors and seniors on the basis of academic record and proven need for financial assistance.

L.I. Jones Memorial Scholarship—awarded to undergraduate students, first preference to juniors and seniors; based on merit and financial need.

Mark Keenum Endowed Scholarship in Agriculture and Life Sciences—established by friends to honor Mark Keenum; awarded to students on the basis of academic achievement and leadership skills.

Charles E. Lindley Leadership Award—established by Mr. James A. Bedenbaugh in the memory of his father, Mr. Poston Gore Bedenbaugh and his mother, Mrs. Parkie Childress Bedenbaugh to honor Dr. Charles E. Lindley; awarded to a senior on the basis of academic achievement, leadership skills and financial need.

Art and Mary Massey Endowed Scholarship in Agriculture and Life Sciences—established by Mr. James A. (Art) Massey (B.S., 1954) and Mrs. Mary Carmichael Massey; based on academic achievement, character, leadership ability, and financial need.

Robert H. McCarty Memorial Scholarship—awarded to students on the basis of academic achievement, character, leadership ability, and financial need.

George McNeill Scholarship Fund—established by Mrs. George McNeill in memory of her husband, Mr. George McNeill; awarded to upperclass students from George or Greene Counties.

Mississippi Agriculture Industry Council Scholarship—established by the Mississippi Agricultural Industry Council; awarded on the basis of academic achievement, character, leadership, and need.

Mississippi Rural Rehabilitation Corporation Endowed Scholarship—established by Mississippi Rural Rehabilitation Corporation; awarded to sophomores, juniors, or seniors from Mississippi, preferably rural areas, on the basis of academic achievement.

Mississippi Seedsmen’s Association Scholarships—established by Mississippi Seedsmen’s Association; awarded each year on the basis of academic record.

T. G. Owen and Son Memorial Scholarships—established by The Herman and Hazel Owen Foundation; awarded to juniors and seniors majoring in Horticulture and Landscape Architecture on the basis of need, academic proficiency, extracurricular activities, and expressed intention of remaining in Mississippi after graduation.

E. N. Ross, Jr. Agricultural Scholarship Fund—established by Dr. and Mrs. William C. Warner in memory of E. N. Ross, Jr.; awarded to Mississippi residents who are majoring in Agricultural Economics on the basis of scholarship and financial need.

Jimmy Sanders Scholarship—established by Mr. Jimmy Sanders; awarded to students on the basis of academic record, character, and leadership, and need.

Simmons Scholarship—established by Drs. Cecil and Sue Simmons in honor of their parents; awarded to students enrolled in the College of Agriculture and Life Sciences or the School of Forest Resources.

Boswell Stevens Scholarship—established by friends of Mr. Boswell Stevens in his honor; awarded to a deserving son or daughter of a Farm Bureau family.

Fred P. Sullivan Endowment Fund—awarded to students on the basis of academic achievement, leadership skills and financial need.

Bart Tomlinson Annual Scholarship in Agriculture—established by Mr. Philip A. Troskey (B.S., 1973) and his wife Mrs. Elizabeth Troskey (B.S., 1976) in honor of her father, Mr. Bart Tomlinson, who attended Mississippi State University from 1949-51, before serving in the Korean conflict; preference given to students with interest in agriculture and/or cattle related fields; based on academic achievement and future agricultural career.

George Rea Walker, Sr. Memorial Scholarship—established by Stoneville Pedigreed Seed Company in memory of George Rea Walker, Sr.

Winston Walker Memorial Scholarship Fund—awarded to students on the basis of financial need and merit.

Will C. Wansley Memorial Scholarship—established by family and friends to memorialize Will C. Wansley; awarded to students on the basis of academic achievement, leadership skills, and financial need; preference to Agricultural Economics, Agribusiness, or Agronomy students from the South Delta area.

Ernest Homer White Memorial Scholarship—established by Kathryn White Smith and William Robert Smith in memory of her father, Ernest Homer White; awarded to students from Scott County or surrounding counties.

DEPARTMENT of AGRICULTURAL and BIOLOGICAL ENGINEERING

Direct inquiries to Department of Agricultural and Biological Engineering, Box 9632, Mississippi State, MS 39762-9632.

Hugh M. Arant, Sr. Memorial Scholarship—established by family, friends and associates of Mr. Hugh M. Arant, Sr.; awarded to students majoring in Agricultural Engineering Technology and Business on the basis of leadership ability, financial need and merit. A GPA of 3.0 or higher is required.

Theo H. Dinkins, II Family Scholarship—established in memory of his father and brother, Claude Cameron Dinkins, Sr. (1916) and Claude Cameron Dinkins, Jr. (1956); awarded to a junior or senior undergraduate majoring in Agricultural Engineering Technology and Business. Based on merit and academic record with a GPA of 2.75 or above.

Kenneth B. Hood Scholarship in Cotton Gin Management and Technology—established by Kenneth Hood; awarded to students in the Gin Management and Technology emphasis of the Agricultural Engineering Technology and Business curriculum. It is awarded on the basis of leadership ability, financial need and interest in a career in cotton ginning to students with a GPA of 2.5 or higher.
Mississippi Section, American Society of Agricultural Engineers Scholarship—donated by members, American Society of Agricultural Engineers; awarded to any student majoring in Agricultural Engineering Technology and Business or Biological Engineering with an agricultural emphasis on the basis of financial need, merit, academic record, or any combination of these.

George B. Nutt Scholarship - donated by George B. Nutt; awarded to students majoring in Agricultural Engineering Technology and Business or Biological Engineering on the basis of merit, academic record, financial need, or any combination of these. A GPA of 3.0 or greater is required. Preference is given to Mississippi residents and those from Clarke County.

T. H. Scott Memorial Scholarship—donated by the family of T.H. And Mamye Scott; awarded to any student majoring in Biological Engineering or Agricultural Engineering Technology and Business on the basis of financial need, merit, academic record, or any combination of these. A GPA of 3.0 or higher is required.

Smith Tractor Company and M.R. Smith Memorial Scholarship—donated by Mrs. M. Ross Smith; awarded to any student majoring in Agricultural Engineering Technology and Business or Biological Engineering on the basis of financial need, merit, academic record, or any combination of these.

DEPARTMENT of AGRICULTURAL ECONOMICS

Direct inquiries to Department of Agricultural Economics, Box 5187, Mississippi State, MS 39762-5187.

Paul T. Blair Memorial Scholarship—established by friends and colleagues to honor Dr. Paul T. Blair; awarded to junior or senior level undergraduates majoring in Agricultural Economics with an interest in Cooperative Marketing, on the basis of both need and merit.

William Edwin Christian Endowed Scholarship in Agricultural Economics - established by family and friends of Mr. William Edwin Christian, Jr. (B.S., 1942), a former faculty member, to students in the Department of Agricultural Economics; based on academic achievement, character, leadership ability, and financial need.

Scott, a pioneer breeder of Santa Gertrudis cattle in Mississippi; awarded on the basis of financial need, merit, academic record or any combination of these. The recipient must be majoring in Animal Science.

DEPARTMENT of BIOCHEMISTRY and MOLECULAR BIOLOGY

Barrentine Endowed Scholarship in Biochemistry and Molecular Biology—established by the Barrentine family and the Department of Biochemistry and Molecular Biology in memory of Dr. Benjamin F. Barrentine, the first head of the Department, and Mrs. Melle Ward Barrentine; based on record of academic achievement and demonstrated leadership skills; priority will be given to transfer students.

DEPARTMENT of ENTOMOLOGY and PLANT PATHOLOGY

J. Frank Killebrew Memorial Graduate Student Scholarship—established by individuals honoring the late Dr. J. Frank Killebrew; awarded to graduate students majoring in plant pathology, nematology or pest management. Selection made by Mississippi Agricultural Consultants Association.

Mississippi Agricultural Consultants Association Scholarship—established in 1992 by the Association; awarded to a student majoring in Agricultural Pest Management. Applications and inquiries should be directed to: Marianna Hayes, Mississippi Agricultural Consultants Association, P.O. Box 38, Lexington, MS 39095; phone: 662-834-9938.

The following awards are presented each year during the Mississippi Entomological Association Meeting in early November. Direct inquiries to the Department of Entomology and Plant Pathology, Box 9775, Mississippi State, MS 39762.

Pat and Linda Harris Endowed Scholarships—established by individuals and companies honoring Dr. Joseph P. “Pat” Harris (B.S., 1962; M.S., 1964; Ph.D., 1971) and his wife Mrs. Linda Harris (B.S., 1978; M.Ed., 1983); awarded to undergraduate and graduate students enrolled in the majors of Entomology and Agricultural Pest Management; based on academic achievement, character, residence, and financial need.

Mississippi Entomological Association Scholarship—established in 1960 by the Association; awarded to a student working toward a degree in Biological Sciences with emphasis in Entomology (minimum of 6 hours) or Agricultural Pest Management. Available at all Mississippi State 4-year colleges.

H. C. Mitchell Entomological Memorial Scholarship—established in 1980 in memory of Dr. H. C. Mitchell by friends and colleagues; awarded to a student majoring in Entomology or Agricultural Pest Management at Mississippi State University.

Redd Pest Control Scholarship—established in the 1950’s by J. C. Redd, founder of Redd Pest Control Company; awarded to a student working toward a degree at Mississippi State University in Biological Science with emphasis in Entomology. Direct inquiries to Head, Department of Entomology and Plant Pathology, Box 9775, Mississippi State, MS 39762-9775.

Arlie and Ethel Wilson Entomological Endowed Scholarship Fund—established in 1993 by Dr. Arlie Wilson, Professor Emeritus, and his wife, Ethel Wilson; awarded to full-time undergraduate students majoring in Agricultural Pest Management (Entomology) at Mississippi State University.

DEPARTMENT of FOOD SCIENCE and TECHNOLOGY

Direct inquiries to Department of Food Science and Technology, Box 9805, Mississippi State, MS 39762-9805.

G. R. Ammerman Food Technology Scholarship—established by the Food Science Club and friends of Gale Ammerman; awarded to undergraduate Food Technology students on the basis of academics, need and citizenship.

Joe and Leota Cardwell Scholarship Fund—donated by Dr. and Mrs. Joe Cardwell for Food Science and Technology students demonstrating academic achievement, leadership ability and financial need.

Lorena White Cobb and A. B. Cobb Endowed Scholarship—established by relatives in memory of Mrs. Lorena White Cobb and Mr. A. B. Cobb by a bequest from the estate of Mrs. Cobb; awarded to students in the Department of Food Science and Technology; based on academic achievement, character, leadership ability, and financial need.

Food Industry Endowed Scholarship—established by members of the food industry; awarded to students in Food Science and Technology major; based on academic achievement, character, and leadership ability.

James E. Garrison Dairy Foods Scholarship—donated by James E. Garrison to a Food Science and Technology major with an interest in dairy foods processing.

James E. Garrison Scholarship—donated by James E. Garrison; awarded to a Food Science and Technology major.

James O. Hearnsberger Scholarship Fund—established by family, friends and the Tennessee Chapter Brotherhood of the Knights of the Vine for Food Science and Technology students demonstrating academic achievement and leadership ability and financial need. Recipient must be an active member of the Food Science Club.

L.Q. Patton Memorial Scholarship—established by Mr. and Mrs. Donald Patton for undergraduates majoring in Food Science and Technology who have an expressed interest in working with the Dairy Products area of the Food Industry.

SCHOOL of HUMAN SCIENCES

Direct inquiries to School of Human Sciences, Box 9745, Mississippi State, MS 39762-9745.

Bedenbaugh Scholarship Fund—established by James A. Bedenbaugh for scholarships in Human Sciences in honor of Parkie Childress Bedenbaugh.

Burris-Key Endowed Scholarship—established by Mrs. Ouida Burris. Mrs. Burris was a Home Demonstration Agent in Lowndes County and Clothing Specialist with the Mississippi Cooperative Extension Service between 1927 and 1947. The scholarship is named for a longtime friend and colleague, Mrs. Ida Morgan Key. The scholarship is awarded on the basis of scholarship and financial need.

Cardwell Scholarship—donated by Dr. and Mrs. Joe Cardwell; awarded to a Human Sciences major on the basis of leadership activities and scholastic record. Preference is given to a student who is in food, nutrition, and dietetics.

Dorothy Dickins Memorial Scholarship—established by friends in memory of Miss Dickins; awarded to several upperclass Human Sciences majors on the basis of scholarship and financial need.

Active participation in the PGM Club and other campus and community activities are considered.

PGA Minority Scholarship—awarded to a Mississippi resident majoring in Professional Golf Management. Minimum requirements are: MSU cumulative GPA of 2.50, eight months of completed coop with grade of B or better, and no PGM probations. Active participation in the PGM Club and other campus and community activities are considered.

PGA Minority Scholarship—awarded to a Louisiana resident majoring in Professional Golf Management. Minimum requirements are: MSU cumulative GPA of 2.50, eight months of completed coop with grade of B or better, and no PGM probations. Active participation in the PGM Club and other campus and community activities are considered.

PGA Minority Scholarship—awarded to a student residing in the Jackson area.

PGA Minority Scholarship—awarded to a junior residing in the Leflore and Washington counties area.

PGA Minority Scholarship—awarded to a junior or senior pre-medical student or economics majors with a minimum QP of 2.5. Need will be considered.

PGA Minority Scholarship—awarded to a full-time doctoral student in Curriculum and Instruction with an emphasis in early childhood education. Minimum 3.5 GPA on a 4.0 system.

COLLEGE of EDUCATION SCHOLARSHIPS and MEMORIALS
Clara Adele Self Andrews Music Scholarship—established in her memory by her son, Dr. Lester Andrews. Applicants should be full-time students in their junior year who have earned at least 60 credit hours. Applicants should demonstrate musical and academic ability and promise.

Jack L. Beall Scholarship—awarded by Mr. Jack L. Beall, a 1953 College of Education graduate. This award is available to students majoring in a Math/Science field who plan to remain in Mississippi and teach for a minimum of two years after graduation. The award is based on a minimum GPA of 3.0 and demonstrated academic achievement.

President George Bush Scholarship—awarded by MSU in honor of President Bush’s commitment to education: to be awarded to an outstanding senior education major.

Barry F. Box Memorial Scholarship—awarded to a full-time student in Curriculum and Instruction with an emphasis in early childhood education. Minimum 3.5 GPA on a 4.0 system.
Choral Ensemble Annual Scholarship - established by Walter and Ellen Newsom to be given annually to a student who is a resident of the state of Mississippi. Awarded on the basis of academic achievement (a minimum GPA of 3.0) and participation in the Choral Ensemble.

Durward Dunn Physical Education Scholarship - donated by Paul Dunn in memory of his father Mr. Durward Dunn. Awarded to student majoring in Physical Education.

Education Services Foundation Annual Scholarship - established by the Education Services Foundation to be given annually to a graduate student majoring in School Counselor Education. Awarded on the basis of academic achievement (a minimum GPA of 3.5).

Entergy Mississippi’s Excellence in Education Scholarship - established by Entergy Mississippi, Inc., to be given annually to a full-time junior or senior majoring in General Science Education or Math Education. Awarded on the basis of academic achievement (a minimum GPA of 3.0). The recipient must be a resident of the state of Mississippi with preference given to students from one of the counties serviced by Entergy Mississippi, Inc. and who have not received scholarship or financial aid that would duplicate this scholarship.

Lois C. Kaufman Endowment for Music Education- established in memory of Dr. Harold F. Kaufman. Applicants should be full time Music Education majors, rising seniors, with demonstrated musical and academic achievement.

Herbert M. Handley Scholarship - donated by family, faculty and friends in memory of former Distinguished Professor Herbert M. Handley.

Leveck Freshman Piano Scholarship—donated by Mr. and Mrs. Henry Leveck; awarded to the outstanding freshman piano major on the basis of competitive performance and first-semester grade-point average.

Anne Laurie Lyle Piano Scholarship—donated by the Starkville Nocturne Music Club in memory of Mrs. Annie Laurie Lyle. Charter music club member and prominent Starkville piano teacher; awarded annually to an undergraduate piano major on the basis of the most progress in piano study and performance.

Ellen Ricci Special Education Scholarship—donated by Mr. and Mrs. Armando Ricci in support of a student who is preparing to become a special education teacher. The Scholarship is awarded on the basis of merit.

Francis N. Matthews Memorial Scholarship—donated by Mrs. Louise M. Davis, in memory of Francis N. Matthews; awarded to students with desire to enter the teaching profession in Technology Education, on the basis of Scholarship and financial need.

Dewey and Marie Malouf Scholarship – donated by Martha and Watts Ueltschey and George and Kathy Malouf in honor of their parents Dewey and Marie Malouf. Awarded to students majoring in education in Leflore County.

McClendon Scholarship-Special Education—donated by Katherine McClendon Holliman in honor of her parents, Mr. and Mrs. H. T. McClendon; awarded on the basis of scholastic ability and need, by a Special Education Scholarship Committee.

Merchants and Farmer's Bank Endowed Scholarship—income from this endowment Scholarship provided by Merchants and Farmers Bank is to be awarded for the fall and spring semesters of each school year on the basis of academic performance, need and demonstrated leadership potential. The Scholarship is to be available to undergraduate majors only. The recipient will be from counties in Mississippi which have Merchants and Farmers banks, who have a desire to work in Mississippi following graduation. A student who is the recipient one year is eligible for consideration in any other year. Direct inquiries on the above scholarships to the Assistant to the Dean for Student Services, Box 9710, Mississippi State, MS 39762.

Daniel R. Merritt Annual Scholarship - established by Patsy Merritt in memory of Daniel R. Merritt, a lifetime educator and a 1961 College of Education graduate; to be awarded to a full-time undergraduate student majoring in Secondary Education. Minimum 2.5 GPA with financial need.

Hal and Joyce Polk Music Education Scholarship - established by Hal and Joyce Polk to be given annually to a full-time student in the Department of Music Education. Awarded on the basis of academic achievement (a minimum GPA of 3.0) and musical ability (as evidence by an audition).

Cheryl Prewitt Christian Voice and Music Scholarship—donated by Mr. and Mrs. James W. Tennyson and Bill, and friends, in honor of Mr. and Mrs. John Tennyson, grandparents of Cheryl Prewitt, Miss America 1980; three scholarships, given annually to an entering freshman, a transfer student, and a resident student majoring in music education. Prior to an entering freshman, a transfer student, and a resident student majoring in music education. Awarded on the basis of character references and vocal competition.

Rehabilitation, Inc. Endowed and Annual Scholarship - established by Sam Cox, Pete Mills, and Lance Robinson to help graduate students who are majoring in vocational rehabilitation or similar majors in the counselor education department. Awarded on the basis of academic achievement (maintaining a GPA of 3.0) and financial need.

Lucinda H. Rose Scholarship—donated by Dr. Vincent McGrath in memory of his wife and faculty member, Dr. Lucinda H. Rose. Awarded to eligible seniors majoring in elementary education.

Royer/Scarborough Brass Scholarship - established by Michael and Karen Brown to be given annually to a full-time returning music education major (incomning freshmen are not eligible). Awarded to an outstanding brass performer on the basis of academic achievement (maintaining a GPA of 3.0) and financial need.

Harold Smith-Baldwin Piano & Organ Company Fund—donated by Baldwin Piano & Organ Company in honor of Harold Smith, retiring President of Baldwin Piano & Organ Company; awarded to students enrolled in Industrial Technology, on the basis of Scholarship and financial need.

Wilburn P. Sudduth Physical Education Scholarship—donated by Etoyle Sudduth and family in memory of Mr. Wilburn P. Sudduth. Awarded to students majoring in the Teaching/Coaching concentration in Physical Education.

Katherine Gardner Thomas Memorial Piano Scholarship—donated by Mr. Garnett J. Thomas in memory of his wife; two scholarships awarded annually to freshman, sophomore, or junior piano majors, and one or two scholarships awarded to entering freshman or transfer students, all on competitive performance and academic achievement. When an organ program becomes available at Mississippi State University, upperclass students enrolled in this program will be eligible for the scholarships.

Cletora Tullos Piano Scholarship—donated by Mr. George Tullos in memory of his mother; awarded annually to an incoming freshman piano student majoring in music. Awarded on the basis of character and academic achievement (as evidenced by an audition), Scholarship, and need. Direct inquiries on the above scholarships to the Assistant to the Dean for Student Services, Box 9710, Mississippi State, MS 39762.

Henry Wamsley Famous 40 Band Scholarship - donated anonymously to honor Mr. Henry E. Wamsley and the Famous 40 Band.

Henry Wamsley Band Scholarship - given in honor of Mr. Henry E. Wamsley to a member of the famous Maroon Band. Direct inquiries on the above scholarships to the Director of MSU Bands, Department of Music Education, Box 9734, Mississippi State, MS 39762.

COLLEGE OF ENGINEERING SCHOLARSHIPS and MEMORIALS

Most freshman and community college scholarships require that you submit a written application to the Department of Financial Aid and Scholarships and are based on potential as indicated by prior school performance and/or ACT/SAT scores. On the other hand, most College of Engineering upperclass and departmental scholarships are awarded to students based on performance in engineering curriculum.

Outstanding entering freshman are eligible to apply for the Engineering and Computer Science Excellence Scholarships. The Engineering scholarships are limited to freshman who enroll in Chemical Engineering or Mechanical Engineering.

Mississippi State University upperclassmen as well as students transferring to the College of Engineering from schools other than community colleges are required to direct inquiries regarding College of Engineering Scholarship opportunities to the Dean of Engineering, Office of Undergraduate Studies, Box 9544, Mississippi State, MS 39762.

ACCENTURE Scholarship- guidelines in progress
ADTRAN Scholarship- awarded to qualified students in Electrical, Computer or Mechanical engineering.
J. P. Applewhite Scholarship—awarded to qualified engineering students.
Babcock & Wilcox Scholarship- Awarded to qualified students majoring in Mechanical Engineering.

J.W. Bagley Scholarship - established to enable talented and needy students to be able to pursue careers in engineering.

Robert & Fran Barker Scholarship - awarded to qualified engineering students.

Barrier Engineering Scholarship - awarded to engineering students who have demonstrated outstanding academic achievement.

Fred & Sara Jean Burke Engineering Scholarship - guidelines in progress.

John H. Caldwell Scholarship - established to enable talented and needy students to be able to pursue careers in engineering.

Sydney L. Cate, Jr. Engineering Scholarship - established to enable talented and needy students to be able to pursue a career in engineering. Preference will be given to students of single parent families who reside in Tate or DeSoto counties in Mississippi.

Chevron College of Engineering Scholarship - established to award scholarships to qualified engineering students.

Earnest & Laura Deavenport Scholarship - awarded to qualified freshman engineering students.

DOW Chemical Scholarship - awarded to qualified engineering students.

Eastman Scholars Scholarship - for upperclass minority students in Chemical, Industrial, Electrical, and Mechanical Engineering.

Alfred & Susan Eaton Scholarship - established to award scholarships to qualified upperclass engineering students, with preference given to students majoring in Aerospace Engineering.

Engineering Memorial Scholarship — established through the efforts of the Mississippi Alpha Chapter of the Tau Beta Pi in memory of the late Dean Lucius Lamar Patterson of the School of Engineering.

Ergon/Diversified Technology Scholarship - awarded to qualified upperclass Chemical, Civil, Electrical, Industrial and Mechanical Engineering students.

Michael Evans Memorial Scholarship - Guidelines in progress.

H. G. Flanagan Scholarship Award in Engineering and in Science — donated by Dr. James L. Flanagan and Mr. Thomas M. Flanagan in honor of their father.

U. Edwin & Mary K. Garrison Scholarship - established for full-time Mississippi resident students enrolled in the College of Engineering who have demonstrated academic achievement with a minimum 3.0 grade point average and who have demonstrated financial need.

Ken Graves Memorial Scholarship - established in honor of Ken Graves of the MSU Class of ’77. Awarded to freshmen who plan to major in engineering with special emphasis on female and minority students.

A. S. Guerard Memorial Scholarship — donated by Mrs. A. S. Guerard; restricted for juniors or seniors in any engineering major.

Joseph M. Harvey Scholarship in Engineering — donated in honor of Joseph M. Harvey. Awarded to a junior or senior majoring in engineering, on the basis of achievement, leadership, and financial need.

Hearin Foundation Scholarships — awarded to outstanding entering freshmen each year in any engineering major.

Hunter W. Henry, Jr. & James E. Henry Scholarship - awarded to two exceptionally qualified freshmen students. One student majoring in Chemical and one student majoring in Mechanical Engineering will be selected each year. Preference given to Mississippi students, children of MSU alumni or those in need.

John P. Hosmer Engineering Scholarship - established to provide scholarships for Mississippi Resident students who are enrolled in the College of Engineering and who have demonstrated outstanding academic achievement.

Wallace J. Hosmer Engineering Scholarship - awarded to qualified freshmen engineering students residing in Alabama and Mississippi.

Otey & Edna Jackson Scholarship - established to provide scholarships to juniors and seniors based on academic record.

Kerr McGee Scholarship - awarded to qualified engineering students.

Sam H. & Sandra K. Lee Scholarship - awarded to a qualified freshman engineering student. Preferably a student from Forest or Pearl River County.

Donald E. Meiners/Entergy Scholarship - established to provide scholarships to qualified engineering students.

Mississippi Manufacturer’s Association Scholarship - awarded to qualified Mississippi resident students majoring in Civil Engineering.

Mississippi Power Company Scholarship - established to award scholarships to qualified engineering students.

B.C. and Patricia Moore Scholarship - guidelines being established.

Frank T., Sr., and Gaines W. Moore Scholarships - established by the Moore family in memory of Frank T. Moore, Sr. ’33, and in honor of Gaines W. Moore, ’34. Awarded to a junior or senior in any engineering major on the basis of academic record with need also being a consideration.

MOTIVA Scholarship - established to provide scholarships to students enrolled in Chemical, Electrical, or Mechanical Engineering, or Computer Science on the basis of academic or other achievements and at the same time have a recognizable need for financial assistance.

Alton C. & Roberta R. Morris Scholarship - established to enable students with great financial need to be able to pursue careers in engineering.

Frank E. Munn Memorial Scholarship - donated by Mrs. Frank E. Munn. Awarded to a junior or senior in Civil, Electrical, or Mechanical Engineering on the basis of merit and financial need.

H. P. Neal Memorial Scholarship - awarded to qualified engineering students.

J. Robert Newsom Memorial — donated by Newsom Brothers of Columbus, Mississippi. The recipient must be a Mississippi resident.

John E. Pearson Memorial Engineering Scholarship — donated by John E. Pearson; restricted to a senior.

William Peter Hansen, Jr. Memorial Scholarship - awarded to qualified engineering students.

Petroleum Engineering Alumni Scholarship — established through the efforts of Petroleum Engineering alumni for full-time engineering students having demonstrated academic achievement, leadership ability and financial need. Disabled students will be given special consideration.

Crymes Pittman Scholarship - awarded to a qualified freshman engineering student. Preferably a student from Smith County.

Rockwell International Scholarship - established as a Scholarship award to female or minority students enrolled in Aerospace, Electrical or Mechanical Engineering.

Ralph E. Powe Scholarship - established in 1997 to provide assistance to a full-time entering freshman enrolling in the College of Engineering. (Preference is given to students in Mechanical Engineering).

William Douglass Rooker Memorial Scholarship - established as a Scholarship award to full-time engineering students at Mississippi State who have completed the freshman year. Candidates must be from Mississippi with first preference given to students from Pike County.

Bobby Shackoul-Burlington Resources Scholarship - awarded to qualified engineering students.

Clyde Q. & Katherine B. Sheely Scholarship — established to award assistance to students who have completed 30 credit hours. Available in alternate years to a student in engineering.

Shields Memorial Scholarships - awarded to qualified engineering students.

Simrall Scholarship in Engineering — donated by The Mississippi Engineering Society and the MSU Engineering Alumni Association in honor of Dean Emeritus Harry C. Simrall.
SECME University Scholarship (Southeastern Consortium for Minorities in Engineering) - established to provide Scholarship assistance to a Mississippi student who meets SECME eligibility requirements and is admitted to the College of Engineering.

ST Environmental Services Scholarship - established to award Scholarship assistance to qualified Engineering students.

Jim Henry Swain Scholarship - awarded to a qualified Civil Engineering student.

TVA Engineering Scholarship - established in 1999 to provide assistance to full-time engineering students. Candidates must be from a TVA serviced region.

Amelia Halbert Thaxton Scholarship - awarded to Mississippi residents, with preference given to juniors and seniors.

3M Scholarship - established to provide scholarships for students studying in the fields of Chemical, Electrical, or Mechanical Engineering and who are U.S. citizens in the North Alabama area.

Ziff Energy/Hank Kelly Scholarship - awarded to qualified students majoring in Mechanical or Electrical Engineering with an interest in pursuing a career in the energy field.

AEROSPACE ENGINEERING
Inquiries should be directed to the Department of Aerospace Engineering, Box A, Mississippi State, MS 39762. Scholarships include:

Charles B. Cliett Scholarship - awarded to freshman based on academic record.

Charles P. Downer, Jr. Memorial Scholarships - awarded to juniors and seniors, based on academic record.

Henry W. Shurlds, Jr. Scholarship - awarded to juniors on the basis of merit and financial need.

AGRICULTURAL and BIOLOGICAL ENGINEERING
Inquiries should be directed to the Department of Agricultural and Biological Engineering, Box 9632, Mississippi State, MS 39762. Scholarships include:

ASAE Scholarship (McWhorter/Williamson)

T. H. Scott Scholarship

Marvin Ross Smith Scholarship

CHEMICAL ENGINEERING
Inquiries should be directed to the Department of Chemical Engineering, Swalm Building, Box 9595, Mississippi State, MS 39762-9595. Scholarships have been made available through the generosity of the following individuals:

Dave C. Swalm

David and Jean Bradford

David Purvis

E. Clarence Oden (for entering freshmen only)

In addition, one or more outstanding senior students may be awarded the George R. Lightsey Memorial Scholarship for outstanding professional leadership and academic achievement.

All Scholarship awards are made by the faculty of the Dave C. Swalm School Chemical Engineering in accordance with existing policies of the university.

CIVIL ENGINEERING
Inquiries should be directed to the Department of Civil Engineering, Box 9546, Mississippi State, MS 39762. Scholarship awards are restricted to junior and senior level students and are based on class standing. All students are considered for scholarships at the conclusion of the academic year in May. Students must have been enrolled in the department for one year to be considered for an award. Scholarships include:

Michael J. Baker, Jr. Scholarship

Carolyn and G. B. “Red” Beard Scholarship

Josephine Kellis Bounds Memorial Scholarship

Webb M. Bruce Scholarship

Chevron Oil Company Scholarship

Choctaw, Inc. Scholarship

Cook, Coggin, Engineers, Inc. Scholarship

John W. Duff Endowed Scholarship

Helen Joe Memorial Scholarship

William M Parker Memorial Scholarship

C. R. Patton Scholarship

Howard K. Williford Memorial Scholarship

Robert H. Wood Scholarship

Worthington Construction Company Scholarships

COMPUTER SCIENCE
Inquiries should be directed to the Department of Computer Science, Box 9637, Mississippi State, MS 39762. Scholarships include:

Cellular South Scholarship - awarded to qualified Mississippi residents.

ELECTRICAL and COMPUTER ENGINEERING
Inquiries should be directed to the Department of Electrical and Computer Engineering, Box 9571, Mississippi State, MS 39762. Scholarships include:

Electric Power Association Scholarship

Ollie Hughes Graduate Fellowship

Lucius Lamar Patterson Memorial Scholarship in Electrical Engineering

E. Grady Perkins Memorial Scholarship

Robert Luckett Shuler Scholarship

A.T. Snider Memorial Scholarship
SCHOLARSHIPS, MEMORIALS, and LOANS

INDUSTRIAL ENGINEERING
Inquiries should be directed to the Department of Industrial Engineering, Box 9542, Mississippi State, MS 39762. Scholarships include:

- Durward B. Dunn, Jr. Scholarship
- George Crow Dunn Scholarship
- L.E. Gibens Family Scholarship
- MSU I.E. Alumni Eastman Chemical Company Scholarship
- Jesse H. Oswick Industrial Engineering Scholarship

MECHANICAL ENGINEERING
Inquiries should be directed to the Department of Mechanical Engineering, Drawer ME, Mississippi State, MS 39762. Scholarships include:

- Litton Industries Scholarship
- Richard Eron Green Memorial Scholarship—awarded to juniors or seniors
- Holmes-Neal Mechanical Engineering Scholarship

COLLEGE OF FOREST RESOURCES SCHOLARSHIPS and MEMORIALS
(Inquiries should be directed to the College of Forest Resources, Box 9680, Mississippi State, MS 39762, unless otherwise noted.)

- The Polly Anderson Newsom Memorial Scholarship—established in memory of Polly Anderson Newsom by her children, Fred, Polly, Petty and David, her husband Roy, and many friends. Students from Amite and Pike County are given priority. Priority is also given to students in the Wildlife and Fisheries Department. This scholarship supports exceptional wildlife and fisheries professionals who demonstrate high academic achievement, are active in student wildlife and fisheries organizations, and have demonstrated leadership ability in the field.

- The Bynum L. Meeks Endowed Scholarship—funded by the department of Forestry or one of the following options with the Department of Forest Products: Wood Industry Management or Wood Material Science. Eligible students must have completed the junior or senior year of study, enrolled in the forestry major, and demonstrate academic achievement.

- The Colonel Kenneth (K.D.) Johnson and Catherine B. Johnson Endowed Scholarship Fund—funded annually by International Paper Company; awarded to an African-American or a Native American majoring in forestry.

- The David M. Moehring Memorial Award—established in memory of David M. Moehring, Professor of Forestry, it is awarded to the most outstanding graduate student in Forestry each year.

- The Ernest A. Gluesing Memorial Award—established in memory of Ernest A. Gluesing, Associate Professor of Wildlife, it is awarded to the most outstanding graduate student in Wildlife and Fisheries each year.

- The Warrenton and Elsie Hood Endowed Scholarship in Forest Resources—funded by interest from a gift donated by Warren and Elsie Hood. Candidates must be full-time students at Mississippi State University enrolled in a major of the College of Forest Resources who have demonstrated academic achievement, leadership ability and financial need.

- The International Paper Company Annual Minority Scholarship—funded annually by International Paper Company; awarded to an African-American or a Native American majoring in forestry.

- The Robert Lee “Mr. Bob” Carlton Memorial Endowed Scholarship—established in memory of Howard McDuffie. The scholarship is awarded to a student in the College of Forest Resources, while maintaining a high level of academic achievement.

- The Warren and Elsie Hood Endowed Scholarship in Forest Resources—funded by interest from a gift donated by Warren and Elsie Hood. Candidates must be full-time students at Mississippi State University enrolled in a major of the College of Forest Resources who have demonstrated academic achievement, leadership ability and financial need.

- The International Paper Company Annual Minority Scholarship—funded annually by International Paper Company; awarded to an African-American or a Native American majoring in forestry.

- The Colonel Kenneth (K.D.) Johnson and Catherine B. Johnson Endowed Scholarship Fund—funded by interest from a gift donated by Colonel Kenneth (K.D.) Johnson and Catherine B. Johnson, this scholarship is awarded to a student in the Forestry Major who has demonstrated acceptable academic achievement and shows promise of an outstanding career in the forestry profession. Applicants with demonstrated financial need will be considered over other qualified students even though their grade point average might be below other applicants.

- The Susan Jordan Endowed Scholarship—established by family and friends in memory of Susan Jordan for her dedication and long service to the students in the College of Forest Resources. This scholarship is awarded to students enrolled in the forestry major who demonstrate involvement and leadership in student organizations within the College of Forest Resources, while maintaining a high level of academic achievement.

- The Howard McDuffie Memorial Endowed Scholarship—established in memory of Howard McDuffie. The scholarship is awarded to a student majoring in Wildlife and Fisheries Science. Candidates must be in good standing. Preference is given to students who choose electives in water quality, resources, and flood control.

- The Bynum L. Meeks Endowed Scholarship—established through generous contributions from family, friends, and professional associates in memory of Bynum L. Meeks. Candidates must be full-time students enrolled in the College of Forest Resources in the Forest Management Option within the Department of Forest Science, and one of the following options with the Department of Forest Resources: Wood Industry Management or Wood Material Science. Eligible students must have completed the junior or senior year of study, and be a resident from one of the following counties: Adams, Amite, Claiborne, Copiah, Franklin, Hinds, Jefferson, Lawrence, Lincoln, Madison, Pike, Walthall, Warren and Wilkinson.

- The Mississippi Lumber Manufacturers’ Association (MLMA) John L. Mabry Memorial Annual Scholarships—established in memory of John L. Mabry. These scholarships are awarded to one forestry management major and one Forestry Products major with an emphasis on the forest products industry each year. Candidates must be full-time students, have demonstrated academic achievement, be of good moral character and have demonstrated leadership ability and financial need.

- The Mississippi Wildlife Federation Scholarship—awarded to a graduate student in the Department of Wildlife and Fisheries on the basis of academic achievement, research proposal, and financial need.

- The David M. Moehring Memorial Award—established in memory of David M. Moehring, Professor of Forestry, it is awarded to the most outstanding graduate student in Forestry each year.
The Davis and Ann Mortensen Endowed Scholarship in Forest Resources—established in December of 1999 by a generous contribution from Mr. and Mrs Davis K. Mortensen. Candidates must have a composite ACT score of 26, have records of academic achievement and demonstrated leadership skills.

David H. Nabi Memorial Award—established in memory of David Nabi, who was killed while a graduate student in Wildlife. The award honors graduate students in the Department of Wildlife and Fisheries for outstanding achievement and contributions to their fellow graduate students as exemplified by Mr. Nabi.

The Kevin Nolan Summer Field Session (Summer Camp) Annual Scholarship—established by Kevin Nolan to assist a full-time student majoring in Forestry who must attend summer camp. Candidates must have demonstrated academic achievement, show promise in an outstanding career in Forestry, and have demonstrated financial need.

The Anne and Terry Ozier Endowed Scholarship—established by contributions from the Mississippi Forestry Association and the Ozier Family. This scholarship, in memory of Anne Ozier and in honor of Dr. Terry Ozier, was established to recognize their commitment to forestry in the state of Mississippi. Candidates must be full-time students in their sophomore year, enrolled in the Department of Forestry, and demonstrate academic achievement, leadership ability, and financial need.

Roy L. Pugh Memorial Scholarship—supported by income from an endowment from Mr. and Mrs. Eugene R. Andrzejewski. Awarded to a student majoring in forestry.

The Three Rivers Chapter of Quail Unlimited Annual Scholarship—established to support students who through education hope to advance and protect the tradition and sport of quail hunting. Candidates must be enrolled in the Wildlife and Fisheries major in any year of study and resident of LeFlore, Caroll, Grenada, Montgomery, or Holmes County. In the event a qualified student in the wildlife and fisheries major is not available, a forestry major with a concentration in wildlife management may be considered.

The Ham Sanders Forestry Scholarship—sponsored by Mrs. Ham Sanders in honor of her husband. The award is based on need, character, and academic achievement or any combination of these. Preference is given to students studying Wood Science and Technology.

The Mark A. Schmoll Memorial Endowed Scholarship—established by family and friends in memory of Mark A. Schmoll, for his passion for wildlife and dedication to the wildlife profession, who died in a drowning accident while an undergraduate student in Wildlife and Fisheries. Candidates must be full-time students in wildlife science/management who show promise of outstanding career in the wildlife profession.

Leo W. Seal Memorial Forestry Scholarship—In memory of Leo W. Seal, the Hancock Bank annually donates a Scholarship for a student residing in Hancock, Harrison, Pearl River, or Stone County, Mississippi. The award is to a sophomore, junior or senior in the College of Forest Resources. Academic achievement, financial need, and personal character are factors considered in the selecting of recipients.

Sharp Academic Scholarship—established through an endowment by the Kate Sharp family of Tishomingo County. Entering freshman with a composite ACT score of at least 27 or a minimum combined SAT score of 1310 are invited to apply for these scholarships. Awarded are up to $12,000 for a four-year program of study. The scholarships are limited to students enrolled in the College of Forest Resources.

The Ike Shoemake Memorial Scholarship—funded by funds from family and friends of Mr. Hilton H. “Ike” Shoemake. Awarded to a junior or senior student in the Forestry major with wildlife management option or in the Fisheries option.

The South Mississippi Forest Products Annual Scholarship—established by the company owners, Skip and Julie McCollough of Hattiesburg, Mississippi. Candidates for the South Mississippi Forest Products Annual Scholarship must be in their junior or senior year, demonstrate acceptable academic achievement and show promise of an outstanding career in Forestry, Wildlife, and Fisheries, or Forest Products. Applicants who demonstrate financial need will be considered over other qualified students though their grade point average may be below other applicants.

The John W. Starr, Sr. and Caroline B. Starr Memorial Scholarship in Forest Management—established in memory of John W. and Caroline B. Starr. This scholarship is awarded to a junior or senior majoring in Forest Management, with a concentration in wildlife management, who shows promise of an outstanding career in forestry.

The STIHL Inc./John Paul Pritchett, Sr. Memorial Annual Scholarship Fund—established by STIHL, Inc. in memory of John Paul Pritchett, Sr., who died in the line of duty. Candidates must be a full-time student enrolled in the College of Forest Resources with a major in the Department of Forestry, Forest Products, or Wildlife and Fisheries. Also must have demonstrated academic achievement, leadership abilities, and be of good moral character.

The Tenneco Packaging Company Forestry Scholarship—supported by income from a gift of stock from the Tenneco Packaging Company; awarded to a student enrolled in Forestry. Selection criteria include academic achievements and personal characteristics which indicate promise of success in the profession of forestry.

J. S. Therrell Scholarship in Forest Resources—supported by income from funds donated by J. S. Therrell; awarded to a student in the College of Forest Resources on the basis of potential for leadership and academic excellence, with consideration given to potential to reflect favorably on the University in his or her professional career.

The Frank Troskey Annual Scholarship in Forestry—established by Philip A. Troskey and his wife Elizabeth in honor of his father Frank Troskey. Candidates must be full-time students in their sophomore, junior, or senior year, be enrolled in the forestry major, and demonstrate acceptable academic achievement, and show promise of an outstanding career in forestry.

The John M. Vanderford Memorial Assistantships—These assistantships are supported by the income from a fund established by friends and associates of John Vanderford, who was a forestry graduate. Selection is based on academic achievements and longer term professional interests. The primary aim of the assistantships is to help forestry students who wish to develop skills in the communications/public relations aspects of forestry.

Hugo Wahlstab Scholarship in College of Forest Resources—established in memory of Hugo Wahlstab. Candidates must be full-time students enrolled in the College of Forest Resources in the Department of Forestry. Applicants must have demonstrated academic achievement and leadership ability, and must be of good moral character.

The Washington County Conservation League Scholarship—funded by the Washington County Conservation League of Greenville, Mississippi; awarded to an outstanding junior or senior majoring in forestry with a wildlife minor or in fishery management. Selection criteria include academic standing, student citizenship, professional promise, and financial need.

Wildlife and Fisheries Scholarship—awarded to undergraduates or graduate student who is majoring in Wildlife Management, Marine Resources Management, and/or related degrees in the College of Forest Resources.

Wood Component Manufacturers Association Annual Scholarship—established with a gift donated by the Wood Component Manufacturers Association to support deserving students in the College of Forest Resources with strong preference given to a student who plans a career in secondary wood products manufacturing management. Candidates must be a full-time student in good standing with a GPA of 2.8 or better.

COLLEGE OF VETERINARY MEDICINE SCHOLARSHIPS AND MEMORIALS

The American Kennel Club Scholarships—Each College of Veterinary Medicine in the U.S. can submit up to four (4) candidate applications. Criteria for awarding scholarships can include: financial need; academic achievement and potential; and perceived or demonstrated interests in canine biology and/or purebred dogs.

The Arkansas Veterinary Medical Foundation Scholarship—An applicant must be an Arkansas high school graduate; be a current freshman, sophomore, or junior student at MSU CVM; and have an overall 2.5 GPA or better (based on a 4.0 scale).

The Charles E. and Viola G. Bardsley Scholarship—Five scholarships are awarded, one to each of the following: The entering class, the freshman class, the sophomore class, the junior class, and the senior class. Selection of incoming freshmen will be based upon Applicant Admissions profile score compiled during admissions process. Selection of freshmen, sophomore, and junior students will be based on GPA for the current year, faculty/peer evaluations, class leadership and level of professionalism. A graduating senior will be selected based upon overall GPA for four years of professional program.
The Bedenbaugh Scholarship in Veterinary Medicine - An applicant must meet the following criteria: be a student in good standing at the MSU-CVM; have a minimum GPA of 3.00/4.00 in his/her current program; and have exhibited leadership skills during his/her tenure as veterinary medical (or pre-vet, where applicable) student. Financial need may be used as selection criterion.

The James D. and Kay B. Bryan Scholarship - An applicant must have declared a career interest in food animal medicine; have met and maintained above-average scholarly requirements set forth by the MSU-CVM; be a current freshman, sophomore, or junior student or a senior student enrolled in the Production Medicine Masters program (PPM program students given preference); and be of good moral character and have demonstrated leadership ability and financial need. As many as five scholarships may be awarded each year.

The Morgan Freeman Endowment for Veterinary Medicine - An applicant must be a freshman, sophomore, or junior student at MSU-CVM; demonstrate effective leadership abilities, integrity, motivation, and potential as a representative of the veterinary medical profession. The scholarship will be awarded annually. As fund distribution permits, more than one scholarship may be awarded.

The Greenville Kennel Club Scholarship - An applicant must be a resident of the Arkansas/Mississippi Delta; have met and maintained above-average scholarly requirements set forth by the MSU-CVM; be of good moral character and have demonstrated leadership ability and financial need. As many as five scholarships may be awarded each year.

The Clarice C. Jackson Memorial Scholarship - An applicant must be a freshman, sophomore, or junior student at MSU-CVM; have demonstrated interest in small animal medicine; and have met and maintained above-average scholarly requirements set forth by the MSU-CVM.

The Bass Memorial Loan Fund - An applicant must be a member in good standing of the sophomore class of the MSU-CVM; have a 2.50/4.00 GPA and meet or exceed all established standards for entering the academic year for which the student is applying.

The Hugh M. Arant, Sr. Memorial Scholarship in Veterinary Medicine - An applicant must be a student in good standing at the MSU-CVM; have demonstrated leadership ability and financial need. This scholarship is awarded annually. As fund distribution permits, more than one scholarship may be awarded.

The James D. and Kay B. Bryan Scholarship - An applicant must meet the following criteria: be a student in good standing at the MSU-CVM; and be of good moral character and have demonstrated leadership ability and financial need. First priority is given to current freshmen, sophomore, junior, and senior students. Second priority is given to entering freshmen.

The Allan H. Hart/IDEXX Scholarship - An applicant must be a current junior student at the MSU-CVM; and have a strong understanding of clinical pathology and its practical application to clinical classes.

The Mississippi State Kennel Club Scholarship - An applicant must be enrolled in the MSU-CVM; and be in the freshman year of study. Priority is given to residents of Hinds, Madison, and Rankin counties of Mississippi.

The Mississippi State University College of Veterinary Medicine Alumni Society Scholarship - An applicant must be a student in good standing at the MSU-CVM; have demonstrated interest in small animal medicine; and have met and maintained above-average scholarly requirements set forth by the MSU-CVM.

The Mississippi Veterinary Medical Association Scholarship - An applicant must have completed the fall semester of his/her sophomore year (current junior); have five years of residence in Mississippi; be of good moral character and have demonstrated leadership ability, and financial need.

The Mk. Randolph, Jr. Memorial Scholarship - An applicant must be an upcoming senior (current junior) student at MSU-CVM; and have demonstrated a career interest in food animal medicine during his/her first three years.

The Salsbury Scholarships - These scholarships are awarded on a funds-availability basis to senior students of the MSU-CVM to assist in completion of their fourth year of studies.

The Greta Somerville Endowed Scholarship in Veterinary Medicine - An applicant must be a student in good standing at the MSU-CVM; and have demonstrated leadership ability and financial need. This scholarship is awarded annually. As fund distribution permits, more than one scholarship may be awarded.

The Hugh M. Arant, Sr. Memorial Scholarship in Veterinary Medicine - An applicant must be a member in good standing of the sophomore class of the MSU-CVM; have demonstrated exceptional overall academic performance, and make significant contributions to his/her class as well as to the MSU-CVM; and be of good moral character and have demonstrated leadership ability and financial need.

The Clio Annual Scholarship in Veterinary Medicine - An applicant must be a current junior at the MSU-CVM; have demonstrated interest in small animal medicine and have shown genuine compassion and empathy for clients and patients during small animal rotations; have demonstrated academic achievement; and have shown promise for an outstanding career in veterinary medicine. Financial need may be considered over and above academic qualifications.

The Professional Liability Insurance Trust SAVMA Scholarship - An applicant must be a current senior in good standing at MSU-CVM; be a member of SCAVMA (Student Chapter of the American Veterinary Medical Association); and have demonstrated exemplary client communication skills.

The American Veterinary Medical Foundation Scholarship - An applicant must be a current freshman, sophomore, or junior student at MSU-CVM; and have demonstrated significant financial need. Awarded as fund distribution permits. Funds are distributed cyclically among U.S. Colleges of Veterinary Medicine.

The Ralston Purina Scholarship - An applicant must be enrolled in the MSU-CVM; be in the freshman year of study. Prior distribution permits, more than one scholarship may be awarded.

The Salsbury Scholarships - These scholarships are awarded on a funds-availability basis to senior students of the MSU-CVM to assist in completion of their fourth year of studies.

The OFFICE of DISTINGUISHED SCHOLARSHIPS
Mississippi State University provides the Office of Distinguished Scholarships to identify and assist well-qualified undergraduate students in becoming candidates for national and international awards such as the Rhodes Scholarship, the Goldwater Scholarship, the Marshall Scholarship, and the Truman Scholarship. The unit also assists students who are nominated for recognition in programs such as those sponsored by USA TODAY and Rotary International.

Prospective students are urged to investigate the web sites of the major scholarship programs. Information on the opportunities:

- Bass Memorial Loan Fund—donated by Mr. and Mrs. I. H. Bass in memory of Isaac Houston Bass, Jr. and Levi Gaston Bass, their son and his brother.
- Maurice D. and Pearl S. Blumberg Memorial Student Loan Fund—donated by Maurice D. Blumberg for loans to deserving students.
- William Max Coggin Memorial Loan Fund—donated by Mrs. Grady Coggin in memory of her son, William M. Coggin.

EMERGENCY SHORT-TERM LOANS

Bass Memorial Loan Fund—donated by Mr. and Mrs. I. H. Bass in memory of Isaac Houston Bass, Jr. and Levi Gaston Bass, their son and his brother.

Maurice D. and Pearl S. Blumberg Memorial Student Loan Fund—donated by Maurice D. Blumberg for loans to deserving students.

William Max Coggin Memorial Loan Fund—donated by Mrs. Grady Coggin in memory of her son, William M. Coggin.
Jill Sadler Memorial Loan Fund—donated by friends and family in memory of Jill Sadler. The recipient must be a junior or senior in Home Economics. Loans must be repaid one year from date of graduation.

Sidney Tonner and Dorothy Osborn Memorial Loan Fund—donated to provide loans to deserving students.

John Sharp Williams Memorial Loan Fund—donated by Mississippi Chemical Corporation for loans to deserving students.

L. C. Winterton Memorial Loan Fund—donated by Mr. Lester C. Winterton for low interest loans to deserving students.

GRADUATE ASSISTANTSHIPS

Research, teaching and service assistantships are available on an annual or nine-month basis. Individual academic and nonacademic departments/units are responsible for award decisions, the duties and responsibilities, stipend rate and work schedule. The minimum stipend rate is $600.00 per month.

Applications for an assistantship appointment must be submitted to the college, department, school, support unit, etc., where a position is available. A generic “Application for Graduate Assistantship” is provided on the Web by Office of Graduate Studies. Location: http://www.msstate.edu/dept/grad/forms.htm; however, any work area has the option to require application submission on a form specific to that area. Departments are responsible for establishment of application deadlines and review procedures pertinent to the assigned work area.

Individuals interested in any other form of financial aid (grant, loan, or scholarship) should contact the Department of Student Financial Aid and Scholarships, Box AB, Mississippi State, MS 39762-5507. That office also has information available on the MSU Web - address: http://www.msstate.edu/dept/sfa/.

A Graduate Assistant Handbook containing more detail about requirements and procedures applicable to these awards is available in the Office of Graduate Studies, 116 Allen Hall. This handbook is available electronically, by accessing the following Web address: http://www.msstate.edu/dept/grad/publications.htm.

Required Course Load. Each student employed as a graduate assistant must maintain a full-time student status during enrollment periods throughout the employment duration.

Academic Performance. Students must demonstrate satisfactory progress in their specified program to retain an assistantship.

Matriculation Fee. When enrollment periods parallel an assistantship employment period a graduate assistant will receive a student account credit of approximately 71% of assessed tuition and required fees plus 100% of assessed nonresident tuition fee. Student account charges in excess of the applied tuition exemption are the student’s personal responsibility.

Graduate Research Assistantships. Graduate Research Assistants (GRAs) are employed by many of the University’s academic, research, and administrative offices. This is an excellent opportunity to learn new techniques and methods as well as expand knowledge by association with the research-oriented responsibilities.

Graduate Service Assistantships. Students who are employed to aid faculty and staff members with administration and operations within an office are classified as Graduate Service Assistants (GSAs). Many academic and nonacademic units offer these assignments with duties and work time variances depending on office needs.

Graduate Teaching Assistantships. Most academic areas have budgeted for teaching assistantships. Graduate Teaching Assistants (GTAs) normally serve in an instructional capacity and are selected on the basis of a student’s past teaching experience or academic promise. All first time teaching assistants are required to attend the Teaching Assistant Workshop that is held annually prior to the beginning of the Fall semester.

Teaching Assistant Workshop.

All first time graduate teaching assistants are required to attend the Teaching Assistant Workshop which is held annually prior to the beginning of the Fall semester. The Workshop consists of two (2) segments.

Segment one - Required of all teaching assistants. This segment focuses on the role of a classroom instructor. Presentations may include topics such as the role of a GTA, syllabus development, effective teaching techniques, understanding sexual harassment, the impact of cultural diversity, ethics in the classroom, assessing academic achievement, and academic support services.

Segment two - Required of all teaching assistants whose native language is not English. This segment focuses on communication skills, cultural adjustment, and University orientation and concludes with an English language proficiency test. The test consists of a five-minute student presentation to a panel of three judges. After each presentation, the judges engage the student in a dialog related to some aspect of their presentation in order to evaluate the students’ language proficiency.

Students who are not successful in the language proficiency examination are invited to attend a special semester long class at no cost to them. This class further assists the students with their language deficiencies as diagnosed in the fall workshop. At the end of the semester, the students are again tested on their language skills.

Failure to complete segment one will render a student, international or domestic, ineligible for a teaching assistantship. Students whose native language is not English must satisfactorily complete both segments to be eligible for classroom instruction.

Minority Assistance Program. Some special funds usually exist to assist individuals who represent groups traditionally under-represented in a field of graduate study. An individual who represents such a group may make inquiry to the Office of Graduate Studies, Box G, Mississippi State, MS 39762-5507.

X. CONDUCT and DISCIPLINE; TRAFFIC and PARKING

A. STUDENT CONDUCT

Two objectives of higher education are to develop self-reliance and to form desirable and acceptable habits of conduct among students.

Instead of designing numerous regulations to cover in detail matters of student conduct, Mississippi State University recognizes students as adults who are expected to obey the law, rules and regulations of the University, to take personal responsibility for their conduct, to respect the rights of others, and to have regard for the preservation of State and University property as well as the private property of others. Mississippi State University will not police the personal lives of students on or off campus or invade their privacy by spying or intrusive searches; however, students whose conduct threatens to cause disorder, public disturbances, danger to themselves and others, or property damage will be disciplined.

Instead of designing numerous regulations to cover in detail matters of student conduct, Mississippi State University recognizes students as adults who are expected to obey the law, rules and regulations of the University, to take personal responsibility for their conduct, to respect the rights of others, and to have regard for the preservation of State and University property as well as the private property of others. Mississippi State University will not police the personal lives of students on or off campus or invade their privacy by spying or intrusive searches; however, students whose conduct threatens to cause disorder, public disturbances, danger to themselves and others, or property damage will be disciplined.

A listing of acts of misconduct which are unacceptable and may require disciplinary action is provided online at http://www.msstate.edu/web/security.htm/ together with a detailed explanation of disciplinary processes for students in the University. Those apprehended and proven guilty of violating the law or rules and regulations of the University may receive a maximum penalty of expulsion from the University.

B. PARKING, VEHICLE REGISTRATION, AND TRAFFIC REGULATIONS

Possession and use of motor vehicles on the campus are controlled under regulations approved by the Board of Trustees of Institutions of Higher Learning. These regulations require that any person who regularly or occasionally operates or parks a motor vehicle on the campus and streets of the University must register the vehicle at the beginning of each school year or as soon as it is brought on the campus, and must display on it, as instructed, a numbered identifying decal or hangtag.
Since the incorporation of the foundation, alumni and friends have invested more than $275 million in Mississippi State through the foundation. In the past five years, more than $130 million of this money has been contributed. Also during the same period, the endowment has grown from $79 million to over $160 million.

The Mississippi State University Alumni Association was founded June 17, 1885. The mission of the Alumni Association is to generate support for Mississippi State University through the development and implementation of programs, activities and events for its alumni and friends.

The alumni of Mississippi State University have their permanent headquarters in the Hunter Henry Center on the campus. Housed there are over 125,000 address records of graduates and former students. In addition, the Alumni Center is used frequently by faculty, students and alumni for meetings, conferences and other events.

Some of the services rendered by the Association annually in the promotion of the University are: maintaining and updating biographic and demographic information of all alumni; mailing over 350,000 pieces of mail, including the Alumnius magazine and Mississippi State University Connection; planning and organizing numerous alumni meetings and special events; supporting various fund-raising programs for the University through the MSU Foundation’s Fund for Excellence Program; providing support for alumni chapter scholarship programs; supporting the University’s appropriation requests from the Mississippi Legislature; assisting in the recruitment of prospective students to Mississippi State University; including the Scholars’ Recognition Program; sponsoring the Alumni Delegates, student leaders preparing to be alumni leaders; partnering with the University’s Career Center to assist students and alumni with employment opportunities; supporting excellence in teaching, research, and service through the annual Faculty Recognition Program; and assisting in the annual Staff Appreciation Day.

Sixty-five alumni chapters are chartered in Mississippi and 21 in other states. In addition to a 44-member National Board of Directors and five standing committees, most chapters have officers, committees, and boards of directors. This totals more than 1,800 volunteer workers on all levels and provides for wide participation of former students and friends in the promotion of their alma mater each year.

For more information, visit the Association’s Home Page at www.MSUbulldogs.msstate.edu.

The Mississippi State University Foundation, Inc., has served as a nonprofit corporation offering a comprehensive program of giving opportunities for alumni and friends of Mississippi State University. The foundation’s purpose is fourfold:

- to provide the University a way to recruit and draw on the expertise of a network of dedicated volunteers who can assist in soliciting gifts from alumni and friends;
- to provide a mechanism to keep private gifts clearly separate from public funds and to provide flexibility in the use of private funds;
- to assist the University in the investment of endowed funds (the foundation has greater flexibility than the public university to seek the most favorable return on investments);
- to ensure that funds designated for a particular purpose are used in the manner intended by the donors, and to ensure that funds unrestricted by the donors as to their use are appropriately distributed.

Since the incorporation of the foundation, alumni and friends have invested more than $275 million in Mississippi State through the foundation. In the past five years, more than $130 million of this money has been contributed. Also during the same period, the endowment has grown from $79 million to over $160 million.

XII. NONDISCRIMINATION

Mississippi State University does not discriminate on the basis of race, color, religion, sex, national origin, age, disability, or veteran status.

The Affirmative Action/Equal Opportunity Officer, 221 McArthur Hall, Box 6199, Mississippi State, MS 39762, office telephone number 325-2493, has been designated as the responsible employee to coordinate efforts to carry out responsibilities and make investigation of complaints relating to discrimination. This is in conformity with Title IX of the Education Amendments of 1972, Sections 503 and 504 of the Rehabilitation Act of 1973, Section 402 of the Vietnam Era Veterans Readjustment Assistance Act of 1974, and the Americans with Disabilities Act of 1990.

POLICY GUIDELINES and STATEMENT

It is the policy of Mississippi State University to take affirmative action:

(1) To recruit, hire, and promote persons in all job classifications without regard to race, color, religion, sex (except where sex is a bona fide occupational qualification), national origin, age, disability (except where such disability condition renders the person incapable of doing the job or poses a threat to the health and safety of others), or veteran status;

(2) To base decisions on employment so as to further the principle of equal employment;

(3) To ensure that promotion decisions are in accord with principles of equal employment opportunity by imposing only valid requirements for promotional opportunities;

(4) To ensure that all human resources actions, such as compensation, benefits, transfers, layoffs, returns from layoff, university sponsored training, education, tuition assistance, and social and recreational programs, will be administered without regard to race, color, religion, sex, national origin, age, disability, or veteran status;

(5) To employ and advance in employment qualified disabled veterans, veterans of the Vietnam era, and other eligible veterans at all levels of employment. This includes, but is not limited to hiring, upgrading, demotion or promotion, transfer, recruitment, layoff or termination, rates of pay, or other forms of compensation; and

(6) To monitor affirmative action efforts daily and to audit and report results quarterly.

The institution takes affirmative action to admit, teach, grade, discipline, provide financial aid to, graduate, admit to graduate school, award graduate assistantships and fellowships to, and assist toward placement, all students, without regard to race, color, religion, sex, national origin, age, disability, or veteran status.

This policy is actuated and implemented through the authority of its Chief Executive Officer, derived from the Board of Trustees of State Institutions of Higher Learning and delegated to the Affirmative Action Equal Opportunity Officer.
II. THE COLLEGES and SCHOOLS

COLLEGE of AGRICULTURE and LIFE SCIENCES

VANCE WATSON, Interim Dean
LYNN L. REINSCHMIEDT, Associate Dean

Telephone: (662) 325-2110
Fax: 325-8580
Mailing Address: Box 9760, Mississippi State, MS 39762
E-mail: dean@cals.msstate.edu

GENERAL INFORMATION

The College of Agriculture and Life Sciences (CALS) at Mississippi State University (MSU) is one of the leading colleges of agriculture, life sciences, and human ecology in the southeast. Student enrollment, degree offerings, and student placement have increased over the past nine years.

As a land-grant institution, Mississippi State University’s College of Agriculture and Life Sciences offers excellent academic programs related to basic life sciences, environmental issues, agricultural production, food and fiber processing, agribusiness, agricultural information science, and the conservative and sustainable use of natural resources. With the recent establishment of MSU’s Life Sciences and Biotechnology Institute, the College will continue to enhance the study of the life sciences, including biotechnological applications that will have a tremendous impact on education, agriculture production, food, fibers, human and animal health, the environment and biobased industrial products.

Students may select from 17 undergraduate curricula in the College of Agriculture and Life Sciences. Each degree program will prepare students for career opportunities in the multi-billion dollar agricultural and life sciences’ industry. These programs will also prepare students for graduate and/or professional school study. The College of Agriculture and Life Sciences offers four-year curricula that prepare students for medicine, veterinary medicine, and law. The College currently has an enrollment of 1255 undergraduate and 217 graduate students.

Organization. The College of Agriculture and Life Sciences is one of five major units of the Division of Agriculture, Forestry and Veterinary Medicine. The others are the Mississippi Agricultural and Forestry Experiment Station (MAFES), Mississippi State University Extension Service (MSU-ES), the College of Forest Resources, and the College of Veterinary Medicine (CVM).

The College of Agriculture and Life Sciences offers undergraduate curricula leading to the Bachelor of Science degree, with the exception of Landscape Architecture which leads to the Bachelor of Landscape Architecture degree. All departments within the College of Agriculture and Life Sciences offer graduate courses leading to the Master of Science, Master of Agriculture, Master of Agribusiness Management degree, or Master of Landscape Architecture degree.

Faculty and Facilities. The level of education of the faculty of the College of Agriculture and Life Sciences, as measured by advanced degrees and by the diversity of the institutions from which these degrees were earned, is exceptionally high. The teaching faculty include resident staff of the MAFES and MAFES-ES, which offer valuable opportunities for students on the undergraduate and graduate (see MSU Graduate Bulletin) levels. The sharing of faculty and facilities between the College of Agriculture and Life Sciences, MAFES and MSU-ES keeps the instructional program current and meaningful to the students.

POLICIES

The minimum requirements for graduation with a Bachelor of Science degree in the College of Agriculture and Life Sciences in any of the four-year curricula are 128 semester hours with an average grade of C (2.0 GPA on a 4.0 scale). Some curricula require more than this minimum.

Agriculture and Life Sciences majors are encouraged to take courses on the Mississippi State University campus when possible. If the desired courses are not offered, or if special circumstances exist, students may receive permission from the Dean, upon recommendation from the Department, to take courses through Independent Study.

The College of Agriculture and Life Sciences requires all entering freshman and transfer students to own or lease a personal computer. This College-wide requirement is a proactive measure to insure that students will develop the needed computer skills necessary for success in agriculture and life sciences professions. The CALS will identify the minimum computer specifications, which is important to the overall university computing system, the University’s Information Technology Services, and classroom and laboratory computer accommodations. This information will be posted on the College of Agriculture and Life Sciences’ web site (http://www.cals.msstate.edu) by July 1 of each year. Additional information on computer specifications, software, purchasing and/or lease information (if available), and additional department requirements, will also be included on the CALS web site.

The College of Agriculture and Life Sciences currently offers 16 Bachelor of Science degree programs and 35 option areas. Students may choose from the following degree programs and options:

- Agricultural Engineering Technology and Business
  - Agricultural Systems
  - Natural Resource and Environmental Management
  - Gin Management and Technology
  - Land Surveying
  - Precision Agriculture/Ag Systems

- Biological Engineering (College of Engineering)
  - Pre-Dentistry
  - Pre-Medical
  - Pre-Veterinary Medicine

- Agribusiness

- Agricultural Economics

- Agricultural Information Science
  - Teaching Option (5th year)

- Agricultural Science

- Animal and Dairy Sciences
  - Science Option
  - Pre-Veterinary Medicine
  - Production/Business

- Biochemistry and Molecular Biology
  - Pre-Dentistry
  - Pre-Medical
  - Pre-Veterinary Medicine

- Agricultural Pest Management

- Food Science and Technology
  - Food Safety Pre-Veterinary Medicine
  - Processing/Commerce

- Science

- Human Sciences
  - Apparel, Textiles and Merchandising
  - Foods, Nutrition and Dietetics
  - Gerontology Concentration
  - Human Development and Family Studies
  - Interior Design

- Landscape Architecture

- Landscape Contracting and Management

- Agronomy
  - Crop Science
  - General Agronomy
  - Golf and Sports Turf Management
  - Seed Science
  - Seed Technology
  - Soil Conservation
  - Soil Science

- Horticulture
  - Floriculture and Ornamental Horticulture
  - Retail Floristry Management

- Poultry Science
  - Business
  - Management
  - Manufacturing
  - Pre-Veterinary Medicine

*: denotes degree programs with available options
OPTION in INTERNATIONAL AGRICULTURE

The elective in International Agriculture is available to students majoring in any curriculum in the College of Agriculture and Life Sciences. This elective is intended to prepare students for possible careers in agricultural production or marketing on an international scale.

Students interested in this elective will take the following in addition to requirements for their majors. The specific courses included will be determined by the department involved and the student’s interest, but will include the following minimums.

- Elective in International Agriculture

FIVE-YEAR, TWO-DEGREE CURRICULA in AGRICULTURE and BUSINESS

and in AGRICULTURE and LIBERAL ARTS

Five-year, two-degree curricula leading to Bachelor of Science degrees in both Agriculture and Business and Agriculture and Liberal Arts are available. Such curricula may be designed with a major in any field of agriculture or human sciences combined with a major in any field of business or liberal arts. These programs must meet the minimum requirements of 128 semester hours with a C average or better for a degree in Agriculture including (1) a minimum of 54 semester hours with a C average or better in the liberal arts field approved by the College of Arts and Sciences.

Students desiring to follow a five-year, two-degree curriculum will develop a detailed program by consultation with advisors in the College of Agriculture and Life Sciences and the College of Business and Industry or the College of Arts and Sciences. The two degrees are conferred simultaneously at the end of the fifth year. Students should declare their intentions of pursuing the two-degree program as early as possible, generally not later than the end of the sophomore year.

SHORT COURSES in AGRICULTURE and LIFE SCIENCES

Short courses from three days’ to two weeks’ duration are given when the need arises. The nature of the educational program and its length are determined by the needs of the particular groups served. Information regarding short-course programs may be secured from the dean or the head of the department offering the course.

PRE-VETERINARY MEDICINE

Pre-Veterinary students enrolled in the College of Agriculture and Life Sciences (CALS) must select a major (Bachelor of Science degree program) that includes required Pre-Veterinary courses. The College of Agriculture and Life Sciences does not offer a degree in Pre-Veterinary Medicine; therefore, students should select a major that includes Pre-Veterinary courses. These requirements are included in the following degree programs: Animal and Dairy Sciences, Poultry Science, Food Science and Technology, Biochemistry and Molecular Biology, Microbiology and Biological Sciences (the latter two degree programs are located in the College of Arts and Sciences). Each of the four degree programs within the College of Agriculture and Life Sciences (CALS) allows the student to complete the necessary requirements for entry to the College of Veterinary Medicine and a Bachelor of Science simultaneously. To receive a Bachelor of Science degree, each student must meet the curriculum requirements set forth by the respective department provided through the Pre-Veterinary Medicine Option (Example: See Animal and Dairy Sciences). Upon the successful completion of the undergraduate degree program through the junior year and the pre-veterinary medicine course requirements, a student may apply to the College of Veterinary Medicine (CVM). Upon the successful completion of the freshman year of CVM courses (approximately 28-32 hrs.), a student may apply these hours toward the bachelor’s degree. This course work can serve as the senior year of the undergraduate curriculum. This “three plus one” program is offered by the College of Agriculture and Life Sciences for Pre-veterinary students.

Address inquiries concerning the Pre-Veterinary medicine options available in the CALS to degree program and advisor listed below:

Electives will be chosen from requirements toward the student’s alternate major. Those students with an alternate major in agriculture will choose electives from the following courses.

Department of AGRICULTURAL ECONOMICS (AEC)

Major Advisor: Assistant Professor Wes Wolfe
Office: 302 Lloyd-Ricks

Agriculture and related businesses create more employment than does any other industry. The agribusiness industry accounts for nearly one-fifth of the U.S. gross national product and employs close to one-fourth of the U.S. labor force. To formulate successful business policies, farm managers and agribusiness firm managers must fully comprehend the nature and influence of economic forces on prices, costs, product demand and production plans. The entire business complex surrounding the food and fiber sector must be managed in a manner consistent with reasonable returns to the factors of production and respond to consumer demands. Two majors, Agricultural Economics and Agribusiness, are offered to provide an understanding of economic forces and business management principles as well as general knowledge of technical agriculture and related sciences. Students completing either curriculum would also be prepared to pursue additional training at the graduate level.

Students who plan to attend a community college before transferring to Mississippi State are strongly encouraged to contact the Department’s major advisor regarding their proposed community college course schedule and transfer requirements. The Agricultural Economics department discourages, but will accept six technical course credits through the Spring 2004 semester. Beginning with the Fall 2004 semester the department will not accept technical course credits.

Students in both majors are required to earn a “C” or better in all required (non-elective) agricultural economics (AEC), economics (EC), English (EN), and mathematics (MA) courses.

AGRICULTURAL ECONOMICS

The Agricultural Economics (AEC) major provides basic training in farm management, production economics, marketing and demand. Emphasis is on production agriculture and the economics of resource development and use. Individuals who plan to farm or seek employment with firms and agencies directly involved with production agriculture would be well prepared for such positions under this curriculum. In light of the emphasis on production agriculture and the flexibility offered by the AEC curriculum, first-year students are encouraged to contact the departmental undergraduate coordinator to discuss some specific options of current interest that are available through careful management and selection of elective courses (agricultural consulting licenses, GIS/GPS/Precision Agriculture skills, etc.).

The Agribusiness (AGB) major provides training in business including accounting, management, marketing, finance and economics, along with training in the agricultural sciences. A student who plans to work in an off-farm agricultural profession can greatly enhance his/her training for a particular specialty by carefully choosing the courses in his/her area of interest. The program of study is designed to give the student considerable flexibility in his/her chosen field of study and to prepare him or her for career positions with all types of firms involved in getting food and fiber to the consumer.

Department of AGRICULTURAL INFORMATION SCIENCE and EDUCATION (AIS)

**Agricultural Information Science Curriculum**

Major Advisor: Assistant Professor Kirk Swortzel

Office: 200 Ballew Hall

Agriculture is an applied science with many disciplines. Agricultural Information Science is the science of assisting others to learn how to access, analyze, apply, and amend information to solve problems in agriculture. The curriculum is designed to prepare students to enter professions requiring extensive knowledge and skill in solving agricultural and agriculturally related problems. Students are prepared to meet agriculture industry’s needs for individuals who can create, access, disseminate, apply, amend, and integrate information to solve problems in agriculture. Agricultural Information Science graduates may become involved in a variety of occupations in agricultural business and industry, education, production, Extension, public relations and others. A minimum of 128 semester hours is required for this major. Students must complete 13 semester hours of agriscience electives from approved courses in one of the following areas: animal agriculture, plant agriculture, horticulture, agribusiness, natural resources and agriscience.

All students in Agricultural Information Science are required to have their own personal computer. Students should consult with the department for equipment specifications prior to purchasing.

Students desiring to receive certification to teach in secondary agriculture programs will need to complete certification requirements. This can be accomplished by completing the Master of Science Degree in Agricultural and Extension Education, Teacher Certification Option. To enroll in this program, individuals must possess a bachelor’s degree in an agriculture area and meet requirements for regular admission to the Master of Science degree program. The minimum G.P.A. Requirement is 2.75, on a 4.0 scale, during the last two years (approximately 60 hours) of undergraduate academic work or a 3.0 on a minimum of 24 hours of graduate level courses. Individuals must apply to teacher education. Individuals must present an ACT score of 21 (SAT equivalent of 660) with no sub-score below 18 or minimum scores on the Pre-professional Skills test (PST) to meet teacher certification standards in Mississippi. The minimum scores are 170 on Reading, 172 on Writing, 169 on Mathematics, 316 on Computer Based Test (CBT), 316 on Reading, 318 on Writing, and 314 on Mathematics. Applicants to teacher education must complete the “Verification of Work Experience with Children and Youth” and provide two letters of recommendation.

Exit requirements include a 3.0 G.P.A., mastery on an oral comprehensive examination administered by the Graduate Committee and submission of the required score on the Praxis - Principles of Learning and Teaching (PLT) to Mississippi State University College of Education and to the Mississippi Department of Education to obtain licensure.

AGRICULTURAL SCIENCE

Agricultural Science Curriculum

Major Advisor: Assistant Professor Kirk Swortzel
Office: 200 Ballew Hall

The Agricultural Science degree prepares individuals for a variety of agricultural related careers. Many agricultural businesses and organizations are seeking graduates who have a diversified knowledge of agriculture and life sciences, which includes production agriculture, business, leadership and management. Many graduates become involved in agriculture business and industry, production agriculture operations, international agriculture development or pursue advanced study in areas such as nutrition and agricultural education.

Agricultural Science allows students to develop a high concentration of science and specialized agricultural study. Through the Agricultural Science degree program, a student can pursue a bachelor of science in agriculture and develop specialization areas that will serve his/her individual needs and interests. For the degree requirements, students must complete 128 hours, which includes 33 hours of science and 58 hours of agricultural science. Thirty hours will be agricultural science electives, which must be taken from two academic departments within the College of Agriculture and Life Sciences. The student must select agricultural science electives that are closely related and complement each other. By selecting electives from two academic departments, a student can develop two specialization areas, such as agricultural pest management and agronomy or agricultural economics and animal science. A minimum of 16 of the agricultural science electives must be 4000 level courses or above, and a maximum of 4 hours may be selected from 1000 level courses.

The AETB program provides an educational opportunity for students interested in applying technical, business, and management skills to problems in agricultural production, processing, commodity related business and finance, and natural resources utilization. A Bachelor of Science degree is offered by the Agricultural and Biological Engineering Department through the College of Agriculture and Life Sciences.

The AETB program provides the agricultural industry with men and women possessing excellent skills in the engineering technologies, as well as a thorough background in business and management. This combination allows the AETB graduate to excel in virtually any business enterprise. The AETB Base Curriculum prepares the graduate for the many diverse opportunities afforded by the industrial and agricultural industries. In addition to the broad background in agricultural technologies and business, students may concentrate on a particular career-path by completing an AETB emphasis option. The AETB Base Curriculum provides five emphasis options including: (1) Aquacultural Systems, (2) Enterprise Management, (3) Gin Management & Technology, (4) Natural Resources & Environment Management, and (5) Precision Agriculture. These emphasis options are achieved by completing 18 hours of specified emphasis electives as approved by an AETB advisor. In addition, a Land Surveying option is supported through a unique AETB curriculum.

The Aquacultural Systems option provides an enhanced background in fishery management, fish disease, and water quality. The Enterprise Management option is designed to provide skills for agricultural and business enterprise management. The curriculum provides a broad background including both animal and plant sciences, agricultural technology, economics, business and management. The Gin Management and Technology option provides graduates with a thorough education in cotton gin management and fiber processing. Courses emphasize technologies that are specific to the fiber processing industry including: hydraulics, pneumatics, industrial controls, seed technologies, biological materials handling, industrial safety and human relations. The Natural Resources and Environmental Management option provides an enhanced background in geology, hydrogeology, resource conservation, and water quality for students pursuing careers that require environmental training. The Gin Management and Land Surveying options include an intern program allowing students to apply educational concepts in real-world settings. The Precision Agriculture option provides courses in remote sensing, GPS, GIS, and surveying to enhance the student’s abilities for careers involving spatial technologies.

All new students in AETB are required to have a laptop computer. Students should check with the ABE Department for equipment specifications prior to purchasing. Transfer credits with a grade of C or higher will be considered toward fulfillment of the degree requirement in the AETB curriculum. A maximum of 7 transfer hours of technical credit can be applied toward degree requirements.

Employment for AETB graduates includes the following agricultural industries/government agencies: Food/Fiber Production (Farming), Agri-Chemical, Agricultural Lending, Aquaculture, Banking, Cotton Ginning, Seed & Grain Processing, Crop Consulting, Agricultural Equipment Manufacturers and Sales, Farm Management, Land Surveying, and Food Processing.

Agricultural Engineering Technology & Business (AETB Base Curriculum)

(Emphasis Options include: Aquacultural Systems, Enterprise Management, Gin Management & Technology, Natural Resources & Environmental Management, and Precision Agriculture)

* Strongly suggest ABE 2023 Intro to Decision Science. Students may also take AEC 1223 Comp Appl for Ag & Life Sci or ABE 4473 Applic of Computer Tech in Ag Info Systems. The AETB academic advisor will evaluate transfer computer courses for credit.

** ABE 2173 Internal Combustion Engines or ABE 4165 Machinery Management for Agri-Engineers

*** ENS 3433 Intro, Personal Fin., Planning, FIN 3003 Personal Money Mgt. or FIN 3513 Financial Systems
Land Surveying Option

Individuals can become registered as a Land Surveyor in Mississippi by either (a) seven years combined surveying experience and testing or (b) academic training, three years of surveying experience (supervised by a registered land surveyor) and testing. The state board for Professional Engineers and Land Surveyors requires that an individual complete 62 hrs. of specific course work in order to meet the academic requirements for registration. These 62 hrs. include 9 hrs. of Surveying, 9 hrs. of Mathematics including Calculus I, 8 hrs. of Physics, 3 hrs. of Geography, 6 hrs. of Computer Applications, 9 hrs. of English Composition/Writing and 18 hrs. of recommended electives. The following courses are needed to become a registered Land Surveyor in Mississippi and obtain a Bachelor of Science degree in Agricultural Engineering Technology and Business. In order to become a registered Land Surveyor in the state of Mississippi through academic training (see "b" above), one must: (1) complete the required course work (62 hrs.), (2) pass the Land Surveyor Intern examination (administered by the Mississippi Board of Professional Engineers and Land Surveyors), (3) successfully complete a three year internship, and (4) pass the Land Surveyor examination (administered by the Mississippi Board of Professional Engineers and Land Surveyors). Requirements for registration in other states can vary. The following sequence of courses allows the student to take the Land Surveyor Intern examination after completion of the Junior year. Employment opportunities for registered land surveyors in Mississippi include self-employment, an extensive number of land surveying or engineering firms, as well as local, state, and federal government agencies.

Total hours needed for major: 128

Agricultural Pest Management (APM) is an interdisciplinary program of study in Entomology, Plant Pathology, and Weed Science, which is administered by the Department of Entomology, Plant Pathology and the Department of Plant and Soil Sciences. The Bachelor of Science and degree in Agricultural Pest Management is offered. Effective management of pest problems in production agriculture requires a broad base of knowledge in the pest disciplines and practical field experience. The undergraduate Agricultural Pest Management major features a strong core of courses in the three pest disciplines (entomology, plant pathology, and weed science); a strong background in agriculture, biological and physical sciences; and practical training through co-op work experiences. Curricula are designed to meet the needs of students who wish to pursue advanced degrees (M.A., M.S., Ph.D.) and of students who wish to terminate their higher education with a baccalaureate degree. A range of restricted and non-restricted electives allows students to personalize their degree program for careers in crop production, agri-business, and/or graduate studies preparation. A grade of "C" or better is required in all courses with the APM, EPP, PSS, CH, or BIO prefix prior to completion of the degree. No course may be transferred for credit from another college or university in which a grade of "D" was made. A student may transfer up to nine hours of "T" level technical courses from community colleges as unrestricted lower-level electives. "T" level technical courses may not be transferred for credit on any course listed specifically in the APM curriculum.

Graduates are well prepared for employment with agricultural industries such as chemical, seed or biotechnology companies; state and federal research, extension and regulatory agencies; private agricultural consulting firms; farmer’s cooperatives; nurseries, home and garden centers; greenhouse plant production; and corporate farms.

Co-op Work: APM students must complete a minimum 12 months or three semesters of co-op work with approved co-op sponsors in industry, private consulting firms/individuals, or governmental agencies. During the three co-op experiences, students typically work in at least two of these three areas. One of the three co-op semesters enrolled by the student must be a non-summer semester. A 2.50 cumulative GPA on all MSU work is required to participate in the APM Co-op Program.
AGRICULTURAL PEST MANAGEMENT

Total hours needed for major: 128

(Plus 9 hours co-op experience)

Department of ANIMAL and DAIRY SCIENCES (ADS)

Major Advisor: Professor Tom Althen
Office: 4017 Wise Center

Animal and Dairy Sciences Curriculum

The Animal and Dairy Sciences Curriculum is designed to give students essential instruction and practical experience in the science and business of animal agriculture. Courses provide training in the areas of breeding, nutrition, growth, reproductive and lactational physiology, marketing, management, evaluation, product processing as related to farm animals. A student may pursue one of the two general emphases options within the curriculum. Students interested in a career in animal production and/or allied industries would choose the Production/Management option. Within the Production/Management option, a student may choose to emphasize one of three species emphases: Meat Animal, Dairy or Equine. Students pursuing admission to the College of Veterinary Medicine or the Graduate School would choose the Science option. The Science option allows students to take support courses in the sciences that will better prepare the veterinary and graduate student for the professional programs in the CVM or Graduate School.

The ADS department’s Bearden Dairy Research Center and the animal research units in the Leveck Animal Research Center provide the student contact with modern techniques and practical experience to give insight to the many technical problems associated with the Animal and Dairy industries.

ANIMAL and DAIRY SCIENCES (4 Year Program)

Social Sciences (6 hours)
Select from University CORE

Major Core
All ADS students must complete the following required courses:
7-8 hours Inorganic Chemistry
4 hours Organic Chemistry
3 hours Biochemistry
BIO 3304 General Microbiology
BIO 1504 Principles of Zoology
ADS 1114 Animal Science
NTR 4115 Nutrition
ADS 4123 Animal Breeding
ADS 4613 Physiology of Reproduction
ADS 4611 Practices in Phy of Reproduction
ADS 4423 Animal Science Internship or
ADS 3312 Livestock Management Practices
ADS 4221 Animal and Dairy Sciences Seminar
3 hours Capstone Course

All students must complete the requirements under either Concentration I or II.
I. Production/Business Management Concentration
(select species emphasis below)

Meat Animal Emphasis (25-28 hours)

- ADS 4213 Rations
- ADS 4412 Livestock Sales I
- PSS 4103 Forage & Pasture Crops
- ADS 4323 Beef Cattle Science
- ADS 4113 Swine Science
- ADS 3213 Perf Analysis of Meat Animals
- ADS 4314 Meat Processing

2-4 hours 1 Prod Elective *
3-2 hours 1 Eval Elective **

Dairy Emphasis (29-31 hours)

- FST 4104 Quality Assurance of Food Products
- ADS 4213 Rations
- ADS 4412 Livestock Sales I
- PSS 4103 Forage & Pasture Crops
- ADS 4814 Dairy Farm Management
- ADS 3813 Dairy Cattle Appraisal
- ADS 4623 Physiology of Lactation

5-6 hours 2 Prod Electives*
2-3 hours 1 Eval Elective**

Equine Emphasis (28-31 hours)

- ADS 1132 Western Equitation
- ADS 2102 Equine Conf & Performance Eval
- ADS 4314 Meat Process or
- FST 4164 Quality Assur of Food Prod
- ADS 4213 Rations
- ADS 4412 Livestock Sales I
- PSS 4103 Forage & Pasture Crops

5-7 hours 2 Prod Electives*
2-3 hours 1 Eval Elective**

II. Science Concentration

- ADS 4314 Meats Processing or
- FST 4164 Quality Assur of Food Prod
- PO 3103 Horse Science
- BIO 2103 Cell Biology
- VS 3014 Anatomy & Physiology
- PH 1113 General Physics
- ADS 4623 Physiology of Lactation

39 hours

6-7 hours 2 Prod Elective*
2-3 hours 1 Eval Elective**

Science Electives (6-8 hours)

- BIO 4503 Vertebrate Histology
- BIO 4504 Comparative Vertebrate Embryology

3-12 hours Free electives

Course requirements for Pre-Veterinary students (3 + 1 program) to obtain a B.S. degree in Animal and Dairy Sciences

Because (1) the entrance requirements for the College of Veterinary Medicine satisfy a portion of the course requirements for the Animal and Dairy Sciences curriculum (2) a number of students are enrolled in Animal and Dairy Sciences while satisfying their pre-veterinary requirements and (3) an Animal and Dairy Sciences degree will be especially helpful to a practicing veterinarian, the following requirements for those electing to apply for a B.S. degree in Animal and Dairy Sciences after successfully completing the first year of Veterinary Medicine are listed.

University CORE .................. 39 hours

- Dept Core (eliminate Capstone & Seminar) ............... 41-42 hours

Science Option - excluding Science and Free Elective....28-30 hours

To qualify for the B.S. degree in ADS, a student in the 3+1 program must complete the 3 years of above listed undergraduate course work (105-108 hours) and successfully complete the first year of the Veterinary Medicine curriculum.

Department of BIOCHEMISTRY and MOLECULAR BIOLOGY (BCH)

Major Advisor: Professor John A. Boyle
Office: 402 Dorman

Biochemistry and molecular biology are disciplines involved at the cutting edge of a revolution in biology. Molecular methods and the use of genetic engineering have given scientists unprecedented power to begin to understand the chemistry of life processes. The Department of Biochemistry and Molecular Biology aims to prepare students at Mississippi State in this exciting area.

The curriculum leads to a Bachelor of Science degree in biochemistry and molecular biology. The objective of this curriculum is to provide the student with a strong background in science as part of a liberal education and also to prepare the student for professional work and/or graduate study.

There are sufficient individual choices in the curriculum to allow students to tailor their programs to any of several areas of specialization by appropriate use of elective hours.

University Core

- English Composition (6 hours)
- EN 1103 English Comp I or

**Total hours needed for major:** 128

### PRE-MEDICINE and PRE-DENTISTRY

Genetics, Cell Biology, an Anatomy course, Embryology, and Immunology are strongly recommended.

### GRADUATE STUDIES TRACK

Students aiming for a career requiring graduate education should take Genetics and Cell Biology as technical electives. Since many graduate programs require some form of physical chemistry, it is strongly suggested that students take CH 4413/4423 Physical Chemistry or CH 4404 Biophysical Chemistry as technical electives.

### BIOINFORMATICS SPECIALIZATION

The objective of this specific selection of electives is to provide the student with a B.S. in Biochemistry and Molecular Biology incorporating a strong background in the biochemical sciences along with a rigorous preparation in the field of computer science. The graduate will be able to either enter graduate school or directly enter a job requiring knowledge of bioinformatics. This exciting field applies computational and database skills to molecular biological problems. Practitioners routinely mine genomic databases for information relating to basic understanding of life processes as well as information providing clues for medical and agricultural advances. This program also constitutes a minor in computer science. Students should take the following courses for their electives: CS 1233 Computer Programming with C; CS 1314, 2314, 2324 Computer Science I, II, III; CS 2813 Discrete Structures; CS 3833 Introduction to Analysis of Algorithms; CS 3813 Introduction to Formal Languages and Automata; CS 4633 Artificial Intelligence; CS 4653 Cognitive Science; ST 3113 Introduction to Statistical Inference.

### PREPARATION FOR ENTRY INTO MBA/MASTER of AGRIBUSINESS MANAGEMENT PROGRAM (4+1 PROGRAM)

The objective of this specific selection of electives is to provide the student with a B.S. in Biochemistry incorporating a strong background in science and to prepare the student for immediate entry into a graduate program leading to an advanced business degree (either the Master of Business Administration or the Master of Agribusiness Management). Either program can be completed in a minimum of three semesters. Students thus educated may enter into management level positions in the biotech or agribusiness industry. Students should take the following courses for their electives: ACC 2013 Financial Accounting; EC 2113 Macroeconomics; ACC 2023 Managerial Accounting; EC 2123 Microeconomics; BQA Business Statistics I; MGT 3113 Principles of Management; BQA Business Statistics II; MGT 3413 Production Management; BL 2413 Business Law; MKT 3013 Principles of Marketing; FIN 3123 Financial Management.

### PREPARATION FOR ENTRY INTO AN ACCELERATED MASTER’S PROGRAM (THESIS) IN BIOCHEMISTRY and MOLECULAR BIOLOGY

This program requires careful planning by the student in order to complete the requirements for the B.S. while beginning a research program that should result in successful completion of a Master’s thesis at the end of the second summer after the B.S. Only exceptional and motivated students should attempt this program. It is critical that BCH 4603 General Biochemistry I be scheduled in the Spring of the Sophomore year. The student will be expected to begin a research project in the senior year by taking up to nine hours of Directed Individual Study courses (BCH 4000). Research will continue during the summer after completion of the B.S. degree. The student must register for BCH 8000 (3 hours), Thesis Research during the summer. In addition, the student should schedule a graduate level BCH course and ST 8114 in the Spring of the senior year.

The student interested in the Five Year Program should apply early in the undergraduate program to facilitate the scheduling of courses to conform to time constraints. In addition to applying for admission to the graduate program, the student must also take the Graduate Record Examination early enough so that the results are available by the beginning of the semester in which the student expects to graduate. The student must complete the courses required for completion of the B.S. Degree with no more than 10 hours remaining in the semester of expected graduation.

### PREPARATION FOR ENTRY INTO AN ACCELERATED MASTER’S PROGRAM (NON-THESIS) IN BIOCHEMISTRY and MOLECULAR BIOLOGY

This program requires careful planning by the student in order to complete the requirements for the B.S. while initiating graduate work that should result in completion of courses leading to a Master’s degree, non-thesis option. This curriculum allows completion of the two degrees in a minimum of five years. Required courses and electives must be scheduled so that the student has only eight hours of undergraduate course work remaining in the Spring of the senior year. The student should then schedule ST 8114 Statistical Methods and an 8000 level BCH course in that same semester. Graduate work must include BCH 5654Intermediate Metabolism and BCH 7000(3hrs) Directed Individual Study (to allow completion of an independent research paper).

The student interested in the Five Year Program should apply early in the undergraduate program to facilitate the scheduling of courses to conform to time constraints. In addition to applying for admission to the graduate program, the student must also take the Graduate Record Examination early enough so that the results are available by the beginning of the semester in which the student expects to graduate. The student must complete the courses required for completion of the B.S. Degree with no more than 10 hours remaining in the semester of expected graduation.
This program requires careful planning by the student in order to complete the requirements for the B.S. while beginning a research program that should meaningfully accelerate progress towards early completion of the Ph.D. degree in Molecular Biology. By initiating a research program in the senior year, a student should reduce the time to completion of the Ph.D. by a year. Only exceptional and motivated students should attempt this program. It is critical that BCH 4603 General Biochemistry I be scheduled in the Spring of the Sophomore year.

The student will be expected to begin a research project in the senior year by taking the Directed Individual Study Courses. Research will continue during the summer after completion of the B.S. degree. The student must register for BCH 8003, Thesis Research during the summer.

The student should plan his/her complete graduate program of study in conjunction with a research Director and Graduate Committee. Since the Ph.D. is primarily a research degree, ultimate time to completion will be dependent upon the period necessary to satisfy the research requirements of the Graduate Committee. This option allows the student to begin that research substantially earlier than usual.

Three year program for early admission into the COLLEGE OF VETERINARY MEDICINE

The aim of this curriculum is to allow a student to matriculate through the Department of Biochemistry and Molecular Biology for three years and then proceed into the College of Veterinary Medicine under their early admissions policy. Successful completion of the courses taken during the first year in Veterinary Medicine will satisfy the Department’s requirements for technical electives and allow the University to grant the student a B.S. in Biochemistry and Molecular Biology after this period.

Mississippi State requires a minimum of 128 hours for the undergraduate degree. Therefore, the first year in the College of Veterinary Medicine will contribute 29 hours of technical electives to this program.

Department of ENTOMOLOGY and PLANT PATHOLOGY (EPP)

Department Head: Clarence H. Collison
Office: 106 Clay Lyle Entomology Complex

ENTOMOLOGY
Office: 103 Clay Lyle Entomology Complex

Entomology is the study of insects and the impact of insects on the health and economic well-being of mankind. The Clay Lyle Entomology Complex houses the staff and administrative offices of the department, and the laboratory and classroom facilities support a broad range of instruction, research and teaching functions. Students have access to a wide range of entomological expertise. Most faculty have joint appointments with the College of Agriculture and Life Sciences and the Mississippi Agricultural and Forestry Experiment Station and/or the Mississippi Cooperative Extension Service. The breadth of the department is also influenced by several USDA/ARS research laboratories located on campus and at Stoneville, Mississippi. Master of Science and Doctor of Philosophy degrees in Entomology are offered. The department participates in the Agricultural Pest Management degree program with Plant Pathology and Weed Science (see Agricultural Pest Management).

PLANT PATHOLOGY
Office: 104 Dorman Hall

Plant pathology is the study of plant diseases, their causal agents and methods of control. Emphasis is placed on protection of environmental quality. Graduate programs of study leading to the Master of Science and the Doctor of Philosophy degrees in Plant Pathology are offered. The Graduate Bulletin for description of programs and requirements for advanced degrees. Plant Pathology jointly participates in the Agricultural Pest Management degree program with Entomology and Weed Science (see Agricultural Pest Management).

Department of FOOD SCIENCE and TECHNOLOGY (FST)

Food Science and Technology Curriculum
Major Advisor: Professor Juan Silva
Office: 107 Herzer Building

The curriculum in Food Science and Technology is designed to educate students in the application of science to the manufacture, preservation, storage, marketing, and consumer use of food and beverage products. Processing of the basic raw materials—milk, fruits, vegetables, meats, poultry, and miscellaneous foods and beverages—into consumer products by canning, freezing, dehydration, fermenting and fabrication is taught with emphasis on basic chemical, microbiological and physical principles as well as certain specific procedures. Therefore, those who complete a major in this field have excellent opportunities in or associated with the largest industry in the world—the food industry.

Students may emphasize any one of several commodities through proper selection of electives. The student will be advised by a departmental advisor.

The Food Science and Technology Curriculum offers three options: Processing/Business option, science option, and food safety option.
The mission of the School of Human Sciences is to address needs of individuals, families, communities and related businesses and industries through education, research and extension. Career preparation includes the generation and dissemination of knowledge, the education of professionals and the provision of research-based educational programs.

### Human Sciences (HS)

The Human Sciences program at Mississippi State University is accredited by the Council for Professional Development of the American Association of Family and Consumer Sciences. The Bachelor of Science degree in Human Sciences is conferred upon completion of a Human Sciences core, specialized course work and courses from supporting disciplines.

Human Sciences prepares men and women for professional work and provides a liberal and professional education. Students majoring in Human Sciences may choose to study from any one of four option areas. Human Sciences courses may also constitute a minor field of study or elective area for students in other majors. Field trips are required with some Human Sciences classes and costs are in addition to fees and tuition. Charges for field trips are prorated to students based on actual cost of transportation plus meals and lodging when applicable.

Transfer credits with grade of C or higher will be considered toward fulfillment of degree requirements in Human Sciences.

### Concentration Options

- **Science Concentration**
  - MA 1713 Calculus I
  - GA 1111 Survey of Agriculture
  - BIO 1203 Plant Biology
  - HS 1711 Professional Protocol

**Total hours needed for major through Junior year: 107**

Note: Courses are application requirements for the College of Veterinary Medicine.

### School of Human Sciences

(Complete degree requirements listed in Veterinary Medicine)
A minor in **Human Sciences** is available. Required are HS 2593, HS 3213, HS 3303, HS 3633, HS 4853. In addition, six credits are to be selected from HS 4403, HS 2613, HS 4313, HS 3203, HS 4333, HS 1533, HS 4193.

The following concentrations are offered in the School of Human Sciences:

- Apparel, Textiles, and Merchandising (ATM); Food and Nutrition (FN); Human Development & Family Studies (HDFS); and Interior Design (ID).

### University Core

- **English Composition (6 hours)**
  - EN 1103 English Comp I or
  - EN 1163 Accelerated Comp I or
  - EN 1183 Honors Comp I

- **Mathematics (6 hours)**
  - MA 1313 College Algebra
  - MA 1323 Calculus I

- **Science (9 hours)**
  - CH 1211 Investigations in Chemistry
  - CH 1213 Fundamentals of Chemistry

- **Computer Literacy (3 hours)**
  - TKT 1273 Microcomputers in Education

- **Humanities (6 hours)**
  - EN 1013 English Comp I
  - EN 1093 Oral Communication

- **Social Sciences (6 hours)**
  - PSY 1013 General Psychology

**Choose one of the following concentrations:**

### Apparel, Textiles, and Merchandising Concentration

**Advisors:** Assistant Professor Wanda Cheek, Associate Professor Phyllis Bell Miller

This option is designed to provide students with an understanding of the fashion and textile industries, consumer behavior, product quality, and business principles. Students concentrate in one of two areas: Merchandising or Apparel Production and Design. Merchandising combines an overview of the fashion industry, consumer behavior, and product knowledge with an understanding of business principles. Apparel Production and Design emphasizes the total design and production process from inception to finished product and its ultimate sale to the consumer. Apparel, Textiles, and Merchandising students are required to have a laptop computer during the freshman year, selected from a range of models recommended by the School of Human Sciences.

**Art Area**

- ART 1013 Design I
- HS 1533 Apparel Design I
- ACC 2013 Principles of Financial Accounting
- EC 2113 Principles of Macroeconomics
- HS 1523 Visual Design in Dress
- ACC 2023 Principles of Managerial Accounting
- HS 2553 Fashion Merchandising
- EC 2123 Principles of Microeconomics
- HS 4733 Computer-Aided Design for Human Sciences
- HS 3593 Apparel Mktg & Promotion Strategies
- HS 2593 Apparel/ Sewn Prod Analysis & Evaluation
- HS 3553 Fashion Retailing
- HS 2523 Introductory Textiles
- BL 2413 The Legal Environment of Business
- HS 3573 Historic Costume
- HS 4563 Intermediate Textiles
- HS 3532 Visual Merchandising
- MGT 3013 Principles of Marketing
- MGT 3114 Principles of Management and Prod
- 8 hours Foreign Language
- HS 4513 Social-Psych Aspects of Clothing
- HS 4701 Internship Placement Seminar
- HS 1711 Professional Protocol
- HS 4756 Internship

**Writing Requirement (3 hours)**

- AIB 3203 Intro to Tech Writing in Agricomm

**Computer Literacy (3 hours)**

- TKT 1273 Microcomputers in Education

**Restricted Electives - choose 9 credit hours from one area**

**Total hours needed for major:** 133

### Food and Nutrition Concentration

**Advisors:** Assistant Professor Carolyn Malone

**Instructor:** Carolyn Bailey

**Food and Nutrition**. The option prepares students for a wide variety of food and nutrition careers. For students interested in becoming a Registered Dietitian, the Didactic program in Dietetics at Mississippi State University is currently granted Developmental Accreditation by the Commission of Accreditation for Dietetics Education of the American Dietetic Association, 216 W. Jackson Boulevard, Chicago, IL 60606-6955; telephone 312-899-0400. Upon completion of the didactic program, graduates may pursue participation in a supervised practice program. Successful completion of the supervised practice program, followed by the Registration Exam, fulfills the requirements to become a Registered Dietitian. All students in Food and Nutrition are required to have a computer that meets specifications established by the School of Human Sciences.

- CH 1213 Fundamentals of Chemistry
- CH 1211 Investigations in Chemistry
- HS 2203 Science of Food Preparation
- SO 1003 Intro to Sociology or
- SO 1103 Contemporary Social Problems
- CH 1223 Fundamentals of Chemistry
- CH 1221 Investigations in Chemistry
- ST 2113 Stat for Behavioral Sciences
- BIO 1504 Principles of Zoology
- CH 2503 Organic Chemistry
- CH 2501 Lab
- HS 3283 The Foodservice System
- BCH 3613 Elementary Biochemistry
- HS 4213 Nutrition Public Policy & Promotion
Human Development & Family Studies Concentration

Advisors: Professor Jan Cooper Taylor; Assistant Professors Sheri Lokken and Wanda Cheek

Human Development and Family Studies (HDFS). This option offers an interdisciplinary lifespan approach to the study of children and families. It encompasses specialty areas in preschool teaching, childcare, administration, family services, child life, consumer economics, human sciences, teacher education and extension. Students develop an awareness of trends, issues and public policy affecting families; analyze factors that influence cognitive, emotional, social and physical development in the contexts of culture and family. Graduates enter diverse public and private sectors which focus on enabling children and families to function effectively in today’s complex society. Human Development and Family Studies students are required to have a laptop computer, selected from a range of models recommended by the School of Human Sciences.

Specific course work is required to specialize in Extension or to meet class A teacher certification requirement for Vocational Home Economics in the state of Mississippi. Specific course work is also required to specialize in child life, preschool education, or family services.

All teacher education programs at Mississippi State University are NCATE accredited. Students must conform to the policies on teacher education, as explained under “Teacher Licensure” elsewhere in this catalog. Additional endorsement is available in these occupational areas: Clothing, apparel and textiles; child care guidance; and institutional food and administration. Approved work experience is required to obtain this special endorsement.

Restrictive Electives

Child Studies (Preschool/Child Life)

EDE 3233 Teaching Children’s Literature
HS 3802 Child Care Procedures
HS 3823 Designing Child Care Programs
HS 4834 The Hospitalized Child* (Child Life)
or other approved restricted elective (Preschool)

Family Studies

HS 3633 Environments for Special Needs
HS 4813 Adult Development: The Middle Years
HS 4843 Family Interaction
HS 4863 Consumer Aspects of Aging

Total hours needed for major: 128-130

Family & Consumer Sciences Emphasis

CH 1043 General Chemistry
6 hrs Science with laboratory
SO 1003 Introduction to Sociology

Total hours needed for major: 128-130

- Specific course work is also required to meet class A teacher certification requirement for Vocational Home Economics in the state of Mississippi.

TOTAL HOURS NEEDED FOR MAJOR: 128

A minor in Child and Family Studies is available. Requirements are: HS 2803, HS 2813, HS 3803, HS 4803, HS 4853. In addition, six credits are to be elected from HS 4403, HS 4843, HS 3813, HS 3823, HS 4863, HS 2283, and HS 4333.

A minor in Consumer Economics is available. Requirements are: HS 3303, HS 3463, HS 4313, HS 4333. In addition, nine credits are to be elected from HS 4323, HS 4853, HS 4863 and HS 4403.
Interior Design (ID) Concentration
Advisors: Associate Professor Margaret S. Bateman
           Assistant Professor Beth Miller

Interior Design. This option offers the student a broad background in interior elements, materials, sources and practical experience in the business of interior design; it develops the skills of the design process to create functional, efficient and aesthetically pleasing residential and commercial interior environments for human use. The program is accredited by the Foundation for Interior Design Education and Research (FIDER). Interior Design students are required to have a computer during the freshman year, selected from a range of models recommended by the School of Human Sciences.

Gerontology Concentration
Coordinator: Sheri Lokken, Assistant Professor

The Gerontology Concentration is designed to provide the student with current factual and theoretical data along with practicum experience relating to the process of aging. It is a multidisciplinary effort with contributions from a variety of departments cutting across several colleges on the campus.

The concentration is open to students from all colleges within the University. It was developed to supplement the student’s elected area of emphasis. A student wishing to take the Gerontology Concentration will select a major in addition to electing the concentration.

Students completing the concentration will earn a certificate in gerontology. The certificate will be issued by the Council on Gerontology, signed by the dean of the college in which the student is enrolled, by the head of the department in which the student is obtaining a major, and by the Coordinator of the Gerontology Concentration.

Undergraduate Certificate Requirements: (Minimum 15 hours)
Select three of the following:

HS 4403 Intro to Gerontology
ABE 4513 Dynamics of Aging
PSY 4963 Psychology of Aging
HS 4863 Consumer Aspects of Aging
SO 4413 Aging and Retirement in American Society
Select at least two of the following: (may include courses from above list)

COE 4713 Issues in Aging
SW 2323 Social Welfare Policy
HS 4243 Nutrition Throughout the Life Cycle
HS 4813 Adult Development
HS 4333 Families, Legislation, and Public Policy

Take at least two of the following: (may include courses from the above list)

COE 4713 Issues in Aging
PSY 8313 Developmental Psychology

Required: Independent study/reading course (3 hours)

Graduate Certificate Requirements: (minimum 18 hours)
Select three of the following:

ABE 6513 Dynamics of Aging
PSY 6983 Psychology of Aging
SO 6413 Aging & Retirement in American Society
HS 6863 Consumer Aspects of Aging
PE 8153 Wellness and Aging
Take at least two of the following: (may include courses from the above list)

HS 6813 Adult Development
HS 6243 Nutrition Throughout the Life Cycle
HS 8243 Community Nutrition
HS 6333 Families, Legislation, and Public Policy
COE 8813 Counseling the Elderly
COE 6713 Issues in Aging

Department of LANDSCAPE ARCHITECTURE (LA)
Professor and Head: Cameron R. J. Man
Office: 130 Lloyd Ricks

Landscape Architecture Curriculum

Landscape Architecture is a design profession, concerned with the harmonious relationship of man and his environment.

Thus, a student of this discipline learns how to apply the design process to discover how physical installations or activities of man can be placed upon the land in a fashion that accommodates man, functionally and aesthetically, and compliments the environment.

The Landscape Architecture program at Mississippi State University is accredited by the American Society of Landscape Architects. Upon completing curriculum requirements, a student receives a Bachelor of Landscape Architecture (BLA) degree. A Master’s degree in Landscape Architecture (MLA) is also available. For more information, refer to the Graduate Bulletin.

There are many career opportunities for landscape architects with private firms and in governmental agencies. The scope of this profession includes, but is not limited to: site planning for housing developments, shopping centers, malls, civic centers, industrial parks, campuses, motels, resort areas, country clubs, golf courses, and municipal, state, regional and national parks.

In addition to completing the specified courses of the curriculum, all students are required to participate in at least one major department-sponsored field trip. A field trip fee will be assessed to specific courses. Students are expected to consult with their assigned academic advisor in choosing electives.

The Department reserves the right to retain student work for the purpose of records, exhibition, instruction, etc.

All students in Landscape Architecture are required to have their own personal computer. Students should check with the Department for equipment specifications prior to purchasing.

All students admitted to Mississippi State University may be enrolled in the first year of the program. After completion of 30 hours of course work at MSU or another university or community college, students must have achieved a minimum 2.5 grade point average (GPA), on a 4.0 scale, and must maintain at least a GPA of 2.5 to continue enrollment in the curriculum. A student who does not satisfy this requirement will not be allowed to enroll in LA prefix courses beyond the freshman (1000) level until his or her overall cumulative GPA reaches 2.5 or better.*
In as much as the published Bulletin of Mississippi State defines a letter grade of “D” as poor, Landscape Architecture requires that a grade of “C” or better is required to fulfill a curriculum requirement.*

The department reserves the right to retain student work for the purpose of records, exhibition, instruction, industry review, etc. In addition to Mississippi State University policies, all students enrolled in this curriculum shall be required to abide by all approved departmental policies.

* As published in the Department of Landscape Architecture policy manual.

Landscape Contracting and Management Curriculum

A landscape contractor is a specialty contractor who provides the materials and services needed to make the landscape architect’s project become a reality, and to provide the management and maintenance needed to keep the project in prime condition after implementation.

All students in Landscape Contracting and Management are required to have their own personal computer. Students should check with the Department for equipment specifications prior to purchasing.

The Landscape Contracting and Management degree program at Mississippi State University, accredited by the Associated Landscape Contractors of America, requires three internships which involve three semesters of experiential learning and field experience with an approved landscape contracting company or agency; and, under supervision of a qualified supervisor and oversight of Mississippi State University faculty. In addition, two departmental field trips are specific curriculum requirements for this degree. A field trip fee will be assessed to specific courses. Upon successful completion of curriculum requirements, a student receives a Bachelor of Science degree in Landscape Contracting and Management.

All students admitted to Mississippi State University may be enrolled in the first year of the program. After completion of 30 hours of course work at MSU or another university or community college, students must have achieved a minimum 2.5 grade point average (GPA), on a 4.0 scale, and must maintain at least a GPA of 2.5 to continue enrollment in the curriculum. A student who does not satisfy this requirement will not be allowed to enroll in LA prefix courses beyond the freshman (1000) level until his or her overall cumulative GPA reaches 2.5 or better.*

In as much as the published Bulletin of Mississippi State defines a letter grade of “D” as poor, Landscape Architecture requires that a grade of “C” or better is required to fulfill a curriculum requirement.*

The department reserves the right to retain student work for the purpose of records, exhibition, instruction, industry review, etc. In addition to Mississippi State University policies, all students enrolled in this curriculum shall be required to abide by all approved departmental policies.

The Agricultural and Environmental Soil Science curriculum provides an educational foundation in soil processes involving physical, chemical, and biological interrelationships. The soil resource is an integral component of our environment and is subject to loss and degradation through human activities. Humanity’s dependence on soil for food and fiber production and the need for ensuring environmental quality require individuals trained in the management of this resource. Career opportunities exist both nationally and internationally in agricultural and environmental consulting, agribusiness, government agencies, teaching, and research. Required courses provide soil science training, while elective courses can be selected to meet specific needs.

Cooperative Education: Agricultural and Environmental Soil Science students are encouraged to participate in the cooperative education program.
The Golf and Sports Turf Management (GSTM) is the study of plant and soil sciences for the culture of turfgrass on golf and sports facilities. The GSTM curriculum prepares individuals for careers as golf course superintendents at private, daily fee, and resort courses or as sports turf managers at city, school, and professional sports turf facilities (i.e. football, baseball, soccer fields.) New construction of golf courses and sports facilities has led to a heightened demand for trained golf and sports turf management professionals. Three semesters of Cooperative Education work experience will be required of all students enrolled in the GSTM option.

Cooperative Education Requirements: GSTM students must complete a minimum 12 months or three semesters of Coop work at a golf course with an individual who is certified or progressing toward certification with the Golf Course Superintendents Association of America or at a sports stadium with a recognized sports turf manager. One of the three Coop semesters enrolled by the student must be a non-summer semester period. A 2.50 cumulative QPA on all MSU work is required to participate in the GSTM program. All new students must register with their coop advisor early in their initial semester of enrollment.

Integrated Crop Management Concentration
Major Advisors: Professor Frank B. Matta
Associate Professors Brian Baldwin, David J. Lang, and Ted Wallace
Assistant Professor Paul Meints

Integrated Crop Management (ICM) is the study of food and fiber production utilizing ecologically sound and technologically advanced methods. Areas covered include basic concepts of plant science and specific practices in crop initiation, culture, harvesting, processing, distribution and market-state agencies. This curriculum also provides a good background of basic sciences for those who wish to pursue graduate studies. The curricula of the Integrated Crop Management Concentration are prepared for careers as producers, consultants, technical representatives, extension agents, or inspectors with USDA and state agencies. This curriculum also provides a good background of basic sciences for those who wish to pursue graduate studies.

**Golf and Sports Turf Management Concentration**
Major Advisors: Professors J. Michael Goatley
Assistant Professor Barry Stewart

The Golf and Sports Turf Management (GSTM) is the study of plant and soil sciences for the culture of turfgrass on golf and sports facilities. The GSTM curriculum prepares individuals for careers as golf course superintendents at private, daily fee, and resort courses or as sports turf managers at city, school, and professional sports turf facilities (i.e. football, baseball, soccer fields.) New construction of golf courses and sports facilities has led to a heightened demand for trained golf and sports turf management professionals. Three semesters of Cooperative Education work experience will be required of all students enrolled in the GSTM option.

Integrated Crop Management (ICM) is the study of food and fiber production utilizing ecologically sound and technologically advanced methods. Areas covered include basic concepts of plant science and specific practices in crop initiation, culture, harvesting, processing, distribution and marketing. Biotechnological and traditional methods of germplasm enhancement are taught. Specific program areas of study include agronomic crop production, crop science, fruit science, seed science, seed technology, and vegetable crop production. Students completing the Integrated Crop Management curriculum are prepared for careers as producers, consultants, technical representatives, extension agents, or inspectors with USDA and state agencies. This curriculum also provides a good background of basic sciences for those who wish to pursue graduate studies.

Floriculture and Ornamental Horticulture Concentration

Major Advisors: Professor David H. Tatum
Associate Professor: Richard L. Harkess

Floriculture and Ornamental Horticulture offers diversified opportunities that are challenging, intellectually stimulating, and economically rewarding. Floriculture and Ornamental Horticulture is the science and art of producing, distributing, marketing, and utilizing flowers, flowering and foliage plants, and woody ornamental landscape plants. It offers a wide variety of employment opportunities and competitive salaries. Students completing this curriculum are prepared for many different careers including greenhouse or nursery management, landscape management, public service, and technical product research and sales.

Retail Floristry Management Concentration
Major Advisors: Associate Professor James DelPrince
Instructor Lynnette McDougal

Retail Floristry Management (RFM) blends business, horticultural science, and design disciplines to prepare graduates for careers in the floral industry. Career options include floral designing, store management, shop ownership, freelance designing, product development, display work, and floral consulting. RFM students have the opportunity to work in and manage a professional flower shop owned by the department on the MSU campus.

Internship Requirements (PSS 3413): RFM majors must complete a 12 week, 480 clock hour work experience in a floral industry enterprise. The internship requirement may be completed any semester after successful completion of PSS 2343, Floral Design.

Total hours needed for major: 136
The management option is appropriate for students interested in entering into a personal poultry operation, in service and sales work with large poultry enterprises, in federal, state or local government employment, and in many employment opportunities in the allied fields relating to poultry. This option elective offers rapid career advancement for the poultry science major and prepares the student for future graduate work.

Management Option

The management option is appropriate for students interested in entering into a personal poultry operation, in service and sales work with large poultry enterprises, in federal, state or local government employment, and in many employment opportunities in the allied fields relating to poultry. This option elective offers rapid career advancement for the poultry science major and prepares the student for future graduate work.

INTERDISCIPLINARY CURRICULUMS

FOOD SCIENCE and TECHNOLOGY
AN INTERDEPARTMENTAL CURRICULUM

A student may work toward a Master of Science or a Doctor of Philosophy degree in Food Science and Technology by selecting FST courses which are provided by the Animal and Dairy Sciences, Poultry Science, Life Sciences, Horticulture, or Food Science and Technology Departments. The Food Science and Technology program involves staff members and facilities of the cooperating departments plus supporting work in other departments such as biochemistry, microbiology, statistics, computer science, etc. A Bachelor of Science in food science and technology will be considered to meet the pre-requisites for study toward an advanced degree. Students from other disciplines will be required to take leveling courses not to exceed 15 semester hours. To secure additional information, write or call the Head of the Department of Food Science and Technology, Mississippi State University, Mississippi State, MS 39762. Phone 662/325-3200.

NUTRITION PROGRAM
AN INTERDISCIPLINARY CURRICULUM

A student may work toward a Master of Science and/or a Doctor of Physiology degree in Nutrition by selecting courses in animal and dairy sciences, biochemistry and molecular biology, food science and technology, human sciences, poultry and wildlife and fisheries. The Nutrition program utilizes the staff members and facilities of these five departments, with supporting work in other departments.

A Bachelor of Science degree in agriculture, human sciences, biological or physical sciences will be considered as a prerequisite for receiving graduate credit for these courses. The students planning a major or minor in nutrition should use the NTR prefix for each course. Courses contributing to a major in nutrition are listed alphabetically under the symbol NTR in the Description of Courses section (Part III) of this catalog.

ANIMAL PHYSIOLOGY PROGRAM
AN INTERDISCIPLINARY CURRICULUM

The graduate program in physiology is an interdisciplinary curriculum which utilizes the staff members and facilities available in the various participating departments. The student is offered the opportunity to work toward the M.S. degree and/or the Ph.D. in Physiology.

A student wishing to do graduate work in Physiology must be in an appropriate department, usually that of the major professor, and will be expected to complete graduate work in the same fashion as any other graduate student, even though his program is interdepartmental. Listed below are the faculty members who administer the Physiology program, and their departments. Students planning a major or minor in Physiology should use the PHY prefix for each course. Courses contributing to a major in Physiology are listed alphabetically under the symbol PHY in the Description of Courses section (Part III) of this catalog.

GENETICS
AN INTERDISCIPLINARY CURRICULUM

An opportunity is offered to a student who wishes to work toward the M.S. degree in Genetics.* The Genetics program is an interdisciplinary curriculum which utilizes the staff and facilities available in the various participating departments and colleges. A wide array of plant and animal material is available for genetic investigation. Listed below are the faculty members who administer the Genetics program and their departments.

The student’s complete program will be formulated in the department of his/her choice. Listed below are the faculty members who administer the Genetics program and their departments. Students planning a major or minor in Genetics should use the GNS prefix for each course. A Bachelor of Science in the biological or physical sciences will be considered a prerequisite for receiving graduate credit for the courses listed in the catalog. Courses contributing to the major in Genetics are listed alphabetically under the symbol GNS in the Description of Courses section (Part III) of this catalog.

SCHOOL OF ARCHITECTURE

JAMES L. WEST, Dean
MICHAEL FAZIO, Interim Associate Dean
Office: 240 Giles Architecture Building
Telephone: (662) 325-2202
Fax Number: (662) 325-8872
Mailing Address: Box AQ, Mississippi State, MS 39762

GENERAL INFORMATION

The profession of architecture offers the student the opportunity to participate in improving the physical world, in solving problems of our society, and in giving form to the needs of modern culture. To meet these demands requires a highly trained profession composed of sensitive, dedicated men and women. The School of Architecture is the educational foundation of the profession in the State of Mississippi and provides for the development of the individual skills and understanding to prepare the student for his or her role in the practice of architecture.

The School of Architecture offers an intense, carefully structured, and rich array of courses which constitute a solid foundation for architectural practice. While course work is comprehensive in scope, providing the students with an awareness of the diversity and complexity of today’s professional world, each course has its own important role in developing the unique knowledge and abilities required of architects in a modern world.

The School of Architecture at Mississippi State University is the professional school for the State of Mississippi and is the only program in the state which leads to a professional degree in architecture. To meet the needs of the state and region, the School was established in 1973 with the support of an Advisory Committee of the Mississippi Chapter of the American Institute of Architects.

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. Professional degree programs in architecture, recognizes two types of degrees: the Bachelor of Architecture and the Masters of Architecture. A program may be granted a five-year, a three-year, or a two-year term of accreditation, depending on its degree of conformance with established educational standards.

The School of Architecture at Mississippi State University holds a five-year accreditation.

Information regarding the School of Architecture may be obtained from the School’s website at www.sarc.msstate.edu.

CURRICULUM

The curriculum is divided into three levels: the first-year level is defined as the pre-professional program; the second-, third-, and fourth-year levels compose the professional core; the fifth-year provides the transition to professional practice.

The curriculum is composed of four areas of study representing: (1) History/Theory, (2) Management, (3) Design, (4) Technology.

1. History/Theory - composed of architectural history and philosophy, current architectural ideas and directions.
2. Management - representing the tools necessary to direct the processes of architecture, areas of economics, real estate, finance, promotion, land development, law, and office practice.
3. Design - concerned with the understanding of form, shape, and space responsive to human needs and programs, together with development of architectural communication skills.
4. Technology - providing basic knowledge in physical systems of structures, materials, construction and service systems of plumbing, electrical, heating and air conditioning.

The fifth-year is a unique experience and is located in downtown Jackson, Mississippi. Students will take advantage of the downtown depth and expertise. The city provides a major resource for the activities and a laboratory for continued study. Professionals involved in all areas of the built environment contribute to the teaching. Weekly field trips are scheduled to building and manufacturing sites. Research and design projects are focused on the city. This unique experience provides a transition from the academic foundation to the professional realities of architecture.

At the completion of the fifth year, the students will receive the professional degree of Bachelor of Architecture.

ADMISSIONS

Admission to the School of Architecture is limited and highly competitive. Prospective students should communicate with the School of Architecture to request current information, and if possible, arrange for a tour of facilities and admissions advisement.

FINANCES

The School of Architecture admits applicants under one of three categories of admission. All three require completing a general application to the University; followed by the filing of a special Supplementary Application Form and other materials required by the School of Architecture. The three categories of admissions are as follows:

1. Full Admission with the opportunity to begin freshman architectural design studio in the fall term. (This category is only open to new freshman with very strong abilities. Since selection of the majority of this group will be announced by March, initial application should be made before January 15th. A limited number of places will be held for late applicants with exceptional abilities).
2. Pre-Architecture admission is generally granted to students acceptable to the University but who applied late or have not qualified for initial admission to the School of Architecture. Students are enrolled in the School of Architecture and complete all required freshman courses except freshman architectural design studios. At such time as all required freshman courses are completed, and if the overall grade point average is minimum 2.5, pre-architecture students may apply to take freshman design studios in the summer term. Entrance to design studios is highly competitive, on a space available basis, and is not automatic. All transfer students from other disciplines or colleges or universities are considered “pre-architecture” students. Admission to summer design studios requires a special application process which must be initiated prior to February 15 and also requires submission of portfolio type materials. Admission is highly selective.
3. Accelerated Studies admission is a special category for incoming students who hold 4 year undergraduate degrees in other fields. Application must be made prior to February 15 and is similar to the pre-architecture application to summer design studios. The “accelerated studies” program begins with admission to summer design studios and requires 35 consecutive months to complete the professional degree. Demonstrated abilities in mathematics, physics, and freehand drawing are expected. Admission is highly selective.

Students may receive transfer credit for non-professional courses completed at other universities, colleges, and community colleges, provided a grade of C or better is received for each course. Transfers from other architecture schools are not encouraged. No transfer credit will be given for courses listed as technical, vocational, or architectural. A student may receive six hours of Reserve Officers’ Training Corps (ROTC) credit.

Each prospective student is urged to contact the Director of Admissions of the School of Architecture to discuss his/her individual program development through the curriculum. Students intending to spend one year at a community college should seek academic advice from the School of Architecture prior to beginning the community college.

The School of Architecture also offers a Master of Science in Architecture degree with a specialization in computer graphics visualization. The degree program is appropriate for 1) students from various design fields who can demonstrate a high level of creative accomplishment, experience with digital media, and an ability to master computer programming; or 2) students with a mastery of computer programming, including such languages as C++, Autolisp, and Java, and substantial course work in the design field; or 3) students with specialized backgrounds in such fields as archaeology and anthropology who wish to use design visualization as a means of scientific inquiry. The Master’s program is not a professional degree and does not lead to Architectural registration. Interested students should consult the Director of the Graduate Program.

FINANCES

Costs for an architectural education are somewhat higher than in other disciplines. In addition to standard costs of fees, tuition, room, board, books, etc, an architectural student must buy required drawing equipment and materials for drawings and models during the school year. This can add $400 or so per year. Additionally, at least one major field trip is required each year. Charges for field trip expenses are collected with tuition and currently range from $350 in first year to $550 in fourth year. These charges are intended to cover transportation and lodging during field trips. These fees are not refundable after the first day of classes. Students should expect to purchase a laptop computer in their second year, selected from a range of models approved by the School.

A number of small scholarship opportunities as well as design competition and awards are available to students within the School of Architecture.
turers’ design programs. Normal MSU Scholarships are available to in-state and out-of-state students. Inquiries for financial aid or assistance should be sent directly to the MSU Office of Student Financial Aid and Scholarships.

COUNSELING

Once accepted into the Design Studio courses, students are required to maintain at least an MSU 2.00 cumulative quality point average to remain in design courses. At the end of the first year, a student must have completed all required courses in order to enter the second year, and at the end of the senior year, a student must have completed all required courses in order to advance to the fifth year. Any student who receives a grade of D or lower for two sequential design courses must repeat both of these courses and receive a grade of C or higher in both courses in order to advance in the program, or receive the Bachelor of Architecture degree. If a studio course is failed, a grade of C must be received to advance in the program, or receive the Bachelor of Architecture degree.

ACCELERATED STUDIES

A special program is available for graduates of other disciplines. The Accelerated Studies candidate must apply to the School of Architecture prior to February 15 and, if accepted, may expect to begin studies in a summer term and to complete the program in three years, including work during the summer terms (see admissions, paragraph #3).

*Prospective students with composite ACT of 26 in Mathematics are excused from College Algebra. Those with a 45 or better in a full semester high school trigonometry course may be excused from College Trigonometry. Others should take these courses at MSU or a community college in the summer prior to beginning studies in Architecture. Math placement tests are available from the School of Architecture.

**Freshmen, transfer students, and accelerated-studies students take ARC 1536 and ARC 1546 in the summer following completion of all freshman required courses. Special application must be made by February 15 prior to summer design. Admission is highly selective and on a space available basis.

***This course is required if a student receives a grade of “C” or lower in ART 1213 Foundation Drawing I.

****The new curriculum requires a student to take three (3) electives between their second and fourth year. At least one must be an architectural elective. The remaining electives must be selected from the current School of Architecture Approved Elective List.
GENERAL INFORMATION

The College of Arts and Sciences provides the fundamental training needed by all persons who wish to become college graduates. Students in all undergraduate schools and colleges in the University take more than half their courses during the first two years in the College of Arts and Sciences. In addition, the College provides pre-professional curricula for students who take their professional training elsewhere. Thus, pre-medical, pre-dental, pre-pharmacy, pre-law, pre-ministerial, pre-optometry, medical records administration, pre-nursing, and physical therapy training is available within the College of Arts and Sciences. Medical and dental students completing required courses are eligible for consideration of a B.S. degree from Mississippi State after one year in the professional school.

 Majors are offered in the following: anthropology, art, biological sciences, chemistry, communication, economics, English, foreign languages, general liberal arts, general science, geoscience, history, international business, mathematics, medical technology, microbiology, physics, political science, philosophy, psychology, sociology, and social work.

 Students who are undecided about a specific curriculum should select the Undeclared category. Advisors are available to assist these students in developing their educational and career goals. A student is permitted to delay a decision as to a field of concentration for one year.

 Minors are available in the following: aerospace studies, anthropology, art, biological sciences, chemistry, communication, English, foreign languages, geography, geology, geoscience, history, mathematics, philosophy, physics, political science, psychology, religion, sociology and statistics.

 In addition to these majors and minors, courses are offered in Air Force ROTC, engineering, military science, nursing, philosophy, political science, pre-professional programs, women’s studies. Information concerning these offerings can be found in this section of the catalog.

MISSION

The educational mission of the College of Arts and Sciences is two-fold: to provide students with a liberal education which will facilitate intellectual development and stimulate a life-long pursuit of knowledge, and to give students an in-depth education in at least one specialized area necessary to prepare them for a career or for advanced study.

The College offers curricula in the fine arts, the humanities, the sciences and the social sciences. These curricula are designed to introduce students to the basic methods of inquiry in diverse disciplines, to develop their analytical abilities, to improve their skills in writing and speaking, and to broaden their perspectives on humanity and culture in the natural and technological worlds. Additionally, they provide intensive preparation in one or more academic disciplines.

A liberal education attained in this context should ensure that graduates of the College have gained an understanding and appreciation of human culture. They should have examined the social, historical, political, philosophical and economic dimensions of the human condition and mankind’s perception of the world as it is expressed through the fine arts, language, and literature. They should have learned the use of quantitative and scientific methods and should have participated in the universal quest to comprehend natural phenomena and to utilize this knowledge beneficially and ethically.

ADVISING

The student is assigned an advisor as soon as he or she enters the College of Arts and Sciences and should maintain contact with that advisor throughout the university affiliation. The advisor will assist the student in developing a course of study and will serve as a resource person to deal beneficially and ethically.

DEGREES

The College of Arts and Sciences offers four degrees: the Bachelor of Arts, the Bachelor of Social Work, the Bachelor of Fine Arts, and the Bachelor of Science. All B.A., B.S., B.F.A., and B.S.W. students take a common set of requirements consisting of 25-29 semester credit hours in basic skills, 9-10 semester credit hours in natural sciences, 6 semester credit hours each in humanities and social sciences, and 3 semester credit hours in fine arts, computer literacy, and a junior/senior level writing course. The B.A. and B.S.W. curriculum requires 12 additional semester credit hours each in humanities and social sciences. The requirements for all four degrees as well as the curricula for specific areas of study are described below. For a description of the B.F.A. requirements, please see the entry under the Department of Art. Details for B.S.W. degree requirements are listed under Social Work.

In order to qualify for a second bachelor’s degree at Mississippi State University, the candidate must meet the following requirements: (1) The student must satisfy all course requirements for the degree sought; and (2) The student must satisfy residency requirements at Mississippi State University after the first degree has been conferred. The major department from which the second degree is sought shall determine completion of requirements.

COLLEGE REQUIREMENTS for ALL A&S DEGREES

The College of Arts and Sciences has identified graduation requirements which must be satisfied by all students pursuing degrees conferred by the College. Furthermore, these requirements (listed immediately below) must be satisfied from a list of courses approved by the College. These approved courses are taken from a longer list of courses satisfying University Core requirements which can be found in the front pages of this Bulletin. However, majors in the College of Arts and Sciences must be aware that there are numerous courses on the University Core list which are not on the College approved list. Copies of the College courses approved list are available both from the Dean’s Office and from advisors.

BACHELOR OF ARTS DEGREES and REQUIREMENTS

A Bachelor of Arts degree is offered in the following areas: anthropology, chemistry, communication, economics, English, foreign languages, general liberal arts, history, mathematics, philosophy, political science, psychology, and sociology. The Bachelor of Social Work is offered in Social Work and follows the same basic regulations as the B.A. degree except that courses must be taken in proper sequence and a minimum of 130 hours is required.

The liberal arts include certain basic academic disciplines that contribute to the development of intelligent, moral beings. Over the centuries various subjects have at one time or another been spoken of as “liberal arts,” but the objective of liberal-arts training has remained unchanged. Whether students major in liberal arts or whether they merely take a few basic courses in that field, the liberal arts will enable them to develop those fundamental habits of good citizenship and cultural awareness which are expected of all members of our society.

The curriculum in liberal arts at Mississippi State University is intended to provide:

1. a broad educational experience in the liberal arts, regardless of professional objectives;
2. adequate preparation for admission to professional schools and graduate schools in the liberal arts disciplines;
3. specialized training of a professional or pre-professional nature, as offered by the several liberal-arts departments.

BACHELOR of ARTS CURRICULA

A minimum of 128 credit hours is required in all B.A. programs, 32 of which must be upper-division (3000-level or higher) Arts and Sciences credits.

Most departmental majors, the curricular requirements are sufficiently flexible to allow a student in liberal arts to select his or her departmental major at any time during the freshman or sophomore year. Whenever a student has made a decision as to a departmental major, whether it be at the beginning of the freshman year or later, he or she will be assigned to a major advisor in that department. If a student has not decided upon a major field, he or she should register as an Undecided student and take courses in the common curriculum which will prepare him or her for a subsequent shift into a departmental major.

BACHELOR of SCIENCE DEGREES and REQUIREMENTS

A Bachelor of Science degree is offered in the following areas: biological sciences, chemistry, computer science, geoscience, mathematics, medical technology, microbiology, physics and psychology.
The Bachelor of Science degree is awarded:

1. on the completion of not fewer than 136 semester credit hours of study including 32 upper-division Arts & Sciences approved credits and the common curricula for Arts & Sciences (carrying 572 quality points) approved by the dean and an official advisor.

2. on the completion of at least 102 semester credit hours (carrying two quality points for each credit hour) of approved study (not fewer than 32 semester hours of upper-division courses in residence at Mississippi State University) and on presentation through the dean or registrar of an approved school of medicine, dentistry, or medical technology.

3. by successfully completing a single upper-division course beyond the fourth semester in one's native language (if other than English) in a test administered by the Department of Foreign Languages.

4. by successfully completing the fourth semester of that language at MSU.

5. by successfully completing 14 semester credits (or equivalent) in a foreign language.

**Students For Whom English is a Second Language.** Students for whom English is a second language must fulfill the English and foreign language requirements as stated in this bulletin. Most majors allow these students to use their native languages to fulfill the foreign language requirement. But students planning to use their native languages in order to satisfy the foreign language requirement are urged to check with their major department to determine if that language is acceptable to the department. As far as the College of Arts and Sciences is concerned, students may use their native language to satisfy the foreign language requirement provided that:

1. the language is a recognized mode of communication in conducting official business in a given country and taught in the primary and secondary schools of the country (regional languages and dialects do not qualify as official languages);

2. the Department of Foreign Languages has the expertise to administer a test in the language, or, where such expertise is not available, the student takes the initiative to take a test in the language from those administered through the National Testing Service, or by another certifiable agency;

3. the language meets specific departmental requirements.

In English, a maximum of 12 semester hours total of English as a Second Language (ESL) and freshman composition courses (including the required EN 1103 and EN 1113) may be counted for graduation. Proper placement of international students from ESL courses into English composition courses is important to students' academic success.

International students with a TOEFL score of 525 or higher should be placed in EN 1103. If their TOEFL score is 475-500, they should be placed in EN 1133; if their TOEFL score is 501-524, they should be placed in EN 1143. Once EN 1143 is passed, such students should be placed in EN 1103.

**ENGLISH and FOREIGN LANGUAGES REQUIREMENTS**

The English and foreign language requirements apply to all Arts and Sciences students. Since departments have the authority to require specific foreign languages for their majors, students must become familiar with the language required by their individual major. The foreign language requirement is ordinarily satisfied:

1. by proving competency in any foreign language (including one's native language, if other than English) in a test administered by the Department of Foreign Languages.

2. by successfully completing a single upper-division course beyond the fourth semester in one's native language (if other than English) at MSU.

3. by taking two years of one foreign language in high school and successfully completing the third and fourth semesters of that language at MSU.

4. by taking three years of one foreign language in high school and successfully completing the fourth semester of that language at MSU.

5. by successfully completing 14 semester credits (or equivalent) in a foreign language.

**ARTS & SCIENCES CORE**

In order to satisfy College graduation requirements, students seeking B.A., B.S., B.F.A., or B.S.W. Degrees must take the number of courses indicated in each of the areas below. By satisfying these College requirements, students will simultaneously satisfy all analogous University Core requirements.

B.A. and B.S.W. students must complete twenty-four hours in Humanities and twelve hours in Social Sciences in addition to the two courses in the Humanities and Social Sciences required of all majors. Hence, a student must complete a total of 18 hours in the Humanities (EN, HI, PHI, REL), AND 18 hours in the Social Sciences (AN, CO, EC, GR, PS, PSY, SO).

These additional 24 hours are not limited to the courses listed which follow; they may be satisfied by others in EN, PHI, and REL or in AN, EC, GR, PS, PSY, SO as long as they satisfy the distribution requirements for the major.

While all of the courses below satisfy college-wide requirements, individual departments may require that particular courses in each area be taken to satisfy requirements for their majors.

**NOTE:** Courses listed on the same line, separated by “or” cannot be taken in combination. Students will not receive credit in Arts & Sciences for two courses which are listed on the same line.
Basic Skills

English Composition (6 hours)
- EN 1103 English Comp I or
- EN 1165 Accelerated Comp I or
- EN 1185 Honors Comp I
- EN 1113 English Comp II or
- EN 1175 Accelerated Comp II or
- EN 1195 Honors Comp II

Public Speaking (3 hours)
- CO 1003 Fundamentals of Public Speaking or
- CO 1093 Honors Oral Communication

Foreign Language
- 4 semesters One Foreign Language (1113 or 1114, 1123 or 1124, 2133, and 2143)

Fine Arts (one course required)
- ARC 1013 Architectural Appreciation
- ARC 2313 History of Architecture I
- ARC 3313 History of Architecture II
- ARC 3323 History of Architecture III
- ART 1013 Art History I
- ART 1023 Art History II
- ART 1113 Art Appreciation or
- ART 1193 Honors Art Appreciation
- ART 3143 Italian Renaissance in Art History
- CO 1503 Intro to Theatre
- MU 2213 History and Literature of Music I
- MU 2323 History and Literature of Music II
- MU 1113 Music Appreciation
- PE 1123 History and Appreciation of Dance

Humanities (EN, HI, REL, PHI)
- B.S., B.F.A., and B.S.W. degrees require one EN and one HI from the core listing.
- B.A. and B.S.W. require one PHI course plus 3 other humanities (not necessarily on the following list). These three courses should cover at least two areas.
- EN 2203 Intro to Literature (Not applicable if EN 1183 or 1193 taken)
- EN 2213 English Literature or
- EN 2383 Honors English Literature I
- EN 2223 English Literature or
- EN 2395 Honors English Literature II
- EN 2423 American Literature I
- EN 2253 American Literature II
- EN 2273 World Literature I
- EN 2283 World Literature II
- HI 1063 Early U.S. History
- HI 1073 Modern U.S. History
- HI 1083 Problems in American Civilization
- HI 1163 World History Before 1500
- HI 1173 World History Since 1500
- HI 1183 Problems in Modern World Civilization
- HI 1213 Early Western World
- HI 1223 Modern Western World
- HI 3813 Modern Latin America

B.A. and B.S.W. majors must take at least 1 PHI course.
- PHI 1103 Intro to Philosophy or
- PHI 1183 Honors Intro to Philosophy
- PHI 1113 Intro to Logic
- PHI 1123 Intro to Ethics or
- PHI 1193 Honors in Ethics
- PHI 3023 History of Western Philosophy: Part I
- PHI 3033 History of Western Philosophy: Part II
- PHI 3013 Business Ethics
- PHI 2133 Intro to Aesthetics
- REL 1103 Intro to Religion
- REL 3213 World Religion: Part I
- REL 3223 World Religion: Part II

Social and Behavioral Sciences
- B.S. and B.F.A. - two courses in different disciplines.
- B.A. and B.S.W. - courses spread over at least 4 disciplines, max of 1 in EC, max of 2 in each remaining discipline. Of the six, only two required to be from the listing.
- AN 1103 Intro to Anthropology or
- AN 1193 Honors Intro Anthropology
- AN 1343 Intro To Biological Anthropology
- AN 1143 Intro Cultural Anthropology
- AN 1543 Intro Archaeology
- CO 1223 Intro to Communication Theory
- CO 1403 Intro to Mass Media
- EC 2113 Principles of Macroeconomics or
- EC 2183 Honors Macroeconomics
- EC 2123 Princ Microeco or EC 2193 Honors Microeco
- GR 1123 Intro to World Geography
- GR 2013 Cultural Geography
- GR 3113 Conservation of Natural Resources
- GR 4123 Urban Geography
- GR 4203 Geography of North America
- PS 1113 American Government or
- PS 1193 Honors in American Government
- PS 1313 Intro to International Relations or
- PS 1393 Honors International Relations
- PS 1513 Comparative Government or
- PS 1593 Honors Comparative Government
- PS 2713 Politics of the American Bureaucracy
- PSY 1013 General Psychology or
- PSY 1093 Honors Psychology
- PSY 2513 Psychology of Adjustment
- PSY 3073 Psychology of Interpersonal Relations
- SO 1003 Intro to Sociology or
- SO 1093 Honors Intro to Sociology
- SO 1103 Contemporary Social Problems
- SO 1203 Marriage and Family

Computer Literacy
- 3 hour course required. Consult advisor.

Mathematics & Statistics
- Either 2 courses required or one MA course at the level of MA 1463 or higher.
- MA 1313 College Algebra or
- MA 1303 Quantitative Reasoning
- MA 1323 Trigonometry
- MA 1463 Finite Math
- MA 1613 Calculus for Business and Life Sciences I
- MA 1713 Calculus I or
- MA 1763 Honors Calculus I
- MA 1623 Calculus for Business and Life Science II or
- MA 1723 Calculus II or
- MA 1773 Honors Calculus II
- MA 2733 Calculus III or
- MA 2783 Honors Calculus III
- MA 2743 Calculus IV or
- MA 2793 Honors Calculus IV
- MA 3113 Introduction to Linear Algebra
- ST 2113 Statistics for the Behavioral Sciences or
- ST 3113 Introduction to Statistical Inference

Natural Sciences
- 3 courses required, 2 with labs. B.A., B.S.W., and B.F.A. Majors must take 1 lab course in the Life Sciences BIO or EPP and 1 in the Physical Sciences CH, GG, GR, PH.
- BIO 1004 Anatomy and Physiology
- BIO 1033 Biological Sciences or
- BIO 1023 Plants and Humans or
- BIO 1123 Animal Biology
- BIO 1203 Plant Biology or
- BIO 1023 Plants and Humans
- BIO 1504 Principles of Zoology or
- BIO 1123 Animal Biology
- BIO 3103 Genetics I or equivalent
- BIO 3304 Parasitology
- CH 1043 Chemistry or
- CH 1213 Fundamentals of Chemistry
- CH 1053 General Chemistry or
- CH 1223 Fundamentals of Chemistry or
- CH 1253 Honors in Chemistry
- CH 1051 Experimental Chemistry
- CH 1211 Investigations in Chemistry
- CH 1221 Investigations in Chemistry
- EPP 4154 General Entomology
- GG 1111 Earth Science I Lab
- GG 1113 Survey of Earth Science I
- GG 1121 Earth Science II Lab
- GG 1123 Intro to World Geography
- GR 1114 Elements of Physical Geography
- PH 1041 Physics Laboratory
- PH 1042 Physics of Sound and Music
- PH 1011 Physical Laboratory I
- PH 1063 Descriptive Astronomy
- PH 1021 Physical Science Lab 2
- PH 1013 Physical Science Survey I
- PH 1023 Physical Science Survey II
- PH 1113 General Physics or
- PH 2213 Physics I or PH 2283 Honors Physics I
- PH 1123 General Physics
- PH 2223 Physics II
- PH 1133 General Physics
- PH 2223 Physics II or PH 2293 Honors Physics II

Junior/Senior Writing
- 3 hours Consult advisor for selections.
ANTHROPOLOGY (AN)
See the Department of SOCIOLOGY, ANTHROPOLOGY, and SOCIAL WORK

ARCHAEOLOGY
See the Department of SOCIOLOGY, ANTHROPOLOGY, and SOCIAL WORK

Department of ART (ART)
Professors: Bartlett, Funderburk, Gootee, Mixon and Seckinger;
Associate Professors: Chupa, DeMarche (head) and Long
Assistant Professors: Elsea, Haupt, Livingston, McCourt, Miller, Ngoh and Runnells;
Instructor: Luck; Lecturers: Paglaro, Poole, Sewell, and Stelioses-Wills;
102 Freeman

Mission
The Department of Art’s primary undergraduate responsibilities include the following: the education of professional artists with emphasis in graphic design and fine arts; the preparation of students for a career or advanced study; the serving of the University with electives and required art courses; and the provision of an active art gallery to serve the University, the community, and region.

Bachelor of Fine Arts
The Bachelor of Fine Arts (BFA) degree is a professional studio degree. The BFA degree is earned after successful completion of an intensive, 4.5-5.5 year program that provides the student with a series of in-depth studio experiences leading to thesis/senior presentation balanced by studies in humanities, communication, mathematics, and sciences.

The BFA degree may also serve as a preparation for graduate studies - usually the Master of Fine Arts (MFA) degree in studio art or design.

Emphasis
In the Bachelor of Fine Arts degree, a student may choose an emphasis in Graphic Design or in Fine Art. In Fine Art the student must select either ceramics, painting/drawing, photography, printmaking, sculpture or a double emphasis.

Program Requirements: “A Program of Excellence”
Adapted in 1998, the Department of Art recognizes Art major students within “A Program of Excellence” in the University by successful completion of the Foundation Portfolio Review (FPR) and continued high academic performance in emphasis courses.

Art major students must earn a grade of “C” or higher in each studio and art history course in the BFA program. (A “D” or “F” would require a repeat of the course until a “C” or higher is attained.) Art major students must earn a grade of “B” or higher in each studio emphasis course, or retake the course until a grade of “B” or higher is attained. (These requirements also apply to all transfer courses submitted for consideration.)

Transfer Requirements
After successful admission to the University, and before application to the Foundation Portfolio Review, transfer students must arrange for a meeting with the Department’s transfer credit committee chair in order to articulate art studio and history credits. This meeting requires the presentation of a comprehensive portfolio of artwork completed in studio courses, as well as course descriptions (and in some cases, syllabi) from classes completed for credit at other institutions. This meeting should take place as soon as possible after admission, but no later than the preregistration advising period of the first semester at MSU. The MSU Department of Art reserves the right to deny or accept transfer courses as applicable to the BFA degree based on portfolio evaluation.

Foundation Portfolio Review Requirements
All art majors are required to present at the Foundation Portfolio Review for sophomores and transfer students. Students may enter emphasis courses (Graphic Design I, Painting II, Printmaking II, Sculpture II, Ceramics II, Photography II) only after successfully completing the Foundation Portfolio Review. The Review is a student presentation and faculty evaluation of a minimum of 18 credit hours completed in studio art (Drawing I, Drawing II, Design I, Design II, 3-D Design, and Intro to Computing for Art/Design). The Foundation Portfolio Review will result in a “pass” or “non-pass” into emphasis. The student who “passes” (by faculty evaluation) may begin the emphasis sequence of courses. A student who receives a “non-pass” evaluation may remain in the art program, and may resubmit a portfolio in the Foundation Portfolio Review that is offered the next year after the “non-pass” evaluation. (A student who receives a “non-pass” twice may continue to take non-emphasis art courses but will not enter an emphasis area and therefore cannot pursue the BFA degree in Art).

The Foundation Portfolio Review is held during December of each year. Due to enrollment demand and limits in resources and classroom space, it must be noted that only the top students will be selected, after review, into the Graphic Design program of emphasis. (The usual acceptance rate is about 75% of those applying.)

Senior Presentation Requirements
Senior graphic design students are required to present a portfolio and senior fine arts students are required to present an exhibition as degree requirements. These final presentation requirements are fulfilled in capstone courses; ART 4643 Advanced Graphics for students in the Graphic Design emphasis; and ART 4083 Senior Honors Research/ART 4093 Senior Honors Thesis for students in the Fine Art emphasis.

Computer and Equipment Requirements in the Graphic Design and Photography Emphases
The Department of Art requires incoming (post review) BFA Art majors with an emphasis in Graphic Design or Photography to purchase certain tools and equipment.

The Graphic Design emphasis student is required to purchase a computer after successfully passing the Foundation Portfolio Review, usually in the sophomore year, and before enrolling in ART 3313 Graphic Design I. Art faculty will prepare an approved list of current software and minimum computer specifications each year.

The Photography emphasis student is required to purchase a camera and, in the digital photography option, a computer, after passing the Foundation Portfolio Review, usually in the sophomore year, and before enrolling in ART 4203 Photography II. Art faculty will prepare an approved list of specific cameras and minimum computer specifications each year.

Financial aid that includes this requirement may be available by contacting the MSU Student Financial Aid and Scholarship office.

Student Materials Fee
Additional fees associated with class materials, technology and laboratory materials are required of students. These range from $10 to $100 per course.

Art Minor
A minor in art shall consist of ART 1123 Design I, ART 1133 Design II (or ART 1223 Drawing II), ART 1213 Drawing I, and at least nine (9) hours in art courses above the 2000 level.

Accreditation
Mississippi State University is an accredited institutional member of the National Association of Schools of Art and Design.
Graduate Studies
The Department also offers a Master of Fine Arts (MFA) degree in Electronic Visualization, with emphasis in either animation or multimedia.

Bachelor of Fine Arts

University and College Core
English Composition (6 hours)

ART 3423 Color Photography I
ART 4103 Typography I
ART 4403 Advertising Design I
ART 4643 Advanced Studio - Graphic Design

Emphasis Studio Electives (15 hours)
Approved Art studio electives

Total hours needed for major: 143
The biological sciences encompass the three basic sub-disciplines of biology: botany, microbiology and zoology. The curricula of the major areas of concentration are designed to provide the student with a broad academic base while offering valuable practical experiences in laboratory and field situations.

The biology curriculum contains a nucleus of basic courses that present unifying principles, and advanced courses in either botany or zoology. Botany may be defined as a scientific study of plants. It is the basic science of all applied fields of work having to do with plants, such as agronomy, forestry, horticulture, plant breeding and plant pathology. Zoology is a basic science of all work having to do with animals such as taxonomy, ecology, physiology.

Microbiology is the study of living microscopic and submicroscopic organisms which are of importance to mankind. Majors in microbiology are prepared to work in food processing plants, plant or animal disease control agencies, pharmaceutical companies, quality control positions, the industrial fermentation industry, and basic research in cell and molecular biology.

Majors offered in the department are the B.S. in Biological Sciences, B.S. in Medical Technology, B.S. in Microbiology, M.S. in Biological Sciences, and the Ph.D. in Biological Sciences.

A senior thesis research in the biological sciences is available to outstanding students. A description of the program and application materials may be obtained from the department office.

**Total hours needed for major: 136**

- General Electives: 36 hours
- Applied microbiology courses are strongly recommended, regardless of the department in which they are offered (for example, Food Micro, Environmental Micro, or Soil Micro). Upper division courses in MDT or BCH are also acceptable. BIO 2004 (Human Anatomy), and BIO 2104 (Human Physiology), BIO 3504 (Comparative Anatomy) and BIO 4502 (Toxicology) are also acceptable. Hours in excess of 6 will reduce the general electives requirement by an equal number.
- Students planning to attend professional schools should check with the faculty advisor for that program to identify additional courses that may be needed. Such courses can be taken for general elective credit.
- For career track, BCH 3613 and 20 hours of general electives are required. For the pre-professional/graduate track, BCH 4603/4613 and 17 hours of general electives are required.
- Students desiring a minor must take General Micro, Bacterial Cultivation, Pathogenic Micro, and elective microbiology courses to total no less than 19 total hours of microbiology course work.

**MEDICAL TECHNOLOGY (MDET)**

Major Advisor: Associate Professor Carol Williams
Office: 102 Harned Biology Building

Medical technologists are prepared for positions in hospital laboratories, clinics, research laboratories, the Public Health Service industry, and in various local, state and federal health organizations.

The medical technology curriculum leading to the Bachelor of Science degree from Mississippi State University includes three years of study at Mississippi State University and one year of study in a hospital School of Medical Technology accredited by the National Accrediting Agency for Clinical Laboratory Sciences. Admission to the hospital school is competitive. A student who has satisfactorily completed the three years on the campus and has gained admission to a hospital school will register for the hospital phase and will be considered to be enrolled at Mississippi State during the final year of study. Graduates are prepared for certification by several national agencies.

**MEDICAL TECHNOLOGY (MDET)**

Major Advisor: Associate Professor Carol Williams
Office: 102 Harned Biology Building

Medical technologists are prepared for positions in hospital laboratories, clinics, research laboratories, the Public Health Service industry, and in various local, state and federal health organizations.

The medical technology curriculum leading to the Bachelor of Science degree from Mississippi State University includes three years of study at Mississippi State University and one year of study in a hospital School of Medical Technology accredited by the National Accrediting Agency for Clinical Laboratory Sciences. Admission to the hospital school is competitive. A student who has satisfactorily completed the three years on the campus and has gained admission to a hospital school will register for the hospital phase and will be considered to be enrolled at Mississippi State during the final year of study. Graduates are prepared for certification by several national agencies.
Chemistry is concerned with the properties and compositions of substances and the transformations which they undergo. Because chemistry is a basic science to many careers, three undergraduate degree programs are offered to provide the needed flexibility for majors. These degrees are the B.S. (ACS), B.S., and the B.A. degrees. A minimum of 136 hours is required for the B.S. degree and 128 hours for the B.A. degree. The department also offers the M.S. and the Ph.D. graduate degrees. Students in other majors may earn a minor in Chemistry by achieving at least a 2.00 average in a total of 22 hours of chemistry with 14 of the hours in upper-division courses and a minimum of 11 of the total hours completed at MSU.

The American Chemical Society (ACS) has continually approved the department and its curriculum since 1941, and awards a certificate to students who complete the B.S. (ACS) program. The B.S. (ACS) program is primarily intended as preparatory for graduate study in chemistry leading to a career in basic research. Graduates could also go directly into research and development positions in industry.

The B.S. (non-ACS) program has more flexibility than the B.S. (ACS) program and the choices of electives are based upon the career choice. Chemistry advisors can help students choose the proper electives for different careers.

The B.A. degree program has a stronger liberal arts emphasis and could serve as a preparation for a secondary teaching career, chemical sales, or further study in a professional school.

Department of COMMUNICATION (CO)
Major Advisor: Ms. C. Anne Harris
Office: 130 McComas Hall

The B.A. degree in Communication is offered. The department offers emphases in Broadcasting, Communication Studies, Journalism, Public Relations, and Theater. Minors are available in all areas. Contact specific advisors for additional information.

BROADCASTING
The broadcast sequence prepares students for work in radio, television, and multi-media. Graduates work in front of and behind the camera, from anchorperson to camera technician. Broadcasting graduates also find jobs in extension service, university relations, and in government and industry.

COMMUNICATION STUDIES
The career track for this area is aimed at positions in corporate and public communication offices. Students preparing for graduate school in Communication and other areas often choose the communication studies curriculum.

JOURNALISM
In addition to occupying positions on newspapers, magazines, and web publication in the state and around the country, graduates of the journalism sequence obtain news-related jobs in university, business, and industrial relations.

PUBLIC RELATIONS
The public relations sequence prepares students for a variety of professional positions. In addition to work with public relations and advertising agencies, graduates are employed by newspapers and broadcasting organizations, banks, churches, hospitals, insurance companies, charitable and political groups and state and federal governments.

THEATER
Students emphasizing theater find positions with regional and repertory companies, with community theater both on stage and off stage, and other professional theater positions in educational institutions, broadcasting, and film.

COMMUNICATION MINORS

A minor in each of the areas of communication (broadcasting, communication studies, journalism, public relations, and theatre) is available. Because of the differences between and among the disciplines of communication, students considering a minor are advised to meet with the department advisor, Ms. Anne Harris, prior to making a decision regarding a communication minor. The communication department endeavors to work with individual students so that the minor field combines appropriately with his/her major field of study. Students with majors in business, agriculture, social science and the humanities are especially encouraged to consider a minor in one of the related communication areas.

Awards and Professional Societies

Students in any of the areas of communication with superior averages after completing certain courses may qualify for membership in the Theta Alpha Chapter of Lambda Pi Eta, the official honor society of the National Communication Association. Students in theatre may be tapped for Alpha Psi Omega honorary after completing certain work in theatrical productions.

Professional societies are available for students in many of the emphasis areas. The Public Relations Student Society of America and the Public Relations Association of Mississippi provide pre-professional experience and contacts for students of public relations. Blackfriars is available to students of theatre. The Society of Professional Journalists serves students of journalism and broadcasting. The Student Broadcasting Association serves students in broadcasting emphasis; this group is directly involved in the production of several television programs. The communication student council, comprised of one officer and one representative of each student group, provides coordination and leadership within the departmental student body.

Numerous scholarships are available in the Department of Communication. The Phillips Scholarship, the Weems Scholarship, the Guyton Scholarship, the Turner Catledge Scholarships, and the Founders Scholarships are offered annually to outstanding communication majors. The Paul Mabry Scholarship is awarded annually to one or more promising theatre students. Applicants may pick up necessary forms in the department office or by contacting the Chair, Scholarship Committee, Drawer PF, Mississippi State, MS 39762. Students interested in the Mabry Scholarship should contact the coordinator or theatre at the same address.

Programs of Study

Students who major in Communication select from several areas of emphasis: broadcasting, communication management, journalism, public relations, or theater. The total major consists of 45 semester hours in Communication courses: 12 hours of the departmental core; 15 hours of the professional core (which must be completed at Mississippi State University); and 18 hours of additional specified work in the area of emphasis. In addition, students complete the Arts & Sciences core curriculum and electives for a total of 128 semester hours leading to the B. A. Degree.

1. A minimum grade of C in all Communication courses (or approved substitutes) is required. Students earning a grade lower than C in a Communication course must retake that course.
2. Students must complete the departmental core with a minimum grade of C before enrolling in any CO course numbered 3000 or higher. The core consists of: CO 1003, CO 1223, CO 1403, and CO 1503.

3. Incoming freshmen must earn a score of 20 or higher on the ACT Enhanced English sub-scale before entering the major. Students who believe that ACT does not accurately assess their language ability and who can present evidence of above average language skills (e.g., English grades, extensive writing samples, etc.) will be given the opportunity to satisfactorily complete a screening test and gain admission to the major.

4. No transfer student will be accepted who has not earned a minimum 2.0 GPA on all college work attempted prior to entering the major.

Prospective students are reminded that Communication is a language intensive discipline. Students with only minimal oral and written language competency should expect to be at a competitive disadvantage in classes as well as in careers after graduation. Transfer students with less than a C in English composition courses may have difficulty with the advanced writing courses required in this major.

* May need to be taken at Upper Division level to meet A&S LD requirement.
** CH, GC, or PH; see University CORE.
*** BSC, EPP, or PC; see University CORE.
**** Not required to be selected from core listing.
++ Must be from 2 different areas and must cross 4 disciplines over the 18 hours. Not required to be selected from core. But may have to be taken at Upper Division level to meet 52 hours A&S LD requirement. Only one Economics allowed.
+++ CO 1223 or CO 1403 will count as 3 additional Social Science hours to reach 12 hour elective total.
Economics is the scientific study of how people and institutions make choices concerning the use of society’s scarce resources. It is a broad social science that shares common interests with both the behavioral sciences (e.g., sociology and psychology) and the decision sciences (e.g., finance and management). The importance of economic analysis is recognized by being the only social science in which a Nobel Prize is awarded. Economics students receive training in the methods and uses of economic analysis as applied to households, businesses, and governments.

The study of economics offers students many career options. Economics majors are found pursuing careers in industry, trade, finance, law, government, and education. An economics major or minor also helps prepare the student for graduate/professional training in business, public administration, and law. The flexibility of the economics major is reflected in relatively high starting salaries and lifetime earnings of economists. Undergraduates at Mississippi State may pursue an economics major through either the College of Arts and Sciences (B.A. degree) as described below or through the College of Business and Industry (B.B.A. degree). The business program in economics is described later in this Bulletin.

**Economics Major**

Students seeking the B.A. with a major in economics are required to complete all College of Arts and Sciences and University common and core requirements. Majors take the following mathematics sequence: MA 1313 College Algebra, MA 1613 Calculus for Business and Life Sciences (MA 1713 Calculus I may be substituted), and ST 2113 Statistics for the Behavioral Sciences. Economics majors are required to take the Principles of Economics course sequence (EC 2113 and EC 2123), the Intermediate Economics course sequence (EC 3113 and EC 3123) and 15 hours of advanced electives. Elective courses should be chosen with the advisor’s approval and used to enhance the student’s overall program. Although not required, economics majors may elect to pursue a minor in another discipline with the advisor’s approval.

**Economics Minor**

A minor in economics is attained by selecting, in consultation with the economics minor advisor, at least fifteen hours of economics course work. Three hours of courses from finance (FIN) or agricultural economics (AEC) may be applied to the economics minor with approval from the advisor. All economics minors must register with the economics minor advisor in the Department of Finance and Economics, 326 McCool Hall. Students with majors in business, engineering, agriculture, the social sciences, mathematics, and pre-law are especially encouraged to consider the economics minor.

**Advising and Honors Organization**

Academic advising and career counseling are available from the economics faculty for both majors and minors. Students interested in the study of economics should contact the Department of Finance and Economics, 326 McCool Hall. Any student who completes 12 credit hours of economics with a minimum GPA of 3.0 and has an overall GPA of 3.0 or higher is eligible for membership in Omicron Delta Epsilon, the international honor society in economics.

Department of ENGLISH (EN)
Major Advisor: Linda Brasher

The study of English not only gives students knowledge of language and literature but also helps to develop their ability to read perceptively, think critically, analyze problems, and write correctly and persuasively. For this reason, a major in English has traditionally been viewed as good training for careers in law, government, business, and publishing, as well as for careers in teaching and writing.

The department offers an undergraduate major (B.A.), a minor in English, and an M.A.

The Department of English awards several scholarships annually: the Howell H. Gwin Scholarships to an outstanding junior majoring in English and to two entering graduate students in English; the George B. Nutt Scholarship to a freshman declaring an English major or to a sophomore or junior English major; the William H. Magruder Scholarship to an upper-division or graduate English major; and the Eugene Butler Creative Writing Scholarship to an undergraduate or graduate student. The Department of English sponsors Xi Kappa Chapter of Sigma Tau Delta National English Honor Society; memberships are offered by invitation to scholastically qualified junior and senior undergraduate students and to second-year graduate students who are English majors. The Department of English also sponsors a writing contest and a book-collecting contest and publishes annually Winning Essays, a collection of prize-winning freshman themes, and The Jabberwock Review, a student-edited collection of literature and art.

In addition to two semesters of freshman composition, which the department recommends be taken at the 1163/73 level or above, English majors take EN 2213, 2223, 3363 (or 2243 and 2253), 3413, and at least 21 additional hours of English electives, of which 15 hours must be at the 4000 level. English electives include courses satisfying the following group requirements:

Group I (one course): EN 4503, 4513, 4523, 4533, 4703, 4713
Group II (one course): EN 4463, 4653, 4723, 4733, 4863, 4883
Group III (two courses): EN 4333, 4343, 4903, 4913, 4923, 4933
Group IV (one additional course): to be taken from either Group I or Group II

No more than one experimental course may be counted toward fulfillment of the English elective requirements. For students who have taken EN 1163 or EN 1183, EN 2203 does not count toward fulfillment of the English elective requirements.

English majors should take HI 3743, History of England, in fulfilling the Arts and Sciences B.A. common curriculum requirements.

1. English majors must maintain at least a 2.5 GPA in all upper-division English courses. Students who fall below a 2.5 GPA must bring it up to 2.5 the next semester or drop the English major.
2. English majors must attain a C or better in all English courses at the 2000 level or above in order for those courses to count toward the requirements of the major.
3. English majors must take 15 hours at the 4000 level in residence at MSU.

Students seeking secondary-school teaching certification should consult with an English advisor.

English minors take at least 18 hours of English electives beyond completion of the freshman composition requirement of their major. Of these hours, at least six must be at the 4000 level, and taken in residence. Students should consult the English major advisor to plan a minor program which will complement their major studies and career interests.

- **Total hours needed for major: 128**

(Must maintain a 2.5 GPA in upper-division English courses. Must make a grade of C or higher in all upper-division English courses. Must complete 32 upper division A&S hours. Must take 15 hours at the 4000 level in residence.)

---

**Department of FOREIGN LANGUAGES (FL)**

Major Advisor: Professor Edmond Emplaincourt (Head)
Associate Professor Robbins-Herring

Office: 300 Lee Hall 1

Foreign language majors prepare for careers in government (State Department, foreign service, diplomatic corps, FBI, CIA, USIA, the military, immigration, etc.), international business, the human services fields, teaching at all levels (secondary school, junior college, university), and other language-related jobs.

Programs of study leading to the Bachelor of Arts (B.A.), the joint Bachelor of Arts and Bachelor of Business Administration, and the Master of Arts (M.A.) in Foreign Languages are offered. A minor in one foreign language may be obtained upon satisfactory completion of 10 semester hours beyond
the intermediate (III and IV) level courses. Education students desiring teacher certification must earn at least 27 semester hours in the language they plan to teach.

The Department sponsors three honor societies: Pi Delta Phi (French), Delta Phi Alpha (German), and Sigma Delta Pi (Spanish). Information about membership requirements may be obtained from the Head of the Department. The Department also sponsors language clubs which provide social and cultural activities for faculty and students.

The Bachelor of Arts in Foreign Languages is awarded upon the successful completion of a minimum of 128 semester hours, including the following areas: (The hours needed for graduation will depend upon the entry level of study into the major language; a minimum of six courses in the primary language at the 3000-level, or higher, is required.)

1. University CORE Requirements
2. Bachelor of Arts Common Requirements
3. FL 3203, FL 3313, FL 4013, or approved substitute(s).
4. 30 semester hours in the primary language (French, German, Latin, Russian, Spanish). The normal sequence is FLF/G/S I, II, III, IV, Advanced FLF/G/S I, Advanced FLF/G/S II, Survey FLF/G/S I, Survey FLF/G/S II, and 6 hours of upper-division electives in the primary language. A civilization course related to the primary language is strongly recommended.
5. Completion of the fourth semester course of a second foreign language (12-14 semester credit hours) is recommended.

Foreign Language majors interested in following this recommended course of study should notify the Department Head as soon as possible, so that a plan of study can be developed in which courses are taken in proper sequence.

B.A. in Foreign Languages

International Business Program
A Five-Year Double Degree Program:
B.A. in Foreign Languages &
B.B.A. in General Business Administration

John O. Lox, Director
International Business Academic Program Office
355-356 McCool Hall
Major Advisors, Business Administration:
Professor Capella; Associate Professor Addy
Assistant Professors Peyrefitte, Phelps, and Rezck
Major Advisors, Foreign Languages:
Professor Emplaincourt;
Associate Professors Jordan and Robbins-Herring;
Assistant Professor Lestrade
300 Lee Hall

The International Business Program provides students an academic background and work experience to help ensure success in the marketplace. Students receive a double degree at graduation reflecting the dual concentration in Arts & Sciences: B.A. (language and cultural proficiency); and in Business: BBA (with an international focus + a specific discipline like Marketing or Finance). This is in addition to the first two years of study developing abilities in writing, math, sciences, and computer literacy.

The hallmarks of this program is a work internship, a cross country work experience of a full summer or one semester duration (generally taken in the last of the 4th year or beginning of the 5th year). This work is ideally reflective of the student’s specific business discipline and language proficiency area. The student who selects to separate the work and abroad experience must petition the IB committee for approval. Minimum acceptable levels are: 1) WORK: 10 continuous weeks of international tasks and responsibilities; 2) ABROAD: 6 continuous weeks in one location for cultural immersion. An International Business Co-Op Work program offers 3 semesters paid international work experience in concert with pursuing the academic degrees.

The total number of semester credit hours (SCH) will be 154 for most students. The program has five main components:
1. a core of basic skills, including courses in writing, mathematics, sciences, and communication (30 SCH, or 10 courses);
2. a core of humanities and social science courses selected to fit the special needs of international business majors, emphasizing both the history and culture of other societies and the ways these societies relate to our own (27 SCH, or 9 courses);
3. intensive training to develop proficiency in one foreign language and its associated cultures and literatures (37 SCH or 11 courses);
4. a thorough grounding in business techniques and practices, including 33 SCH of general business courses, 12 SCH of International Business courses, and 12 SCH in one of six functional/discipline emphases in business (accounting, banking and finance, management information systems, economics, management, marketing*, or risk management, insurance and financial planning*) (57 SCH, or 19 courses);

5. a one-semester internship program with an international business (3 SCH).

Students interested in following this recommended course of study should notify the Department Head of Foreign Languages and the Director of International Business Academic Program as soon as possible so that a plan of study can be developed in which courses are taken in the proper sequence.

- IB 4903 Internship Work/ Academic Report
- 2 hours Free Electives

**Total hours needed for major: 154**

(Must have 32 upper division A&S hours)

---

**GENERAL LIBERAL ARTS (GLA)**

**Advisor:** Mark Goodman

Office: 106 McComas

Students who prefer to specialize in more than one field of study may earn a B.A. degree in General Liberal Arts. Requirements for this degree include all of the following: satisfactory completion of the University and College Core curriculum; satisfactory completion of the College of Business and Sciences B.A. requirements; approval of the proposed G.L.A. program; satisfactory completion of twelve hours of upper-division courses (courses numbered 3000 and above) in each of three fields of study. The three fields may all be within the College of Arts and Sciences, or one of the three may be within another school/collar of the University if that field is related to the student’s educational or career goals. To insure an orderly progression of work toward the degree, interested students should meet with the program’s advisor as early as possible. Furthermore, admittance into the program requires g.p.a. of at least 2.5 and the approval of the GLA Committee and the Associate Dean of the College of Arts and Sciences. General Liberal Arts is not suitable for students who are uncertain about their choice of a major; these students should see the Undecided listing in this section.

**University and College Core**

  - EN 1103 English Comp I or EN 1163 Accelerated Comp I or EN 1193 Honors Comp I
  - EN 1113 English Comp II or EN 1173 Accelerated Comp II or EN 1193 Honors Comp II

- **Public Speaking (3 hours)**
  - CO 1003 Fundamentals of Public Speaking or CO 1093 Honors Oral Communication

- **Foreign Language (12-14 hours)**
  - 4 semesters one Foreign Language (see advisor)

- **Humanities (6 hours)**
  - 3 hours Literature - see Major Core
  - 3 hours History - see A&S listing

---

---
For various reasons, a student may not require the intensive preparation that is typical of a professional curriculum. The general science curriculum is tailored for his/her needs. Flexibility is the key characteristic of the curriculum. The general science program is designed to give students a broad general education and at the same time teach them the fundamentals of science. By judiciously choosing his/her course of study, a student may use the general science curriculum in many ways. For example, by concentrating on biological science or chemistry the student may prepare for medical or dental school, and with appropriate choice of electives preparation for clinical and other laboratory positions in such fields as public health and marine biology is possible.

If the student is interested in interdisciplinary studies related to environmental science, the general science curriculum is suitable. Any one of the physical or biological sciences may be emphasized. The curriculum, however, involves courses from several sciences, and from other fields concerned with the environment. Persons trained in this option should be in demand in federal, state, and local governmental agencies, and in industries involved with earth resources.

Successful completion of the University and curriculum requirements will result in the awarding of a B.S. degree in General Science.

The following specific requirements apply to all general science students:

1. The B.S. Common Curriculum must be satisfied.
2. A minimum of 60 credit hours in science, of which at least 30 must be in one science, is required.
3. Usually, science courses must include: BIO 1504, BIO 3103, CH 1213 & 2211, CH 1223 & 2221, CH 4513 & 4511, CH 4523 & 4521, PH 1113, & PH 1123, GG 1113 & GG 1111, etc.
4. Electives must be approved by the faculty advisor.
5. A total of 136 credit hours is required.

**Department of GEOSCIENCES**

Professors: Binkley, Mylroie, Schmitz, and Wax; Associate Professors: Dewey and Panuska; Assistant Professors: Brown, Lynch, Mack, and Rodgers; Instructors: Gillham, Gustin, Haby, Meloche, Miller, Joan Mylroie, Ruffin, Verno, and Zellers; Office: 109 Hilbun

B.S. and M.S. degrees in Geoscience are offered with emphasis in sub-disciplines described below. Minors are offered at both B.S. and M.S. levels in Geoscience.

The Department of Geosciences strives for an integrated, interdisciplinary study of the whole Earth at both the bachelor and master of science levels. Course offerings are grouped into four areas of emphasis: 1) Geology - physical, biological, and chemical aspects of the Earth; 2) Geography - distribution of physical features and human interaction with the Earth; 3) Environmental Geoscience - conservation and management of Earth resources and remediation of natural and human hazards; and 4) Broadcast Meteorology/Climatology - atmospheric characteristics, climatic variability, and radio/television weathercasting. A general program of study is built upon a foundation of natural and social sciences, humanities, and computer applications. The Geoscience curriculum provides fundamental training for future employment in the petroleum and environmental industries, education, and governmental agencies.
state and federal government agencies; environmental consulting; meteorological/climatological consulting; weathercasting on radio and television; and advanced studies in graduate school.

Within the four areas of emphasis outlined above, a student may further focus interests in a variety of areas including: water resources, hydrogeology and environmental clean-up and monitoring, petroleum exploration and services, construction and urbanization involving geological applications, geophysics and geochemistry, sedimentary geology and paleontology, Quaternary geology and karst phenomena, paleomagnetism, Geographic Information Systems or analysis and prediction of weather and climate. A minimum of 40 credit hours in geoscience courses is required for the geoscience degree. Students in the professional geology concentration are required to take the Association of State Board of Geologists (Fundamentals of Geology) exam.

A minor in geoscience consists of a minimum of 14 credit hours in courses numbered 2000 and above, in addition to the first year courses. The following are examples of variations within a geoscience minor. A minor with a Geology emphasis should include physical (GG 1113/1011) and historical geology (GG 1123/21) plus 14 hours 2000 and above for a total of 22 hours; for an Environmental Geoscience emphasis, physical and historical geology with laboratory plus introduction to environmental geology (GG 3133) and other course work 2000 and above for a total of 22 hours; for emphasis in Geography and Broadcast Meteorology/climatology, physical geography (GR 1114) and either introduction to environmental geology (GR 3133) or conservation of natural resources (GG 3113) and other course work 2000 and above for a total of 21 hours. Minors in Geoscience are also available at the M.S. level.

Three scholarships are available to students majoring in Geoscience, namely the F.E. Mellen, the Gordon W. Gulmon, and the Dunn Memorial Scholarships. The Mellen Scholarship provides financial assistance to those enrolled in field geology camp during the summer. The Gulmon and the Dunn Memorial Scholarships are awarded to students for academic excellence. All are restricted to students at junior or senior rank.

The Department of Geosciences encourages involvement in Sigma Gamma Epsilon, a nationally recognized honorary Earth Science society. Requirements for acceptance include a grade-point average of at least 3.00 in 12 or more hours of geoscience and a cumulative average of 2.67.

The Department of Geosciences participates with the National Weather Association (NWA) and the American Meteorological Society (AMS) in training individuals for the respective “Weathercaster Seals of Approval”. The Office of the State Climatologist and the MSU Climatology Laboratory are housed in the Department and are strongly involved in programs for all students with interests in broadcast meteorology and climatology.

DISTANCE LEARNING PROGRAMS

The Department of Geosciences offers three distance learning programs listed below. Each program utilizes DVD’s, and the internet for course instruction.

Broadcast Meteorology Program. A three-year, 17 course, 52 credit hour program of study that can lead to a B.S. degree in Geosciences. Primarily for individuals in television weather.

Operational Meteorology Program. A three-year, 17 course, 52 credit hour program of study that can lead to a B.S. degree in Geosciences. Enrollment is restricted to members of the United States Armed Forces.

Teachers in Geoscience Program. A two-year, 12 course, 36 credit hour program of study that leads to a M.S. degree in Geosciences. Primarily for K-12 teachers. An additional two-year, 10 course, 30 credit hour program of advance course work is available.

Total hours needed for major: 136

Health Information Management Curriculum (Bioh)

Major Advisor: Professor Don Downer
Office: 226 Harned Hall

The health records administration curriculum is designed to prepare students for careers as administrators in charge of hospital medical records. Completion of the two-year curriculum qualifies a student for admission to the University of Mississippi Medical Center at Jackson or some other medical center offering a medical records administration program. The clinical work must be taken at a school having a program approved by the Council on Medical Education for Hospitals of the American Medical Association and the American Medical Record Association. Students who satisfactorily complete the pre-professional and professional training will be awarded the B.S. degree by the professional school and will be eligible to take the examination administered by the American Medical Record Association for certification as a registered medical records administrator.
Among the humanities disciplines, history is unique in the emphasis it places on interpreting the human experience within the context of time. Past, present, and future are a continuum in which human beings and societies evolve along more or less predictable lines; the present is a product of the past just as the future is the product of present. History is a humane study that emphasizes the importance of people, their individual choices, and the values they hold. It also provides the indispensable background, the social and political context, for other academic disciplines and branches of knowledge.

Specialization in history on the undergraduate level has direct professional application in the field of secondary education and provides excellent preparation for careers in law, the ministry, communication, journalism, government service, the military, and business. The department maintains a close working relationship with other departments on campus, making it possible for students who desire to do so to pursue double majors, joining history with geography, English, political science, business, computer science, or other fields.

To earn a Bachelor of Arts degree with a major in history, a student must pass a minimum of 39 semester hours in history with a 2.50 average in those courses. All undergraduates majoring in history must complete two of the following basic sequences: HI 1063/1073; HI 1163/1173; HI 1213/1223; HI 1313/1323. Upon completion of these basic surveys majors are required to take a minimum of two upper division courses in United States history, two upper division courses in African, Ancient, Asian or Latin American history plus two upper division electives in any area of history. At the beginning of their junior year majors must enroll in and pass with a grade of “C” or better, a course in Historiography and Historical Method (HI 3903). Fifteen hours of the upper division work (3000 and 4000 level courses) must be taken at Mississippi State. For a minor in history, a student must take a minimum of 18 hours of history including HI 1163 or 1213 and HI 1173 or 1223 plus twelve additional credit hours in history courses numbered 2000 and above including at least one at the 4000 level. Students interested in a major or minor in history should consult one of the advisors listed.

The Department of History offers work leading to both the M.A. and Ph.D. degrees. The prerequisite for admission to a graduate program in history is a minimum of 18 hours of undergraduate history courses. Students desiring to pursue graduate studies should consult the Graduate Coordinator.

Mississippi State has a chapter of Phi Alpha Theta, the international history honorary society. Those interested in the eligibility requirements should consult with Professor Connie Lester in the history department.

**JOURNALISM**

See Department of COMMUNICATION

**Department of MATHEMATICS (MA) and STATISTICS (ST)**

Major Advisors: Professor Bruce Ebanks
Associate Professors Seth Oppenheimer and Michael Pearson
Office: 410 Allen Hall

Training is offered in the field of mathematics leading to the degree of (1) Bachelor of Arts (128 hours) or (2) Bachelor of Science (136 hours). The Bachelor of Arts program is for those students who want a general liberal arts degree with a major in mathematics. Those interested in graduate study in applied mathematics or in industrial employment are advised to elect the Bachelor of Science degree. Students wishing to obtain a mathematics secondary teaching certificate within the College of Arts and Sciences may do so under either program. The department also offers minors in mathematics and statistics.

Candidates for the Bachelor of Arts degree are required to complete a minimum of 36 semester hours (carrying at least two quality points for each credit hour) of mathematics. A course whose content is below the level of MA 1713 does not satisfy any part of this requirement. Mathematics majors take MA 1713, 1723, 2723, 2743, 3113, 3253, 3163, 3213, 4633-4643, and at least two elective courses numbered 3000 or above. It is recommended that MA 3053 be selected as an elective and taken prior to MA 3163. The required courses should be scheduled in the order listed: the elective courses may be scheduled at any appropriate time during the junior or senior year. Majors must satisfy the common curriculum of the College of Arts and Sciences. In addition, 3 hours of computer science is required. The foreign language requirement may be satisfied by the completion of the College of Arts & Sciences foreign language requirements. Additions to the preceding requirements are necessary for teacher certification.

Candidates for the Bachelor of Science degree shall elect a minor from the fields of statistics, physics, chemistry, computer science, a branch of engineering, or some other discipline in which mathematics has extensive application. The minor field shall be approved by the Department of Mathematics and Statistics and the courses forming the minor shall be approved by both the minor department and the Department of Mathematics and Statistics. The minor shall consist of at least twelve semester hours of courses numbered 2000 or above. The required 42 semester hours of mathematics must be
completed with a minimum of 84 quality points. Under the B.S. program, a student may also complete a double major in mathematics and computer science or mathematics and physics, provided the student selects either option during his sophomore year. Other double majors are also possible. By a careful selection of courses, a student may also complete a minor in computer science and fulfill the requirements for a secondary teaching certificate.

Graduate study is offered in the Department of Mathematics and Statistics leading to the degree of Master of Science in Mathematics, Master of Science in Statistics, and a Doctor of Philosophy in Mathematical Sciences. A non-thesis option is available under the Master of Science in Mathematics and the Master of Science in Statistics. Also, the department participates in interdisciplinary programs leading to the degrees of Master of Science in Education, Educational Specialist, and Doctor of Education. Major areas of study include algebra, differential equations, analysis and functional analysis, numerical analysis, topology and applied statistics.

A minor in mathematics consists of MA 1713, 1723, 2733, 2743, 3113, 3253, and at least an additional six semester hours of mathematics courses numbered 3000 or above (carrying at least two quality points for each credit hour). A minor in statistics consists of ST 3113, ST 4213, one of ST 4523 or ST 4543, ST 4111 and two reading courses of ST 4003 to be approved by the department.

STATISTICS (ST)

Associate Professor: Patrick Gerard
Office: 410 Allen Hall

Courses in statistics are designed to satisfy two objectives. The first objective is to provide graduate training for those students wishing to pursue a career as professional statisticians. Both graduate and undergraduate courses are available for this purpose. The second is to provide minors for students from other disciplines. The undergraduate minor in statistics consists of ST 3113, ST 4213, one of ST 4523 or ST 4543, ST 4111 and two reading courses or ST 4003 to be approved by the department.

Graduate study is offered in the Department of Mathematics and Statistics leading to the degree of Master of Science in Mathematics, Master of Science in Applied Mathematics, Master of Science in Statistics and a Doctor of Philosophy in Mathematical Sciences. A non-thesis option is available under the Master of Science degree program. Many applied statistics courses are offered which are suitable for a minor in statistics at the master’s or doctoral level. Specific course requirements for the graduate minor in statistics may be obtained from the Graduate Coordinator of the Department of Mathematics and Statistics.

Admission to the master’s program in statistics is open to graduates in all disciplines. The program of study is a blend of both statistical theory and statistical methods, and it provides graduate students with the opportunity to participate as statistical consultants on real projects through the Center for Statistical and Mathematical Services. In addition, there is ample flexibility in the non-thesis option to allow a graduate student with special interests in an area of statistical application to minor in that particular applied field. The department awards a limited number of teaching assistantships. For further details, consult the Coordinator of Graduate Studies, P.O. Box MA, Mississippi State, MS 39762.

MATHEMATICS and COMPUTER SCIENCE:
A DOUBLE MAJOR PROGRAM (CSMA)

Major Advisors: Professor Bruce Ebanks (410 Allen)
Associate Professors Seth Oppenheimer and Michael Pearson (410 Allen)

The Department of Computer Science and the Bachelor of Science degree program in computer science have been administratively relocated to the College of Engineering. In part as a result of this relocation, the program in Mathematics and Computer Science is undergoing significant revision. Students who are not currently CSMA majors but have an interest in the program should consult with the Undergraduate Coordinator for the Department of Mathematics and Statistics in Allen 410; students already enrolled in the CSMA program should continue to meet with their regular faculty advisors.

Department of PHILOSOPHY and RELIGION

PHILOSOPHY MAJOR (PR)

Associate Professors Michael Clifford, Lynn Holt (Head) and Jay Keeley
Assistant Professors Yolanda Estes and Glenn Kuehn
Office: 29-30 President Circle

Philosophy is the study of the basic concepts—which as reality, truth, and goodness—which underlie the more specialized pursuits of science, art, education, religion, etc. Although students often study philosophy for its own sake, the general perspective it provides, and the rational skills it develops, are of immense practical value in any profession.

The baccalaureate degree in philosophy is the accepted major for those planning to enter graduate school in philosophy. It is, however, an excellent pre-law and pre-seminary degree and, because of its general nature, philosophy is highly appropriate as a double major with any other concentrated field of study.

The standard program leading to the Bachelor of Arts degree in philosophy has a major requirement of 30 hours, including Introduction to Philosophy, Introduction to Logic, Introduction to Ethics, History of Philosophy, Parts I and II, and Seminar in Philosophy. The final 12 hours, including 6 that must be PHI courses, are to be selected in consultation with, and with approval by, the major advisor.

Students considering either a major or minor in philosophy should meet with one of the department’s advisors as early in their careers as possible.

Total hours needed for major: 128
(32 hours must be 3000/4000 from A&S)

Religion Concentration

Major Advisors: Professors Paul Jacobs and Joe Seger
Assistant Professors: Eve Mullen and Jimmy Hardin
Office: 29-30 President Circle
Religion Concentration

Religion refers to the basic human impulse to seek coherence in life, to find that unity which guides and orders human existence. As an academic discipline the study of religion involves consideration of those writings, customs, and rituals that have historically served to form and distinguish religious groups. It includes examination of primitive religions and sectarian developments as well as study of the major world religions of both the east and west.

Some Religion faculty are housed in the Cobb Institute of Archaeology and are cross-appointed to the Institute staff. In addition, there are other archæologists in the Institute, including specialists in the Middle East and Southeastern U.S.

The Department of Philosophy and Religion offers a concentration in religion leading to the Bachelor of Arts degree in philosophy. The baccalaureate degree in religion is an accepted major for those planning to enter graduate school or to prepare for careers in a professional ministry or in teaching. However, because it offers a broad historical and cultural orientation, the religion major offers excellent preparation for any career. It is highly appropriate as a double major, or as a minor in association with any other concentrated field of study.

The major with the concentration in religion has a requirement of 30 hours. Of these 9 hours are required in philosophy. These may be satisfied by taking either a) Introduction to Philosophy, Introduction to Logic, and Seminar in Philosophy, or b) History of Western Philosophy I and II, and Seminar in Philosophy. The remaining 21 hours must include Introduction to Religion and either World Religions I and II, or Introduction to the Old Testament and Introduction to the New Testament. The additional 12 hours, including 6 that must be REL courses, are to be selected in consultation with, and with approval by, the major advisor.

The department also offers a minor in religion, with the requirements being 18 hours in REL courses.

** Must be from 2 different areas and must cross 4 disciplines over the 18 hours. Only one Economics allowed. See advisor.

OCCUPATIONAL THERAPY CURRICULUM (BIOT)

Major Advisor: Professor Don Downer
226 Harned Hall

The supply of occupational therapy graduates falls far short of the demand so that numerous opportunities exist in the field. Mississippi State University does not provide training in physical therapy but does offer the background work necessary to transfer to a professional school. In their admission requirements professional schools differ, some requiring two years of pre-professional study, some three and others four. The two-year curriculum listed below satisfies the requirements of the Mississippi Medical Center in Jackson, where most Mississippi State University students pursue their professional training for three additional years. Sixteen hours of observation are also required. Upon successful completion of the pre-professional and professional work, students are awarded the M.S. degree by the professional school. Students wishing to apply to the University of Mississippi Medical Center should do so by January preceding the September they wish to enter. The University of Mississippi Medical Center only accepts Mississippi residents. Consult with your advisor for an appropriate schedule.

PHYSICAL THERAPY CURRICULUM (BIOP)

Major Advisor: Professor Don Downer
Office: 226 Harned Hall

Mississippi State University does not provide training in physical therapy but does offer the background work necessary to transfer to a professional school. In their admission requirements professional schools differ, some requiring two years of pre-professional study, some three, and others four. The courses listed below satisfy the requirements of the Mississippi Medical Center in Jackson, where most Mississippi State University students pursue their professional training. Forty hours of observation are also required. Upon successful completion of the pre-professional and professional work, students are awarded the M.S. degree by the professional school. Students wishing to apply to the University of Mississippi Medical Center should do so by January preceding the September they wish to enter. The University of Mississippi Medical Center only accepts Mississippi residents.

Admission Requirements

1. provide evidence of observation in a minimum of two physical therapy clinical departments or practices for a total of 40 hours (additional hours and sites are recommended)
2. have a baccalaureate degree
3. submit an official report of GRE scores. The report must include verbal, quantitative and analytical scores
4. return all application materials to the Office of Student Services and Registrar by the admissions deadline, and
5. complete the following prerequisite course requirements:
   Human Anatomy or Comparative Anatomy 1 **
   Human Physiology - 1
   Social Sciences - 2 (including sociology)
   Statistics - 1 (mathematics, psychology)
Department of PHYSICS and ASTRONOMY (PH)

Major Advisors: Joseph L. Ferguson and Jeffry A. Winger
Office: Hilburn Hall

Physics plays a basic role in all science and engineering disciplines. Physics is concerned with the study of the structure of matter, the nature of radiation, and the interaction of radiation and matter. Among the major branches are optical, laser, atomic, nuclear, molecular particle, condensed matter, bio-, astro-, plasma and computational physics. The B.S. program in physics provides an excellent, broadly based course of study with enough electives that the student can pursue his/her special interests in other subjects (for example, mathematics, computer science, chemistry, biology, etc.). The B.S. degree provides the necessary training for either employment in industry or government, or continued study at the graduate level.

The department also has a Physics/Pre-Medical curriculum for those students who wish to compete for admission to medical and dental schools. An applied physics curriculum is available for those who wish to work in research and development or pursue graduate work in applied physics, engineering physics or some branch of engineering. In addition, the department offers the Master of Science in Physics and the Ph.D in Engineering Physics. Information may be obtained by writing the Department of Physics and Astronomy, P.O. Box 5167, Mississippi State, MS 39762. www.msstate.edu/Dept/Physics/

A minor is physics requires 12 hours of physics at the 3000 level or above. These courses should be selected in consultation with a physics advisor.

The following is a recommended physics B.S. curriculum. Requirements for graduation are 136 hours with a GPA of at least 2.0. In addition, the student is required to maintain at least a C average in his/her physics courses.

University and College Core
English Composition (6 hours)
EN 1103 English Comp 1 or
EN 1163 Accelerated Comp I or
EN 1183 Honors Comp I
EN 1113 English Comp II or
EN 1173 Accelerated Comp II or
EN 1193 Honors Comp II
Public Speaking (3 hours)
CO 1003 Fundamentals of Public Speaking or
CO 1093 Honors Oral Communication
Foreign Language (12-14 hours)
4 semesters one Foreign Language - see advisor
Humanities (6 hours)
3 hours Literature - see University CORE
3 hours History - see University CORE
Math (6 hours)
See Major Core
Fine Arts (3 hours)
See A&S Core Listing
Natural Sciences (9-12 hours)
See Major Courses
Social Sciences (6 hours)
See A&S listing

Major Core
Some substitutions for required courses are possible for double majors. Student should check for prerequisites for all courses. Consult advisor.
PH 1001 Intro to Physics
PH 1004 Astronomy
PH 2213 Physics I
PH 2223 Physics II
PH 2233 Physic III
PH 3613 Modern Physics
PH 4113 Elec Circuits

Total hours needed for major: 136
32 hours course work must be A&S 3000/4000

Physics/Pre-Medical Curriculum

For this curriculum the required courses for the physics major are reduced by 9 hours (two physics electives and PH 4413).

MA 3353 Diff Equations II*

Additional recommended courses. Check with Pre-Medical Advisor.
CH 4513 Organic Chemistry I
CH 4511 Organic Chemistry Lab
CH 4523 Organic Chemistry II
CH 4521 Organic Chemistry Lab
BCH 3613 Elem Biochem or

Applied Physics Curriculum

For this curriculum the required physics courses for the physics major are reduced by 6 hours of physics electives.

MA 3313 Num Meth or
ECE 3324 Electromagnetics II is recommended

Total hours needed for major: 120
15 hours Engineering electives recommended; see advisor
## DEPARTMENT of POLITICAL SCIENCE (PS)

### Undergraduate Coordinator: Dr. Diane Wall

Office: 121 Bowen Hall

The Department of Political Science offers a Bachelor of Arts degree (BA) for individuals who have an interest in politics and who seek careers in the law, in federal, state, or local government (either administrative or elective), in the diplomatic service, with international organizations, in the business world, or in teaching. The Department also offers a Master of Arts degree in Political Science (MA), a graduate professional degree in Public Administration (MPA) and a Ph.D. in Public Policy and Administration which prepare men and women for careers in the public service. Interested students should consult the undergraduate or graduate coordinator.

Students pursuing the B.A. degree in Political Science are required to complete PS 1113, PS 4464, EC 1033 or EC 2113, and three of the following introductory Political Science courses: PS 1313, PS 1513, PS 2403 and PS 2703. They must also complete a minimum of seven upper-division elective courses in Political Science (totaling at least 21 credits), of these seven courses, at least one must be completed in each of three of the four subfields of the discipline as displayed in the “Part III: Description of Courses” portion of this Bulletin (American Politics, International Politics, Political Theory, and Comparative Politics).

Political Science majors who wish to teach social studies in Mississippi may become certified by combining the Political Science major with appropriate courses in the College of Education; in Mississippi, it is not necessary to major in secondary education in order to become certified to teach. At the same time, majors in secondary education who plan to become social science teachers should consult a major, or a minor in Political Science.

Students not majoring in Political Science may wish to select a minor. A minor consists of a minimum of 18 hours of course work in Political Science at least 9 of which must be at the 3000 level or above. Interested nonmajors should speak with the undergraduate coordinator to formulate a suitable program of study.

The John C. Stennis Scholarship in Political Science is awarded each spring to at least two graduating high-school seniors and/or community-college graduates who are Mississippi residents, and who plan to major in Political Science at Mississippi State University. These scholarships carry a stipend of $2,000 per year for four years or until graduation, whichever comes first. The Stennis Scholarships are awarded to academically outstanding students who demonstrate the desire and potential to become actively involved in the political and governmental affairs of the community, state, or nation. For further information, consult the Undergraduate or Graduate Coordinator of the Department of Political Science, P.O. Box PC, Mississippi State, MS 39762 or telephone 325-3411.

The Morris W. H. “Bill” Collins Scholarship may be awarded to one African American high school senior who is a resident of Mississippi, who plans to major in Political Science at Mississippi State University, and who demonstrates potential for making contributions in some area of public service. This scholarship carries a stipend of $1,500 per year for four years or until graduation, whichever comes first. For further information, consult the Undergraduate or Graduate Coordinator of the Department of Political Science, P.O. Box PC, Mississippi State, MS 39762 or telephone 325-3771.

The Haley Barbour Scholarship is awarded each spring to one Political Science major, with two years of college remaining, who evidences a determination to become involved in the political life of the nation. The Barbour Scholarship carries a stipend of $1,500 per year for a maximum of two years, typically the recipient’s junior and senior years. Political Science majors may be nominated by faculty for the Barbour Scholarship or make application on their own. For further information and application forms, consult the Undergraduate or Graduate Coordinator of the Department of Political Science, P.O. Box PC, Mississippi State, MS 39762 or telephone 325-3771.

The following is a typical course of study for Political Science majors, but students should consult with their advisors in order to develop a program which is best for them. For more information contact: Dr. Diane Wall at 662-325-7864 or dew1@ps.msstate.edu.

**General Electives (16 hours)**

### Total hours needed for major: 128

(Must have minimum of 32 hours A&S upper division courses.)

* Transfer students receive the stipend for two years or until graduation, which ever comes first.

### UNDERGRADUATE CURRICULUM (LAW)

**Faculty Advisors**

Associate Professor Diane E. Wall, Chair
Office: 121 Bowen Hall

Associate Professor Jay Keeley
Office: 29-30 President’s Circle

Associate Professor Matthew W. Little
Office: 316 Lee Hall
Most directors of law school admissions indicate that a wide variety of majors from various colleges are appropriate for admission to their law school. Since there is no formal pre-law curriculum, a course of study is designed to prepare students for law school in conjunction with the student’s formal major. Essentially, it will provide students contemplating a career in law with a broad-based program of study that focuses on improvement of the student’s skills in oral communication, writing, and analytical reasoning.

Students interested in careers in law are encouraged to speak with a Pre-Law advisor and to participate in various law-related programs such as law school visitations, the Pre-Law Society, and Distinguished Jurist Day. Your pre-law advisor will provide guidance on the law school admissions test (LSAT), law school application process, and on selecting the best law school for you. LSAT and law school applications are available in room 110-B Bowen Hall. For additional information contact: Dr. Diane Wall at 662-325-7864 or dwel1@ps.msstate.edu.

There is no set curriculum but the following are suggested basic courses for a person interested in law school. See your pre-law advisor for additional course suggestions based on your career interest and major.

- **BL 2413** Legal Environment of Business
- **EN 4223** Principles of Legal Writing
- **LSK 2013** Speed Reading
- **PHI 1113** Introduction to Logic

**PRE-MEDICAL and PRE-DENTAL CURRICULA (MED) (DENT)**

Pre-Medical and Pre-Dental Advisory Committee:

- **PRE-MEDICAL**

  - **Major Advisor:** Professor Michael J. Sullivan
  - **Office:** 130 Harned Hall

Pre-Dental Advisory Committee:

- **Assistant Professor James A. Price (Pre-Dental)**
  - **Department:** Biomedical Sciences
  - **Office:** 123 Agricultural Engineering
  - **Assistant Professor James A. Price (Pre-Dental)**
  - **Office:** 223 Harned Biology Building

Preference is given to persons who have completed four years of study, majored in a specific discipline, and earned a bachelor’s degree. The curriculum for admission to professional school includes one academic year each of English, biological science, inorganic chemistry, organic chemistry, mathematics, physics and advanced science. The Pre-Medical advisors can provide detailed information about requirements of various schools.

**PRE-NURSING CURRICULUM (BION)**

- **Major Advisor:** Professor Michael J. Sullivan
  - **Office:** 130 Harned Hall

Requirements for admission to the various optometry schools differ. Students should check the specific requirements of the professional schools to which they plan to apply. Pre-Optometry students should plan to take the Optometry College Admission Test (OCAT) during the sophomore or junior year.

**PRE-OPTOMETRY CURRICULUM (BIOO)**

- **Major Advisor:** Professor Michael J. Sullivan
  - **Office:** 130 Harned Hall

**PRE-PHARMACY CURRICULUM (CHPH)**

- **Major Advisor:** Professor Svein Saebo
  - **Office:** 118 Hand Lab

The pre-pharmacy program is intended for students who wish to attend the School of Pharmacy at the University of Mississippi. No degree will be granted from Mississippi State University, and there are thus no university or college requirements. The courses listed below will satisfy the requirements for the School of Pharmacy at the University of Mississippi. Most pharmacy schools have similar requirements. However, students who wish to attend other pharmacy schools should check the specific requirements for that school.

**Required Courses (45 hours)**

- **CH 1213** Fundamentals of Chemistry I
- **CH 1211** Lab
- **CH 1223** Fundamentals of Chemistry II
- **CH 1221** Lab
- **CH 4513** Organic Chemistry
- **CH 4511** Lab
- **CH 4523** Organic Chemistry
- **CH 4521** Lab

Note: CH 1213, 1223, 4513, and 4523 must be taken in that order; the labs CH 1211, 1221, 4511, and 4521 should be taken in that order. A lab may be taken after the corresponding class has been completed.

- **EN 1103** English Composition I
- **EN 1113** English Composition II
- **CO 1003** Fundamentals of Public Speaking
- **EC 2123** Microeconomics
- **MA 1713** Calculus I
- **PH 1113** General Physics I
- **PH 1123** General Physics II
- **BIO 1504** Principles of Zoology
- **BIO 2014** Human Physiology
- **PSY 3213** Psychology of Abnormal Behavior
- **SO 3603** Criminology
- **PS 3063/3073** Constitutional Powers/Civil Liberties
- **PS 4183** Judicial Process
- **PSY 3213** Psychology of Abnormal Behavior
- **SO 3603** Criminology

**Electives (21 hours)**

- **Social and Behavioral Electives (6 hours)**
  - At MSU EC 2113 Macroeconomics is a prerequisite for the required course EC 2123 (see above), and EC 2113 will count as one social science elective. In addition to EC 2113, one course from either Psychology, Sociology, Political Science, or Anthropology is required.

- **Humanities and Fine Arts Electives (9 hours)**
  - At least 3 credit hours required in each of the two main areas. Humanities should be chosen from the following areas: English Literature, Foreign Language, History, Religion, or Philosophy

- **General Electives (6 hours)**
  - Any course with college credit other than algebra or trigonometry

**IMPORTANT NOTE:** This adds up to a total of 66 credit hours, but the minimum requirement for admission to School of Pharmacy is 68 credit hours. The reason for this discrepancy is that the physics requirement at the University of Mississippi is 8 credit hours (2 times 4). MSU only offers 3 credit hours physics courses, and the School of Pharmacy has decided to accept MSU students with only 6 credit hours in physics. However, a total of 68 credit hours is still required. The 2 additional credit hours can be made up either by taking General Physics III, which is recommended by the School of Pharmacy, or a general elective (any course with college credit). If a student completes general Physics III and therefore has received credit for nine hours of physics, the additional credit hour will count toward satisfying the general elective requirement.
Department of PSYCHOLOGY (PSY)
Major Advisor: Professor Stephen Klein
Office: 110 Magruder

The department offers majors leading to the B.A. or B.S. degree, and the M.S. degree. Undergraduate students wishing to major in psychology must have a minimum 2.0 GPA on all college work attempted prior to entering the major. Transfer students also must have a minimum 2.0 GPA to be admitted to the psychology major.

The Bachelor of Arts degree program in psychology is designed to provide training for advanced study in psychology or related fields. Advanced study is recommended for students wanting a career in psychology, and most psychology majors are enrolled in the B.A. program, which requires a total of 128 semester hours.

In addition to the B.A. common curriculum of the College of Arts and Sciences, candidates for the BA. degree in psychology must take PSY 1013, PSY 3103, PSY 3213, PSY 3313, PSY 3343, PSY 3623, PSY 3713, PSY 4203, PSY 4323, PSY 4403, plus 15 hours of psychology electives from the following courses: PSY 3003, PSY 3023, PSY 3073, PSY 3203, PSY 3353, PSY 3363, PSY 3413, PSY 3503, PSY 3803, PSY 4103, PSY 4113, PSY 4123, PSY 4223, PSY 4333, PSY 4343, PSY 4423, PSY 4523, PSY 4633, PSY 4653, PSY 4713, PSY 4723, PSY 4983, and one 3000/4000 level Educational Psychology course. Psychology majors must earn a C or better in all required psychology courses.

For the 18 hour minor in Psychology, at least half of the classes (9 hours) must come from the list of required Psychology courses while the remainder may come from the list of Psychology electives. Students should consult a Psychology major advisor to plan a minor program which will complement their major studies and career interests.

For a Psychology concentration in the BSIS program of study, at least half of the classes (6 hours for the 12 hour concentration or 9 hours for the 18 hour concentration) must come from the list of required Psychology courses while the remainder may come from the list of Psychology electives. All of these must be upper-division courses. Students should consult the Undergraduate Coordinator in the Psychology Department to plan a concentration which will complement their career interests.

The faculty in psychology feels that a B.S. program should reflect the liberal arts mission of the department. To accomplish this goal, students in the B.S. program complete a six-course theme. The theme approach allows students to create a plan of study to complement their interests, and to encourage them to see the connection between courses. Students may elect to use a pre-existing minor or concentration as a theme, as long as they adequately describe how the courses in the minor or concentration fit together into a theme that relates to psychology. Psychology major requirements cannot be used to satisfy theme course requirements.

Students may elect to deviate from existing minors or concentrations and create their own themes with the consent of their advisors. “Creating one’s own theme” will not be easy, and will require planning in advance.

A student’s theme must be approved by his or her advisor prior to admission into the B.S. Program. A student interested in pursuing the B.S. degree also must fulfill the same departmental course requirements as for the B.A. degree. In addition to the theme requirement, the differences between the B.S. and B.A. degree programs in psychology are as follows: the humanities requirement is six rather than 18 credit hours, the social science requirement is six instead of 18 credit hours, and 136 rather than 128 credit hours are required for a degree.
Natural Sciences (9-12 hours)
3-4 hours Physical Sciences w/lab (CH, GG, PH)*

Total hours needed for major: 136

32 hours of course work must be A&S 3000/4000

Department of SOCIOLOGY, ANTHROPOLOGY, and SOCIAL WORK (SO) (AN) (SW)

ANTHROPOLOGY (AN)
Program Director: Dr. S. Homes Hogue
Office: 108 Cobb Institute of Archaeology
Degrees: Bachelor of Arts, Master of Arts

Anthropology is the study of humans as biological and cultural beings. Its subfields include archaeology, biological anthropology, cultural anthropology, and linguistics. Students majoring in anthropology may undertake course work in all four subfields, with concentrations offered in archaeology and cultural and biological anthropology.

Anthropology is a particularly broad major, designed for students who are preparing for employment with research organizations, or museums, for administrative and research positions with state or federal governments (such as state highway departments and the National Park Service), and with human service agencies or organizations that involve work in foreign countries. The undergraduate major in anthropology also prepares students for graduate training in professional fields such as planning, law, and public administration, as well as for further graduate training in anthropology leading to college and university teaching and research positions.

A student wishing to pursue a program leading to a Bachelor of Arts with a major in anthropology is required to elect a minimum of thirty six (36) credit hours of anthropology including: AN 1343, AN 1143, AN 1543, and AN 4123/6123. They must also complete a minimum of seven upper-division elective courses in Anthropology (totaling at least 21 credits): of these seven, at least one must be completed in each of the three subfields from the following list: archaeology (AN 4523, AN 3523, AN 4503); biological anthropology (AN 4303, AN 4313, AN 3333); and cultural anthropology (AN 3113, AN 3123, AN 3133, AN 3153, AN 4133, AN 4133, AN 4163). No more than six credit hours from cross-listed courses taught in other programs and no more than twelve hours of fieldwork courses will count towards the required 36 hours. Statistics (ST 2113) is also required. Students are encouraged to take elective courses in related fields which will strengthen their academic training and job skills. These may include courses in human anatomy, soils, geology, and land surveying.

Students are eligible for membership in the Alpha chapter of Lambda Alpha, the national anthropology honorary. In order to be considered, a student must have at least a 2.50 overall GPA, with a 3.00 GPA in anthropology courses, and have earned a minimum of 12 semester hours credit in anthropology or sociology, with at least 6 of these in anthropology. Part-time jobs are available for anthropology majors through the Department of Sociology, Anthropology, and Social Work and through the Cobb Institute of Archaeology.

The Anthropology faculty and staff are housed in the Cobb Institute of Archaeology. There are other archaeologists in the Institute, including specialists in the Middle East and Southeastern U.S. Facilities include archaeology laboratories, darkroom, drafting room, and museum. The museum houses artifacts from Mississippi and the Middle East, including duplicates of large-scale relief sculptures and statues from Assyria and Egypt.

Anthropology may be used as a minor field of study at both the undergraduate and graduate levels. Twelve (12) hours, (9 hours must be 3000 level or above) in addition to AN 1103, constitute an undergraduate minor. Requirements for an anthropology minor at the graduate level will be established in consultation with the anthropology major advisor. Courses taken for an undergraduate or graduate minor must be taught by anthropology faculty.

Courses have prerequisites. Please check course description in back of this catalog or consult advisor.

Must be from 2 different areas and must cross 4 disciplines over the 18 hours. Only one Economics allowed. Consult advisor.
The Social Work Program at Mississippi State University (Starkville campus only) is accredited by the Council on Social Work Education. Social work is both a challenging and rewarding profession with the primary goal of helping people help themselves. The Bachelor of Social Work (BSW) degree is recognized by the profession of social work as the first practice degree. The BSW graduate is prepared to work as a generalist social work practitioner in a variety of practice settings. These include, but are not limited to the following: child welfare service agencies, family services, medical hospitals, mental health clinics, public health clinics, home health agencies, nursing homes, industries, juvenile and family court, shelters for battered women and children, neighborhood and community services.

The social work program incorporates a liberal arts perspective into the social work curriculum. This liberal arts perspective enhances the person-environment focus of generalist social work practice. Although students may declare social work as a major upon admission to the University, there is a formal admission process into the social work program. The criteria for admission into the program includes:

1. Cumulative GPA of 2.0
2. Completion of the following social work courses with a minimum grade of “C”:
   - SW 2303 Social Welfare Policy I
   - SW 3013 Human Behavior in the Social Environment I
3. Completion of SW 2213 Intro to Social Work (including 20 hrs of volunteer experience) with a minimum grade of “B”;
4. Completion of “Application for Admission”;
5. Students must complete an application with three reference letters and complete personal interview with Social Work Admissions Committee prior to enrolling in further social work courses.

Additional courses, as noted in the application for admission form, must be completed prior to petition for admission to the major.

Before enrolling in any social work classes, it is the responsibility of the student to consult with their social work advisor regarding any prerequisites for social work classes.

The criteria for remaining in the program includes:

1. Maintain an overall GPA of 2.0, with a 2.5 GPA for all social work courses.
2. Must earn a minimum of a “C” in each social work course.
3. Continue to demonstrate an aptitude for a social work career.
4. Adhere to all academic expectations of the University and the social work program.
5. Adhere to the National Association of Social Workers Code of Ethics.

### Total hours needed for major: 132

32 hours of course work must be A&S 3000/4000

---

**Program Director:** Adele Crudden, Ph. D.

**Office:** 218B Bowen Hall

**College of Arts and Sciences**
The following degree programs are offered: Bachelor of Arts, Master of Science and Doctor of Philosophy. Sociology is the scientific study of social life in all of its manifold interrelationships. With an interest in understanding human behavior, sociologists study such special areas as deviant behavior, social organization, stratification, population, community, social institutions, race and ethnic relations, social problems, theory and methods of research.

Sociology majors are well prepared to enter many rewarding positions in the work force right out of college or further graduate training in law, business, community planning, architecture, medicine, politics or academics. Opportunities for employment include, but are not restricted to entry-level positions in administration, advertising, banking, counseling (family planning, career, substance abuse, etc.) health services, journalism, group and recreation work, marketing and market research, sales, teaching, criminal justice, social services and social research. In addition, sociology provides training that other liberal arts majors do not, such as in the basics of human interaction and relationships, and basic training for research analyst positions (in statistics and research methods, which include computer applications, for example).

Students are eligible for membership in the Mississippi Alpha chapter of Alpha Kappa Delta, the International Sociology Honor Society. To be considered for membership, a student must be an officially declared sociology major or demonstrate a serious interest in sociology, must be at least a junior, have at least a 3.00 overall GPA, and must have maintained a 3.00 GPA in sociology courses.

To earn a Bachelor of Arts degree with a major in sociology, a student is required to take thirty-six (36) hours of sociology.

**Sociology Major with a Specialization Course Requirements**

The sociology major consists of a sequence of five levels of courses ranging from introductory to the more advanced and capstone courses. Students are expected to complete courses in the lower levels before taking courses in the next higher levels. For example, students should complete Level I courses before completing Level II courses, etc. The lower courses are prerequisites for the more advanced level courses.

**Selecting a specialization.** There are two types of courses to complete at Level IV, specialization and elective courses. With the assistance of their advisor, students will select the specialization that best fits with their post-graduate plans. Each specialization is described below.

**Population and Environment Specialization.** Students planning to pursue a career in some aspect of business or in some government agencies may want to consider selection this specialization since these courses will focus on information and skills needed in the economic sector of society.

**Family and Gender Studies Specialization.** Students planning to work in private or government agencies that provide personal or social services to various populations in society will want to consider this specialization. The topics covered and the skills developed in these courses will provide much needed background information and understanding for working with persons and groups.

**Socio-Economic Development Specialization.** This specialization was developed for students that anticipate working in the area of socio-economic development at the community, state or national levels. The knowledge and background necessary to work effectively in various private and public organizations/agencies that focus on social and/or economic development is provided. Courses in this area focus on knowledge of the social forces and processes operating in specific environments that may facilitate or inhibit development and foster the ability to analyze relevant information and data.

General Sociology Specialization. Often students wish to obtain a more traditional liberal arts major by selecting courses that interest them personally. This specialization is the logical choice for these students.

**Level I Courses:** Introduction to the Discipline (regarded as part of the University Core)

**Level II Courses: Core Substantive Courses (6 hours)**

**Required:** SO 2203 Cultural and Racial Minorities

Complete any one of the following courses:

- SO 3013 Society and the Individual
- SO 3003 Social Inequality
- SO 3053 Organizations in Modern Society

**Level III Courses: Tools and Skills Courses (6 hours)**

- SO 3103 Social Theory
- SO 3213 Introduction to Social Research

**Level IV Courses: Specialization and Elective Courses (21 hours)**

Specialization: Take any three courses in one of the Specializations A-D below. (9 hours)

- A. Population & Environment
  - SO 4113 Soc Org & Change
  - SO 4123 Poverty Analysis
  - SO 4173 Environment & Society
  - SO 4703 Pop Probs & Processes

- B. Family and Gender Studies
  - SO 3323 Contemporary Woman
  - SO 4223 Comparative Family
  - SO 4403 Sex, Roles & Gender
  - SO 4703 Pop Probs & Processes

- C. Socio-Economic Development
  - SO 3303 Rural Sociology
  - SO 4123 Poverty Analysis
  - SO 4173 Environment & Society
  - SO 4703 Pop Probs & Processes
  - SO 4733 Community: Org & Rels

- D. General Sociology
  - Select any three 3000 or 4000 level sociology courses, including any of those not listed above. A minimum of two of these courses must be 4000 level.

Electives: Select four 3000 or 4000 level sociology courses. (12 hours) Students are encouraged to take additional courses in their specializations, if offered before the student graduates.

**Level V Course: Capstone (3 hours)**

Research paper in area of specialization expected.

SO 4803 Social Research Practice

Total Sociology Courses: 12 (36 hours)

**Other Requirements:**

It is strongly recommended that all majors take PS 1113 American Government (or 1193), EC 2113 Macro Econ (or 2183), and EC 2123 Micro Econ (or 2193).

**Sociology Minor**

To earn a minor in sociology, a student must take eighteen (18) hours of undergraduate sociology courses. SO 1003, 2203, and 3213 are required. The other three SO courses must be the 2000 level or above and include at least one 4000 level SO course.

Students who wish to major or minor in the department should plan their programs with the departmental major advisor as soon as possible after entering the University and should consult with their advisor before each registration period. Programs are arranged individually to combine the most varied advantages consistent with the student’s interest and purposes. Persons interested in secondary school teaching may elect sufficient courses in the College of Education to satisfy certification requirements for teaching social studies.

Suggested Course of Study for a general major in Sociology:
The Criminal Justice and Corrections Certificate Program is administered through the Department of Sociology, Anthropology, and Social Work. Participation in this program is available to all Departmental majors, as well as those majoring in any other fields (e.g., psychology, political science, computer science, or business).

Criminal Justice and Corrections is an ever expanding field of study. It involves the study of crime, crime control, and the administration of justice. This includes the study of the structure, functions, and decision processes of all administrating components within the system. Components of the system include such things as: Law Enforcement; Criminal Courts; Juvenile Court; Jails; Prisons; Probation; Community-Based Corrections; Parole System.

The mission or the Criminal Justice and Corrections Certificate Program is to prepare students for challenging careers in the criminal justice/corrections professions. Underlying our mission is a strong commitment to providing students with a solid theoretical foundation of relevant issues, as well as equally important practical information and experiences germane to their professional development. Key in achieving this is our two stage curriculum format where students receive both traditional classroom instruction and experiential training through an internship program. Thus, the Criminal Justice and Corrections Program is designed to provide a broad-based education for students interested in the field of crime and justice studies and to prepare students to assume leadership roles with crime and justice.
Women's Studies classes, lectures, and special events are open to both women and men. This concentration is an optional grouping in addition to major and core requirements. Completion of approved courses will be recognized by awarding a certificate signed by the chair of the Women's Studies Addition is intended to enhance students' sensitivities to issues relating to gender in contemporary societies, with a special focus on American society.

Core Courses
- SO 3103 Social Theory*
- SO 4803 Social Research Practice
- COR 3103 Criminal Justice System
- SO 3603 Criminology
- SO 4233 Juvenile Delinquency
- SO 4513 Correctional Systems
- COR 3310 Field Work I (6 hours)
- COR 3320 Field Work II (6 hours)
6 hours COR Electives

Choose two of the following:
- SO 3313 Deviant Behavior
- SO 3503 Violence in the U.S.
- SO 3343 Gender, Crime, and Justice
- PS 4183 Judicial Processes*
- PSY 4213 Psychology of Abnormal Behavior*
- PSY 4223 Drug Use and Abuse

SW 4623 Child Welfare Services

Computer Literacy (3 hours)
If SO 3213 and SO 3223 are taken, this requirement is fulfilled.

Free Electives
3-9 hours Consult advisor

Total hours needed for major: 128

1. See University CORE.
2. Consult advisor.
3. Must not be Sociology or CL/CO/Courses. With Social Science Core, must cross 4 disciplines over the 12 hours. Only one Economics allowed. See advisor.
4. See Core Social Science requirement.
5. + See Core Social Science Requirement.
6. ++ See Core Social Science Electives.

**WOMEN'S STUDIES CONCENTRATION**
Contact: Dean of Arts and Sciences
Director: Dr. Meg McGavran Murray
Offices: 312 E Lee Hall
Ellen Bryant Center for Women's Studies
Rice Residence Hall

Women’s Studies is an academic discipline concerned with the contributions and struggles of women. Mississippi State University uses an interdisciplinary approach to enhance students’ knowledge of the effect of women in all fields of study. MSU offers through its College of Arts and Sciences a Women’s Studies Concentration of fifteen semester hours of course work to be selected from a specified group of appropriate courses. This concentration is intended to enhance students’ sensitivities to issues relating to gender in contemporary societies, with a special focus on American society. Women’s Studies’ classes, lectures, and special events are open to both women and men. This concentration is an optional grouping in addition to major and core requirements. Completion of approved courses will be recognized by awarding a certificate signed by the chair of the Women’s Studies Advisory Committee and the Dean of the College of Arts & Sciences.

To earn a certificate a student must have at least 15 credit hours distributed as follows:
1. Students must complete the introductory course SO/AN 3323 Contemporary Woman.
2. Students must complete at least two (2) of the Core courses.
3. Students must complete an additional two (2) courses. These courses may be from the core or electives; however, only one may be from the additional electives course offerings.
4. Finally, students cannot have more than nine hours from any one department count toward the certificate.

**Approved Courses**

**Core Courses**
- SO/AN 3323 Contemporary Woman

**(Choose at least two Courses)**
- COE 4743 Gender Issues in Counseling
- EN 3513 Women and Literature
- HI 4273 Women in American History
- PHIL 3133 Feminist Interpreters of West Social & Polit Phil
- PS 3033 Gender and Politics
- PSY 3203 Psychology of Gender Differences
- SO 4403 Sex Roles and Gender

**Electives (see above)**
- HS 3303 Consumer Economics in Counseling
- HS 4313 Family Resource Management
- HI 4263 History of Southern Women
- PSY 4983 Psychology of Aging
- SO 1203 Marriage and Family

**Criminal Justice and Corrections Certificate with a major other than Sociology (33 hours)**

The Criminal Justice and Corrections Certificate can also be earned in combination with any other degree program from any College. Specific Criminal Justice and Corrections Certificate requirements are as follows:

**Required Courses (27 hours)**

- SO 2203 Racial and Ethnic Minorities
- COR 3103 Criminal Justice System
- SO 3603 Criminology
- SO 4233 Juvenile Delinquency
- SO 4513 Correctional Systems
- COR 3310 Field Work I (6 hours)
- COR 3320 Field Work II (6 hours)

6 hours Electives - from the following list:
- AN 3313 Human Identification
- SO 3313 Deviant Behavior
- SO 3343 Gender, Crime and Justice
- SO 3503 Violence in the US
- PS 4183 Judicial Processes
- PSY 4213 Psychology of Abnormal Behavior
- PSY 4223 Drug Use and Abuse
- SW 4623 Child Welfare Services

**Additional Electives**

(Choose no more than one. These courses must be approved by the Women’s Studies Advisor)
- EDF 3333 Social Foundations of Education
- HS 3573 Historic Costume
- HS 4403 Introduction to Gerontology
- HS 4513 Social-Psychological Aspects of Clothing
- SO 4203 The Family in the United States
3 hours Directed Ind Study (from appropriate dept)

Other Additional Elective courses may be appropriate depending on course content and instructor, please contact the Women’s Studies Advisor with questions concerning other options.

Historical Information

The College of Business and Industry, organized in 1915, is the oldest college of business in the state and one of the oldest in the South. In 1979, the Department of Accounting was designated as the School of Accountancy in answer to a need for attention to the unique requirements of the growing profession of accountancy.

This college permits students to major in any of the following programs: Accounting, Banking and Finance, Information Systems, Economics, General Business Administration, GBA-Furniture Management Track, GBA-International Business/Foreign Languages (double degree), Management, Management of Construction and Land Development, Marketing, Marketing-Transportation, Real Estate and Mortgage Appraisal, Financing, Risk Management, Insurance and Financial Planning, and Marketing—Professional Golf Management. The College offers degree programs that lead to baccalaureate, master’s and doctoral degrees. Distance learning through interactive classrooms and internet courses is another avenue available to pursue course work for College of Business and Industry students. Minors are available in most program areas.

Mission

The mission of the College of Business and Industry is to develop knowledge and critical skills in students, and to foster economic and professional development through teaching, research, and service.

Accreditation

The undergraduate, masters, and doctoral business programs are accredited by the AACSB (The International Association of Management Education). The School of Accountancy is separately accredited at the undergraduate and masters levels by AACSB.

Organization

The administrative units of the College of Business and Industry consist of the School of Accountancy and the Departments of Finance and Economics; Management and Information Systems; and Marketing, Quantitative Analysis, and Business Law. In addition to these units, the college includes the Office of Graduate Studies in Business, the Division of Business Research, the Division of Business Services and the College of Business and Industry Academic Advising Center. The administrators of these units are as follows:

Support Services

COBI Academic Advising Center
Coordinator: Vergie Bash
Admissions Coordinator: Teresa Hooper
221 McCool Hall: 325-1890

The College of Business and Industry (COBI) Academic Advising Center provides centralized advising resources to students (current, prospective, and alumni), parents, faculty, and support staff. The Academic Advising Center maintains the official records of COBI students (Accounting majors should see the Director of Accountancy). The Center represents the Dean on all academic paperwork such as transfer evaluations, off-campus requests, withdrawals, overload requests, degree audits, change of majors, and correspondence course approvals.

All General Business Administration majors and freshmen are advised through the COBI Academic Advising Center.
Employment Service

The College of Business and Industry endeavors, in cooperation with the Career Center (located at 316 Colvard Union), to arrange employment interviews for graduating seniors. Former graduates seeking employment or change of position are urged to keep the Career Center informed as to availability.

Computing Facilities

The College of Business and Industry is committed to providing experience and training on a variety of computer platforms that are commonly used in the modern business community. The main computing needs of the College are served by a large-scale local area network composed of more than three hundred IBM compatible computers. These systems are linked through a Novell network to College-wide servers that provide access to educational software, administrative databases and research facilities.

The College uses electronic mail as one of its primary communication methods; many professors use e-mail to enhance the classroom experience. Anyone enrolled in a COBI class is eligible to receive their own personal electronic mail account.

COBI is directly connected to the Internet, a world-wide network linking many educational, government, and commercial groups. In addition, a number of research databases are provided to aid in statistical analysis and other class projects. Lexis/Nexis, Compustat and CRSP are a few of the available databases.

The Ronald J. and Carol M. Ponder Lab is a state of the art facility used by students for the completion of computer-related assignments. The Leo Seal Electronic Classroom is reserved by professors to illustrate computer-related concepts in the classroom. In addition, other more specialized computer labs exist, and presentation systems help to augment classroom demonstrations. The College of Business and Industry also offers a computerized multimedia lab, used in classes to help prepare students for the communication and decision making skills required of professionals in business and industry today.

RULES FOR SCHEDULING COURSES

The normal load for an undergraduate student in a regular semester is 15-18 credit hours. Mississippi State University has established undergraduate student course limits based on cumulative and MSU grade point averages. (See Item III, Student Load, Degree Requirements, Advisement, The Academic Process.)

Admission

Admission into the College of Business and Industry for Transfer Students - Students wishing to transfer into the College of Business and Industry from another institution or from another major at MSU must meet certain grade point average requirements. Juniors and seniors must have a minimum 2.50 overall and MSU grade point average; sophomores must have a minimum 2.25 overall and MSU grade point average; and freshmen must have a minimum 2.0 overall grade point average to be admitted into the College of Business and Industry.

Junior/Senior Screen

A student in the College of Business and Industry must achieve a 2.5 overall GPA and a 2.5 MSU GPA within a 54 to 70 hour window to continue as a business student. Students who do not meet the junior-senior screen (COBI or transfer) will not be permitted to register for 4000 level business classes.

SCHOOL OF ACCOUNTANCY

DEGREE PROGRAMS

Major Advisor: Professor Danny Hollingsworth, Director
Office: 381 McCool Hall

The School of Accountancy is a professional school whose mission is to prepare students for successful careers in accountancy. Such career preparation includes a wide range of professional accounting activities, general education, and broad training in business administration. This program of study gives students the basic preparation for positions in all areas of accounting including, but not limited to, public, private, and governmental accounting. It also (1) requires students to take a planned and coordinated non-business program designed to increase their cultural appreciation and give them a broad knowledge of world affairs and (2) permits the election of additional non-business courses according to the interests of the individual student.

The accounting program is accredited by the AASCB (The International Association for Management Education) as part of the overall accreditation of the College of Business and Industry as well as the separate and additional accreditation of accounting programs.

Certification

The Bachelor of Accountancy Degree (BACC) from the School of Accountancy, Mississippi State University, is recognized by those states requiring the baccalaureate degree as a minimum, as fulfilling all the educational requirements for eligibility to sit for the Certified Public Accountant (CPA) examination. It is also recognized as meeting educational requirements to sit for the Certificate in Management Accounting (CMA) and the Certified Internal Auditor (CIA) examinations. The Master of Professional Accountancy and Master of Taxation degrees fulfill all the educational requirements for eligibility to sit for the CPA examination in Mississippi and in other states that have adopted the 150 hour requirement. Graduates are encouraged to seek professional certification in one or more areas by passing these examinations.

The American Institute of Certified Public Accountants (AICPA) which prepares and grades the CPA examination, has urged the requirement of five years of academic preparation and has reflected this in the CPA examination. Students who aspire to become certified public accountants should consider the Master of Professional Accountancy or Master of Taxation programs herein described, in addition to the BACC.

Admission

Pre-Accountancy (PACC) - All students desiring to major in accounting will be admitted into Pre-Accountancy in the School of Accountancy at Mississippi State University. Admission to the University is equivalent to admission to Pre-Accountancy. International students need a 575 TOEFL score to be admitted to Pre-Accountancy.

Bachelor of Accountancy (BACC) Candidate - Requirements for admission as a candidate for the BACC degree are listed below. Students will not be allowed to take 4000 level accounting courses and may only take two 3000 level courses if they have not been admitted to the School of Accountancy.

1. A student must complete sixty hours or more of college credit earned toward the BACC degree.
2. A student must complete the pre-accountancy core with a 2.6 CPA on all college work attempted and a 2.6 GPA on the 18 hours of pre-accountancy core.
3. A student must complete Principles of Financial Accounting and Principles of Managerial Accounting with at least a “B” in each of the two courses.

Graduation

Bachelor of Accountancy (BACC) - Requirements for a BACC Degree from the School of Accountancy are listed below. It is the student’s responsibility to complete the requirements of the BACC curriculum before applying for a degree.

1. A student must be a BACC candidate and complete the required curriculum and a minimum of 128 semester hours.
2. A student must achieve at least a 2.5/4.00 GPA in upper-division business, economics, and statistics courses.
3. A student must achieve at least a 2.5/4.00 GPA in upper-division accounting subjects with at least a “C” in each accounting course. A student who makes less than a C in an upper-division accounting course must repeat that course the next regular semester that the student is enrolled and the course is offered. Students will be permitted to repeat an upper-division accounting course only once in an effort to make a “C” in the course. If they make less than a “C” in two attempts in a specific course, they will no longer be able to continue in the accounting program.

4. A student must achieve an overall and MSU GPA of at least 2.5/4.00.

Free Electives (3 hours) Consult Advisor

Total hours for degree: 128

Accounting Minor

Students may obtain a minor in accounting by completing 15 hours of upper-level accounting courses with a C or better as follows:
ACC 3023 Intermediate Accounting I .............................................3
ACC Electives’ .................................................................9
ACC 3033 Intermediate Accounting II ..........................................3

Double Degree in Accounting and Another Field

Combined curricula leading to a BACC degree and a degree in another field are available in the School of Accountancy and the other colleges of Mississippi State University. Such curricula may be designed with a major in accounting combined with a major in any non-accounting field. This program requires that a student satisfy the normal graduation requirements in the other major as well as meet the GPA and course requirements of the BACC Degree.

The BACC as a Second Baccalaureate Degree

The curriculum is available to students who hold a baccalaureate degree in any recognized field of study from a regionally accredited institution. The candidate’s combined undergraduate program must include the same course and GPA requirements as required of anyone who receives the BACC degree. A minimum of 32 semester hours of upper division work must be earned in residence at Mississippi State University after the first degree has been conferred. Consult the Director, School of Accountancy, PO Drawer EF, Mississippi State, MS 39762 or email: sac@cobilan.msstate.edu for specific details.

Masters Programs in Accounting

Edd Milam, MTX Advisor
Clyde Herrin, MPA Advisor
Departmental Office: McCool 381
(662) 325-3710

The School of Accountancy offers two graduate programs in Accounting: Master of Professional Accountancy (MPA) and Master of Taxation (MTX). Additional information can be found in the Graduate Bulletin.

Admission

Master of Professional Accountancy (MPA) and Master of Taxation (MTX) - Requirements for admission as a candidate for the MPA or MTX degree are listed below.

1. A student must receive a baccalaureate degree from an accredited four-year institution.

* Students must meet required pre-requisites for elective courses.
2. A student must achieve a GPA of 3.00/4.00 in the last 60 hours of baccalaureate work.
3. A student must take the Graduate Management Admission Test and achieve an acceptable score.
4. A student must achieve a GPA of 2.75/4.00 and no grade below “C” on all undergraduate upper-division accounting work.
5. A student must take all the prerequisites listed in the graduate bulletin.

Graduation

Master of Professional Accountancy (MPA) and Master of Taxation (MTX) - Requirements for an MPA OR MTX degree from the School of Accountancy are listed below.
1. A student must complete the required curriculum and a minimum of 30 graduate semester hours.
2. A student must achieve an overall GPA of at least 3.00/4.00 on graduate work attempted with no more than six hours of “C” grades.
3. A student must achieve a 3.00/4.00 GPA on graduate accounting work attempted.
4. A student must pass an end-of-program final examination.

MPA Program of Study

Master of Professional Accountancy Program (MPA) - Candidates must complete 30 hours of course work at the graduate level. At least 24 of the 30 hours must be taken from courses offered exclusively for graduate credit (8000 level).

Required courses (15 hours):
- ACC 6023 Adv Accounting (If not taken as an undergraduate) .......3
- ACC 6063 Income Tax II (If not taken as an undergraduate) ......3
- ACC 8013 Seminar in Fin Acc Theory ..................................3
- ACC 8023 Advanced Managerial Accounting .....................3
- ACC 8033 Business Assurance Services .............................3

Accounting Electives (6 hours):
- ACC 6043 Municipal and Government & Accounting ..........3
- ACC 6053 International Accounting ..................................3
- ACC 8043 Information Technology Auditing ........................3
- ACC 8053 Professional Accounting Policy and Research .........3
- ACC 8063 Research in Tax Practice and Procedures .............3
- ACC 8073 Taxation of Corporations and Shareholders ..........3
- ACC 8083 Federal Estate and Gift Taxation .......................3

Master of Taxation (MTX) Program - Candidates for the MTX degree must complete 30 hours of coursework at the graduate level including a core of 15 hours of taxation, as described below. At least 24 of the 30 hours must be taken from courses offered exclusively for graduate credit (8000 level).

Required Tax Courses (15 hours):
- ACC 8063 Research in Tax Practice ..................................3
- ACC 8073 Taxation of Corporations & Shareholders .............3
- ACC 8083 Federal Estate and Gift Taxation .......................3
- ACC 8093 Federal Taxation of Partnership, S Corporations, Trusts, and Estates .........................................................3

Other Required Courses (6 hours):
- ACC 8013 Seminar in Financial Accounting Theory ............3
- ACC 8033 Business Assurance Services .............................3

Electives (9 hours)
- Graduate level Business or Accounting courses ................9

Consult the Director, School of Accountancy, P.O. Box EF, Mississippi State, Mississippi 39762 for further information or E-mail: SAC@COBILAN.MSSTATE.EDU

BACHELOR of BUSINESS ADMINISTRATION DEGREE PROGRAMS

Graduation Requirements

The admission/readmission requirements for the Bachelor of Business Administration degree are described in Part I, Section II of this catalog. In addition to the University’s minimum requirements, the following requirements must be met for students applying for graduation:

• Pass 128-154 applicable hours
• Take a minimum of 64 semester hours from a senior college
• Take a minimum of 32 upper level business hours at MSU
• Complete the last 32 hours in residence at MSU
• Have at least a 2.00 GPA on all upper level business courses attempted, and
• 2.00 GPA on all course work attempted.
• Have no more than two D’s in upper level business courses. In excess of 2 D’s will have to be repeated with a grade of C or better.

It is the student’s responsibility to make sure that he/she has fulfilled the requirements of the particular curriculum before applying for a degree. Students must complete a graduation audit in the COBI Academic Advising Center prior to graduation.

Beginning with the 2004 fall semester, the following additional graduation requirements become effective:

• 2.50 overall GPA
• 2.50 MSU GPA
• 2.50 GPA on all upper-level business courses attempted
• 2.50 GPA on all major courses attempted

COLLEGE-WIDE DEGREE COURSE REQUIREMENTS

The College of Business and Industry requires each student to take a planned and coordinated Arts & Sciences foundation designed to increase cultural appreciation and to give a broad knowledge of world affairs. Each program also permits the election of additional courses, according to the interests of the individual student. The total number of credits earned in the Arts & Sciences foundation program and other non-business courses shall not be less than 52 semester hours.
INTERNATIONAL BUSINESS PROGRAM

A Five-Year Double Degree Program:
B.B.A. in General Business Administration &
B.A. in Foreign Languages

John O. Lox, Director
International Business Academic Program Office
355-356 McCool Hall
Major Advisors, Business Administration:
Professor Capella; Associate Professor Addy
Assistant Professors Rice; Assistant Professor Rezek
Major Advisors, Foreign Languages:
Professors Empaincourt and Wiltrot; Associate Professor Jordan;
Assistant Professor Eddington
300 Lee Hall

The International Business Program provides students with an academic background and work experience to help ensure success in the marketplace. Students receive a double degree at graduation reflecting the dual concentration in Business: BBA (with an international focus + a specific discipline like Marketing or Finance); and in the Arts: B.A. (language and cultural proficiency). This is additional to the first two years of study developing abilities in writing, math, sciences, and computer literacy.

The hallmark of this program is a work internship, outside the country work experience of a full summer or one semester duration (generally taken in the last of the 4th year or beginning of the 5th year). This work is ideally reflective of the student’s specific business discipline and language proficiency area. The student who selects to separate the work and abroad experience must petition the IB committee for approval. Minimum acceptable levels are 1) WORK: 10 continuous weeks of international tasks and responsibilities, 2) ABROAD: 6 continuous weeks in one location for cultural immersion.

An International Business Co-Op Work program offers 3 semesters paid international work experience in concert with pursuing the academic degrees.

The total number of semester credit hours (SCH) will be 154 for most students. The program has five main components:

1. a core of basic skills, including courses in writing, mathematics, sciences, and communication (30 SCH);
2. a core of humanities and social science courses selected to fit the special needs of international business major, emphasizing both the history and culture of other societies and the ways these societies relate to our own (27 SCH);
3. intensive training to develop proficiency in one foreign language and its associated cultures and literature (37);
4. a thorough grounding in business techniques and practices, including 33 SCH of general business courses, 12 SCH of international business courses, and 12 SCH in one of six functional/discipline emphasis in business (accounting, banking and finance, information systems, economics, management, marketing*, or risk management, insurance and financial planning*);
5. a one-semester internship program with an international business (3 SCH).

Students interested in following this recommended course of study should notify the Department Head of Foreign Languages and the Director of International Business Academic Program as soon as possible so that a plan of study can be developed in which courses are taken in the proper sequence.

* Information Systems, Insurance, & Marketing functional emphasis courses will need an additional 3 credits in the program for those taking the CPA exam; otherwise, core courses will still be required.

Department of FINANCE and ECONOMICS

Professors Grimes (Head), C. Campbell, Duett, Kohers, and Liano;
Associate Professors Blair, Glimer, Hardin, Kelly, Rogers, and White;
Assistant Professors R. Campbell, de Hass, Millea, Rezek, and Thomas;
Instructors Barnes and B. Campbell

The Finance and Economics Department has five majors and two minors, each with specific course requirements. Students interested in these programs should contact the Department.

ECONOMICS

Economics (EC). Economics is the scientific study of how people and institutions make choices concerning the use of society’s scarce resources. Applied to business, economics is primarily concerned with the decision-making of households and firms within a market context. The importance of economic analysis is recognized by its being the only social science in which a Nobel Prize is awarded. The B.B.A. in economics provides the analytical skills and empirical background needed to understand the dynamic problems facing businesses in the ever-changing economic environment. Career opportunities available to an economics graduate include management, research, and instructional positions with corporations, banks, economic development agencies, trade organizations, governments, and educational institutions.

An economics major or minor also helps prepare the student for graduate professional training in business, public administration, and law. The flexibility of the economics major is reflected in relatively high starting salaries and lifetime earnings of economists. Undergraduates at Mississippi State University may pursue an economics major through either the College of Business and Industry (B.B.A degree) as described elsewhere in this bulletin or through the College of Arts and Sciences (B.A. degree) as described elsewhere in this bulletin.

Students seeking the B.B.A. with a major in economics are required to complete all College of Business and Industry and university common core requirements. Majors are required to take MA 1613 Calculus for Business and Life Sciences I and are encouraged to take MA 1623 Calculus for Business and Life Sciences II. Elective courses should be chosen with the advisor’s approval and used to enhance the student’s overall program.

The economics faculty offers a minor in economics through the College of Arts and Sciences. This minor is open to any student regardless of major or college of enrollment. A minor in economics is attainable by selecting, in consultation with the economics minor advisor, at least fifteen hours of economics course work. Three hours of courses from finance (FIN) or agricultural economics (AEC) may be applied to the economics minor with approval from the advisor. All economics minors must register with the economics minor advisor in the Department of Finance and Economics, 326 McCool Hall. Students with majors in business, engineering, agriculture, the social sciences, mathematics, and pre-law are especially encouraged to consider the economics minor.

Academic advising and career counseling are available from the economics faculty for both majors and minors. Students interested in the study of economics should contact the Department of Finance and Economics, 326 McCool Hall. Any student who completes 12 credit hours of economics with at least a 3.0 GPA and has an overall GPA of 3.0 or higher is eligible for membership in Omicron Delta Epsilon, the international honor society in economics.

EC 4523 History of Economic Thought

Non-business electives - 12 hours (see advisor for options)
Free electives - 10 hours

Total hours needed for major: 154
BANKING and FINANCE

Banking and Finance (BKFN) - The Banking and Finance major requires 128 credit hours and leads to a Bachelor of Business Administrations degree. For some specialization, students may choose from a list of electives. All Banking and Finance majors must complete an Internship which provides field experience prior to graduation. (A Special Problems course may be arranged for situations in which an internship is unavailable.) The degree plan also allows students to supplement their studies with a variety of business and non-business electives. By carefully selecting these elective courses, students may develop a program of study that fits their interests and career preparation needs. In order to maximize the benefits of their degree, students are strongly encouraged to work closely with a faculty advisor in securing an Internship and developing their personal program of study.

The career opportunities for Banking and Finance majors are varied and challenging. The program prepares graduates for decision-making positions in both the public and private sectors. Many graduates accept positions within the banking industry, including commercial banks and federal and state banking agencies. Recent graduates have also found career opportunities as financial analysts and consultants with major corporations and private enterprises throughout the United States. Banking and Finance majors may pursue a wide variety of rewarding careers. MSU graduates have found career opportunities as Investment Managers, Credit Analysts, Loan Officers, and Pension Fund Managers. These career opportunities require an in-depth knowledge of finance and a solid foundation in analytical and communications skills. The opportunities for Banking and Finance majors are excellent; graduates, with the proper preparation, have only to choose which career path to follow.

Banking and Finance minors and double majors are available for both business and non-business majors. For specifics, see below.

GENERAL BUSINESS ADMINISTRATION (GBA)

The curriculum in General Business Administration is designed for students who desire a general rather than a specialized, program in business. GBA advisors are located in the COBI Academic Advising Center. Students are encouraged to make appointments with advisors, as they are not always available on a walk-in basis.

General Business Administration majors must complete 12 hours from one major area and 6 hours from two additional major areas selected from the list below, for a total of 24 hours.

Accounting Information Systems Legal Environment of Business Real Estate
Economics Insurance Management Marketing
Finance International Business

Non-business electives - 15 hours (see advisor for options)
Free electives - 4 hours

Total hours needed for major: 128
The General Business Administration Major-Furniture Management Concentration prepares students for professional careers in furniture and related industries. In this unique program, students take general business course-work along with specialized classes in furniture production and interior design. They also have the opportunity to enhance their education with hands-on experience through participation in cooperative education or internships at one of the many furniture companies throughout Mississippi and the nation.

Required courses are intended to provide students with managerial and technical skills needed for effective performance in the furniture industry. Elective courses can then be chosen to develop additional knowledge in areas of interest (for example, human resource management, production, marketing, or furniture design and construction). GBAF students take 9 hours of Furniture electives to complete their furniture option. Appropriate upper-level business courses are then taken to develop basic knowledge to build particular skills. (For a list of eligible courses, consult the GBAF advisor). Finally, to help students prepare for their career, students may engage in an internship or a cooperative education experience with a furniture manufacturer.

### General Business Administration Minor

A minor in General Business Administration will help non-business students prepare for entrance into the world of business. Students will become familiar with basic concepts and techniques necessary for analyzing business environments, making sound business decisions and planning one’s career.

A minimum of 21 hours must be taken to obtain a GBA minor. A minimum of twelve hours must be taken at MSU to receive the GBA minor. Note that some choices require others as prerequisites.

Elect SEVEN from:

- BL 2413 Legal Environment of Business
- ACC 2013 Principles of Financial Accounting
- ACC 2023 Principles of Managerial Accounting
- EC 2113 Principles of Macroeconomics
- EC 2123 Principles of Microeconomics
- FIN 3123 Financial Management
- MKT 3013 Principles of Marketing
- MGT 3114 Principles of Management and Production
- BQA 2113 Business Statistical Methods I
- BQA 3123 Business Statistical Methods II
- BIS 3233 Intro to Management Info Systems
- FIN 3113 Financial Systems
- FIN 3123 Financial Management
- MB 4853 Business Policy

**Total hours needed for major: 128**

### Department of MANAGEMENT and INFORMATION SYSTEMS

**Professors** Smith (Head), Arnett, Chrisman, Freedman, Lehman, R. Pearson, Shim, Spencer, Taylor, and White;

**Associate Professors** Barnett, Long, A. Pearson, and Warkentin

**Assistant Professors** Davis, Maertz, and Vance

**Office:** 3103 McCool Hall

Students in the Department of Management and Information Systems may elect to major in either Management or Information Systems. Both majors offer excellent job opportunities and can help graduates to achieve their potential in business firms or other organizations.

### MANAGEMENT

**Management (MGT).** Regardless of one’s chosen career, future responsibilities will very likely require a knowledge of management concepts. While an organization can acquire more capital, and technology becomes more common and cost-effective, the only true sustainable source of competitive
advantage for an organization is people, and how these resources are managed. Management adds value by encouraging employee involvement, creativity, motivation and loyalty. A student may choose to take electives emphasizing human resource management or general management/entrepreneurship.

A student chapter of the Society for Human Resource Management (SHRM), the leading voice of the human resource profession, is active. SHRM provides education and information services, conferences, and seminars, government and media representation, online services and publications to more than 165,000 professional and student members throughout the world. As a student member of SHRM, you will learn about the “real world” of human resource management through publications and educational opportunities. You will also participate in activities that will build your knowledge of the HR field while helping you to develop valuable leadership and organizational skills.

The following course of study is designed to prepare the student for careers in the field of Management.

  - MGT 4613 Cross-Cultural Management

### Information Systems

**Information Systems (BIS).** Business, industrial, governmental, and military establishments are constantly seeking persons with the necessary aptitude, professional education, and experience for careers in the fast-growing field of computer information systems. Through the facilities of the academic departments and the computing center, students at Mississippi State University have a unique opportunity to acquire both professional education and experience in business data processing and management information systems.

The purpose of the Information Systems major is to prepare students to solve business problems where the solution normally involves the use of a computer. Thus, the student must have a strong foundation in computer concepts, systems analysis and design, programming and quantitative skills.

A student chapter of Association for Information Technology Professionals is active and provides students with the opportunity to keep abreast of current developments in the field of management information systems through professional speakers, social activities, and field trips.

Department of MARKETING, QUANTITATIVE ANALYSIS and BUSINESS LAW

Professors Bryant, Capella, Eshee, LeMay, Tahai, Taylor, and Webster;
Associate Professors Engelland (head), and Sullivan;
Assistant Professors Chakrabarty, Hoffman, P. Liddell, Lueg, M. Moore, R. Moore, and Still
Instructors Goree, and Lam
Office: 301 McCool Hall

This department offers one major (Marketing) and two concentrations (Professional Golf Management Concentration and the Transportation Concentration). In addition, the department offers quantitative analysis and business law courses to support other programs in the college and across campus.

MARKETING

Marketing (MKT) — Marketing consists of three significant interlocking activities: (1) understanding consumers along with their wants and unfilled needs; (2) developing improved products and services that meet the identified needs of consumers; and (3) communicating the benefits of the improved products and services through advertising, public relations, promotion and effective salesmanship. Courses offered within this unit prepare students to provide marketing leadership and assume a variety of career paths, including field sales, brand management, marketing communications, store management, procurement, logistics, and small business.

**To be selected with the advice and approval of advisor.**

A Marketing minor is offered to both Business and Non-Business students. A minor in Marketing is obtained by taking the following courses: MKT 3013, MKT 4413, MKT 4533, and three from: BQA 4113, BIS 4113, BIS 4523, MKT 4605, MKT 4613, MKT 4623, MKT 4633, or TR 4013. Students interested in this minor should contact a Marketing advisor.

Total hours needed for major: 130

**6 hours Non-business electives (see advisor for options)**

**Total hours needed for major: 128**
The Professional Golf Management Program (PGM) is one of only thirteen sanctioned by the Professional Golfer’s Association of America (PGA). The Program prepares graduates for careers as Class A PGA Professionals at country clubs, resorts, and public golf facilities. The PGM Program is a demanding four and one half year curriculum. The PGA Professional must have a broad assortment of marketing, management and other business related abilities to be effective in the golf profession today.

The program leads to a bachelor’s degree in business administration with a major in marketing. In addition to the requirements for a degree in marketing, students must complete courses in turf management, food management, landscape architecture, human resource management; and all PGA Golf Professional Training Progress (GPTP) requirements. Students must also complete a minimum of 16 months (five semesters) of co-op under the guidance of the MSU Cooperative Education Program. These work experiences are under the tutelage of Class A PGA Professionals throughout the country. Students are required to be continuously enrolled at MSU as a full-time student or enrolled in the MSU Cooperative Education Program according to their co-op schedule. Those who complete the program thus earn a prestigious degree and reach the threshold of PGA Class A membership.

PGA Certification. PGA class A certification (membership) requires: completion of all PGM academic and co-op requirements; passing the PGA playing ability test; completion of all GPTP requirements; and eight months on the job experience after graduation.

PGM Graduation Requirements. Complete the last semester in school (not on co-op). Pass PGA Playing Ability Test. Must complete GPTP Level I and II including passing Gateway Tests I and II.

PGM Admission Procedures. The PGM Program has a limited enrollment. The current enrollment limit is 250; however, this number is subject to decrease based on the placement outlook and PGM and Co-op budget constraints. The number of students admitted each year is determined by graduation and attrition of the previous year. Students are admitted once per year for entrance either in the Summer or Fall semesters. The deadline for completed applications is March 1 each year. Prospective students that have completed all PGM admission requirements and meet all minimum PGM entrance requirements will be considered for admission for the following Summer or Fall during the first two weeks in March.

Entrance Requirements
Freshmen:
• Meet MSU regular admission requirements (not with Summer Developmental Programs)
• Have a USGA Handicap of 8 or less
Transfer Students:
• 2.75 GPA with maximum of 64 applied semester hours
• Have a USGA Handicap of 8 or less
Non-Citizen:
• The MSU PGM Program is sanctioned by PGA of America to educate and train graduates to become PGA Members. Admission to the MSU PGM Program is restricted to students who are U.S. Citizens or Resident Aliens.

Co-op Work

PGM students must complete a minimum of 16 months (five semesters) of co-op work with class-A PGA professionals at country clubs, public golf courses, golf resorts, or other golf facilities. A 2.50 cumulative QPA on all work and on all work at MSU are required in order to participate in the PGM co-op program.

PGA GPTP

PGM students will complete all PGM GPTP requirements including testing, which will be conducted on the Mississippi State University campus by officials of the PGA. An initial lab fee and a semester lab fee is charged students each semester on campus to cover the GPTP seminars, GPTP tests, workshops and playing privileges at the MSU Golf Course. A typical schedule of classes and co-ops are as follows:

Transportation Concentration

Transportation (TR) — Transportation continues to play a major role in the national and international economy. As businesses continue to focus on logistics and transportation improvements, job opportunities for graduates in the transportation concentration increase. The curriculum in the transportation concentration will acquaint the student with the issues, perspectives, and techniques associated with transportation and logistics theory and practice. It offers in-depth treatment of distribution, supply, warehousing, inventory control, and operations in the modes of transportation.

THE B.B.A. as a DOUBLE DEGREE and as a SECOND BACCALAUREATE DEGREE

A double degree is available in the College of Business and Industry for students pursuing a primary degree in a non-business area or accounting field at MSU. These programs require that a student satisfy the normal graduation requirements in the non-COBI area first, as well as the following work. The required graduation grade point average in upper business course work is 2.25. Students are not allowed more than two D's in upper level business courses. Students must apply for and confirm both degrees at the same time. Students must establish a double degree record in the COBI Academic Advising Center.

The second degree curriculum is available to students who hold a baccalaureate degree in any non-business or accounting field of study from a regionally accredited institution. The combination of the first degree and the following second degree program must include the current university core courses and the courses listed below. A minimum of 32 semester hours upper business work must be earned in residence at Mississippi State University after the first degree has been conferred. Students must establish a second degree record with the COBI Academic Advising Center.

PREPARATION for the STUDY of LAW
Major Advisors: Professors James A. Bryant and William D. Eshee;
Assistant Professors: Pearson Liddell and Richard Still
Office: 301 McCool Hall

Each year a number of graduates of the College of Business and Industry enter law school. Although there is no formal pre-law curriculum, most law schools advise pre-law students to seek a wide background of studies. The curriculum in the College is good preparation for the study of law because it offers the opportunity to study the arts, the humanities, science, and mathematics, in addition to business and economic disciplines which constitute the background for understanding the study of most legal problems. Because many areas of law practice deal with business, a background in business is very useful to the practicing attorney. In addition, if a person should decide not to pursue a legal career, there are many opportunities available in business. A professor of business law—pre-law advisor—is available for providing information about the legal professional, assistance in choosing courses, and guidance concerning law school admissions.

GRADUATE PROGRAMS in BUSINESS ADMINISTRATION
Barbara Spencer, Director of Graduate Studies
in Business and Professor of Management
Office: 247 McCool Hall

The College of Business and Industry offers six graduate programs in business administration, namely, the Master of Business Administration (MBA), The Master of Science in Information System (MSIS), the Master of Science in Business Administration (MSBA) with a major in Finance, Master of Professional Accountancy (MPA), Master of Taxation (MTX), and the Doctor of Philosophy in Business Administration (Ph.D.). An M.A. in Economics and a Ph.D. in Applied Economics are additional graduate programs offered in the College.

Admission requirements for graduate programs in business include an acceptable history of previous academic work and a satisfactory score on the Graduate Management Admission Test (GMAT). Required background for admission to graduate course-work includes a general knowledge of the functions of business, introductory calculus, statistics, and proficiency in computer usage.

Details concerning these graduate programs can be found in the Graduate Bulletin. Students who are interested in pursuing any of these programs should communicate with the Director of Graduate Studies in Business, P. O. Box 5288, Mississippi State, MS 39762. For further information, call 662-325-1891.

ADMINISTRATIVE ORGANIZATION

The College of Education consists of five departments: Counseling, Educational Psychology, and Special Education; Curriculum and Instruction; Health, Physical Education, Recreation and Sport; Music Education; and Instructional Systems, Leadership, and Workforce Development.

Counseling, Educational Psychology, and Special Education
The Department of Counseling, Educational Psychology, and Special Education prepares individuals at the undergraduate and graduate levels to function in a variety of professional settings that include K-12 schools, community counseling centers, human services agencies, business settings, rehabilitation agencies, community colleges, four-year colleges, and universities. The department offers the Bachelor’s degree, Master of Science degree, Educational Specialist Degree, the Doctor of Education, and the Doctor of Philosophy degree. Special areas of interest in the department are psychometry, educational psychology, school psychology, special education, community counseling, school counseling, vocational rehabilitation counseling, college counseling, and student affairs administration in higher education.

Curriculum and Instruction
This department is responsible for instruction in all professional courses of a general nature, and in professional courses that deal specifically with teaching in Elementary Education and in the secondary fields of English language arts, social studies, mathematics, science, foreign languages, and speech. In addition to organizing and administering the curricula for educating teachers in the fields of elementary education and secondary education, the department is responsible for the direction and immediate supervision of trainees in these fields. Through the Department of Curriculum and Instruction, the Bachelor of Science, Educational Specialist, Doctor of Education, and Doctor of Philosophy degrees are offered. The department also offers areas of emphasis in elementary and secondary education for the Educational Specialist degree and in elementary and secondary education for the Doctor of Education and the Doctor of Philosophy degrees.

Health, Physical Education, Recreation and Sport
This department offers the Bachelor of Science degree in Physical Education with concentration areas in Fitness Management, Kinesiology, Sports Communication, and Teaching/Coaching. Teaching/Coaching majors may also pursue an add-on teaching endorsement in Health Education by taking additional course work. Master of Science in Physical Education degree programs offer concentration areas in Exercise Science, Health Education/Health Promotion, Sport Administration, and Teaching/Coaching.

Music Education
This department offers the Bachelor’s degree in Music Education, with concentrations in Vocal and Instrumental Music Education. The Maroon Band and the University chorus, both of which are university-wide organizations, are integral parts of this department.

Instructional Systems, Leadership, and Workforce Development
Mississippi State University is a designated institution for the preparation of vocational-technical education personnel. State and federal funds are made available, through cooperation with the State Office of Vocational and Technical Education, for the partial support of the program. It is the responsibility of the Department of Instructional Systems, Leadership, and Workforce Development to provide teacher/coordinator/administrator preparation in vocational areas including adult, business, industrial arts, and trade and technical studies. The department also provides undergraduate preparation of personnel interested in the following occupations: industrial technology and office administration. Job opportunities in these areas are very promising. The Master of Science degree is offered in Technology and in Workforce Educational Leadership. The department also offers an area of emphasis
in Technology for the Educational Specialist, Doctor of Education, and Doctor of Philosophy degrees. The Master of Science in Instructional Technology degree is offered. This computer-based instructional technology program of study meets the educational needs of persons who have personal and professional interests in planning for and utilizing technology.

In addition, the department provides programs in Educational Leadership. Programs are designed to prepare administrators, supervisors, teachers, educational, and professional personnel for positions in: (1) school district offices; (2) elementary, middle, or secondary schools; and (3) community college administrative positions. The Department offers the Master of Science degree, the Educational Specialist degree, the Doctor of Education and Doctor of Philosophy degrees.

SERVICES

Teaching/Learning Center. The Teaching/Learning Center in the College of Education serves students, faculty and staff by providing instructional, visual and other materials and multimedia equipment for classroom use. The TLC also houses a computer laboratory for student and faculty use in the College. With prior scheduling, technical assistance is provided in TLC in relation to all materials and equipment.

Another function of TLC is to provide academic support to students, staff, and faculty at the University. This function supports the University retention goal by helping students to achieve and maintain successful academic standing. Through courses and tutoring in TLC, students are encouraged to replace poor study habits with proven strategies that help them achieve their educational goals as effective and efficient learners. Some specific areas of service are reading comprehension and rate, vocabulary, spelling, grammar, composition, mathematics, conversational English, recognizing learning styles, assistance with preparation for professional examinations, time management, and assessment of current study habits. For further information, see Teaching/Learning Center in Part I of this bulletin.

The Rehabilitation Research and Training Center on Blindness and Low Vision. The Rehabilitation Research and Training Center on Blindness and Low Vision is the only national center that focuses on increasing the employability of persons who are blind or severely visually impaired.

Student Teaching. Partner School Districts in proximity to Mississippi State University are used to provide practicum and student teaching laboratory experiences for those enrolled in the teacher education program. Such experiences are supervised jointly by the faculties of the K-12 schools and the faculty of the College of Education.

ADMISSION PROCEDURES in the COLLEGE of EDUCATION PHASES I-IV

This four-phase admission procedure is designed to assure a logical progression through the total professional teacher-education process.

Enrollment in the College of Education (Phase I) (pertains to Teacher Education majors in the College of Education only): Phase I identifies students who have enrolled in Teacher Education programs prior to official admission into Teacher Education. This early identification will provide the necessary counseling, screening, and advisement for students aspiring to become teachers. To enroll in the College of Education, students must be admitted to Mississippi State University; hold an appointment with an assigned advisor in the College of Education and become familiar with the current College of Education Undergraduate Handbook, curriculum check sheet, and the current university catalog; select a major within a department that has a basic teacher preparation program; and complete Phase I (enrollment in the College of Education) Admission Form for Teacher Education Majors with their faculty advisor. The faculty advisor is responsible for submitting this form to the Office of the Dean of Education, Room 309 Allen Hall.

Admission to Teacher Education (Phase II) (including Teacher Education majors in the College of Agriculture and Life Sciences and the College of Arts and Sciences): A student must complete Phase II by achieving a minimum of 45 semester credit hours of the University general education core with a 2.5 GPA and a 2.5 overall GPA. Students majoring in Elementary Education must complete Phase II by achieving a minimum of 45 semester credit hours of the University general education core with a 2.75 GPA is required for Elementary Education candidates. A student must complete Phase II by achieving a minimum of 45 semester credit hours of the University general education core with a 2.5 GPA and a 2.5 overall GPA. Students majoring in Elementary Education must complete Phase II by achieving a minimum of 45 semester credit hours of the University general education core with a 2.75 GPA is required for Elementary Education candidates.

Students must complete 3 semester credit hours of English composition, 4 semester credit hours of upper level courses in the major, 4 semester credit hours of mathematics (algebra or higher) and 4 semester credit hours of upper level courses in the major. Students must complete 3 semester credit hours of English composition, 4 semester credit hours of upper level courses in the major, 4 semester credit hours of mathematics (algebra or higher) and 4 semester credit hours of upper level courses in the major.

The student must also submit two letters of recommendation from educators and verification of 40 hours work experience with children or youth. Each experience must be substantiated by a letter of verification from the organization where the student worked or volunteered.

It is important that students keep the originals of their Praxis I test scores in a safe place since they will be required to show the originals to their faculty advisor in order to be admitted into Teacher Education. Students should request that ETS send a copy of their scores to Mississippi State University (Code R1480). Students attending the Meridian campus should have their scores sent to both Mississippi State University (Code R3336) and the MSU Meridian campus (Code R3336). Students are encouraged to take the PRAXIS I exam by the second semester of their freshman year.

Students should begin the application to teacher education during pre-registration or orientation. Confidential recommendations must be sent to the Dean of the College of Education, P.O. Box 9710, Mississippi State, MS 39762. The Dean’s office will issue admission cards within five days after admission approval. All students must satisfy Phase II requirements before registering for professional sequence courses. The Admission of Teacher Education candidates will only be considered to professional sequence courses. Instructors of professional sequence courses will check for verification that students have been officially admitted to Teacher Education. Students who have not been admitted to Teacher Education may not register for professional education courses. The faculty advisor is responsible for submitting the Phase II form to the Dean’s office, 309 Allen Hall.

Admission to Student Teaching (Phase III) (including Teacher Education majors in the College of Agriculture and Life Sciences and the College of Arts and Sciences): A student must complete Phase III by submitting an Application for Admission to Student Teaching form to the Director of Clinical/Field-Based Instruction and Licensure one semester prior to student teaching. To be eligible for student teaching, the student must: (1) have been admitted to Teacher Education, (2) have completed a minimum of 2.5 GPA in the major teaching field or concentration, and maintained an overall GPA of 2.5 or higher at the time of application. Final eligibility (2.5 GPA in major and 2.5 GPA overall) is determined through screening of the student’s or student teaching performance. The student must also have completed all professional education and methods courses with a minimum grade of “C” prior to student teaching. No course work other than the 15 student teaching/seminar hours can be taken during the student teaching semester.

Students seeking a degree in Teacher Education and an educator license are expected to schedule student teaching during the last semester of the senior year. As a general rule, graduate students seeking admission to teacher education and student teaching are expected to meet the same requirements as undergraduate students prior to their student teaching experience. All student placements and other communications with local schools are directed through the Office of Clinical/Field-Based Instruction and Licensure.

Exit Requirements (Phase IV): To be eligible for graduating, students must complete the Teacher Education Program without a “C” or better in all professional education courses in their majors, completed more than half of their hours at a community college, satisfied residence requirements, and have a 2.0 overall GPA at Mississippi State University.

Licensure. As part of securing a Mississippi teacher’s license, students must pass the Principles of Learning (PERT) or the PRAXIS II, Communication and Language Proficiency (CLP) test, the Specialty Area test and attained the required minimum scores. Students must request that ETS send a copy of their scores to Mississippi State University (Code R1480). Students attending the Meridian campus should have their scores sent to both Mississippi State University (Code R1480) and the MSU Meridian campus (Code R3336). It is very important that students keep the originals of all their test scores in a safe place since they will need the originals of these scores when they apply for a Mississippi educator’s license.

For more detailed information about teacher admission procedures, see the current College of Education Undergraduate Handbook. Application forms are available in the student’s academic department and in the office of the Dean of the College of Education.

TEACHER LICENSURE

In accordance with statutory provisions, the Mississippi Department of Education, Jackson, Mississippi, has adopted the rules and regulations on issuing and renewing teaching licenses which are set forth in Guide- lines for Mississippi Educator Licensure, August 2001. The licensure program is applicable to all teacher licenses. Satisfactory completion of any teaching curriculum offered by the College of Education will enable the graduate to apply for a teaching license in Mississippi, but this institution cannot waive any licensure requirements nor substitute requirements for mandatory courses. Mississippi State University has submitted and received approval for its programs. Consequently, students who plan to transfer from other universities or another college to the College of Edu- cation must consult with the Teacher Education and Special Education Director of Clinical/Field-Based Instruction and Licensure or an advisor in the College of Education to ascertain the general education, professional education, and specialized education courses which must be completed to obtain a teaching license in the field or fields of their choice. Since licenses issued by the Missis-
Department of COUNSELING, EDUCATIONAL PSYCHOLOGY, and SPECIAL EDUCATION

Major Advisor: Thomas Hosie
Office: 508 Allen Hall

The Department of Counseling, Educational Psychology, and Special Education prepares individuals at the undergraduate and graduate levels to function in a variety of professional settings that include K-12 schools, community counseling centers, human services agencies, business settings, rehabilitation agencies, community colleges, four-year colleges, and universities. The Department offers the Bachelor’s degree, Master of Science degree, the Educational Specialist degree, the Doctor of Education, and the Doctor of Philosophy degree. Special areas of interest in the department are psychometry, educational psychology, school psychology, special education, community counseling, school counseling, vocational rehabilitation counseling, and student development counseling in higher education.

1. Undergraduate Degree. The B.S. degree in Educational Psychology is a non-teaching option. This program provides students with a general background of psychological topics and principles as they relate to education. Additionally, students complete a concentration, (second area of emphasis) or a minor. Students who enroll in this program pursue a diversity of careers. Some of the vocational areas for which this program can prepare students are as follows: child care centers, seminary, the armed services (ROTC students), business settings, mental health agencies, and graduate work in counselor education, educational psychology, and school psychology. Students majoring in Educational Psychology have to earn a grade of “C” or better on all courses in the 43 hour curriculum.

The B.S. Degree in Special Education is a teacher preparation program, which prepares individuals to teach children and youth with mental retardation (MR, students), children with behavior disorders (BD), and students with learning disabilities, and other exceptionalities. This program also enables graduates to obtain endorsements in areas of specialization. Applicants must meet admission requirements and follow procedures for College of Education teacher majors. These regulations are provided in the beginning portion of The College of Education section of this Bulletin.
2. Graduate Degrees. The Department offers M.S., Ed.S., Ed.D., and Ph.D. degrees in Counselor Education with areas of emphasis in four concentrations: Community Counseling, Rehabilitation Counseling, School Counseling, and Student Affairs Administration. The Department also offers M.S. and Ph.D. degrees in Educational Psychology and a Specialist degree in School Psychology. Preparation in Educational Psychology can be obtained in the concentration areas of School Psychology and general Educational Psychology at the Master’s (M.S.) level; School Psychology at the specialist (Ed.S.) level; and in the areas of general Educational Psychology (college teaching) and School Psychology at the doctoral (Ph.D.) level. In addition, M.S. and Ed.S. Degrees are offered in the area of Special Education. Because of the increasing use of computer technology, students in all degree programs are strongly encouraged to acquire computer competency skills.

3. Student Retention Procedures: Professions engaged in protection of the public health and welfare charge their members with the responsibility of monitoring potential new members. Therefore, the Counselor Education and Educational Psychology faculty believe a component of their responsibility to their students, their professions, and the potential consumers of services provided by graduates, is the necessity to monitor not only students’ academic progress but also the personal characteristics of students that will affect their performance in therapy. These characteristics should be of a quality so as to NOT interfere with the students’ professionalism or helping capacity. Accordingly, the department has adopted a policy outlining student retention procedures. This policy is printed in the Department of Counselor Education and Educational Psychology Graduate Program Handbook.

4. Financial Assistance for Graduate Students. A limited number of scholarships are available for master’s degree students in Rehabilitation Counseling and Student Affairs Administration. Many students hold assistantships in the Department, the Division of Student Affairs, the Office of Housing and Residence Life, the Bureau of Educational Research and Evaluation, and the Rehabilitation Research and Training Center on Blindness and Low Vision.

### SPECIAL EDUCATION (EXED)

**Major Advisors:** Lynne Arnault, Kent Coffey, Sandy Devlin, and John Obringer  
Licensure Advisor: Frank Iload  
Office: 310 Allen Hall

The program in Special Education is designed to prepare teachers to teach children and youth with mental retardation, learning disabilities, and other areas of exceptionality. The curriculum in special education is designed to meet the requirements for the endorsements in the areas of specialization.

Some students may wish to obtain licensure in the areas of special education and elementary education.

### Department of CURRICULUM and INSTRUCTION

**Department Head:** Professor Esther Howard  
Office: 314 Allen Hall

Please refer to “Degree Program Modifications” statement located under “CURRICULA” in the College of Education section of this catalog.

This department offers curricula in Elementary Education (preschool, elementary, and middle school), and in the academic areas of high-school teaching (English, foreign language, mathematics, science, social studies, and speech).

### Department of CURRICULUM and INSTRUCTION

**Department Head:** Professor Esther Howard  
Office: 314 Allen Hall
The curriculum in Elementary Education is designed to prepare teachers at the undergraduate and graduate levels. Program purposes are to foster and encourage both pre-service and in-service growth of teachers and other school personnel, and to offer needed and desired professional services.

Programs offered on the graduate level include the Master of Science Degree, Educational Specialist, and the Doctor of Education and Doctor of Philosophy Degrees. Licensure at the undergraduate level includes N-1, K-4, and 4-8. Students must obtain licensure for K-4 and one or both of the following N-1, 4-8. (Please see your advisor for specifics). Persons interested in an Elementary Education Degree are advised to obtain a copy of the Advising Worksheet, available in room 314 Allen Hall or from any advisor.

**SECONDARY EDUCATION**

It is the purpose in the secondary education area to educate students to teach the academic subjects in grades 7-12, inclusive; to furnish professional courses and experiences for those desiring to teach the following subject areas; and to collaborate with the other schools of the University in matters of teacher education.

Licensure for a secondary education degree includes grades 7-12 in the following content areas; English Language Arts, Speech, Foreign Language, Mathematics, Science, and Social Studies.

Through its graduate program in secondary education, including in-service education, the department furnishes additional professional courses and experiences for teachers, principals, supervisors, and superintendents; and offers consultative services to school boards and school systems in need of such services.

Degrees offered on the graduate level include Master of Education, Educational Specialist and the Doctor of Education and Doctor of Philosophy.

**ENGLISH LANGUAGE ARTS (ENED)**

Major Advisors: Kay Brocato, Linda Coats, Vincent McGrath
Office: 314 Allen

The curriculum in English Language Arts is offered to prepare students to teach English Language Arts in high schools and middle schools. A minimum of 42 hours in English beyond freshman composition is required for a major.

**SOCIAL STUDIES (SSED)**

Major Advisor: Susie Burroughs
Office: 314 Allen Hall

Since social studies teachers in high school are expected to be acquainted with several branches of the field including history, government, economics, sociology, psychology, and geography, the following curriculum provides opportunity for preparation in each field. A composite major of at least 54 hours of social science with at least 3 hours in each field listed above is required. Also, a student must have at least 6 hours in World or European History, 6 hours in American History, 3 hours in a Non-Western History elective, and 3 hours in Mississippi History.

A student may get enough credit in either of the social science fields to constitute a major.

Department of HEALTH, PHYSICAL EDUCATION, RECREATION and SPORT (HPERS)

Department Head: Professor Pamela Catledge-Kirk
Office: 216A McCarthy Gymnasium
Undergraduate Coordinator: Ben Abadie
Office: 237 McCarthy Gymnasium

The Department of Health, Physical Education, Recreation and Sport offers four undergraduate concentrations: Teaching/Coaching Education, Fitness Management, Clinical Exercise Physiology, and Sport Communications.

Community college transfer hours not to exceed 64 semester hours may be applied to the Health, Physical Education, Recreation and Sport degree program.

All concentrations require the specified course requirements cited within the University CORE, college core, and major core course listings. Specified area content courses vary among the four concentrations.

Teaching/Coaching Concentration
Major Advisors: Paula Dohoney, K. Randell Foxworth, Debbie Funderburk, Carla Smith, Holly Wiley, and Glen Young

The teaching coaching concentration requires 128 semester hours of prescribed courses to complete the Bachelor of Science in Physical Education. The curriculum is designed to meet the need of students interested in becoming physical education teachers and coaches. The teaching block courses must be included in the on-campus requirement of three-semester hour courses at junior and senior courses. Students who complete the program will be eligible for teacher licensure by the Mississippi Department of Education.

Fitness Management Concentration
Major Advisors: Ben Abadie, Joseph Chromiak, Barry Hunt, John Lambert and

The fitness management concentration provides a basic understanding of the science behind physical fitness and the knowledge to implement effective fitness programs. This concentration also provides students a basic preparation in business to meet the economic challenges within the profession. The students are prepared to work as fitness instructors, exercise specialists, and directors or managers of wellness and fitness centers in hospitals and corporate settings.

Clinical Exercise Physiology Concentration
Advisors: Ben Abadie, Joseph Chromiak, and John Lambert

The Clinical Exercise Physiology concentration is designed as a professional preparation program of study that enables students to work in clinical settings as an Exercise Specialists in Cardiac Rehabilitation and Pulmonary Rehabilitation. Students are equipped as Exercise Specialists in a variety of unique areas, such as exercise programs for individuals with diabetes, orthopedic limitations, arthritis, cancer, osteoporosis, renal failure, obesity, as well as programs for the elderly and pregnant women. The Clinical Exercise Physiology concentration also provides students with the essential information necessary to continue their academic career in other allied health professions such as Physical or Occupational therapy.
Sport Communication Concentration

Major Advisor: Jeremy Jordan

The sport communication concentration is designed to prepare students for the expanding career opportunity in the sport communication industry, including print media, broadcast media, audio visual production, and sport promotions. Recommended areas of emphasis include broadcast media, print media, production, and sport promotions. The program utilizes the strengths and expertise of faculty within the Department of HPERS and the Department of Communication. This specific training will prepare students for jobs in University and professional sport media departments, sport videography departments, television and radio broadcast media and sport promotions.

Students enrolled in this program will complete a nine hour internship. Internship locations depend on the career goals of the student. Students have been placed in internships in private, collegiate, and professional sports settings.

Concentration - Must choose a concentration from the following

- A total of 35 hours in Math and Science
- Must be enrolled each semester - required admission to Teacher Ed
Instrumental Concentration

The curriculum in instrumental music education is designed to prepare instrumental music teachers for positions in junior high schools, and high schools. Students who complete this program are fully qualified for licensure by the Mississippi Department of Education. All instrumental majors must participate in the University Band during every semester of their attendance at MSU except during the semester in which they student teach. (Students are advised to participate in more than two ensembles only after consultation with their advisor and/or the department head.) All Instrumental Music Education majors must study the same instrument in applied lessons for at least six semesters, the last of which will culminate in a Senior Recital.

12 hours Applied Instrument (6 semesters of 2 hour lessons)  
7 hours Major Ensemble  

Total hours needed for major: 134

Vocal Concentration

The curriculum in vocal music education is designed to prepare vocal teachers for positions in elementary schools, junior high schools, and high schools. Students who complete this program are fully qualified for licensure by the Mississippi Department of Education. All vocal majors must participate in the University Chorus during every semester of their attendance at MSU except during the semester in which they student teach. (Students are advised to participate in more than two ensembles only after consultation with their advisor and/or the department head.) All Vocal Music Education-Voice Emphasis majors must study voice in applied lessons for at least seven semesters, the last of which will culminate in a Senior Recital.

Total hours needed for major: 134

Keyboard Concentration

The curriculum in keyboard music education is designed to prepare music teachers for positions in elementary schools, junior high schools, and high schools. Students who complete this program are fully qualified for licensure by the Mississippi Department of Education. This program provides the student with a balanced curriculum combining the practical and theoretical aspects of music education. All keyboard majors must participate in the University Chorus during every semester of their attendance at MSU except during the semester in which they student teach. (Students are advised to participate in more than two ensembles only after consultation with their advisor and/or the department head.) All Vocal Music Education-Keyboard Emphasis majors must study piano in applied lessons for at least seven semesters, the last of which will culminate in a Senior Recital.

Department of INSTRUCTIONAL SYSTEMS, LEADERSHIP, and WORKFORCE DEVELOPMENT (TTE), (OST), (INDT), (TTS)

Major Advisor: Anthony A. Olinzock
Office: 100 Industrial Education Building

Please refer to Degree Program Modification statement located under CURRICULA in the College of Education section of this catalog.

TECHNOLOGY TEACHER EDUCATION (TTE)

Emphasis: Business Technology
Major Advisor: Connie Forde
Office: 251 Industrial Education Building
Cmf1@ra.msstate.edu
Phone: 662-325-2280

The Technology Teacher Education program provides teacher preparation with an emphasis in Business Technology. Schools recruit graduates of the TTE program to teach academic business courses and Business & Computer Technology (BCT) as well as Computer Discovery. Specific certifications and/or endorsements include:

- Business Education - Grades 7-12 (Certification #105)
- Business & Computer Technology (Certification #310)
- Computer Applications (Certification #111)
- Cooperative Education (Certification #317)

MSU Bulletin is not the final source of information; departmental advisement is critically important for course sequence and selection. Students should always get advisement and approval from MSU advisor for course scheduling.

Educational Leadership (EDA)
Major Advisor: Anthony A. Olinzock
Office: 101 Industrial Education Building

The programs in educational administration are designed through course sequence, planned observation and participation, individual study and research, and other learning experiences to prepare administrators, supervisors, teachers, and other educational leaders for positions of leadership in elementary, middle, and secondary schools, and in central offices. The department also provides training for community college administrators.

Administration and supervision programs are offered leading to the Master of Education degree, the Educational Specialist, the Doctor of Education, and the Doctor of Philosophy degrees.

Trade and Technical Studies (TTS) non-teaching

Major Advisor: W.C. Johnson
Office: 106 Industrial Education Building
(132 semester-hour, non-teaching curriculum)

This curriculum is designed to prepare the graduate for supervisory, mid-management, and other leadership positions in industry. It provides an opportunity for the community college student with a technical specialty to transfer a block of related technical course credits to a four year baccalaureate curriculum. An objective of this curriculum is to add breadth to the technical specialty by including mathematics, science, management skills, and upper level in technical courses. Job opportunities are good.

The “Technical Specialty” courses must be coordinated in some technical area.

MSU Bulletin is not the final source of information; department advisement is critically important for course sequence and selection. Substitutions are permitted with approval of the department head.

Total hours needed for major: 135

Total hours needed for major: 130

Total hours needed for major: 23
OFFICE SYSTEMS and TECHNOLOGIES (OST) non-teaching
(128 semester hour non-teaching curriculum)
Major Advisor: Dr. Byron Havard
Office: 107 Industrial Education Building
Bch63@colled.msstate.edu
Phone: 662-325-2280

The Office Systems and Technologies program is designed to prepare students for office management and administrative support positions as well as positions involving analysis, design, and implementation of office systems. These information managers, sometimes known as the chief information officers (CIO’s) are in great demand. The Department of Labor projects that over 500,000 administrative support positions will be created by 2005.

Office and information managers must be prepared to work and advance within contemporary and futuristic environments. Firms now demand that they be capable of success in global communications, human interaction, conceptual understandings and technical skills.

The OST curriculum includes mastery of computer systems and various computer applications (word processing, spreadsheet, database, graphics, desktop publishing, and integrated systems), telecommunications, administrative practices and communication, and information management. Students also study the broad areas of business administration, including accounting, finance, economics, business law, management, marketing, and insurance.

Minor in General Business Administration. By completing the business requirements for the OST degree, students also are eligible to receive a minor in General Business Administration from the College of Business. OST majors interested in a minor in general business administration should contact an academic coordinator in room 221 McCool Hall.

MSU Bulletin is not the final source of information; department advisement is critically important for course sequence and selection. Students should always get advisement and approval from MSU advisor for course scheduling.

INDUSTRIAL TECHNOLOGY (INDT) non-teaching
Concentration: Industrial Distribution
Major Advisors: Dr. John Wyatt
Office: 100 Industrial Education Building
(110 semester-hour, non-teaching curriculum)

This curriculum is designed for students who want to prepare for employment leading to supervisor, administrative and other types of management positions in the production areas of industry or into Industrial Distribution, the jobber or wholesale level of sale, distribution and/or installation of industrial products and equipment. Successful completion of the four-year curriculum will provide an excellent background in science, mathematics, design, and human relations, together with a degree of skill in the use of machines and tools, and a knowledge of industrial processes and materials.

Graduates should rapidly become proficient in the technical aspects of supervision and administration, and in dealing with personnel; and, depending on the selected course emphasis, the graduate should rapidly become proficient in the various aspects of manufacture, sale, and distribution of industrial products. Job opportunities are bright.

NOTE: This curriculum lends itself well to a double major in management or marketing.

MSU Bulletin is not the final source of information; departmental advisement is critically important for course sequence and selection. Students should always get advisement and approval from MSU advisor for course scheduling.

The INDT baccalaureate degree requirements include a cumulative and MSU grade point average of 2.50 on all courses considered in the “major.” “Major” courses are defined as those courses listed on the INDT curriculum sheet with the following course symbols: TKI, MGT, EG, or MKT.

Upper Division courses (3000 level and up) must be taken at a senior college or university. See your advisor for prerequisites and proper course sequence.

College of Engineering home page: http://www.engr.msstate.edu

GENERAL INFORMATION

The James W. Bagley College of Engineering is a professional college whose purposes are to provide both undergraduate and graduate education, to conduct basic and applied research and to engage in extension and public service activities. The College consists of ten operating departments and centers, as follows:

- Department of Aerospace Engineering
- Department of Agricultural and Biological Engineering
- Dave C. Swalm School of Chemical Engineering
- Department of Civil Engineering
- Department of Computer Science
- Department of Electrical and Computer Engineering
- Department of Industrial Engineering
- Department of Mechanical Engineering
- Diagnostic Instrumentation and Analysis Laboratory
- Engineering Research Center for Computational Field Simulation

The Bagley College has the Mission to provide programs of excellence in teaching, research, and outreach and the Vision to be nationally known for innovative programs. To accomplish the mission the College has established the following specific objectives:

1. Excellence in engineering education with enhancements for the 21st century
2. Highly robust and relevant fundamental and applied research
3. Robust, multidimensional outreach to industry, government, the K-12 and community college systems, and the citizens of Mississippi
4. Effective personal and professional development for faculty and staff
5. Appropriate facilities for a modern, comprehensive engineering program
6. Active partnerships with business, industry and government
7. Enhanced national image and reputation of the college and university

The Bagley College is dedicated to providing an extraordinarily rich environment where engineering students can gain the skills that will allow them to become leaders and builders in commerce, industry, and government. Through innovations in and enhancements to the curriculum, Bagley engineering graduates will: 1) Develop effective communications skills; 2) Fully utilize the computer as a productivity tool; 3) Develop effective leadership and teamwork abilities; 4) Understand the entrepreneurial process; and 5) Comprehend the global business environment. These enhancements ensure that Bagley engineering graduates are highly sought after by employers and will continue to be successful.

A study abroad program provides students with an opportunity to take courses in another country and experience different cultures. This experience broadens the vision of those who participate and increases their awareness of the global environment in which engineers work. Engineering students also have the opportunity to apply for Congressional internships. Currently, internships are in place for the US Congress in Washington, D.C.

The Bagley College is dedicated to producing outstanding graduates who are capable of achieving excellence. With a strong focus on engineering fundamentals and an attitude among the faculty of helping each student achieve his or her best, Bagley engineering graduates are ready to obtain a position with the leading companies or further their education at the finest graduate schools in the nation.

Basic-level professional programs leading to the Bachelor of Science degree are offered in Aerospace Engineering, Biological Engineering, Chemical Engineering, Civil Engineering, Computer Engineering, Computer Science, Electrical Engineering, Industrial Engineering, Mechanical Engineering, and Software Engineering. All programs except Computer Science and Software Engineering are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET). Computer Science is accredited by the Computing Accreditation Commission of ABET.

All basic-level engineering programs are designed to give the student an understanding of the fundamental principles underlying engineering science and engineering practice. Each curriculum consists of four sequences: Basic Sciences and Mathematics; a general education component; Engineering Sciences; and Engineering Analysis, Design and Systems.

Included in the Basic Sciences and Mathematics sequence are Biology, Chemistry, Physics, and Mathematics, through Calculus and other advanced mathematics topics.

The University Core Curriculum, published in this Bulletin, determines the general education component.

The sequence in Engineering Sciences consists of studies in engineering mechanics, thermodynamics, transfer and rate mechanisms, electrical theory, the nature and properties of materials, and computer science.

The Engineering Analysis, Design and Systems sequence is directed toward the creative and practical phases of economic design, involving analysis, synthesis, and engineering research and development. This sequence is the most distinctive feature of the engineering curricula, since it is the element of creative and economic design which distinguishes the engineer from the pure scientist.

Engineers and Computer Scientists must develop communication skills through courses in English composition, public speaking, and upper level writing.

The curriculum in Computer Science consists of general studies, mathematics, science, computer science, and electives.

ENTRANCE REQUIREMENTS

Prospective students are encouraged to take as many courses as possible in mathematics, science, English, social studies, and foreign languages while in high school. One unit of computer-aided graphics is recommended for engineering students and at least one-half unit of keyboarding and one-half unit of computer programming are recommended.

The level of high school preparation needed to be successful in an engineering or computer science degree program as measured by ACT or SAT scores and high school academic core grade point average has been identified. The following guidelines are established to help high school students...
students understand the level of preparation required for engineering and computer science. In addition, these guidelines are established to help MSU students at risk who want to pursue engineering or computer science.

Math Prerequisites

In order to be successful in engineering, a student must develop good math skills through courses in Calculus, differential equations, and other math topics. In engineering and computer science, the first math course that applies to a degree is Calculus. Taking Calculus requires that a student have an adequate preparation in Algebra, Geometry, and Trigonometry.

To provide students with the best possible opportunity for success in Calculus, the Department of Mathematics has established the following guidelines for placing students in math courses:

MA 1713 Calculus I - have an ACT math sub-score of 26 or higher, or have grades of C or better in MA 1313 College Algebra and MA 1323 Trigonometry.

MA 1323 Trigonometry - have an ACT math sub-score of 24 or higher, or have a grade of C or better in MA 1313 College Algebra.

MA 1313 College Algebra - have an ACT math sub-score of 20 or higher.

Students who are not prepared for Calculus I will be required to first complete College Algebra and/or Trigonometry before taking Calculus. This may delay a student from taking some engineering courses until they have developed the proper math background but this should not discourage a student from pursuing an engineering degree. Improving math skills early in their academic career will result in a student having greater academic success.

Students who do not meet the guidelines for enrolling in Calculus I should consider completing College Algebra and Trigonometry during the summer prior to attending Mississippi State. These courses may be taken either at Mississippi State, at a Mississippi Community or Junior College, or at any other accredited two-year or four-year institution. Only grades of C or better will be accepted as satisfying these pre-requisites. Courses taken during high school will not count for this credit unless they were taken as part of a dual enrollment program and appear on a separate transcript from a two-year or four-year institution.

New Freshmen Admission

For regular admission to one of the College of Engineering’s degree granting programs as a freshman, students must be admitted to MSU, complete the following high school academic core: 4 units of English, 4 units of mathematics (algebra, geometry, trigonometry), 3 units of science (chemistry and either biology or physics), 3 units of social studies and/or foreign languages and 2 units of electives, and meet any one of the following criteria:

1. Have a composite score greater than or equal to 23 on the ACT or 1060 on the SAT
2. Have a composite score of 20.21 or 22 on the ACT or between 940 and 1050 on the SAT with a high school GPA of 3.0 or greater on academic core courses listed above
3. Have any ACT or SAT score with a high school GPA of 3.5 or greater on academic core courses listed above

These criteria are essential for the success of a student beginning an engineering or computer science curriculum at the level shown in the following pages of this Bulletin. Applicants with justifiable circumstances may be considered for special admission.

New freshmen applicants who do not meet these requirements, are otherwise admitted to MSU, and want to pursue an engineering degree should join the undeclared major with a pre-engineering concentration. These students will be advised for the first 30 hours by the University Advising Center. Students in the pre-engineering and computer science curricula who request to be assigned a mentor from the engineering or computer science faculty.

Students with course work deficiencies will be required to schedule preparatory course work. This course work will be in addition to that shown in the engineering and computer science curricula and will, in general, extend the time to graduation.

Internal Transfers

Students in the pre-engineering concentration and other students at Mississippi State University may transfer into an engineering degree-granting program if they satisfy any one of the following criteria:

1. Have completed at least 30 hours with a cumulative GPA greater than or equal to 2.0 and passed Calculus I (MA 1713), English Composition I (EN 1103), and Fundamentals of Chemistry (CH 1213) with grades of C or better.
2. Students admitted to one engineering or computer science degree program may transfer to another engineering or computer science program at any time so long as they meet departmental transfer requirements.

External Transfers

Students may transfer from other colleges or universities into MSU engineering degree programs if they meet all requirements to transfer to MSU and satisfy any one of the following criteria:

1. Meet engineering new freshmen admission standards listed above
2. Have completed at least 30 hours with a cumulative GPA greater than or equal to 2.0 and passed Calculus I (MA 1713), English Composition I (EN 1103), and Fundamentals of Chemistry (CH 1213) with grades of C or better.

Applicants with justifiable circumstances may petition the Dean of Engineering for special admission.

Course work taken elsewhere will not be applied toward a degree in the College of Engineering until it is determined that it is equivalent to the required coursework or is an acceptable substitute. Also, only course work taken elsewhere on which a grade of C or better has been earned will be considered for application toward a degree. No more than one-half of the hours in the engineering computer science curriculum may be transferred from a two-year community or junior college.

For admission to undergraduate programs, international students must earn a minimum paper-based TOEFL score of 550 or a computer-based minimum score of 213.

PERSONAL COMPUTER REQUIREMENT

All engineering students are required to own or lease a personal laptop computer. Minimum specifications for a computer will be developed and posted on the College of Engineering home page on the World Wide Web by July of each year. A computer meeting these minimum specifications should be a viable choice for the entire student’s academic career. As a general rule, minimum computer requirements will be met by a computer that has been on the market for at least one year. The cost of the personal computer can then be added to the total cost of an education and financial aid will be awarded accordingly. The full cost of the computer will not necessarily be covered by financial aid depending on the total amount of aid received and other regulations.

GRADUATION REQUIREMENTS

Graduation requirements are the courses and hours shown in the individual programs. Some majors require a grade of C or better in certain courses. This information is available from the department in which the student is enrolled. All students are expected to meet these requirements together with the course prerequisites, and to be sure that they are taking the proper courses in the curriculum in which they expect to graduate. Students should discuss their programs with their academic advisors each semester, particularly before pre-registration. For graduation with a baccalaureate degree from the College of Engineering, in addition to meeting the quality-point requirements of the University, candidates must have no less than a 2.0 cumulative GPA on all courses taken at Mississippi State University and applied to meeting degree requirements. It is the student’s responsibility to be sure that requirements are fulfilled in a particular program before applying for a degree.

Credit up to a maximum of six semester hours will be applied toward a baccalaureate degree in the College of Engineering for successful completion of the Army ROTC Advanced Course of study or the Air Force ROTC Professional Officer Course of study. Such credit may not be available to students who, before they enter an ROTC program, have completed those courses for which ROTC credit is usually substituted. Credit will normally be for a maximum of six semester hours per candidate, and accepted toward a degree.

Correspondence credit up to a maximum of six semester hours will be accepted, with the prior approval of the department head and the dean. In no case will engineering courses taken by correspondence be approved.

No courses taken under the pass/fail option may be used to satisfy degree requirements.

COMPUTATIONAL ENGINEERING

Computational engineering is the application of computational methods and high-performance computing to solve large-scale, complex engineering problems. It addresses problems that cannot be solved easily by
analytical means and that are too difficult or costly to model physically through experiments.

Such problems must have precise mathematical statements, require knowledge of the discipline, and be of significant scope. Examples include the following: analyzing the airflow around an aircraft or missile in order to optimize design for performance and efficiency; analyzing the behaviors of electromagnetic fields; studying the movement of pollution through ground water aquifers; or predicting global weather patterns.

The Bagley College of Engineering offers both Master’s and Ph.D. degrees in Materials Engineering. Students interested in these programs should refer to the Mississippi State University Graduate Bulletin. For additional information, the student should consult advisors in the Robert M. Hearin Foundation of Jackson, Mississippi, who have established a multilevel engineering entrepreneurship program to serve students at all levels of interest.

THE JACK HATCHER ENGINEERING ENTREPRENEURSHIP PROGRAM

The role of the engineering entrepreneur in the expansion of the economy is self-evident. Engineers with entrepreneurial spirit and skills are the key to establishing new companies and new processes in order to optimize design for performance and efficiency; analyzing the behaviors of electromagnetic fields; studying the movement of pollution through ground water aquifers; or predicting global weather patterns.

THE JACK HATCHER ENGINEERING ENTREPRENEURSHIP PROGRAM

The field of Environmental Engineering is an interdisciplinary one concerned with applications of the principles of engineering science and design to improve the quality of the environment. As a broad field, efforts in Environmental Engineering can be found in several departments within the College of Engineering, including the Departments of Agricultural and Biological Engineering, Chemical Engineering, and Civil Engineering. Areas of concern in Environmental Engineering include air quality, and pollution control, soil and water quality and wastewater collection, treatment, and disposal, food quality and management of agricultural land and other natural resources, and the minimization, management, and recycling of industrial, municipal, and agricultural waste.

While the College of Engineering does not offer degrees in Environmental Engineering, the undergraduate student pursuing a Bachelor of Science degree may develop an area of emphasis in Environmental Engineering by fulfilling elective course requirements with a number of courses related to Environmental Engineering including:

- ABE 3303 Biosystems Environment I
- ABE 3413 Bioinstrumentation I
- ABE 4313 Bional Treatment of Non-Point Source Pollution
- ABE 4423/6423 Bioinstrumentation II
- CHE 4613 Air Pollution Control Design
- CHE 4623 Hazardous Waste Incineration
- CHE 3824 Environmental Engineering
- CHE 4873 Water and Wastewater Engineering
- CHE 4883 Environmental Sanitary Analysis
- CE 4003 Directed Individual Study
- CE 4893 Hazardous Waste Management
- CE 4853 Solid Waste Disposal Systems

Courses in environmental chemistry, organic chemistry, biochemistry, microbiology, and geological sciences are offered by the College of Arts and Sciences.

For additional information, the student should consult advisors in the College of Engineering, especially those in Agricultural and Biological Engineering, Chemical Engineering, and Civil Engineering.

THE JACK HATCHER ENGINEERING ENTREPRENEURSHIP PROGRAM

The Materials Certificate Program is available to both traditional and non-traditional students enabling industry to send individuals back to school to gain further training, while also allowing current students the opportunity to pursue an interdisciplinary specialty. The program is administered through the Dean of Engineering’s office.

- ACC 2103 Princ Financial Accounting
- EC 2123 Microeconomics
- IE 3913 Engineering Economy
- MKT 3323 Principles of Marketing
- MGT 3323 Entrepreneurship
- The Seminars Series - GE 3011
- The “company” or project experience.

By utilizing electives, students in most engineering disciplines can complete the course requirements with a maximum of six to nine hours of additional work above the degree program. Also, much of the coursework will apply toward the prerequisites for an MBA degree at a later time should the student decide to pursue that path.

A GPA of 2.25 is required on all coursework, and no grade less than a C can be applied toward the certificate. A maximum of two courses can be transfer courses, and correspondence courses will not be accepted. In addition, a pass in grade may be maintained for three semesters of GE 3011 Engineering Entrepreneurship Seminar.

The “company” or project experience is the real-world engineering experience of developing a marketable product or service. In most cases, the certificate candidate can get academic credit through the senior design course or a technical elective. For example, Electrical Engineering and Computer Engineering majors can receive credit for the senior design project requirement (ECE 4512/4522 and ECE 4521). The “company” experience may be a project proposed by one of the participating companies in the Idea Fair or a concept developed by students or faculty members.

Upon completion of the Entrepreneurship Certificate Program requirements, the Associate Dean will review the student’s records. If all requirements are met satisfactorily, the Associate Dean will submit the candidate to the Deans of Business and Industry and of Engineering for issuance of the certificate. The Associate Dean will notify the Registrar to have a statement placed on the candidate’s transcript. The certificate will be issued concurrently with the B.S. Degree in Engineering or Computer Science.

ENGINEERING STUDY ABROAD PROGRAMS
(See International Study Programs)

ADVANCED-LEVEL PROFESSIONAL PROGRAMS

Materials Certificate Program

The Materials Certificate Program in engineering is available to qualified students who complete an organized plan of study in the interdisciplinary materials-related areas at MSU. Within the College of Engineering there are several courses that deal with a wide range of materials-related topics such as advanced composites, biomaterials, materials processing, polymers, and electrical materials. By placing the Materials-related courses offered through the Aerospace, Biological, Chemical, Civil, Electrical/Computer, and Mechanical Engineering departments in an organized plan of study, a student may pursue and achieve an interdisciplinary education and training program in materials.

A wide variety of research is underway in these areas, including composite material behavior and manufacture, fatigue and fracture mechanics, corrosion studies of new implant materials, fine grained ceramic materials, silicon carbide-based composites, biological materials, materials processing, polymers, and electrical materials. By placing the Materials-related courses offered through the Aerospace, Biological, Chemical, Civil, Electrical/Computer, and Mechanical Engineering departments in an organized plan of study, a student may pursue and achieve an interdisciplinary education and training program in materials.
Upon successful completion of the program of study and approval by the advisory committee, a certificate will be issued to the student signed by the Dean of Engineering and the head of the department in which the student is majoring.

**Admission to the Certificate Program:**

Students pursuing a materials certificate are typically:

1. Persons possessing at least a bachelor’s degree in engineering or science;
2. Persons working towards either a bachelor’s or master’s degree in engineering or science; or
3. Persons working in technical positions in industry desiring a certificate in materials but requiring additional prerequisites.

**Minimum admission requirements**

To be admitted to the program a student must have satisfactorily completed freshman Chemistry (CH 1213, CH 1223), its associated laboratories (CH 1211), freshman Calculus (MA 1713, MA 1723), and Physics (PH 2213, PH 2223). In addition, the student is responsible for meeting all prerequisites for each course taken towards the materials certificate.

Candidates in categories (1) and (2) automatically will meet the program requirements, either upon entrance to the program or in parallel. For those lacking the prerequisites, additional course work must be completed successfully, either as a matriculated or non-matriculated student.

In all cases, it is the responsibility of the student to provide an official transcript of all courses taken prior to admission into the program. An application for admission into a proposed course of study must be completed by the student and an official transcript must be provided for admission to the program. A member of Materials Engineering Working Group will review the application and agree to the program of study.

**Certificate Requirements:**

To receive a materials certificate, students must complete at least one course from list A, at least two courses from list B, and at least two courses from list C with a grade of “C” or better in each class taken. At least two courses from lists B and C must be completed in addition to the student’s technical elective requirement, and the course(s) from list A may be part of the student’s regular curriculum.

**List A: Introductory courses (may be part of student’s home curriculum):**

- ABE 3813 Biophysical Properties of Materials
- CHE 3413 Engineering Materials
- ME 3403 Material & Manufacturing in Design

**List B: Fundamentals of Material Science**

- ABE 8314 Corrosion of Biomedical Implants
- ASE 3213 Aircraft Structures I
- CE 3314 Construction Materials
- CE 4623 Steel Structures
- CE 4633 Concrete Structures
- CE 4713 Forensic Engineering/Failure Analysis
- CHE 4323/6323 High Polymer Theory and Practice
- CHE 4423/6423 Fundamentals of Industrial Corrosion
- ECE 4243/6243 Introduction to Physical Electronics
- EM 4133/6133 Mechanics of Composite Materials
- EM 4213 Advanced Mechanics of Materials
- FP 4323/6323 Physical Properties of Wood
- ME 8253 Fatigue and Fracture in Engineering Design

**List C: Applied Materials Science**

- ABE 4523/6523 Biomedical Materials
- ABE/CHE 4624/6624 Experimental Methods of Materials Research
- ABE 4613/6613 Biomechanics
- ABE 8324 Failure Analysis of Metallic Medical Implants
- CE 3413 Soil Mechanics
- CE 4603/6603 Advanced Steel Design
- CH 8343 Electro-analytical Chemistry
- EPP 8223 Scanning Electron Microscopy
- FP 4423/6423 Mechanical Properties of Wood
- ME 4403 Machine Design
- ME 4423/6423 Mechanical Systems Design
- ME 4453/6453 Lubrication
- ME 4413/6413 Casting and Joining
- ME 4423/6423 Machining and Forming
- ME 4453/6453 Finite Element Analysis

For further details about the program, contact Office of the Dean of Engineering at 662-325-2270.

---

**SOFTWARE ENGINEERING CERTIFICATE PROGRAM**

Software Engineering is the application of engineering practices to the design and maintenance of software. Large complex software systems and products often impact millions of lines of code and operate in safety-critical environments. Software Engineering skills are critical to the nations and the state of Mississippi to maintain and expand the industrial base. The certificate program is designed to provide a focused set of course work in Software Engineering. The certificate is available to both traditional and non-traditional students. Through it, industry and government organizations may offer employees additional technical education related to their work and job performance.

The Certificate in Software Engineering is administered by the Department of Computer Science and the Dean of Engineering.

**Admission to the Certificate Program:**

It is anticipated that students from the following backgrounds will likely pursue a certificate in software engineering:

- Persons working in industry in a software development or maintenance function and who wish to improve their technical background.
- Government employees such as those located at the John C. Stennis Space Center or the U.S. Army Engineering Research and Development Center in Vicksburg who do not wish to complete a degree, but desire to take advantage of educational benefit programs for their employer.

Students on campus in related disciplines that would like to obtain this certificate in addition to another degree option.

All candidates, as a minimum, must demonstrate through experience or course work, the following:

- Have obtained a BS degree
- Mastery of computer science fundamentals
- Proficiency in at least one programming language
- At least two years experience working in significant software development project
- Knowledge of discrete mathematics, algorithms, and data structures at the level of an undergraduate course
- Practical knowledge or programming methods and computer organization.

Although it is expected that most students applying for this certificate program will hold undergraduate degrees from programs like computer science, engineering, mathematics, or physics - those holding a degree in another field will be considered for admission if they can clearly demonstrate their ability to perform graduate-level work in software engineering.

Programming experience is considered essential.

Applications for admission to the Certificate in Software Engineering Program will be administered by the Department of Computer Science. Students applying for admission may or may not be degree candidates - but all must make application to and be admitted by the MSU Graduate School. Application for admission to the certificate program will result in a determination of qualification and, if admitted, an advisor will be assigned. The advisor will meet with the applicant to create a planned program of study and to obtain any necessary pre-requisite waivers that the student may need (primarily for non-traditional certificate candidates).

**Requirements for Certificate Award**

A minimum of 15 semester credit hours must be completed for award of the certificate. All the courses must be at the 4000 level or higher. Some of the certificate courses may count toward a degree, subject to approval of the Graduate School and the student’s Graduate Committee. Successful completion of the Certificate in Software Engineering requires completion of all courses in List A and any two form List B below:

**List B (Certificate in Software Engineering Core Courses):**

- CS 4213/6213 Software Engineering I
- CS 8233 Software Engineering Project Management or IE 4533 Project Management
- CS 8236/6236 Software Testing and Quality Assurance

**List B (Certificate in Software Engineering Electives - choose two):**

- CS 4223/6223 Software Engineering II
- CS 4233/6233 Software Architecture and Design paradigms
- CS 4243/6243 Information and Computer Security
- CS 8243 Software Specification
- CS 8253 Software Design
- CS 8263 Software Verification and Validation

**Issuance of Certificates**

Upon a candidate’s successful completion of the program’s requirements, the College of Engineering will issue a certificate in Software Engineering. The candidate will submit the initial application for the certificate to the Department of Computer Science. The department will validate that the candidate has met all requirements satisfactorily and will recommend award of the certificate to the Dean.

For further details about the program, contact the Department of Computer Science at 662-325-2756.

---

**GRADUATE STUDY**

Graduate study leading to the Master of Science degree is available in Aerospace Engineering, Biological Engineering, Biomedical Engineering, Chemical Engineering, Civil Engineering, Computer Engineering, Computer Science, Computational Engineering, Electrical Engineering, Industrial Engineering and Mechanical Engineering. The Master of Science degree requires 24 semester hours of coursework and a thesis. The Master of Science (non-thesis option) is also offered with thirty-three (33) semester hours of graduate study required.
Science also requires two semester hours of seminar for Computer Science. The Doctor of Philosophy degree is available in all departments, either through a composite inter-disciplinary program or through a specific major. In addition, interdisciplinary Ph.D. Degrees are offered in Computational Engineering and Engineering Physics.

Professional Business Administration can be combined with professional engineering education in a program leading to a Bachelor of Science degree in a field of engineering and the Master of Business Administration degree in a field of Business. Students desiring further information on this program should consult the Director of Graduate Instruction in the College of Business and Industry. Counseling by the College of Business and Industry faculty will permit the most rapid rate of program completion. In most cases, a Bachelor of Science in a field of engineering, plus a Master of Business Administration, can be earned in five academic years plus one summer term.

Graduate teaching assistantships are available in most of the teaching departments in the College of Engineering, and a number of graduate research assistantships are available. Barrier and Honda graduate fellowships are awarded each year. Because Mississippi State University is a member of the National Consortium for Graduate Degrees for Minorities in Science and Engineering, Inc. (GEM), students receiving GEM Fellowships may elect to pursue graduate studies in the College of Engineering at Mississippi State University. Engineering students interested in graduate study should consult with their department heads, the Associate Dean for in the College of Engineering, and Office of Graduate Studies.

OFF-CAMPUS CENTERS and PROGRAMS

Vicksburg Graduate Center
The College of Engineering offers the Master of Science degree in Civil Engineering, Engineering Mechanics, Chemical Engineering, Electrical Engineering, Computational Engineering, Computer Engineering, Computer Science and Mechanical Engineering through the Vicksburg Center for Graduate Study in Engineering, in cooperation with the United States Army Engineering Research and Development Center. All requirements for the degree may be satisfied in the Vicksburg Center. Fifteen semester hours may be taken in courses taught by adjunct faculty, with an additional requirement of nine semester hours to be taken in courses taught by the regular, full-time engineering faculty at Mississippi State University. Thesis research and thesis requirements may be met in the Vicksburg Center through the appointment of a thesis director from the adjunct engineering faculty in Vicksburg and a major professor who is a member of the regular, full-time engineering faculty on the campus of Mississippi State University.

In addition to the courses taught on-site, students may register for video tape courses and interactive courses taught via video teleconferencing in Chemical Engineering, Civil Engineering, Computer Engineering, Computer Science, Electrical Engineering, Industrial Engineering and Mechanical Engineering.

Center of Higher Learning at the Stennis Space Center
This center, located at the John C. Stennis Space Center in Hancock County, provides students the opportunity to pursue master's degrees from Mississippi State University in Civil Engineering, Electrical Engineering, Industrial Engineering, and Mechanical Engineering, as well as a certificate in Software Engineering. Course materials are delivered by distance learning technologies - internet delivered video, interactive video teleconferencing, and video tape. A dedicated student may earn a master's degree in three or four years. Students must be fully admitted for graduate studies in on of the participating programs and follow a plan of study approved by the department.

Students may register for courses at the Center of Higher Learning. Courses are delivered by distance education technology during the enrollment period; corresponding sections of the same courses are taught simultaneously on the main campus in Starkville.

In addition to courses offered as part of the four degree programs, courses in other engineering disciplines may be offered upon request.

Meridian Campus
The Meridian campus of Mississippi State University is located at 920 Highway 19 North in Meridian, Mississippi. Students may pursue master's degrees in Chemical Engineering, Civil Engineering, Computer Engineering, Computer Science, Electrical Engineering, Industrial Engineering, and Mechanical Engineering by distance education. The same courses as those offered at the Vicksburg and Stennis centers are offered at Meridian. Students must be fully admitted for graduate studies in one of the participating programs and follow a plan of study approved by the department.

For more information on courses offered through distance education in the College of Engineering, contact Russell Foster, Engineering Coordinator Division of Continuing Education, Memorial Hall, Mississippi State University, MS 39762-9634, Mailstop: 9634; phone: 662-325-2635; email: rfoster@ce.msstate.edu.

Department of AEROSPACE ENGINEERING (ASE)
Interim Department Head: Associate Professor Boyd Gatlin
Office: 330 Walker Engineering Building

The Department of Aerospace Engineering at Mississippi State University provides an accredited undergraduate curriculum with the mission of preparing students to enter the workplace as qualified entry-level aerospace engineers or to enter any aerospace engineering graduate program adequately prepared for advanced study. This mission is accomplished by a strong foundation in mathematics and physical and engineering sciences upon which student problem solving and application skills are developed. The curriculum stresses analytical and communication skills, with particular emphasis placed on engineering design throughout the curriculum. A capstone design experience in the senior year provides the opportunity to integrate design, analytical, and problem solving skills along with communication skills in a team environment which emulates aerospace engineering practice.

The mission is accomplished by the following learning objectives:
1. Provide a strong foundation in the fundamentals of mathematics, basic physical sciences, and engineering sciences.
2. Develop analytical and problem-solving skills and proficiency in the use of techniques and tools that implement these skills.
3. Develop design skills and integrate design throughout the curriculum.
4. Develop proficiency in written, oral, and graphic communication.
5. Introduce and develop an appreciation for the arts, humanities, and social sciences.
6. Promote engineering ethics, personal integrity and responsibility, and professionalism.
7. Develop teamwork and leadership skills.
8. Instill a commitment to lifelong learning.

The aerospace engineering program is accredited under the EC 2000 criteria by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012. Telephone: 410-347-7700.

Department of AGRICULTURAL and BIOLOGICAL ENGINEERING (ABE)
Department Head: Professor Jerome A. Gilbert
Office: 100 Agricultural and Biological Engineering Building

AGRICULTURAL ENGINEERING
An Agricultural Engineering emphasis is offered in the Biological Engineering curriculum in the Agricultural and Biological Engineering Department, which is jointly administered by the College of Engineering and the College of Agriculture and Life Sciences. The student can tailor a specialization in agricultural engineering by choosing the precision agriculture/ag systems emphasis in the Biological Engineering curriculum. Advisors in the department will assist students in selecting courses consistent with the agricultural engineering interests of the student. The Biological Engineering curriculum below should be consulted for required curricular courses.

BIOLOGICAL ENGINEERING (BE)
Biological Engineering is that branch of the engineering profession which deals with engineering problems encountered in biological systems. The responsibilities of the Biological Engineer may include the need for more complex food-producing systems, controlling and monitoring the deterioration of the earth’s environment, the replacement of living organs and artificial organs, the use of new technologies to assist the disabled, and the creation of new engineering designs based on the inherently creative characteristics of living systems. The graduate can find rewarding experiences in extending his/her education in the engineering analysis of living things.

The curriculum in Biological Engineering provides options for study in the following emphasis areas: biomedical engineering, environmental engineering, precision agriculture/ag systems, and pre-medical studies. The curriculum is based upon fundamentals from both the physical and biological sciences. It includes engineering analysis and design courses planned to give the student sufficient background for analyzing functions and developing mechanisms related to biological systems. It has proven to be an excellent program of study for premedical, pre-dental, pre-law, and pre-veterinary studies. The graduate can find rewarding experiences in extending his/her education in the engineering analysis of living things.

The educational objectives of the program are as follows:
1. To educate students in the academic discipline of Biological Engineering so that they can formulate and solve engineering problems involving biological systems.
2. To ensure that students develop effective written and oral communication skills.
3. To instruct students in the latest computer-based technology in engineering.
4. To develop the student’s ability to work individually and in teams to complete engineering design projects.
5. To prepare students for employment in engineering jobs or for study in graduate and professional schools and for continual professional development.

The Biological Engineering curriculum is offered by the Department of Agricultural and Biological Engineering which is jointly administered by the College of Engineering and the College of Agricultural and Life Sciences. All freshmen in Biological Engineering are required to have a laptop computer. Students should check with the College of Engineering for computer specifications prior to purchasing a laptop.

The Biological Engineering Program is accredited under the EC 2000 criteria by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012. Telephone: 410-347-7700.

Total hours needed for major: 134

* The technical electives may be selected from the following: Any of the department’s listings of Advanced Undergraduate Courses, or EM 4111 or EM 4123. Other courses in computer science, physical science, mathematics, and engineering may be selected, with special approval of the department.
** Fulfills Jr. Sr. Writing Requirement.
Chemical Engineering is the application of the principles of the physical sciences, together with the principles of economics and human relations, to fields that pertain directly to processes and process equipment in which material is treated to effect a change in state, energy content, or composition. This is accomplished through a clear department vision and stated objectives. The Chemical Engineering profession is quite diversified in terms of industries and opportunities within those industries. The Dave C. Swalm, School of Engineering’s goal is to mold students into chemical engineers that have the potential to have far reaching impacts on the advancement of science and industrial practices. This is achieved through training in basic science, fundamental math (algebra and calculus principles) and advanced math concepts (differential equations and conceptions building on these principles)

A. Provide students with a foundation on which to establish a basis to learn engineering principles. This is accomplished by providing the students with skills in

- Fundamental math (algebra and calculus principles)
- Basic science
- Engineering concepts

B. Expand the students’ understanding of fundamental engineering principles to address the practice and/or research aspects of chemical engineering. This is achieved through training in

- Problem solving skills
- Traditional Chemical Engineering Fundamentals
- Advanced math concepts (differential equations and conceptions building on these principles)

C. Refine students’ engineering abilities to become practicing chemical engineers using a holistic approach incorporating

- Product and Process Design
- Economical Aspects
- Ethics
- Environmental Issues

The application and development of computer skills

Oral and written communications

Perspective through art, humanities and social/behavioral sciences

The application and development of computer skills

Team building and cooperative working groups

Health and Safety Issues

Professionalism

The Chemical Engineering program is accredited under the EC 2000 criteria by the Engineering Accreditation Commission of the accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012. Telephone: 410-347-7700.
### Department of CIVIL ENGINEERING
**Department Head:** Professor Thomas White  
**Office:** 235 Walker Engineering Building

The Civil Engineer plans, designs, and supervises construction of almost every facility essential to modern life. Roads, bridges, buildings, water supply and waste disposal systems, transit systems, airfields, dams and irrigation projects are examples of the creative efforts of Civil Engineers. The field of Civil Engineering offers limitless employment opportunities that range from high-tech computer-aided design to hands-on field engineering. Civil Engineers find rewarding careers in government, military, industry or private practice to meet the challenges of pollution control, energy, transportation, and other problems that face modern society. The mission of the Civil Engineering Department at Mississippi State University is to provide the student with knowledge and skills needed to enter civil engineering practice, or to continue studies at the graduate level. By serving as role models, the faculty helps the student develop a commitment to ethics and integrity, and a sense of responsibility to the community and the public.

The education program objectives of the Department of Civil Engineering carry out the department’s mission by providing an educational environment that will:

1. Provide a strong foundation in the fundamentals of mathematics, basic sciences and engineering sciences;
2. Develop basic analytical and problem-solving skills, and proficiency in the use of techniques and tools that implement these skills;
3. Integrate the fundamentals of engineering design throughout the curriculum;
4. Develop proficiency in written and oral communications;
5. Instill awareness of, and appreciation for, the arts, humanities and social sciences;
6. Promote a sense of professional ethics, and personal integrity and responsibility;
7. Develop teamwork and leadership skills; and
8. Instill a commitment to the challenge of lifelong learning.

The Civil Engineering Program is accredited under the EC 2000 criteria by the Engineering Accreditation Commission of the Accreditation Board for Engineering Education.

### Total hours needed for major: 138
Department of COMPUTER SCIENCE (CS)
Department Head: Professor Julia E. Hodges
Office: 300 Butler Hall

The Department of Computer Science is dedicated to maintaining quality programs in undergraduate teaching, graduate teaching, and research, and to the fruitful interaction between teaching and research. In research, we wish to maintain our present emphasis on applications (often pursued with colleagues from other disciplines), and upon the synergistic relationships between theory and applications in which the most meaningful advances often result. The department has identified three specific areas in which we shall seek national prominence: software engineering, artificial intelligence, and high-performance computing/scientific visualization. The Department of Computer Science offers degree programs leading to the Bachelor of Science degree in Computer Science, Software Engineering, and [jointly with the Department of Electrical and Computer Engineering] Computer Engineering. The department also offers study leading to the Master of Science and the Doctor of Philosophy degrees in Computer Science.

The Mississippi Alpha Chapter of Upsilon Pi Epsilon, the national computer science honorary society, was chartered at the University in 1973 and juniors, seniors, and graduate students with outstanding academic records are selected for membership. The department also supports a student chapter of ACM, the national professional society of the computing sciences.

For more information about the computer science or software engineering programs, requirements of double-major programs, careers in computer science and software engineering, or placement of graduates, please contact the Department of Computer Science at Box 9637, Mississippi State, MS 39762, at office@cs.msstate.edu, or at 662-325-2756. View the Computer Science WWW pages at http://www.cs.msstate.edu/. For more information about the Computer Engineering program, please see the section on the Department of Electrical and Computer Engineering.

Computer Science
Major Advisor: Dr. Donna S. Reese
300 Butler Hall

Computer Science is the study of the principles, applications, and technologies of computing and computers. It involves the study of data and data structures and the algorithms to process these structures; principles of computer architecture—both hardware and software; problem solving and design methodologies; and language design, structure, and translation techniques. Computer Science provides a foundation of knowledge for students with career objectives in a wide range of computing and computer-related professions.

The objectives for the department with respect to the Bachelor of Science Degree in Computer Science are as follows:
1. The instruction a student receives will be consistent with national norms and will enable the student to become a competent software developer, to understand how computer hardware and software work, and to understand computer science theory.
2. The graduate can compete for jobs in the discipline at both the regional and national levels, and will be able to solve technical problems together with coworkers, to use and develop software tools, to communicate effectively in the workplace, and to apply computer science theory to practical circumstances.
3. The graduate can compete for admission to graduate programs nationwide, and will be able to continue learning new principles and practices of computing as the field progresses.
4. The graduate will understand social and ethical issues that arise from the increased use of technology in society.

Computer Science graduates begin careers as computer programmers, system analysts, programmer/analysts, software engineers, systems programmers, computer system engineers and in a number of other computer-related jobs. A minor in computer science is available to students with major programs of study in other fields at the University.

The Bachelor of Science degree requires the completion of a total of 129 credit hours of general studies, computer science, mathematics and science, supporting technical courses. A list of the computer science curriculum requirements is shown below. To graduate, a student must have a “C” average in all MSU computer science courses attempted.

The computer science program is accredited by the Computing Accreditation Commission of the Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore MD 21202-4012. Telephone: 410-347-7700.

Computing environment. The minor in computer science is not available to students majoring in computer engineering or software engineering since significant parts of these majors consist of computer science courses.

A minor in computer science consists of CS 1314, CS 2813, CS 2314, and nine hours of approved upper-division courses. A list of approved courses is available from the Department of Computer Science.

Software Engineering (SE)

Major Advisor: Dr. Donna S. Reese
300 Butler Hall

Software Engineering is the application of engineering practices to the design and maintenance of software. The Software Engineering degree program prepares students for careers in the engineering of large complex software systems and products. These systems often involve millions of lines of code and frequently operate in safety-critical environments. The Software Engineering major contains courses related to the study of software engineering in practice necessary to manage these development processes. The faculty for the Software Engineering program is drawn from the Computer Science and Industrial Engineering Departments.

The objectives for the department with respect to the Bachelor of Science Degree in Software Engineering are as follows:

1. The instruction a student receives will be consistent with national norms and will enable the student to understand the state-of-the-practice engineering of software systems and products, and to become a competent software developer, and to understand how software systems are designed, constructed, and maintained.

2. The graduate can successfully compete for software engineering positions in the discipline at both the regional and national levels, and will be successful in the discipline by being able to apply computer science to software engineering processes in practical circumstances.

3. The graduate can solve technical problems together with co-workers in a team environment, can use and develop software tools, and apply written and oral communication skills effectively in the workplace.

4. The graduate can compete for admission to graduate programs nationwide, and will be able to continue learning new principles and practices of computing as the field progresses. The graduate is capable of advancing to professional certification, as it becomes available nationwide.

5. The graduate will understand and be able to apply social and ethical duties that arise from the increased use of technology in society.

The Bachelor of Science degree in Software Engineering requires the completion of a total of 133 credit hours of general studies, computer science, industrial engineering, mathematics and science, supporting technical courses, and free electives. A listing of the software engineering curriculum requirements is shown below. To graduate, a student must have a "C" average in all MSU computer science courses attempted.

Requirements for a minor in Software Engineering. Software Engineering practices and skills are valuable in a wide range of disciplines, and students with majors in other fields of study may wish to complement their studies with a minor in software engineering. Completion of the minor requirements should prepare the student to pursue careers that involve the application and development of software systems in their field of study.

A minor in software engineering consists of CS 1314, CS 2314, CS 2324, and nine hours of approved upper-division software engineering courses. A list of approved courses is available from the Department of Computer Science.

Total hours needed for major: 133
Department of ELECTRICAL and COMPUTER ENGINEERING (ECE)

Interim Department Head: Professor James C. Harden
Office: 216 Simrall Engineering Building

The specific educational objectives for both the Computer Engineering and Electrical Engineering undergraduate programs of study are that students:

1. obtain a strong foundation in fundamentals including competence in mathematics, science, computing, and engineering;
2. demonstrate the ability to address unstructured problems specific to technical specialties in Computer Engineering or Electrical Engineering by identifying and implementing solutions using the proper tools, practical approaches, and flexible thinking;
3. interact with others, both individually and within multidisciplinary teams using effective oral and written communication skills and have the ability to deal with both technical and non-technical subjects when working with peers, supervisors, and the public;
4. develop an appreciation for the ethical duties incumbent on a Computer Engineering or Electrical Engineering professional including a commitment to lifelong learning and concern for society and the environment.

COMPUTER ENGINEERING (CPE)

Major Advisor: Mr. Mike Nosser
Office: 216 Simrall Engineering Building

With the origin of the modern computer dating back to the late 1940’s and the growth of computer hardware fueled by the availability of digital integrated circuits starting in the late 1960’s, Computer Engineers have enjoyed a pivotal role in technology that now permeates our entire society. Whether the end product is an integrated circuit, a system of networked embedded computers, or any system that relies on digital hardware or computer software, its development requires the skills of a Computer Engineer. While computing systems include both hardware and software, it is the optimal combination of these components that is the unique realm of the Computer Engineer. Today, Computer Engineers are a driving force in the technological and economic development of the digital age.

The curriculum requirements for Computer Engineering are built around a substantial engineering core curriculum and required courses in Electrical Engineering and Computer Science. The requirements in Mathematics, the basic sciences, and engineering sciences provide the breadth of exposure required for all engineering disciplines. Basic Electrical Engineering requirements include Circuit Theory, Electronics and Digital Devices which are supplemented by upper-level courses in Computer Architecture, Integrated Circuit Design and Computer Aided Design of Digital Systems. Basic Computer Science courses include a coordinated three-course sequence providing fundamental knowledge in data structures, algorithms, object oriented programming, software engineering, real-time application and software development tools. These courses are developed across multiple platforms and are based on the C++ and Java language. Upper-level courses in Data Communications and Computer Networks, Algorithms and Operating Systems are also provided. Students wishing to gain depth of coverage in real-time embedded systems, parallel computing, advanced VLSI or signal processing can achieve this with the availability of technical electives selected from an approved list or in consultation with a faculty advisor. Required courses in communications skills, social sciences and humanities provide studies in non-technical areas that are traditional in a broad-based education. A cornerstone senior design course requires students to apply newfound knowledge and explore entrepreneurship. Students research and identify a problem and work in teams applying a combination of hardware and software to develop a solution. Critical and Final Design Reviews enable students to develop their professional presentation skills.

The Computer Engineering Program is accredited under the EC 2000 criteria by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012. Telephone: 410-347-7700.

This program is offered through joint efforts of faculty in the Department of Electrical and Computer Engineering and the Department of Computer Science. Prospective Computer Engineering majors should contact the Computer Engineering Program Coordinator for updated program requirements.

ELECTRICAL ENGINEERING (EE)
Major Advisor: Mr. J. Mike Nosser
216 Simrall Engineering Building

The Electrical Engineer is a principal contributor to the modern technological age in which we live today. Following in the footsteps of inventors such as Thomas Edison and Alexander Graham Bell, the Electrical Engineer is developing technology that improves the quality of life. Developments in microelectronics, telecommunications, and power systems have had a profound effect on each of us. Electrical Engineers have affected all segments of our society such as transportation, medicine, and the entertainment industry, to name only a few. Indeed, the Electrical Engineer has principally been responsible for the advent of the computer age in which we live today as well as the computer’s miniaturization and rapid expansion in computational power.

The curriculum in Electrical Engineering has a foundation based on the principles of the electrical and physical sciences and uses mathematics as a common language to facilitate the solution of engineering problems. The core curriculum consists of a sequence of courses in digital devices, electrical circuits, electromagnetic field theory, electronics, and modern energy conversion. In the senior year, students have the opportunity to take additional course work in one or more technical areas that include: telecommunications, electromagnetics, power systems, high voltage, feedback control systems, microelectronics, signal processing, and computer systems. Supporting course work outside electrical engineering consists of a strong background in mathematics, physical sciences, social sciences, fine arts, humanities, and personal communication skills. Computers are used extensively throughout the curriculum, and students are expected to become proficient in higher-order programming languages and several application software tools. Although the concept of design is stressed throughout the program so as to emphasize the problem-solving skills of the engineer, the senior year includes a capstone design experience where much of the previous study is culminated. Through this two-semester design course sequence, students are required to integrate design and analytical problem-solving skills together with communication skills in a team environment.

The Electrical Engineering Program is accredited under the EC 2000 criteria by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012. Telephone: 410-347-7700.

Department of INDUSTRIAL ENGINEERING (IE)
Department Head: Professor Larry Brown;
Office: 260 McCain Engineering Building

Industrial engineering is the application of engineering methods and the principles of scientific management to the design, improvement, and installation of integrated systems of people, materials, information, equipment, and energy. The industrial engineer is concerned with the design of total systems, and is the leader in the drive for increased productivity and quality improvement.

The industrial engineering profession uses a variety of specialized knowledge and skills. These include communications, economics, mathematics, physical and social sciences, together with the methods of engineering analysis and design.

The industrial engineer is often involved in designing or improving major systems that encompass the total organization. Consequently, he/she is often in contact with individuals from many segments of the organization. From his/her education and these experiences, the industrial engineer develops a global view of the many inter-related operations necessary to deliver a firm’s goods and services. Because of their management skills and global view of the organization, a large proportion of industrial engineers move into management positions, and later advance into top-management positions.

Although industrial engineering is especially important to all segments of industry, it is also applied in other types of organizations, such as transportation, health care, public utilities, agriculture, defense, government, and merchandising. Industrial engineering is finding increasing application in service industries.

With increasing emphasis on quality and productivity for successful international competition, it is expected that industrial engineers will be in increasing demand in the coming decades.
The objectives of the Department of Industrial Engineering are founded in Mississippi State University’s Educational Philosophy and in the industrial engineering profession and were developed to satisfy the needs of the department’s constituents: students, employers, alumni, and faculty.

The program objectives are:
1. To graduate students who are well versed in industrial engineering theory, know how to apply that theory, and capable of functioning effectively in a broad range of organizations.

Consequently, industrial engineering graduates are expected to be able to achieve the following:

A. Function effectively within an organization, with an understanding of its many operations and its management style.
B. Evaluate and design operation and management systems, and their controls, to safely and effectively produce and deliver the organization’s products and services.
C. Formulate and validate mathematical and computer models of systems to predict system behavior using current or proposed resources, configurations, and limitations.

2. To graduate students who have mastered the basic and professional skills in communication (both written and oral), economics, physical and social science, mathematics, and statistics.

3. To graduate students who are capable of interacting cooperatively in professional situations with others having different cultures, education, and interests.

4. To graduate students who are capable of thinking independently, critically examining ideas, and making discerning professional judgments, whether intellectual, ethical, or aesthetic.

5. To graduate students who are professionally mature, responsible, and informed citizens.

6. To graduate students who are prepared for a lifelong pursuit of learning.

7. To provide excellence in instruction in its industrial engineering courses, using advanced teaching methods and technologies in classrooms, laboratories, and other educational settings.

Because of the importance of systems design in the many facets of industrial engineering, instruction of the principles and methods of design is integrated throughout the curriculum of industrial engineering, and culminates in a major design experience in the student’s senior year.

The Industrial Engineering Program is accredited under the EC 2000 criteria by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012. Telephone: 410-347-7700.

#### Department of MECHANICAL ENGINEERING

Department Head: Professor W. Glenn Steele

Office: 210 Carpenter Engineering Building

Mechanical Engineering is the application of science and mathematics to the design, development, and operation of mechanical and energy systems. Examples of these systems include mechanical devices ranging from simple linkages and gears to complex automated robots and energy systems ranging from basic water pumps to high-performance jet engines. Since the range of applications is so broad, virtually all industries employ Mechanical Engineers in various capacities. Some of the major areas of employment are the manufacturing, chemical, paper, aerospace, utility, construction, transportation, petroleum, electronics, and computer industries.

The mission of the Mechanical Engineering program is to produce graduates who have acquired the knowledge and abilities commensurate with the requirements of beginning engineering practice and who have received a broad education that will enable them to become leaders in industry, the profession, and the community. Graduates of the program will be prepared for life-long learning, including graduate studies.

To carry out this mission, the Mechanical Engineering faculty, with input from other constituencies, has established the following objectives:
1. To provide a strong foundation in the fundamentals of mathematics, basic sciences, and engineering sciences.
2. To develop the students’ ability to apply modern engineering analytical and experimental methods and tools.
3. To develop the students’ skill in the engineering approach to problem solving together with their ability to understand and design systems and devices.
4. To achieve a complementary education in the arts, humanities, and social/behavioral sciences.
5) To emphasize oral and written communications and teamwork.
6) To promote engineering ethics and professionalism.

The Mechanical Engineering curriculum is designed to meet these objectives. The basic courses in mechanics, materials, thermodynamics, electronics, and dynamics prepare the student for the comprehensive design courses in the senior year culminating in major design experiences in energy systems and in mechanical systems. Throughout the curriculum there is significant use of the computer to solve realistic engineering problems. All entering ME juniors will be required to have a portable computer that they will use interactively in the classroom. The ME laboratory sequence stresses the planning, design, and operation of experiments. The curriculum also places a strong emphasis on technical communications. Senior technical electives allow the student to study particular areas of interest.

The Mechanical Engineering Program is accredited under the EC 2000 criteria by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore MD 21202-4012. Telephone: 410-347-7700

COLLEGE of FOREST RESOURCES

G. Sam Foster, Dean
107 Thompson Hall
Telephone: (662) 325-2953
Bob L. Karr, Associate Dean
111 Thompson Hall
Telephone: (662) 325-2793
Mailing Address: Box 9680
Mississippi State, MS 39762-9680

GENERAL INFORMATION

Organization. The College of Forest Resources is composed of the Departments of Forestry, Wildlife and Fisheries, and Forest Products. The College is a part of the Division of Agriculture, Forestry, and Veterinary Medicine.

Graduates receive a Bachelor of Science degree in Forest Resources, with majors in Forestry, Forest Products, or Wildlife and Fisheries Science. Within the Forest Products major there are curricular options in Wood Industries Management, Building Supply Operations, Forest Products Technology, Forest Products Marketing, Industrial Environmental Operations and Wood Materials Science. Within the Forestry major, there are curricular options in Forest Management, Environmental Conservation, Urban Forestry, and Wildlife Management. Each of these curricular options in the forestry major meet the requirements for the professional degree in Forestry. Within the Wildlife and Fisheries Science major there are curricular options in Aquaculture Science, Wildlife Science, Fisheries Science, Wildlife Law Enforcement, and Wildlife Pre-Veterinary Medicine. Each of these curricular options meet requirements for the professional degree in Wildlife by the Wildlife Society or in Fisheries by the American Fisheries Society. Each department offers courses leading to the Master’s and Ph.D. degrees.

Graduate Programs in Forest Resources. Graduate programs leading to a M.S. or Ph.D. degree are offered in the College of Forest Resources: Departments of Forestry, Forest Products, and Wildlife and Fisheries. For detailed information about graduate study, see the Graduate Bulletin. Copies of the Graduate Bulletin may be secured by writing to Office of Graduate Studies, P.O. Box G, Mississippi State, Mississippi 39762-5726.

Research. Research is conducted in the Forest and Wildlife Research Center by the Department of Forestry, the Department of Wildlife and Fisheries, and the Department of Forest Products. Professors are employed jointly as professors and research scientists. There is opportunity for students to gain valuable experience by working part-time as research assistants. The experimental work often provides valuable demonstrations for the teaching program. Forestry-related research also is conducted in other departments of the University, and there are cooperative research arrangements with federal agencies, notably the Southern Forest Experiment Station of the U.S. Forest Service, which operates research programs with headquarters at four locations in Mississippi, including the Inventory and Analysis Research Unit and the Forest Tree Seed Research Unit located in Thompson Hall at Mississippi State University. Wildlife and Fisheries research also is conducted by a Cooperative Unit of the U.S. Fish and Wildlife Service which is located in Thompson Hall. All these activities enrich the teaching program.

Facilities. The classrooms and many of the laboratories and offices of the College of Forest Resources are located in Thompson Hall, one of the largest modern buildings with excellent facilities for teaching and research in forestry and wildlife and fisheries. Other laboratories and offices are in the Mississippi State Forest Products Laboratory, Forest Resources Laboratory, and the Fisheries Laboratory. The facilities used for research— instruments, apparatus, literature, experimental forests, greenhouses, captive animal facilities and fish ponds—are also valuable in the teaching program. The John W. Starr Memorial Forest of 8,000 acres is conveniently close to the campus, intensively managed, and regularly used for demonstration as well as research. Also the Starr Memorial Forest adjoins the Noxubee National Wildlife Refuge and the Tombigbee National Forest, which are also used for student instruction and research. The Sharp Forest, 1,600 acres in Tishomingo County, was given to the University by Jack, Mollie, and Kate Sharp to be used for forest resources education and research with part of the income designated for scholarships.

Entrance Requirements. Transfer students with less than 2.0 quality point average may not be admitted automatically to the College of Forest Resources’ degree programs. Permission to enroll will be granted on an individual basis, depending on specific circumstances and the requirements of the major for which the student seeks to enroll.

Graduation Requirements. Course and hour requirements for graduation are those shown in the individual programs of study. Each student is expected to become familiar with the courses and the prerequisites in the curriculum in which he/she expects to graduate and to be responsible for meeting those requirements. The College of Forest Resources requires a minimum of 120 semester hours for graduation in the College of Forest Resources. In addition, no course work will be considered for acceptance unless a grade of C or better has been earned.

Degree Requirements: In addition to University and College requirements students must attain a minimum grade of C on the Forestry Major core courses taught within the College of Forest Resources. These courses are: FO 1101, FO 2213, FO 3012, FO 3014, FO 3102, FO 3101, FO 4121, FO 39762-5726.

The Objective. The objective of the Forestry major is to prepare its graduates for professional, science-based careers in the management and use of forested ecosystems. By combining courses offering a broad general education with specialized professional courses, the curriculum of the Forestry major is designed to produce professionally competent graduates who have appropriate development in interpersonal relations, written and oral communications, cultural understanding, environmental awareness, and in professional ethics.

Accreditation. The educational programs in Forest Management, Wildlife Management, Urban Forestry, and Environmental Conservation leading to the first professional degree in Forestry at Mississippi State University are accredited by the Society of American Foresters (SAF). SAF is the specialized accrediting body recognized by the Commission on Accreditation of Post-secondary Accreditation and the U.S. Department of Education as the accrediting agency for forestry education in the United States.

The Major: The core curriculum of the Forestry Major is comprised of specifically selected and intentionally designed courses which must be completed satisfactorily by each student who intends to graduate in this major. In addition to completing the core curriculum of the Forestry Major, each student must complete one of the four academic options for specialized study offered by the Forestry Major. The four academic options are Forest Management, Wildlife Management, Urban Forestry, and Environmental Conservation. Each of the four options is an integral part of the Forestry Major and is accredited by the SAF. Graduates of the major are qualified to become a Registered Forester in Mississippi after completing an examination for this purpose from the Board of Registration for Foresters in Mississippi.

The Forestry Major is designed for completion in four academic years plus an eight-week summer field program between the sophomore and junior years. Completion of the special summer field program is prerequisite to enrollment in junior/senior level professional courses in the Forestry Major and students should plan their schedules accordingly. Correspondence courses are not accepted toward the forestry degree.

Transfer Students: Transfer students are encouraged to enter the Forestry Major at MSU in the Spring semester of their sophomore year to complete their academic programs in the normal four-year period of study. Transfer students should be aware that course work taken elsewhere may not be accepted toward a degree in forestry. Only course work that is determined by the Forestry Department to be equivalent to required course work will be accepted. In addition, no course work will be considered for acceptance unless a grade of C or better has been earned.

Major in FORESTRY (FO)

Major Advisor: Dr. Keith L. Bell
Office: 327 Thompson Hall

The Objective. The objective of the Forestry major is to prepare its graduates for professional, science-based careers in the management and use of forested ecosystems. By combining courses offering a broad general education with specialized professional courses, the curriculum of the Forestry major is designed to produce professionally competent graduates who have appropriate development in interpersonal relations, written and oral communications, cultural understanding, environmental awareness, and in professional ethics.

Accreditation: The educational programs in Forest Management, Wildlife Management, Urban Forestry, and Environmental Conservation leading to the first professional degree in Forestry at Mississippi State University are accredited by the Society of American Foresters (SAF). SAF is the specialized accrediting body recognized by the Commission of Recognition of Post-secondary Accreditation and the U.S. Department of Education as the accrediting agency for forestry education in the United States.

The Major: The core curriculum of the Forestry Major is comprised of specifically selected and intentionally designed courses which must be completed satisfactorily by each student who intends to graduate in this major. In addition to completing the core curriculum of the Forestry Major, each student must complete one of the four academic options for specialized study offered by the Forestry Major. The four academic options are Forest Management, Wildlife Management, Urban Forestry, and Environmental Conservation. Each of the four options is an integral part of the Forestry Major and is accredited by the SAF. Graduates of the major are qualified to become a Registered Forester in Mississippi after completing an examination for this purpose from the Board of Registration for Foresters in Mississippi.

The Forestry Major is designed for completion in four academic years plus an eight-week summer field program between the sophomore and junior years. Completion of the special summer field program is prerequisite to enrollment in junior/senior level professional courses in the Forestry Major and students should plan their schedules accordingly. Correspondence courses are not accepted toward the forestry degree.

Transfer Students: Transfer students are encouraged to enter the Forestry Major at MSU in the Spring semester of their sophomore year to complete their academic programs in the normal four-year period of study. Transfer students should be aware that course work taken elsewhere may not be accepted toward a degree in forestry. Only course work that is determined by the Forestry Department to be equivalent to required course work will be accepted. In addition, no course work will be considered for acceptance unless a grade of C or better has been earned.

Degree Requirements: In addition to University and College requirements students must attain a minimum grade of C on the Forestry Major core courses taught within the College of Forest Resources. These courses are: FO 1101, FO 2213, FO 3012, FO 3014, FO 3102, FO 3101, FO 4121, FO 39762-5726.
The Options: The academic options within the Forestry major are offered to encourage the student to design a program with the assistance of a faculty advisor that will fit his or her interests and aptitudes. Each option has been constructed by substituting restricted, or in some cases directed, electives for what otherwise would appear as Business, Science, Free, or Professional electives in the major. Options are intended to provide opportunities for the student to focus beyond the foundation education provided by the core curriculum of the Forestry major. Options are not intended to provide the depth of study demanded by a separate major.

Forest Management Option
Option Advisor: Dr. Scott Roberts
315 Thompson Hall

This option provides the basic education necessary to enter the profession of forestry with the Bachelor of Science degree, yet permits a wide choice of electives. The student may elect courses in almost any subject of interest, if prerequisites are met; however, credit toward the degree will not be allowed for remedial courses, nor for courses covering substantially the same material as courses already passed, or covering only part of the subject matter of required courses.

Faculty advisors are assigned to assist students in selecting electives to meet their personal objectives. A program of study leading to a double degree in forestry and business is available.

Courses to be taken in addition to those in the core curriculum of the Forestry Major are as follows:

<table>

Total hours: 139

Professional electives are chosen from a list approved by the Department of Forestry.

Wildlife Management Option
Option Advisor: Dr. Emily Schultz
315 Thompson Hall

Undergraduate students who wish to prepare for careers in wildlife management may do so by completing the Wildlife Management Option of the Forestry Major. This option is designed for forestry students who intend to pursue careers that emphasize wildlife management within the context of multiple-use management of forest land. In addition, the Wildlife Management Option prepares the student for a number of wildlife management positions and fulfills the course requirements for certification as a Wildlife Biologist by the Wildlife Society. Graduates of this option may undertake graduate studies in forestry or wildlife ecology and related areas.

Environmental Conservation Option
Option Advisor: Dr. Keith Bell
327 Thompson Hall

Students interested in careers dealing with complex environmental issues in the realm of forest resource management may prepare themselves through this option. All students within this option are required to take the following seven courses:

**PH 1113** General Physics or
**PH 2121** Physics I
**FO 3113** Forest Recreation Management
**BIO 3104** Ecology
**FO 3123** Forest Ecology & Global Environment
**FO 4452** Remote Sensing
**FO 4451** Remote Sensing Lab

17 hrs Emphasis Electives - See Emphasis listings that follow

### EMPHASIS ELECTIVES

#### Land Emphasis

**FO 4472/4471** GIS Nat Res Mgt and Lab
**FO 4483** Forest Soils
**GG 1113** Survey of Earth Sciences I
**GG 1111** Earth Sciences I Lab
**GG 3133** Intro Environ Geology
**GR 1114** Physical Geography
**GR 3113** Conservation of Natural Res
**GR 4603** Climatology
**PSS 4333** Soil Conservation and Use

### Social Emphasis

**AN 4173** Environment and Society
**CO 2203** Negotiations
**FO 4353** Forestry Law
**PHI 1123** Intro to Ethics
**PHI 4143** Philosophy of Science
**SO 4703** Population Problems

### Science Emphasis

**BIO 2503** Environmental Quality
**BIO 4203** Taxonomy of Spermatophytes
**BIO 4213** Plant Ecology
**FO 4463** Forest Hydrology
**WF 1213** Intro to Wildlife and Fish Conservation
**WF 3133/3131** Applied Aquaculture Ecological Lab
**WF 4222** Limnology
**WF 4221** Limnology Lab
**WF 4383** Wetlands Ecology and Mgt

**Total hours: 139**

An entire block of courses in a particular area of emphasis may be chosen, or a sampling of each may be recommended. Other courses may be substituted with approval by the Department of Forestry.

### Urban Forestry Option

Course Requirements
(34 credit hours)
Option Advisor: Dr. Stephen Grado
357 Thompson Hall

This option addresses an emerging need for the management of trees in our towns and cities. Urban foresters manage trees along city streets, in municipal parks, private wood lots, and utility right-of-ways. Employers include federal, state, and municipal governments, private consultants, and industry.

Courses to be taken in addition to those in the core curriculum of the major are as follows:

**FO 3113** Forest Recreation Management
**FO 4353** Forestry Law
**FO 4471** GIS Nat Res Management Lab
**FO 4472** GIS Nat Res Management
**LA 3623** Urban Planning
**PS 1113** American Government
**PS 4703** Prin Public Administration
**PSS 4243** Plant Materials I

Urban Forestry Elective is chosen from a list approved by the Department of Forestry.

### Major in Wildlife and Fisheries Science (WF)

Major Advisor: Dr. Bruce D. Leopold
Office: 109 Thompson Hall

Sustainable management of the diverse wildlife and fisheries resources by private and public sectors, requires knowledgeable and technically competent people. The Department of Wildlife and Fisheries offers a major in Wildlife and Fisheries Science designed to provide students with a curriculum that has foundations in biology, ecology, natural resources management, social sciences, computer science, and other contemporary educational needs for natural resources professionals. Five options are available to students: wildlife science, fisheries science, aquaculture science, wildlife law enforcement, and wildlife pre-veterinary medicine. The curriculum will prepare students for employment in natural resource professions within private, federal, or state wildlife, fisheries, or aquaculture sectors. Additionally, the curriculum ensures that students are eligible for employment upon graduation, as well as providing the academic background required for further post-graduate studies.

Students may proceed towards a DVM degree by taking a fifth option entitled the wildlife pre-veterinary program. Students, upon completing the course work outlined in the wildlife pre-veterinary program, may apply for admission into the College of Veterinary Medicine. Alternatively, students accepted into the early entry veterinary program, upon completing the wildlife pre-veterinary program satisfactorily, may be admitted into the College of Veterinary Medicine. There also is an opportunity to pursue, with an additional year, a M.S. degree in Veterinary or Wildlife Science. Upon successful completion of course requirements, the student will graduate with a B.S. degree in Wildlife and Fisheries Science, pre-veterinary option at the end of the fourth year, and a DVM at the end of the seventh year.

Course work in the Wildlife Science and the Wildlife Law Enforcement options, and the wildlife Pre-veterinary program, enables students to fulfill the course work requirements necessary to become Certified Wildlife Biologists by The Wildlife Society. The Fisheries Science option exceeds requirements for certification by the American Fisheries Society as an Associate Fisheries Scientist.

The Wildlife and Fisheries Science Major is designed for completion within 4 years, but some students may not complete the program in that time because of course scheduling or other constraints. Students also are required to enroll in a 2-week summer session prior to the junior year (except for the wildlife pre-veterinary program students). Transfer students are encouraged to begin course work at MSU by the end of their sophomore year to enable graduation in 4 years. Transfer students should be aware that course work taken elsewhere may not be accepted toward a degree in Wildlife and Fisheries Science. Only course work determined by the Wildlife and Fisheries Department to be equivalent to required course work will be accepted. Additionally, course work will be considered for acceptance unless a grade of C. or better has been earned. Correspondence courses will not be accepted toward the Wildlife and Fisheries Science Degree. Transfer students with a grade point average less than or equal to 2.0 may not be admitted automatically into the Wildlife and Fisheries major. Permission to enroll on specific circumstances and the requirements of the Wildlife and Fisheries Science major. In addition to University and College requirements, students must maintain a C. or better in Wildlife and Fisheries Science major core courses taught within the College of Forest Resources. These courses are option specific. Students in the wildlife pre-veterinary program, interested in pursuing the Veterinary Medicine program, must meet all admission requirements by the College of Veterinary Medicine.

### University Core

EC 2123  Intro to Microeconomics
3 hours Social Science Elective - See option for requirement
The Options: The academic options within the Wildlife and Fisheries Science Major are offered to enable students to develop an academic background that is suited to their professional career goals. Each option has been developed to supplement the core curriculum which provides the basis for the wildlife and fisheries science major, regardless of the area of expertise desired by the student.

Aquaculture Science Option
Course Requirements
Option Advisor: Dr. John A. Hargreaves
Room 229 Thompson Hall

This option is designed for undergraduate students who wish to pursue one or more advanced degrees (M.S., Ph.D.), as it prepares students for graduate school. This option is intended for serious, academically strong students, who maintain an A-B grade record (GPA 3.0), which is the minimum requirement for admittance into graduate schools. Undergraduate students who wish to seek employment within the aquaculture industry, particularly as farm managers, upon graduation should consider the aquaculture option within the Department of Agricultural and Biological Engineering.

Courses to be taken in addition to those of the core curriculum include:

6 hours Humanities Elective - See University CORE
3 hours Social Science Elective - See University CORE
6 hours Nutrition/Physiology/Anatomy Elective
3 hours Business/Marketing or Ethics Elective
CH 1043  General Chemistry
CH 1053  General Chemistry II
CH 1051  Experimental Chemistry Lab
WF 1213  Intro to Wildlife & Fish Conservation
CH 2503  Elem Org Chemistry
CH 2501  Elem Org Chemistry Lab
BIO 3304  General Microbiology
BIO 3103  Genetics
FO 3012  Intro to Forest Communities
FO 4123  Principles of Silviculture
FO 4121  Principles of Silviculture Lab

WF 4473  Wildlife and Fisheries Practices

All electives are chosen from a list approved by the Department of Wildlife and Fisheries.

Fisheries Science Option
Course Requirements
Option Advisor: Dr. Donald C. Jackson
Room 215 Thompson Hall

This option is designed for undergraduate students who intend to seek employment immediately following receipt of a B.S. degree or pursue advanced degrees (M.S., Ph.D.) and wish to obtain positions in fisheries science and management. Employment is possible in state and federal agencies, with limited positions in private industry. A M.S. degree will allow an individual to be more competitive, particularly if an advanced position and a higher salary is desired. This option is intended for serious, academically strong students who can maintain an A-B record (GPA 3.0) which is the minimum required for admittance into graduate schools.

Courses to be taken in addition to those of the core curriculum include:

PH 1113  General Physics or
PH 2213  Physics I
6 hours Humanities Elective - see University CORE
3 hours Social Science Elective
CH 1043  General Chemistry
CH 1053  General Chemistry
CH 1051  Experimental Chemistry Lab
WF 1213  Intro to Wildlife & Fish Conservation
CH 2503  Elem Org Chemistry
CH 2501  Elem Org Chemistry Lab
BIO 3514  Invertebrate Zoology
BIO 3103  Genetics I
FO 3012  Intro to Forest Communities
BIO 4513  Ichthology

Total hours: 136
Note: Pre-requisites and co-requisites are strictly enforced in the College of Forest Resources. It is the student's responsibility to be aware of pre-requisites and co-requisites for all courses required in his or her program; pre-requisites and co-requisites are identified in the Course Description section of this Bulletin.

Major Core
AIS 3203  Intro to Tech Writ in Agricomm or
MGT 3213  Organizational Comm or
EN 3103  Writing for Engineers or
BIO 3013  Prof Writing for Biologists
CS 1013  Basic Computer Concepts or
AEC 4513  Adv Micro Software Use in Ag or Eco or
BIS 1013  Intro to Bus Computer Systems or
FO 3102/3101  Comp Appl for Forest Res
WF 1101  Wildlife and Fisheries Prof
PSS 3303  Soils
PSS 3301  Soils Lab
BIO 2203  Dendrology
BIO 3524  Biology of Vertebrates
WF 3133  Aquatic and Terr Ecology
WF 3131  Aquatic and Terr Ecology
3 hours Policy Electives

Total hours: 136
All electives are chosen from a list approved by the Department of Wildlife and Fisheries.

**Wildlife Law Enforcement Option**

Option Advisor: Dr. Kevin M. Hunt  
Room 223 Thompson Hall

This option is designed for undergraduate students who wish to seek employment immediately following receipt of a B.S. degree and wish to obtain positions related to natural resource law enforcement (e.g., conservation officers, park rangers) or wildlife managers (not biologists). Students may, upon graduation within this option, continue on to graduate school in the human dimensions-law enforcement or wildlife arenas. Starting salaries, on average, would be less than with a M.S. degree.

Courses to be taken in addition to those of the core curriculum include:

**Wildlife Science Option**

Option Advisor: Dr. Richard M. Kaminski  
Room 249 Thompson Hall

This option is designed for undergraduate students who wish to pursue one or more advanced degrees (M.S., Ph.D), as it prepares students for graduate school. Employment following this B.S. program is possible, but competition for jobs may be keen. This option is intended for serious, academically strong students, who maintain an A-B grade record (GPA 3.0), which is the minimum required for admittance into most graduate schools.

Courses to be taken in addition to those of the core curriculum include:

**Wildlife Pre-Veterinary Option**

Program Advisor: Dr. Bruce D. Leopold  
Room 109 Thompson Hall

Integration of wildlife science and management and veterinary medicine has become increasingly important with current diverse uses of wildlife and other renewable natural resources. As wildlife habitats dwindle and animal populations become more compressed, biologists must increase their attention towards disease diagnosis and abatement. This integrated curriculum allows the students to pursue a 3 + 1 undergraduate degree program in Wildlife and Fisheries Science for three years and then, if accepted, matriculate into the Veterinary Medicine program in College of Veterinary Medicine. Successful graduates of this program are qualified to apply for Certified Wildlife Biologist with The Wildlife Society as well as being qualified to practice veterinary medicine.

**Total hours: 114**

All electives are chosen from a list approved by the Department of Wildlife and Fisheries.

Mississippi State requires a minimum of 128 hours for the undergraduate degree. Therefore, to qualify for the B.S. degree in Wildlife and Fisheries Science/ Wildlife Pre-veterinary Option a student must complete the 3 years of the above listed undergraduate course work (114 hours) in the wildlife pre-veterinary program and also successfully complete the first year in the Veterinary Medicine curriculum.

**Major in FOREST PRODUCTS (FP)**

Major Advisor: Professor H. Michael Barnes, Room 5102  
Office: Forest Products Laboratory, 100 Blackjack Road
The mission of the Department of Forest Products is to enhance the intellectual, cultural, social, and professional development of its students by providing them with knowledge and skills needed to utilize and conserve diverse forest resources effectively. In this regard, the department’s primary teaching responsibility is to provide the high quality educational opportunities necessary to adequately prepare students for professional and scientific careers in forest products and wood science.

The State Legislature established the Forest Products Laboratory (FPL) in 1964. Its establishment culminated work by a group of Mississippians to obtain a research facility to serve the technical needs of forest-based industries and use of wood products in the state. Five laboratory/office buildings and other special purpose buildings, with a combined floor space in excess of 54,000 square feet, comprise the Laboratory’s physical plant. These buildings house the analytical and testing equipment, pilot plants, and support facilities required for a comprehensive research program involving wood and wood products.

Forest Products’ graduates work in industry, higher education, trade associations and government agencies across the country. Graduates find employment in four broad areas: manufacturing, marketing, technical service, and research. Career preparation in the manufacturing and marketing of wood products and furniture, for positions requiring high level skills with a broad technical background, in processing operations, such as drying, furniture manufacturing, gluing, machining, preservation, and chemical modification is available. All Forest Products students learn the biological, physical, chemical, and mechanical properties of wood as raw material.

Forest Products provides strong career opportunities in materials science, engineering, materials processing, process design and control, marketing and business. The processing of wood into a multitude of products requires professional wood scientists and technologist trained to understand the nature of this complex material and markets in which it is sold.

The Forest Products curriculum is accredited by the Society of Wood Science and Technology. Double degree programs with the College of Business and Industry are available.

A student enrolled in the forest products major must complete a specified core curriculum and one of six academic options within the major:

1. Wood Industries Management
2. Building and Supply Operations
3. Forest Products Marketing
4. Industrial Environmental Operations

**University Core**

- English Composition (6 hours)
  - EN 1103 English Comp I or
  - EN 1183 Honors Comp I
  - EN 1113 English Comp II or
  - EN 1173 Honors Comp II or

- Public Speaking (3 hours)
  - CO 1003 Fundamentals of Public Speaking or
  - CO 1093 Honors Oral Communication

- Mathematics (6 hours)
  - See major for specific requirements

- Natural Science (9 hours)
  - BIO 1203 Plant Biology
  - See major for additional requirements

- Humanities (6 hours)
  - See University CORE and Option for requirements

- Fine Arts (3 hours)
  - See University CORE

- Social/Behavioral Sciences (6 hours)
  - Professional electives, computer elective, and Forest Product electives are chosen from a list approved by the Department of Forest Products.

**Building Supply Operations Option**

This option is designed to provide Forest Products students with the background to pursue careers as managers of building supplies and distribution centers. The course work is designed to train the students in the technical aspects of building material capability, interaction, and service life. Students will also receive broad training in areas such as accounting, inventory management, promotion and sales techniques. Students that successfully complete this option will have career opportunities in small town building supplies as well as major chain stores with opportunity for advancement. The selection of a Marketing minor course for 3 SCH of Professional Elective will yield a MKT minor for students pursuing this emphasis. Course requirements include:

- MA 1613 Calculus for Bus and Life Sciences or
- MA 1713 Calculus
- BQA 2113 Business Statistics Methods I or
- IE 4613 Engineering Statistics I or
- ST 3113 Introduction to Statistical Inference
- BIS 1013 Intro to Bus Computer Systems or
- CS 1013 Basic Computer Concepts or

- BIO 3013 Prof Writing for Biologists
- PH 1113 General Physics or
- PH 2213 Physics I
- MA 1193 Calculus
- CH 1043 General Chemistry
- CH 1053 General Chemistry II
- CH 1051 Experimental Chemistry Lab
- MGT 3114 Principles of Management
- MGT 3013 Principles of Financial Accounting
- MGT 3013 Principles of Marketing
- FP 4253 Quan Meth Forest Prod and Furn
- FP 4353 Forest Prod Marketing
- MGT 4413 Consumer Behavior
- TR 3313 Principles of Transportation
- MGT 4813 Marketing Management
- MGT 3213 Retailing
- TR 4313 Physical Distribution Mgt
- 3 hours Professional Elective

Total hours: 128

Professional electives are chosen from a list approved by the Department of Forest Products.

**Forest Products Marketing Option**

This option is designed to meet the needs of industry for individuals with knowledge and training in basic sciences, business management and marketing, as well as, a thorough knowledge in wood properties and manufacturing technologies. Students completing this curriculum will earn a marketing minor and can expect to begin their careers in technical and managerial positions in sales, marketing, distribution of forest products, and product develop-
opment. Employment opportunities are varied with students finding positions in industry, government agencies, and associations serving the wood-based industry. Today, marketing increasingly is being recognized and utilized as a key element in the overall business strategy of forest products firms. Students entering this field find themselves with skills to rapidly advance beyond entry level position. Students pursuing this emphasis will receive a MKT minor. Course requirements include:

**Forest Products Technology Option**

This option is designed to train students for manufacturing management positions with forest products manufacturing firms. The course work provides students with a complete forest products industry background combined with industrial technology skills to allow application of these skills on the factory floor. Students who complete this curriculum will begin their careers in manufacturing management in a production environment. The addition of management and business courses provide students with skills to advance rapidly beyond the entry level. Course requirements include:

**Industrial Environmental Operations Option**

This option is designed to provide Forest Products students with the background to pursue careers as environmental managers within the forest products industry. Environmental compliance is a major component of all forest products manufacturers and industry has requested that prospective employees become knowledgeable in this field. Students that successfully complete this option will have career opportunities in virtually any forest products manufacturing operation with opportunity for advancements. The course work is designed to provide students with a basic understanding of environmental science, policy and practices and to complement the knowledge and experience received in the areas of forest products science and technology and business management. Courses have been selected from such diverse fields as economics, management, forestry and sociology. The selection of an Environmental Science certificate course for 3 SCH of Professional Elective will yield a Certificate in Environmental Science for students pursuing this emphasis. Course requirements include:

**Wood Industries Management Option**

This option is designed to provide Forest Products students with the background to pursue careers in the forest products and allied industries. The curriculum is multidisciplinary; provides a knowledge of the basic sciences, the social sciences, business, and wood science; and provides extensive training in the major wood processing operations. The abundant elective hours in this curriculum are chosen in consultation with an advisor in the Department of Forest Products and allow the student to tailor a program of study yielding a minor in General Business, Management, or other areas of business. Double degree programs with the College of Business & Industry are also available. Course requirements include:
The professional electives and forest product electives are chosen from a list approved by the Department of Forest Products.

Wood Materials Science Option

This option is designed to provide Forest Products students with the background to pursue careers in research and development or to continue their education at the graduate level. The curriculum is multi-disciplinary; provides a knowledge of the basic sciences, mathematics, and provides a strong background in wood materials science. By judicious selection of elective, students may obtain a minor in various fields. The professional electives are chosen in consultation with an advisor from a list approved by the Department of Forest Products. Course requirements include:

- **EN 3103** Writing for Engineers or
- **MGT 3213** Organizational Comm or
- **AIS 3203** Intro to Tech Writ in Agricom or
- **BIO 3013** Prof Writing for Biologists

The professional electives and forest product electives are chosen from a list approved by the Department of Forest Products.

Forest Products Minor

A minor in Forest Products will provide non-major students with knowledge of wood, wood products and their use, and their importance to employers in many areas including construction, design, marketing and distribution, retail and wholesale management, sales, production, technical services and scientific fields such as chemistry, engineering, and industrial technology. This minor in Forest Products will also provide non-major students an excellent background for entering a graduate degree program in Forest Products. Academic advising is available in the Department of Forest Products at Mississippi State University located at the Forest Products Laboratory, 100 Blackjack Road. A minimum of 18 hours is required to obtain a Forest Products minor. Some choices require others as prerequisites.

**Required Courses**

- FP 1103 Wood Technology
- FP 4013 Wood Anatomy

**Choose any four of the following:**

- FP 4113 Adhesives and Finishes for Wood
- FP 4123 Lumber Manufacturing
- FP 4143 Composite Wood Products
- FP 4213 Wood Deterioration & Preserv
- FP 4223 Furniture Production I
- FP 4233 Furniture Production II
- FP 4253 Quantitative Methods in FP & Furn
- FP 4313 Environmental Principles
- FP 4323 Physical Properties of Wood
- FP 4423 Mechanical Properties of Wood
COLLEGE of VETERINARY MEDICINE

John U. Thomson, Dean
Office: College of Veterinary Medicine (Wise Center)
Telephone: (662) 325-3432
Mailing Address: Box 9825, Mississippi State, MS 39762-9825

GENERAL INFORMATION
The College of Veterinary Medicine was established in 1974 by an act of the Mississippi Legislature. The first class was admitted during the 1977-78 academic year and graduated in May, 1981.

The permanent College facilities, completed in the fall of 1981, include the learning resources center, the animal health center, and the research facility. College programs, faculty, students, and staff are located in these facilities.

The primary objective of the College is to serve the needs of Mississippi. In quest of this objective, the College will provide training in the sciences required for a career in veterinary medicine. The professional curriculum focuses on the skills of the veterinary practitioner who will serve the animal-owning public of Mississippi.

Students seeking a career in veterinary medicine should acquire a sound foundation in the biological and physical sciences and a general knowledge of the humanities in high school and college. Because of the increasing use of information technology in Veterinary Medicine, students are strongly encouraged to acquire familiarity with computers. They must have a demonstrated aptitude for scientific study, and, in addition, experience with animals. An awareness of the requirements and characteristics of the practice of veterinary medicine is desirable in reaching a mature decision to seek a career in veterinary medicine.

EARLY ENTRY PROGRAM for the COLLEGE of VETERINARY MEDICINE

The Early Entry Program is offered on a competitive basis to high-school seniors who have demonstrated exceptional academic achievement. Applications are available by October 1st of each year and applications must be submitted by January 15th. Applications may be obtained by contacting the Office of Student Affairs, College of Veterinary Medicine at 662-325-1278 or coats@cvm.msstate.edu. A printable application is available at cvm.msstate.edu under the “Admissions” link.

The Program is designed so an individual has the opportunity to obtain both a B.S. degree and a D.V.M. degree in a seven-year period. Those accepted into the Early Entry Program are preaccepted into the professional program at the College of Veterinary Medicine contingent upon their maintaining a 3.35 quality point average with no grade lower than a C in required courses throughout their college career and providing documentation of no less than 480 hours veterinary experience.

TRADITIONAL ADMISSION REQUIREMENTS

Admission to the professional program of the College of Veterinary Medicine is limited, competitive, and selective. To qualify for admission, a candidate must have satisfactorily completed 67 prerequisite semester hours to include the core curriculum requirements of Mississippi State University. In order for scores earned from CLEP and Advanced Placement to be considered, students must meet score standards established by Mississippi State University.

NTR 4115 Nutrition**

Humans/Fine Arts/Social Sciences/Behavioral Sciences***: 15

TOTAL: 67

* All course numbers and names correspond to Mississippi State University's course catalog.

** A 0.5-hour introduction to principles of nutrition and the properties and functions of essential nutrients (caloric values, proteins, fats, minerals, vitamins, and dietary fiber) is required.

*** Course selection is subject to the University Core Curriculum meeting the stated requirements.

An applicant to the College of Veterinary Medicine may not use military science or correspondence courses to meet the stated course requirements.

An applicant must have a grade point average of 3.0 or above (based on a 4.0 scale) in all required sciences (including mathematics), and a cumulative grade point average of at least 2.8 in all undergraduate courses to apply. A grade below “C” is not acceptable in any required course.

ADMISSION PROCEDURE

Applications are accepted through October 1st each year for the upcoming academic year. Admissions procedures take place in spring, with new students beginning classes at the beginning of the first summer session. All applicants apply electronically through the Veterinary Medical College Application Service (VMCAS) at www.aavmc.org. Applications are available online in August each year.

coats@cvm.msstate.edu

Problem-based learning

The professional curriculum is divided into two phases; each 5 semesters in length.

Phase 1 (DVM1 and DVM2 years) is conducted in a Problem-based learning format. Problem-based learning is an educational strategy designed to maximize active student participation in the learning process, foster student problem solving and self-education skills, enhance student self-assessment, increase student communication skills, and improve student abilities to access and utilize information resources.

Problem-based learning involves the use of clinical problems (or cases) to create an active, student-centered learning environment. Each problem stimulates small group discussion and student research of the basic and clinical sciences relevant to that problem. Since most (if not all) problems require an interdisciplinary approach, students learn the basic and clinical sciences in an integrated fashion.

Student exploration of each problem is stimulated and monitored by faculty participation as facilitators of small group discussion sessions. In each discussion session students are presented with information about the problem (case) to be studied. The student groups go through a process of determining:

1. what the history and clinical data reveal about the case (interpreting the relevant facts),
2. what they hypothesize might be causing the problem (differential diagnosis or therapeutic plans), and
3. what additional information they need regarding the patient (diagnostic or therapeutic plans), and
4. what additional veterinary medical information they must study to understand the problem.

Students leave each discussion session with a list of learning issues which they must explore and be prepared to apply to the problem at the next discussion session. At each subsequent discussion session additional patient (problem) data is provided to the student and the process repeats.

Group discussions and independent student research (literature and textbook reading) become the core of the educational strategy. For each defined learning issue a decision is made regarding the most appropriate educational strategy. Lectures and/or laboratories are scheduled as student-planned correlates or supplements to the problem-based learning cases. Students are encouraged to contact faculty experts, if needed. The resultant student schedule is a blend of small group discussion sessions,
lectures, and laboratories with a significant increase in opportunities to explore special interests.

**Clinical and Elective**

Phase 2, (DVM3 and DVM4 years) is conducted in a clinical and elective format. Students participate in ten required clinical rotations of two to six weeks duration each. In these rotations students actively participate in the clinical diagnosis and management of patients admitted to the Animal Health Center.

During the fourth year (DVM4) students have 9 months of elective options. The options include elective clinical rotations, externship experiences, small group or discussion based courses, and special problems (directed individual study) opportunities. In essence, each student, working closely with a faculty advisor, designs a schedule which most uniquely meets the student’s needs and career preferences.

Conducted in an experiential-learning mode, the clinical rotations and many of the electives continue to make the student responsible for his or her own education. The clinical cases or elective courses provide the environment for continued student growth and development. Students must be mature and responsible learners to obtain the maximum benefit from these courses.

**ANIMAL HEALTH TECHNOLOGY (Veterinary Technology)**

**Program**

The Veterinary Technology Program is a one-plus-one program offered by the Agriculture Department of Hinds Community College and the College of Veterinary Medicine of Mississippi State University. The first year of the program is taught at Hinds Community College, and the second year is taught at Mississippi State University’s College of Veterinary Medicine. After successfully completing the program the student will be awarded an Associate of applied Science Degree from Hinds Community College. The program is structured to provide the successful graduate optimum employment opportunities in Veterinary Technology careers.

**Admission Requirements**

**Hinds Community College**

Individuals entering the first year of the Veterinary Technology Program must:
1. Meet admission requirements for Hinds Community College
2. Submit a completed application
3. Interview with members of the Veterinary Technology Program Advisory Committee

Admission is granted to individuals who successfully complete the above requirements.

**MSU—College of Veterinary Medicine**

To be accepted for the second year of the Veterinary Technology Program, a student must:
1. Complete the first year at Hinds with a minimum GPA of 2.0 and no grade less than “C-” in any technical course.
2. Be recommended by the Director of the Veterinary Technology Program at Hinds Community College.

Applications are available from Veterinary Technology Program Director, Hinds Community College, Raymond, MS 39154-6999.

GRADUATE PROGRAM

The College of Veterinary Medicine at Mississippi State University offers advanced graduate study leading to Master’s and PhD degrees with emphasis in infectious diseases, toxicology, pharmacology, and pathology. Master’s and PhD programs are administered under the Research Program of the College. The multidisciplinary composition of the Veterinary Science Program provides the unique opportunity for training in food animals with special emphasis in aquaculture and poultry. Specialized training encompassing molecular biotechnology, microbiology, immunology, virology, physiology, toxicology, pathology and biochemical approaches to solving basic and applied biomedical problems is offered. Master’s and PhD degrees are offered in Veterinary Medical Science and Ph.D. degree in Toxicology is also offered. A non thesis Master’s option in Veterinary Medical Science is also offered with emphasis in food animal production medicine, i.e. dairy, beef, swine, poultry and aquaculture.

Research interests of the faculty include pathogenesis of viral and bacterial and environmental diseases, comparative and developmental immunology, biochemical characterization of parasites, and xenobiotic contamination of animal tissues. The multidisciplinary approach of the program is strengthened by active collaboration of faculty members with other institutional units including the Departments of Animal and Dairy Sciences, Biochemistry, Poultry Science, Wildlife and Fisheries, and Biological Science. The Veterinary Medical Science Graduate Program is firmly committed to providing trained graduates who can serve as leaders in management and research for the food animal industry.

For additional information about the Graduate Program, contact the Graduate Coordinator, Box 9825, Mississippi State, Mississippi 39762, telephone 662-325-1417.
Environmental Sciences Certificate Program

Any study of the human environment is by nature multi-disciplinary. Therefore, an undergraduate certificate program in Environmental Sciences (ENS) that can also serve as an academic minor has been established to serve a large student population from a variety of disciplinary majors. The intent of this program is to provide a certification track whereby a student in any given undergraduate major may strategically select elective courses within their normal program of study to additionally satisfy the requirements for a certificate and minor in Environmental Sciences. Certification is also available for the nontraditional student seeking further professional credentials for career development.

Due to the multi-disciplinary nature of the program, it structurally resides and is administered within the Office of Academic Affairs, outside of any particular college. A program coordinator is appointed by the Provost to advise Environmental Sciences students and assist departmental advisors. It is also the coordinators responsibility to perform the necessary transcript audits and formally authorize the certificates and minors.

To assist the ENS coordinator and provide a mechanism for regular review, a faculty oversight committee has been formed. The committee is composed of at least six faculty members including the ENS advisor and represents a cross-section of environmental disciplines.

For further information and enrollment forms, please contact the ENS program coordinator:
Dr. Gary B. Ervin
Department of Biological Sciences

Environmental Sciences Certificate

General Requirements:
A total of 22 semester hours are required in the following four component areas with at least six hours from the social sciences and humanities and six hours from the natural sciences. Courses typically serve as electives within any traditional disciplinary major. No more than two courses can be double-counted between the ENS certificate and the student’s academic major. Courses marked in BOLD are required of all students. It is recommended that ENS 2102 be taken as the entry-level course.

Introductory (2 hours)
ENS 2102 Intro to Environmental Science

Social Sciences and Humanities (6-12 hours)
BL 4263 Environmental Law
SO 4173 Environment and Society
PS 4743 Environmental Policy
AEC 3233 Intro Environmental Economics and Policy
AEC 4233 Advanced Topics in Environmental Economics
GG 4923 Coastal Environments
GR 3113 Conservation of Natural Resources
SO 4703 Population Problems and Processes
FO 4413 Natural Resources Policy
FP 4313 Environmental Principles
WF 4463 Human Dimensions of Fish & Wildlife Mgt

Capstone (2 hours)
ENS 4102 Practicum (with seminar)

Natural Sciences (6-12 hours)

PSS 4333 Soil Conservation and Land Use
ABE 3303 Biosystems Environment I
ABE 4312 Biosystems Environment II

INTERDISCIPLINARY STUDIES

Bachelor of Science in Interdisciplinary Studies

The Bachelor of Science in Interdisciplinary Studies is a university-wide degree coordinated through the Office of Academic Affairs by the Interdisciplinary Studies Committee. This multi-disciplinary academic program is appropriate for students motivated by specific interests not recognized in traditional majors and is not intended to compete with existing programs. All University requirements, including 32 hours of upper division course work and a year’s residence, must be met for graduation.

The Bachelor of Science in Interdisciplinary Studies is intended to allow students maximum flexibility to custom-design a curriculum to their personal and career goals. Such a program of study must assure depth of study as well as breadth. Therefore, it must insure that students take at least 36 upper division hours in the areas they have chosen for emphasis and that they select a minimum of 12 hours in each of three areas or 18 hours in two. Emphasis areas must be selected from at least two colleges. University core curriculum requirement (45 hours) must be met in addition to a general studies core of 15 hours.

To insure coherence in the program, the student must construct and explain in writing the rationale for the interdisciplinary studies program’s direct relationship to the student’s personal and career goals. Each student will be required to find advisors in the academic disciplines who will agree to sponsor the student in drawing up the proposed curriculum, formulating the rationale, and presenting the case orally and in writing to the Interdisciplinary Studies Committee. This should be done prior to the senior year.

The student, along with at least one sponsor, must meet with the Interdisciplinary Studies Committee to submit oral arguments and answer questions concerning the proposed program. If approved, the student may proceed with the curriculum. The Committee will meet during the fall, spring and summer semesters, and students must make written application by September 15, February 15 or May 15. Application for a degree must be submitted to the Office of the Registrar. For further information, contact:

The Office of Academic Affairs
P.O. Box BQ or 608 Allen Hall Mail Stop 9723
Mississippi State University
Mississippi State, MS 39762 (662) 325-3742
ACADEMIC ADVISING CENTER

UNDECLARED (UND)

Director: Dr. David Boles
Coordinator: Wesley Ammon

Professional Academic Advisors: Jamie Inmon, Kay Nobles, Janet Odom, and Sandra Powe
Volunteer Advisors: The UAAC also utilizes the expertise of selected distinguished faculty members, staff, and MSU graduate students during peak preregistration periods to meet the needs of students served by the Center.

48 Magruder Street; Mail Stop 9729; Web site at http://www.msstate.edu/dept/academic-advising
Telephone 662-325-4052; Fax 662-325-4026; P.O. Box 6117, Mississippi State, MS 39762.

UAAC Mission to UND students

The University Academic Advising Center was established to meet the needs of those students who have competing interest in more than one major area, as well as those who are uncertain of their career and educational goals. The professional staff and volunteers at the center offer one on one advising services to traditional and nontraditional undergraduate students and provide accurate information concerning specific curriculum requirements, university policies and procedures, campus resources and various programs of study. The center is committed to assisting students with the development of educational plans consistent with their life goals, objectives and abilities. Students normally remain UND “majors” for no more than two semesters during which time advisors recommend courses that meet basic core requirements in relation to “majors of interest” for each individual student.

UAAC advisors traditionally recommend that UND students enroll in 12-18 hours each fall and spring semester with careful considerations given to courses required in each student’s majors of interest. It is the goal of the center to assist each UND student in enrolling in courses that satisfy the minimum core requirements for any major the student may later choose with respect to each department’s right to specify more stringent requirements than the University as a whole. However, ultimate responsibility for taking the UAAC staff’s advice rests with the student.

Visits to UAAC and responses to request for information through our web site are subject to staff availability and the center’s priority responsibilities during MSU’s designated preregistration and orientation periods. Otherwise, UAAC urges students to make appointments with advisors at the center to establish a plan of action. The University Academic Advising Center staff encourages all UND “majors” to utilize services offered by the Career Center, the Counseling Center, the Learning Center, Student Support Services and other support programs offered by various units at MSU.
ADMINISTRATION

The Office of Graduate Studies is the administrative unit responsible for providing graduate students with enrollment services and the management of graduate student records. The Office is responsible for processing graduate assistantship paperwork; publishing the Graduate Bulletin, the Guidelines for Preparing Dissertations and Theses, and the Graduate Assistant Handbook; coordinating the Graduate Teaching Assistant Workshop; monitoring academic performance; coordinating the Graduate Work Study/Plan of Compliance Assistantship Program; monitoring and coordinating the English as a Second Language (ESL) Program for international graduate students; and conducting degree audits of students as they complete their programs of study. The Office is guided by the academic policies established by the Graduate Council. The Director of the Office reports to the Office of the Provost and Vice President of Academic Affairs.

DEGREES

1. MASTER of ARTS
   a. The Master of Arts degree is offered in English, foreign languages, history, political science, applied anthropology, and economics.
   b. Two plans for the Master of Arts degree are offered. They are designated as Plan One and Plan Two. Plan One is offered at the option of the department. Plan One requires a minimum of thirty semester hours of graduate credits with at least twenty-four hours earned as course work and at least six hours earned as thesis. Plan Two requires a minimum of thirty semester hours of graduate-level course work.
   c. A reading knowledge of one foreign language is required of students majoring in English literature, and history (thesis option only).

2. MASTER of SCIENCE
   a. The Master of Science degree is offered in agricultural and extension education, the physical and biological sciences, the agricultural sciences, agricultural economics, architecture, business administration, computer science, specializations in education, engineering disciplines, geosciences, information systems, mathematics, mathematics (applied math), psychology, sociology, statistics, forestry, veterinary medical science, wildlife and fisheries science, forest products, and workforce education leadership.
   b. Two plans for the Master of Science degree are offered. They are designated as Plan One and Plan Two. Plan Two is offered at the option of the department. Plan One requires a minimum of thirty semester hours of graduate credits with at least twenty-four hours earned as course work and at least six hours earned as thesis. Plan Two requires a minimum of thirty semester hours of graduate-level course work.
   c. A reading knowledge of one foreign language is required in the physical and biological sciences and in veterinary medical science.

3. MASTER of AGRICULTURE
   a. The Master of Agriculture degree is offered in agricultural pest management.
   b. A minimum of thirty semester hours is required.

4. MASTER of AGRIBUSINESS MANAGEMENT
   a. The Master of Agribusiness Management is offered in Agribusiness Management.
   b. Courses are divided between the department of Agricultural Economics, architecture, business administration, computer science, specializations in education, engineering disciplines, geosciences, information systems, mathematics, mathematics (applied math), psychology, sociology, statistics, forestry, veterinary medical science, wildlife and fisheries science, forest products, and workforce education leadership.
   b. Two plans for the Master of Science degree are offered. They are designated as Plan One and Plan Two. Plan Two is offered at the option of the department. Plan One requires a minimum of thirty semester hours of graduate credits with at least twenty-four hours earned as course work and at least six hours earned as thesis. Plan Two requires a minimum of thirty semester hours of graduate-level course work.
   c. A reading knowledge of one foreign language is required in the physical and biological sciences and in veterinary medical science.

5. MASTER of PROFESSIONAL ACCOUNTANCY
   A minimum of thirty semester hours of course work in graduate credit business courses is required. Those hours must include a minimum of:
   a. Twenty-one semester hours of accounting, and
   b. Nine semester hours of other related business courses.

6. MASTER of BUSINESS ADMINISTRATION
   a. The Master of Business Administration, a graduate professional degree requiring 30 hours of graduate course work, is offered with majors in business administration and a thesis is not required.
   b. Forty-two semester hours, including a three-credit internship and internship paper, are required. The internship and internship paper may be waived for students with significant and relevant work experience as determined by the Department of Political Science.

7. MASTER of FINE ARTS
   a. The Master of Fine Arts is offered in electronic visualization with emphases in computer animation and multi-media.
   b. The degree requires a minimum of 60 graduate credits with at least six hours earned as exhibition and thesis.

8. MASTER of LANDSCAPE ARCHITECTURE
   a. The Master of Landscape Architecture is offered in landscape architecture with three areas of concentration: watershed planning and management, landscape planning and management, and community based initiatives.
   b. A minimum of 36 hours is required including a six hour thesis.

9. MASTER of TAXATION
   a. The Master of Taxation is a graduate professional degree requiring 30 hours of graduate course work.
   b. A thesis is not required.

10. EDUCATIONAL SPECIALIST DEGREE
    a. The Educational Specialist degree is offered with areas of emphasis in agricultural and extension education, school administration, elementary education, counselor education, or technology.
    b. A minimum of 36 hours is required including a six hour thesis.

11. DOCTOR of PHILOSOPHY
    a. The Doctor of Philosophy degree may be pursued in agricultural economics, agronomy, animal physiology, biological sciences, business administration, chemistry, computational engineering, computer engineering, computer science, education (emphasis in agricultural and extension education, and technology), educational psychology, electrical engineering, engineering (composite major), entomology, food science and technology, forest resources, history, horticulture, nutrition, plant pathology, sociology, veterinary medical science, weed science, mathematical sciences, molecular biology, cognitive science, environmental toxicology, applied economics, biomedical engineering, public policy and administration, and community college leadership

12. DOCTOR of EDUCATION
    a. The Doctor of Education degree is offered in the College of Education with an area of program emphasis in agricultural and extension education, elementary education, secondary education, school administration, counselor education, or technology.
    b. A minimum of 36 hours is required including a six hour thesis.

GRADUATE COURSES

Courses numbered 8000 or higher are for graduate students only. Courses numbered 6000 and 7000 may be given for graduate credit if approved by the Director of Graduate Studies.

GRADUATE BULLETIN

A Graduate Bulletin is published annually. It contains more detailed statements concerning the requirements for advanced degrees at Mississippi State University, as well as other pertinent information. To secure a copy, write to the Office of Office of Graduate Studies, P.O. Box G, Mississippi State, Mississippi 37962-5507.

The Graduate Bulletin and additional information relative to graduate studies may be accessed at www.msstate.edu/dept/grad.
THE DIVISION of CONTINUING EDUCATION

A member of the University Continuing Education Association (UCEA), Learning Resources Network (LRN), and Association for Continuing Higher Education (ACHE)

The purpose of the Division of Continuing Education is to extend the educational services of Mississippi State University to persons who have need beyond traditional educational programs.

The various programs of the Division of Continuing Education may be classified: credit and non-credit, independent study, and the American Language and Culture/English as a Second Language Program. The credit programs, graduate and undergraduate, are offered in cooperation with the various academic colleges and schools of the University. These curricula provide sound educational programs which give the participant general as well as specialized education. The non-credit category includes courses for self-enrichment, special conferences, workshops, lectures, institutes and consultant services for a variety of professional and community needs. Independent study includes credit courses at the high school and university levels offered through correspondence. All programs are planned for individuals who have varied backgrounds, different levels of maturity and limited time to further their education.

Available services include: off-campus classes, undergraduate and graduate; in-service programs; high-school and university level independent study courses; short courses, conferences and institutes; consulting services; campus offerings in cooperation with the various colleges of the University; and distance learning education opportunities.

Education, Training and Development Credit Programs

Duke West, Manager
Offices: Memorial Hall
Telephone: (662) 325-2627

Distance learning courses, programs and degrees are offered through different delivery methods including video tape, compressed video, streaming video, and Internet along with onsite instruction.

Courses are the same as those offered on the campus of Mississippi State University and are the responsibility of the regular staff of the University.

Students enrolling must meet the prescribed prerequisites of courses.

Independent Study

Susan Brown, Coordinator
Offices: Memorial Hall
Telephone: (662) 325-2627

Through its independent study program, the Division of Continuing Education makes available University courses to individuals who are interested in studying by correspondence, by video, or by the internet. Courses are the same as those offered on the campus of Mississippi State University and are the responsibility of the regular staff of the University.

Through independent study, students may earn credits toward a bachelor’s degree from Mississippi State University or another institution of higher learning. Courses may be taken for self-improvement or for certification purposes. Special courses are offered in Public Health Education. Bulletins are available upon request.

High-school courses are also available through independent study. These courses may be taken for self-improvement, to complete a high-school education, or to meet college entrance requirements.

English as a Second Language Program

Philip Bonfanti, Manager
Office: 46 Morgan Street
Telephone: (662) 325-2648 or 325-5002

The English as a Second Language Unit is an academic unit within the Division of Continuing Education. It offers an intensive English language program (non credit) for non-admitted students as well as English Language academic support courses (credit) for admitted MSU students.

In addition to English Language courses, the ESLC offers various other programs and services designed to promote the exchange of ideas and information with other countries, such as short-term group programs and the conversation partner program, developed to introduce ESL students to American college students.

The ESLC also provides teaching observations and practicums for students enrolled in the TESL Certificate program through the English Department; assists the Graduate Office in offering the international teaching assistants workshop; and is active in bringing international and cultural programming to the MSU and Starkville communities.

Education, Training and Development

Noncredit Programs

Ben Rosenkrans, Manager
Offices: Memorial Hall
Telephone: (662) 325-2658

The Department of Professional Training and Development extends the service tradition of Mississippi State University by developing and presenting programs and activities in a flexible format to meet the educational and training needs of individuals, education, business, industry, and government throughout Mississippi and the Southeast. Its mission is to deliver resources of the University to clients in our rapidly changing society. Programs for a diverse clientele are managed by the following units:

Office for Environmental and Safety:

The Office for Environmental and Safety provides training in the area of environmental issues as well as health and safety. These programs ranging from on-campus seminars and conferences in in-house training services, are made available to state and regional businesses, industries, governmental agencies, municipalities and defense facilities who must comply with various EPA, DOT and OSHA regulations.

Office for Professional Development:

The Office for Professional Development specializes in providing education and training programs in professional environments where business men and women can master management and technical skills. These training programs provide convenient scheduling and direct skills practice along with expert guidance from university faculty or practicing executives and consultants. This office also contracts with school districts and other agencies in the state to provide in-service training to meet agency needs. The activities may be multi-disciplinary in nature.

Office for Personal Enrichment

The Office for Personal Enrichment offers individuals opportunities to participate in leisure classes that may improve quality of life or fulfill a need in career or personal development. An array of personal enrichment, non-credit courses and seminars are designed and planned to serve the needs of individuals in the community and throughout the state.

Office for Conference Coordination

The Office for Conference Coordination offers professional services for planning and conducting conferences of local, state, regional, and national professional organizations and societies as well as government agencies and university units. All aspects of the conference can be handled from initial planning, brochure development, mailings, online registration, publishing proceedings, onsite registration and close-out accounting.

Continuing Education Units

The Division coordinates the Continuing Education (CEU) program for Mississippi State University, maintaining essential materials, data and mechanisms for CEU approval, record keeping and evaluation and CEU registration.

The CEU is a nationally recognized unit of measure used to accumulate a standardized, permanent record of an individual’s participation in credit-free, continuing education programs conducted under responsible sponsorship, capable direction, and qualified instruction. One CEU is awarded per every ten contact hours of classroom instruction.

Continuing Education Conference Center

Julie Joiner, Resource and Conference Facilitator
Office: Memorial Hall
Telephone: (662) 325-2634

The Continuing Education Conference Center provides a professional environment for meetings and for conferences of local, state, regional, and national professional organizations and societies as well as government agencies and University units. The center has a modern auditorium, well-equipped meeting rooms, satellite and teleconferencing capabilities, and outdoor patio with fountains and reserved parking.
Mississippi State University-Meridian Campus is a regional, upper-division, degree-granting campus of Mississippi State University. Located in east-central Mississippi, the Meridian campus is non-residential and provides site-based, face-to-face course work, as well as classes through distance learning using resident faculty, MSU-Starkville campus faculty, and part-time adjunct instructors.

A friendly atmosphere, personal attention, a convenient location, and a diverse student population flavor the educational experience at MSU-Meridian. Through the flexibility of day and evening classes at the MSU-Meridian Campus, both nontraditional adult students and traditional college-age students are able to continue employment, maintain important roles in family life, contribute to their communities, and still obtain a quality Mississippi State University education.

Mississippi State-Meridian serves as a proud symbol of the university’s heritage as “the people’s university” and to its commitment of providing quality higher education through the missions of learning, research, and service.

**Location**

Mississippi State University-Meridian is located on a 26-acre campus at 1000 Highway 19 North in Meridian, Miss. It is easily accessible to residents of east Mississippi and west Alabama by a short drive northwest of Exit 150, off Interstate 20/59 in Meridian.

**Facilities**

Overlooking a beautiful lake, the 60,000 square-foot, two-story complex is nestled among hardwoods and loblolly pines. A 90-foot tower stands watch over the main entrance and serves as the focal point and official symbol of the Meridian Campus. The complex contains 23 classrooms and laboratories, a bookstore, academic suites, study lounges, an 800-person multi-purpose auditorium for campus and community use, and ample parking. Since it is a commuter campus which primarily serves nontraditional working students, no dormitory facilities are available on campus. Apartments are located nearby at Meridian Community College or may be found in other Meridian locations.

**Students**

Approximately one-half of the students who attend MSU-Meridian reside in Lauderdale County. The remainder commute from 34 other Mississippi counties and from Alabama, with a majority making their homes in the surrounding counties of Clarke, Jasper, Jones, Kemper, Leake, Neshoba, Newton, Scott, and Wayne. Advancements in course offerings, programs, and distance learning technology are expected to expand even further the scope of service.

**Distance Learning**

Two interactive “teleclassrooms” allow students on the Meridian and Starkville campuses, and at downlink sites elsewhere in the state, to receive instruction and interact through two-way video and audio distance technologies. This greatly improves MSU-Meridian’s ability to expand the scope of its service and still maintain courses of the highest quality.

The development of web-based (direct-to-desktop) delivery systems is also being utilized to facilitate the delivery of asynchronous and synchronous real-time audio and video through computer-based technologies and the Internet.

**Library Facilities**

Meridian Campus students are authorized to use the Mitchell Memorial Library in person, or may access it and other university resources through the MSU web site.

MSU-Meridian Campus and Meridian Community College have a partnership whereby MSU-Meridian students may access the holdings in the L.O. Todd Library. The book collection contains 56,000 titles. The library also subscribes to over 600 periodical titles, including scholarly journals, magazines, and newspapers. Interlibrary loan services are provided for students and faculty.

Through an “Electronic Library Room” on the MSU-Meridian Campus, students may access many references and databases directly via computer.

**Degree Programs**

Junior, senior, and graduate-level courses offered at Mississippi State-Meridian Campus enable students to fulfill requirements for bachelor’s, master’s, specialist’s, and doctoral degrees. They may also elect to enroll in specific classes for professional or personal growth.

**Undergraduate**

- Division of Arts and Sciences
  - Bachelor of Arts in General Liberal Arts
  - Bachelor of Arts in Psychology
  - Bachelor of Science in Interdisciplinary Studies
  - Bachelor of Social Work
  - Bachelor of Arts in Criminal Justice (conferred by USM through cooperative program)

- Division of Business & Industry
  - Bachelor of Business Administration
    - Accounting
    - Business Administration
    - Information Systems
    - Management
    - Marketing

- Division of Education
  - Bachelor of Science
    - Elementary Education
    - Secondary Education, English
    - Secondary Education, Mathematics
    - Secondary Education, Social Studies

- USM-Meridian College of Nursing
  - Bachelor of Science in Nursing

**Graduate:**

- Division of Business and Industry
  - Master of Business Administration

- Division of Education
  - Master of Science
    - Elementary Education
    - Secondary Education, English
    - Secondary Education, Mathematics
    - Secondary Education, Social Studies
    - Counselor Education, Community Counseling
    - Counselor Education, School Counseling
    - Educational Leadership
    - Educational Specialist
      - Elementary Education
      - Secondary Education, English
      - Secondary Education, Social Studies
      - Counselor Education, Community Counseling
      - Counselor Education, School Counseling
      - Educational Leadership

- Engineering - Off-campus Graduate Program (distance learning)
  - Master of Science or Doctor of Philosophy
    - Chemical Engineering
    - Civil Engineering
    - Electrical Engineering/Computer Engineering
    - Industrial Engineering
    - Mechanical Engineering
    - Computer Science

**USM-Meridian College of Nursing**

- Master of Science in Nursing

**DIVISION of ARTS and SCIENCES**

Sandra Vaughn, Interim Chair

- Associate Professor Sandra S. Vaughn, Director of Social Work
- Assistant Professor & BSW Advisor Rhonda R. Goodman Carr
- Assistant Professor Marian Swindell
- Assistant Professor David Sicko
- Visiting Assistant Professor Karen Tatum
The Division of Arts and Sciences offers three degree programs, the B.A. in General Liberal Arts (GLA), the Bachelor of Social Work (BSW), and the degree in Interdisciplinary Studies. Students can also earn certification in criminal justice/corrections. The program requirements for these degrees are the same as listed elsewhere in this General Bulletin. In addition, the Division of Arts and Sciences offers many courses each semester from other departments in the College, such as Art, English, History, Political Science, Psychology, Mathematics, Sociology, etc.

**SOCIAL WORK PROGRAM**

**Associate Professor & Program Director Ms. Sandra Vaughn**

**Assistant Professor & Coordinator of Field Education Ms. Rhonda R. Goodman Carr**

**Assistant Professor Marian Swindell**

The Social Work Program at Mississippi State University-Meridian Campus was granted initial accreditation by the Council on Social Work Education in February 2001. The Bachelor of Social Work (BSW) degree is recognized by the profession of social work as the first practice degree. The BSW graduate is prepared to work as a generalist social work practitioner in a variety of practice settings such as child welfare service agencies, nursing homes, medical hospitals, mental health hospitals/clinics, public health clinics, industries, juvenile and family courts, shelters for battered women and children, neighborhood and community services.

The social work program integrates a liberal arts perspective into the social work curriculum. This liberal arts perspective enhances the person-in-environment focus of generalist social work practice. The social work program accepts course credit through transfer (up to 66 hours) from other accredited universities and colleges. The applicant must complete the sixty (60) semester hours of specified university/college work before applying for admission to Mississippi State University-Meridian Campus Social Work Program. The Program Director reviews all course credit transfer hours.

Although students may enroll in social work as a major, there is a formal admission process into the social work program. The criteria for admission into the program include:

1. Cumulative GPA of 2.0
2. The following liberal arts requirements must be completed:
   - English Composition I and II
   - College Algebra
   - Introduction to Sociology
   - American Government
   - General Psychology
   - Anatomy & Physiology
   - Principles of Economics
   - Fund. of Public Speech
   - Basic Computer Concepts & Applications
   - Cultural and Racial Minorities
3. Completion of the following social work courses with a minimum grade of “B”
   - SW 2313 Introduction to Social Work (including twenty (20) hours of volunteer experience)
   - SW 2303 Social Welfare Policy I
   - SW 3013 Human Behavior in the Social Environment I
4. Completion of “Application for Admission to the Social Work Program”
5. Provision of three reference letters on provided forms
6. Complete a personal interview with social work admissions committee
7. Admission to the Social Work Program before enrolling in further social work courses.

The criteria for remaining in the program include:

1. Maintain an overall GPA of 2.0 with a 3.0 GPA for social work courses
2. Earning a minimum of a “B” in each social work course before proceeding to social work courses at the next level
3. Continue to demonstrate an aptitude for a social work career
4. Adhere to all academic expectations of the university and the social work program
5. Adhere to the National Association of Social Workers Code of Ethics
6. Completion of all course work and Social Work courses before enrolling in Field Practice

**Social Work Degree (BSW)**

**Required Curriculum**

The required curriculum for social work is sequenced and must be completed as scheduled below. Academic credit for life experience and previous work experience will not be given, in whole or in part, in lieu of the fields practicum or of the courses in the professional foundation areas, specifically, Social Work Practice I, II, and III. With declaration of the Social Work major, all students are assigned a Social Work faculty advisor. The following program of study should begin with the student’s junior standing.

**DIVISION of EDUCATION**
Judith H. Miller, Interim Chair
Professors Gary J. Benton and George Thomas
Associate Professor Laura Bryan
Assistant Professors Scott Glass;
Linda Walker; Julia Porter; and Romily Enoch
Instructor Monica Riley

The Division of Education offers degree programs in areas previously listed. Education programs offered at the Meridian Campus parallel those offered through the College of Education. Specific degree program requirements may be obtained by referencing the College of Education section in this Bulletin.

Degree requirements not listed in this section may be found by referencing the corresponding degree program located within this general bulletin.
RESERVE OFFICERS’ TRAINING CORPS

Lieutenant Colonel W. Logan Hickman, Jr.
Professor of Military Science
Office: 1st Floor, Middleton Hall
Telephone: (662) 325-3503
www.msstate.edu/dept/militaryscience/info
Mailing Address: P.O. Box 5447, Mississippi State, MS 39762

Colonel Marlon W. Yankee
Professor of Aerospace Studies
Office: 2nd Floor, Middleton Hall
Telephone: (662) 325-3810
Mailing Address: P.O. Drawer AF, Mississippi State MS 39762

The Reserve Officers’ Training Corps is under the administrative and academic supervision of the College of Arts and Sciences. Army ROTC (Military Science) courses are indicated by the prefix MS; Air Force ROTC (Aerospace Studies) courses are indicated by the prefix AS. All ROTC courses are bona fide University courses. The total number of ROTC hours allowed as elective credit toward a specific degree varies. Most schools and colleges at the University accept six (6) or more hours of ROTC courses offered toward degrees conferred. The advanced ROTC courses are options for meeting social/behavioral science core requirements. A student should contact the appropriate college, school, or department to determine allowable ROTC course credit toward a particular degree.

PURPOSES and OBJECTIVES

The general objective of the Reserve Officers’ Training Corps is to develop a body of cadets with a basic understanding of associated professional knowledge necessary to be an officer in the US Armed Forces; (2) a strong sense of personal integrity, individual responsibility and honor; and, (3) an appreciation of the requirements of national security.

The Army ROTC Basic Course is designed to give the first and second year ROTC student an introduction to the Army and its career opportunities without incurring any obligation on the part of the student. The Advanced Course (third and fourth years) stresses the military skills and knowledge, and interpersonal skills required of commissioned officers of the Active Army, Army Reserve, or Army National Guard.

The Air Force ROTC General Military Course (GMC) is a two-year course normally taken during the freshman and sophomore years. The course covers two main themes - the development of air power and the contemporary Air Force in the context of military organization. A student can enroll in the GMC without military obligation (unless on an AFROTC Scholarship). The Professional Officer course (POC) is a two-year course of instruction, normally taken during the junior and senior years. The curriculum covers Air Force leadership and management and American Defense Policy. A minor in Aerospace Studies is available to students completing the specified requirements in Air Force ROTC.

Army Program

Army Program. The Basic and Advanced Courses consist of 4 semesters each as shown below. See the “Description of Courses” section of this catalogue for further information.

Professional Military Education (PME). In addition to the above, each cadet must complete one university-approved course in each of the following subject areas: Written Communication Skills, Human Behavior, Military History, Computer Literacy, and Math Reasoning. The PME requirement is normally achieved by the cadet as part of a normal course of study. Students should coordinate with a Military Science instructor to determine a course of action to complete the PME requirement.

Requirements for commissioning as a Second Lieutenant in the United States Army include thirty-two days at Advanced Camp (normally between the junior and senior years), completion of the Advanced Course, satisfactory academic progress, and the recommendation of the Professor of Military Science (PMS).

ENTRANCE REQUIREMENTS

Basic Course. The Army Basic Course is an elective course requiring only that the individual be a full time student and a legal U.S. citizen. ROTC credit hours earned at other universities are transferable.

Advanced Course. Entrance into the Advanced Course is on a selective and competitive basis. The primary requirements for entry into the advanced program are satisfactory completion of the basic course or equivalent, good academic standing, demonstrated leadership ability, an approved physical examination and completion of 54 semester hours of college credit.

Two-Year Program. Equivalent credit for the basic course may be obtained by students with 54 semester hours of college credit or more for direct enrollment in the advanced course, based on any one of the following.

(a) Satisfactory completion of the five weeks Basic Summer Camp. This basic summer camp is primarily intended for students who could not obtain the basic ROTC course during the freshman and sophomore years.

(b) At least 180 days of honorable service or active duty for training with the U.S. Armed Forces or Coast Guard.

(c) Substitute credit, which in varying amounts may be derived from attendance at service academies, junior ROTC courses, and National Defense Cadet Corps training.

(d) Successful completion of Basic Combat Training with the Army Reserve or the National Guard.

Interested students should consult the PMS during their first sophomore semester but not later than their junior year. Graduate students should apply prior to starting graduate work.

Simultaneous Membership program (SMP). Students who are members of a National Guard or Army Reserve unit may qualify for direct entry into the Army ROTC Advanced Course. Consult the PMS for additional information concerning the financial benefits of this program.

Summer Camps

MS 2256 Introductory Leadership Course

The Army Leader’s Training Course can be used by students desiring to enter the Advanced Course who are not eligible for advanced placement under any other process (e.g., Basic Course, veteran, four years of junior ROTC, completion of Basic Training, etc). The course is five weeks long and incurs no military obligation for attendance. The course is a substitute for the two-year Basic Course. Students attending may compete for Army scholarships.

MS 3376 Advanced Leadership Course

The five-week Army Advanced Camp is required of all students enrolled in the Advanced Course and is normally attended between the junior and senior year.

Uniforms and Equipment

Uniforms and textbooks are issued without cost to students. However, all equipment and textbooks must be returned to the ROTC Department upon departure of the student, and any such article lost or damaged other than by fair wear and tear, must be paid for by the student. Each student enrolled in ROTC is responsible for the maintenance of his/her uniform. Students who fail to clear their accounts before leaving the institution will have their academic records withheld.
Pay and Allowances

At School. Each student enrolled in the Army Advanced Course is paid a monthly subsistence allowance by the Federal Government of $200.00 per month.

At Camp. While at the Army Basic Camp, the student receives pay at the rate of the first enlisted grade with less than four months service (approximately $726.00 per month). Students attending Army Advanced Camp receive pay equal to one-half the pay of a second lieutenant with less than two years service (approximately $752.00 per month)

Army ROTC Scholarship Program

The Army awards ROTC scholarships to outstanding students each academic year. Army ROTC scholarships are for periods of either two, three, or four years. They pay tuition, fees, books, and laboratory expenses incurred by the cadet and provide up to $400.00 per month subsistence allowance to the cadet for the duration of the scholarship (except during the summer). Additionally, 4YR Scholarship Winners and 3YR Designees that attend MSU may receive (CASH AWARDS) for room and board. The amount of the award depends on the number of scholarship winners and designees that attend MSU. All contracted cadets can compete for a scholarship. Both men and women are eligible to apply for these scholarships.

High-school students should consult their guidance counselors early in September or October of their senior year to apply for the four year scholarship. College sophomores with a 2.5 GPA & greater who otherwise qualify may be eligible for a 2 year scholarship.

Obligations

Accepting a commission as a 2nd Lieutenant in the U.S. Army incurs a service obligation of 8 years. This period may be served in a variety of ways to include:

Active Duty, Reserves, National Guard, Individual Ready Reserve or a combination of these.

AIR FORCE PROGRAM

Air Force Course Program. The General Military Course (GMC) and the Professional Officer Course (POC) consist of four semesters as shown below. See the “Description of Courses” section of this catalog for further information. Each course has a mandatory laboratory.

Total: 12

Requirements for commissioning as a USAF Second Lieutenant include completion of a degree according to the university’s rules and regulations, completion of the Professional Officer Course, completion of AFROTC Field Training (normally during the summer between the sophomore and junior years), and approval of the Professor of Aerospace Studies. Officer candidates must be between 18 and 31 years of age for commissioning.

Entrance Requirements

GMC: To enter the GMC, a student must be full-time, be a U.S. citizen, be in good physical condition, and be of good moral character.

POC: In addition to the GMC requirements, POC cadets must have passed the AFROTC Physical Fitness Test and the Air Force Officer Qualifying Test. They must be interviewed, selected by a board of USAF Officers, and have completed a four - or five-week field training encampment.

While Aerospace Studies courses are designed to prepare eligible students for commissioning as Second Lieutenants in the USAF, the AS academic courses are open to all interested students, even those who do not meet GMC or POC entry requirements. There is no armed forces service obligation for joining the GMC. AFROTC detachment personnel will explain any commitments associated with POC entry to AFROTC scholarships.

Field Training: AFROTC cadets who have completed the GMC course work and meet other requirements for POC entry will normally attend the four-week USAF field training encampment between their sophomore and junior years. There are five-week encampments for students seeking POC entry who have not previously completed GMC requirements. Cadets report individually to selected Air Force bases. Field Training is a mentally and physically demanding period of concentrated USAF training.

Uniforms and Equipment: AFROTC issues uniforms and textbooks without cost to students. However, all equipment and textbooks remain property of AFROTC and must be returned before departure. Each student is responsible for the maintenance of his/her uniform.

Pay and Allowances: Each student enrolled in the POC is paid a monthly subsistence allowance of at least $350 while enrolled in the POC (maximum of 600 days). While at Field Training, students are paid at a rate of approximately $20 per day.

IN-COLLEGE SCHOLARSHIP PROGRAM

Full-time students are eligible to apply for Air Force ROTC three-or two-year scholarships. The majority of scholarships pay full college tuition, laboratory and incidental fees, book costs, plus at least $250 per month depending on academic year. Applicants are selected on the basis of college grade point average, Air Force Officer Qualifying Test scores, and a recommendation from the Professor of Aerospace Studies. Final selection is made by a Central AFROTC selection board which considers qualified applicants nationwide. There is no maximum number of scholarships for any one school. Students who are not presently taking AFROTC courses may still apply for the in-college scholarships.

Inquiries about AFROTC scholarships may be made directly to the Admissions Officer, AFROTC Detachment 425, DRAWER AF, Mississippi State, MS 39762.

Active Duty Obligations: Individuals who complete the AFROTC program and are commissioned a Second Lieutenant incur an active duty service commitment of four years.

ROTC EXTRACURRICULAR ACTIVITIES

Cadet Military Societies. Chapters of the Scabbard and Blade (Army and Air Force), Arnold Air Society (Air Force), and the Society of American Military Engineers (Army and Air Force) are chartered by appropriate national organizations. Selected Basic cadets with scholarships and Advanced cadets are eligible for membership in the Scabbard and Blade, and the Arnold Air Society, while the Society of American Military Engineers is open to all ROTC cadets and engineering students.

Drill Teams. The Blue Knights is a precision military drill team, composed of selected cadets from Air Force ROTC. The drill team participates in university and community events, as well as in state-wide competitions.

Lee’s Rangers. The Army ROTC Lee’s Rangers is made up of selected volunteers from the Army. This unit participates in extra training in small unit tactics and leadership under simulated combat conditions. Emphasis is placed on maintaining a high level of physical conditioning and developing self-confidence. Participants must be enrolled in Army ROTC. The Lee Ranger Company sponsors the ranger challenge team.

Army “Blades”. The “Blades” were established in March 1969 to formalize the women’s auxiliary of the Army ROTC Cadet Corps. These outstanding coeds serve the University and Cadet Corps as hostesses at social functions and in other ways to promote citizenship and interest in the Army ROTC program. They also undertake various service projects.

Silver Wings. Silver Wings is a nationwide honorary organization of college students dedicated to the interests of the United States Air Force and Air Force ROTC. Silver Wings evolved from the previously all-female auxiliary of the cadet corps, Angel Flight. Silver Wings exists to further the cause of the United States Air Force by promoting the interest of college men and women in the Air Force ROTC program. Members of Silver Wings are considered associated members of Arnold Air Society. Participation in worthwhile projects such as the Red Cross blood drives and orphanage parties, as well as hosting at Air Force ROTC functions makes these students an outstanding asset to the campus.

Bulldog Battery. The Army ROTC’s Bulldog Battery exists to support military ceremonies and athletic events.

Color Guard. Both the Air Force and Army Programs have Color Guards. The cadets present the Colors at home football and SEC home basketball games. They also participate in various community events.

### COURSE DESCRIPTIONS in ALPHABETICAL ORDER by COURSE SYMBOL

#### Department of AGRICULTURAL and BIOLOGICAL ENGINEERING

**Office:** 100 Agricultural and Biological Engineering Center

**Professors** Gilbert (Head), Cathcart, Pote, and Smith; Associate Professors To and Thommason; Assistant Professor Elder

---

#### Biological Engineering

**ABE 1911.** Engineering in the Life Sciences. (1) (Open to freshmen and sophomores or first-semester transfer students only). One hour lecture. Introduction to agricultural and biological engineering; survey of the engineering profession; elementary analysis of biological systems; problems with emphasis on experimental design, sampling distribution, hours laboratory. The application of biostatistics to real experimental problems in the design of biological systems. The student develops a course or a sequence of numbers for a seminar in a particular field may be listed with a hyphen (-) between the two four digit numbers: example, PSS 4711-4731. Students enrolled for graduate credit will be required to complete assignments above and beyond those students enrolled for undergraduate credit.

Where the same course is offered on both undergraduate and graduate levels, two numbers are used to designate the two levels of credit, two lecture. Introduction to agricultural and biological engineering; survey of the engineering profession; elementary analysis of biological systems; problems with emphasis on experimental design, sampling distribution, hours laboratory. The application of biostatistics to real experimental problems in the design of biological systems. The student develops a course or a sequence of numbers for a seminar in a particular field may be listed with a hyphen (-) between the two four digit numbers: example, HI 4703/6703. England to 1485.

---

#### System of Course Numbers

All course numbers consist of four digits, of which the first (left) digit indicates the level of preparation required and the fourth (right) digit indicates the number of semester hours. The two middle digits are reserved for the departments to distinguish one course from another. A fourth digit of zero (0) means that credit is variable to be fixed in consultation with the professor: example, ACC 4000, Directed Individual Study.

Courses that are in close sequence, such as two semesters of a survey course or a sequence of numbers for a seminar in a particular field may be listed with a hyphen (-) between the two four digit numbers: example, PH 2213). Two hours lecture. Two hours laboratory. Physical properties of biological products and materials. Primary emphasis on measurement and evaluation of dimensional, mechanical, rheological, transport, thermal, electrical, and optical properties.

**ABE 3303.** Transport in Biological Environment. (3) (Prerequisites: PH 2233 and CS 1213 or equivalent). Three hours lecture. Principles of steady state and unsteady state energy and mass transfer as applied to biological systems.

**ABE 3413.** Bioinstrumentation I. (3) (Prerequisites: ABE 3813). Two hours lecture. Two hours laboratory. Applied circuit analysis, electronics and transducers, stress and strain, temperature measurements, human physiology, digital and programmable instrumentation.

**ABE 3813.** Biophysical Properties of Materials. (3) (Prerequisites: PH 2213). Two hours lecture. Two hours laboratory. Physical properties of biological products and materials. Primary emphasis on measurement and evaluation of dimensional, mechanical, rheological, transport, thermal, electrical, and optical properties.

**ABE 4000.** Directed Individual Study. Hours and credits to be arranged.

**ABE 4111/6111.** Biological Engineering Principles Laboratory. (1) (Corequisite: ABE 4812). Three hours laboratory. The theory and practice of applying engineering principles and approaches for solving problems in the design of biological systems. The student develops a design for a project in biological engineering.

**ABE 4122/6122.** Biological Engineering Practices Laboratory. (2) (Corequisite: ABE 4821/6821). Six hours laboratory. The student constructs, tests, and evaluates a biological engineering design.

**ABE 4313.** Biological Treatment of Nonpoint Source Pollutants. (3) Three hours lecture. Fundamental principles and design of biologically based treatment systems used to remove pollutants and protect receiving waters from agricultural and urban/suburban storm water runoff.

**ABE 4323.** Physiological Systems in Biomedical Engineering. (3) Three hours lecture. (Prerequisites: BIO 1504 or equivalent; EM 3313 or equivalent; ABE 3813; ABE 4803 or equivalent). Mathematical description and modeling of the behavior of physiological systems significant to biomedical engineers.

**ABE 4413/6413.** Biological Control Systems. (3) (Prerequisites: ABE 4312, MA 3253). Two hours lecture. Two hours laboratory. Dynamics, response and mathematical modeling of biological systems (organismic and ecosystems). Control applications using operational transfer functions and transient and frequency response characteristics.

**ABE 4423/6423.** Bioinstrumentation II. (3) (Prerequisites: ABE 4313 or graduate standing). Two hours lecture. Two hours laboratory. Theory; application of automated measuring and control systems in biological sciences. Includes design/use of transducer interfaces; electronic signal conditioning; data logging; microprocessor based systems.

**ABE 4483/6483.** Introduction to Remote Sensing Technologies. (3) (Prerequisites: Senior or graduate standing; or consent of instructors). Three hours lecture. Electromagnetic interactions, passive sensors, multispectral and hyperspectral optical sensors, active sensors, imaging radar, SAR, Lidar, digital image processing, natural resource applications. (Same as ECE 4423/6423 and PSS 4483/6483).

**ABE 4513/6513.** Dynamics of Aging. (3) (Prerequisites: BIO 1125). A broad based systematic, quantitatively oriented introduction to the dynamics of aging. Systems physiology of aging in relation to biomedical engineering.

**ABE 4523/6523.** Biomedical Materials. (3) (Prerequisites: One of the following: ABE 3813, or CHE 3413, or ME 3403). Three hours lecture. Emphasis is on applications, composition, testing, and biocompatibility of biomedical materials used in implant devices. This course may be used for honors credit.

**ABE 4533/6533.** Rehabilitation Engineering (3) (Prerequisites: Senior standing in College of Engineering). Three hours lecture. An introduction to rehabilitation engineering emphasizing applications of technology in prosthetics; orthotics, mobility, and sensory augmentation. This course may be used for honors credit.

**ABE 4613/6613.** Biomechanics. (3) (Prerequisites: EM 2413 and EM 2433). Three hours lecture. Force, motion, and deformation analysis of organisms and biological structures. Mechanical modeling techniques unique to biological materials.

**ABE 4624/6624.** Experimental Methods in Materials Research. (4) (Prerequisites: CHE 3413 or ABE 3813). Three hours lecture. Three hours laboratory. Introduction to research methodologies commonly used in the evaluation of materials. Emphasis is on electron microscopy/spectroscopy techniques, surface analyses and treatments, and mechanical testing. (Same as CHE 4624/6624).

**ABE 4803/6803.** Biosystems Simulation. (3) Three hours lecture. Spring semester. Application of engineering analysis, modeling and simulation to biological systems.
ABE 4812/6812. Principles of Engineering Design. (2) (Prerequisite: senior standing in engineering). Two hours lecture. Emphasizing the use of mathematics, mechanics, and systems analysis in the design of engineering systems in agricultural, biomedical, food processing and forestry areas.

ABE 4911. Engineering Seminar. (1) (Prerequisite: Consent of instructor). One hour lecture. Discussion of current engineering developments and their relation to agriculture and the life sciences.

ABE 4990/6990. Special Topics in Agricultural and Biological Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

ABE 7000. Directed Individual Study. Hours and credits to be arranged.

ABE 8000. Thesis Research/Thesis. Hours and credits to be arranged.

ABE 8213. Soil and Water Conservation Engineering. (3) (Prerequisite: ABE 4121/6121). Two hours lecture. Two hours laboratory. A study of the theories required for the design of water control systems for erosion, flood, drainage, and irrigation.

ABE 8314. Corrosion of Biomedical Implants. (4) (Prerequisite: Graduate Standing). Three hours lecture & three hours laboratory. Basic concepts of electronics, especially related to corrosion. Development of corrosion mechanisms and evaluation of corrosion susceptibility of implant metals/alloys in dentistry and orthopaedics.

ABE 8324. Failure Analysis of Metallic Medical Implants. (4) (Prerequisites: a course in materials science, knowledge of scanning microscopy, and consent of instructor). Two hours lecture. Six hours laboratory. Instrumentation and failure mechanisms with emphasis on relationship of metallurgical, mechanical, and biological conditions will be presented for failed implanted metallic devices.

ABE 8501-8531. Journal Reviews in Biomedical Engineering. (1) One hour lecture. Current journal articles relevant to Biomedical Engineering topics are read and reviewed.

ABE 8801. Clinical Experience for Biomedical Engineering. (1) (Prerequisites: Graduate standing in the Biomedical Program and permission of the instructor). Three hours experiential learning. This course will provide graduate students with exposure, understanding and insight into the clinical environment and/or treatment modalities of clinical (human and/or animal) patients.

ABE 8813. Similitude in Research. (3) (Prerequisites: MA 3253, or consent of instructor). Two hours lecture. Two hours laboratory. Theory of similitude and its use in planning, conducting, and analyzing physical experiments and models in engineering and biological sciences.

ABE 8911-8931. Agricultural and Biological Engineering Seminar. (1) Discussion of research needs, review of literature, and development of research work plans.

ABE 8951. Special Topics in Agricultural and Biological Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

ABE 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

Agricultural Engineering Technology and Business

ABE 1062. Shop Procedures. (2) Four hours laboratory. Fundamentals of agricultural shop tools, equipment and materials; metal working and welding practices and processes; and manufacturing processes.

ABE 1073. Agricultural Mechanics. (3) One hour lecture. Four hours laboratory. Developing skills in hot and cold metal work; welding, carpentry, painting and finishing wood, concrete and concrete masonry; and basic electrical wiring.

ABE 1863. Engineering Technology in Agriculture. (3) Three hours lecture. Introductory course emphasizing use of fundamentals for solving problems related to soil and water management, electrical power and control, agricultural machinery, and environmental control.

ABE 2063. Introduction to Agricultural Engineering Technology. (3) (Prerequisite: MA 1313, or corequisite: MA 1323). Open to freshmen or first-semester transfer students only). Three hours lecture. Curricula and career objectives. Quantitative and analytical assessment of the physical system in agriculture and natural resources.

ABE 2173. Internal Combustion Engine Technology. (3) Two hours lecture. Three hours laboratory. Principles of operation of gasoline, diesel and LP gas engines; engine types; ignition, fuel, valve, and cooling systems; transmission; power train; power measurement; and tune-up.

ABE 2263. Agricultural Surveying and Drainage. (3) Two hours lecture. Three hours laboratory. Basic surveying measurements and equipment use. Surveys for drainage and erosion control measures, principles of water control for soil conservation and drainage.

ABE 2873. Land Surveying. (3) (Prerequisite: MA 1323 or equivalent). Two hours lecture. Four hours laboratory. Basic theory and hands-on application of global positioning system (GPS) technology/hardware, and geographic information systems (GIS) software, for precise positioning in agriculture and engineering.

ABE 3513. The Global Positioning System and Geographic Information Systems in Agriculture and Engineering. (3) (Prerequisite: MA 3135 and MA 1323, or equivalent). Three hours laboratory. Three hours laboratory. Basic principles of operation and management of agricultural, landscape, and turf power machinery; selection of machinery based on power requirements, economy, and suitability for agriculture.

ABE 4163/6163. Machinery Management for Agro-Ecosystems. (3) (Prerequisites: ABE 1863 or equivalent). Two hours lecture. Two hours laboratory. Basic principles of operation and management of agricultural, landscape, and turf power machinery; selection of machinery based on power requirements, economy, and suitability for Agro-Ecosystems.

ABE 4263/6263. Soil and Water Management. (3) (Prerequisite: ABE 2873. Students with credit in ABE 2263 will not receive credit in this course). Two hours lecture. Three hours laboratory. Introduction to soil and water management principles; elementary hydrology, basic fundamentals of erosion control, surface and subsurface drainage, and water control for irrigation.

ABE 4373/6373. Agricultural Structures. (3) (Prerequisite: EG 1143). Two hours lecture. Three hours laboratory. Environmental and structural requirements for animal housing and agricultural product storage.

ABE 4383/6383. Building Construction. (3) (Prerequisites: EG 1143, junior standing). Three hours lecture. An introduction to building terms, construction materials, structural components, construction methods, and mechanical systems pertaining to residential and commercial structures.

ABE 4453/6453. Cotton Ginning Systems and Management. (3) Three hours lecture. An in-depth exposure to the modern cotton ginning industry, including the basics of the operation of a cotton gin and management of the ginning process.

ABE 4473/6473. Electrical Applications. (3) Two hours lecture. Two hours laboratory. Fundamental electricity, wiring, and control of agricultural operations. Includes use of computer tools, instruments, safety, and hardware.

ABE 4483/6483. Introduction to Remote Sensing Technologies. (3) (Prerequisites: Senior or graduate standing, or consent of instructor). Three hours lecture. Electromagnetic interactions, passive sensors, multispectral and hyperspectral optical sensors, active sensors, imaging radar, SAR Lidar, digital image processing, natural resource applications. (Same as ECE 4423/6423 and PSS 4483/6483).

ABE 4863/6863. Seed Conditioning Machinery. (3) Two hours lecture. Two hours laboratory. Introduction to the methods of cleaning and separating seeds. Principles of operation of the various machines used for cleaning, separating, handling, drying, and packaging seeds. (Same as PSS 4233/6233).

ABE 4961. Seminar. (1) (Prerequisite: Consent of instructor). One hour lecture. Review of current literature dealing with the technical problems in the agricultural industry.

ABE 8863. Seed Processing Plant Design and Management. (3) (Prerequisite: ABE 4863/6863). Two hours lecture. Two hours laboratory. Design of seed processing facilities for efficient operation, network flow analysis, and management with emphasis on cost of processing, inventory, quality control and case studies.
SCHOOL of ACCOUNTANCY
Office: 381 McCool Hall
Professors Hollingsworth (Director), Daughtrey, McNair and Milam;
Associate Professors Addy, Herring, and Riggsby;
Assistant Professors Boone, Lehman, and Stammerjohan.

ACC 1203. Basic Industrial Accounting. (3) Three hours lecture. Emphasis on the fundamentals of financial and cost accounting essential for interpreting accounting reports. Designed primarily for engineering students. (Not open to students who have had 3 semester hours in accounting or who are accounting or business majors.)

ACC 2083. Honors: Accounting Principles I. (3) (Prerequisite: Open through invitation only). Honors section of ACC 2013.

ACC 2093. Honors: Accounting Principles II. (3) (Prerequisite: Open through invitation only). Honors section of ACC 2023.

ACC 2990. Special Topics in Accounting. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

ACC 3003. Accounting Information Systems I. (3) (Prerequisite: ACC 2033). Three hours lecture. Using computerized information systems, including word processing, spreadsheet, database, network, and internet software. Documenting accounting information system processes and establishing effective internal controls.

ACC 3013. Cost Accounting. (3) (Prerequisite: ACC 3003). Three hours lecture. Cost accounting principles and techniques as applied to job order and continuous process types of industry; determination of unit costs; preparation of cost reports.

ACC 3033. Intermediate Accounting II. (3) (Prerequisite: ACC 3023). Financial accounting and reporting related to liabilities, leases, pensions, income taxes, stockholder's equity, accounting changes, errors, cash flows, and earnings per share.

ACC 3053. Accounting Information Systems II. (3) (Prerequisite: ACC 3003). Three hours lecture. Designing and using accounting information systems in both computerized general ledger and database processing environments.

ACC 3203. Financial Statement Analysis. (3) (Prerequisite: ACC 2031 or equivalent, ACC 2023). Three hours lecture. For non-accounting majors. A study of financial statements from an external users perspective; an analysis of statements for purposes of determining loan and investment potential.

ACC 4000. Directed Individual Study. (Prerequisites: ACC 2023 and consent of Director of School of Accounting). Hours and credits to be arranged.

ACC 4033. Auditing. (3) (Prerequisite: ACC 3053). (Not open to PACC students). Three hours lecture. Fundamentals of auditing, including evidential controls, assessing risk, designing audit programs, statistical sampling, professional ethics, and collecting evidence for financial, internal, operational, and compliance audits.

ACC 4043/6043. Municipal and Governmental Accounting. (3) (Prerequisite: ACC 2023). (Not open to PACC students). Three hours lecture. Accounting theory and practice applied to governmental units, state operated schools and colleges; classification and use of funds; fiscal procedures; budgetary control; financial statements; reports.

ACC 4053/6053. International Accounting. (3) (Prerequisite: ACC 2023). (Not open to PACC students). Three hours lecture. A study of the international dimension of accounting as it relates to multinational corporations and the international environment.

ACC 4065/6065. Income Tax II. (3) (Prerequisite: ACC 4013). (Not open to PACC students). Three hours lecture. Discussion of the Federal Income Tax treatment of taxpayers other than individuals and the treatment of property transfers which are subject to Federal and State gift and death taxes.

ACC 4203/6203. Accounting Internship. (3) (Prerequisite: Senior standing and approval by the Internship Director prior to the internship). A minimum of eight consecutive weeks consisting of forty hours per week of professional experience in audit, tax and other accounting related areas.

ACC 4990/6990. Special Topics in Accounting. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

ACC 7000. Directed Individual Study. Hours and credits to be arranged.

ACC 8000. Thesis Research Thesis. Hours and credits to be arranged.

ACC 8013. Seminar in Financial Accounting Theory. (3) (Prerequisite: ACC 4023). Examination of the theoretical concepts, definitions, and models espoused in the accounting literature and relevant to analyzing various contemporary issues in financial accounting and reporting.

ACC 8023. Advanced Managerial Accounting. (3) (Prerequisite: ACC 3013). Three hours lecture. The study of theoretical and technical issues in planning, control and decision making.

ACC 8033. Business Assurance Services. (3) (Prerequisite: ACC 4033). Three hours lecture. Financial statement auditing practices, including professional standards, ethical responsibilities, legal liability, and reporting requirements.

ACC 8043. Information Technology Auditing. (3) (Prerequisite: ACC 3063 and ACC 4033). Three hours lecture. Developing and executing a program of procedures to assess the reliability of information generated by computerized accounting systems.

ACC 8053. Professional Accounting Policy and Research. (3) (Prerequisites: ACC 3033). Three hours lecture. Integrative course examining recent trends and developments in public accounting. Various problems and cases in financial reporting issues, ethics, and other accounting topics.

ACC 8063. Research in Tax Practice and Procedures. (3) (Prerequisite: ACC 4013). Three hours lecture. Preparation of tax protests, tax planning; use of tax services; client representation; structure of Internal Revenue Service; and research problems in taxation.

ACC 8073. Taxation of Corporations and Shareholders. (3) (Prerequisite: ACC 4013). Three hours lecture. Examination of federal income tax laws as applied to corporations and shareholders with an emphasis of how research issues deal with these topics.

ACC 8083. Federal Estate and Gift Taxation. (3) (Prerequisite: ACC 4013). An examination of the Federal Estate and Gift tax laws with an emphasis on how to research issues dealing with these topics.

ACC 8093. Taxation of Partnerships, S Corporations, Trusts, and Estates. (3) (Prerequisite: ACC 4013). Three hours lecture. An examination of the income taxation of partnerships, S corporations, trusts, and estates with an emphasis on how to research issues dealing with these topics.

ACC 8103. Income Taxation of Natural Resources. (3) (Prerequisite: ACC 4013). Three hours lecture. An examination of federal income tax laws as applied to oil and gas, solid minerals, timber, and selected topics in farming.

ACC 8112. Financial Statement and Management Accounting Report Analysis for Decision Making. (2) (Prerequisite: ACC 8303 or equivalent). Two hours lecture. Analysis of financial statements and internal accounting reports to help management make decisions.

ACC 8113. Advanced Individual Taxation. (3) (Prerequisite: ACC 4013 or consent of instructor). Three hours lecture. An in-depth analysis of taxation of individuals with an emphasis on how to research issues dealing with these topics.

ACC 8213. Financial Statement Analysis. (3) (Prerequisite: ACC 8203 or equivalent). Three hours lecture. Focuses on understanding financial statement analysis and application to management decision making. Areas of emphasis include: the development of financial and cost accounting, and the interpretation of financial statements in decision making, in particular, use of financial statements as a basis for capital budgeting, management control, and profit planning.
nancial statements and the methods by which they are analyzed and inter-terpreted. (Not open to students with undergraduate degree in Accounting.)

**ACC 8303. Survey of Accounting.** (3) Prerequisite: Graduate Standing. Three hours lecture. Introduction to financial and managerial accounting: including accounting process, cash flow, elements, business organizations, analysis of management reports and financial statements, cost planning and control.

**ACC 8990. Special Topics in Accounting.** (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years.)

**ACC 9000. Dissertation Research/Dissertation.** Hours and credits to be arranged.

---

**Department of ANIMAL and DAIRY SCIENCES**

Office: 4025 Wise Center

Professors Althen, Boyd, Kiser, and Rogers;

Assistant Professors Evans, Fairbrother, Nicodemos, Rude, Ryan, A. Smith, T. Smith, St. Louis, and Willard

Instructor Shields

**ADS 1114. Animal Science.** (4) Fall and spring semester. Three hours lecture. Two hours laboratory. Fundamental principles and practical application of livestock, dairy, and poultry science.

**ADS 1132. Western Equitation.** (2) Fall and spring semester. One hour lecture. Laboratory. Principles of horsemanship and management and training of western pleasure horses.

**ADS 2102. Equine Conformation and Performance Evaluation.** (2) Spring Semester. Four hours laboratory. Individual evaluation of horses with an in-depth study of anatomy and its relationship to function, plus methods used in evaluating performance classes.

**ADS 2122. Advanced Equine Evaluation.** (2) Fall Semester. (Prerequisite: ADS 2102 or consent of instructor). Four hours laboratory. Advanced evaluations of equine conformation and performance classes. Develop more extensive oral reason presentations to defend conformation and performance placings.

**ADS 2211. Equine Behavior and Training.** (1) (Prerequisite: ADS 1132 and consent of instructor). Two hours laboratory. Equine behavior and application of psychology principles for training horses. Systematic approaches to horse training emphasizing learning principles and training methods for specific equine activities.

**ADS 2990. Special Topics in Animal and Dairy Science.** (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years.)

**ADS 3142. Meats Judging I.** (2) Spring semester. Four hours laboratory. Grading and judging meat carcasses and cuts, study of packing house operation. (Same as FST 3142)

**ADS 3213. Performance Analysis of Meat Animals.** (3) Fall Semester. One hour lecture. Four hours laboratory. Productive evaluation of livestock as meat animals directly related to carcass value and economics of production.

**ADS 3232. Horse Science.** (2) Spring semester. Two hours lecture. Breeding, feeding, management, and training of horses.

**ADS 3233. Introduction to Therapeutic Riding.** (3) (Prerequisite: ADS 1132 or consent of instructor). Three hours lecture. An introductory course to therapeutic horseback riding discussing the therapeutic riding team, facilities and equipment, standards and accreditation, and special needs of the rider.

**ADS 3312. Livestock Management Practices.** (2) Fall and spring semester. (Prerequisites: ADS 4123, ADS 4131, ADS 4323 or current semester enrollment). Four hours laboratory. Modern techniques used in proper vocational management of beef cattle, sheep, swine, and horses.

**ADS 3312. Selection, Evaluation, and Use of Meats.** (2) Fall semester. One hour lecture. Two hours laboratory. Identification, selection, cutting, grading, care, storage, and cooking cuts of meat. (Same as FST 3412).

**ADS 3813. Dairy Cattle Appraisal.** (3) One hour lecture. Four hours laboratory. Phenotypic appraisal; breed programs; performance record systems.

**ADS 4000. Directed Individual Study.** Hours and credits to be arranged. Approval by Department Head only.

**ADS 4113/6113. Swine Science.** (3) Fall semester. (Prerequisites: ADS 4213, ADS 4613 and ADS 4123). Three hours lecture. Feeding, management, breeding, production, and marketing of swine.

**ADS 4123/6123. Animal Breeding.** (3) Fall semester. (Prerequisites: ADS 3112, ADS 3312). Three hours laboratory. Principles of livestock, including the study of variation, heritable characteristics, mating systems and methods of estimating breeding values. (Same as GNS 6123.)

**ADS 4132. Meats Judging II.** (2) Fall semester. (Prerequisites: ADS 3142). Three hours laboratory. Advanced study of grading and judging meat carcasses and cuts, Institutional Meat Purchase Specifications (IMPS) and a field trip to study packing house operations.

**ADS 4212/6212. Livestock Evaluation.** (2) Spring semester. (Prerequisite: ADS 3213). Four hours laboratory. Evaluation of individuals and representative groups of livestock from the standpoint of the breeder, the market, and the consumer.

**ADS 4213/6213. Livestock Nutrient Requirements and Formulation of Rations.** (3) Fall semester. Application of knowledge of feedstuffs and nutrient requirements in ration formulation for all classes of livestock.

**ADS 4221. Animal and Dairy Sciences Senior Seminar.** (1) Fall semester. One hour lecture. Review and oral presentation of animal science research and related production problems.

**ADS 4222/6222. Sheep Science.** (2) Fall semester. (Prerequisite: Junior or senior standing). Two hours lecture. Breeding, feeding, management, and marketing of sheep for lamb and wool production.

**ADS 4232/6232. Advanced Livestock Evaluation.** (2) Fall semester. (Prerequisites: ADS 4213/6213). Four hours laboratory. Advanced study of animal evaluation in functional efficiency.

**ADS 4243/6243. Composition and Chemical Reactions of Foods.** (3) Spring semester. (Prerequisites: CH 1053 and CH 2503 or equivalent). Three hours lecture. Nature and chemical behavior of food components including proteins, lipids, carbohydrates, minerals, water, enzymes and pigments; properties of food systems as related to commercial preparation. (Same as FST 4243/6243.)

**ADS 4314/6314. Meats Processing.** (4) Spring semester. Three hours lecture. Two hours laboratory. Survey of the meat industry with emphasis on slaughtering, cutting, curing, cooling, care, storage and manufacturing meats and meat products. (Same As FST 4314/6314.)

**ADS 4323/6323. Beef Cattle Science.** (3) Spring semester. (Prerequisites: ADS 4213, ADS 4613 and ADS 4123). Three hours lecture. Breeding, feeding, management, and marketing of beef cattle.

**ADS 4333/6333. Equine Exercise Physiology.** (3) (Prerequisite: ADS 3232). Three hours lecture. Evaluation of research in equine exercise science. Physical, physiologic, metabolic, behavioral and locomotory adaptations of the equine athlete to athletic training.

**ADS 4412. Managing Livestock Sales I.** (2) (Fall Semester) (Prerequisite: Instructor approval. Course must be taken in consecutive semesters with ADS 4421) Four hours laboratory. Course in preparation, strategies and management of livestock sales, emphasis will be on cattle and horse sales. Students will prepare for and conduct sale.

**ADS 4421. Managing Livestock Sales II.** (1) (Spring Semester) (Prerequisites: Instructor approval. Course must be taken in consecutive semesters with ADS 4412.) Two hours laboratory. A course in preparation, strategy and management of livestock sales. Emphasis will be on sheep sale. Students will prepare for and conduct sale.

**ADS 4423. Animal and Dairy Sciences Internship.** (3) (Prerequisite: Consent of instructor). Individual work experience with the farm animal species either in animal production, meat production or product
promotion with an industry commodity representative under faculty supervision.

AEC 4611/6611. Practices in Physiology of Reproduction. (1) (Prerequisite: VS 3014 or BIO 1504.) Three hours laboratory. Artificial insemination and postpartum palpation of reproductive organs of cattle; semen collection, evaluation, processing and handling. (Same as PHY 7611.)

AEC 4613/6613. Physiology of Reproduction. (3) (Prerequisite: BIO 3504 or VS 3014.) Three hours lecture. Anatomy and physiology; reproductive cycles; production, evaluation and preservation of gametes; gestation; endocrine regulation; managed reproduction. (Same as PHY 7613.)

AEC 4623/6623. Physiology of Lactation. (3) (Prerequisite: VS 3014 or BIO 1504.) Two hours lecture. Two hours laboratory. Anatomy, physiology, and pathology of the mammary gland; nervous and hormonal control of lactation; theories of milk secretion, modern methods of milking, factors affecting lactation. (Same as PHY 6623.)

AEC 4812. Dairy Cattle Judging. (2) (Prerequisite: Consent of instructor.) Four hours laboratory. Practical work in judging dairy cattle and giving oral reasons.

AEC 4814/6814. Dairy Farm Management. (3) (Prerequisites: AEC 3113, AEC 4123/6123, AEC 4611/6611, AEC 4613/6613 and NTR 4115/6115.) Two hours lecture. Three hours laboratory. Planning and integrating dairy farm operations; management principles applied to dairy herd operations.

AEC 4990/6990. Special Topics in Animal and Dairy Science. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years.)

AEC 7000. Directed Individual Study. Hours and credits to be arranged.

AEC 8233. Advanced Breeding. (3) Fall semester. (Prerequisites: AEC 4123/6123 or PO 4303/6303, ST 8114.) Three hours lecture. Describing, measuring and partitioning phenotypic variances and covariances. Estimating parameters, predicting response, systems of breeding, and methods of selection. (Same as GNS 8233.)

AEC 8243. Advanced Physiology of Reproduction. (3) (Prerequisite: AEC 4613/6613 or its equivalent.) Three hours lecture. An advanced study of the reproductive process with emphasis on reproductive endocrinology and the physiology of germ cells. (Same as PHY 8243.)

AEC 8423. Meat Science. (3) Summer semester. (Prerequisites: CH 4513/6513 or equivalent and BIO 3304 or equivalent.) Three hours lecture. Basic study of the value of meat and how this information is applied to the evaluation, processing and preservation of meat, meat products and meat by-products. (Same as FST 8423.)

AEC 8433. Bone, Muscle and Fat Deposition in Animals. (3) (Prerequisite: BCH 4613/6613.) Fall semester. Three hours lecture. Study of deposition of various tissues from embryonic differentiation through maturity of animals. (Same as PHY 8433.)

AEC 8453. Statistical Genetics. (3) Spring semester. (Prerequisites: AEC 6114, AEC 4123/6123.) Three hours lecture. Probability and its application to genetics; partitioning of genotypic variance; covariances among relatives; regression and correlation; linear functions, variances; the analysis of variance. (Same as GNS 8453.)

AEC 8633. Homeostatic Regulation and Physiological Stress. (3) (Prerequisites: PHY 6514 and PHY 8131, 8133 or consent of instructor.) Three hours lecture. An integration of the physiological mechanisms involved in the control of homeostasis in mammals is emphasized with discussion of the effect of specific stressors on these mechanisms. (Same as PHY 8633.)

AEC 8811-8821-8831. Advanced Seminar. (1) Review of literature of assigned and chosen topics in the respective field; preparation, organization, and presentation of papers.

AEC 8833. Dairy Farm Management. (3) (Prerequisites: Graduate standing and AEC 1114.) Two hours lecture. Two hours laboratory. Feed crops, feeding, herd management, sanitation, and marketing of dairy products. (Offered only on weekend basis and as a Summer Short Course.)

AEC 8890. Special Topics in Animal and Dairy Science. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years.)

Department of AGRICULTURAL ECONOMICS and AGRIBUSINESS

Office: 300 Lloyd-Ricks Building

Professors Herndon (Interim Head), Allen, Beaulieu, Laughlin, Parvin, Reinschmiedt, and Spurlock; Associate Professors Forrest, Little; Assistant Professors Coble, Hudson, Hanson and Wolfe; Scientists. (3)

AEC 1223. Computer Applications for Agriculturists and Life Scientists. (3) Two hours lecture. Two hours laboratory. Basic agricultural microcomputer applications and computing logic; creating reports using word processors; developing presentations on agricultural subjects using multimedia software; and agricultural calculations using spreadsheets.

AEC 2611. Seminar I. (1) One hour lecture. Planning and preparing for careers in agricultural economics and agribusiness.

AEC 2713. Introduction to Agricultural Economics. (3) Three hours lecture. Each semester. Prerequisite to other Agricultural Economics courses. Economic principles applied to production, value, prices, credit, taxation, land tenure, marketing, international trade, and related problems affecting agriculture.

AEC 2990. Special Topics in Agricultural Economics. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years.)

AEC 3113. Introduction to Quantitative Economics. (3) (Prerequisites: AEC 2713, MA 1613 or MA 1463.) Three hours lecture. Each semester. Introduction to techniques and procedures for the quantitative analysis of economic problems related to the production and distribution of agricultural products.

AEC 3133. Introductory Agribusiness Management. (3) Three hours lecture. Study of marketing, production, risk, and financial management of agribusiness firms. Emphasis on application of economic principles to management of agrimarketing and farm supply firms.

AEC 3213. International Trade in Agriculture. (3) (Prerequisites: AEC 2713 or EC 2123 or consent of instructor.) Three hours lecture. Examination of the importance of international trade, the economic basis of trade, and the policies affecting agricultural trade.

AEC 3233. Introduction to Environmental Economics and Policy. (3) (Prerequisites: AEC 2713 or EC 2123.) Three hours lecture. Examines how economic forces, in concert with other processes, influence environmental quality through private markets and public policy.

AEC 3413. Principles of Agricultural Marketing. (3) (Prerequisites: AEC 2713 or EC 2123.) Three hours lecture. Describes the principles and practices of marketing in the production, processing, and distribution of agricultural products.

AEC 4000. Directed Individual Study. Hours and credits to be arranged.

AEC 4113/6113. Agribusiness Firm Management. (3) (Prerequisites: EC 3123 or EC 3333.) Three hours lecture. Examination and study of the organization, management, and operation of agricultural business with special reference to the application of managerial principles for effective decision-making.

AEC 4123/6123. Commodity Futures Marketing. (3) (Prerequisite: AEC 3113.) Three hours lecture. Discussion of the purpose, function, mechanics, analysis, and application of commodity futures markets in pricing and hedging opportunities.

AEC 4233/6233. Advanced Topics in Environmental Economics. (3) (Prerequisites: AEC 3233 and EC 3123.) Three hours lecture. Identifies topics lying on the frontier of environmental economics; demystifies contributions that economics can make in understanding the problems and in providing guidance on solutions.

AEC 4333/6333. Economics of Aquaculture. (3) (Prerequisite: AEC 2713 or consent of instructor.) Three hours lecture. Application of economic principles to understand aquacultural production systems, with emphasis on farm management, resource allocation, industry market structure, food safety and environmental issues.

AEC 4343/6343. Advanced Farm Management. (3) (Prerequisite: Senior standing, EC 3123, and AEC 4523.) Three hours lecture. Techniques and procedures used for decision-making in the farm business as related to the determination of optimum enterprise choice and resource combination in both a static and dynamic framework.

AEC 4413/6413. Public Problems of Agriculture. (3) (Prerequisite: Senior standing and EC 3123 and AEC 3113.) Three hours lecture. Major public and private problems of agriculture policies and action programs of government and individuals to deal with them; limitations encountered; appraisal of results.

AEC 8233. Advanced Breeding. (3) (Prerequisites: AEC 4123/6123 or PO 4303/6303, ST 8114.) Three hours lecture. Describing, measuring and partitioning phenotypic variances and covariances. Estimating parameters, predicting response, systems of breeding, and methods of selection. (Same as GNS 8233.)

AEC 8423. Meat Science. (3) Summer semester. (Prerequisites: CH 4513/6513 or equivalent and BIO 3304 or equivalent.) Three hours lecture. Basic study of the value of meat and how this information is applied to the evaluation, processing and preservation of meat, meat products and meat by-products. (Same as FST 8423.)

AEC 8433. Bone, Muscle and Fat Deposition in Animals. (3) (Prerequisite: BCH 4613/6613.) Fall semester. Three hours lecture. Study of deposition of various tissues from embryonic differentiation through maturity of animals. (Same as PHY 8433.)

AEC 8453. Statistical Genetics. (3) Spring semester. (Prerequisites: AEC 6114, AEC 4123/6123.) Three hours lecture. Probability and its application to genetics; partitioning of genotypic variance; covariances among relatives; regression and correlation; linear functions, variances; the analysis of variance. (Same as GNS 8453.)

AEC 8633. Homeostatic Regulation and Physiological Stress. (3) (Prerequisites: PHY 6514 and PHY 8131, 8133 or consent of instructor.) Three hours lecture. An integration of the physiological mechanisms involved in the control of homeostasis in mammals is emphasized with discussion of the effect of specific stressors on these mechanisms. (Same as PHY 8633.)
AEC 4513/6513. Advanced Microcomputer Software Usage in Agricultural Economics. (3) (Prerequisite: CS 1223 or equivalent, or graduate standing and consent of the instructor.) Two hours lecture. Two hours laboratory. A working knowledge of microcomputer software used in agriculture, including operating systems, in-house software, Lotus 1-2-3, SC3, Microstat, SAS and other commercial software.

AEC 4523/6523. Farm Financial Management. (3) (Prerequisites: ACC 2023, AEC 3113 and AEC 3133). Three hours lecture. Financial analysis and decision making, including farm records, marginal analysis and enterprise budgeting, financial statement analysis, capital budgeting, and financial intermediation in agriculture.

AEC 4530/6530. Agribusiness Management Internship. (1-6) (Prerequisite: Consent of instructor). Individual work experience with approved agribusiness companies for agricultural economics or agribusiness students.

AEC 4611. Seminar II. (1) (Prerequisite: Senior standing). One hour lecture. Discussion of current agricultural economics and agribusiness developments and their relation to the food and fiber sector.

AEC 4623/6623. Economics of Export and Import Traffic Management in Agriculture. (Prerequisites: Senior-Graduate level standing or consent of instructor). Examination of the ocean shipping industry, import-export agricultural traffic management techniques, government regulations, documentation, and financial considerations. Spring semester.

AEC 4713/6713. Quantitative Economics. (3) (Prerequisites: AEC 3113, EC 3113, and EC 3123). Three hours lecture. Investigation of the basic mathematical methods and techniques currently used to analyze economic problems.

AEC 4723/6723. Modeling for Agricultural Management. (3) (Prerequisite: AEC 3113). Three hours lecture. Application of mathematical programming techniques to problems confronted by firms and industries involved in the production, processing, and marketing of agricultural commodities.

AEC 4733/6733. Econometric Analysis in Agriculture Economics. (3) (Prerequisite: AEC 3113) Three hours lecture. Applications of single-equation estimation techniques to problems in agriculture.

AEC 4990/6990. Special Topics in Agricultural Economics. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

AEC 4711. Agri-Marketing Practicum. (1) Two hours laboratory. Design and preparation of marketing plan for presentation at National Agri-Marketing Association meeting. Development of plan includes market research, budgeting, and advertising layouts.

AEC 7000. Directed Individual Study. Hours and credits to be arranged.

AEC 7000. Thesis Research/Thesis. Hours and credits to be arranged.

AEC 8122. Agribusiness Strategy Field Study. (2) (Prerequisite: MGT 8121 or equivalent). A group project-based, field study of strategic issues currently facing a participating agribusiness organization.

AEC 8143. Agricultural Production Economics. (3) (Prerequisites: EC 3123 or EC 3333 and AEC 4343/6343). Three hours lecture. Theory of production as related to agricultural production and resource use. Emphasis upon optimal organization of agricultural firms.

AEC 8153. Research Philosophy and Methodology in Economics. (3) (Prerequisite: Graduate standing or consent of instructor). Three hours lecture. A study of undergirding philosophies and important methodologies in applied economic research. Case studies will focus on implications for conduct, review, and evaluation of research.

AEC 8163. Consumers, Producers, and Markets. (3) (Prerequisite: EC 3123). Three hours lecture. Focuses on economic theory related to production, consumption, and markets for products. Extension into market structure, welfare economics, and non-market goods will also be discussed.

AEC 8312. Economic and Social Environment of the Agribusiness Firm. (2) (Prerequisite: EC 8103 or equivalent). Two hours lecture. The course focuses on the economic, social/political and legal forces which shape the environment in which agribusiness firms operate.

AEC 8532. International Agricultural Trade and Policy. (2) (Prerequisite: EC 8163). Two hours lecture. Examination of international trade theories, policies affecting agriculture, international trade, world trade negotiations, barriers to trade, and the role of agricultural trade in economic development.

AEC 8542. Agribusiness Risk Management. (2) (Prerequisite: EC 8103 or equivalent). A review of risk management concepts and techniques for managing risks faced by agribusiness firms, with emphasis on futures and options.

AEC 8611. Research Seminar I. (1) Selection of the research topic, development of the research proposal. Each semester.

AEC 8621. Research Seminar II. (1) Final preparation of the research proposal and presentation of the proposal. Each semester.

AEC 8712. Topics in Applied Economics: Production and Supply. (2) (Prerequisites: EC 8163 and EC 8133, or consent of instructor). Two hours lecture. Focuses on applying microeconomic theory to applied production-oriented problems. Emphasis is placed on using analytical tools to empirical data and reporting results.

AEC 8722. Topics in Applied Economics: Marketing and Demand. (2) (Prerequisites: EC 8163 and EC 8133, or consent of instructor). Two hours lecture. Focuses on problem-solving skills using economic simulation techniques. Emphasis is placed on stochastic and dynamic applications.

AEC 8733. Topics in Applied Economics: Welfare and Policy Analysis. (3) (Prerequisites: AEC 8712 and AEC 8722, or consent of instructor). Three hours lecture. Focuses on problem-solving skills using applied econometrics. Emphasis is placed on applications of welfare economics.

AEC 8813. Advanced Production and Risk Analysis. (3) (Prerequisite: Consent of instructor). Three hours lecture. Economic theory and research applications related to production problems with emphasis on risk.

AEC 8823. The International Economy. (3) (Prerequisite: Consent of instructor). Three hours lecture. Economic theory and analysis of government policies related to international trade with emphasis on the causes and consequences of globalization.

AEC 8833. Environmental and Resources Economics. (3) (Prerequisite: Consent of instructor). Three hours lecture. Economic theory and analysis of government policies related to natural resources and the environment with emphasis on institutional frameworks within which policy decisions are made.

AEC 8843. Survey Design and Experimental Economics. (3) (Prerequisite: Consent of instructor). Three hours lecture. An exploration of economists' use of data collection techniques, such as surveys and experiments, with emphasis on analysis of non-market valuation problems.

AEC 8990. Special Topics in Agricultural Economics. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

AEC 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.
AIS 3203. Introduction to Technical Writing in Agricommunication. (3) Three hours lecture. Basic principles of and techniques in communicating information relevant to agriculture/agribusiness, natural resources, and home economics.

AIS 3303. Youth Organizations. (3) Three hours lecture. Survey and analysis of youth organizations involved in Agricultural and Extension Education. Procedures involved in developing and implementing informal educational programs for youth.

AIS 3324. Management of Agricultural Learning Systems. (4) (Prerequisites: AIS 4203 or consent of instructor). Three hours lecture. Three hours laboratory. Planning instruction; selecting techniques of teaching; developing lesson plans; teaching agricultural topics using the problem-solving approach; using instructional technologies; and evaluating learner progress.

AIS 3500. Internship in Agricultural Information Science. (1-6) (Hours and credit to be arranged and shall not exceed a total of six hours). Supervised field experiences shall center around experiences related to participation in professional activities relating to problems, methods, and skills basic to agricultural and extension education.

AIS 3803. Leadership Development in Agriculture and Life Sciences. (3) Three hours lecture. Fall semester. Dynamic interactions of personal characteristics, knowledge and expertise; interpersonal influence; professional commitment; organizational planning and goals; and power for effective leadership in agricultural professions.

AIS 4000. Directed Individual Study. Hours and credit to be arranged.

AIS 4103/6103. Objectives and Procedures of Programs in Agricultural Information Science and Education. (3) (Prerequisite: Junior standing). Three hours lecture. Identification and development of objectives; techniques used in Agricultural and Extension educational procedures; relationships with U.S.D.A., experiment stations, and other agricultural agencies.

AIS 4203/6203. Applications of Computer Technology to Agricultural Information Science and Education. (3) (Prerequisites: CS 1013 or BIS 3713 or equivalent). Two-hour lecture and two-hours laboratory. Application of microcomputer technology in agricultural and extension education: data storage and retrieval; and use of canned computer programs in agricultural and educational settings.

AIS 4303/6303. Applications of Information Technologies in Agricultural Learning Systems. (3) (Prerequisites: AIS 4203/6203 or consent of instructor). Two hours lecture. Three hours laboratory. Advanced applications of computer and related information technologies in agricultural learning systems; designing and developing hypermedia-based materials for formal and nonformal agricultural instructional programs.

AIS 4443/6443. Vo-Ed Curricula and Techniques of Teaching the Rural Disadvantaged. (3) Organizing training programs in agricultural occupations for rural disadvantaged persons; developing teaching techniques adaptable to such programs and persons. Occupational opportunities for the rural disadvantaged.

AIS 4453/6453. Cooperative Programs in Occupations Served by Agricultural Information Science. (3) Procedures and techniques in organizing and coordinating cooperative vocational education programs in agricultural occupations; application at the local level.

AIS 4873. Professional Seminar in Agricultural Information Science and Education. (3) (Prerequisites: Admission to Teacher Education and senior standing). Three hours lecture. Legal, professional, administrative and curricular issues in agricultural and extension education. Includes needs assessment, community involvement and problem solving to plan formal and informal programs.

AIS 4886, 4896. Student Teaching in Agriculture Information Science and Education(6,6) (Both courses to be taken concurrently). (Prerequisites: Admission to Teacher Education and senior standing). Supervised observation and directed teaching in respective field of endorsement.

AIS 4990/6990. Special Topics in Agricultural Information Science and Education. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

AIS 7000. Directed Individual Study. Hours and credits to be arranged.

AIS 8000. Thesis Research/Thesis. Hours and credits to be arranged.

AIS 8103. International Agricultural Education. (3) Three hours lecture. Examination of formal and non-formal agricultural education systems and related situations and processes which influence agricultural development in developing countries.

AIS 8203. Advanced Communication in Agricultural Information Science and Education. (3) Two hours lecture. (1 1/2 hours each). Updating of principles of communicating information in the fields of agriculture/agribusiness, natural resources, and home economics; review and updating of communications techniques.

AIS 8243. Administration and Supervision in Agricultural Information Science and Education. (3) Three hours lecture. Principles in developing and administering programs in agricultural and extension education with attention to federal-state-local relationships and supervisory procedures.

AIS 8263. Public Relations in Agricultural Information Science and Education. (3) Three hours lecture. Publics to be dealt with, public relations media; methods and techniques of establishing and maintaining desirable public relations.

AIS 8303. Development of Youth Programs. (3) (Prerequisite: AIS 3303 or consent of instructor). Three hours lecture. Needs and interests of youth; developing, managing, and evaluating informal youth education programs; volunteer and paraprofessional staff development; securing and developing supportive resources.

AIS 8403. Directing Learning Experiences in Agricultural Information Science and Education. (3) Two hours lecture. Two hours laboratory. Theory and practice in directing learning activities. Using instructional technology. Delivering instruction for formal and non-formal groups.

AIS 8503. Program Planning and Development in Agricultural Information Science and Education. (3) Three hours lecture. Principles, theory, and practice in developing local and state programs of vocational, technical, and extension education.

AIS 8523. Teaching Out-of-School Groups in Agricultural Information Science and Education. (3) Three hours lecture. Organizing, planning, and instructing out-of-school groups in agricultural and extension education; identifying and assessing needs of clientele; and evaluating effectiveness.

AIS 8533-8543. Workshop in Agricultural Information Science and Education. (3-3) (A total of six semester hours may be earned in AIS 8533-8543). One hour lecture. Four hours laboratory. Studying current problems in agricultural and extension education; investigating and analyzing problems; preparing comprehensive reports on problems; planning for local application.

AIS 8593. History, Philosophy, and Policy of Agricultural Information Science and Education. (3) Three hours lecture. Philosophy, history, and development of Agricultural and Extension Education; implications, influences, and evaluation of forces and policies impacting Agricultural and Extension Education.

AIS 8606. Student Teaching in Agricultural Information Science and Education. (6) (Prerequisites: Admission to the graduate education program, teacher education and student teaching). Supervised observation and directed teaching in Agricultural Information Science and Education.

AIS 8703. Evaluation of Agricultural Information Science and Education Programs. (3) Three hours lecture. Evaluation principles and procedures used in developing and analyzing vocational, technical, and extension education programs.

AIS 8803. Applying Research Methods to Agricultural Information Science and Education. (3) Three hours lecture. Principles and techniques for planning, conducting, and reporting research; development of effective design of research problems; emphasis on understanding and evaluating scientific reports.

AIS 8990. Special Topics in Agricultural Information Science and Education. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

AIS 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.
ANTHROPOLOGY
Office: 206 Cobb Institute of Archaeology
Professor Rafferty; Associate Professors Hogue
Assistant Professors Loewe, and Peacock.

For departmental information, see SOCIOLOGY, ANTHROPOLOGY and SOCIAL WORK.

AN 1103. Introduction to Anthropology. (3) Three hours lecture.
The fields, theories, and methods of anthropology; man’s biological and cultural development; survey of technological, economic, political, social, religious, and linguistic systems.

AN 1143. Introduction to Cultural Anthropology. (3) Three hours lecture.
Introduction to the study of social, political, and economic organization, magic and religion, personality, and art.

AN 1173. Introduction to Gender Studies. (3) Three hours lecture.
An introduction to theoretical concepts in Gender Studies. This course will examine the influence of the women’s movement on the academic development of Gender Studies (Same as WS 1173 and SO 1173).

AN 1343. Introduction to Biological Anthropology. (3) Three hours lecture.
The biological nature of man; study of human origins; fossil evidence; genetic mechanism; cultural association; comparative primate anatomy and behavior; concepts of race. Note: Unacceptable for Natural Science requirement in Arts and Sciences.

AN 1543. Introduction to Archaeology. (3) Three hours lecture.
A survey of early cultural development throughout the world; emphasis on archaeological techniques, interpretations and theories of development.

AN 2203. Cultural and Racial Minorities. (3) (Prerequisite: Three hours in an introductory social science). Three hours lecture. Origins of minority groups and racial and cultural attitudes. Biological and cultural concepts of race and minority groups; problems of adjustment in interracial and multiethnic societies. (Same as SO 2203).

AN 2510. Archaeological Field Methods: Survey. (1-6) Credit to be arranged. Archaeological surface survey methods in field setting, including map-reading, shovel-testing, collection techniques, controlled surface collection, artifact recognition.

AN 2990. Special Topics in Anthropology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to be arranged under one title within two academic years).

AN 3113. Societies of the World. (3) (Prerequisite: AN 1103 or its equivalent or consent of instructor). Three hours lecture. A survey of principal culture types and their distribution.

AN 3123. North American Indians. (3) (Prerequisite: AN 1103 or consent of instructor). Three hours lecture. Ethnographic survey of the Indians of North and Mesoamerica.

AN 3133. Anthropology of Latin America. (3) Three hours lecture. A survey of societies in Latin America with an emphasis on indigenous peoples, their relationship to contemporary social and economic development.

AN 3153. African Art and Culture. (3) (Prerequisite: AN 1103 or consent of instructor). Three hours lecture. An examination of the role of traditional art in African cultures and customs of representative African cultures. (Same as ART 3153).

AN 3323. Contemporary Woman. (3) Three hours lecture. Introductory course for the Concentration in Women’s Studies. Major topics are women’s heritage, identity, culture, and vulnerabilities. (Same as SO 3323).

AN 3333. Primate Behavior. (3) Three hours lecture. In-depth study of non-human primate evolution, social behavior, and communication. Field studies and conservation efforts will be examined.

AN 3510. Archaeological Field Methods: Excavation. (1-6) Credit to be arranged. Excavation methods in field setting, including mapping, recording, recovery and provenience techniques, field research strategies.

AN 3513. Artifact Analysis. (3) Two hours lecture. Two hours laboratory. Introduction to artifact recognition and analysis, focusing on prehistoric and historic ceramics, stone tools and debris, glass, nails, animal bones, shell, and environmental indicators.

AN 3523. North American Archaeology. (3) (Prerequisite: AN 1103 or consent of instructor). Three hours lecture. A survey of the prehistoric cultures of North America including the influences of the high civilizations of Mesoamerica.

AN 3533 Rise of Civilization. (3) Three hours lecture. Survey of prehistoric cultures and their contributions to the rise of civilizations in Latin America, China, Africa, India and the Middle East.

AN 3540. Archaeological Travel and Participation Program. (1-6) Participation in excavations in the Near East and related lecture program. (Same as REL 3540).

AN 3553. Near Eastern Archaeology. (3) Three hours lecture. Introduction to the contributions made by archaeological research to an understanding of the Near East.

AN 4000. Directed Individual Study. Hours and credits to be arranged.

AN 4123/6123. Anthropological Theory. (3) (Prerequisite: AN 1103 or its equivalent or consent of instructor). Three hours lecture. A history of the development of anthropological theory; an analysis of current theoretical formulations and approaches.

AN 4133/6133. Medical Anthropology. (3) (Prerequisite: AN 1103 or consent of instructor). Three hours lecture. The cross-cultural study of health, sickness, and medicine from a holistic perspective emphasizing interactions between culture and biology and between biomedicine and local healing traditions.

AN 4143/6143. Ethnographic Methods. (3) (Prerequisites: AN 1103 or AN 1143 or consent of instructor). Three hours lecture. An overview of methods and techniques for conducting ethnographic research.

AN 4163/6163. Anthropology of International Development. (3) (Prerequisite: Senior standing or consent of instructor). Three hours lecture. Role of anthropology in international development including origins of the Third World, development theory, current issues in international development, case studies.

AN 4173/6173. Environment and Society. (3) (Prerequisite: AN 1103, SO 1003 consent of instructor). Three hours lecture. A study of the impact of Near Eastern history and society on the environment including the social aspects of environmental problems. (Same as SO 4173/6173).

AN 4303/6303. Human Variation and Origins. (3) Three hours lecture. An examination of human origins, genetics, and other principal factors that contribute to physical variation within and between human populations.

AN 4313/6313. Human Identification. (3) Two hours lecture and three hours laboratory. Identification of each human bone and its fragments. Sex differences, age changes in bone and dentition, dermatoglyphics, blood group systems, and paleopathology will be studied.

AN 4403/6403. Introduction to Linguistics. (3) (Prerequisite: AN 1103 or its equivalent or consent of instructor). Three hours lecture. The descriptive and historical study of language; linguistic analysis and comparison; language classification; language in its social and cultural setting. (Same as EN 4403/6403).

AN 4503. Introduction to Method and Theory in Archaeology. (3) (Prerequisite: AN 1103 or consent of instructor). Three hours lecture. An introduction to the history of and relationship between theory and method in archaeology with emphasis on recent advances.

AN 4523/6523. Public Archaeology. (3) (Prerequisite: AN 1543 or consent of instructor). Three hours lecture. Survey of cultural resource management practices, Federal and State historic preservation laws, research proposal design, significance assessments, professional ethics, employee/client relationships, and public education.

AN 4623/6623. Language and Culture. (3) (Prerequisite: AN 1103 or consent of instructor). Three hours lecture. Examination of language as a part of culture, a source of knowledge about other aspects of culture, and a social behavior. (Same as EN 4623/6623 and SO 4623/6623).

AN 4633/6633. Sociolinguistics. (3) (Prerequisites: AN 1103, or consent of instructor). Three hours lecture. Examination of relationships between language and society, and how, when, and why people in speech communities use language varieties. (Same as EN 4633/6633 and SO 4633/6633).

AN 4990/6990. Special Topics in Anthropology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

AN 7000. Directed Individual Study. Hours and credits to be arranged.

AN 8000. Thesis Research and Thesis. Hours and credits to be arranged.

AN 8103. Applied Cultural Anthropology. (3) (Prerequisites: AN 1103 or AN 1143 or consent of instructor). Three hours lecture. An overview of the application of anthropological theory and method of contemporary social problems.

AN 8203. Reading and Research in Applied Anthropology. (3) Three hours lecture. An overview of sub-disciplines within applied an-
thropology, including medical anthropology, development, forensics, education and cultural resource management.

**AN 8216. Internship in Applied Anthropology. (6)** A minimum of nine weeks of supervised professional anthropology experience in an appropriate setting.

**AN 8303. Seminar in Bio-archaeology. (3)** Three hours lecture. Overview of applications in bio-archaeology, including paleodemography, paleopathology, and paleonutrition.

**AN 8513. Southeastern Archaeology. (3)** Three hours lecture. Prehistory of Southeastern U.S. from entry of first people to European contact. Changes in technology, settlement, subsistence, demography, and environment examined using archaeological evidence.

**AN 8523. Environmental Archaeology. (3)** Three hours lecture. Coverage of method and theory in environmental archaeology, including elements of palynology, geoarchaeology, floral and faunal analysis, landscape ecology, historical ecology, cultural ecology, and taphonomy.

**AN 8533. Readings in Archaeology: Theory. (3)** Three hours lecture. Archaeological theory and its implications for practice, focusing on evolutionary archaeology, but also including culture history, processual, reconstructionist, and post-processual approaches.

**AN 8553. Readings in Archaeology: Applications. (3)** Three hours lecture. Review of literature related to materials science in archaeology, including thin-sectioning and petrography, raw material sourcing, organic residues, dating techniques, and preservation technology.

**AN 8990. Special Topics in Anthropology. (1-9)** Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

**AGRICULTURAL PEST MANAGEMENT**

(For departmental information, see Department of ENTOMOLOGY and PLANT PATHOLOGY.)

**APM 2990. Special Topics in Agricultural Pest Management. (1-9)** Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

**APM 4013-4023. APM Internship. (3)** (Prerequisite: Approval of APM Internship Committee). Designed to provide APM students with field experience in disease, insect and weed management through a working relationship with pest management professionals.

**APM 4021. APM Senior Seminar. (1)** (Prerequisite: APM 4013 or 4023 or current enrollment in APM 4013 or 4023). One hour lecture. Fall semester. Review and discussion of internship experiences. Includes discussions of contemporary topics in pest management and development of professional skills.

**APM 4990/6990. Special Topics in Agricultural Pest Management. (1-9)** Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

**School of ARCHITECTURE**

Professors James West (Dean) and Fazio;
Associate Professors Barrow, Berk, Buege, Greenwood, Lewis, McCann, and Perkes;
Assistant Professors Brown, Correro, Monson and Poros;
Visiting Associate Professor Clarke

**ARC 1013. Architectural Appreciation. (3)** Three hours lecture. Illustrated study of architecture's role in shaping the quality of man's environment. Architectural history, design theory, and process as it affects daily life. Intended for non-majors.

**ARC 1536-1546. Architectural Design I-A and I-B. (6,6)** (Prerequisites: Letters of Acceptance into design studio and consent of Associate Dean of Architecture). Two hours lecture. Ten hours studio. Introduction to creative process, design principles and methods. Design projects emphasize verbal and visual communication; observing, analyzing, representing, and making of form, space, materials.

**ARC 1586-1596. Honors Architectural Design I-A and I-B. (6,6)** (Prerequisites: Letters of Acceptance into design studio and consent of Associate Dean of Architecture). Two hours lecture. Ten hours studio. Independent investigation and presentation of an approved research topic in addition to the content described under ARC 1536-1546.

**ARC 2313. History of Architecture I. (3)** Three hours lecture. A survey of man's effort to mold his environment from prehistory through the Early Middle Ages.

**ARC 2536-2546. Architectural Design II-A and II-B. (6,6)** (Prerequisite: ARC 1546 or equivalent or consent of the dean). One hour lecture. Eleven hours studio. Introduction to fundamental aspects of building including structural-spatial ordering systems. Projects emphasize linkages between people and spaces through investigation of perceptual-conceptual issues.

**ARC 2586-2596. Honors Architectural Design II-A and II-B. (6,6)** (Prerequisite: ARC 1546 or 1596). One hour lecture. Eleven hours studio. Independent investigation and presentation of an approved research topic in addition to the content described in ARC 2536.

**ARC 2713. Passive Building Systems. (3)** (Prerequisite: For architecture majors- ARC 1546 and PH 1123; for non-architecture majors-consent of instructor). Three hours lecture. Investigation of the morphological impacts of various environmental energies on building forms and systems. Included are light, climatic, structural, and ecological factors.

**ARC 2723. Materials. (3)** (Prerequisites: ARC 2536 and ARC 2713). One hour lecture. Analyzing how materials and systems are designed to respond to both environmental energies and needs. Included are soils, concrete, wood, masonry, and metals.

**ARC 2990. Special Topics in Architecture. (1-9)** Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

Professor James West, Dean; Professors James West (Dean) and Fazio; Associate Professors Barrow, Berk, Buege, Greenwood, Lewis, McCann, and Perkes; Assistant Professors Brown, Correro, Monson and Poros; Visiting Associate Professor Clarke

**ARC 3313. History of Architecture II. (3)** (Prerequisite: ARC 2313). Three hours lecture. Survey of major developments in architecture and city planning from the Fourteenth through the Eighteenth Centuries.

**ARC 3323. History of Architecture III. (3)** (Prerequisite: ARC 2313). Three hours lecture. Survey of major developments in American architecture and survey of major developments in European architecture during the Nineteenth and Twentieth Centuries.

**ARC 3333. Ancient Greek Architecture. (3)** (Prerequisite: ARC 2313 or consent of instructor). Three hours lecture. Investigations of the architecture, construction techniques, design theory, and planning principles for Greek architecture of the sixth, fifth, and fourth centuries B.C.

**ARC 3343. The Architecture of Housing. (3)** Three hours lecture. An historical, social, and typological investigation of the evolution of housing as an architectural and cultural phenomenon.

**ARC 3353. History and Theory of Urban Form. (3)** (Prerequisite: Junior standing or consent of instructor). Three hours lecture. Investigation of the forces that influence urban form, tracing the resultant developments from the cities of classical antiquity through Western Europe to America's "edge cities.

**ARC 3536-3546. Architectural Design III-A and III-B. (6,6)** (Prerequisite: ARC 2546 or equivalent or consent of the dean). One hour lecture. Eleven hours laboratory. The development of building design as a synthesis of environmental concerns, behavioral responses, functional requirements, and technical systems. Studies using small and intermediate scale projects.

**ARC 3553. Environmental Education in the Schools. (3)** Two hours lecture; one field visit. This course involves teaching concepts about design and environment awareness to grade school children.

**ARC 3556-3566. Accelerated Studies in Architectural Design III-A and III-B. (6,6)** (Prerequisite: ARC 2546 or equivalent or consent of dean). One hour lecture. Eleven hours studio. Individualized study in architectural design for students enrolled in Accelerated Studies Program.

**ARC 3573. The Art/Architecture of Packaging. (3)** Three hours lecture. Investigations into theories, techniques, and procedures of packaging (with emphasis on portfolio design) through traditional, mechanical, and digital means.

**ARC 3583. Architectural Drawing and Representation. (3)** (Prerequisite: ARC 2546 or equivalent and consent of instructor). Two hours lecture. Three hours laboratory. Advanced course in architectural
drating and visualization that builds upon the students developing skills in graphics, modeling, and digital media.

ARC 3713. Assemblages. (3) (Prerequisites: ARC 2546 and ARC 2723). Two hours lecture and one field study. Fabrication and construction of site and analysis of the relationship between nature of materials and methods of assembly.

ARC 3723. Active Building Systems. (3) (Prerequisites: ARC 3536 or ARC 3566 and ARC 3713 or for non-architecture majors—consent of instructor). Three hours lecture. Concentrates on defining the mechanical and electrical (active) techniques available to architects for integrating thermal comfort and life safety into the built form.

ARC 3904. Architectural Structures I. (4) (Prerequisite: MA 1463 or MA 1613 and ARC 2546). Three hours lecture. Three hours laboratory. Principles of statically determinate structures and strength of materials relating to architectural construction. Wood is used as the primary construction material.

ARC 3913. Structures II. (3) (Prerequisite: ARC 3904). Three hours lecture. Continuation of structural principles relating to architectural construction. Analysis of indeterminate structures, deflection, and lateral loading. Structural steel is the primary material.

ARC 4000. Directed Individual Study. Hours and credits to be arranged with approval of School of Architecture Dean.

ARC 4313. Architectural Theory. (3) (Prerequisite: ARC 3323 or ARC 3313 and consent of instructor). Three hours lecture. A critical investigation of writings that have shaped architectural theory.

ARC 4523/6523. Introduction to Virtual Interface Systems. (3) One hour lecture. Four hours laboratory. Introduction to the theories and realities of virtual interface systems. Application of VIS technology in architectural settings.

ARC 4536-4546. Architectural Design IV-A and IV-B. (6,6) (Prerequisite: ARC 3546 or equivalent or consent of dean). One hour lecture. Eleven hours laboratory. Design of architectural elements integrating building systems, social concerns, and environmental factors. Studies involve intermediate to large scale projects in realistic architectural situations.

ARC 4733. Site Planning for Architects. (3) (Prerequisite: ARC 2546). Three hours lecture. Introduces the natural ecological systems as they relate to human’s impact on them, along with the natural systems resistance to human’s impact.

ARC 4903. Structures III. (3) (Prerequisite: ARC 3913). Three hours lecture. Continuation of structural principles relating to architectural construction. Soil mechanics, reinforced concrete design, footings and foundations, masonry construction, and precast concrete design.

ARC 4990/6990. Special Topics in Architecture. (1-9) Credit and lecture hours to be determined by the instructor. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

ARC 5353. Philosophy of Architecture. (3) Three hours lecture and field visits. The philosophical issues of meaning, appreciation, and the distinctive characteristics of the artistic creation.

ARC 5383. Legal Aspects of Architecture. (3) Three hours lecture. Investigation and research regarding architectural issues including architectural law, contracts, litigation, case studies and other topical issues.

ARC 5443. Thesis Programming. (3) One hour lecture. Six hours laboratory. Advanced study of analytical and intuitive methods of programming, leading to development of thesis program to be used in ARC 5589.

ARC 5493. Architectural Practice. (3) Three hours lecture. Investigation into issues facing the graduate architect including: responsibilities to the community and the profession; project and business management; client relations; and delivery of services.

ARC 5523. Architects Teaching Architecture. (3) Two hours lecture. Three hours field visit. Students teach architecture and environmental quality to fourth-and-fifth grade Jackson Public School students.

ARC 5623. Studies in the Theory and Practice of Urban Design. (3) Three hours lecture. General introduction into field of urban design. Course divided into two areas of theory and practice as they relate to contemporary urban development.

ARC 5733. Process. (3) Three hours lecture. Field visits. Intangible values in building and construction as arising from the nature of materials and methods of work.

ARC 7000. Directed Individual Study. Hours and credits to be arranged.

ARC 8000. Thesis Research/Thesis. Hours and credits to be arranged.

ARC 8013 Seminar in Visualization Theory. (3) (Prerequisite: Consent of the instructor). One hour lecture. Four hours laboratory. Lectures and presentation of student papers and projects related to a selected specialized topic.

ARC 8023 Seminar in Digital Design Applications. (3) (Prerequisite: Consent of the instructor). One hour lecture. Four hours laboratory. Customization of existing software and presentation of student papers and projects related to a selected specialized topic in digital design applications.

ARC 8113 Digital Design I. (3) One hour lecture. Four hours laboratory. Application of high-performance computers and existing software in the design environment. Exploration of design processes through studies of modeling, motion, and lighting.

ARC 8123. Digital Design II. (3) (Prerequisite: ARC 8113). One hour lecture. Four hours laboratory. Customization of 3D-animation software. Emphasis on procedural modularity and automation to reduce the degree of the modeling process and increase the attention given to design.

ARC 8133 Articulated Motion. (3) One hour lecture. Four hours laboratory. Application of existing software to generate motion studies of animate subjects and examinations of gait. Integration of animated objects into the design process.

ARC 8143 Physically-Based Modeling. (3) One hour lecture. Four hours laboratory. Application of existing software to generate motion studies of dynamic and physically based phenomena. Simulation of these events in a 3D-computing environment.

ARC 8213 Illumination I. (3) One hour lecture. Four hours laboratory. In-depth exploration of color and light theory as a basis for exploring existing software illumination models. Customization of existing illumination models and creation of new models.

ARC 8223 Illumination II. (3) (Prerequisite: ARC 8213). One hour lecture. Four hours laboratory. Application of existing software to create advanced illumination models for lighting and rendering systems to meet design specifications.

ARC 8283. Computational Media I. (3) Three hours studio. Application of the design process to the creation of interactive computational artifacts with an emphasis on visual literacy, aesthetics and communication theory.

ARC 8284. Computational Media II. (3) Three hours studio. Continuation of ARC 8283. Emphasis is placed upon the creation of web-based ’interactive illustrations’, narrative form, and VRML/QTVR artifacts.

ARC 8433 Digital Compositing. (3) (Prerequisite: ARC 8513). One hour lecture. Four hours laboratory. Study of digital compositing and image processing, using software-based editing packages. Concepts of video editing and post production in a software computing environment.

ARC 8443 Interactive Multimedia Authoring. (3) (Prerequisites: ARC 8113, ARC 8213, ARC 8533). One hour lecture. Four hours laboratory. Study of techniques and methods of planning, writing, mastering, and debugging multimedia titles.

ARC 8463 Story Telling in Computer Animation. (3) (Prerequisite: Consent of the instructor). One hour lecture. Four hours laboratory. Customization of existing software/software tools for the transformation of a script into computer graphics imagery.

ARC 8523 Digital Input Devices II. (3) (Prerequisite: ARC 8513). One hour lecture. Four hours laboratory. Use of software tools and computer animation to research, design, and develop a new digital input device.

ARC 8533 Graphic Libraries I. (3) One hour lecture. Four hours laboratory. Application of graphic libraries on high-performance computing platforms. Emphasis on the conversion of passive serial 3-D ani-
mations into interactive real-time animation titles for education and entertainment.

ARC 8543 Graphics Libraries II. (3) (Prerequisite: ARC 8533). One hour lecture. Four hours laboratory. Advanced graphics library topics. Authoring of interactive-3D titles for high-performance computing platforms.

ARC 8643 Problem Solving in Virtual Space. (3) (Prerequisite: ARC 4523/6523). One hour lecture. Four hours laboratory. Use of virtual environment technology to solve architectural problems. Investigations of architectonic form, space, lighting, and acoustics through class research projects.

**Department of ART**

**Office:** 102 Freeman Hall

Professors Bartlett, Funderburk, Gootie, Mixon, and Seckinger; Associate Professors Chupa, De Marsh (Head) and Long; Assistant Professors Elsea, Haupt, Livingston, Miller, McCourt, Ngoh and Rumelis, Instructor Luck; Lecturers: Andrews, Faley, Knulson, Pagliaro, Pope, Sewell, and Stelios-Wills;

ART 1003. The Idea of Art. (3) (Prerequisite: Art majors only or consent of instructor). Three hours lecture. An introduction to the process, concepts, media, and history of the visual arts, including contemporary issues, idea generating, and the language of visual form.

ART 1013. Art History I. (3) Three hours lecture. The study of art from prehistoric times to the Renaissance through the architecture, sculpture, painting and minor arts of the western world.

ART 1023. Art History II. (3) Three hours lecture. Art from the Renaissance to the present studied chronologically through the architecture, painting, sculpture, and minor arts of the western world.

ART 1113. Art Appreciation. (3) Three hours lecture. An illustrated lecture course dealing with periods, styles, and personalities in painting, sculpture, and architecture.

ART 1123. Design I. (3) Six hours studio. A basic study of the fundamental elements and principles of design with an emphasis on composition.

ART 1133. Design II. (3) (Prerequisite: ART 1123). Six hours studio. A continued study of the fundamental elements and principles of design with an emphasis on the theory and application of color.

ART 1153. Three-Dimensional Design. (3) (Prerequisites: ART 1123 or ARC 2536). Six hours studio. A study of the organization of the principles and elements of art as they apply to three-dimensional artwork.

ART 1193. Honors in Art Appreciation. (3) (Prerequisite: Open through invitation only). Three hours lecture. A critical study of periods, styles and personalities in painting, sculpture and architecture.

ART 1213. Drawing I. (3) Six hours studio. A freehand drawing course for students interested in visual arts. Basic vocabulary for graphic notation as explored utilizing observation, black and white media, and perspective.

ART 1223. Drawing II. (3) (Prerequisite: ART 1213). Six hours studio. A continuation of ART 1213 further developing conceptual and perceptual use of drawing tools, processes and materials. Black and white, and color media explored.

ART 1303. Ceramic Art I. (3) Six hours studio. Introduction to the processes of ceramic art including hand built forms, wheel thrown pottery and glazing.

ART 2013. Painting I. (3) (Prerequisites: ART 1123 and ART 1213). Six hours studio. The fundamentals of oil paintings and composition.

ART 2033. Painting III. (3) (Prerequisite: ART 2023). Six hours studio. Intermediate painting with further emphasis on the skills and techniques of painting.

ART 2043. Painting IV. (3) (Prerequisite: ART 2033). Six hours studio. A continuation of ART 2033 to further develop skill in the use of the medium and formal organization of subject matter in painting.

ART 2163. History of Photography. (3) Three hours lecture. The examination of the use of photography as an art form from 1850 to the present.

ART 2203. Rendering. (3) (Prerequisite: Sophomore Standing). Six hours studio. A course dealing with the concepts, techniques, and media used in executing interior and exterior renderings.

ART 2213. Life Drawing I. (3) (Prerequisites: ART 1213 and ART 1223). Six hours studio. A drawing class with emphasis on the basic forms and proportions of the human figure.

ART 2223. Life Drawing II (3) (Prerequisite: ART 2213). Six hours studio. Further study in rendering the human figure.

ART 2233. Drawing III. (3) (Prerequisite: ART 1223). Six hours studio. A continuation of ART 1223 to develop further drawing skills, use of mixed-media, surface variety and explorative concepts for advanced students.

ART 2303. Printmaking I. (3) (Prerequisites: ART 1123, ART 1133 and ART 1223). Six hours studio. Introduction to the basic techniques and concepts of lithography, relief printing-woodcut and linocut.

ART 2313. Ceramic Art II. (3) (Prerequisite: ART 1303). Six hours studio. Elementary glaze formulation, surface decoration, kiln firing, wheel thrown and hand built form.

ART 2403. Sculpture I. (3) (Prerequisite: ART 1123 and ART 1153 or permission of instructor). Six hours studio. Introduction to the basic concepts, materials, and processes of sculpture by exploring modeling, casting, carving and constructing.

ART 2803. Introduction to Computing for Art. (3) (Prerequisites: ART 1133 and ART 1223 or permission of instructor). One hour lecture. Four hours studio. Introduction to desktop computer hardware, operating systems, and application software in the visual arts and design.

ART 2990. Special Topics in Art. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

ART 3053. Watercolor Painting. (3) (Prerequisites: ART 1133 and ART 1223). Six hours studio. The technique and use of various water-soluble painting mediums.

ART 3103. Photography I. (3) (Prerequisites: ART 1123 and ART 1213). One hour lecture. Four hours studio. The fundamentals and aesthetics of black and white photography relating to graphic design and the fine arts.

ART 3143. Italian Renaissance Art History. (3) Three hours lecture. The history of art in Italy in the fifteenth and sixteenth centuries, emphasizing the religious monuments of the period. (Same as REL 2143).

ART 3153. African Art and Culture. (3) (Prerequisite: AN 1103 or consent of instructor). Three hours lecture. An examination of the role of traditional art in the beliefs and customs of representative African cultures. (Same as AN 2153).

ART 3303. Printmaking II. (3) (Prerequisite: ART 2303). Six hours studio. Continued exploration of the print as a medium of creative expression.

ART 3313. Graphic Art Design I. (3) (Prerequisites: ART 1123, ART 1213 and ART 1223). Six hours studio. Introduction to the processes and techniques of commercial art. Beginning lettering and layout.

ART 3323. Graphic Art Design II. (3) (Prerequisite: ART 3313). Six hours studio. The execution of a series of design projects promoting an awareness of different forms of printed visual communication.

ART 3423. Color Photography I. (3) (Prerequisite: ART 3103 or permission of instructor). One hour lecture. Four hours studio. The techniques and aesthetics of basic photographic processes in color.

ART 3443. Illustration. (3) (Prerequisites: ART 2013 and ART 3053). Six hours studio. A course introducing issues and instruments related to standards in the professional field of illustration emphasizing mixed-media processes.

ART 3513. Sculpture II. (3) (Prerequisite: ART 2403). Six hours studio. Further exploration of concepts and processes of sculpture, including mold making and armature building. Beginning development of personal language of expression.

ART 3603. Directed Writings in Modern Art History. (3) (Prerequisites: ART 1013 and ART 1023). Three hours lecture. History of 20th Century art with emphasis on scholarly writing, reading, and analysis of contemporary models and varieties of writing.
ART 3703. Jewelry/Metals. (3) Six hours studio. Introduction to the materials and techniques used in the design and execution of jewelry and associated metalwork.

ART 3803. Gallery Management. (3) [Prerequisite: ART 1123 and ART 2113]. One hour lecture. Four hours laboratory. The study of gallery operations, techniques of curation, artists ethics, installation procedures and gallery management of an art gallery.

ART 3873. Digital Photography. (3) [Prerequisites: ART 3103 and ART 3423 or permission of instructor]. Six hours studio. The techniques and aesthetics of digital imaging emphasizing the use of traditional photographic input and output processes.

ART 4000. Directed Individual Study. Hours and credits to be arranged.

ART 4013/6013. Advanced Painting. (3) [Prerequisite: ART 2043]. Six hours studio. Advanced study in painting with emphasis on the student's personal needs and interests.

ART 4082. Senior Honors Research in Art. (3) [Prerequisites: Senior standing and the consent of the instructor]. The application of research methods for the fine artist in contemporary society.

ART 4093. Senior Honors Thesis in Art. (3) [Prerequisites: ART 4083, or consent of instructor]. (Co-requisite: enrollment in studio emphasis course). The proposal, development and execution of a project or exhibition.

ART 4103/6103. The Art of Typography and Layout I. (3) Six hours studio. The art and process of presenting written communication in graphic form.

ART 4113/6113. The Art of Typography and Layout II. (3) [Prerequisite: ART 4103/6103]. Six hours studio. Advanced problems in presenting written communication in graphic form. Advanced problems as well as additional projects will be required for graduate credit.

ART 4133/6133. Watercolor II. (3) [Prerequisite: ART 3053]. Six hours studio. Further investigation of ideas, techniques, instrumentations and watermedia history introduced in ART 3053 with emphasis on non-brush/multi-media approaches. Graduate level requires additional and advanced projects.

ART 4203/6203. Photography II. (3) [Prerequisite: ART 3103 or permission of instructor]. One hour lecture. Four hours studio. Advanced techniques of photographic processes in black and white with emphasis on liberty and choice. stripe.

ART 4223/6223. Photography III. (3) [Prerequisite: ART 3103 or permission of the instructor]. One hour lecture. Four hours studio. Alternative photographic processes in black and white with emphasis on aesthetics.

ART 4343/6343. Drawing IV. (3) [Prerequisite: ART 2233 at both levels and consent of instructor for 6343]. Six hours studio. A continuation of ART 2233 to develop further skills for advanced students.

ART 4403/6403. Advertising Design I. (3) [Prerequisite: ART 3323, ART 4103/6103, and consent of instructor]. Six hours studio. Course requiring devotional, image making, graphic design and typographic skills to meet rigorous conceptual/visual standards pertinent to creating a brand of a company’s identity.

ART 4413/6413. Advertising Design II. (3) [Prerequisite: ART 4403/6403 and consent of instructor]. Six hours studio. An advanced course requiring interaction on a professional level, working with realistic agency-client situations in order to develop efficient, distinguishable and competitive promotional campaigns.

ART 4433/6433. Color Photography II. (3) [Prerequisite: ART 3423 or permission of the instructor]. One hour lecture. Four hours studio. Advanced techniques of photographic processes in color with emphasis on aesthetics.

ART 4443/6443. Alternative Color. (3) [Prerequisites: ART 3103 and ART 3423 or permission of instructor]. One hour lecture and four hours studio. Advanced problems in color photography utilizing the dye transfer and polaroid processes. Additional projects for graduate credit.

ART 4523/6523. Internship in Graphic Art Design. (3) [Prerequisites: ART 3313, senior standing and consent of the instructor]. Supervised instruction in graphic design. Advanced problems will be required for graduate credit.

ART 4533. Ceramic Art III. (3) [Prerequisite: ART 2313]. Six hours studio. Advanced problems in glaze formulation, kiln technology and wheel thrown and hand built forms.

ART 4543/6543. Art and Architecture of Japan. (3) [Prerequisite: ART 1113, 1013, 1023, or consent of instructor]. Three hours lecture. Discussion of the major developments in the art and architecture of Japan.

ART 4563/6563. Art of India and Southeast Asia. (3) [Prerequisite: One of the following: ART 1113, 1013, 1023, HI 1163, REL 1103, 3453]. Three hours lecture. Discussion of the major developments in the art and architecture of India and Southeast Asia, 200 B.C. to 1200 A.D.

ART 4573/6573. Critical Issues in Recent Art. (3) [Prerequisite: ART 3603 or an equivalent course on 20th century art and consent of the instructor]. Three hours lecture. Discussion of major developments and issues in contemporary art focusing on the period 1980 to present.

ART 4603/6603. Advanced Studio - Drawing. (3) May be taken for credit more than once. [Prerequisites: ART 4343 and permission of instructor]. Six hours studio. Advanced study in drawing. Further development of studio skills. Course encourages analysis and criticism, development of personal aesthetic, and further exploration of content and expression.

ART 4613/6613. Advanced Studio - Painting. (3) May be taken for credit more than once. [Prerequisite: consent of instructor]. Six hours studio. This course develops advanced studio skills and professional practice. Course encourages analysis and criticism of aesthetic, social, ethical and related issues.

ART 4623/6623. Advanced Studio - Printmaking. (3) May be taken for credit more than once. [Prerequisite: consent of instructor]. Six hours studio. This course develops advanced studio skills and professional practice. Course encourages analysis and criticism of aesthetic, social, ethical and related issues.

ART 4633/6633. Advanced Studio - Sculpture. (3) May be taken for credit more than once. [Prerequisite: ART 3513]. Six hours studio. Further development of a personal sculptural aesthetic through media of creation.

ART 4643/6643. Advanced Studio - Graphic Design. (3) May be taken for credit more than once. [Prerequisite: consent of instructor]. Six hours studio. This course develops advanced studio skills and professional practice. Course encourages analysis and criticism of aesthetic, social, ethical and related issues.

ART 4653/6653. Advanced Studio - Ceramics. (3) May be taken for credit more than once. [Prerequisite: consent of instructor]. Six hours studio. This course develops advanced studio skills and professional practice. Course encourages analysis and criticism of aesthetic, social, ethical and related issues.

ART 4663/6663. Advanced Studio - Photography. (3) May be taken for credit more than once. [Prerequisite: Consent of Department Head]. Six hours laboratory. Supervised instruction and experience for professional art practice.

ART 4813/6813. Introduction to Multimedia I Design and Authoring. (3) [Prerequisite: Consent of instructor]. One hour lecture, five hours laboratory. The design and authoring of interactive multimedia for fine and applied arts using desktop computers. Course encourages analysis and criticism of aesthetic and related issues.

ART 4823/6823. Multimedia II and Electronic Publishing. (3) [Prerequisite: ART 4813/6813 and consent of instructor]. Six hours laboratory, Interactive multimedia and electronic publication for fine and applied arts using desktop computers. Course encourages analysis and criticism of aesthetic, social, ethical and related issues.

ART 4833/6833. Computer Animation I. (3) [Prerequisite: Consent of instructor]. Six hours lecture and laboratory. An introduction to Computer Animation. Basic concepts in the building of 3D objects, color, texture mapping, lighting, ray-tracing, and the writing of motion data.

ART 4843/6843. Computer Animation II. (3) [Prerequisites: ART 4833/6833 and permission of instructor]. Six hours lecture and lab. Advanced techniques and special effects: customizing directory structures in the unix environment, combining modeling techniques, animation of object attributes, and creation of motion data.

ART 4853/6853. Electronic Imaging. (3) [Prerequisites: ART 1213 and ART 1223 or equivalent]. Six hours lecture and lab. Instruction in the automation of traditional illustration techniques. Both raster and vectored files are created and used with a variety of hardware peripherals. Fall Semester.

ART 4863/6863. Advanced Studio - Computer Art and Design. (3) May be taken for credit more than once. [Prerequisite: Consent of instructor]. Six hours laboratory. This course develops advanced studio skills and professional practice. Course encourages analysis and criticism of aesthetic, social, ethical and related issues.

ART 4873/6873. Digital Imaging I. (3) [Prerequisite: ART 3103 and ART 2803, or consent of instructor] Six hours laboratory. Application of computer software to generate electronic images captured by tra-
ART 4990/6990. Special Topics in Art. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

ART 6683. Introduction to Animation/Multimedia. (3) (Prerequisite: Acceptance into the MFA program in Art or the MS program in Architecture, or consent of instructor). One hour lecture. Five hours studio. Introduction to basic animation and multimedia principles and practice.

ART 6763. Sequential Art I. (3) Six hours studio. Readings on sequential art and the history of traditional and computer animation inform students working in traditional forms and techniques of temporal composition.

ART 7000. Directed Individual Study. Hours and credits to be arranged.

ART 8013. Computer Animation III. (3) (Prerequisite: ART 6833 and ART 6843). Six hours studio. Image processing, compositing, and managing complexity with basic programming techniques for computer-generated images and animations.

ART 8023. Computer Animation IV. (3) (Prerequisites: ART 6833, ART 6843, and ART 8013). Six hours studio. Based upon readings within the historical, critical, philosophical and theoretical contexts of computer graphics, animation and art, students focus on content development in their work.

ART 8033. Experimental Animation. (3) (Prerequisites: ART 6873, ART 6763, ART 8043 or consent of instructor). One hour lecture. Four hours laboratory. Individual projects extend the technical palette and visual vocabulary of the experimental animator, with emphasis on the maturation of personal vision/aesthetic.

ART 8123. Multimedia Installation and Performance. (3) (Prerequisite: ART 8103 or consent of instructor). One hour lecture. Five hours studio. Coursework relates advanced interactivity concepts in computer-based multimedia to the broader context of performance art and installation for alternate as well as gallery settings.

ART 8163. Advanced Digital Imaging. (3) Six hours studio. Application of existing software to generate electronic images captured by traditional and non-traditional photographic means.

ART 8603. Advanced Figurative Studio. (3) (Prerequisite: Six hours undergraduate life drawing courses or consent of instructor). Six hours studio. An advanced studio course in drawing, painting, and/or digital media utilizing the human figure as subject.

ART 8990. Special Topics in Art. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).
ASE 3123. Static Stability and Control. (3) (Prerequisites: ASE 2013, EM 2433). Three hours lecture. Longitudinal, directional, and lateral static stability and control; related aerodynamics; maneuvering flight; control effects on dynamic stability and control analysis methods; general equation of unsteady motion.

ASE 3223. Aircraft Structures II. (3) (Prerequisite: EM 3213). Three hours lecture. Stress analysis of elastic and inelastic structures under different loading conditions. Shear flow distribution in thin-wall structures. Design on stress and shear flow distributions.

ASE 3313. Incompressible Aerodynamics. (3) (Prerequisite: EM 3132). Three hours lecture. Potential theory of bodies; airflow theory and applications; finite wing theory and applications; introduction to Navier-Stokes equations; laminar boundary layers; turbulent boundary layers.

ASE 3333. Gas Dynamics. (3) (Prerequisites: MA 2733, PH 2213). Three hours lecture. Energy; First and Second Laws of Thermodynamics; Entropy; Properties of Ideal Gases; One-dimensional Compressible Flow; Normal Shocks; Reactive Mixtures.

ASE 4000. Directed Individual Study. Hours and credits to be arranged.

ASE 4113. Aerospace Engineering Laboratory I. (3) (Prerequisite: Consent of instructor). Six hours laboratory. Experimental techniques used in aerospace engineering; course requirements include individual research and formal research papers.

ASE 4123. Dynamic Stability and Control. (3) (Prerequisite: ASE 3123). Three hours lecture. Methods of dynamic analysis; stability of steady flight; response to actuation of the controls (open loop); closed-loop control; human pilots and handling qualities.

ASE 4133/6133. Automatic Control of Aerospace Vehicles. (3) (Prerequisite: ASE 4123). Three hours lecture. Optimization techniques; structural flexibility effects; statistical design; sample-data control systems.

ASE 4143. Astrodynamics I. (3) (Prerequisites: EM 2433, MA 3253). Three hours lecture. Particle mechanics; Keplerian mechanics; geometry of spatial orbits; orbit determination; orbits determined from relative velocity; elements of analytical dynamics.

ASE 4223/6223. Structural Dynamics. (3) (Prerequisite: EM 3413). Three hours lecture. Influence coefficients; matrix methods; Lagrange's equations of motion; divergence of an airfoil; introduction to flutter.

ASE 4343. Compressible Aerodynamics. (3) (Prerequisites: ASE 3333, EM 3133). Three hours lecture. Equations of motion for multidimensional flow; oblique shock waves; Prandtl-Meyer flow; internal flow; method of characteristics; linearized flows; compressible wing theory; compressible boundary layers.

ASE 4413. Aerospace Propulsion. (3) (Prerequisites: ASE 3333 and ASE 4143). Three hours lecture. Elements of aerothermodynamics of aircraft and rocket engines; propellers; nozzles; engines; turbines; compressors; diffusers; liquid propellants, solid propellants, rocket engine design.

ASE 4423/6423. Introduction to Computational Fluid Dynamics. (3) (Prerequisite: Consent of instructor). Three hours lecture. Elements of computational fluid dynamics (CFD); review of numerical analysis and fluid mechanics as pertinent to CFD; numerical solution of selected fluid dynamic problems.

ASE 4433/6433. Fundamentals of Numerical Grid Generation. (3) (Prerequisite: Consent of instructor). Three hours lecture. Discrete representation of partial differential equations and applications of grid generation in their computer-oriented solutions; coordinate transformations, computer geometry design techniques.

ASE 4613. Systems Design. (3) (Prerequisites: ASE 4343, ASE 4123, ASE 3213). Two hours lecture, three hours laboratory. Problem synthesis, layout; weight analysis; aerodynamics; parameters; thermal environment; propulsion analysis; human factors; structural analysis; system optimization; cost effectiveness.

ASE 4713/6713. Engineering Acoustics. (3) (Prerequisite: EM 3413 or consent of instructor). Three hours lecture. Sonics, ultrasonics, wave equation, plane and spherical waves, wave propagation in air, liquid, elastic solids, reflection phenomena, absorption, scattering, acoustical sources and sensors, engineering applications.

ASE 4721. Aerospace Engineering Laboratory II. (1) (Prerequisite: ASE 4113). Three hours laboratory. Experimental techniques used in aerospace engineering.

ASE 4990/6990. Special Topics in Aerospace Engineering. (1-3) (Prerequisite: Consent of instructor). Three hours lecture. Perturbation theory for wings and bodies; optimum wing and body shapes; wing-body interference; transonic flows, hypersonic flows.

ASE 5333. Physical Gasdynamics. (3) (Prerequisites: ASE 4343 and consent of instructor). Three lecturers. Real gas effects, equilibrium and non-equilibrium processes in fluid dynamics. Elements of chemical thermodynamics, kinetic theory, statistical mechanics, hypersonic gasdynamics.

ASE 8000. Thesis Research/Thesis. Hours and credits to be arranged.

ASE 8113. Advanced Guidance and Control of Vehicles. (3) (Prerequisite: Consent of instructor). Three hours lecture. Trajectory aspects of guidance; sensors for aerospace vehicle guidance; satellite dynamics; passive and active satellite control; boost glide and re-entry guidance and control.

ASE 8313. Advanced Compressible Aerodynamics I. (3) (Prerequisites: ASE 4343 or equivalent). Three hours lecture. Derivation of complete equations for compressible fluid flow; unsteady one-dimensional flows; method of characteristics; flow about two-dimensional, and axisymmetric shapes; integral methods.

ASE 8323. Advanced Compressible Aerodynamics II. (3) (Prerequisite: ASE 8313). Three hours lecture. Perturbation theory for wings and bodies; optimum wing and body shapes; wing-body interference; transonic flows, hypersonic flows.

ASE 8343. Incompressible Viscous Laminar Flow. (3) (Prerequisite: Consent of instructor). Three hours lecture. Incompressible Navier-Stokes equations; properties and exact solutions; laminar boundary layer equations; two- and three-dimensional dependent solutions; approximate solutions; boundary layer control.

ASE 8353. Turbulent Flow. (3) (Prerequisite: ASE 8343). Three hours lecture. Origins of turbulence: stability statistical theory of turbulence; isotropic and non-isotropic turbulence; equations of turbulent flow; turbulent boundary layer; free turbulent flow.

ASE 8363. Computational Heat Transfer. (3) (Prerequisite: Consent of Instructor). Three hours lecture. Application of numerical techniques to elliptic and parabolic problems in engineering heat transfer and fluid flow. Discretization techniques; linearization, stability analysis. (Same as ME 8363).

ASE 8413. Computational Fluid Dynamics I. (3) (Prerequisite: Consent of instructor). Three hours lecture. Review of relevant numerical analysis; one dimensional methods; compressible inviscid methods, Euler Equation methods, inviscid-viscous interaction methods; current literature.

ASE 8423. Computational Fluid Dynamics II. (3) (Prerequisite: ASE 8413 or equivalent). Three hours lecture. Compressible viscous methods; Navier-Stokes equation methods; turbulence models; incompressible methods; panel methods; finite element methods, current literature.

ASE 8533. Advanced Numerical Grid Generation. (3) (Prerequisite: ASE 4433/6433 or consent of instructor). Three hours lecture. Structured-unstructured hybrid composite grid configurations, truncation error analysis, direct-indirect grid generation methods, grid refinement, adaptive gridding.

ASE 8990. Special Topics in Aerospace Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).
ASE 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

Department of BIOCHEMISTRY and MOLECULAR BIOLOGY

Office: 402 Dorman Hall

Professors Boyle (Head), Luthe, Ma, Reichert, Wilson and Wood; Associate Professor Willeford; Assistant Professors Jung and Peng

(Courses limited to two offerings under one title within two academic years).

BCH 1001. Introduction to Biochemistry. (1) One hour lecture.

A course to acquaint the beginning students with the overall concepts of biochemistry and molecular biology. Current research will be described. Offered every year.

BCH 2990. Special Topics in Biochemistry. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

BCH 3613. Elementary Biochemistry. (3) (Prerequisite: CH 2503). Three hours lecture. A terminal course which deals with a study of the structural and metabolic relationships of carbohydrates, lipids, proteins, nucleic acids, enzymes, and vitamins.

BCH 3901. Senior Seminar. (1) (Prerequisite: BCH 4613/6613). Each student will prepare and present a formal paper based on independent study of the literature and undergraduate research investigations.

BCH 4000. Directed Individual Study. Hours and credits to be arranged.

BCH 4414/6414. Radioisotope Techniques I. (4) Two hours lecture. Four hours laboratory. Characteristic of radioisotopes; detection and counting techniques and instrumentation; tracer techniques; health and safety systems.

BCH 4603-4613/6603-6613. General Biochemistry. (3-3) (Prerequisite: BCH 4603/6603 must be completed before student may enroll in BCH 4613/6613. Detailed studies of the structure and metabolism of carbohydrates, lipids, proteins, nucleic acids, enzymes, and coenzymes.

BCH 4623/6623. Biochemistry of Specialized Tissues. (3) (Prerequisite: Coregistration in BCH 4613/6613). A study of both prokaryotic and eukaryotic cells. Offered fall semester. (Same as GNS 4623). Three hours lecture. Ten hours laboratory. A comprehensive course to teach the student the modern methods of biochemistry including molecular biology. (Same as GNS 4623/6623). Three hours lecture. A study of specialized tissues, hormones, acid-base balance in animals and other physiological parameters of biochemistry.

BCH 4713/6713. Molecular Biology (3) (Prerequisite: BCH 4613/6613). Three hours lecture. A study of basic molecular processes such as synthesis of DNA, RNA, and protein in both prokaryotic and eukaryotic cells. Offered fall semester. (Same as GNS 5713).

BCH 4805/6805. Biochemical Methods. (5) (Prerequisite: Coregistration in BCH 4613/6613). One hour lecture. Eight hours laboratory. A comprehensive course to teach the student the modern methods of biochemistry including molecular biology. (Same as GNS 4805/6805).

BCH 4990/6990. Special Topics in Biochemistry. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses.

Department of BIOLOGICAL SCIENCES

Office: 130 Harned Biology Building

Professors Altig, Brown, Buddington, Chambers*, Champlin, Diehl, Dorough, Downer (Head), McDaniel, St. Cyr Coats, Sullivan, and Wise;

Associate Professors Thibaudeau and Williams

Assistant Professors Courcelle, Pinchuk, Price, Rooney, and Welborn

Instructors Fuquay, Holder and Williamson

BIO 1001. Biology Laboratory. (1) Three hours laboratory. Accompanies BIO 1033. May be used also as AP credit to satisfy one hour Biology, Botany, or Zoology laboratory. Selected exercises to illustrate fundamental concepts of biology.

BIO 1004. Anatomy and Physiology. (4) Three hours lecture. Two hours laboratory. For non-science majors. The structure and function of the human body with special emphasis on the muscular, nervous, circulatory, respiratory, digestive, urinary and reproductive systems. (Fall and Spring).

BIO 1023. Plants and Humans. (3) Two hours lecture. Two hours laboratory. For non-science majors. Students may not have credit for both BIO 1023 and BIO 1203 nor for both BIO 1023 and BIO 1033, nor for both BIO 1023 and general biology courses transferred from other institutions. A survey of botany intended to introduce students to the world of plants, particularly emphasizing their relationships with humans and society. (Fall and Spring).

BIO 1033. Biological Science. (3) Three hours lecture. Students may not have credit for both BIO 1033 and BIO 1023, nor for both BIO 1033 and BIO 1123. Basic principles and modern concepts pertaining to levels of biological organization from cell to biosphere and life forms of biological kingdoms.

BIO 1053. Introduction to Natural History. (3) Two hours lecture. Three hours laboratory. For Elementary Education majors. Introduction to the ecosystems and ecological processes while learning to identify plants and animals of Mississippi.

BIO 1063. Natural History of Coastal Environments. (3) Two hours lecture. Three hours laboratory. Introduction to the flora and fauna of coastal areas and interactions between living and non-living components of the ecosystem.

BIO 1123. Animal Biology. (3) Two hours lecture. Two hours laboratory. For non-science majors. Students may not have credit for both BIO 1123 and BIO 1504. Basic understanding of life processes, diversity, inheritance, reproduction, ecology, and evolution. (Fall and Spring).

BIO 1143. Community Health. (3) Three hours lecture. An in-depth study of factors affecting community health including disease, drugs, pollution, immunity, nutrition, heredity and socioeconomic conditions.
BIO 1203. Plant Biology. (3) Two hours lecture. Three hours laboratory. (Students may not have credit for both BIO 1023 and BIO 1203.) An introduction to the biology of flowering plants. Topics include plant physiology, anatomy and morphology, development, genetics and evolution. (Offered each semester).

BIO 1213. Survey of Plant and Fungi Kingdoms. (3) Two hours lecture. Three hours laboratory. A survey of algae, bryophytes, vascular plants, and fungi, with emphasis on morphology, internal anatomy, life cycles, fossil record, and evolutionary relationships. (Spring).

BIO 1301. Perspectives in Medical Technology. (1) One hour lecture. A survey of all aspects of medical technology. (Fall).

BIO 1504. Principles of Zoology. (4) Three hours lecture. Three hours laboratory. For science majors. Students may not have credit for both BIO 1123 and BIO 1504. Introduction to animal biology, including genetics, embryology, physiology, cell biology, ecology and behavior. (Fall and Spring).

BIO 2004. Human Anatomy. (4) Three hours lecture. Three hours laboratory. The study of the structure of the human body. The gross and microscopic anatomy of each organ system will be presented. (Fall and Spring).

BIO 2101. Cell Biology Laboratory. (1) (Prerequisites: Sophomore standing and credit for concurrent enrollment in BIO 2103). Two hours laboratory. Laboratory to accompany BIO 2103. (Fall).

BIO 2213. Survey Plant Kingdom. (3) Two hours lecture. Two hours laboratory. A survey of algae, bryophytes, vascular plants, and fungi, with emphasis on morphology, internal anatomy, life cycles, fossil record, and evolutionary relationships. (Spring).

BIO 2503. Environmental Quality. (3) (Prerequisite: One course in biology). Three hours lecture. Relevance of ecological principles to environmental problems and relationships of humans with their environment with a focus on the conservation of energy and material. (Fall).

BIO 2990. Special Topics in Biology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

BIO 3013. Professional Writing for Biologists. (3) (Prerequisite: Junior/Senior standing in BIO, MIC, or MDT, or consent of instructor). Three hours lecture. Refinement of writing skills for more effective communications. Assignments to include routine and specialized correspondence, technical reports, and speech preparation and delivery. (Fall/Spring).

BIO 3103. Genetics I. (3) (Prerequisites: MA 1313, BIO 1504 or BIO 1203, or equivalents). (Same as PO 3103 and GNS 3103).

BIO 3104. Ecology. (4) (Prerequisite: BIO 1504). Three hours lecture. Three hours laboratory. A general survey of ecological principles and concepts pertaining to plants and animals with reference to ecosystem structure and function, and interactions among ecosystem components. (Fall).

BIO 3113. Marine Biology. (3) (Prerequisite: BIO 1504 or equivalent). Three hours lecture. An introduction to marine environments, the diversity of life in the different marine habitats and human utilization of marine resources. (Spring)

BIO 3303. Parasitology. (3) (Prerequisite: BIO 1504 or equivalent). Two hours lecture. Three hours laboratory. A survey of parasitology to include parasites of importance to the health of humans and domestic animals. (Fall).

BIO 3304. General Microbiology. (4) (Prerequisites: CH 1053 or CH 1223). Two hours lecture. Four hours laboratory. For science majors. Fundamentals; techniques in staining and culture of microorganisms. (Fall/spring).

BIO 3403. Parasitology. (3) (Prerequisite: BIO 1504 or equivalent). Two hours lecture. Three hours laboratory. A survey of parasitology to include parasites of importance to the health of humans and domestic animals. (Fall).

BIO 3404. Bacterial Cultivation. (4) (Prerequisites: BIO 3304 and CH 4513 or coregistration in CH 4513). Two hours lecture. Four hours laboratory. A continuation of 3304. General principles of microbiology with emphasis on cultivation of bacteria. (Fall/Spring).

BIO 3504. Comparative Anatomy. (4) (Prerequisite: BIO 1504). Two hours lecture. Six hours of laboratory. The vertebrate animals; relationships of organs and systems; and their phylogenetic significance. (Fall).

BIO 3514. Invertebrate Zoology. (4) (Prerequisite: BIO 1504). Three hours lecture. Three hours laboratory. Invertebrate organisms with emphasis on structure, function, taxonomy, phylogeny and life histories. (Spring, odd years).

BIO 3524. Biology of Vertebrates. (4) Two hours lecture, three hours laboratory. Evolution, systematics, ecology and behavior of vertebrates. Laboratory includes classification of major groups, identification of species, field trips, and experiments in behavior and physiological ecology. (Spring).

BIO 4000. Directed Individual Study. Hours and credits to be arranged.

BIO 4011. Senior Thesis in Biological Sciences. (1) (Prerequisites: BIO 4013 with a grade of B or better and consent of department head and thesis committee). Writing of the undergraduate thesis under the direction of the major advisor. (Fall/Spring).

BIO 4013. Senior Research in Biological Sciences. (3) (Prerequisites: Senior standing, consent of department head, 3.00 GPA in biology courses, and major in biological sciences). Conduct original research for eventual writing of undergraduate thesis.

BIO 4100. Med Tech Clinicals. (3-19) (Prerequisite: consent of instructor). Medical Technology Clinical Internship.

BIO 4103/6103. Experimental Genetics. (3) (Prerequisites: BIO 3304 or consent of instructor). Six hours laboratory. Mechanisms of transmission of genetic information with first-hand experience in inducing such mechanisms from experimental data. Emphasis is on lab. (Fall/Spring).

BIO 4113/6113. Evolutionary Biology. (3) Three hours lecture. Historical development of evolutionary theory; variation and natural selection in populations; speciation; current concepts of phylogeny and systematics. (Fall).

BIO 4114/6114. Cellular Physiology. (4) (Prerequisites: Seven hours of zoology and two semesters of organic chemistry). Three hours lecture. Three hours laboratory. A study of the morphology and function of the cell. (Same as PHY 6114).

BIO 4133/6133. Human Genetics. (3) (Prerequisites: BIO 1504 or consent of instructor). Three hours lecture. Principles of Mendelian and molecular genetics as applied to humans. Description and causes of human genetic diseases and other anomalies. (Same as GNS 4133/6133).

BIO 4163/6163. Bryology. (3) (Prerequisites: BIO 1203 and BIO 2213). One hour lecture. Four hours laboratory. Taxonomy of bryophytes; collection and identification of local hepatics and mosses. (Spring, even years).

BIO 4203/6203. Taxonomy of Spermatophytes. (3) (Prerequisites: BIO 1203 and BIO 2213). Two hours lecture. Three hours laboratory. Classification and nomenclature of seed plants; introductory methods of collection; laboratory studies of representative plant families. (Fall/Spring).

BIO 4204/6204. Plant Anatomy. (4) (Prerequisites: BIO 1203 and BIO 2213). Two hours lecture. Four hours laboratory. Structure and development of cell types, tissues, roots, stems, leaves, flowers, and fruits of seed plants, with emphasis on angiosperms. (Fall, even years).

BIO 4213/6213. Plant Ecology. (3) (Prerequisite: BIO 4203). Two hours lecture. Three hours laboratory. Plant behavior in relation to environment; developmental variations; successional trends; stabilization of plant communities. (Fall).

BIO 4214/6214. General Plant Physiology. (4) (Prerequisites: BIO 1203 and CH 1213). Three hours lecture. Three hours laboratory. Chemical and physical activities of the plant; absorption; transpiration; mineral nutrition; photosynthesis; translocation; growth processes. (Fall).

BIO 4223/6223. Freshwater Algae. (3) (Prerequisites: BIO 1203). Two hours lecture. Three hours laboratory. Cytology, morphology, physiology, reproduction and ecology of major groups of freshwater algae; laboratories emphasize identification of common freshwater algal genera.

BIO 4303/6303. Bioinstrumentation. (3) (Prerequisite: BIO 4304/6304). Two hours lecture. Laboratory to accompany BIO 4304/6304. Theory and practical application of electrical, optical and other instruments employed in microbiology and medical technology. (Spring).

BIO 4304/6304. Quantitative Methods I. (4) Two hours lecture. Two hours laboratory. Application of mathematical and statistical techniques to problem solving in the laboratory. (Fall).

BIO 4314/6314. Quantitative Methods II. (4) (Prerequisite: BIO 4304/6304). Two hours lecture. Four hours laboratory. Theory and application of selected clinical laboratory methods. (Sprin.

BIO 4324/6324. Soil Microbiology. (4) (Prerequisite: BIO 3304). Three hours lecture. Three hours laboratory. Soil microorganisms and their importance in ammonification, nitrification, and other biological processes. (Spring). (Same as PSS 4314)
BIO 4403/6403. Anaerobic Microbiology. (3) (Prerequisite: BIO 3304). One hour lecture. Four hours laboratory. A study of the physiology and ecology of anaerobic microorganisms. Primary focus will be on the fermentation and photosynthesis of microorganisms, and studying anaerobes.

BIO 4404/6404. Environmental Microbiology. (4) (Prerequisite: BIO 3304). Two hours lecture. Four hours laboratory. Terrestrial, aquatic, and subsurface microbial ecosystems. Microbiology of water and wastewater treatment, solid waste disposal, land farming, impact of hazardous waste, and environmental reclamation. Spring/odd years.

BIO 4405/6405. Pathogenic Microbiology. (5) (Prerequisite: BIO 3304). Three hours lecture. Four hours laboratory. The microorganisms producing disease in man and lower animals; means of transmission; protection against disease. (Fall/Spring).

BIO 4413/6413. Immunology. (3) (Prerequisite: BIO 3304 and CH 4515). Three hours lecture. Survey of the functions of the immune system. Emphasis on mammalian immunology, including T- and B-cell interactions in humoral and cell mediated immunity. (Fall).

BIO 4414/6414. Microbiology of Foods. (4) (Prerequisite: BIO 3304). Two hours lecture. Four hours laboratory. Isolation and classification of the microorganisms associated with spoilage of commercial and domestic preserved foods. Same as FST 4414/6414. (Spring).

BIO 4433/6433. Principles of Virology. (4) (Prerequisites: BCH 4603 and BIO 3103 or equivalents). Three hours lecture. Principles of viral infection, multiplication, and chemical constitution.

BIO 4443/6443. Bacterial Genetics. (3) (Prerequisites: BCH 4603, BIO 3304 or consent of instructor). Three hours lecture. The genetics of bacterial plasmids and viruses including replication, rearrangement, repair, transfer, regulation, and methods of manipulation and analysis of DNA. (Fall)

BIO 4453/6453. Petroleum Microbiology. (3) (Prerequisite: BIO 3304). Two hours lecture. Two hours laboratory. Geomicrobiological processes, desulfurization of oil, disposal of refinery wastes, conversion of oil to other products, secondary recovery and petroleum origin.

BIO 4463/6463. Bacterial Physiology. (3) (Prerequisites: BIO 3404 and BCH 4603). Three hours lecture. Structure and function relationships and major aerobic and anaerobic metabolic pathways in microorganisms. (Fall).

BIO 4502/5502. Toxicology. (2) (Prerequisite: 8 hours biological sciences and 8 hours chemistry [cell biology/physiology and biochemistry recommended]). Two hours lecture. An introduction to the field of toxicology, including discussion of absorption, metabolism, mode of action (acute and chronic), environmental effects, and toxicity testing.

BIO 4503/5503. Vertebrate Histology. (3) (Prerequisite: BIO 1504). Two hours lecture. Three hours laboratory. Study of the microscopic anatomy, structure, and function of major cell types and tissues. (Fall).

BIO 4504/5504. Comparative Vertebrate Embryology. (4) (Prerequisites: Two hours lecture. Six hours laboratory. The embryology of the vertebrates; the fertilization of the egg; stages of cleavage and the development of organs and systems. (Spring).

BIO 4513/5513. Ichthyology. (3) (Prerequisite: BIO 1504 or equivalent). Two hours lecture. Three hours laboratory. Structure, evolution, classification, and life histories of fishes of the world with emphasis on North American forms. (Fall).

BIO 4514/5514. Animal Physiology. (4) (Prerequisites: Ten hours of zoology and organic chemistry). Three hours lecture. Three hours laboratory. Function and interrelationship of the systems of the body. (Spring). (Same as PHY 6514).

BIO 4523/6523. Mammalogy. (3) (Prerequisite for undergraduates: BIO 3524 or equivalent). Two hours lecture. Three hours laboratory. Evolution, systematics, and ecology of mammals, with emphasis on North American groups. (Fall).

BIO 4533/6533. Animal Behavior. (3) (Prerequisites: Twelve hours of biology and junior or senior standing). Three hours lecture. A comprehensive introduction to the study of behavior with emphasis on concepts, mechanisms and evolutionary principles. (Spring, even years).

BIO 4543/6543. Ornithology. (3) (Prerequisites: Eight hours of zoology). Two hours lecture. Three hours laboratory. Recent and fossil avifauna of the world; its origin, distribution, classification, and biology. (Spring).

BIO 4703/6703. Field Zoology for Teachers. (3) (Prerequisite: 6 hours of biology). Two hours lecture. Three hours laboratory. A survey of the diversity of animals and field techniques for studying them; emphasis include southeastern fauna and use of animals in the classroom. (Summer). Note: Will not satisfy any Arts and Sciences core requirement. (Summer).

BIO 4713/6713. Field Botany for Teachers. (3) (Prerequisite: Three hours of biology). Two hours lecture. Three hours laboratory. Plants in their natural habitats with emphasis on identification, ecological associations, life histories and importance to man and other organisms. (Summer). Note: Will not satisfy any Arts and Sciences core requirement.

BIO 4990/6990. Special Topics in Biology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer development subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

BIO 8011. Seminar. (1) One hour. Required once of each on-campus M.S. or Ph.D. student. Formal oral presentation of current topics in biology.

BIO 8013. Scientific Writing for Biological Scientists. (2) Three hours lecture. Preparation of the journal article, thesis, and dissertation; searching the literature; scientific illustration; oral presentation of a scientific paper. (Spring).

BIO 8022. Practical Research Practices. (2) Two hours lecture. Preparation of proposals for research grants and contracts; business management, fiscal considerations, patents. (Spring, even years).

BIO 8044. Transmission Electron Microscopy. (4) (Prerequisite: Consent of instructor). One hour lecture. Six hours laboratory. Introduction to the transmission electron microscope, tissue preparation, ultra-microscopy, and associated techniques. (Same as EPP 8144).

BIO 8103. Advanced Ecology. (3) (Prerequisite: BIO 3104). Two hours lecture. Three hours laboratory. Selected topics with special references to bioenergetics, population and human ecology, with student research project. (Fall, odd).

BIO 8104. Experimental Molecular Biology. (4) (Prerequisite: Consent of instructor). One hour lecture. Six hours laboratory. Practical experience with the molecular analysis of gene function.

BIO 8113. Biogeography. (3) Three hours lecture. Study of the geographic distribution of life. Emphasis placed on climatic, geologic, and human influence, dispersal mechanisms and evolutionary history. (Fall, even years).

BIO 8123. Physiological Ecology. (3) (Prerequisite: BIO 4514 or equivalent). Three hours lecture. A discussion of cell cycle and division, meiosis, cytosome, motility, membrane potentials, excitability, intercellular communication, cellular recognition and adhesion, and cellular evolution. (Spring, odd years).

BIO 8203. Embryology of Seed Plants. (3) (Prerequisites: BIO 1203 and BIO 2213). Two hours lecture. Three hours laboratory. Development of pollen, ovules, embryos, endosperm; pollution and fertilization, incompatibility, and fruit development. (Spring, even years).

BIO 8213. Plant Water and Mineral Relations. (3) (Prerequisite: BIO 1203). Three hours lecture. Membrane structure and functions; plant and soil water relationships; absorption; translocation; transpiration; iron transport and mineral nutrition. (Spring).

BIO 8214. Advanced Taxonomy. (4) (Prerequisites: BIO 4203). Two hours lecture. Four hours laboratory. Field and laboratory studies of categories: legumes, and composites: taxonomy, nomenclature, and phylogeny of the Pteropsida: herbarium techniques. (Fall, even years).

BIO 8223. Plant Metabolism. (3) (Prerequisites: BIO 4214 and organic chemistry). Three hours lecture. Photosynthesis, respiration, nitrogen metabolism, and other metabolic processes. (Fall).

BIO 8315. Immunological Techniques. (5) Two hours lecture. Six hours laboratory. An in-depth course to teach the student a variety of modern methods of immunology.

BIO 8403. Advanced Microbial Physiology. (3) (Prerequisite: BIO 4463 or the equivalent). Three hours lecture. Discussion of current concepts regarding the molecular basis of prokaryotic macromolecular biosynthesis and cell division and susceptibility of such processes to inhibition by antibiotics. (Spring, odd years).

BIO 8405. Advanced Immunology. (5) Two hours lecture. Six hours laboratory. Advanced theory and techniques in immunology. (Spring, even).

BIO 8453. Advanced Virology. (3) (Prerequisite: Cell Biology or equivalent). Three hours lecture. Literature survey in virus research. (Fall, odd).

BIO 8463. Advanced Bacterial Genetics. (3) (Prerequisites: BCH 4713 or BIO 4443, or consent of instructor). Three hours lecture. Discussion of current concepts of genetic transfer and regulation in various bacteria. Emphasis will be on use of genetics as an experimental tool. (Fall, even).

BIO 8703. Advances in Population Biology for Teachers. (3) Three hours lecture. Basic concepts of evolutionary and environmental biology. Discussion will emphasize fundamental principles, recent developments in the field, and relevance to human affairs.
BIO 8713. Advances in Organismal Biology for Teachers. (3) For Teachers. Three hours lecture. Concepts of biology at the organismal level. Discussion of fundamental principles and advances in systematics and diversity of life, body organization, function, reproduction, and development.

BIO 8733. Biological Techniques for Teachers. (3) For Teachers. Six hours laboratory. Laboratory aspects of biological study with emphasis on experimentation, data collection, quantitative analysis, interpretation, graphical presentation, and specimen collections.

BIO 8990. Special Topics in Biology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

Off Campus

The courses listed below are offered during the year of clinical training at affiliate hospitals. (See list of affiliate hospitals.)

Offered during the Summer at Gulf Coast Research Laboratory.

BIO 4336/6336. Marine Invertebrate Zoology II. (6) (Prerequisites: Sixteen hours of zoology and junior standing). Same as GCRL Zoology 361B. All phyla from Ollusca through protocorallines are covered in this course.

BIO 4435/6435. Marine Ecology. (5) (Prerequisite: Sixteen hours of biology including general botany and invertebrate zoology). Same as GCRL Zoology 452. A consideration of the relationships of marine organisms to their environment.

BIO 4526/6526. Marine Aquaculture. (6) (Prerequisites: General zoology, invertebrate and vertebrate zoology, or consent of instructor). Same as GCRL Zoology 464. A course designed to acquaint advanced biology students with the science of marine aquaculture.

BIO 4602. Urinalysis. (2) (Prerequisite: Completion of all preprofessional requirements). One hour lecture. Two hours laboratory. A study of urine as a diagnostic tool. (Spring).

BIO 4606. Clinical Microbiology. (6) (Prerequisite: Completion of all preprofessional requirements). Three hours lecture. Six hours laboratory. Isolation and identification of micro-organisms from clinical specimens. Includes bacteriology, virology, mycology and parasitology. Second summer term.

BIO 4608. Hematology. (8) (Prerequisite: Completion of all preprofessional requirements). Four hours lecture. Eight hours of laboratory. Normal and abnormal blood and bone marrow cells. Coagulation mechanisms. (Spring).

BIO 4612. Special Topics. (2) (Prerequisite: Completion of all preprofessional requirements). Four hours lecture or laboratory. An assigned project as determined by the needs or interests of the student. (Spring).

BIO 4614. Serology and Immunology. (4) (Prerequisite: Completion of all preprofessional requirements). Two hours lecture. Four hours laboratory. A study of the immune system of the human body. Diagnostic procedures using antigen-antibody reactions. (Fall).

BIO 4616. Immunohematology. (6) (Prerequisite: Completion of all preprofessional requirements). Three hours lecture. Six hours laboratory. Blood group serology, compatibility testing, and identification of atypical antibodies. Transfusion practices and blood group immunogenetics. First summer term.

BIO 4618. Clinical Chemistry. (8) (Prerequisite: Completion of all preprofessional requirements). Four hours lecture. Eight hours laboratory. Normal and abnormal human body chemistry. Emphasis on instrumentation. (Fall).

BIO 7000. Directed Individual Study. Same as GCRL Zoology 561. Hours and credits to be arranged. Directed Individual Study courses usually require prerequisites of BIO 4326/6326.

BIO 8000. Thesis Research/Thesis. Same as GCRL Zoology 561. Hours and credits to be arranged.

BUSINESS INFORMATION SYSTEMS

For departmental information, see DEPARTMENT of MANAGEMENT and INFORMATION SYSTEMS.

BIS 1013. Introduction to Business Computer Systems. (3) Two hours lecture. Two hours laboratory. An overview of information systems. Integrating computer hardware, software, data, personnel, and procedures is stressed. Instruction in personal productivity packages and the Internet is provided. (Credit will not be granted for this course and CS 1013 or BIS 3713.)

BIS 1733. Visual Basic Applications. (3) (Prerequisite: a grade of B or above in BIS 1013). Three hours lecture. Introduction to procedural, event and object-oriented programming to develop business and e-commerce applications.

BIS 1753. Introduction to Business Applications Using COBOL. (3) (Prerequisite: a grade of B or above in BIS 1733 or graduate standing). Three hours lecture. Structured program design for business applications. Data editing, table handling, and file processing with sequential and random access files will be stressed.

BIS 2990. Special Topics in Business Information Systems. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

BIS 3233. Introduction to Management Information Systems. (3) (Prerequisites: BIS 1013). Three hours lecture. A survey of the components, actions, and processes of Information Systems as they relate to managing modern organization for increased efficiency and competitiveness.

BIS 3523. Advanced Languages I. (3) (Prerequisites: a grade of B or above in BIS 1753, or graduate standing). Three hours lecture. Current and advanced business programming topics. In-depth experience in programming in one or more current state-of-the-art languages.

BIS 3713. Electronic Information Systems. (3) (Prerequisite: Junior Standing and six hours of mathematics and/or statistics, or consent of instructor). Three hours lecture. Principles of business information systems using computer equipment. Business problem solving, including problem definition, flowcharting, basic programming and input-output design. (Credit for this course may be earned only at the Meridian and Jackson branches of Mississippi State University. Credit will not be granted for this course and BIS 1013 or CS 1013.)

BIS 3753. Business Database Systems. (3) (Prerequisite: a grade of B or above in BIS 1753). Three hours lecture. Introduction to business database applications. Includes data modeling, design techniques, and data collection, storage, manipulation, and retrieval strategies.

BIS 4523/6523. Advanced Languages II. (3) (Prerequisites: BIS 3523). Three hours lecture. Current and advanced business programming topics. In-depth experience in programming in one or more current state-of-the-art languages.

BIS 4525/6525. Advanced Languages III. (3) (Prerequisites: BIS 3523). Three hours lecture. Current and advanced advanced business programming topics. In-depth experience in programming in one or more current state-of-the-art languages.

BIS 4533. Management Support Systems. (3) (Prerequisites: BIS 3525 and BIS 4753). Three hours lecture. Theory and application of decision support, expert systems, and data mining using fifth and sixth generation computing techniques. Hands-on experience in developing management support systems.

BIS 4753. Structured Systems Analysis and Design. (3) (Prerequisite: a grade of B or above in BIS 1753). Three hours lecture. Analysis/design of computer based information systems with emphasis on problem identification, requirements structuring, and solution generation in theory and in a business project.

BIS 4763. Electronic Commerce Seminar. (3) (Prerequisite: Graduating Senior and 15 hours of BIS courses). Three hours lecture. Preparation for 15 careers, management of information systems, technical skill tuning, and technology updates with emphasis on fundamentals of e-commerce technology and e-commerce business models.

BIS 4990/6990. Special Topics in Business Information Systems. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

BIS 7000. Directed Individual Study. Hours and credits to be arranged.

BIS 8000. Thesis Research/Thesis. Hours and credits to be arranged.

BIS 8022. Survey of Management Information Systems. (2) (Prerequisite: Graduate standing). Two hours lecture. Survey of information technology in business including: description and use, development, and management. Some Emphasis placed on effective use of technology-enabled tools.
BIS 8112. Managing Information Technology and Systems. (2) (Prerequisite: BIS 8022 or equivalent). Three hours lecture. Course includes the description, acquisition or development and use of systems from a local and global perspective. Technology-enabled concepts are used for student assignments.

BIS 8113. Management Information Systems. (3) (Prerequisite: BIS 1013). Three hours lecture. Concepts and technology required by managers to interface with an organization’s MIS functions. Impact of various MIS strategies, operations, and controls are developed and evaluated.

BIS 8122. Multimedia Presentation and Communication. (2) (Prerequisite: BIS 8022 or equivalent). Two hours lecture. Emphasis on planning and delivering business presentations enhanced by multimedia. Concepts, design, and experience in developing multimedia presentations. Exposure to interactive multimedia.

BIS 8213. Advanced Systems Analysis and Design. (3) (Prerequisites: Six hours of programming and prerequisite or co-requisite BIS 8112). Three hours lecture. Analysis/design of computer-based information systems using structured methodologies and tools. Emphasis on problem definition, data collection, requirement structuring, solution generation and system design.

BIS 8313. Advanced Database Design Administration. (3) (Prerequisites: BIS 8213, BIS 8413 and BIS 8513.) Three hours lecture. Design and management of local distributed data resources, institutions, database design, definition, creation, maintenance, acquisition and use. Role of Database Administrator.

BIS 8413. Decision Support and Expert Systems. (3) (Prerequisites: Six hours of programming and prerequisite or co-requisite: BIS 8112). Three hours lecture. Analysis of information support systems which serve the manager/user providing quantitative and qualitative based information derived from databases and model bases.

BIS 8513. Business Telecommunications. (3) (Prerequisites: BIS 8213, BIS 8413 and BIS 8613). Three hours lecture. The evaluation, analysis and design of information systems utilizing data communications and networking concepts and techniques. Emphasis is on business applications and related considerations.

BIS 8613. MIS Administration. (3) (Prerequisites: Six hours of programming and prerequisite or co-requisite: BIS 8112). Three hours lecture. Administration of the MIS function in the business enterprise. Emphasis on activity of managing the IS function at all levels of the firm.

BIS 8753. Information Systems Collaborative Project. (3) (Prerequisites: BIS 8213, BIS 8413 and BIS 8613; co-requisites or prerequisites: BIS 8313 and BIS 8513). Three hours lecture. Group experience incorporating knowledge gained in prerequisite courses. Requires team participation using appropriate tools and methodologies in assisting organizations with real-world information systems related needs.

BIS 8990. Special Topics in Business Information Systems. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

BIS 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

BIS 9113. Management Information Systems (MIS) Seminar. (3) (Prerequisite: BIS 8213, BIS 8313). Three hours lecture. Penetrating review of issues, methodologies and new developments in design and operation of management information, decision support, and computer-based decision-making systems.

BIS 9213. Advanced Topics in MIS. (3) (Prerequisite: BIS 8213, BIS 8313). In-depth study of current MIS topics. Emphasis will be on project design and demonstration. Topics will change to reflect new directions in MIS.

BUSINESS LAW

BL 2413. The Legal Environment of Business. (3) Three hours lecture. Environmental study of local, state and federal controls, concepts, and institutions emphasizing social forces shaping business law. Introduces business students to interrelationships of law and society, jurisprudence and business.

BL 4000. Directed Individual Study. (Prerequisite: Junior standing) Hours and credits to be arranged.

BL 4233/6233. Legal Theories of Risk Distribution and Loss Allocation. (3) (Prerequisites: BL 2413 or consent of instructor). Three hours lecture. Economic basis for civil liability for TORT, industrial and insurance and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

BL 4253/6253. Real Estate Law. (3) (Prerequisite: BL 2413 or consent of instructor). Three hours lecture. The legal principles applicable to real estate, including types of ownership and interests, mortgages, restrictions, and regulations.

BL 4263/6263. Environmental Law. (3) Three hours lecture. An introduction to how environmental law interfaces with the legal system. Overview of the major statutes, cases, and regulations pertaining to the environment.

BL 4273/6273. International Business Law. (3) Three hours lecture. An international commercial transactions course emphasizing trade, licensing and investment (contracts, financing, instruments, dispute resolution).

BL 4990/6990. Special Topics in Business Law. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

BL 8112. Law, Business Ethics, and Dispute Resolution. (2) Two hours lecture. Legal and ethical issues faced by the business firm with emphasis on prevention and resolution of disputes, including mediation, negotiation and alternative dispute resolution.

BUSINESS QUANTITATIVE ANALYSIS

BQA 2113. Business Statistical Methods I. (3) (Prerequisite: MA 1463 and BIS 1013, or equivalent). Three hours lecture. Methods of describing numerical data; probability in business decisions; random variables; sampling distributions; introduction to estimation and hypothesis testing; computer statistical packages applied.

BQA 2990. Special Topics in Business Statistics. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

BQA 3113. Introduction to Business Statistical Methods. (3) (Prerequisite: MA 1463 or equivalent). Three hours lecture. Descriptive statistics; measures of central tendency, measures of dispersion, probability, discrete and continuous random variables, sampling, estimation, hypothesis testing, computer statistical packages applied. (Credit for this course may be earned only at the Meridian Campus. Credit will not be granted for this course and BQA 2113 or ST 2113).

BQA 3123. Business Statistical Methods II. (3) (Prerequisite: BQA 2113 or equivalent). Three hours lecture. Reviewing estimation and hypothesis testing; correlation and regression; chi-square tests; analysis of variance; non-parametric concepts; index numbers; time series analysis; computer statistical packages applied.

BQA 4000. Directed Individual Study. (Prerequisite: Junior standing). Hours and credits to be arranged.

BQA 4723/6723. Business Statistics Using Computers. (3) (Prerequisites: BQA 3123 and BIS 1733, or equivalent). Three hours lecture. Designed to provide a better understanding of basic statistical concepts and give students experience in producing information using complex statistical methods and the electronic computer.

BQA 4990/6990. Special Topics in Business Statistics. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).
BQA 7000. Directed Individual Study. Hours and credits to be arranged.

BQA 8000. Thesis Research/Thesis. Hours and credits to be arranged.

BQA 8112. Business Case Analysis Using Statistics. (2) (Prerequisite: BQA 2113 and BQA 3123 or Equivalent and a knowledge of SAS). Two hours lecture. Descriptive statistics, data collection techniques estimation, hypothesis testing, analysis of variance, regression, time series, index numbers, forecasting, statistical process control applied to business case data.

BQA 8563. Business and Economic Forecasting. (3) (Prerequisite: BQA 8443 or equivalent). Three hours lecture. Overview of business and economic forecasting and its place in management decision making; evaluation of forecasting methods; time series analysis using various analytical methods and electronic computer.

BQA 8583. Quantitative Methods for Research in Business. (3) (Prerequisite: BQA 8443). Three hours lecture. Designed to familiarize the graduate student with the fundamentals of scientific research and the classical and modern quantitative methods of analysis useful in business research.

BQA 8990. Special Topics in Business Statistics. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

BQA 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

BQA 9533. Advanced Statistics for Business Decisions. (3) (Prerequisite: BQA 8443). Three hours lecture. Multivariate analysis, multiple regression analysis; multiple discriminant analysis; multivariate analysis of variance and covariance; factor analysis; cluster analysis.

COMMUNITY COLLEGE

(Courses limited to two offerings under one title within two academic years and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

CCL 8113. Community College History/Philosophy. (3) Three hours lecture. Objectives of the community college, philosophical/historical bases, changing roles, issues in higher education/workforce development/economic industry.

Department of CIVIL ENGINEERING

Office: 235 Walker Engineering Building

CE 1003. Introduction to Civil Engineering. (3) Three hours lecture. Introduction to the Civil Engineering profession, career opportunities, and curriculum. Engineering problem-solving, basic computing skills and tools as used in Civil Engineering. Oral, graphic, and written communications.

CE 2214. Surveying. (4) (Prerequisite: Sophomore standing; corequisites: CS 1213, 1233, or 1253 or equivalent). Three hours lecture. Fours hours field and problem work. Fundamentals of field measurements. Theory, selection, and use of surveying instruments; theories used in the adjustment of surveys.

CE 2990. Special Topics in Civil Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

CE 3113. Transportation Engineering. (3) (Prerequisite: Grade of C or better in CE 2214). Three hours lecture. An introduction to the general modes of transportation, the planning processes associated with the modes of transportation and design of transportation facilities.

CE 3414. Soil Mechanics. (4) (Prerequisites: Grade C or better in EM 2413 - EM 3213 corequisites). Three hours lecture. Three hours laboratory. Introduction to soil properties and behavior. Emphasis is placed on understanding soil properties to compressibility and shear strength of soils.

CE 3523. Water Resources Engineering. (3) (Prerequisite: Grade of C or better in EM 3313; co-requisite: CS 1213, 1233, or 1253). Three hours lecture. Hydraulics of closed conduits; groundwater hydraulics; open channel flow; reservoir and storage analysis; hydraulic structures and machinery.

CE 3603. Structural Mechanics. (3) (Prerequisite: Grade of C or better in EM 2413 and EM 3213). Three hours lecture. Analytical and graphical methods of structural analysis; stress diagrams; influence lines; deflection; methods of work, moment distribution and slope deflection.

CE 3824. Environmental Engineering. (4) (Prerequisite: Grade of C or better in EM 3313; credit or current enrollment in IE 4613). Three hours lecture. Three hours laboratory. Emphasis on water supply and treatment, wastewater treatment and disposal, air pollution control and solid waste management.

CE 4000. Directed Individual Study. Hours and Credits to be arranged.
CE 4543/6543. Advanced Reinforced Concrete. (3) (Prerequisite: CE 4633). Three hours lecture. Two-way slab systems, shear walls, retaining walls, bi-axial bending of columns, torsion, brackets and corbels; Conduction to prestressed concrete.

CE 4601. Fundamentals of Structural Design. (1) (Prerequisites: IE 4613; a grade of C or better in CE 3603; corequisite: CE 4623 or CE 4633). Three hours laboratory. Concepts of structural design common to all Civil Engineering structural design courses; advanced load analyses in structural engineering; introduction to structural design software.

CE 4603/6603. Indeterminate Structures I. (3) (Prerequisite: CE 3603). Three hours lecture. A study of the several classical methods frequently used in the analysis and design of indeterminate structures. Introduction to matrix methods of structural analysis.

CE 4623. Steel Structures. (3) (Prerequisite: Grade of C or better in CE 3603; credit or current enrollment in CE 4601). Three hours lecture. Analysis and design of metal structures, with emphasis on members and joints.

CE 4633. Concrete Structures. (3) (Prerequisite: Grade of C or better in CE 3603; credit or current enrollment in CE 4601). Three hours lecture. Theory and problems in the analysis and design of concrete structures.

CE 4653/6653. Timber Design. (3) (Prerequisite: Grade of C or better in CE 3603; credit or current enrollment in CE 4601). Three hours lecture. Engineering properties of wood. Design of wood structural members: wood structural systems.

CE 4663/6663. Matrix Methods of Structural Analysis. (3) (Prerequisite: Credit in CE 4603/6603, or consent of instructor). Three hours lecture. A unified treatment of beams, trusses, frames, and grids. Particular emphasis on stiffness methods.

CE 4673/6673. Bridge Design. (3) (Prerequisite: CE 4601 and CE 4633). Three hours lecture. AASHTO loading specifications. Designs of structural systems commonly used for bridge construction. Comprehensive design assignments for typical bridge layouts.

CE 4683/6683. Advanced Steel Design. (3) (Prerequisite: CE 4623). Three hours lecture. Design theory and practice applied to complex structural steel systems.

CE 4693/6693. Reliability of Structures. (3) (Prerequisite: IE 4613 or credit or current enrollment in CE 4603 or CE 4633, or consent of instructor). Three hours lecture. Introduction to the theory of structural reliability. Topics include probabilistic measures of safety, load models, resistance models, component and system reliability, optimization of design codes.

CE 4703/6703. Construction Engineering and Management. (3) (Prerequisite: Senior standing or consent of instructor). Three hours lecture. Construction contracts and law, cost estimating, and project scheduling.

CE 4713. Forensic Engineering. (3) (Senior standing and consent of instructor). Three hours lecture. The practice of forensic engineering—litigation, arbitration and mediation, failure case studies, investigation of failure, forensic engineering procedures.

CE 4823/6823. Public Health Engineering. (3) (Prerequisite: CE 3824). Three hours lecture. Public health engineering principles for protection against biological and chemical health hazards. Appropriate control methods for rural areas and developing countries.

CE 4843/6843. Advanced Sanitary Analysis. (3) (Prerequisite: CE 3824). Three hours lecture. Introduction to advanced theoretical concepts in sanitary engineering analysis with special emphasis on inorganic, organic, and physical chemistry.

CE 4873/6873. Water and Wastewater Engineering. (3) (Prerequisite: Grade of C or better in CE 3824). Two hours lecture. One hour laboratory. Evaluation of municipal water and waste-water characteristics and flows; application of various unit processes/unit operations for the treatment of municipal water and wastewater.

CE 4893/6893. Hazardous Waste Management. (3) (Prerequisite: Consent of instructor). Three hours lecture. Examination of state-of-the-art technologies available for the handling treatment; storage; and disposal of hazardous waste materials.

CE 4990/6990. Special Topics in Civil Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer credit for courses not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

CE 5000. Directed Individual Study. Hours and credits to be arranged.

CE 8000. Thesis Research/Thesis. Hours and credits to be arranged.

CE 8133. Traffic Flow Theory. (3) (Prerequisite: Consent of instructor). Three hours lecture. An analysis of the engineering and mathematical principles of traffic flow.

CE 8433. Advanced Foundations. (3) (Prerequisite: CE 4433). Three hours lecture. A continuation of CE 3433 with emphasis on unusual soil conditions and foundations.

CE 8453. Physical Properties of Soils. (3) (Prerequisite: CE 3414). Two hours lecture. Three hours laboratory. A study of the physical properties of soil masses as related to foundation engineering.

CE 8563. Groundwater Resource Evaluation. (3) (Prerequisite: CE 3523). Three hours lecture. Groundwater movement: Darcy's law; equations of groundwater flow; confined and unconfined flow; wells and well field analysis; groundwater quality; aquifer management.

CE 8603. Indeterminate Structures II. (3) (Prerequisite: CE 4603/6603). Three hours lecture. Advanced study of classical and modern techniques used in the analysis of complex indeterminate structures.

CE 8613. Advanced Design in Metals. (3) (Prerequisite: CE 4623). Three hours lecture. Principles and methods of design based on the plastic properties of steel.

CE 8643. Prestressed Concrete. (3) (Prerequisite: CE 4633). Three hours lecture. Design of prestressed concrete structures with emphasis on flexural design of beams and slabs. Description of construction materials and methods.

CE 8663. Advanced Computational Methods in Structural Analysis. (3) (Prerequisite: CE 4663/6663 or consent of instructor). Three hours lecture. Advanced computational methods used in the stiffness analysis of two- and three-dimension structures. Programming strategies and techniques used in computer software development.

CE 8693. Advanced Structural Design. (3) (Prerequisites: CE 4623 and CE 4633) Three hours lecture. The analysis and design of complex structural systems. Advanced methods of analysis, including computer methods.

CE 8803. Unit Processes and Operations in Environmental Engineering I. (3) Three hours lecture. Theory and application of physical and chemical unit processes and operations available for the treatment of water and wastewater.

CE 8833. Sludge Treatment and Disposal. (3) (Prerequisites: CE 8803 and CE 8823). Three hours lecture. Basic theory of sludge handling; treatment; disposal, and design application.

CE 8863. Solid Waste Management. (3) (Prerequisite: CE 3824). Three hours lecture. Define and characterize non-hazardous solid wastes and how to minimize, handle, transport, store, recycle and dispose of these materials.

CE 8893. Industrial Waste Management. (3) Three hours lecture. Delineation of industrial wastes; the regulations pertaining to them; and the technologies applied in their being reduced, reused, recycled, treated, and disposed.

CE 8990. Special Topics in Civil Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

CE 8923. Surface Water Quality Modeling. (3) (Prerequisite: Consent of instructor). Development of the mathematical formulations describing the distribution and concentration of conservative and nonconservative pollutants in natural waters.

CE 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.
### Department of CHEMISTRY

Office: 118 Hand Chemical Laboratory

Professors Ambrust, McMahan, Mead (acting Head), Oldham, Wilson, Saebo and Pittman;
Associate Professors Foster, Henry, and Wpf;
Assistant Professors Gwaltney;
Instructor/Lab Coordinator: Holman; Instructor Beard

Only one course from each group may count toward degree:
- CH 1043, 1213; CH 1053, 1223, or 1293; CH 1221 or 1051; CH 2503 or 4513.

**CH 1013. Chemistry.** (3) Three hours lecture. Suitable as a science elective for liberal arts, business, and education students. Cannot be used as a prerequisite for any other chemistry course. Chemistry and its relation to society.

**CH 1043. General Chemistry.** (3) Three hours lecture. The nature of chemistry and its applications. Designed for the student that will not take upper division chemistry courses. CH 1043 will satisfy chemistry prerequisites for CH 1213.

**CH 1051. Experimental Chemistry.** (1) Three hours laboratory. A laboratory to accompany CH 1053. Experiments designed to illustrate the practical aspects of chemistry.

**CH 1053. General Chemistry.** (3) Three hours lecture. The nature of chemistry and its applications. Designed for the student that will not take upper division chemistry courses.

**CH 1211. Investigations in Chemistry.** (1) Three hours laboratory. Accompanies CH 1213. Student must have prior credit or concurrent enrollment in corresponding lecture course. CH 1211 must be completed before student may enroll in CH 1221. Selected experiments to illustrate the fundamentals of chemistry.

**CH 1213. Fundamentals of Chemistry.** (3) [Prerequisites: Placement exam or grade of C or better in CH 1043 and MA 1313 or concurrent enrollment in MA 1313, 1323 or 1713.] Three hours lecture. The principles of atomic and molecular structure, energetics, dynamics, and synthesis as related to chemical systems. Designed as preparation for upper division chemistry courses. Offered each semester.

**CH 1221. Investigations in Chemistry.** (1) Three hours laboratory. Accompanies CH 1223. Student must have prior credit or concurrent enrollment in corresponding lecture course. CH 1211 must be completed before student may enroll in CH 1221. Selected experiments to illustrate the fundamentals of chemistry.

**CH 1223. Fundamentals of Chemistry.** (3) [Prerequisites: CH 1213] Three hours lecture. The principles of atomic and molecular structure, energetics, dynamics, and synthesis as related to chemical systems. Designed as preparation for upper division chemistry courses. Offered each semester.

**CH 1293. Honors in Chemistry.** (3) [Prerequisites: CH 1213; consent of instructor.] Three hours lecture. A course designed for the student with high ability in science. CH 1293 offered Spring semester.

**CH 2313. Quantitative Inorganic Analysis.** (3) [Prerequisites: CH 1221 and CH 1223.] Two hours lecture. Three hours laboratory. An introductory course in quantitative methods of inorganic chemistry with an abbreviated laboratory including gravimetric, titrimetric and colorimetric methods.

**CH 2314. Quantitative Inorganic Analysis.** (4) [Prerequisites: CH 1221 and 1223.] Two hours lecture. Six hours laboratory. Introduction to fundamental techniques and principles of the quantitative methods of inorganic chemistry. Gravimetric, titrimetric, and colorimetric methods.

**CH 2501. Elementary Organic Chemistry Laboratory.** (1) [Prerequisite: CH 1221 or CH 1051.] Three hours laboratory. A laboratory course to accompany CH 2503.

**CH 2503. Elementary Organic Chemistry.** (3) [Prerequisite: CH 1223 or CH 1053.] Three hours lecture. A terminal course in organic chemistry. Common aliphatic, aromatic, and heterocyclic compounds.

**CH 2990. Special Topics in Chemistry.** (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subjects in inorganic chemistry that have not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

**CH 3213. Inorganic Chemistry.** (3) [Prerequisites: CH 2314, and MA 1713.] Three hours lecture. A basic course in inorganic chemistry. Topics include periodicity, ionic interactions, systematic chemistry of the elements and solvent relations to acid-base and redox reactions.

**CH 4000. Directed Individual Study.** Hours and credits to be arranged.

**CH 4103/6103. Chemical Literature.** (3) [Prerequisite: Junior standing.] Two hours lecture. Three hours laboratory. A study of sources of information in chemistry, primary and secondary, including books, journals, patents, and other printed material. Searching the chemical literature.

**CH 4113. Advanced Chemistry Research Skills.** (3) [Prerequisites: CH 4521, CH 4523 and consent of instructor.] One hour lecture. Six hours laboratory. Laboratory intensive course on modern research methods with oral and written presentations including a discussion component of the role and ethics of scientists in society.

**CH 4203/6203. Faculty Development in Secondary School Chemistry.** (3) [Prerequisites: A year of chemistry plus experience as a secondary level science teacher.] Two hours lecture. Three hours laboratory. A course designed for secondary school chemistry teachers. Topics covered are significant to a successful high-school chemistry course.

**CH 4212/6212. Advanced Inorganic Laboratory.** (2) [Prerequisite: Prior credit or concurrent enrollment in CH 4213/6213.] Six hours laboratory. The application of modern experimental techniques to inorganic systems.

**CH 4213/6213. Advanced Inorganic Chemistry I.** (3) [Prerequisite: Consent of the instructor; CH 4413/6413.] Three hours lecture. Primarily the study of the elements in light of the periodic law; emphasis on coordination number, molecular complexes, and nuclear chemistry.

**CH 4303/6303. Environmental Chemistry I.** (3) [Prerequisites: CH 4523/6523.] Three hours lecture. A systematic study of the basic concepts of environmental chemistry. Topics include air, water, soil chemistry, pollution, and environmental regulations.

**CH 4351/6351. Instrumental Analysis Laboratory.** (1) [Prerequisite: Concurrent registration in CH 4353/6353.] Three hours laboratory. Laboratory course to accompany CH 4353/6353.

**CH 4353/6353. Instrumental Analysis.** (3) [Prerequisites: CH 4423/6423.] Three hours lecture. Three hours laboratory. A study of capabilities and principles of operation of optical and electrical instruments, including X-ray diffraction.

**CH 4404. Biophysical Chemistry.** (4) [Prerequisites: PH 1123, CH 4523, MA 1723.] Three hours lecture, one hour recitation. Principles of thermodynamics, solutions, electrochemistry, kinetics, transport processes, macromolecular solutions and electromagnetic properties as applied to biological systems.

**CH 4411/6411. Physical Chemistry.** (1) [Prerequisite: CH 4413/6413.] Three hours laboratory. Laboratory course to accompany CH 4413/6413.

**CH 4413/6413. Physical Chemistry.** (3) [Prerequisites: CH 1223, PH 2213 and MA 2733.] Three hours lecture. A study of the quantitative and theoretical properties of elements in their various states of combination. Topics include chemical thermodynamics and kinetics, solutions of nonelectrolytes and electrolytes, solid state, surface chemistry, macromolecules, photochemistry, and statistical thermodynamics.

**CH 4421/6421. Physical Chemistry Laboratory.** (1-1) [Prerequisite: CH 4413/6413.] Three hours laboratory. Laboratory course to accompany CH 4423/6423.

**CH 4423/6423. Physical Chemistry.** (3) [Prerequisites: CH 4413/6413.] Three hours lecture. A study of the quantitative and theoretical properties of elements in their various states of combination. Topics include chemical thermodynamics and kinetics, solutions of nonelectrolytes and electrolytes, solid state, surface chemistry, macromolecules, photochemistry, and statistical thermodynamics.

**CH 4433/6433. Intermediate Physical Chemistry.** (3) [Prerequisite: CH 4423/6423.] Three hours lecture. A study of quantum mechanics, molecular spectroscopy, and statistical mechanics.

**CH 4511/6511. Organic Chemistry Laboratory.** (1) [Prerequisites: CH 1221 and CH 1223.] Three hours laboratory. A laboratory course to accompany CH 4513/6513 for premedical, biological, and cellular engineering students.

**CH 4513/6513. Organic Chemistry.** (3) [Prerequisite: CH 1223.] Three hours lecture. A systematic study of organic chemistry including aliphatic, aromatic, and heterocyclic compounds for majors in chemistry, chemical engineering, premedical, and biological sciences.

**CH 4521/6521. Organic Chemistry Laboratory.** (1) [Prerequisites: CH 4511/6511 and CH 4513/6513.] Three hours laboratory. A laboratory course to accompany CH 4523/6523 for premedical, biological, and chemical engineering students.

**CH 4523/6523. Organic Chemistry.** (3) [Prerequisite: CH 4513/6513.] Three hours lecture. A systematic study of organic chemistry including aliphatic, aromatic, and heterocyclic compounds for majors in chemistry, chemical engineering, premedical, and biological sciences.

**CH 4533/6533. Intermediate Organic Chemistry.** (3) [Prerequisite: CH 4523/6523.] Three hours lecture. A continuation of the sequence CH 4513/6513-4523/6523.

Instructor/Lab Coordinator: Holman; Instructor Beard
CH 4544/6544. Qualitative Organic Analysis. (4) (Prerequisite: CH 4523/6523). Two hours lecture. Six hours laboratory. A course designed to develop technique in the identification of organic compounds.

CH 4990/6990. Special Topics in Chemistry. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

CH 7000. Directed Individual Study. Hours and credits to be arranged.

CH 8000. Thesis Research/Thesis. Hours and credits to be arranged.

CH 8711-8741. Seminar. One hour lecture. Reports on recent literature by students and staff. All graduate students in chemistry required to attend. One credit for each semester’s participation. Up to a total of six credits allowed for Ph.D. candidates, and three for M.S.

CH 8990. Special Topics in Chemistry. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

CH 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

Analytical Chemistry

CH 8313. Advanced Analytical Chemistry. (3) (Prerequisite: Consent of instructor). Three hours lecture. Basic principles and problems involved with chemical analysis.

CH 8333. Advanced Instrumental Analysis. (3) (Prerequisite: CH 4353/6353 or consent of instructor). Three hours lecture. Fourier transform and laser methods of spectroscopy, surface analysis and their application to current analytical problem.

Department of CHEMICAL ENGINEERING

Office: 330 Swalm Chemical Engineering Building

Professors George, Jefcoat, Rogers, Schulz (Director), and Zappi; Associate Professor Bricka, H. Toghianni and R. Toghianni; Assistant Professor P. Hill

CHE 1101. CHE Freshman Seminar. (1) One hour lecture. Seminar focusing on student and professional development for chemical engineering freshman.

CHE 1233. Design Concepts for CHE. (3) Three hours lecture. Introduction to principles of chemical engineering design. Use of computational tools (commercial process simulation software) to solve basic chemical engineering problems.

CHE 2114. Mass and Energy Balances. (4) (Prerequisites: CH 1223 and CH 1221). Three hours lecture. Two hours laboratory. Application of systems of units, material balances, heats of reaction, energy balances, and chemical equilibria to typical industrial problems.

CHE 2990. Special Topics in Chemical Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

CHE 3113. Chemical Engineering Thermodynamics I. (3) (Prerequisites: CH 1223, MA 2733 and PH 2213, credit or registration in CHE 2114). Three hours lecture. The thermodynamic properties of substances, energy relationships, applications of the first and second law of thermodynamics, flow processes, power cycles, refrigeration and liquefaction.

CHE 3123. Chemical Engineering Thermodynamics II. (3) (Prerequisite: MA 2743, PH 2223, C or better in CHE 3113). Three hours lecture. Thermodynamics of ideal and non-ideal mixtures, phase equilibria and chemical equilibria.

CHE 3213. Heat Transfer Operations. (3) (Prerequisite: CHE 3203; Corequisite: CHE 3113). Three hours lecture. Fundamentals of heat transfer in chemical engineering processes and process equipment. Special emphasis given to the economics of heat exchanger design and heat recovery.

CHE 3222. Chemical Engineering Laboratory I. (2) (Prerequisite: C or better in CHE 3203, C or better in CHE 3213). Four hours laboratory. Experiments in chemical engineering unit operations related to fluid flow and heat transfer. Experimental design/statistical treatment of data. Health/safety concerns in the laboratory.

CHE 3223. Mass Transfer Operations. (3) (Prerequisite: C or better in CHE 3203; Credit or registration in CHE 3213.) Three hours lecture. Quantitative relationships for equilibrium stage operations such as extraction and distillation. Applications of principles of mass transfer, diffusion, and absorption. Application to equipment design.

CHE 3232. Chemical Engineering Laboratory II. (2) (Prerequisites: C or better in CHE 3203, C or better in CHE 3213, C, or better in CHE 3233). Four hours laboratory. Experiments in chemical engineering unit operations related to heat transfer, mass transfer, kinetics, and process control. Statistical design of experiments. Instrumentation and data acquisition.

CHE 4313/6313. Transport Phenomena. (3) (Prerequisite: MA 2525 and PH 2233). Three hours lecture. Fundamental principles of momentum, heat and mass transport. Relationships between transport processes and the physical property distributions in fluid and solids.

CHE 3413. Engineering Materials. (3) (Prerequisites: CH 1223 and PH 2213). Three hours lecture. The physical, chemical, and mechanical properties of engineering materials. The influence of these properties on the behavior of materials that have been placed in service.

CHE 3823. Chemical Engineering Analysis and Simulation. (3) (Prerequisites: MA 3253 and CHE 3203). Three hours Lecture. Application of numerical methods to fundamental topics in Chemical Engineering.

CHE 4000. Directed Individual Study. Hours and credits to be arranged.

CHE 4113/6113. Chemical Reactor Design. (3) (Prerequisites: MA 3253, C or better in CHE 3123). Three hours lecture. The fundamentals of chemical reaction kinetics with applications.

CHE 4123/6123. Industrial Design. (3) (Prerequisites: CHE 3213, CHE 3233 and MA 3253). Three hours lecture. Concepts of industrial chemical engineering design. Alternative designs, economics, reliability, environmental considerations, risk assessment and safety are emphasized through problems and interaction with resource personnel.

CHE 4133/6133. Process Design. (3) (Prerequisite: C or better in CHE 3213, C or better in CHE 3223). Three hours lecture. Design and analysis of chemical and environmental engineering processes utilizing momentum, energy, and mass transport principles.
CHE 4223/6223. Process Instrumentation and Control. (3) (Prerequisites: MA 3253, C or better in CHE 3213, C or better in CHE 3223). Three hours lecture. Measurement of process variables; characteristics of control elements; automatic control instruments; dynamic behavior of process equipment; process control systems.

CHE 4234/6234. Chemical Plant Design. (4) (Prerequisite: C or better in CHE 4133, C or better in CHE 4113). Eight hours laboratory. Application of scientific and engineering principles to the design and economic evaluation of industrial chemical plants.

CHE 4323/6323. High Polymer Theory and Practice. (3) (Prerequisites: CHE 3123, CH 4521 and CH 4523). Two hours lecture. Three hours laboratory. A study of high polymers, covering structure with its relation to physical and chemical properties; polymerization, compound- ing, processing and testing of final products.

CHE 4423/6423. Fundamentals of Industrial Corrosion. (3) (Prerequisite: CHE 3413). Three hours lecture. Identifying and eliminating the different types of corrosion that lead to the failure of engineering structures.

CHE 4513/6513. Pulp and Paper Manufacturing Processes. (3) (Prerequisite: CHE 2114 and consent of instructor). Three hours lecture. A study of pulping and paper making processes with emphasis on application of basic engineering techniques to special problems of pulp and paper industry.

CHE 4613/6613. Air Pollution Control Design: Theory and Practice. (3) (Prerequisite: Consent of instructor). Three hours lecture. The various unit operations of hazardous waste incineration will be studied with specific attention given to equipment design, reaction kinetics, thermodynamics, legal and social aspects.

CHE 4624/6624. Experimental Methods in Materials Research. (4) (Prerequisite: CHE 3413). Three hours lecture, three hours laboratory. Introduction to research methodologies commonly used in the evaluation of materials. Emphasis is on electron microscopy/spectroscopy techniques, surface analyses and treatments, and mechanical testing.

CHE 4990/6990. Special Topics in Chemical Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

CHE 7000. Directed Individual Study. Hours and credits to be arranged.

CHE 8000. Thesis Research/Thesis. Hours and credits to be arranged.

CHE 8011. Chemical Engineering Seminar. (1) (Prerequisite: Graduate standing). Library assignments and reports on the current chemical engineering literature.

CHE 8113. Advanced Chemical Engineering Thermodynamics. (3) (Prerequisites: CHE 3123 and CHE 4113 or equivalent). Three hours lecture. Advanced study of fundamental laws of thermodynamics as applied to unit operations, non-idea fluids and solutions, chemical equilibria, kinetics, electrochemistry and similar topics.

CHE 8123. Chemical Kinetics and Dynamics. (3) (Prerequisite: consent of instructor). Three hours lecture. Theory and interrelations of phenomenological chemical kinetics and molecular reaction dynamics.

CHE 8990. Special Topics in Chemical Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

CHE 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

Computational Engineering
Office: 8 Engineering Research Center
Professors Carter, Harden, King, Marcum, Moorhead, J. Thompson;
Associate Professors: Banicescu, Cinnella, Flower, Gatlin, Haupt, Huddleston, Janus, Newman III, D. Reese,
Skjellum, Stokes, and D. Thompson;
Assistant Professors: Burg, L. Bruce, Luke, Mehra,

CME 2990. Special Topics in Computational Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

CME 3413. Introduction to Computational Field Simulation. (3) (Prerequisites: MA 2223, MA 3253, or consent of instructor). Three hours lecture, CFS methodology to solve engineering problems involving field physics, geometry, mathematics, algorithms, visualization techniques, and computing.

CME 4000. Directed Individual Study. Hours and credits to be arranged.

CME 4413/6413. Principles and Practice of Computational Field Simulation. (3) (Prerequisite: CME 3413 or senior standing in College of Engineering). Two hours lecture. Two hours laboratory. A broad-based treatment of the principles of computational simulation, with emphasis on applications to realistic engineering problems. Interactive experience coupled with outside projects.

CME 4990/6990. Special Topics in Computational Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

CME 7000. Directed Individual Study. Hours and credits to be arranged.

CME 8000. Thesis Research/Thesis. Hours and credits to be arranged.

CME 8113. Computational Geometry. (3) (Prerequisite: consent of instructor). Three hours lecture. Computer aided geometric design techniques and their applications in engineering and general computational field simulation.

CME 8990. Special Topics in Computational Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

Department of COMMUNICATION
Office: 130 McComas Hall

Professor Flick, Hill, and Zacharias; Associate Professors Bynum, Forde, and Huttenline (Head); Assistant Professors Arnett, Couvillion, W. Durst, Goodman, Gring, Holland Littlejohn and McDavid; Instructors Berry, Brown, DeFore, BJ Durst, Harris, Hinton, Stout, and Ulmer; Lecturer Crane

CO 1003. Fundamentals of Public Speaking. (3) Three hours lecture. The psychological processes and adjustments necessary in preparing, organizing, wording, and delivering effective speeches.

CO 1093. Honors Oral Communication. (3) (Prerequisite: Open through invitation only). Three hours lecture. Same as CO 1003. Available only to students in the University Honors Program.

CO 1223. Introduction to Communication Theory. (3) (Prerequisite: CO 1003 or CO 2253). Three hours lecture. A comprehensive introduction to the bases of contemporary communication theory.

CO 1403. Introduction to the Mass Media. (3) Three hours lecture. How American newspapers, magazines, radio, television, and film industries are organized to collect and distribute news, editorial, and entertainment material.

CO 1423. History of the Mass Media. (3) Three hours lecture. The origin and development of newspapers, magazines, radio, television and film in America as a means to mass communications.

CO 1503. Introduction to Theater. (3) Three hours lecture. A comprehensive view of the theater, including plays, playwrights, directing, acting, theaters, and technicians.

CO 1513. Theater Practicum #1. (3) Nine hours laboratory. Preparation for and participation in department production activities.

CO 1523. Theater Practicum #2. (3) Nine hours laboratory. Preparation for and participation in department production activities.

CO 1533. Theater Practicum #3. (3) Nine hours laboratory. Preparation for and participation in department production activities.

CO 1543. Theater Practicum #4. (3) Nine hours laboratory. Preparation for and participation in department production activities.

CO 1553. Theater Practicum #5. (3) Nine hours laboratory. Preparation for and participation in department production activities.

CO 1563. Theater Practicum #6. (3) Nine hours laboratory. Preparation for and participation in department production activities.

CO 1903. Introduction to Cinema. (3) Three hours lecture. A multi-disciplinary study of the film, with emphasis on linguistics, psychological, philosophical, and general intellectual aspects.

CO 2203. Negotiations. (3) (Prerequisite: CO 1003 or CO 2253). Three hours lecture. Introduction to theory and practice in the types of argumentation employed in our society.

CO 2213. Small Group Communication. (3) (Prerequisite: CO 1003 or junior standing). Three hours lecture. A study of the problems and techniques of participation in and leadership of small groups.

CO 2253. Fundamentals of Interpersonal Communication. (3) Emphasis on two-person interactions to increase student’s understanding of the functions and styles of group leadership.

CO 2313. Newswriting for the Electronic Media. (3) (Prerequisite: CO 2413). Practice in gathering, writing, and delivering news copy for telecommunications media. Examination of the role of the reporter, the news writer, and the newscaster.

CO 2333. Television Production. (3) (Prerequisite: CO 1403). Two hours lecture, two hours laboratory. Elementary principles, practices of television production in varied program formats.

CO 2343. Writing for Radio, Television, and Film. (3) (Prerequisite: CO 1403). Three hours lecture. Study and practice of the principles and techniques of documentary and dramatic script writing.

CO 2413. Introduction to News Writing and Reporting. (3) (Prerequisites: CO 1403, two semesters composition, and ability to type). Three hours lecture. Practice in writing simple news stories and the place of the reporter in the news-gathering organization.

CO 2423. News Editing, Typography, and Makeup. (3) (Prerequisite: CO 2413). Three hours lecture. Editing newspaper copy, writing headlines, and using type and pictures in makeup of newspaper pages.

CO 2524. Stagecraft and Lighting. (4) (Prerequisite: CO 1503). Three hours lecture. Forty hours work on a major production. Theory and practice of set construction, scene design and stage lighting and its application to theater production.

CO 2574. Summer Theater Workshop. (4) Three hours lecture. Two hours laboratory. Daily observation and practice of acting and technical work in preparation of a production. May be repeated one semester.

CO 2613. Introduction to Oral Interpretation. (3) (Prerequisite: CO 1503). Three hours lecture. Basic principles of comprehending and communicating literature to a listening audience.

CO 2990. Special Topics in Communications. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

CO 3203. Communication and Group Leadership. (3) (Prerequisite: CO 2133). Three hours lecture. A study of communication as related to the functions and styles of group leadership.

CO 3293. Corporate Communication. (3) (Prerequisite: Junior standing). Study of applied communication techniques related to the development and proficiency of oral corporate communication skills.

CO 3333. Advanced Television Production. (3) (Prerequisite: CO 2333). Two hours lecture. Two hours laboratory. Advanced principles, techniques of producing and directing television programs.

CO 3403. Introduction to Photography as Communication. (3) Three hours lecture. Study and practice of fundamentals of photography as a communicative art.

CO 3423. Feature Writing. (3) (Prerequisite: CO 2413). Three hours lecture. Feature markets and practice in preparing and writing features for newspapers and magazines.

CO 3443. Advanced News Writing and Reporting. (3) (Prerequisite: CO 2423). Three hours lecture. Practice in writing more complex news stories and the responsibilities of the reporter in news gathering and writing.

CO 3803. Principles of Public Relations. (3) (Prerequisite: CO 1223 or consent of instructor). Three hours lecture. The role and origin of public relations in society, the identification and influence of publics, and applications of public relations principles to campaigns and organizations.

CO 3813. Public Relations Case Problems. (3) (Prerequisite: CO 2803). Three hours lecture. The analysis and valuation of specific real and hypothetical cases using public relations theory as a base.

CO 3823. Public Relations Copy and Layout. (3) (Prerequisites: CO 2413 and CO 3803). Three hours lecture. Practice of written communication skills used in public relations. Includes experience in writing and producing news releases, brochures, speeches, and other devices.

CO 3833. Interviewing in Communication. (3) (Prerequisite: CO 2253). Three hours lecture. The communicative processes and adjustments necessary in preparing, organizing, wording, and participating in various types of interviews from both the interviewer and the interviewee perspectives.

CO 3843. Media Relations. (3) (Prerequisite: CO 3833). Three hours lecture. Study of interviewing and communication skills for reporters and the issues, problems, and strategies employed by interviewees related to radio, television, and print interviews.

CO 3903. Advanced Cinema Studies. (3) (Prerequisite: CO 1903 or EN 2434). Three hours lecture. A study of the forms, styles, and criticism of cinema.

CO 4000. Directed Individual Study. Hours and credits to be arranged.

CO 4053/6053. Internship in Communication. (3) (Prerequisites: CO 2323 or CO 2333 for Radio/TV students or Communication majors only). Supervised work in production, sales or related fields for radio-TV students or in newspaper or magazine writing, editing or photography for journalism students.

CO 4203/6203. Nonverbal Communication. (3) (Prerequisite: CO 1223 or PSY 1013). Three hours lecture. Study of nonverbal cues as they affect the communication interface in numerous contexts including social events, political campaigns, and dramatic productions.

CO 4213/6213. Political Communication. (3) (Prerequisite: CO 1223). Three hours lecture. Analysis and evaluation of the verbal and non-verbal dimensions of political communication in the United States since 1609.

CO 4223/6223. Advanced Communication Theory. (3) (Prerequisite: CO 1223). Three hours lecture. Analysis of twentieth century com-
communication theories. A study of mass, interpersonal, and intra personal communication processes and effects.

CO 4243/6243. Rhetorical Theory. (3) (Prerequisite: CO 1223). Three hours lecture. Survey and criticism of the theories of public speaking found in the works of Plato, Aristotle, Cicero, Quintilian, and St. Augustine.

CO 4253/6253. Elements of Persuasion. (3) (Prerequisite: CO 1223). Three hours lecture. A study of the motivation of audiences and techniques of persuasive campaigns and communications.

CO 4273/6273. Intercultural Communication. (3) (Prerequisite: CO 1223 and Senior standing). Three hours lecture. A study of how communication behaviors differ between cultures. Frameworks for studying intercultural communication will be provided by studying one specific culture.

CO 4303/6303. Telecommunication Management. (3) (Prerequisite: CO 2333). Three hours lecture. Theory of management of all types of broadcasting stations.

CO 4313/6313. Mass Media Law. (3) (Prerequisite: Junior standing). Three hours lecture. Study and analysis of laws and regulations significantly affecting newspapers, magazines, motion pictures, and broadcasting in America.

CO 4323/6323. Mass Media and Society. (3) (Prerequisite: Junior standing). Three hours lecture. The effects of mass communication on social and cultural institutions.

CO 4363/6363. Cable and Broadband Communications. (3) (Prerequisites: 21 SH in Communication and junior status). Overview of cable and interacting technologies from historical, economic, philosophical, and political perspectives.

CO 4373/6373. Practicum in Television News. (3) (Prerequisites: CO 2333, 15 additional hours of CO courses and consent of the instructor). Two hours lecture, two hours laboratory. Theory and practice of producing a television news program.

CO 4403/6403. Journalism Ethics. (3) (Prerequisite: CO 2413). Three hours lecture. Examination of ethical problems in contemporary journalism.

CO 4504/6504. History of the Theater. (4) (Prerequisite: Junior standing). Four hours lecture. A survey of the theater with emphasis on the physical structure, production problems and theatrical personalities.

CO 4524/6524. Directing. (4) (Prerequisite: CO 2524 and junior or senior standing). Three hours lecture. Two hours laboratory. Evaluation of dramatic styles and analysis of stage composition. Supervised hours in actual directing experience.

CO 4533/6533. Advanced Acting. (3) (Prerequisite: CO 2503). Three hours lecture. Intensive study of the theories and techniques of acting in the various dramatic styles.

CO 4573/6573. Theater Management. (3) (Prerequisite: Junior standing). Two hours lecture. Two hours laboratory. Business organization and management for the educational (secondary and university), community, and professional theater, including budgeting, publicity, public relations and box office principles.

CO 4583/6583. Playwriting. (3) (Prerequisite: Completion of freshman composition and CO 1503). Three hours lecture. Practice in the fundamentals of dramatic composition. Reading, discussion, and analysis of written work.

CO 4803/6803. Research in Public Relations and Advertising. (3) (Prerequisite: CO 3803, or MKT 3013, or consent of instructor, or graduate standing). Three hours lecture. Theory and practice of primary and secondary research methods in public relations and advertising, including qualitative and quantitative methods and uses of new technologies.

CO 4813/6813. Public Relations in Organizations. (3) (Prerequisites: CO 3813, CO 4253/6253). Three hours lecture. Studies in using various communication techniques for image building and campaign development for profit and non-profit organizations.

CO 4990/6990. Special Topics in Communications. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

CO 7000. Directed Individual Study. Hours and credits to be arranged.

CO 8000. Thesis Research/Thesis. Hours and credits to be arranged.

CO 8213. Seminar in Communication Theory. (3) (Prerequisite: CO 4223/6223). Analysis of intra personal, interpersonal, and mass communication variables. In-depth comparative study of the scientific and theoretical models for understanding communication processes and effects.

CO 8253. Seminar in Persuasion. (3) (Prerequisite: CO 4253/6253 or equivalent). Theoretical and research literature in attitude formation and change through communication.

CO 8990. Special Topics in Communications. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

Department of COUNSELOR EDUCATION and EDUCATIONAL PSYCHOLOGY
Office: 208 Montgomery Hall
Head and Major Advisor: Thomas W. Hosie
Professors: Dooley, Hendren, Housley, Underwood;
Associate Professors: Cashwell, Dunn, Glosoff, Looby;
Assistant Professors: Palmer, Wilson, Young.

NOTE: Several courses in Counselor Education are open to advanced undergraduates, but the courses are designed primarily as graduate work.

COE 1323. Career Planning. (3) Three hours lecture. Provides students with a basis for making career decisions and selecting an academic major.

COE 2990. Special Topics in Counselor Education. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

COE 3313. Rehabilitation Services. (3) Three hours lecture. Concepts, philosophies, and methods of rehabilitation services for physically, emotionally, or mentally disabled people.

COE 4013/6013. Facilitative Skills Development. (3) Three hours lecture. Introduction to the theory and practice of helping with emphasis on the development of basic communication skills. Applicable to a variety of settings.

COE 4023/6023. Introduction to Counseling. (3) Three hours lecture. Overview of counseling as a profession including specialty areas. Theories and techniques used in counseling. This course is not for Counselor Education majors.

COE 4050/6050. Seminar for Guidance Counselors. (1-6) Three hours lecture. Hours to be arranged. A study of current issues and trends in the field of guidance.

COE 4533/6533. Rehabilitation of Visually Impaired Persons. (3) Three hours lecture. Special issues and procedures related to vocational rehabilitation of persons with visual impairments.

COE 4535/6535. Assistive Technology in the Rehabilitation Process. (3) (Prerequisites: Undergraduates: COE 3313. Graduates: COE 6399, COE 8573 or permission of the instructor). Three hours lecture. Diverse applications of technologies are reviewed for potential impact with all forms of disability. Examines various roles played by technology in total rehabilitation process.

COE 4563/6563. Introduction to Sign Language. (3) Development of basic sign language skills, study of special needs of deaf persons, and understanding use of interpreters. (Same as EDX 4953/6953).

COE 4513/6513. Paraprofessionals in Student Affairs. (3) (Prerequisite: Consent of instructor). Three hours lecture. Fundamental concepts and philosophies underlying the paraprofessional’s role in college student affairs. Includes supervised and paraprofessional experience.

COE 4713/6713. Issues in Aging. (3) Three hours lecture. An examination and integration of gerontological issues related to mental health of the elderly.

COE 4723/6723. Group Dynamics. (3) Three hours lecture. Experience and instruction in the dynamics of group counseling.

COE 4743/6743. Gender Issues in Counseling. (3) Three hours lecture. Overview of gender issues and their relationship to the counseling process.

COE 4903/6903. Developmental Counseling and Mental Health. (3) Three hours lecture. One hour laboratory. Methods of iden-
tifying and meeting normal emotional and social needs of children and adults. Emphasis on maintaining better mental health conditions in schools.

COE 6990/6990. Special Topics in Counselor Education. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

COE 6313. Resources for Visually Impaired Persons. (3) Three hours lecture. Survey of issues, techniques, and resources for independent living, orientation and mobility, and communication of visually impaired persons.

COE 6373. Vocational Assessment of Special Needs Persons. (3) Two hours lecture. Two hours laboratory. (Prerequisite: EPY 8263 or equivalent). Comprehensive vocational assessment, counseling, and individual planning for special needs persons. Job/training analysis, vocational interest/aptitude tests, work samples, and situational assessment. (Same as TKT 8653).

COE 6383. Work Samples in Vocational Assessment. (3) (Prerequisite: CO 6013 or equivalent). Three months lecture and two hours laboratory. Administration scoring, and interpretation of commercial work samples systems in vocational assessment to include: VALPAR, SINGER, JEV's McCarron-Dial. Development of job simulations and work samples. (Same as EDX 8663).

COE 6393. Vocational Rehabilitation Counseling. (3) Three hours lecture. Rehabilitation legislation and the rehabilitation counseling process.

COE 7000. Directed Individual Study. Hours and credits to be arranged.

COE 8000. Thesis Research/Thesis. Hours and credits to be arranged.

COE 8013. Counseling Skills Development. (3) (Prerequisite: CO 6013 and COE 8023). Three hours lecture. Theory and practice of counseling with emphasis on development of advanced skills required for assisting clients.

COE 8023. Counseling Theory. (3) Three hours lecture. Study of the major counseling theories.

COE 8043. Group Techniques and Procedures. (3) (Prerequisite: COE 8023). Three hours lecture. Group counseling theory, dynamics, processes, and leadership functions.

COE 8053. Practicum. (3) (Prerequisites: COE 8013, 8023, and consent of department). Seminar and supervised field experience.

COE 8063. Research Techniques for Counselors. (3) Three hours lecture. Methods of research and evaluation in counseling.

COE 8073. Cultural Foundations in Counseling. (3) Three hours lecture. Examination of individual differences due to socialization acquired in distinct cultural and socioeconomic environments. Implications for counseling.

COE 8083. Assessment Techniques for Counselors. (3) Three hours lecture. Techniques and instruments available for the assessment of individuals.

COE 8093. Seminar in Counseling. (3) (Prerequisite: COE 8023 or equivalent). Seminar in counseling trends and approaches with application to various settings and problems.

COE 8163. Spirituality in Counseling. (3) Three hours lecture. Didactic instruction of developmental models and clinical interventions related to the interface of spirituality and counseling.

COE 8173. Counseling Gifted Students. (3) Three hours lecture. Counseling functions that relate to the total development of gifted students. Directed Individual Study and utilization of resources necessary for optimal growth.

COE 8203. Placement and Career Development Counseling. (3) Three hours lecture. Studies of career development and academic/job placement; occupational classification schemes; trends in the world of work; compiling and utilizing career information in counseling.

COE 8293. Supervised Project. (3) (Prerequisite: Consent of department). Study of a topic in counseling or student development.

COE 8303. Family Counseling Theory. (3) (Prerequisite: COE 8203). Three hours lecture. Study of the theory and practice of family counseling.

COE 8393. Advanced Practicum. (3) (Prerequisite: COE 8053 and consent of department). Advanced supervised field experience.

COE 8413. Personal, Social, and Work Adjustment Counseling. (3) Two hours lecture. Two hours laboratory. Personal, social, work adjustment counseling and employability skills training for disabled persons and others with special needs. Includes individual, group, and situational techniques. (Same as EDX 8413 and TKT 8413).

COE 8553. Student Affairs in Higher Education. (3) Three hours lecture. Overview of student development programs in higher education. Emphasis on philosophical foundations, organization, and the role of each service within a student development program.

COE 8523. Student Development Theory. (3) Three hours lecture. Overview of theories of student development in higher education.

COE 8533. Literature of Student Affairs. (3) Three hours lecture. Provides an overview of student affairs in higher education through extensive reading in the field and individual study of specific aspects.

COE 8543. Legal Issues. (3) Three hours lecture. Legal and ethical issues in student affairs and counseling.

COE 8633. Psychosocial Rehabilitation. (3) Three hours lecture. Counseling techniques that assist in the community adjustment of seriously mentally ill clients.

COE 8730. Internship. (1-9) (Prerequisite: COE 8053.) Supervised field experience.

COE 8740. Academic Year School Internship. (1-9) (Prerequisite: Consent of department). Supervised field experience in school counseling for one academic school year.

COE 8750. Internship. (1-9) (Prerequisite: Consent of department). Supervised field experience for Ed.S students.

COE 8773. Counseling Chemically Dependent Client. (3) Three hours lecture. Information about the etiology, diagnosis, and treatment of chemical dependence.

COE 8783. Counseling the Chemically Dependent Family. (3) (Prerequisite: COE 8773.) Three hours lecture. Provide information on the effects of chemical dependence on the family and counseling programs for this disorder.

COE 8813. Counseling Elderly Clients. (3) Three hours lecture. Concepts, attitudes, and skills needed to provide counseling for elderly clients.

COE 8903. School Counseling Services. (3) Three hours lecture. Overview of a comprehensive school counseling program.

COE 8913. Counseling Children. (3) Three hours lecture. Didactic instruction and discussion of counseling techniques useful in community and school settings to work with early school-aged children.

COE 8990. Special Topics in Counselor Education. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

COE 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

COE 9013. Counseling Supervision. (3) (Prerequisite: COE 8730 and 8013). Three hours lecture. The theory and practice of providing counseling supervision for practicing counselors and student development professionals.

COE 9033. Advanced Seminar. (3) Three hours lecture. Advanced study of a topic in counseling.

COE 9740. Internship. (1-9) (Prerequisite: Consent of department). First supervised field experience for doctoral students.

COE 9750. Internship. (1-9) (Prerequisite: Consent of department). Second supervised field experience for doctoral students.
CRIMINAL JUSTICE and CORRECTIONS

COR 2990. Special Topics in Corrections. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

COR 3103. The Criminal Justice System. (3) (Prerequisites: Six hours of social sciences and consent of instructor). Three hours lecture. The interrelationships of law enforcement, prosecution, and the courts, particularly how each affects the correctional process.

COR 3310. Field Work. (1-6) (Prerequisites: SO 4513). One to six hours practicum within selected Corrections agencies, individually supervised performance and self-development in relation to clients, agency workers, and provisions of Correctional services.

COR 3343. Gender, Crime, and Justice. (3) Three hours lecture. Gender differences in criminal behavior, victimization, and criminal justice processing, emphasizing the unique experiences of women in all of these areas. (Same as SO 3343).

COR 3320. Field Work. (1-6) (Prerequisites: COR 3310). One to six hours practicum within selected Corrections agencies, individually supervised performance and self-development in relation to clients, agency workers, and provisions of Correctional services.

COOPERATIVE EDUCATION PROGRAM

Office: 222 Walker Engineering Building
Director: Luther B. Epting, Associate Director: John Michael Mathews; Assistant Director: Beth C. Callahan, Coordinators: Becky Davis, Mary Loyd Lowrey
Assistant Professors Banicesu, G. Boggess, Little, Reese, Skjellum, and Vaughn; Instructors Hossain and Henderson

CP 2103. First Work Semester. (3) (Prerequisite: Approval of the Cooperative Education Office, acceptance by employing organization, and admission to the University).

CP 2203. Second Work Semester. (3) (Prerequisite: CP 2103).

CP 3303. Third Work Semester. (3) (Prerequisite: CP 2203).

CP 3403. Fourth Work Semester. (3) (Prerequisite: CP 3303).

CP 4503. Fifth Work Semester. (3) (Prerequisite: CP 3403).

CP 4603. Sixth Work Semester. (3) (Prerequisite: CP 4503).

CP 4703. Seventh Work Semester. (3) (Prerequisite: CP 4603).

Department of COMPUTER SCIENCE

Office: 300 Butler Hall
Professors Bridges, Carter, Hodges (Head), and Philip; Associate Professors Emeriti Davis, Dearholt, Ellis, Matthews, and Takacs; Professors Banicesu, G. Boggess, Little, Reese, Skjellum, and Vaughn; Assistants Professors Allen, Dampier, Hansen, Jamal and Luke; Instructors Hossain and Henderson

CS 1013. Basic Computer Concepts and Applications. (3) Three hours lecture. Basic concepts of computing using large-scale computers and personal computers. Introduction to operating system commands, applications software (word processing, spreadsheets, communications, etc.), and rudimentary programming. (Credit will not be granted for this course and BIS 1013 or BIS 3713).

CS 1213. Computer Programming with FORTRAN. (3) (Prerequisite: MA 1313 or equivalent). Three hours lecture. Problem solving methods, algorithm development, debugging and documentation in the Fortran programming language; applications. (Not recommended to students with credit in CS 1233 or CS 1253 or equivalent).

CS 1233. Computer Programming with C. (3) (Prerequisite: MA 1313 or equivalent). Three hours lecture. Problem-solving methods, algorithm development, debugging and documentation in the C Programming language; applications. (Not recommended to students with credit in CS 1213 or CS 1253 or equivalent).

CS 1273. Computer Programming with Java. (3) (Prerequisite: MA 1313 or equivalent). Three hours lecture. Problem-solving methods, algorithm development, debugging and documentation in the Java programming language; applications. (Not recommended to students with credit in CS 1213 or CS 1253 or equivalent).

CS 1284. Introduction to Computer Programming. (4) (Prerequisite: MA 1313 or equivalent). Three hours lecture. Three hours laboratory. Software design, implementation, testing and documentation based on the object-oriented paradigm. Algorithm development and analysis, abstract data types including lists and trees, recursion. Applications.

CS 1384. Intermediate Computer Programming. (4) (Prerequisite: CS 1284 with a grade of C or better). Three hours lecture. Three hours laboratory. Object-oriented problem solving, design, and programming. Introduction to data structures, algorithm design and complexity. Second course in sequence designed for CS, CPE and CE majors.

CS 2314. Computer Science II. (4) (Prerequisites: CS 1314 with a grade of C or better and MA 1713). Three hours lecture. Three hours laboratory. Continuation of CS 1314. Intermediate software design and development based on object-oriented paradigm. Sorting and searching, relational data model, file organization, data representations.

CS 2324. Computer Science III. (4) (Prerequisite: CS 2314 with a grade of C or better). Three hours lecture. Three hours laboratory. Continuation of CS 2314. Software design and design quality; design patterns and reuse; testing, distribution and concurrency; applications, including real time and parallel, group projects.

CS 2383. Data Structures and Analysis of Algorithms. (3) (Prerequisite: CS 1384 and MA 1713 both with a grade of C or better). Three hours lecture. Non-linear data structures and their associated algorithms. Trees, graphs, hash tables, relational data model, file organization. Advanced software design and development.

CS 2813. Discrete Structures. (3) (Prerequisite: CS 1314 with a grade of C or better and MA 1313 or equivalent). Three hours lecture. Concepts of algorithms, induction, recursion, proofs; topics from logic, set theory, combinatorics, graph theory fundamental to study of computer science.

CS 2990. Special Topics in Computer Science. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

CS 3041. FORTRAN Programming Laboratory. (1) (Prerequisite: A grade of C or better in either CS 1233 or equivalent). Two hours laboratory. Programming and problem-solving using the FORTRAN programming language; structured program design, debugging and testing; file management techniques.
CS 3124. Microprocessors I. (4) (Prerequisites: CS 2314 or 1314; ECE 3714). Three hours lecture. Three hours laboratory. Architecture of microprocessor-based systems. Study of microprocessor operation, assembly language, arithmetic operations, and interfacing. (Same as ECE 3724).

CS 3183. Systems Programming. (3) (Prerequisite: CS 2314 with a grade of C or better). Three hours lecture. Overview of contemporary programming concepts, tools, and techniques. Shell programming, systems administration tools, distributed systems, and Internet concepts.

CS 3212. Software Engineering Senior Project I. (2). (Prerequisite: CS 4224 with C or better). Four hours laboratory. Software requirements elicitation and specification, cost estimation, scheduling, development of project management and quality assurance plans, reviews.

CS 3222. Software Engineering Senior Project II. (2) (Prerequisite: CS 4224 with C or better). Four hours laboratory. Team work, software design, construction, implementation of project management and quality assurance plans, and configuration management.

CS 3813. Introduction To Formal Languages and Automata. (3) (Prerequisite: CS 2314 and CS 2813, both with a grade of C or better). Three hours lecture. Theoretical foundations of computer science: formal languages and automata, parsing of context-free languages; Turing reductions to complexity classes.

CS 3981. Social and Ethical Issues in Computing. (1) (Prerequisite: Senior standing.) One hour lecture. Study of major social and ethical issues in computing, including history of computing, impact of computers on society, and the computer professional's code of ethics.

CS 4000. Directed Individual Study. Hours and credits to be arranged.

CS 4113/6113. Computer Architecture. (3) (Prerequisites: CS 3124/ECE 3724 with a grade of C or better). Three hours lecture. Detailed design and implementation of a stored-program digital computer system. Designs for the CPU, I/O subsystems, and memory organizations. ALU design and computer arithmetic. (Same as ECE 4713/6713).

CS 4153/6153. Data Communications and Computer Networks. (3) (Prerequisites: CS 2314 with a grade of C or better). Three hours lecture. The concepts and practices of data communications to provide the student with an understanding of the hardware and software used for data communications.

CS 4163/6163. Designing Parallel Algorithms. (3) (Prerequisites: CS 2324 or CS 4733/6733 with a grade of C or better). Three hours lecture. Techniques for designing algorithms to take advantage efficiently of different parallel architectures. Includes techniques for parallelizing sequential algorithms and techniques for matching algorithm to architectures.

CS 4213/6213. Software Engineering I. (3) (Prerequisite: CS 2324 with a grade of C or better). Two hours lecture. Two hours laboratory. Software planning, software requirements analysis and specification; software design; testing and debugging; maintenance; documentation.

CS 4224/6224. Software Engineering II. (4) (Prerequisites: CS 4213/6213 with a C or better). Three hours lecture. Two hours laboratory. Advanced topics in software engineering including: alternative design methods, CASE, software quality assurance, software metrics, project management, cost estimation, configuration management, reuse, reengineering and maintenance.

CS 4233/6233. Software Architecture and Design Paradigms. (3) (Prerequisite: CS 4224/6224 with a C or better). Three hours lecture. Topics include software architectures, methodologies, model representations, component-based design, patterns, frameworks, CASE-based designs, and case studies.

CS 4243/6243. Information and Computer Security. (3) (Prerequisites: CS 4504/6504 and CS 4733/6733 both with a grade of C or better). Three hours lecture. Topics include encryption systems, operating systems security, database security, network security, electronic commerce, system threats, and risk avoidance procedures.

CS 4283/6283. Software Testing and Quality Assurance. (3) (Prerequisite: CS 4213/6213 with a C or better). Three hours lecture. Topics include methods of testing, verification and validation, quality assurance processes, testing techniques, methods and types of testing, and ISO 9000/SEI CMM process evaluation.

CS 4413/6413. Principles of Computer Graphics. (3) (Prerequisites: CS 2314 with a grade of C or better and MA 3113). Three hours lecture. Graphics hardware: algorithms; graphics primitives; windowing and clipping; transformations; 3D graphics; shading; hidden surfaces; standards.

CS 4504/6504. Database Management Systems. (4) (Prerequisites: CS 2314 and CS 2813 both with a grade of C or better). Three hours lecture. Two hours laboratory. Modern database models; basic database management concepts; query languages; database design through normalization; advanced database models; extensive database development experience in a team environment.

CS 4633/6633. Artificial Intelligence. (3) (Prerequisite: CS 3813 with a grade of C or better). Three hours lecture. Study of the computer in communication with human thought processes. Heuristic programming search strategies; knowledge representation; natural language understanding; perception; learning.

CS 4643/6643. Expert System Design. (3) (Prerequisite: CS 4633/6633 with a grade of C or better). Two hours lecture. Two hours laboratory. Introduction to design and development of expert systems; prototyping and production of an expert system; knowledge acquisition; overview of theoretical aspects; review of current literature.

CS 4653/6653. Cognitive Science. (3) (Prerequisites: CS 4633/6633 or PSY 4173 or PHI 4143/6143 or AN 4623/6623 or EN 4634/6634). Three hours lecture. The nature of human cognition from an interdisciplinary perspective, primarily utilizing a computational model, including insights from philosophy, psychology, linguistics, artificial intelligence, anthropology, and neuroscience. (Same as PSY 4653/6653).

CS 4663/6663. Human-Computer Interaction. (3) (Prerequisite: CS 3813 for Computer Science majors with a grade of C or better, consent of instructor for non-majors). Three hours lecture. Conceptual models formed by users, aspects of computer systems which affect users, interface design and evaluation, and examples and critiques of specific interfaces and user environments.

CS 4673/6673. Psychology of Human-Computer Interaction. (3) (Prerequisite: PSY 3713 or CS 4663/6663 or IE 4113/6113 or consent of the instructor). Two hours lecture. Two hours laboratory. Exploration of psychological factors that interact with computer interface usability. Interface design techniques and usability testing methods are emphasized. (Same as IE 4123/6123 and PSY 4743/6743).

CS 4713/6713. Programming Languages. (3) (Prerequisites: CS 3124 or ECE 3724 and CS 3813 both with a grade of C or better). Three hours lecture. An introduction to programming language specification and analysis. Additional topics include control structures, data types and structures, run-time environments, binding strategies, compilers, and interpreters.

CS 4723/6723. Compiler Construction. (3) (Prerequisite: Credit or registration in CS 4713/6713). Formal treatment of context-free programming language translation and compiler design concepts, including: lexical, syntactic and semantic analysis; machine-dependent code generation and improvement; and error processing.

CS 4733/6733. Operating Systems I. (3) (Prerequisites: CS 2314 and CS 3124 or ECE 3724 both with a grade of C or better). Three hours lecture. Historical development of operating systems to control complex computing systems; process management, communication, scheduling techniques; file system concepts and operation; data communication, distributed process management.

CS 4743/6743. Operating Systems II. (3) (Prerequisites: CS 4733/6733 with a grade of C or better). Three hours lecture. Integrated treatment of hardware and software concepts in operating systems design; procedure implementation; creation and control of processes; name and space management.

CS 4833/6833. Introduction to Analysis of Algorithms. (3) (Prerequisites: CS 2314, CS 2813, and MA 2735 all with a grade of C or better). Three hours lecture. Study of complexity of algorithms and algorithm design. Tools for analyzing efficiency; design of algorithms, including recurrence, divide-and-conquer, dynamic programming, and greedy algorithms.

CS 4990/6990. Special Topics in Computer Science. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

CS 5000. Thesis Research/Thesis. Hours and credits to be arranged.

CS 8000. Thesis Research/Thesis. Hours and credits to be arranged.

CS 8011. Graduate Seminar I. (1) One hour. Reports on recent advances and problems in computer science by students and staff; student participation, general discussion. (May be taken for credit more than once).

CS 8021. Graduate Seminar II. (1) One hour. Student presentation of recent advances and problems in computer science. (May be taken for credit more than once).

CS 8080. Directed Project in Computer Science. (1-3) Hours and credits to be arranged. An individual professional project open only
to candidates for the Master of Science degree (project option). Formal written and oral project reports are required.

CS 8123. Advanced Computer Organization. (3) Three hours lecture. Computer architecture; ALU and CPU structure; microprogramming; arithmetic and control unit, computer instruction sets; memory addressing and control; bus structures, I/O controllers and interrupt handling.

CS 8153. Advanced Data Communications. (3) (Prerequisite: CS 4153/6153 or equivalent). Three hours lecture. A study of advanced concepts and practices of data communications with particular emphasis on Local Area Networks and Transmission Control Protocol/Internet Protocol (TCP/IP).

CS 8233. Software Engineering Project Management. (3) (Prerequisite: CS 4213/6213). Three hours lecture. Management of the engineering of software products including estimating, planning, process management, and special topics.

CS 8243. Software Specification. (3) (Prerequisite: CS 4213/6213). Three hours lecture. Writing software specifications, transforming specifications into code, and verifying transformations using formal methods.

CS 8253. Software Design. (3) (Prerequisite: CS 4213/6213). Three hours lecture. Software design principles, attributes, models, and methodologies; object-oriented designs; real-time system design; user interface design; design verification; reusability issues; tools; current issues.

CS 8263. Software Verification and Validation. (3) (Prerequisites: CS 3813 and either CS 4213/6213 or CS 8253). Three hours lecture. The theory and practice of ensuring high-quality software products, including quality assessment, proof of correctness, testing, and verification and validation methodology.

CS 8273. Software Requirements Engineering. (3) (Prerequisites: CS 4213/6213 with a C or better). Three hours lecture. An in-depth study of current research and practice in requirements elicitation, requirements analysis, requirements specification, requirements verification and validation, and requirements management.

CS 8413. Visualization. (3) (Prerequisite: CS 4413/6413). Three hours lecture. Essential algorithms for three-dimensional rendering and modeling techniques; viewing transformations, illumination, surface modeling, methodologies for visualisation of scalar and vector fields in three dimensions.

CS 8433. Advanced Computer Graphics. (3) (Prerequisites: CS 4413/6413). Three hours lecture. Realistic, three-dimensional image generation; modeling techniques for complex three-dimensional scenes; advanced illumination techniques; fractal surface modeling; modeling and rendering of natural phenomena.

CS 8533. Database System Design. (3) (Prerequisite: CS 4504/6504). Three hours lecture. Query processing; transactions and concurrency control; crash recovery; distributed database systems; security and data security; implementation issues.

CS 8543. Current Issues in Database Systems. (3) (Prerequisites: CS 4504/6504). Three hours lecture. Extensive reading and discussion; advanced database models; query languages; cooperative databases; data mining; data warehousing; user interfaces; web databases.

CS 8613. Cognitive Models of Skill. (3) (Prerequisite: Graduate standing). Three hours lecture. Introduction to cognitive modeling with a focus on computational models of skill acquisition and expert skill (Same as PSY 8723).

CS 8633. Natural Language Processing. (3) (Prerequisite: CS 4633/6633). Three hours lecture. Automated processing of natural language including syntax, semantics, pragmatics, and discourse analysis; survey of current literature.

CS 8643. Intelligent Systems. (3) (Prerequisite: CS 4633/6633). Three hours lecture. Advanced implementation and theoretical issues for intelligent systems design and analysis; methodologies including representation, uncertainty, opportunistic reasoning; human-computer interaction issues; readings and discussion or current research.

CS 8653. Knowledge Representation and Knowledge Bases. (3) (Prerequisites: CS 4633/6633). Three hours lecture. Methods of representing knowledge; languages and tools for building knowledge-based expert systems; worst reading; applications of knowledge-based expert systems.

CS 8663. Neural Computing. (3) (Prerequisite: CS 4633/6633). Three hours lecture. Introduction to non-traditional methods of simulating and implementing cognitive processes on the computer. Discussions of connectionism, neural networks, and other models of cognition such as cellular automata.

CS 8733. Advanced Systems Programming. (3) (Prerequisite: CS 4733/6733). Three hours lecture. Concepts of multi-processing, multi-processing, time-sharing; topics to include interruptibility, priority, scheduling, error recovery procedures, storage management, input-output.

CS 8813. Formal Languages and Automata Theory. (3) (Prerequisite: CS 3813). Three hours lecture. Alphabets, languages, grammars; finite state machines, regular grammars; pushdown automata, context-free languages; linear bounded automata, context-sensitive languages; Turing machines; unsolvability; closure properties of languages.

CS 8823. Introduction to Combinatorics and Graph Theory. (3) (Prerequisites: CS 3813, and MA 1723 or consent of instructor). Three hours lecture. Permutations, combinations, generating functions, recurrence relations, inclusion and exclusion, graphs, trees, circuits and cutsets, planar and dual graphs, special topics.

CS 8833. Algorithms. (3) (Prerequisites: CS 4833/6833). Three hours lecture. Advanced techniques for designing and analyzing algorithms; advanced data structures; case studies; NP-completeness including reductions; approximation algorithms.

CS 8990. Special Topics in Computer Science. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

CS 9000. Dissertation Research and Dissertation. Hours and credits to be arranged.

CS 9113. Topics in High Performance Computing. (3) (Prerequisite: Consent of Instructor). Three hours lecture. Reading and study of current work related to the area of high performance computers. Intended for doctoral students. (May be taken for credit more than once).

CS 9253. Topics in Software Engineering. (3) (Prerequisite: Consent of instructor). Three hours lecture. Reading and study of current work related to the area of software engineering. Intended for doctoral students. (May be taken for credit more than once.)

CS 9413. Topics in Computer Graphics and Visualization. (3) (Prerequisite: Consent of instructor). Three hours lecture. Reading and study of current work related to the area of computer graphics and visualization. Intended for doctoral students. (May be taken for credit more than once.)

CS 9633. Topics in Artificial Intelligence. (3) (Prerequisite: Consent of instructor). Three hours lecture. Reading and study of current work related to the area of artificial intelligence. Intended for doctoral students. (May be taken for credit more than once.)

College of VETERINARY MEDICINE

Veterinary Technology

CVM 2104. Small Animal Health Techniques. (4) Four hours practicum. Supervised rotation through the Health Assessment Service of the Small Animal Clinic. Students participate in all technical aspects of patient care and health management. (Offered to students enrolled in the Veterinary Technology Program ONLY).

CVM 2114. Small Animal Medication Techniques. (4) Four hours practicum. Supervised rotation through the Medical Service of the Small Animal Clinic. Students participate in all technical aspects of patient diagnosis and care. (Offered to students enrolled in the Veterinary Technology Program ONLY).

CVM 2124. Equine Medical Techniques. (4) Four hours practicum. Supervised rotation through the Equine section of the Large Animal Clinic. Students participate in all technical aspects of patient diagnosis and care. (Offered to students enrolled in the Veterinary Technology Program ONLY).

CVM 2134. Food Animal Medical Techniques. (4) Four hours practicum. Supervised rotation through the Food Animal Unit of the Veterinary Technology Program. Students participate in all technical aspects of food animal diagnosis, herd health assessment and management. (Offered to students in the Veterinary Technology Program ONLY).

CVM 2144. Surgical Techniques. (4) Four hours practicum. Supervised rotation through the Surgical Service of the Animal Health Center. Students participate in all technical aspects of surgery setup, patient care and surgical care. (Offered to students enrolled in the Veterinary Technology Program ONLY).
CVM 2154. Anesthetic Techniques. (4) Four hours practicum. Supervised rotation through the Anesthesia Service of the Animal Health Center. Students participate in all technical aspects of preanesthetic evaluation, anesthetic maintenance and recovery. (Offered to students enrolled in the Veterinary Technology Program ONLY).

CVM 2164. Radiologic and Imaging Techniques. (4) Four hours practicum. Supervised rotation through the Radiology Service of the Animal Health Center. Students participate in all technical aspects of radiography, ultrasound imaging and radiotherapy. (Offered to students enrolled in the Veterinary Technology Program ONLY).

CVM 2172. Technical Laboratory Services. (2) Two hours practicum. Supervised rotation through the Laboratory Service of the College of Veterinary Medicine. Students participate in all technical aspects of laboratory sample collection and analysis. (Offered to students enrolled in the Veterinary Technology Program ONLY).

CVM 2182. Techniques with Laboratory Animals. (4) Two hours practicum. Supervised rotation through the Laboratory Animal Health Unit of the College of Veterinary Medicine. Students participate in all technical aspects of laboratory animal care and management. (Offered to students in the Veterinary Technology Program ONLY).

CVM 2202. Pharmacy Techniques. (4) Two hours practicum. Supervised rotation through the Pharmacy of the College of Veterinary Medicine. Students participate in all technical aspects of pharmaceutical preparation, dispensing, inventory and management. (Offered to students in the Veterinary Technology Program ONLY).

CVM 2212. Necropsy Techniques. (2) Two hours practicum. Supervised rotation through the Necropsy Section of the Diagnostic Laboratory. Students participate in all aspects of necropsy preparation, performance, record keeping, sample collection and cleanup. (Offered to students in the Veterinary Technology Program ONLY).

CVM 2302. Animal Health Technical Procedures. (2) One hour lecture. One hour laboratory. Orientation to basic animal health technical procedures including: patient records, diagnostic, therapeutic and animal nursing procedures. (Offered to students in the Veterinary Technology Program ONLY).

CVM 2312. Laboratory Animal Care. (4) Two hours practicum. Orientation to basic principles of laboratory animal care. An introduction to the scientific basis of laboratory animal use. An overview of animal welfare regulations. (Offered to students in the Veterinary Technology Program ONLY).

CVM 2321. Veterinary Business Procedures. (2) One hour practicum. Supervised clinical rotation involving the business procedures in a veterinary practice. (Offered to students in the Veterinary Technology Program ONLY).

CVM 2390. Special Topics in Veterinary Medicine. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

CVM 4263/6263. Wildlife Diseases. (3) Two hours lecture. Four hours laboratory, alternate weeks. Effects and management of parasites and diseases in wild bird and mammal populations. (Same as WF 4263/6263).

CVM 4268/6268. Current Topics in Veterinary Medicine. (1) One hour lecture. One hour laboratory. Advanced study of veterinary medicine through an interdisciplinary approach. A case-based approach to understanding the interrelationships between structure, function, pathology, disease and therapeutics.

YEAR 2: Fall

CVM 5129-5139. Interdisciplinary Study of Veterinary Medicine. (9,9) Nine hours practicum. Nine hours practicum. The study of veterinary medicine through an interdisciplinary approach. A case-based approach to understanding the interrelationships between structure, function, pathology, disease, and therapeutics.

YEAR 2: Spring

CVM 5103. Professional Development II. (3) Lecture. An overview of the Veterinary Medical profession, orientation to the curriculum, student development, responsibilities, evaluation, professional ethics, and communication skills.

CVM 4363. Fundamentals of Clinical Science II (2) One hour lecture. Three hours laboratory. The initial application of knowledge and skills to decision-making to include animal care, handling and restraint, principles of surgery, and problem-oriented medical records.

YEAR 3: The Clinical Problem

CVM 5000. Directed Individual Study in Veterinary Medicine. (1-6) Variable hours practicum. (May be repeated for credit). Research services and practices.

CVM 5214. Laboratory Services. (4) Four hours practicum. Supervised rotation through the Diagnostic Laboratory of the Animal Health Center. Responsibilities include diagnostic techniques and data interpretation in clinical pathology, pathology, parasitology and bacteriology.

CVM 5224. Radiology. (4) Four hours practicum. Supervised rotation in Radiology. Areas of study include radiographic and ultrasound techniques and interpretation and radiotherapy.

CVM 5234. Anesthesiology. (4) Four hours practicum. Supervised rotation in Anesthesiology. Areas of study include preanesthetic patient evaluation, anesthetic induction, maintenance and monitoring and postanesthetic patient management.

CVM 5246. Community Practice. (6) Six hours practicum. Supervised rotation through the Community Practice service of the Small Animal Clinic. Students participate in all aspects of patient care and health management.

CVM 5266. Equine Medicine & Surgery. (6) Six hours practicum. Supervised rotation through the Equine unit of the Large Animal Clinic. Students participate in the receiving, analysis, and management of patients referred for care.

YEAR 4: Career Options

CVM 5302. Professional Development IV. (2) One hour lecture. Three hours laboratory. Advanced communications skills. Professional writing and public speaking to the scientific audience.

CVM 5310. Small Animal Emergency and Critical Care Medicine. (4-6) Variable hours, four to six hours practicum. Supervised rotation in the small animal intensive care and emergency services. Emphasis on the evaluation and management of the critically ill or injured animal.

CVM 5380. Small Animal Internal Medicine 2. (6-8) Variable hours practicum. Advanced supervised rotation through the Small Animal Clinic. Students participate in the receiving, analysis, and management of patients referred for medical care.

Doctor of Veterinary Medicine

YEAR 1: Summer

CVM 5026-5036. Basic Concepts in Veterinary Medicine. (6,6) Six hours practicum. The study of fundamental concepts in veterinary medicine including anatomic perspectives, homeostasis, cell biology, concepts of health and disease, and principles of embryology.

YEAR 1: Fall

CVM 5049-5059. Principles of Veterinary Anatomy and Physiology. (9,9) Nine hours practicum. The study of basic principles of veterinary anatomy and physiology. A systems based approach to the understanding of structure and function of the animal body.

YEAR 1: Spring

CVM 5003. Professional Development I. (3) Lecture. An overview of the Veterinary Medical profession, orientation to the curriculum, student development, responsibilities, evaluation, professional ethics, and communication skills.

CVM 5013. Fundamentals of Clinical Science I. (3) Lecture/Laboratory. The initial application of knowledge and skills to decision-making to include animal care, handling, restraint, and behavior.

CVM 5069-5079. Introduction to The Interdisciplinary Study of Veterinary Medicine. (9,9) Nine hours practicum. Introduction to the study of veterinary medicine through an interdisciplinary approach. A case-based approach to understanding the interrelationships between structure, function, pathology, disease and therapeutics.
CVM 5392. Pharmacy. (4) Two hours practicum. Supervised clinical rotation in the pharmacy of the Animal Health Center. Students participate in all activities of these units.

CVM 5420. Advanced Rotation in Radiology. (2, 4) Two to four hours practicum. (Prerequisite: CVM 5204). (May be repeated for credit.) Areas of study include advanced radiographic and ultrasound techniques and interpretation and use of radioisotopes in therapy.

CVM 5430. Advanced Rotation in Anesthesiology. (1-6) Variable hours practicum. (Prerequisite: CVM 5144). (May be repeated for credit.) Areas of study include pre-anesthetic patient evaluation, and advanced techniques in anesthetic induction, anesthetic maintenance, patient monitoring and post-anesthetic care.

CVM 5444. Clinical Small Animal Practice. (4) Four hours practicum. (Prerequisite: Consent of instructor). This rotation provides students opportunities to develop problem solving, psychomotor and interpretive skills in an environment that closely simulates a high-quality private small animal practice.

CVM 5454. Advanced Rotation in Small Animal Surgery. (4) Four hours practicum. (Prerequisite: Consent of instructor). (May be repeated for credit). Students assume primary responsibility for the receiving, diagnosis, treatment and management of small animal surgery patients.

CVM 5464. Advanced Rotation in Equine Medicine and Surgery. (4) Four hours practicum. (Prerequisite: CVM 5266). (May be repeated for credit). Students assume primary responsibility for the resolving, diagnosis, treatment and management of equine patients.

CVM 5474. Advanced Rotation in Food Animal Practice. (4) Four hours practicum. (Prerequisite: CVM 5276). (May be repeated for credit). Students assume primary responsibility in problem analysis, case management and development of health maintenance programs for food animals.

CVM 5484. Advanced Rotation in Small Animal Internal Medicine. (4) Four hours practicum. (Prerequisite: CVM 5256). (May be repeated for credit). Students assume primary responsibility for patient diagnosis and care in small animal internal medicine.

CVM 5510. Veterinary Medicine/Animal Industry Externship 1. (1-6) Variable hours practicum. Rotation through private industry dealing with one of the major animal commodities. Rotation may include poultry, catfish, swine, dairy, beef or other commercial animal operation.

CVM 5520. Veterinary Medicine/Animal Industry Externship 2. (1-6) Variable hours practicum. Rotation through private industry dealing with one of the major animal commodities. Rotation may include poultry, catfish, swine, dairy, beef or other commercial animal operation.

CVM 5530. Veterinary Medicine/Animal Industry Externship 3. (1-6) Variable hours practicum. Rotation through private industry dealing with one of the major animal commodities. Rotation may include poultry, catfish, swine, dairy, beef or other commercial animal operation.

CVM 5540. Veterinary Medicine/Animal Industry Externship 4. (1-6) Variable hours practicum. Rotation through private industry dealing with one of the major animal commodities. Rotation may include poultry, catfish, swine, dairy, beef or other commercial animal operation.

CVM 5550. Veterinary Medicine/Animal Industry Externship 5. (1-6) Variable hours practicum. Rotation through private industry dealing with one of the major animal commodities. Rotation may include poultry, catfish, swine, dairy, beef or other commercial animal operation.

CVM 5560. Advanced Clinical Rotation 1. (1-6) Variable hours practicum. (May be repeated for credit). Supervised rotation through one of the defined units of the Animal Health Center. Students assume primary responsibility for patient diagnosis and care.

CVM 5570. Advanced Clinical Rotation 2. (1-6) Variable hours practicum. (May be repeated for credit). Supervised rotation through one of the defined units of the Animal Health Center. Students assume primary responsibility for patient diagnosis and care.

CVM 5580. Advanced Clinical Rotation 3. (1-6) Variable hours practicum. (May be repeated for credit). Supervised rotation through one of the defined units of the Animal Health Center. Students assume primary responsibility for patient diagnosis and care.

CVM 5612. Laboratory Animal Medicine. (2) Two hours lecture. An intensive in-depth review of veterinary responsibilities in institutional laboratory animal medicine. The course will emphasize laboratory animal problems seen in research colonies.

CVM 5622. Veterinary Diagnostic Toxicology. (2) (Prerequisite: Consent of instructor). Two hours lecture. Phase 2 elective emphasizes diagnosis and treatment of animal poisoning including environmental toxins.

CVM 5632. Advanced Large Animal Techniques. (2) (Prerequisite: Consent of instructor). Four hours laboratory. Provides students hands-on techniques experience required in a progressive large animal practice or an internship position at a veterinary hospital.

CVM 5644. Applied Gross Anatomy. (4) (Prerequisite: Consent of instructor). Eight hours laboratory. Phase 2 elective emphasizes review and further study of anatomy with relation to clinical and diagnostic applications.

CVM 5654. Applied Veterinary Parasitology. (4) Four hours practicum. (Prerequisite: Consent of instructor). Provides opportunities to use problem-solving skills in the diagnosis, treatment, and control of both newly emerging and commonly encountered parasitic diseases.

CVM 5662. Clinical Neurology. (2) (Prerequisite: Consent of instructor). Two hours lecture. Phase 2 elective emphasizes study of the nervous system, including the diagnosis and management of neuromuscular diseases.

CVM 5672. Veterinary Dentistry. (2) Two hours practicum. (Prerequisite: Consent of instructor). Phase 2 elective emphasizing diagnostic and therapeutic approach to dentistry in small animals and equine species.

CVM 5682. Veterinary Ophthalmology. (2) (Prerequisite: Consent of instructor). Two hours lecture. Phase 2 elective emphasizing the diagnosis and treatment of ophthalmic diseases.

CVM 5694. Veterinary Cardiology. (4) Two hours lecture. Two hours laboratory. An intensive study of veterinary cardiology as it relates to clinical diagnosis and case management.

CVM 5714. Advanced Small Animal Dermatology. (4) Three hour lecture. One hour laboratory. Advanced study of small animal dermatology. Emphasis will be on disease conditions with primary impact on the integumentary system of small animals.

CVM 5722. Small Ruminant Production Medicine. (2) (Prerequisite: CVM 5270). Two hours practicum. An elective focused on sheep and goat production. Experience in common surgery/treatment procedures provided. Small ruminant production medicine topics and current literature review discussed.

CVM 5734. Beef Cattle Production Medicine. (4) (Prerequisites: Must be either a 3rd or 4th year veterinary student in good standing and currently enrolled in an accredited college of veterinary medicine). Four hours lecture/lab. Lecture/lab class that will provide intensive instruction on beef cattle production medicine topics. Topics covered include cow/calf, stocker/background, and feedlot topics.

CVM 5754. Advanced Small Animal Surgery. (4) One hour lecture. Three hours laboratory. Exercises to provide additional understanding and “hands-on” experience for students interested in orthopedic surgery, neurosurgery, plastic and reconstructive surgery, and other selected specialties.

CVM 5764. Advanced Equine Reproduction. (4) (Prerequisite: Consent of instructor). Four hours lecture. Phase 2 elective emphasizing review of basic equine reproduction and exposure to advanced diagnostic and therapeutic modalities.

CVM 5772. Canine Theriogenology. (2) Two hour practicum. (Prerequisite: Consent of instructor). Advanced study of canine reproduction. Review of basic diagnostics and procedures followed by an introduction to assisted reproductive technology (ART).

CVM 5784. Clinical Behavioral Medicine. (4) (Prerequisite: Consent of instructor). Four hours lecture and discussion. Case oriented study of normal and abnormal behaviors and underlying influences in domestic animals, with focus on dogs, cats, and horses.

CVM 5814. The Feline Patient. (4) Four hours lecture. Lecture, group discussion, and focused independent study on a variety of feline-related topics, with emphasis on medical problems which are unique to the cat.

CVM 5824. Diagnostic Ultrasound. (4) Four hours practicum. (Prerequisites: Consent of instructor). Phase 2 elective emphasizing review of anesthesia cases and application of anesthesia techniques to the species of choice for each student.

will be placed on therapeutic alternatives for the treatment of specific diseases or syndromes.

CVM 5854. Aquarium Health Management. (4) (Prerequisite: Consent of instructor). Concepts and techniques for the maintenance of common aquarium species. This course will provide students opportunities to develop selected skills relating to aquarium medicine.

CVM 5862. Equine Lameness. (2) Two hour practicum. Advanced study of equine lameness. Provides opportunities to develop and use problem-solving skills in the diagnosis, treatment, and management of lameness and related topics.

CVM 5902. Job Search. (2) Two hours lecture. A proactive approach to developing a strategy for securing veterinary employment. Practice philosophy, resume preparation, interview skills, evaluation of potential employment, choosing the right position.

CVM 5912. Personal, Professional and Financial Success. (2) Two hour practicum. Develop an initial financial plan for first employment and beyond. Setting and achieving goals, expense budgets, contracts and contract negotiation, financial obligations, and investment strategy.

CVM 5990. Special Topics in Vet Med 1. (1-6) Variable hours practicum. (May be repeated for credit). Special topics in veterinary medicine, offers the opportunity to explore selected veterinary topics in depth.

Graduate-Level Courses

CVM 4104/6104. Avian Diagnostic Microbiology. (4) Two hours lecture. Four hours laboratory. A survey of methods used to identify and characterize avian pathogens, including isolation and cultivation of the microorganisms, and serological and biotechnological tools for diagnostics.

CVM 4113/6113. Avian Histopathology. (3) (Prerequisites: Consent of instructor). Two hours lecture. Three hours laboratory. An in-depth discussion of the histopathologic changes in avian tissues that are caused by infectious and non-infectious diseases.

CVM 4114/6114. Avian Pathology. (4) (Prerequisite: Consent of Instructor). Four hours lecture. Gross pathological findings of avian diseases are discussed and illustrated. Extensive training in different diagnostic offers is provided. Useful for candidates preparing for ACPV Board Examination.

CVM 4134/6134. Aquatic Animal Health Management. (4) (Prerequisite: One course in microbiology and one course in physiology). Three hours lecture. Three hours laboratory. Fundamentals concepts of preventing, diagnosing and treating economically important diseases in wild and cultured stocks and invertebrates through didactic and laboratory instruction.

CVM 4513/6513. Environmental Toxicology. (3) (Prerequisites: 8 hours biological sciences and 8 hours chemistry). Three hours lecture. The disposition and toxicological effects of environmentally-relevant toxicants (such as agrochemicals, petroleum and industrial pollutants) within organisms, and aquatic and terrestrial ecosystems.

CVM 7000. Directed Individual Study. Hours and credits to be arranged.

CVM 8000. Thesis Research/Thesis. Hours and credits to be arranged.

CVM 8011. Seminar. (1) One hour lecture. A seminar which provides the student with a forum for presentation of current topics in veterinary medical research.

CVM 8031. Current Topics in Molecular Mechanisms of Disease. (1) 1.5 hours discussion. The molecular biology of pathogens, hosts and their interactions are covered by students presenting recently published papers. This course can be taken six times.

CVM 8091. Current Topics in Production Animal Medicine. (1) 1.5 hour discussion. (Prerequisite: Consent of Instructor). A weekly seminar to address issues of current interest in production animal medicine (i.e., cattle, swine, poultry, aquaculture.) May be repeated four times for credit.

CVM 8105. Avian Medicine Externship. (5) (Prerequisite: Consent of instructor). Extensive field experience with poultry companies is provided. Breeder, pullet, layer, and broiler management, rations formulation, poultry inspection, and hatchery practices are emphasized.

CVM 8113. Advanced Diseases of Poultry. (3) Three hours lecture. Advanced study of the major poultry diseases; the mechanisms of each disease, diagnosis, prevention and control.

CVM 8132. Tissue Necropsy. (3) (Prerequisite: Consent of instructor). Three hour practicum. Identification of avian diseases will be learned through necropsy of birds submitted by the public. Confirmatory diagnostic tests and recommendations for clients are discussed. This course can be taken for repeated credit.

CVM 8134. Advanced Fish Diseases. (4) (Prerequisite: CVM 6134 or permission). Three hours lecture. Three hours laboratory. Detailed investigations into the mechanisms involved in the development and management of infectious and non-infectious diseases in fish.

CVM 8141. Seminar: Histopathology of Fish Diseases. (1) One hour lecture. (Prerequisite: CVM 6134 or equivalent). A weekly seminar addressing pathophysiology of fish diseases based on histologic interpretations of these materials. Emphasis will be on farm-raised channel catfish.

CVM 8143. Epidemiology/Biostatistics. (3) Three hours lecture. Fundamental principles of descriptive and analytical epidemiology.

CVM 8190. Aquatic Diagnostic Investigation. (1-9) (Prerequisite: CVM 6134, equivalent, or consent of instructor). Variable hours practicum. (May be repeated for credit). A practical exercise in diagnosis and therapeutic recommendations for health management and maintenance in aquatic animal medicine.

CVM 8301. Advanced Topics in Comparative Immunology. (1) 1.5 hours discussion. Current controversies, discoveries, and experimental approaches in comparative immunology will be covered by students’ presentations. This course can be taken 4 times for repeated credit.

CVM 8303. Advanced Immunology. (3) (Prerequisite: BIO 6413 or equivalent or consent from the instructor). Three hours lecture. Advanced theory and concepts of immunology, structure and function of immune mechanisms are discussed in detail.

CVM 8315. Immunological Techniques. (5) Two hours lecture. Six hours laboratory. An in-depth course to teach the student a variety of analytical methods of immunological research. (Same as BIO 8315).

CVM 8403. Principles of Pharmacology and Pharmacokinetics. (3) Three hours lecture. This course addresses basic principles of how the body reacts to the presence of a drug or toxin and the mathematical expression of drug residues.

CVM 8614. Helminthology. (4) (Prerequisite: BIO 1504 or equivalent). Three hours laboratory. This course will cover current concepts in morphology and identification, life cycle, and host-parasite relationships of helminthic parasites.

CVM 8624. Protozoology. (4) (Prerequisite: BIO 1504 or equivalent). Three hours lecture, two hours laboratory. This course will cover morphology and identification, life cycles, epidemiology and control of protozoans in vertebrates.

CVM 8701. Pathology Seminar. (1) One hour lecture. A seminar to develop analytic skills in diagnostic anatomical pathology (gross and histopathology).

CVM 8711. Histopath Descriptions. (1) (Prerequisite: Consent of instructor). One hour lecture. A practical approach to the development of descriptive writing skills for the communication of histologic lesions encountered in veterinary medicine. (Prerequisite: Concurrent of previous enrollment in CVM 8111 or equivalent.)

CVM 8723. Advanced General Pathology. (3) (Prerequisites: Consent of instructor). Three hours lecture. An in-depth discussion of basic pathophysiologic mechanisms. Emphasis will be placed on recent advances in understanding of cellular pathology.

CVM 8735. Mechanisms of Disease. (5) (Prerequisites: Acceptance to Dual Degree DVM/MS Program or Consent of Instructor). Five hour lecture. The course covers basic mechanisms of disease production in mammals. Topics include host response to microbial and toxic injury.

CVM 8790. Laboratory Diagnostic Services. (1-9) Variable hours practicum. (May be repeated for credit). Experimental training in laboratory investigation of animal health-related problems to include pathological, microbiological, parasitic, and toxicological problems.

CVM 8803. Advanced Small Animal Clinical Neurology. (5) (Prerequisite: Must already have registrable veterinary degree and consent of instructor). Advanced-level study of neurologic disease in small animals, with an emphasis on case management, oral and written presentation skills, and student teaching.

CVM 8890. Economic and Performance Medicine. (1-9) Variable hours practicum. (May be repeated for credit). (Prerequisite: Consent of instructor). Advanced training in the identification and management of health related problems in commercial food animal production units.

CVM 8990. Special Topics in Veterinary Medicine. (1-9) Variable hours practicum. (May be repeated for credit). (Prerequisite: Consent of instructor). Advanced training in the identification and management of health related problems in commercial food animal production units.

CVM 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.
**DIVISION of TECHNOLOGY**

**MERIDIAN CAMPUS ONLY**

**DTF 4000. Directed Individual Study.** Hours and credits to be arranged.

**DTF 4613. Implementation of Technology.** (3) (Prerequisite: Consent of instructor prior to internship). Three hours lecture. Theoretical and practical methods for implementation of project proposal.

**DTF 4923. Technology Career Seminar.** (3) (Prerequisite: DTF 4926). Three hours lecture. Critical evaluation of current issues in technology, examination of career opportunities and approved project completion status.

**DTF 4936. Technology Field Practicum I.** (6) (Corequisite: DTF 4926). The course provides students opportunities to apply contemporary practices by completing a minimum of 340 supervised hours in an approved industry.

**DTF 4946. Technology Field Practicum II.** (6) (Prerequisite: DTF 4936 or concurrent enrollment in DTF 4936). The course provides students opportunities to apply contemporary practices by completing a minimum of 340 supervised hours in an approved industry.

**DTF 4990. Special Topics in DTF.** (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years.)

---

**Department of FINANCE and ECONOMICS**

**Office: 326 McCool Hall**

Professors Campbell, Duett, Grimes, Kohers and Liano; Associate Professors Blair, Gilmer, Kelly, White and Rogers; Assistant Professors de Haas, Hardin and Millea

**EC 1033. Economics of Social Issues.** (3) Three hours lecture. Basic economic principles introduced and developed through the study of important social issues such as unemployment, health care, poverty, crime, pollution, inflation, and government debt. (Not open to students with prior credit in Principles of Economics).

**EC 2113. Principles of Macroeconomics.** (3) (Prerequisite: Sophomore standing.) Three hours lecture. Introduction to macroeconomics: enterprise principles, policies, institutions; national income, employment, output, inflation, money, credit, business cycles, and government finances.

**EC 2123. Principles of Microeconomics.** (3) (Prerequisite: EC 2113 and Sophomore standing.) Three hours lecture. Introduction to microeconomics: emphasizes American industrial structure, demand and supply, pricing and output, income distribution, factor pricing, international trade.

**EC 2990. Special Topics in Economics.** (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

**EC 3113. Intermediate Macroeconomics.** (3) (Prerequisites: EC 2113 and EC 2123). Measurement and determination of national income, employment, and output; economic significance of consumption, saving, investment, foreign trade, money and prices, fiscal and monetary policy.

**EC 3123. Intermediate Microeconomics.** (3) (Prerequisites: EC 2113 and EC 2123). Theory and application of microeconomics: demand, supply, optimal consumer choice, production, cost, profit-maximizing pricing and output decisions, employment of resources, externalities, efficiency and welfare.

**EC 3223. Introduction to Industrial Organization.** (3) (Prerequisites: EC 2113 and EC 2123). Three hours lecture. Structure and performance of large corporations, economic effects of antitrust, governmental policy toward competitive practices, regulation of monopoly and natural resources.

**EC 3333. Managerial Economics.** (3) (Prerequisites: EC 2113 and EC 2123). Three hours lecture. Examination of the evolution and composition of the economic relationships between government and business in the U.S.; including the regulation of public utilities and anti-trust.

**EC 3423. Government and Business.** (3) (Prerequisites: EC 2113 and EC 2123). Three hours lecture. Examination of the evolution and composition of the economic relationships between government and business in the U.S.; including the regulation of public utilities and anti-trust.
EC 4433/6433. Problems in State and Local Finance. (3) (Prerequisites: EC 2113 and EC 2123). Three hours lecture. Fiscal importance and economic effects of state and local budgets; trends in taxation, expenditures, fiscal administration, and budgeting fiscal economic development.

EC 4523/6523. History of Economic Thought. (3) (Prerequisites: EC 2113 or consent of instructor). Three hours lecture. Survey of economic ideas from Ancient Greece to present, emphasizing the changing foci and methodologies of economics relative to economic problems perceived at the time.

EC 4990/6990. Special Topics in Economics. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

EC 7000. Directed Individual Study. Hours and credits to be arranged.

EC 8000. Thesis Research/Thesis. Hours and credits to be arranged.

EC 8043. Survey of Economics. (3) (Prerequisite: Graduate standing). Three hours lecture. Introduction to macro and microeconomics, national income accounts, monetary system, macroeconomic policy, international trade, supply and demand, distribution of income, markets, pricing, and output.

EC 8103. Economics for Managers. (3) (Prerequisites: EC 2113, EC 2123). Three hours lecture. Primarily for masters-level candidates. Exposition of the fundamental theoretical and analytical tools of economics used by business managers engaged in decision making.

EC 8113. Labor Theory and Analysis. (3) (Prerequisites: Graduating Standing). Three hours lecture. Theoretical and empirical examination of labor market processes and policy; Wage determination, resource allocation, labor mobility, human capital investment, discrimination, and income distribution.

EC 8133. Econometrics I. (3) (Prerequisites: AEC 8413 or consent of instructor). Econometric theory and methods. Topics include the classical linear regression model, maximum likelihood estimation, generalized least squares, and estimation with panel data.

EC 8143. Econometrics II. (3) (Prerequisite: EC 8133). A continuation of EC 8133. Topics include advanced theories of simultaneous equations estimation methods, time series econometrics, and estimation with qualitative and limited dependent variables.

EC 8163. Microeconomics. (3) (Prerequisite: EC 3123 or EC 8103 or equivalent). Three hours lecture. Survey of demand analysis, production, cost, and supply relationships, analysis of pricing under competitive and noncompetitive conditions, analysis of income distribution with emphasis on input pricing.

EC 8173. Macroeconomics. (3) (Prerequisites: EC 3113, EC 3123, and one semester of calculus, or consent of instructor). Three hours lecture. Synthesis of short and long run analysis of the macroeconomy with special emphasis on the role of fiscal and monetary policy.

EC 8183. Industrial Organization. (3) (Prerequisites: EC 8103 or equivalent). Examination of theory and empirical studies concerned with industrial structure and performance with emphasis on the structure performance paradigm, anti-trust, and regulatory issues.

EC 8263. Microeconomics II. (3) (Prerequisite: EC 8163). Three hours lecture. An exposition of general equilibrium theory, the theory of welfare economics and the economics of information.

EC 8273. Macroeconomics II. (3) (Prerequisites: EC 8173 or equivalent). Three hours lecture. Examination of the modern macroeconomic synthesis. Studies in dynamic economic growth, rational expectations, monetarism, disequilibrium analysis, and open market economies.

EC 8323. Economic Analysis of Developing Nations. (3) (Prerequisites: 9 hours in economics, including EC 6303 or consent of instructor). Three hours lecture. In-depth analysis of economic issues of developing nations and emerging markets; emphasis on public policies to promote economic growth and transition.

EC 8423. Public Finance. (3) (Prerequisites: EC 2113, EC 2123 and graduate standing). Three hours lecture. Economics of public sector in capitalist system. Emphasizes government budget influences on distribution, resource allocation, stability, growth; stresses taxation, expenditure, and budgeting, public choice and debt management.

EC 8522. Seminar in the History of Economic Thought. (3) (Prerequisite: Graduate standing or consent of the instructor). The evolution of economic ideas from Ancient Greece to present. Emphasis is placed on the role of heterodoxy and the rise of new paradigms.

EC 8990. Special Topics in Economics. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

EC 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

Department of ELECTRICAL and COMPUTER ENGINEERING
Office: 216 Smirall Electrical Engineering Building

Professors Bennett, Donohoe, Grzybowski, Hagler, Harden (Interim Head), King, Molen, Moorhead, Picone, Trotter, Winton, and Younan

Associate Professors Fowler, Mazolla, Reese, and Schulz;

Assistant Professors J. Bruce, L. Bruce, Casady, Chu, Follett, Hu, Koshka, and Lazarou

ECE 1002. Introduction to Electrical & Computer Engineering. (2) (Prerequisite: Credit or registration in MA 1713). One hour lecture. Three hours laboratory. What is means to be an engineer, engineering ethics, engineering modeling, the design process, areas of ECE, communication skills, ECE computer account, MATLAB, the internet.

ECE 2990. Special Topics in Electrical or Computer Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

ECE 3000. Research. (Prerequisite: Senior standing in Electrical or Computer Engineering). Hours and credits to be arranged. Independent physical, analytical, or statistical investigations.

ECE 3144. Circuit Analysis I. (4) (Prerequisites: Credit or registration in ECE 1002, MA 3113, and PH 2223). Three hours lecture. Three hours laboratory. Definitions and fundamental laws of electrical engineering, DC circuit analysis, network theorems, circuit elements, transient analysis, sinusoidal steady-state analysis for single and poly-phase circuits.

ECE 3153. Circuit Analysis II. (3) (Prerequisites: Grade of C or better in ECE 3144. Credit or registration in MA 3253). Three hours lecture. Transient response of circuits with energy storage devices; magnetically coupled circuits; resonance in parallel and series RLC circuits; two-port circuits; Laplace transforms, system analysis.

agitation in dielectrics and conductors, radiation, transmission lines, guides waves.

ECE 3414. Fundamentals of Energy Systems. (4) (Prerequisite: ECE 3313 and a grade of C or better in ECE 3144). Three hours lecture. Three hours laboratory. Synthesis and applications of an energy system; power system standards relating to design, professional ethics and industry standards relating to design, professional ethics, career design skills.

ECE 3532. CPE Design I. (2) (Prerequisite: CPE 2324 or equivalent). Three hours laboratory. Prototyping, documentation, and oral presentation of a team-based design project. Lectures on legal aspects and industry standards relating to design, professional ethics, career design skills.

ECE 4522. EE Design II. (2) (Prerequisite: ECE 4512). One hour lecture. Three hours laboratory. Prototyping, documentation, and oral presentation of a team-based design project. Lectures on legal aspects and industry standards relating to design, professional ethics, career design skills.

ECE 4532. CPE Design I. (2) (Prerequisite: CPE 2324, ECE 4743, and consent of instructor). One hour lecture. Three hours laboratory. Prototyping, documentation, and oral presentation of a team-based design project. Lectures on legal aspects and industry standards relating to design, professional ethics, career design skills.

ECE 4542. CPE Design II. (2) (Prerequisite: ECE 4532). One hour lecture. Three hours laboratory. Prototyping, documentation, and oral presentation of a team-based design project. Lectures on legal aspects and industry standards relating to design, professional ethics, career design skills.

ECE 4990/6990. Special Topics in Electrical or Computer Engineering. (3) (Prerequisite: Corequisite of consent of instructor). Three hours lecture. Theoretical foundation, algorithms, structures, and implementations. Application to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

ECE 7000. Directed Individual Study. Hours and credits to be arranged.

ECE 8000. Thesis Research/Thesis. Hours and credits to be arranged.

ECE 8013. Switching Theory I. (3) (Prerequisites: ECE 3254, ECE 4713/6713; CS 4113/6113 or consent of instructor). Three hours lecture. Theory of combinational and sequential (synchronous and fundamental-mode) circuits with emphasis on performance, robustness, cost, and testability objectives.

ECE 8023. Switching Theory II. (3) (Prerequisite: ECE 8013). Three hours lecture. The study of self-timed circuit design techniques; emphasis on elimination of timing considerations from digital circuit design to improve reliability, desirability and speed.

ECE 8053. Introduction to Computer Arithmetic. (3) (Prerequisites: ECE 4623/6623). Three hours lecture. Fixed point number systems, algorithms and associated logic level implementations for fixed point addition, subtraction, multiplication, and division; floating-point formats and operation.

ECE 8063. Parallel Computing Architectures I. (3) (Prerequisites: ECE 8063 or consent of instructor). Three hours lecture. Study of hardware structures relevant to concurrent computing; evaluation and design methods associated with memory, pipelining, and multiple processors.

ECE 8073. Parallel Computing Architectures II. (3) (Prerequisite: ECE 8063 or consent of instructor). Three hours lecture. Study of communication structures and routing methods that are central to concurrent computing, multiple computers, and data flow machines.

ECE 8113. Linear Systems Analysis I. (3) Three hours lecture. Laplace transformation; systems concepts; Fourier transformation; physical realizability; distributed-parameter systems; time-varying parameter systems; sample data systems.

ECE 8253. Solid State Electronics III. (3) (Prerequisite: ECE 4263/6263). Three hours lecture. Electrical theory of semi-conductors based on wave mechanical and thermodynamical foundations.

ECE 8273. VLSI Systems I. (3) (Prerequisite: ECE 4263/6263). Three hours lecture. VLSI design extended into controller concepts, self-timed logic; system design with CAD tools, parameterized block generators, silicon compilers; projects submitted to commercial silicon foundries.

ECE 8313. Electromagnetic Theory. (3) (Prerequisite: ECE 3254). Three hours lecture. Static boundary value problems, conformal transformation; Schwarz-Christoffel transformation; harmonics; applications of Maxwell’s equations to plane waves in dielectrics and conductors; antennas and radiation. (Same as PH 3131)

ECE 8373. Adaptive Signal Processing. (3) (Prerequisites: ECE 4773/6773 or consent of Instructor). Three hours lecture. Linear combiners, theory of adaptation with stationary signals, algorithms and structures. Applications included.

ECE 8401. Current Topics in Remote Sensing. (1) (Prerequisite: Consent, Credit or registration in ECE 4423/6423 or PSS 4483/6483 or ABE 4483/6483. One hour lecture. Review of current literature dealing with the technical issues of remote sensing technologies.

ECE 8413. Digital Spectral Analysis. (3) (Prerequisite: ECE 3163 or consent of instructor). Three hours lecture. Spectral estimation problem, classical methods, parametric modeling, statistical estimation, sinusoidal estimation, and high order spectra. Time series applications.

ECE 8423. Adaptive Signal Processing. (3) (Prerequisite: ECE 3163 or consent of Instructor). Three hours lecture. Adaptive filtering, theoretical foundation, algorithms, structures, and implementations. Applications are included.

ECE 8433. Statistical Signal Processing. (3) (Prerequisite: MA 4533/6533 or consent of Instructor). Three hours lecture. Detection theory and design, statistical decisions, Bayes, and Neymen-Pearson detection, asymptotic performance, signal processing applications.

ECE 8443. Pattern Recognition. (3) (Prerequisite: MA 4533/6533 or consent of Instructor). Three hours lecture. Classification, detection, and description of pattern recognition, patterns and feature extractions, engineering approaches including statistical and syntactic, and signal processing applications.

ECE 8453. Introduction to Wavelets. (3) (Prerequisite: ECE 3163 or consent of Instructor). Three hours lecture. Wavelet-expansion systems, wavelet transform, multiresolution analysis, time-frequency analysis, filter banks and the discrete wavelet design, wavelet-based applications.

ECE 8463. Fundamentals of Speech Recognition. (3) (Prerequisites: ECE 4413/6413 or consent of Instructor). Three hours lecture. Automatic Phonetics; Linear Prediction; Feature Extraction; Dynamic Programming and Time-Warping; Hidden Markov Models; Statistical Language Modeling; Decision Trees; Introduction to Natural Language Processing; Implementation Issues.

ECE 8473. Digital Image Processing. (3) (Prerequisites: CS 1323, CS 1314 or equivalent, ECE 4773/6773 or equivalent, or consent of instructor). Three hours lecture. A study of digital image processing principles, concepts, and algorithms; mathematical models; image perception; image sampling and quantization, transforms, image coding.

ECE 8483. Image and Video Coding. (3) (Prerequisite: ECE 8473 or consent of Instructor). Three hours lecture. Intraframe video coding, interframe prediction coding, intraframe transform coding, still-image coding standards, motion compensation, video-coding standards, image transmission and error control.

ECE 8523. Wafer Scale Integration. (3) (Prerequisites: Graduate standing and consent of Instructor). Three hours lecture. The study of wafer scale integration, a technology that enables the fabrication of monolithic chips as large as a full silicon slice; yield analysis and optimization.

ECE 8613. Advanced Power Systems Analysis. (3) (Prerequisite: ECE 4613/6613 or equivalent). Three hours lecture. Application of symmetrical components to the analysis of power systems, impedances of transmission lines; unsymmetrical faults; representation of transformers and rotating machines; stability and control.

ECE 8623. Stability and Control of Power Systems. (3) (Prerequisite: Consent of instructor). Three hours lecture. Transient and dynamic stability; effect of excitation on stability; control of system in steady state (ACC); economic dispatch.

ECE 8643. Power System Planning. (3) (Prerequisite: Consent of instructor). Three hours lecture. Load forecasting, generation system reliability and cost analysis, transmission system reliability analysis.

ECE 8653. Advanced Energy Conversion. (3) (Prerequisite: ECE 3414). Three hours lecture. Development of Analytical Expressions for 3 synchronous and induction machines; d-q axis transformation; transformer analysis. Description and analysis of ac-dc and dc-ac power conversion devices.

ECE 8663. High Voltage Engineering. (3) (Prerequisite: ECE 3131). Three hours lecture. Emission, mobility, breakdown, corona, arcs and insulation, generation, measurement, analysis, dielectric materials, design laboratory demonstration.

ECE 8693. Power Systems Seminar. (3) (Prerequisite: Consent of instructor). Three hours lecture. Current research and development topics in power system planning and operation.

ECE 8913. Advanced Feedback Control Systems. (3) (Prerequisite: ECE 4913/6913). Three hours lecture. Review of linear feedback systems: root locus; signal flow diagrams; stability criteria; distributed parameter systems; self-adaptive control systems.

ECE 8923. Non-Linear Control Systems. (3) (Prerequisite: ECE 4913/6913 or equivalent). Three hours lecture. A study of techniques available to analyze non-linear system and a study of associated synthesis procedures.

ECE 8933. Random Processes in Automatic Control. (3) (Prerequisite: ECE 4913/6913 or equivalent). Three hours lecture. Principles and application of statistical design; random processes in automatic control; time invariant systems.

ECE 8943. Theory of Optimal Control. (3) Three hours lecture. State variable description of systems; maximum principle of Pontryagin, optimization of linear systems with quadratic performance measures; time optimal and fuel optimal systems.

ECE 8953. Sampled Data Control Systems. (3) (Prerequisite: ECE 4913/6913). Three hours lecture. Basic theory of sampling; Z-transform theory and analysis; modified Z-transform; design principles.
ECE 8963. Digital Control Systems. (3) (Prerequisites: ECE 4913/6913 and ECE 4923/6923 or consent of instructor). Three hours lecture. Z-Transform theory and analysis; modified x-transform; design principles; digital state observers; introduction to optimal control, introduction to computer-aided digital control system design and analysis.

ECE 8990. Special Topics in Electrical or Computer Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

ECE 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

EDUCATIONAL LEADERSHIP

Office: 100 Industrial Education Building
Major Advisor: Anthony A. Olinzock

(For departmental information, see INSTRUCTIONAL SYSTEMS, LEADERSHIP, and WORKFORCE DEVELOPMENT.)

EDA 8163. Public School Finance. (3) Three hours lecture. Legal and other factors governing financial policies and practices in public schools; sources of revenue; budgeting; disbursement of funds; school plant; records; insurance.

EDA 8190. Workshop in Educational Administration and Supervision. (1-3) This course is for practicing school administrators who need courses of varying length, format, and focus in areas not covered by the regular curriculum.

EDA 8213. Internship in Supervision and Administration. (3) Opportunity under direct supervision of regular university staff for practical experience in the major area of interest. May be repeated for credit.

EDA 8223. Seminar in Administration. (3) (Prerequisite: Administrative experience or graduate standing). Three hours lecture. Specialized study of selected problems in school administration; research.

EDA 8273. Educational Administration and Supervision. (3) (Prerequisite: Advanced graduate standing). Three hours lecture. Fundamentals of leading and managing at the central office executive level, e.g., assistant superintendent. Emphasis on policy development, curriculum and instruction, planning, operations, and public relations.

EDA 8283. Educational Leadership. (3) (Prerequisite: EDA 8113). Three hours lecture. Nature of educational leadership. The roles of leadership in staff and program development, diffusion of innovations, and the uses of power in making educational decisions.

EDA 8293. Professional Development of Educational Personnel. (3) (Prerequisites: EDL 8143). Three hours lecture. Collaborative approaches to processes of individual and group professional development for instructional and non-instructional personnel; ensuring, supporting, enhancing best practices for teaching, learning, school improvement.

EDA 8323. Educational Facilities Design. (3) Three hours lecture. Studies design issues in learning environments facilities, examines contemporary design models, their impact on learning and uses this information in the design process.

EDA 8343. School Personnel Administration. (3) Three hours lecture. Various dimensions of school personnel administration; principles, recruitment, selection, and practices essential to a functional integration of the individual into the school system.

EDA 8353. Applications of Theory to Educational Administration. (3) Three hours lecture. The nature of theory; types of educational administrative theories; uses of organizational and administrative theory in school administrative problem solving; applications of general systems theories in education.

EDA 8383. Ethical Decision Making in Educational Administration. (3) (Prerequisites: EDA 8283 or HED 8123). Three hours lecture. Case studies are used to analyze educational decisions. Multiple decision models and ethical concepts are applied to problems and moral dilemmas.

EDA 8990. Special Topics in Educational Leadership. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

Department of CURRICULUM and INSTRUCTION

Professors Grace, Hare, Howard (head), McGrath, Person, Verhoek-Miller;
Associate Professors: Coats, Hamil, Minchew, Swafford, and Xu;
Assistant Professors: Brenner, Brocato, Burroughs, E. Groce, R. Groce, Hobson-Horton, Jayroe, Kurz, and Prince;
Visiting Barksdale Professors: Dillard, Pope; Lecturer Franz

ELEMENTARY EDUCATION

Office: 314 Allen Hall

EDE 2511. Introduction to Elementary Education. (1) One hour lecture. Field based. Introduction to elementary education with emphasis on observation of elementary age children and participation in classroom activities. Provisions will be made for discussion of observations and participation.

EDE 2990. Special Topics in Elementary Education. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Course limited to two offerings under one title within two academic years).

EDE 3123. Practicum: Early Childhood Education. (3) (Prerequisite: Admission to teacher education). Two hours lecture. Two hours laboratory. Overview of purposes, needs and methodology for early education; study of good schools for young children with emphasis on kindergarten/primary education through practicum experiences.

EDE 3233. Teaching Children’s Literature. (3) Three hours lecture. Children’s reading interests; nursery rhymes; verse; tales and legends; current literature for children in elementary schools.

EDE 3343. Teaching Adolescent Literature. (3) Three hours lecture. A study of the types of literature read by older children and adolescents with emphasis upon the criteria for the choice of good books and knowledge of available books and teaching materials.

EDE 3443. Creative Arts in the Elementary School. (3) (Prerequisite: Admission to teacher education). Two hours lecture. Two hours laboratory. Study and creative work in simple media suitable for children in the elementary school.

EDE 4000. Directed Individual Study. Hours and credits to be arranged.

EDE 4113. Science for Children. (3) (Prerequisite: Concurrent enrollment in EDE 4113, EDE 4123, and EDE 4133). Field-based. Selection, organization and presentation of natural science content for elementary school children; assessment of pupil progress and general effectiveness of instruction.

EDE 4123. Elementary School Arithmetic. (3) (Prerequisite: Concurrent enrollment in EDE 4113, EDE 4123, and EDE 4143). Field-based. Selection, organization and presentation of content in elementary school mathematics; assessment of pupil progress and general effectiveness of instruction.

EDE 4133. Language Arts. (3) (Prerequisite: Concurrent enrollment in EDE 4113, EDE 4123, and EDE 4143). Field-based. Selection, organization and presentation or content in the language arts for elementary school children; assessment of pupil progress, and general effectiveness of instruction.

EDE 4143. Social Studies in Elementary Schools. (3) (Prerequisite: Concurrent enrollment in EDE 4113, EDE 4123, and EDE 4133). Field-based. Selection, organization and presentation of social science content for elementary school children; assessment of pupil progress and general effectiveness of instruction.

EDE 4887.4888. Student Teaching in Elementary Education. (7, 8) (Both courses to be taken concurrently). (Prerequisites: Admission to Teacher Education and completion of all professional courses). Supervised observation and directed teaching in elementary school classrooms; periodic seminars to include legal, professional, administrative, and curriculum issues in the elementary school.

EDE 4990/6990. Special Topics in Elementary Education. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Course limited to two offerings under one title within two academic years).
EDE 7000. Directed Individual Study. Hours and credits to be arranged.

EDE 8000. Thesis Research/Thesis. Hours and credits to be arranged.

EDE 8423. Elementary School Methods. (3) Three hours lecture. Seminar-type course in synthesis of methods and techniques applicable to elementary teaching: readings; reports; research.

EDE 8433. The Elementary School Curriculum. (3) Three hours lecture. Principles of curriculum construction as they apply to the elementary school program.

EDE 8443. Seminar in Elementary Education. (3) Three hours lecture. A study of current issues in elementary education. Designed for elementary and school administration majors.

EDE 8463. Readings and Research in Children's Literature. (3) Three hours lecture. Semi-independent study in literature for children and youth, characteristics, good literature for children, illustrators, illustrations, and place of children's literature in the school.

EDE 8473 The Elementary Social Studies Curriculum. (3) Three hours lecture. Seminar-type course to include research; trends, methods; provision for individual differences; multi-level materials.

EDE 8493. Teaching Biological Science in the Elementary Schools. (3) Three hours lecture. A study of language development; the language arts curriculum for young children. Observation and participation in a preschool.

EDE 8513. Curriculum and Program Development in Early Childhood Education. (3) Three hours lecture. The recent and most promising developments in curriculum for preschool through primary aged children.

EDE 8523. Practicum: Language Arts and Literacy Development in Early Childhood Education. (3) (Prerequisites: EDE 4133, RDG 3113, RDG 3213, or the equivalent). Two hours lecture. Two hours laboratory. A study of language development; the language arts curriculum for young children. Observation and participation in a preschool.

EDE 8533. Behavioral Experiences in Early Childhood Education. (3) Three hours lecture. The world of the child from preschool through early primary years with emphasis on child behavior.

EDE 8543. Mathematics Experiences in Early Childhood Education. (3) (Prerequisites: EDE 4123 or the equivalent). Three hours lecture. Materials, methods and the preparation and use of instructional media in providing mathematical experiences for young children. Observation and participation in a preschool.

EDE 8893. Readings in Elementary Education. (3) (Prerequisites: Doctoral or Specialist standing or consent of the instructor). Readings and in-depth discussions to include innovation, controversy, and authoritative studies in the field.

EDE 8990. Special Topics in Elementary Education. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Course limited to two offerings under one title within two academic years).

EDE 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

EDE 9413. Practicum in College Teaching. (3) Three hours practicum. Teaching of at least one course in education, under the supervision of a senior staff member. (Same as EDS 9413)

EDE 9420. Research Practicum in Elementary Childhood Education. (1-6). (Prerequisites: EDE 8513, EDE 8523, EDE 8533, EDE 8543). Research experiences through participation, observation, and experimental projects related to early childhood settings.

EDUCATIONAL FOUNDATION and CORE COURSES

EDE 2990. Special Topics in Educational Foundation. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Course limited to two offerings under one title within two academic years).

EDE 3243. Planning and Managing Learning. (3) (Prerequisites: Completion of EDF 3333 Social Foundations and EDF 3143 Human Development and Learning and concurrent enrollment in EDF 3523 Evaluation Learning). Three hours lecture. A study of variables contributing to efficiency and competency in planning for teacher-learner activities and the creation and maintenance of positive learning environment.

EDE 3413. Writing for Thinking. (3) (Prerequisites: Completion of EN 1103 and 1113 or equivalent with grade of C or better in each and junior standing). Two hours lecture. Two hours laboratory. Designed to enhance participants' writing/thinking skills and to prepare participants to use writing as a learning process with groups they teach or lead.

EDE 4990/6990. Special Topics in Educational Foundation. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Course limited to two offerings under one title within two academic years).

EDE 8323. Comparative Education. (3) Three hours lecture. Contemporary educational movements in Denmark, France, Great Britain, India, the Soviet Union, and the United States; technical changes and their effects. Spring semester.

EDE 8353. Principles of Curriculum Development. (3) Three hours lecture. An examination of principles, problems, and practices influencing curriculum planning; relationships between elementary and secondary school curriculums; research in general curriculum problems. Fall, Spring, Summer terms.

EDE 8363. Function and Methods of Research in Education. (3) Three hours lecture. The function of research in the development and conduct of the educational program; research methods and techniques in education and the contributions of research to public education; rules and principles governing evidence and conclusions. Fall, Spring, Summer terms.

EDE 8383. Issues in Education. (3) Three hours lecture. A critical study of current issues in education.

EDE 8393. History of Education in the United States. (3) Three hours lecture. A history of the growth and development of education in the United States from earliest Colonial times to the present, including recent movements and trends.

EDE 8990. Special Topics in Educational Foundation. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Course limited to two offerings under one title within two academic years)

EDE 9313. Philosophy of Education. (3) Three hours lecture. An examination of educational beliefs and their justification. Fall, Spring, Summer terms.

EDE 9353. Interdisciplinary Seminar in Education. (3) Three hours lecture. A problem course considering accomplishments and needs in professional education as viewed from the interdisciplinary approach.

EDE 9373. Educational Research Design. (3) (Prerequisites: EDE 8363 and EDF 6214 or equivalents; consent of instructor). Three hours lecture. A study of various designs of research and preparation of research proposals. Fall, Spring, Summer terms.

EDE 9443. Single-Subject Research Designs for Education. (3) Three hours lecture. A detailed examination of single-subject research designs and their associated research methods including data collection and data evaluation techniques. Spring, Summer terms.

EDE 9453. Qualitative Techniques in Educational Research. (3) (Prerequisites: EDF 8214, EDE 9373). Three hours lecture. Theoretical considerations and applied methods, techniques, and analysis of field based educational research. Spring, Summer terms.
EDUCATIONAL LEADERSHIP
Office: 100 Industrial Education Building
Major Advisor: Anthony A. Olinzock

(For departmental information, see INSTRUCTIONAL SYSTEMS, LEADERSHIP, and WORKFORCE DEVELOPMENT)

EDL 8113. Contexts of Educational Leadership. (3) Three hours lecture. Exploration of the educational leader’s responses to historical, philosophical, sociocultural, democratic and educational contexts affecting leadership; school culture and climate; change processes for school improvement.

EDL 8123. Principles of Educational Leadership. (3) (Prerequisites: EDL 8113). Three hours lecture. Applying democratic processes to school governance and leadership; decision making; consensus building; empowerment; vision; mission; and school improvement.

EDL 8143. Educational Leaders as Instructional Supervisors. (3) Three hours lecture. Applying interpersonal and clinical skills, techniques and approaches in the observation, supervision, and empowerment of teachers and in the facilitation of teaching and learning environments.

EDL 8163. Educational Budgeting and Resource Allocation. (3) Three hours lecture. Administrative leadership for organization, management, allocation or resources to enhance and support teaching and learning; four modules: budgeting, facilities, personnel, student and family services.

EDL 8173. Legal and Ethical Perspectives of Leadership in Schools. (3) Three hours lecture. Examination of legal and ethical issues in educational leadership. Analysis of impact of laws and legal decisions on policy formation and decision implementation in education.

EDL 8193. Educational Environments. (3) (Prerequisites: EDL 8201 and EDL 8202). Three hours lecture. Capstone course of Master’s/Specialist AA Certification program. Theories, roles, functions of leadership in educational environments; organizational structures; community and board relationships; policy; strategic planning.

EDL 8213. Internship I: Observation and Field Applications. (3) (Prerequisites: EDL 8113, EDL 8123 and EPY 8223). Interns experience designated observation, authentic application, and mentorship activities at educational sites under joint supervision of university and school-based leaders.

EDL 8223. Internship II: Administrative Applications. (3) (Prerequisites: EDL 8163, EDL 8173, EPY 9263, and EDL 8213). Interns observe and apply techniques of administrative leadership in authentic educational situations under joint supervision of university and school-based staff at school sites.

EDL 8233. Internship III: Instructional Applications. (3) (Prerequisites: EDL 8223, EDL 8143, EDL 8193, EDL 8213, EDL 8223 or approval of the instructor). Focus on instructional leadership experiences; designated culminating internship activities at school sites; joint supervision by university staff and school- and or district-based leadership.

EDL 8990. Special Topics in Educational Leadership. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Course limited to two offerings under one title within two academic years.)

SECONDARY EDUCATION
Office: 314 Allen Hall

EDS 2990. Special Topics in Secondary Education. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Course limited to two offerings under one title within two academic years.)

EDS 3411. Practicum in Secondary Education. (1) Observation (30 hours) of secondary age children and participation in classroom activities prior to the directed teaching.

EDS 4000. Directed Individual Study. Hours and credits to be arranged.

EDS 4653/6653. Teaching of Science. (3) Three hours lecture. Field based. Aims and techniques of teaching science in high schools including selection, organization, and presentation of subject matter.

EDS 4873. Professional Seminar in Secondary Education. (3) (Prerequisites: Admission to Teacher Education and senior standing). Three hours lecture. A seminar dealing with legal, professional, administrative, and curriculum issues as they relate to secondary education in the schools.

EDS 4886.4896. Student Teaching in Secondary Education. (6,6) (Both courses to be taken concurrently). (Prerequisites: Admission to Teacher Education and senior standing). Supervised observation and direct teaching in respective field of endorsement.

EDS 4990/6990. Special Topics in Secondary Education. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years.)

EDS 7000. Directed Individual Study. Hours and credits to be arranged.

EDS 8000. Thesis Research/Thesis. Hours and credits to be arranged.

EDS 8103. Advanced Methodologies in Middle and Secondary Education. (3) (Prerequisite: TKT 1273 or equivalent). Three hours lecture. Using technology as instructional tools, evaluate software, consider ethical issues; design technology-based classrooms, mini-grants, and lesson modules aligned with curriculum standards.

EDS 8613. Middle and Secondary School Curriculum. (3) Three hours lecture. Principles of curriculum construction as they apply to the middle and secondary school and the various subject areas. Fall term.

EDS 8633. Problems of Secondary Education. (3) (Prerequisite: Master’s degree or consent of instructor). Three hours lecture. Study of critical problems in secondary education. Spring term.

EDS 8643. Directed Reading in Secondary Education. (3) intensive supervised readings in the field of secondary education.

EDS 8713. Curriculum Adjustments. (3) Three hours lecture. Adjusting the school curriculum to meet individual pupil differences.

EDS 8990. Special Topics in Secondary Education. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years.)

EDS 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

EDS 9413. Practicum in College Teaching. (3) Three hours practicum. Teaching of at least one course in education, under the supervision of a senior staff member. (Same as EDE 9413)

EDS 9603. Practicum in College Teaching of Secondary Education. (3) Teaching of at least one course in education under the supervision of a senior staff member. Supervision of student teachers.
SPECIAL EDUCATION
Office: 314 Allen Hall
(For departmental information, see COUNSELING, EDUCATIONAL PSYCHOLOGY and SPECIAL EDUCATION.)

EDX 2101. Laboratory Experiences in Special Education. (1) Observation of children in special education and participation in classroom activities prior to the directed teaching.

EDX 2990. Special Topics in Special Education. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

EDX 3203. Introduction to Learning Disabilities. (3) Three hours lecture. Intelligences for learning; receptive, associative, and expressive disorders; specific learning disabilities.

EDX 3213. Psychology and Education of Exceptional Children and Youth. (3) Three hours lecture. Introduction to exceptional children and youth who deviate from the average in physical, mental, emotional, and social characteristics. Program planning is surveyed.

EDX 3223. Introduction to the Emotional/Behavioral Disorders. (3) Three hours lecture and field trips. Survey to acquaint students with emotionally disturbed and behaviorally disordered children, giving an overview of the theoretical approaches in their education.

EDX 3233. Contingency Management with Exceptional Children (3) Three hours lecture. Competency-Based Instructional Sequence and field experience. A study of the components of contingency management with emphasis on application in the field with exceptional children.

EDX 4000. Directed Individual Study. Hours and credits to be arranged.

EDX 4113/6113. Diagnostic-Prescriptive Methods and Materials for Early Childhood Disabled. (3) Three hours of lecture and laboratory work including assessment and individualized programming utilizing methods and materials for EMR and LD preschool and primary level children.

EDX 4123/6123. Diagnostic-Prescriptive Methods and Materials for Elementary Age Disabled. (3) Three hours of lecture and laboratory work including assessment and individualized programming utilizing methods and materials for EMR and LD elementary school-age children.

EDX 4133/6133. Diagnostic-Prescriptive Methods and Materials for Secondary Age Disabled. (3) Three hours of lecture and laboratory work including assessment and individualized programming utilizing methods and materials for EMR and LD secondary school-age children.

EDX 4353/6353. Assistive Technology in Special Education. (3) Three hours lecture. Application of adaptive technology with microcomputers in the education of students with special needs.

EDX 4413/6413. Working with Parents of Exceptional Children. (3) Three hours lecture. A study of the development, goals, and objectives of organized parent educational groups. A study of problems of parents of children who have disabilities.

EDX 4423. Teaching the Disadvantaged Child. (3) Three hours lecture. A study of the disadvantaged child in terms of theories, cultures, and techniques of teaching and exploration of curricular innovations.

EDX 4503/6503. Teaching the Severely and Profoundly Impaired Child. (3) Two hours lecture. One hour practicum. A survey of operational models and techniques to be implemented with the Severely/Profoundly Impaired; to include curriculum, methods and administrative educational adjustments.

EDX 4603/6603. Children and Youth with Physical/Multiple Disabilities. (3) Three hours lecture. Educational implications and adaptations of procedures in schools, homes, hospitals and special schools for children with orthopedic and/or neurological impairments.

EDX 4613/6613. Teaching Children and Youth with Physical/Multiple Disabilities. (3) Three hours lecture. Methods and materials applicable to teaching children and youth with physical or multiple conditions which are the results of neurological or orthopedic impairments.

EDX 4623/6623. Curricular and Mobility Adaptations for Physical/Multiple Disabilities. (3) Three hours lecture. The study of motor functions including range of motion, gait training, and other environmental adaptations that can be implemented by classroom teachers.

EDX 4887/4898. Student Teaching in Special Education. (7,8) (Both courses to be taken concurrently. Prerequisites: Admission to Teacher Education and senior standing). Supervised observation and directed teaching in special education. In addition, there is a professional seminar dealing with current issues in special education.

EDX 4953/6953. Introduction to Sign Language. (3) Development of basic sign language skills, study of special needs of deaf persons, and understanding use of interpreters. (Same as COE 4363/6363).

EDX 4990/6990. Special Topics in Special Education. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

EDX 7000. Directed Individual Study. Hours and credits to be arranged.

EDX 8000. Thesis Research/Thesis. Hours and credits to be arranged.

EDX 8103. Advanced Contingency Management. (3) Three hours lecture. This course is designed to utilize the principles and procedures of contingency management and applied behavioral analysis research to design, implement, and evaluate behaviorally oriented programs.

EDX 8123. Organization and Supervision of Special Education. (3) Three hours lecture. Organizational theory of special education, leadership behavior and role of special education supervisor; grant writing.

EDX 8133. Readings and Research in Exceptional Education. (3) Three hours lecture. Emphasis on current literature in all areas of exceptionality. Understanding and interpretation of psychological diagnosis, individual and group research.

EDX 8143. Early Education for the Disabled. (3) Three hours lecture. Rationale; characteristics; educational approaches; exemplary programs; research in the field.

EDX 8153. Language Development - Assessment and Remediation. (3) Two hours lecture and two hours practicum. Administrative development and interpretation of the Illinois Test of Psycholinguistic Abilities and other selected instruments of language development. Remediation techniques will also be discussed as they relate to the assessment techniques.

EDX 8163. Teaching Strategies for the Gifted. (3) (Prerequisite: Consent of instructor). Teaching approaches, development of special problems, selection of materials, and remediation of problems related to learning.

EDX 8173. Special Education in the Regular Classroom. (3) Three hours lecture. Provides a greater understanding of the handicapped child who may be in the regular classroom and suggests methods and techniques for teaching the handicapped student in the regular classroom.

EDX 8183. Seminar in Learning Disabilities. (3) (Prerequisite: EDX 3203 or equivalent). Three hours lecture. An advanced course dealing with the condition of learning disabilities. Current research dealing with causes, treatments, and prevention strategies will be studied.

EDX 8203. Practicum: Diagnosis of Special Education Populations. (3) (Prerequisite: Approval of instructor). Hours and credits to be arranged. Practicum experience utilizing a multi-disciplinary team approach to the diagnosis and educational planning for students suspected of being mildly, moderately, and multiply impaired.

EDX 8213. Practicum: Remediation of Special Education Populations. (3) One hour seminar, three hours practicum. Selection, utilization, and evaluation of specialized remedial materials and techniques with special education populations.

EDX 8223. Supervision: Diagnosis of the Educationally Handicapped Practicum. (3) Two hours lecture, two hours practicum. Providers of mental retardation and emotionally handicapped children.

EDX 8303. Seminar in Mental Retardation. (3) (Prerequisite: EDX 8103). Three hours lecture. An advanced course dealing with the condition of mental retardation. Educational implication and research involving those classified as mentally retarded.

EDX 8333. Placement Services and Techniques. (3) Three hours lecture. Academic and job placement as a means of promoting the development and adjustment of students at all levels of education. (Same as EDX 8333).

EDX 8339. Seminar in Education for the Emotionally Disabled. (3) (Prerequisite: EDX 8403.) One hour lecture, recitation, simulation, and field trips. A comprehensive study of contributing factors in emotional disturbance and the educational technology of the treatment of emotionally handicapped children.

EDX 8403. Teaching the Emotionally Disabled. (3) Three hours lecture and practicum. The curriculum, methods, and principles and problems of working with the emotionally handicapped.
EDX 8413. Personal, Social, and Work Adjustment Counseling. (3) Two hours lecture. Two hours laboratory. Personal, social, work adjustment counseling and employability skills training for disabled persons and others with special needs. Includes individual, group, and situational techniques. (Same as COE 8413 and TKT 8413.)

EDX 8780. Internship in Special Education. (3-6) Three hours practicum. Supervised observation, participation, and teaching of exceptional children in classrooms and resource rooms. Supervised experiences in community, state departments, supervisory positions.

ENGINEERING GRAPHICS

Office: 116 McCain Engineering Building
EG 1142. Engineering Graphics. (2) Two hours lecture. One hour demonstration. Presentation of sketching techniques, lettering and computer-aided drafting with traditional engineering drawing topics, including orthographic projection, engineering documentation, auxiliary views, and working drawings.

EG 1143. Graphic Communication. (3) One hour lecture. Five hours laboratory. Orthographic projection, instrumental drawing, point, line, plane identities, first and second auxiliary, computer assisted design and drafting using personal computers.

EG 1183. Honors Engineering Graphics. (3) One hour lecture. Five hours laboratory. Presentation of traditional engineering graphics topics using freehand sketching and a microcomputer-based interactive computer-aided drawing system, plus solid modeling and computer-aided manufacturing for honors students.

EG 1411. AutoCAD. (1) (Prerequisite: Knowledge of projection graphics.) Three hours laboratory. Practical application solutions to engineering graphic problems using a specific computer graphics software package, AutoCAD.

EG 1413. Basic Technical Drawing. (3) One hour lecture. Five hours laboratory. Technical sketching, lettering, use of instruments; geometric construction; object shape and size description through application of orthogonal multiview projection; shop operations; dimensioning; sections and conventions.

EG 1423. Advanced Technical Drawing. (3) (Prerequisite: EG 1413.) One hour lecture. Five hours laboratory. Auxiliaries, fasteners, elements of working drawings; emphasizing standard practices and procedures to convey size and shape description; pictorials; drawing practices related to various technical areas.

EG 1443. Technology Graphics. (3) (Prerequisites: EG 1143.) One hour lecture. Five hours laboratory. Visualization/analysis using descriptive geometry principles applying specifically to technology. Computer aided drafting/design in industrial technology. Reading/drafting working drawings in technology fields.

EG 1513. Architectural Graphics. (3) One hour lecture. Five hours laboratory. Survey of various drawing systems. Practical exercises

EDX 8990. Special Topics in Special Education. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

ENGINEERING MECHANICS

Office: 330 Walker Engineering
Professor Horstemeyer, Newman Fr., Rais-Rohani;
Associate Professors Bridges, Daniewicz,Cinnella, Gatlin, Luck, and Newman Fr.;
Associate Professors Bridges, Daniewicz,Cinnella, Gatlin, Luck, and Newman Fr.;
Assistant Professor Branch; Instructor Bostick

EM 2413. Engineering Mechanics I. (3) (Prerequisites: MA 1723 and PH 2213). Three hours lecture. Concepts of forces, moments and other vector quantities; analysis of force systems; conditions of equilibrium; friction; centroids and moments of inertia.

EM 2990. Special Topics in Engineering Mechanics. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

EM 3313. Fluid Mechanics. (3) (Prerequisite: EM 2413). Three hours lecture. Fluid statics; analysis of fluid motion using the continuity, momentum and energy relationships; introduction to viscous flows.

EM 3413. Vibrations. (3) (Prerequisites: EM 2433 and MA 3253). Three hours lecture. Fundamentals of free vibration, energy methods; forced and damped vibration, single degree of freedom; two degrees of freedom.

EM 4133/6133. Mechanics of Composite Materials. (3) (Prerequisites: EM 3213 and MA 3253.) Three hours lecture. Stress, strain,
potential energy, complementary energy, Lagrange’s equations. Applications to stress analysis, elastic stability, and vibrations.

**EM 8203. Applied Elasticity. (3)** Three hours lecture. Analysis of stress and strain; stress-strain relations; bending and torsion of beams; stress analysis; strain energy.

**EM 8223. Elastic Stability. (3)** Three hours lecture. Bending and buckling of beams and columns; numerical methods; minimum of the total potential; bending and buckling of plates.

**EM 8313. Advanced Dynamics. (3)** (Prerequisites: EM 2433 and MA 3253). Three hours lecture. Fundamental considerations, Hamilton’s principle, Lagrange’s equations, rigid body dynamics.

### Department of ENGLISH

**Office:** 316 Lee Hall

**Professors** Bonney, Embree, Hargrove, Lyons, Myers, and Patteson

**Associate Professors** Bentley, Creevy, Little(Head), Murray, Myers, White, Williams, and Wolf

**Assistant Professors** Hagenston, Kreisel, Lee, Marsh, Vice, and West

**Instructors** Brasher, Ellis and Spurlock

**NOTE:** Entering freshmen may enter honors or special sections of first-semester composition depending on standard and other tests. Students with ACT scores in English from 15 to 18 take EN 1003, from 19 to 28 take EN 1103, and of 29 and above take EN 1163 or EN 1183. International students of non-English background will be placed in composition sections appropriate to their needs as determined by TOFEL scores.

**EN 0003. Developmental English. (3)** Emphasizes the use of standard American English. Offered only to students required to enroll in developmental studies; prerequisite to any English courses applicable to requirements.

**EN 1013. Basic English. (3)** (Prerequisite: A score of 15 to 18 on the English section of the ACT). Three hours lecture. A study of grammar and mechanics as basic to composition, with emphasis on the sentence and the paragraph. Does not count toward any degree.

**EN 1103. English Composition I. (3)** (Prerequisite: A score of 19 or above on the English section of the ACT or EN 1003). Three hours lecture. A study of logical and rhetorical principles and organizational strategies in composition, with emphasis on the sentence. Open only to students required to enroll in developmental studies; prerequisite to any English courses applicable to requirements.

**EN 1113. English Composition II. (3)** (Prerequisite: EN 1103, 1163, or 1183). Three hours lecture. An expanded study of and practice in stylistics, logic, and research as contributions to expository writing.

**EN 1163. Accelerated Composition I. (3)** (Prerequisite: A score of 29 or above on the English section of the ACT or consent of the instructor). Three hours lecture. An expanded study of and practice in stylistics, logic, and research as contributions to expository writing, designed for students who exhibit command of basic rhetorical principles.

**EN 1173. Accelerated Composition II. (3)** (Prerequisite: EN 1163 or consent of the instructor). Three hours lecture. An expanded study of and practice in stylistics, logic, and research as contributions to expository writing, with emphasis on extensive study of diverse rhetorical models.

**EN 1183. Honors Composition I. (3)** (Prerequisite: Open through invitation only). Three hours lecture. The analytical study and frequent practice of interdisciplinary writing coupled with the analytical study of major literary genres - fiction, poetry, and drama.

**EN 1193. Honors Composition II. (3)** (Prerequisite: Open through invitation only). Three hours lecture. Continuation of EN 1183.

**EN 2203. Introduction to Literature. (3)** (Prerequisite: Completion of freshman composition). (Not open to English majors or honors students who complete EN 1183 or 1193). Three hours lecture. The critical and appreciative study of masterpieces in various genres chosen from English and world literature.

**EN 2213. English Literature. (3)** (Prerequisite: Completion of freshman composition). Three hours lecture. A survey of English literature from the beginning to the Romantic Period.

**EN 2223. English Literature. (3)** (Prerequisite: Completion of freshman composition). Three hours lecture. A Survey of English Literature from the Romantic Period to the present.

**EN 2243. American Literature. (3)** (Prerequisite: Completion of freshman composition). Three hours lecture. A survey of American literature from the beginning to Whitman.

**EN 2253. American Literature. (3)** (Prerequisite: Completion of freshman composition). Three hours lecture. A survey of American literature from Whitman to the present.

**EN 2273. World Literature. (3)** (Prerequisite: Completion of freshman composition). Three hours lecture. Selected readings of Greek, Roman, and Medieval European translation.

**EN 2283. World Literature. (3)** (Prerequisite: Completion of freshman composition). Three hours lecture. Selected readings of the non-English-speaking world from the Renaissance through the Twentieth Century.

**EM 8990. Special Topics in Engineering Mechanics. (1-9)** Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

**EN 2383. Sophomore English Honors. (3)** (Prerequisite: Completion of required hours of freshman composition and invitation to the program). Three hours lecture. Open to English majors. An advanced survey of English literature from the Romantic Period to the present.

**EN 2393. Sophomore English Honors. (3)** (Prerequisite: Completion of required hours of freshman composition and invitation to the program). Three hours lecture. Open to English majors. An advanced survey of English literature from the Romantic Period to the present.

**EN 2434. Literature and Film. (4)** (Prerequisite: Completion of English composition requirements). Three hours lecture. One laboratory. Introduction to literary and cinematic techniques, methods of analysis, and structures.

**EN 2443. Introduction to Science Fiction. (3)** (Prerequisite: Completion of English requirements of the student’s major field). Three hours lecture. A study of major science fiction writers of the past two centuries, with emphasis on human experience in a technological society.

**EN 2453. The Icelandic Sagas. (3)** (Prerequisite: Completion of freshman composition). Three hours lecture. A survey in English, of the sagas of their literary form and their relationship to history, mythology, and other medieval literatures. (Same as FL 2453).

**EN 2513. Sports Literature. (3)** Three hours lecture. (Prerequisite: Completion of freshman composition). A critical and thematic study of sports with emphasis on the role of athletics in life and society.

**EN 2990. Special Topics in English. (1-9)** Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

**EN 3103. Writing for Engineers. (3)** (Prerequisite: Completion of composition requirements). Three hours lecture. Study and practice in types of exposition required in engineering and scientific fields, including proposals, analyses, inspection reports, economic evaluations, data transmission, and processes.

**EN 3223. Writing for Architects. (3)** (Prerequisite: Completion of freshman composition; junior standing). Three hours lecture. Development of writing ability by reading, analyzing thematic architectural material, and by writing. Lecture; group discussions of grammar, rhetoric, etc.

**EN 3303. Creative Writing. (3)** (Prerequisite: Completion of freshman composition). Three hours lecture. Basic techniques in writing fiction and poetry; meter and rhyme, metaphor and image, plot, characterization, dramatic detail.

**EN 3363. American Literary History. (3)** (Prerequisite: 3 hours of literature or consent of the instructor; students taking EN 3363 cannot earn credit toward an English major for EN 2243 or 2253). Three hours lecture. Major writers, genres, periods, and trends in American literature with particular emphasis on critical techniques and resources useful to students of literature.

**EN 3413. Advanced Composition. (3)** (Prerequisite: Twelve hours of English). Three hours lecture. An advanced expository writing course and general introduction to research methods and materials in language and literature.

**EN 3423. Descriptive English Grammar. (3)** (Prerequisite: Twelve hours of English). Three hours lecture. Advanced course in English grammar.

**EN 3513. Women and Literature: Selected Topics. (3)** (Prerequisite: Completion of freshman composition). Three hours lecture. A study of literary works by or about women. Texts are selected according to theme, genre, and/or historical period.

**EN 4000. Directed Individual Study.** Hours and credits to be arranged.
EN 2223/6223. Principles of Legal Writing. (3) (Prerequisites: Junior standing and completion of English requirements). Three hours lecture. Introduction to prose of the legal profession, emphasizing rhetorical strategy and style. Advanced composition, including work with contracts, letters, regulations, memoranda of law, and briefs.

EN 4303/6303. Craft of Poetry. (3) (Prerequisite: EN 3303 or consent of instructor). Three hours lecture. The craft and practice of writing poetry.

EN 4313/6313. Craft of Fiction. (3) (Prerequisite: EN 3303 or consent of instructor). Three hours lecture. The craft and practice of writing fiction.

EN 4323/6323. Literary Criticism from Plato to the Present. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. A survey of literary criticism from Plato to the present.

EN 4333/6333. Literature of the South. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. A critical survey of Southern writers past and present.

EN 4434/6434. African American Literature. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. A study of African American literature, especially that of the Twentieth Century.

EN 4453/6453. 20th Century Critical Theory. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. A study of major twentieth-century strategies of interpretation, including psychoanalysis, Marxism, structuralism, feminism, deconstruction.

EN 4403/6403. Introduction to Linguistics. (3) (Prerequisite: Twelve hours of English). Three hours lecture. The descriptive and historical study of language; linguistic analysis and comparisons; language classification; language in its social and cultural setting. (Same as AN 4403/6403)

EN 4413/6413. History of the English Language. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. The origin and development of the English language, structural and phonetic changes; conventions of modern usage.

EN 4433/6433. Approaches to TESOL. (3) (Prerequisite: EN 4403 or EN 3423 or consent of instructor). Three hours lecture. Methodology of Teaching English as a Second Language, with emphasis upon theory of second language acquisition, teaching techniques, and evaluation of relevant textbooks.

EN 4443/6443. English Syntax. (3) Three hours lecture. Grammatical analysis of English with emphasis on pedagogical applications to teaching English as a foreign/second language.

EN 4453/6453. TESOL Course Design and Testing. (3) (Prerequisite: EN 4403/6403 or consent of instructor). Three hours lecture. Developing programs, materials and tests for second language learning.

EN 4463/6463. Studies in Second Language Acquisition. (3) (Prerequisite: EN 4403/6403 or consent of instructor). Three hours lecture. A survey of the major theories of language acquisition, concentrating on accounts of second language acquisition.

EN 4503/6503. Shakespeare. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. Shakespeare’s plays through 1599.

EN 4513/6513. Shakespeare. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. Shakespeare’s plays from 1600.

EN 4523/6523. Chaucer. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. Studies in the major works of Chaucer. Readings in Middle English.

EN 4533/6533. Milton. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. The principal writings of Milton, including all of PARADISE LOST and PARADISE REGAINED, and selections from the chief prose works.

EN 4623/6623. Language and Culture. (3) (Prerequisite: EN 4403/6403 or consent of instructor). Three hours lecture. Examination of language as a part of culture, a source of knowledge about other aspects of culture, and a social behavior. (Same as AN 4623/6623 and SO 4623/6623).

EN 4633/6633. Sociolinguistics. (3) (Prerequisites: EN 4403 or consent of instructor). Three hours lecture. Examination of relationship between language and society, and how, when, and why people in speech communities use language varieties. (Same as AN 4633/6633 and SO 4633/6633).

EN 4643/6643. The Eighteenth-Century British Novel. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. A study of major eighteenth-century British novelists.

EN 4653/6653. The Nineteenth-Century British Novel. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. A study of the major nineteenth-century British novelists.

EN 4663/6663. The Twentieth-Century British and Irish Novel. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. A study of British and Irish novelists from Conrad and Woolf to Rushdie and Byatt, as well as literary movements including modernism, postmodernism, and postcolonialism.

EN 4703/6703. English Literature of the Sixteenth Century. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. A study of Renaissance literature in England exclusive of Shakespeare’s plays.

EN 4713/6713. English Literature of the Seventeenth Century. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. Seventeenth-century literature exclusive of Shakespeare’s plays.

EN 4723/6723. The Restoration and Swift. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. British poetry, prose, and drama, 1660-1700, and Swift.

EN 4733/6733. Eighteenth-Century Literature. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. British poetry, prose, and drama of the Eighteenth Century excluding Swift.

EN 4803/6803. Types of Twentieth-Century Drama. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. The development of modern American, British, and Continental drama since Ibsen.

EN 4813/6813. The Twentieth-Century World Novel. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. Major world novelists of the Twentieth Century, excluding British, Irish, and American.

EN 4823/6823. Twentieth-Century Poetry. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. Chief American and British poets; their verse techniques and their contribution to poetic art.

EN 4863/6863. The Romantic Poets and Prose Writers. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. An intensive study of the major Romantic poets—Wordsworth, Shelley, Keats, Byron, Coleridge—along with some of the non-fiction prose of the period.

EN 4883/6883. Victorian Poets and Prose Writers. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. Intensive study of Tennyson, Browning, Arnold, Swinburne, and other Victorian poets, along with some of the non-fiction prose of the period.

EN 4903/6903. American Literature: 1800-1860. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. Studies in Irving, Cooper, Poe, Hawthorne, the Transcendentalists, and Southern Humorists. This course cannot be taken before EN 2223.

EN 4913/6913. American Literature: 1860-1900. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. Studies in Twain, Whitman, Dickinson, James, Crane, and others. This course cannot be taken before EN 2223.

EN 4923/6923. Twentieth-Century American Novel. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. A study of the American novel since Dreiser.

EN 4933/6933. Survey of Contemporary Literature. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. Significant trends in European and American literature since the outbreak of World War II.

EN 4943/6943. Form and Theory of Fiction. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. Theoretical aspects of fictional technique, genre, style; readings include novels, short stories, and writings about the craft of fiction. Recommended complement to creative writing courses.

EN 4953/6953. Form and Theory of Poetry. (3) (Prerequisite: Completion of English requirements in the student’s major). Three hours lecture. Poetic theory; formal conventions, techniques, and innovations in the tradition of English and American poetry. Recommended complement to creative writing courses.

EN 4990/6990. Special Topics in English. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years.)
EN 6013. Internship in Compositional Theory and the Teaching of College Writing. (3) (Prerequisite: Acceptance as a teaching assistant in the Department of English). Three hours lecture. Compositional theory in relation to teaching and evaluating traditional modes of writing, coordinated with at least twenty hours per week of supervised professional experience.

EN 7000. Directed Individual Study. Hours and credits to be arranged.

EN 8000. Thesis Research/Thesis. Hours and credits to be arranged.

EN 8103. Graduate Research in English. (3) Three hours lecture. A required introduction to fields of study and to scholarly research and writing in English language and literature.

ENVIRONMENTAL SCIENCE

EN 2102. Introduction to Environmental Science. (2) Two hours lecture. A survey course to acquaint the beginning students with the various issues and disciplinary contributions regarding environmental science.

Department of ENTOMOLOGY and PLANT PATHOLOGY

Office: 118 Hand Lab
Professor Oldham

EPP 2213. Introduction to Insects. (3) Two hours lecture. Two hours laboratory. Introduction to structure, function, ecology, taxonomy and evolution of the largest and most diverse group of organisms and how they impact humans and their environment.

EPP 2313. Insects and Society. (2) Two hours lecture. Relationships of insects and related arthropods to human culture and beliefs. Emphasis will be on phobias, allergies, diseases, art, food, benefits, and misconceptions about insects.

EPP 2990. Special Topics in Entomology or Plant Pathology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

EPP 3113. Introductory Plant Pathology. (3) (Prerequisite: BIO 1203 or consent of instructor). Two hours lecture. Three hours laboratory. Acquiring a general knowledge of the principles of plant pathology through a study of selected plant diseases of economic importance for Mississippi.

EPP 3124. Forest Pest Management. (4) Three hours lecture. Three hours laboratory. Study of the biology, damage, survey techniques, and control of forest diseases and insects. Pest management in southern forests will be emphasized. Fall semester.

EPP 3253. Introduction to Livestock Pest Management. (3) (Prerequisite: EPP 2213 or 4154 preferred or consent of instructor). Two hours lecture. Three hours laboratory. Spring semester. A study of the economic importance, habits, life history, identification and current management measures for ectoparasites of domestic animals and associated food supplies.

EPP 3423. Ornamental and Turfgrass Insects. (3) Two hours lecture. Two hours lab. Study of the life history, damage, economic importance and control strategies of pests on ornamental plants and turfgrass.

EPP 3522. Turfgrass Diseases. (2) (Prerequisite: EPP 3113 or 3124). Four hours laboratory. Study of the life cycle, damage, economic importance and control strategies of disease turfgrasses.

EPP 4000. Directed Individual Study. Hours and credits to be arranged.

EPP 4114/6114. Mycology. (4) (Prerequisites: BIO 1203 and BIO 1213). Three hours lecture. Three hours laboratory. Survey of the principal fungal classes. Morphology, cytology, and physiology of fungi, and their relations to natural ecosystems, including saprophytic and parasitic (agriculture) fungi. Spring semester, yearly.

EPP 4154/6154. General Entomology. (4) Two hours lecture. Four hours laboratory. Fall semester. Biology of insects including morphology, physiology, development, ecology and emphasis on classification of orders and common families.

EPP 4163/6163. Plant Disease Management. (3) (Prerequisite: EPP 3113). Three hours lecture. Three hours laboratory. Techniques and fundamentals of plant disease management. Disease dynamics related to management, avoidance, exclusion, eradication of pathogens; principles of plant protection, spraying techniques; biological control. Spring semester.

EPP 4214/6214. Diseases of Crops. (4) (Prerequisite: EPP 3113 or 3124). Three hours lecture. Two hours laboratory. Fundamentals and practical aspects of identification and control of selected diseases of crop plants grown in the southern U.S. Spring semester.

EPP 4223/6223. Pest Control. (3) (Prerequisite: EPP 3113, PW 3113 or consent of instructor). Three hours lecture. Two hours laboratory. For selected topics. Pesticide considerations; control, and control-related biology of structural and urban insect, roden, and weed pests; and plant diseases.

EPP 4234/6234. Field Crop Insects. (4) (Prerequisite: EPP 2213 or 4154). Three hours lecture. Two hours laboratory. Fall semester. Recognition, biology, distribution, damage, economic importance and methods of control of insect pests of agronomic and horticultural crops.

EPP 4244/6244. Aquatic Entomology. (4) (Prerequisite: EPP 4154 or instructors approval). Three hours lecture. Two hours laboratory. Study of basic biological and ecological principles important to aquatic insects and related arthropods, including life histories, evolutionary adaptations, community and species and identification.

EPP 4263/6263. Principles of Insect Pest Management. (3) Two hours lecture. Two hours laboratory. Discussion of pest management concepts, insect control methods, sampling, and pest management systems. Laboratory involves sampling, calibration, and other exercises related to pest management.

EPP 4282/6282. Genetics and Pest Management. (2) (Prerequisite: PO 3103 or consent of instructor). Two hours lecture. Spring semester, even-numbered years. Concepts and applications of genetics to the protection of man, crop plants and livestock against vertebrate and invertebrate pests, weeds, and diseases. (Same as GNS 4282).

EPP 4335/6335. Anatomy and Physiology of Insects. (5) (Prerequisite: EPP 4154). Four hours lecture. Three hours laboratory. Spring semester. Introduction to the basic principles of structure and function of insect organ systems from a comparative and evolutionary viewpoint. (Same as PHY 6335).
EPP 4444/6444. Medical and Veterinary Entomology. (4) Three hours lecture. Three hours laboratory. Spring semester. Epidemiology and etiology of pathogens disseminated by insects and other arthropods to humans and domestic animals. Laboratory; collection and identification of vectors.

EPP 4543/6543. Toxicology and Insecticide Chemistry. (3) (Prerequisite: Organic Chemistry). Two hours lecture. Two hours laboratory. Spring semester. Chemistry, toxicity and mode of action of major groups of insecticides. Laboratory; bioassay methods, insecticide interac-
tions, calculations.

EPP 4623/6623. Insect Ecology. (3) (Prerequisite: Upper division standing in one of the biological sciences). Two hours lecture. Two hours laboratory. Fall semester. Consideration of interactions determining the distribution and abundance of insects including diapause, movement, volitism, population dynamics, competition, trophic habits and community structure.

EPP 4990/6990. Special Topics in Entomology or Plant Pathology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

EPP 7000. Directed Individual Study. Hours and credits to be arranged.

EPP 7020. Advanced Research and Independent Study Topics. (1-9) Credit and title to be arranged. Graduate Student, consent of instructor). Two hours lecture. Three hours laboratory. Fall semester. Laboratory; bioassay methods, insecticide interac-
tions, calculations.

EPP 8154. Chemical Ecology of Insects. (4) Prerequisites: EPP 6330; CH 6513 or approval of instructor). Three hours lecture. Two hours laboratory. Fall semester, even-numbered years. Discussion of contemporary topics in chemical ecology with reference to the sensory, behavioral, and evolutionary bases of insect/insect and insect/plant inter-
actions.

EPP 8173. Clinical Plant Pathology. (3) Prerequisites: EPP 3113 and EPP 4114. Two four-hour laboratories. Clinical techniques, pro-
ducts, and experience in diagnosing plant diseases in the laboratory and field. Covers diseases caused by bacteria, fungi, MLO, nematodes, unfa-
orable environment and viruses. Summer.

EPP 8223. Scanning Electron Microscopy. (3) (Prerequisite: Graduate Student, consent of instructor). Two hours lecture. Three hours laboratory. Fall semester. Introduction to scanning electron microscopy and associated techniques.

EDUCATIONAL PSYCHOLOGY

Professors: D. Morse, L. Morse, Skinner and Watson;
Assistant Professors: Givhan and Henington.

EPY 2513. Human Growth and Development. (3) Three hours lecture. Psychological principles in the study of the child from birth to pu-
berty; acquisition of motor skills; advance in perception; language, rea-
soning, and social behavior.

EPY 2956. Special Topics in Educational Psychology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

EPY 3143. Human Development and Learning Strategies in Education. (3) (Prerequisites: PSY 1013 and admission to Teacher Edu-
action or consent of department head). Three hours lecture. A study of development of strategies of learning with emphasis on teaching.

EPY 3253. Evaluating Learning. (3) (Prerequisite: Admission to Teacher Education). Three hours lecture. A study of instructional evaluation for the purpose of assessing individual pupil progress and general effec-
tiveness of instruction.

EPY 3503. Principles of Educational Psychology. (3) Three hours lecture. Application of psychological principles to the educational process; topics covered include learning, humanism, motivation, cogni-
tive development, creativity, intelligence, exceptionality, classroom man-
agement, measurement, and evaluation.

EPY 4053/6053. Psychology and Education of the Mentally Retarded. (3) Three hours lecture. Definitions, etiology, evaluation, de-
velopment, and learning strategies of the mentally retarded; the role of family, community, and school in programming for the mentally re-
tarded.

EPY 4073/6073. Personality Adjustment in Educational and Related Settings. (3) Three hours lecture. Personality development with special attention to motivation, culture, and interpersonal relations; personality problems in educational settings; corrective techniques.
EPY 4113/6113. Behavioral and Cognitive Behavioral Interventions. (3) The study of behavioral and cognitive-behavioral assessments and change procedures with special emphasis on non-school settings. This study of brain-behavior relationships with emphasis on techniques and procedures for diagnosing brain dysfunction. Study of assessment techniques, rehabilitation planning, and research contributions.

EPY 4153. Introduction to Research in Educational Psychology. (3) Three hours lecture. (Prerequisite: EPY 4214 and 3503) An introduction to conducting educational research focusing on planning and designing research for applied education settings.

EPY 4610/6610. Seminar in Educational Psychology. (1-6) (Prerequisite: 9 hours in Psychology and consent of instructor). Credit and title to be arranged. One to six lectures. Examination of specific topics of interest to faculty and students.

EPY 4990/6990. Special Topics in Educational Psychology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

EPY 7000. Directed Individual Study. Hours and credits to be arranged.

EPY 8000. Thesis Research/Thesis. Hours and credits to be arranged.

EPY 8214. Advanced Educational and Psychological Statistics. (4) (Prerequisite: EPY 4214/6214 or its equivalent.) Three hours lecture and three hours laboratory. A survey of advanced statistical methods with emphasis upon the design and analysis of research problems in education and psychology.

EPY 8223. Psychological Foundations of Education. (3) Three hours lecture. The role of psychology in a changing context of organized education; the learner, content, structure, and management of the learning situation; studies of persistent problems. (Prerequisite: EPY 8253). Three hours lecture. The study of cognitive/intellectual development including the theories derived from the work of information-processing psychologists and Jean Piaget.

EPY 8263. Psychological Testing in Educational and Related Settings. (3) Three hours lecture. Principles and techniques involved in selecting, administering, scoring and interpreting tests of personality, interest, vocational aptitude, achievement, and intelligence.

EPY 8273. Neuropsychology and Neuropsychological Assessment. (3) (Prerequisite: EPY 8723 Individual Assessment for Educational and Related Settings or PSY 8533 Intelligence Testing). Three hours lecture. Study of brain-behavior relationships with emphasis on techniques and procedures for diagnosing brain dysfunction. Study of assessment techniques, rehabilitation planning, and research contributions.

EPY 8293. Cognitive Development. (3) Three hours lecture. The study of cognitive/intellectual development including the theories derived from the work of information-processing psychologists and Jean Piaget.

EPY 8493. Child Behavior and Personality Assessment. (3) (Prerequisite: EPY 8263 and consent of instructor). Three hours lecture. Selection, administration, scoring, and interpretation of behavior and personality instruments.

EPY 8533. Practicum in Teaching Educational Psychology. (3) (Prerequisite: EPY 8223). One hour lecture. Two hours practicum. Establishing objectives; selecting and organizing learning experiences; guiding and evaluating learning; supervised practicum in teaching educational psychology.

EPY 8703. School Psychology. (3) Two hours lecture, two hours field experience. A course covering the history, current objectives, organization and administration of school psychology combined with appropriate field experience.

EPY 8723. Individual Assessment for Educational and Related Settings. (3) (Prerequisite: EPY 6073 and EPY 8263 or equivalent). Two hours lecture, two hours practicum. Training in administering individual psychological instruments; verbal and nonverbal linguistic techniques; interpretation of scores, writing psychometric reports.

EPY 8773. Assessment and Interventions for Academic Skills Deficits. (3) Three hours lecture. Study of theories, techniques, and procedures that have been shown to prevent and remedy academic skills deficits.

EPY 8780. Internship in School Psychology. (3 or 6) (Prerequisite: Consent of instructor). Supervised consultation and intervention experiences in educational settings utilizing psychological principles and techniques in teaching/learning problems. Three hundred plus hours of supervised consultation experience.

EPY 8794. Supervised Experiences in School Psychology: Consultation. (4) (Prerequisites: EPY 9713, EPY 8763, and consent of instructor). Supervised consultation and intervention experiences in educational settings utilizing psychological principles and techniques in teaching/learning problems. Three hundred plus hours of supervised consultation experience.

EPY 8799. Supervised Experiences in School Psychology: Clinic Settings. (0-6) (Prerequisite: Consent of instructor). Supervised consultation and intervention experiences in clinic settings utilizing psychological principles and techniques in teaching/learning problems.

EPY 8913. Psychology of Creative Imagination. (3) (Prerequisite: EPY 8523). A study of creative intellectual functioning and advances in thought on imagination imagery as they apply to measurement, nurturance, and development.

EPY 8933. Integrated Psycho-Educational Assessment. (3) (Prerequisites: EPY 8493, EPY 8723, consent of instructor). Two hours lecture, two hours practicum. Integration of assessment, interpretation, and report writing skills for intellectual, adaptive, personality, and academic instruments.

EPY 8990. Special Topics in Educational Psychology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

EPY 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

EPY 9213. Advanced Analysis in Educational Research. (3) (Prerequisites: EPY 6214 and EPY 8214, or equivalent course work). Three hours lecture. An examination of quantitative problem-solving methods, with special emphasis on modern techniques for investigating multivariable research problems in education.

EPY 9313. Education Evaluation Methods. (3) Three hours lecture. (Prerequisites: EPY 8214; EDF 9373 or equivalent course work). Introduction to evaluation contract development procedures, and planning and management of program evaluation in education and related settings.

EPY 9263. Applied Research Seminar. (3) (Prerequisites: EPY 6214, EDF 8363, and EDF 9373). Three hours lecture. Study of advances in thought on research approaches and doing research in educational psychology.

EPY 9703. Contemporary, Legal, Ethical, and Professional Issues in School and Educational Psychology. (3) (Prerequisite: consent of instructor). Three hours lecture. Psychology as a profession; Foundations of practice, roles and functions, professional issues and standards with emphasis on legal and ethical means in psychology.

EPY 9713. Advanced Psychological Consulting: Theory and Practice. (3) (Prerequisite: Consent of the instructor). Two hours lecture. Two hours practicum. Systematic investigation and application of psychological consultation in schools/human service settings. Consultation as applied to individuals and organizational structures. Study of research contributions.

EPY 9723. Seminar in Contemporary School Psychology. (3) (Prerequisite: Consent of instructor). Study of current issues and problems in school psychology. Includes the synthesis/refinement of students' personal philosophies of psychological practice in human-service settings.

EPY 9730. Doctoral Internship in School Psychology. (3 or 6) (Prerequisite: consent of instructor). Supervised internship involving the theory and practice of evaluations, consultation, interventions, research, and related activities within a school, clinic, or other human service agency.
ENGLISH as a SECOND LANGUAGE

Office: ESL Center, 46 Morgan St.
Instructors Bonfanti (Coordinator), and Watkins; Lecturers Combs, Crawley, and Hutchinson

ESL 5110. American Language and Culture I. (1-18) (Prerequisite: TOEFL score between 475 and 499 or consent of the instructor). Credit to be arranged. An intermediate level English language course designed to improve the oral communication and literacy skills of international students. (Does not count towards any degree).

ESL 5120. American Language and Culture II. (1-18). (Prerequisite: ESL 5110, or TOEFL score between 500 and 524, or consent of instructor). Credit to be arranged. An advanced level English language course designed to improve the oral communication and literacy skills of international students. (Does not count towards any degree).

EXPERIENTIAL LEARNING
Office: 608 Allen Hall

FIN 2003. Personal Money Management. (3) Three hours lecture. The individual's acquisition and management of an optimal personal income and expenditure pattern over a lifetime to best meet his/her financial objectives.

FIN 2990. Special Topics in Finance. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

FIN 3113. Financial Systems. (3) (Prerequisites: EC 2113, EC 2123 (or AEC 2713) and junior standing). Three hours lecture. Study of interest rates, basic security valuation, money and capital markets, financial institutions, and the roles financial institutions play in the financial markets.

FIN 3123. Financial Management. (3) (Prerequisites: EC 2123, ACC 2023, and BQA 2113 and junior standing). Three hours lecture. Study of objectives, tools, methods, and problems of financial management: financial analysis, planning, control, sources/uses of funds, capital budgeting decisions and working capital.

FIN 3723. Financial Markets and Institutions. (3) (Prerequisite: FIN 3113 or equivalent). Three hours lecture. Study of the functions of financial markets. Major topics include interest rates, their role in securities markets and financial institutions, and interest rate risk.

FIN 4000. Directed Individual Study. Hours and credits to be arranged.

FIN 4011. Banking Internship. (1) (Prerequisite: Approval of Department). Banking topics examined by students during work semester.

FIN 4021. Corporate Finance Internship. (1) (Prerequisite: approval of Department). Corporate Finance topics examined by students during work semester.

FIN 4031. Financial Services Internship. (1) (Prerequisite: Approval of Department). Financial Services topics examined by students during work semester.

FIN 4041. Financial Communications Internship. (1) (Prerequisite: Approval of Department). Financial Communications topics examined by student during work semester.

FIN 4223. Intermediate Financial Management. (3) (Prerequisite: FIN 3123). Three hours lecture. Building on foundational concepts, this course provides a more in-depth coverage of financial analysis, valuation principles, the financial environment, capital budgeting and capital structure.

FIN 4233. Working Capital Management. (3) (Prerequisite: FIN 3123). Three hours lecture. Analysis of selected problems in the short-term financial management of the firm, including cash management, investment opportunities, financing requirements, budgeting and planning.

FIN 4243. Senior Seminar in Finance. (3) (Prerequisite: FIN 3723 and FIN 4223). Three hours seminar. Comprehensive case study to bring out the problems involved in organizing, financing, and managing various types of business enterprises.

FIN 4423. Investments. (3) (Prerequisite: FIN 3123). Three hours lecture. Survey of various financial instruments and their characteristics, investor choice, and an introduction to the basics of security analysis, portfolio management, and speculative markets.

FIN 4433. Security Analysis and Portfolio Management. (3) (Prerequisites: FIN 4423). Three hours lecture. Analysis of individual investments, creation and management of investment portfolios to achieve specific investor goals, and evaluation of portfolio performance.
aging financial institutions in a competitive and rapidly changing environment. Computer simulations.

FIN 8733. Financial Markets, Rates and Flows. (3) (Prerequisites: FIN 8112 and FIN 8122 or equivalent). Three hours lecture. An analysis of money and capital market instruments; a study of interest rates and financial flows; the effect of public policy on credit conditions.

FIN 8990. Special Topics in Finance. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

FIN 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

Department of FOREIGN LANGUAGES
Office: 300 Lee Hall
Professors: Emplaincourt (Head), Buehler, A. Lopez, Wiltrowt, Weldomt
Associate Professors Jordan and Robbins-Herring;
Assistant Professors Krol, Kunz, and Lestrade;
Instructors Garma, Little, and Vozzo.

A year’s study of the same foreign language in high school will normally be considered the equivalent of one semester’s work at MSU for the purpose of determining appropriate placement; no credit hours are earned for MSU courses bypassed in this manner. Students with two or more years of the same foreign language in high school are encouraged to take the Computerized Placement Tests (CPT) in French, German, and Spanish, and the Placement Tests (PT) Japanese, Latin, and Russian administered by the Department, enabling them to earn up to 8 non-transferable MSU credit hours; the tests are free of charge and the credits earned are entered on the student’s transcript upon recommendation of the Head of Foreign Languages Department. These tests can be taken during MSU summer orientations by entering freshman, and during the Senior Invitational and MSU Spring Discovery by high school seniors; foreign students may not register for credit in elementary and intermediate texts.

FIN 2113. Business French I. (3) (Prerequisites: EN 1113, FLF/G/S 2143 or equivalent or consent of instructor). Three hours lecture. The origins, development, and basic linguistic features of the Germanic and Romance languages.

FIN 2133. French III. (3) (Prerequisite: FLF 2125 or equivalent). Three hours lecture. Rapid review of French grammar; oral-aural practice; reading of intermediate texts.

FIN 2143. French IV. (3) (Prerequisite: FLF 2133 or equivalent). Three hours lecture. Oral-aural practice; reading of intermediate texts.

FIN 2183. Honors French III. (3) (Prerequisite: Open through invitation only). Three hours lecture. Honors program of FLF 2133, Intermediate French III.

FIN 2193. Honors French IV. (3) (Prerequisite: Open through invitation only). Three hours lecture. Honors program of FLF 2143, French IV.

FIN 2990. Special Topics in French. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

FIN 3114. Advanced French. (4) (Prerequisite: FLF 2143, FLF 2125 or equivalent or consent of instructor). Three hours lecture and laboratory. Required of all majors. Advanced instruction in all aspects of modern French.

FIN 3124. Advanced French. (4) (Prerequisite: FLF 2143, FLF 2125 or equivalent or consent of instructor). Three hours lecture and laboratory. Required of all majors. A continuation of FIN 3114.

FIN 3143. French Civilization. (3) (Prerequisite: FLF 2143, FLF 2125 or equivalent or consent of instructor). Three hours lecture. Illustrated survey of French cultural heritage.

FIN 3313. Business French I. (3) (Prerequisite: FLF 2143, FLF 2125 or equivalent or consent of instructor). Three hours lecture. The French language as used in business practices and marketing; emphasis on acquisition and application of French commercial terminology in professional correspondence.

FIN 3323. Business French II. (3) (Prerequisite: FLF 2143, FLF 2125 or equivalent or consent of instructor). Three hours lecture. The French language as used in exchange controls, the Bourse, the banks; acquisition of French business terminology for written and oral expression.

FIN 3513. Survey of French Literature. (3) (Prerequisite: FLF 2143 or FLF 2125 or equivalent or consent of instructor). Three hours
lecture. Required of all majors. A survey of French literature from its origin to the 18th century.

**FLF 3523. Survey of French Literature.** (3) (Prerequisite: FLF 2143 or FLF 2125 or equivalent or consent of instructor). Three hours lecture. Required of all majors. A survey of French literature from the 18th century to the present.

**FLF 4000. Directed Individual Study.** Hours and credits to be arranged.

**FLF 4063/6063. French Drama of the 19th Century.** (3) (Prerequisite: FLF 3523 or consent of instructor). Three hours lecture. Reading of works of outstanding writers and discussion of literary currents of the century.

**FLF 4073/6073. French Drama of the 20th Century.** (3) (Prerequisite: FLF 3523 or consent of instructor). Three hours lecture. Reading of works of outstanding writers and discussion of literary currents of the century.

**FLF 4093/6093. French Novel and Short Story of the 19th Century.** (3) (Prerequisite: FLF 3523 or consent of instructor). Three hours lecture. Reading of selected masterpieces. Discussion of literary currents and personalities of the century.

**FLF 4103/6103. French Novel and Short Story of the 20th Century.** (3) (Prerequisite: FLF 3523 or consent of instructor). Three hours lecture. Reading and critical evaluation of modern French novels and short stories of various literary schools.

**FLF 4113/6113. French Stylistics.** (3) (Prerequisites: FLF 3114, 3513 or consent of instructor). Three hours lecture. Advanced instruction in written and oral communication.

**FLF 4143/6143. French Classicism.** (3) (Prerequisite: FLF 3513). Three hours lecture. Reading and discussion of selected texts in the novel, drama, and criticism of the 17th century.

**FLF 4153/6153. French Classicism.** (3) (Prerequisite: FLF 3513 or consent of instructor). Three hours lecture. A continuation of FLF 4143/6143.

**FLF 4213/6213. Historical Grammar.** (3) (Prerequisites: FLF 3114 and 3124 or consent of instructor). A history of the French language from the Strasbourg Oaths to Montaigne.

**FLF 4313/6313. Intensive Advanced French for Teachers.** (3) (Prerequisites: Teacher certification in French or consent of instructor). A short term course in the contrastive structures of French and English. Summer only.

**FLF 4990/6990. Special Topics in French.** (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

**FLF 6563. French Readings for Graduates I.** (3) Three hours lecture. A service course for students desiring a reading knowledge of French for research or advanced degrees

**FLF 6573. French Readings for Graduates II.** (3) (Prerequisite: FLF 6563 or consent of instructor). Three hours lecture. A service course for non-majors who desire a reading knowledge of French for research or advanced degrees.

**FLF 7000. Directed Individual Study.** Hours and credits to be arranged.

**FLF 8000. Thesis Research/Thesis.** Hours and credits to be arranged.

**FLF 8063. Seminar in French Drama of the 19th Century.** (3) (Prerequisite: Graduate standing).

**FLF 8073. Seminar in French Drama of the 20th Century.** (3) (Prerequisite: Graduate standing).

**FLF 8093. Seminar in the French Novel of the 19th Century.** (3) (Prerequisite: Graduate standing).

**FLF 8103. Seminar in the French Novel of the 20th Century.** (3) (Prerequisite: Graduate standing).

**FLF 8113. Seminar in French Classical and Neo-Classical Comedy.** (3) (Prerequisite: Graduate standing).

**FLF 8123. Seminar in the French Novel and Short Story of the Renaissance and Classical Period.** (3) (Prerequisite: Graduate standing).

**FLF 8213. Old French.** (3) (Prerequisite: Graduate standing). A philological study of the development of Old Parisian French from Vulgar Latin.

**FLF 8223. Seminar in French Classical and Neo-Classical Tragedy.** (3) (Prerequisite: Graduate standing).
FLG 4413/6413. Early German Literature. (3) (Prerequisite: FLG 3513 or instructor’s consent). Three hours lecture. German literature from the beginning to the end of the Middle Ages.

FLG 4423/6423. German Literature of the Age of Luther. (3) (Prerequisite: FLG 3513 or equivalent). Three hours lecture. Reading and discussion of selected texts with an emphasis on Humanism and Baroque.

FLG 4433/6433. Enlightenment and Storm and Stress. (3) (Prerequisite: FLG 3513 or equivalent). Three hours lecture. Reading and discussion of selected texts with an emphasis on Lessing and young Goethe.

FLG 4443/6443. German Classicism and Romanticism. (3) (Prerequisite: FLG 3513). Three hours lecture. Reading and discussion of selected texts from the period 1787 to 1815.

FLG 4453/6453. 19th Century German Literature. (3) (Prerequisite: FLG 3513 or equivalent). Three hours lecture. Reading and discussion of selected prose, dramas, and lyric poetry.

FLG 4463/6463. German Drama of the 20th Century. (3) (Prerequisite: FLG 3523). Three hours lecture. Reading of works of outstanding writers and discussion of literary currents of the century.

FLG 4473/6473. German Novel and Short Story of the 20th Century. (3) (Prerequisite: FLG 3523). Three hours lecture. Introduction to ancient Greek literature. Selected readings from Homer, Herodotus, and Plato.

FLH 4990/6990. Special Topics in Greek. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

FLH 8990. Special Topics in Greek. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

RUSSIAN

FLR 1124. Russian II. (4) (Prerequisite: FLR 1114). Three hours lecture. One recitation. Conversational Russian. Reading of graded texts.

FLR 2133. Russian III. (3) (Prerequisite: FLR 1124). Three hours lecture. Rapid review of Russian grammar; oral-aural practice; reading of intermediate texts.

JAPANESE

FLJ 2133. Japanese III. (3) (Prerequisite: FLJ 1124 or equivalent). Three hours lecture. Rapid review of Japanese grammar; oral-aural practice; reading of intermediate texts.

FLJ 2143. Japanese IV. (3) (Prerequisite: FLJ 2133 or equivalent). Three hours lecture. Oral-aural practice; reading and discussion of intermediate texts.

FLJ 4000. Directed Individual Study. Hours and credits to be arranged.

FLJ 4990/6990. Special Topics in Japanese. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

LATIN

FLL 1123. Latin II. (3) (Prerequisite: FLL 1113 or equivalent). Three hours lecture. Grammar; elementary reading.

FLL 2133. Latin III. (3) (Prerequisite: FLL 1123 or equivalent). Three hours lecture. Review of Latin grammar; reading of intermediate texts.

FLL 2143. Latin IV. (3) (Prerequisite: 2133 or equivalent). Three hours lecture. Reading of intermediate texts.

FLL 2990. Special Topics in Latin. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

FLL 4000. Directed Individual Study. (Prerequisite: Junior standing). Hours and credits to be arranged.

FLL 4990/6990. Special Topics in Latin. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

FLL 7000. Directed Individual Study. Hours and credits to be arranged.

FLL 8990. Special Topics in Latin. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

FLR 2153. Scientific Russian. (3) (Prerequisite: FLR 2143). Three hours lecture. Methods toward understanding scientific Russian texts and readings from prominent Russian scientists.

FLR 2990. Special Topics in Russian. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

FLR 3114. Advanced Russian I. (4) (Prerequisite: FLR 2143 or consent of instructor). Three hours lecture. Three hours laboratory. Advanced instruction in all aspects of modern Russian.

FLR 3124. Advanced Russian II. (4) (Prerequisite: FLR 3114 or consent of instructor). Three hours lecture. Three hours laboratory. A continuation of FLR 3114.

FLR 3143. Russian Civilization. (3) (Prerequisite: FLR 2143). Three hours lecture. A survey of Russian cultural heritage.

FLR 3513. Survey of Russian Literature I. (3) (Prerequisite: FLR 2143). Three hours lecture. A survey of Russian literature from its origin to 1835.

FLR 3523. Survey of Russian Literature II. (3) (Prerequisite: FLR 2143). Three hours lecture. A survey of Russian literature from 1835 to the present.

FLR 4000. Directed Individual Study. Hours and credits to be arranged.

FLR 4990/6990. Special Topics in Russian. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

FLR 8990. Special Topics in Russian. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

SPANISH

FLS 1115. Accelerated Elementary Spanish. (5) Five hours lecture. Two hours laboratory. Introduction to conversational Spanish for the qualified and motivated student approved by the department. The equivalent of FLS 1114 and 1124. Conducted mainly in Spanish.

FLS 1124. Spanish II. (4) (Prerequisite: FLS 1114 or equivalent). Three hours lecture. One recitation. Conversational Spanish. Reading of graded texts.

FLS 2133. Spanish III. (3) (Prerequisite: FLS 1124 or equivalent). Three hours lecture. Rapid review of Spanish grammar; oral-aural practice; reading of intermediate texts.

FLS 2143. Spanish IV. (3) (Prerequisite: FLS 2133 or equivalent). Three hours lecture. Oral-aural practice; reading of intermediate texts.

FLS 2183. Honors Spanish III. (3) (Prerequisite: Open through invitation only). Three hours lecture. Honors program of FLS 2133, Spanish III.

FLS 2193. Honors Spanish IV. (3) (Prerequisite: Open through invitation only). Three hours lecture. Honors program of FLS 2143, Spanish IV.

FLS 2990. Special Topics in Spanish. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

FLS 3111. Advanced Spanish Laboratory I. (1) (Prerequisite: FLS 2143 or FLS 2125). Three hours laboratory. A laboratory course to accompany FLS 3313 or to be taken separately. Required of all majors.

FLS 3113. Advanced Spanish I. (3) (Prerequisite: FLS 2143 or FLS 2125). Three hours lecture. Required of all majors. Advanced instruction in all aspects of modern Spanish. Required of all majors.

FLS 3121. Advanced Spanish Laboratory II. (1) (Prerequisite: FLS 2143 or consent of department). Three hours laboratory. A laboratory course to accompany FLS 3223 or to be taken separately. Required of all majors.

FLS 3143. Hispanic Civilization. (3) (Prerequisite: FLS 2143 or FLS 2125). Three hours lecture. Illustrated survey of Hispanic cultural heritage.

FLS 3233. Advanced Spanish II. (3) (Prerequisite: FLS 3113 or consent of instructor). Three hours lecture. Required of all majors. A continuation of FLS 3113.

FLS 3313. Business Spanish I. (3) (Prerequisite: FLS 2143 or FLS 2125). Three hours lecture. Emphasis on the acquisition and usage of Spanish business terminology and business practices used in foreign trade.

FLS 3323. Business Spanish II. (3) (Prerequisite: FLS 2143 or FLS 2125). Three hours lecture. Designed to provide a functional command of conversational and written Spanish for business correspondence, travel, investments and international business practices.

FLS 3513. Survey of Spanish Literature. (3) (Prerequisite: FLS 2143 or FLS 2125). Three hours lecture. A survey of Spanish literature from its origin to the 18th century.

FLS 3523. Survey of Spanish Literature. (3) (Prerequisite: FLS 2114 or FLS 2125). Three hours lecture. Required of all B.A. majors. A survey of Spanish literature from the 18th century to the present.

FLS 4000. Directed Individual Study. Hours and credits to be arranged.

FLS 4233/6233. Cervantes. (3) (Prerequisite: FLS 3513). Three hours lecture. A critical reading of Don Quixote. Lectures and reports on the life and works of Cervantes.

FLS 4263/6263. Spanish Novel and Short Story of the 20th Century. (3) (Prerequisite: FLS 3513). Three hours lecture. Reading and critical evaluation of selected Spanish novels and short stories from the Generation of 1898 to the present.

FLS 4283/6283. The Contemporary Spanish-American Novel and Short Story. (3) (Prerequisite: FLS 3523 or consent of instructor). Three hours lecture. A study of major contemporary Spanish-American novels and short stories.

FLS 4323/6323. Spanish Drama of the Golden Age. (3) (Prerequisite: FLS 3513). Three hours lecture. A study of dramatic works of Lope de Vega, Tirso de Molina, Calderon, and minor dramatic writers of the 17th century.

FLS 4333/6333. Spanish Drama of the 19th Century. (3) (Prerequisite: FLS 3513). Three hours lecture. Spanish Drama from the Romantic period to the Generation of 1898.

FLS 4433/6433. Intensive Advanced Spanish for Teachers. (3) (Prerequisite: Teacher certification in Spanish or consent of instructor). A six-hour core course in the contrastive structures of Spanish and English. Summer only.

FLS 4434/6434. Spanish Lyric Poetry. (3) (Prerequisite: FLS 3513). Three hours lecture. Reading and interpretation of masterpieces of Spanish lyric poetry and poetic theory from the Middle Ages to the present.

FLS 4523/6523. The Renaissance. (3) (Prerequisite: FLS 3513). Three hours lecture. Spanish literature and thought of the Renaissance.

FLS 4543/6543. Survey of Spanish-American Literature. (3) (Prerequisite: FLS 3513). Three hours lecture. A study of representative authors and literary movements up to Modernism.

FLS 4553/6553. Survey of Spanish-American Literature. (3) (Prerequisite: FLS 3523). Three hours lecture. A study of Spanish-American literature from the period of Modernism to the present.

FLS 4623/6623. Spanish Stylistics. (3) (Prerequisites: FLS 3113 and FLS 3223, or consent of instructor). Three hours lecture. Advanced course in the art of writing and speaking.

FLS 4633/6633. Introduction to Spanish Linguistics. (3) (Prerequisites: FLS 3233 or consent of instructor). Three hours lecture. Introduction to linguistic analyses and their application to the syntactic, morphological, semantic, phonological, historical, and sociolinguistic aspects of the Spanish language.

FLS 4643/6643. Spanish Phonology. (3) (Prerequisite: FLS 3233 or consent of instructor). Three hours lecture. Introduction to the articulatory classification of Spanish sounds. Discussion of the mental or-
organization of these sounds, and the processes which transform them during speech.

FLS 4653/6653. History of the Spanish Language. (3) (Prerequisite: FLS 3513). Three hours lecture. The history of the development of the Spanish language from its origins to the present.

FLS 4990/6990. Special Topics in Spanish. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

FLS 6563. Spanish Readings for Graduates I. (3) Three hours lecture. A service course for students desiring a reading knowledge of Spanish for research or advanced degrees.

FLS 6573. Spanish Readings for Graduates II. (3) (Prerequisite: FLS 6563 or consent of instructor). Three hours lecture. A service course for non-majors who desire a reading knowledge of Spanish for research or advanced degrees.

FLS 7000. Directed Individual Study. Hours and credits to be arranged.

FLS 8000. Thesis Research/Thesis. Hours and credits to be arranged.

FLS 8223. Seminar in the Picaresque Novel. (3) (Prerequisite: Graduate standing).

FLS 8253. Seminar in the Novel of the 19th Century. (3) (Prerequisite: Graduate standing).

FLS 8263. Seminar in the Novel of the 20th Century. (3) (Prerequisite: Graduate standing).

Department of FORESTRY
Office: 105 Thompson Hall

Professors Bell, Daniels, Dicke, Ezell, Hodges*, Hughes, Land, Matney, Richards (head), Sizemore*, Stanturf*, Stuart, and Traugott; Associate Professors Bonner*, Dean*, Evans, Grace, Assistant Professors Cooke*, Coleman*, Connor*

AEC 2713 or equivalent). Three hours lecture. Basic principles of forest management.

FO 1101. Forest Resources Survey. (1) One hour lecture. Survey of the professional resource manager’s role and career opportunities in providing forest-based goods and services. Not open to Forest Resources majors with senior standing.

FO 2111. Dendrology Laboratory. (1) (Corequisite: FO 2112). Four hours laboratory. Field exercises to promote the recognition and identification of trees and other woody plants.

FO 2112. Dendrology. (2) (Prerequisite: BIO 1203; Corequisite: FO 2111). Two hours lecture. Introduction to the identification and systematic classification of trees and other woody plants.

FO 2213. Forest Measurements. (3) (Prerequisite: ST 2113 or equivalent). Three hours lecture. Principles of measurement for standing and felled trees. Inventory and sampling theory for forested lands.

FO 2990. Special Topics in Forestry. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

FO 3012. Introduction to Forest Communities. (2) (Prerequisites: FSS 3301, FSS 3303, FO 2112, FO 2111). Field exercises to gain practical knowledge of soil-geology-ecology interrelationships through trips to various physiographic regions.

FO 3015. Forest Description and Analysis. (4) (Prerequisites: FO 2213). Field and laboratory exercises to gain practical experience with forest and land measurement techniques and equipment. Mapping inventory, and analysis of forested tracts.

FO 3101. Computer Application for Forest Resources Laboratory. (1) (Co-requisite: FO 3012). Two hours laboratory. Practice and demonstration of general and professional software packages used in upper level courses and professional settings in Forest Resources.

FO 3102. Computer Applications for Forest Resources. (2) (Prerequisite: Three hours of courses in the School of Forest Resources or consent of instructor. Co-requisite: FO 3101). Two hours lecture. Application of microcomputer concepts in forest resources with emphasis in Forestry, and general and professional software packages in professional settings.

FO 3113. Forest Recreation Management. (3) Three hours lecture. Studies of the management of forest resources for outdoor recreation.

FO 3123. Forest Ecology and the Global Environment. (3) (Prerequisite: Three hours of courses in the College of Forest Resources or consent of instructor. Co-requisite: FO 3101). Three hours lecture. Introduction to the identification and systematic classification of trees and other woody plants.
FO 4231/6231. Forest Operations and Harvesting Laboratory. (1) (Corequisite: FO 3015). Four hours laboratory. Investigative field and laboratory exercises used to complement concepts presented in FO 4233/6233.

FO 4233/6233. Forest Operations and Harvesting. (2) (Prerequisites: FO 3015, FO 4231/6231). Three hours lecture. Study of practical, managerial, and logistic considerations associated with harvesting and other forest operations, as well as their social, environmental and legal influences.

FO 4241/6241. Reforestation and Tree Improvement Laboratory. (1) (Corequisite: FO 4242/6242). Three hours laboratory. Field and indoor exercises, and field trips to a seed orchard and nursery, are used to illustrate methods and concepts presented in FO 4242/6242.

FO 4253/6253. Timber Procurement. (3) (Prerequisites: FO 4231/6231, FO 4233/6233). Lectures and field exercises dealing with the problems of timber procurement to include planning for harvest, methods of handling and transport, legal and safety considerations.

FO 4311/6311. Spatial Technologies in Natural Resources Management Laboratory. (1) (Prerequisite: FO 3015 or consent of instructor; corequisite: FO 4313/6313). Three hours laboratory. Fundamentals of geographic information systems: data collection, height and stand volume determinations from aerial imagery; planimetric and topographic mapping; image interpretation; GPS and GIS; applications to natural resources.

FO 4313/6313. Spatial Technologies in Natural Resources Management Laboratory. (1) (Prerequisite: FO 3015 or consent of instructor; corequisite: FO 4311/6311). Three hours laboratory. Application of economic principles and decision-making techniques to forest management problems. Topics include advanced forest valuation, timber taxation, stand-level management, and harvest scheduling.

FO 4343/6343. Forest Administration and Organization. (3) Three hours lecture. Hierarchy and land structuring of forest organizations. Legal aspects of administering forest land holdings.

FO 4353/6353. Forestry Law. (3) (Prerequisite: FO 3015 or consent of instructor). Three hours lecture. Legislative aspects of forestry with emphasis on the laws relating to forestry and forest operations with emphasis on real property law, environmental law, forest taxation law and contract law.

FO 4413/6413. Natural Resources Policy. (3) (Prerequisite: Senior standing). Three hours lecture. Current topics relating to natural resource policy which affect management decisions and practices in the public and private sectors of natural resources use.

FO 4423/6423. Professional Practice. (3) (Prerequisites: FO 4233/6233, FO 4232/6232; corequisite: FO 4421/6421). Three hours lecture. Development of forest resource alternatives and recommendations for a specific forest property.

FO 4443/6443. International Forest Resources and Trade. (3) (Prerequisite: Consent of Instructor). Three hours lecture. A study of the world’s wood consumption, marketing arrangements, community forestry, and international economic development.

FO 4451/6451. Remote Sensing Applications Laboratory. (1) (Co-requisite: FO 4452/6452). Prerequisites: A basic image interpretation or remote sensing course or consent of instructor). Three hours laboratory. Practical approaches to interpretation of remote sensing data. Emphasis on computer applications for image analysis.

FO 4452/6452. Remote Sensing Applications. (2) (Corequisite FO 4451/6451). Prerequisite: A basic image interpretation or remote sensing course or consent of instructor). Two hours lecture. An introduction to remote sensing with emphasis on applications and analysis of digital data products. Lecture, monitoring, and management of renewable natural resources.

FO 4463/6463. Forest Hydrology. (3) (Prerequisite: PSS 3301, PSS 3303, FO 4223/6223, FO 4221/6221, or consent of instructor). Three hours lecture. Synthesis of current information on the fundamental properties and processes of forest soils, hydrology, and water quality with emphasis on watershed and ecosystem management factors.

FO 4471/6471. GIS for Natural Resource Management. (1) (Co-requisite: FO 4472/6472; Prerequisite: Junior standing). Two hours lecture. Computer laboratory exercises that stress development, management and use of digital geographic data for management of natural resources.

FO 4472/6472. GIS for Natural Resource Management. (2) (Corequisite: FO 4471/6471; Prerequisite: Junior standing). Two hours lecture. Introduction to geographic information systems (GIS) with emphasis on collection, encoding, storage, retrieval, and analysis of spatial data for use in management of natural resources.

FO 4631/6631. Tree Form and Function Laboratory. (1) (Corequisite: FO 4633/6633). Three hours laboratory. Introduction to tree physiology measurement techniques and instrumentation, data analysis and interpretation.

FO 4633/6633. Tree Form and Function. (3) (Prerequisite: BIO 1203, co-requisite for 6633: FO 6631). Three hours laboratory. Introduction to geographic information systems (GIS) with emphasis on collection, encoding, storage, retrieval, and analysis of spatial data for use in management of natural resources.

FO 4990/6990. Special Topics in Forestry. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing new subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

FO 7000. Directed Individual Study. Hours and credits to be arranged.

FO 8000. Thesis Research/Thesis. Hours and credits to be arranged.

FO 8111-8211. Graduate Seminar. (1-1) Credit in 2 semesters allowed. Review of and discussion of current forestry issues. Presentation of student reports.

FO 8123. Tree Seed. (3) (Prerequisites: BIO 4203/6203 or consent of instructor). Two hours lecture. Three hours laboratory. Principles and practices of tree seed production, methods, and factors involved in harvesting, processing of storage, and tests of tree seed.

FO 8133. Forest Ecophysiology. (3) (Prerequisite: FO 4432/6432, BIO 4214/6214, or Consent of Instructor). Three hours lecture. Fall semester. An exploration of environment-plant interactions, and physiological mechanisms for injury from, and resistance to, environmental stress, with emphasis on forest communities.

FO 8143. Advanced Forest Economics. (3) Three hours lecture. Application of current theories and techniques of economics to forestry. Emphasis is on the use of quantitative tools to improve decision-making in forest resource management.

FO 8153. Quantitative Forest Ecology. (3) (Prerequisites: MA 1723 and ST 8114 or consent of instructor). Three hours lecture. Analytical models, fitting model coefficients to data, life tables, spatial patterns, interspecific competition, and species diversity.

FO 8163. Nonmarket Forest Values. (3) Three hours lecture. (Prerequisite: FO 4133 or equivalent or consent of Instructor). The course will deal with the valuation of nonmarket, non-timber outputs or amenities derived from the forest.

FO 8211. Graduate Seminar. (1-1) Credit in 2 semesters allowed. Review of and discussion of current forestry issues. Presentation of student reports.

FO 8213. Advanced Silviculture. (3) (Prerequisite: FO 4223 or consent of instructor). Three hours lecture and/or field trips once per week during spring semester. Silvicultural practices in connection with total ecological principles in decision making process. Emphasis on silviculture of bottomland hardwoods.

FO 8213. Seminar in Forest and Wildland Resources and Use. (3) Three hours. Biological and social bases for forest and wildland use; conservation and management through applications of science and public policy.

FO 8233. Advanced Forest Inventory. (3) Hours lecture. Design and analysis of forest resource inventories. Growth functions, yield tables, measures of site quality and stocking, and advanced sampling techniques.

FO 8243. Advanced Forest Resource Management and Planning. (3) (Prerequisite: FO 8143). Three hours lecture. Emphasis is on the assessment of multiple-use alternatives. Data needs, resource trade-offs, and economic and policy implications are discussed.
FO 8293. Master of Forestry Professional Paper. (3) For Master of Forestry students only. Demonstration of ability to compile, synthesize, and evaluate information, and to effectively communicate analyses and conclusions.

FO 8990. Special Topics in Forestry. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

FO 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

Department of FOREST PRODUCTS
Office: Forest Products Laboratory
Professors Bullard (Interim Department Head), Amburgey, Barnes, Borazjani, Ingram, Kim, Nicholas, Schultz, Seale, Sellers and Steele; Associate Professor Diehl; Assistant Professor Zhang

FP 1103. Wood Technology and Products. (3) Three hours lecture. A survey of wood structures, properties and products, including reconstituted wood products, chemicals from wood and wood preservation.

FP 2990. Special Topics in Forest Products. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

FP 3012. Introduction to Forest Industries. (2) Four hours per week for two weeks of laboratory (industry tours). Guided introduction to forest products industries and processes.

FP 4000. Directed Individual Study. Hours and credits to be arranged.

FP 4013/6013. Wood Anatomy. (3) (Prerequisite: FP 1103 or consent of instructor). Two hours lecture. Three hours laboratory. Anatomy of commercial timber species; elements of botanical microtechnique; fundamentals of microscopy, and fundamental properties: gross and minute structural characteristics of wood leading to identification.

FP 4023/6023. Wood Chemistry. (3) (Prerequisite: CH 1053 and CH 1123, or CH 1223 and CH 1224). Three hours lecture. Introduction to the distribution, chemical structure, reactions and uses of the chemical components of wood including cellulose, hemicellulose, lignin, and extractives.

FP 4113/6113. Adhesives and Finishes for Wood. (3) (Prerequisite: CH 1053, FP 1103, or consent of instructor). Two hours lecture. Three hours laboratory. Theory and technology of adhesion; adhesive types, equipment and application; fundamentals of coating technology; wood finishes; finishing systems; evaluation of glued, finished products; market volumes.

FP 4143/6143. Composite Wood Products. (3) (Prerequisite: FP 4113 or consent of instructor). Two hours lecture. Three hours laboratory. Study of physical and chemical parameters affecting reconstituted wood products; laboratory investigation of processing methods; industrial standards and quality control; markets.

FP 4213/6213. Wood Deterioration and Preservation. (3) (Prerequisite: Consent of instructor). Two hours lecture. Three hours laboratory. Thermal, biological, and mechanical agents of wood products deterioration; biological control; design considerations; wood preservation; preservation systems; treatability; preservative effectiveness; standards; pollution control.

FP 4223/6223. Furniture Production I. (3) (Prerequisite: FP 1130 or consent of instructor). Two hours lecture. Three hours laboratory. The theory of furniture production; materials for furniture; manufacturing machines and their functions; wood machining and sanding; finishing; industrial processes; marketing.

FP 4233/6233. Furniture Production II. (3) (Prerequisite: FP 1103 or consent of instructor). Two hours lecture. Three hours laboratory. General principles of upholstered furniture design; frame construction and analysis; material selection; fasteners; joint construction; and testing standards.

FP 4253/6253. Quantitative Methods in Forest Products and Furniture. (3) (Prerequisite: MA 1613 or MA 1713, BIS 1013 or concurrent). Three hours lecture. Application of economic principles to the production and marketing of forest products; production theory of single and multiple product firms; computer applications.

FP 4313/6313. Environmental Principles. (3) (Prerequisites: FP 3012 or Consent of instructor). Three hours lecture. Environmental regulations pertaining to Forest Products industries. Handling and transport of hazardous compounds. Sources of environmental problems, fate in the environmental, and common control technologies.
FST 1103. Introduction to Food Science. (3) Three hours lecture. An introductory course that relates how the disciplines of chemistry, microbiology and nutrition are involved in preservation, handling, distribution, and metabolism of foods. (May be taught as a correspondence course).

FST 1113. Food and the Consumer. (3) Three hours lecture. A study of the food chain from the producer to the consumer with emphasis on consumer education relative to man’s food supply. (Same as GA 2113).

FST 2112. Food Products Evaluation. (2) One hour lecture. Two hours laboratory. Sensory examination of food products; common defects, causes, and remedies. Basic methods of evaluation of different types of foods.

FST 2664. Food Processing. (4) (Prerequisite: consent of instructor). Three hours lecture. Two hours laboratory. Introduction of processing technology involved with manufacture of dairy, red meat, poultry, fish, and fruit/vegetable products.

FST 2990. Special Topics in Food Science and Technology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

FST 3111. Food Science Seminar. (1) One hour lecture. Preparation and presentation on specially assigned current topics in Food Science.

FST 3142. Meats Judging I. (2) Spring semester. Four hours laboratory. Grading and judging meat carcasses and cuts, study of packing house operation. (Same as ADS 3142).

FST 3412. Selection Evaluation and Use of Meats. (2) Fall semester. One hour laboratory. Identification, selection, cutting grading, care, storage and cooking cuts of meat. (Same as ADS 3142).

FST 4000. Directed Individual Study. Hours and credits to be arranged.

FST 4114/6114. Analysis of Food Products. (4) (Prerequisites: CH 2505). Three hours lecture. Three hours laboratory. Chemistry and technology of food products processing and physical and chemical methods of analyzing foods and biological products.

FST 4123/6123. Fermented Foods Processing. (3) (Prerequisites: BIO 3304). Two hours lecture. Three hours laboratory. Fundamental concepts of microbial cultures used in various fermented foods, with emphasis on the manufacture of cheese, cultured dairy products and other foods.

FST 4153/6153. Food Plant Management. (3) (Prerequisite: Senior standing or consent of instructor). Two hours lecture. One hour laboratory. A study of problems associated with the general management of food processing plants.

FST 4164/6164. Quality Assurance of Food Products. (4) (Prerequisites: BIO 3304). Two hours lecture. Four hours laboratory. Principles, methods, and techniques involved in evaluating essential parameters for commercial, state and federal control of food products.

FST 4173/6173. Food Packaging. (3) (Prerequisite: Consent of instructor). Three hours lecture. Objectives and requirements of packaging; composition, characteristics, chemical and physical properties, selection and adaptation of packaging materials and packages.

FST 4241/6241. Applied Food Chemistry. (1) (Prerequisite: BCH 3613 and prior credit for/or current enrollment in FST 4243/6243). Two hour lab. Basic laboratory experiments to provide understanding of the function and interactions of chemical components in food.

FST 4243/6243. Composition and Chemical Reactions of Foods. (3) Spring semester. (Prerequisites: CH 1053 and CH 2503 or equivalent). Three hours lecture. Nature and chemical behavior of food constituents including proteins, lipids, carbohydrates, minerals, water, enzymes and pigments; properties of food systems as related to commercial applications. (Same as ADS 4243/6243).

FST 4313/6313. Food Industry Nutrition Issues. (3) (Prerequisite: consent of instructor). Three hours lecture. Designed to help food technologists understand scientific evidence, changing demographics and lifestyles, and consumer perceptions influence food product demand and thus diet quality. (Same as NTR 4313/6313).

FST 4314/6314. Meats Processing. (4) Spring semester. Three hours lecture. Two hours laboratory. Survey of the meat industry with emphasis on slaughtering, cutting, curing, cooling, care, storage and manufacturing meats and meat products. (Same as ADS 4314/6314).

FST 4414/6414. Microbiology of Foods. (4) (Prerequisite: BIO 3404). Two hours lecture. Four hours laboratory. Isolation and classification of the microorganisms associated with spoilage of commercial and domestic preserved foods. (Same as BIO 4414/6414).

FST 4513/6513. Poultry Processing. (3) Two hours lecture. Two hours laboratory. Operation and study of modern processing equipment; grading poultry and eggs; killing, dressing, eviscerating, and packaging poultry; studying methods of retail and wholesale marketing. (Same as PO 4513/6513).

FST 4563. Food Products Evaluation. (3) Basic principles and applications in food product measurements, including physical (viscosity, texture), chemical (pH, acidity), microbiological (bacteria, yeast), and sensory methods will be discussed. (This course is designed for certification programs and not for students enrolled in degree programs at MSU).

FST 4573/6573. Food Engineering Fundamentals. (3) (Prerequisites: MA 1713, PH 1123, or consent of instructor.) Three hours lecture. Fundamentals of engineering as applied to food and agricultural products. Emphasis on units and dimensions, thermodynamics, mass and energy balances, fluid flow and heat transfer.

FST 4583/6583. Food Preservation Technology. (3) Two hours lecture. Two hours laboratory. Basics and unit operations on thermal processing, refrigeration/freezing, concentration/dehydration, fermentation, preservatives, baking, low thermal processes, modified atmospheres, washing, and shelf-life will be discussed. (Same as FST 4583/6583).

FST 4593/6593. New Food Product Development. (3) (Prerequisite: Senior Level Standing). Two hours lecture. Two hours laboratory. New product development, original idea through preliminary appraisal, economic and technological feasibility studies, laboratory development, organoleptical and consumer testing, and revisions to final decision making.

FST 4990/6990. Special Topics in Food Science and Technology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

FST 4613/6613. Seafood Processing. (3) Two hours lecture. Two hours laboratory. A study of basic food science and technology principles directed toward seafood and aquaculture food harvesting, processing, marketing, and regulation.

FST 7000. Directed Individual Study. Hours and credits to be arranged.

FST 8000. Thesis Research/Thesis. (1) One hour lecture. Preparation and presentation of reports on specially assigned current topics in Food Science.

FST 8111-8141. Food Science Seminar. (1) One hour lecture. Preparation and presentation of reports on specially assigned current topics in Food Science.

FST 8113. Advanced Food Microbiology. (3) (Prerequisite: FST/BIO 4414/6414). Three hours lecture. Advanced concepts in food microbiology emphasizing food quality and safety.

FST 8143. Advanced Food Chemistry. (3) (Prerequisites: FST 4243/6243). Three hours lecture. Designed for students to recognize and appreciate the various colloidal phenomena encountered in foods, and to develop a knowledge of techniques employed in their investigation.

FST 8163. Flavor and Food Acceptance. (3) (Prerequisite: CH 2503). Three hours lecture. Sensory responses with emphasis on smell, taste, and appearance as related to foods. Techniques of panel and psychophysical methods of testing.

FST 8253. Nutrition and Food Science Research Techniques. (3) Spring semester. One hour lecture. Six hours laboratory. Application of various instruments and techniques for assay of food and biological materials. (Same as NTR 8253).

FST 8333. Food Law. (3) (Prerequisite: Consent of Instructor). Two hours lecture. Two hours laboratory. Role of Law, Mandatory and Optional food regulations exercised by State, Federal and International Agencies on Food Quality, Safety, Wholesomeness and Nutrition.

FST 8423. Meat Science. (3) Summer semester. (Prerequisites: CH 4583 or equivalent and BIO 3404 or equivalent). Three hours lecture. Basic study of the value of meat and how this information is applied to the evaluation, processing and preservation of meat, meat products and meat by-products. (Same as ADS 8423).

FST 8513. Poultry and Food Science Readings. (3) (Prerequisite: PO 6513 or 3 hours in related courses offered in Animal and Dairy Sci-
ences or Horticulture). One hour lecture. Six hours library research weekly. An intensive study of poultry food science literature dealing with chemical, microbial, physical and organoleptic attributes of eggs and poultry meats. (Same as PO 8513).

FST 8572. Advanced Food Technology. (2) (Prerequisites: FST 6583 and/or consent of instructor). Two hours lecture. Introduction and discussion of recent developments in Food Science and Technology including aseptic processing, microwave technology, food irradiation, separation techniques, and modified atmosphere packaging.

FST 8983. Ingredient Technology. (3) Three hours lecture. A specialized study of the major food ingredients including functionality, applications, formulations, and legal considerations for formulated products.

FST 8990. Special Topics in Food Science and Technology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

FST 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

GENERAL AGRICULTURE
(For departmental information, see Agricultural Information Science and Education.)

GA 1111. Survey of Agriculture. (1) One hour lecture. A study of the over-all function, organization and operation of the agricultural industry in the United States and the world.

GA 2113. Food and the Consumer. (3) Three hours lecture. A study of the food chain from the producer to the consumer with emphasis on consumer education relative to man's food supply. (Same as FST 1113).

GA 2990. Special Topics in General Agriculture. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

GENERAL BUSINESS

GB 2990. Special Topics in General Business. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

GB 3011. Academic Peer Advising I. (1) (Prerequisites: Junior standing and consent of instructor, for Business majors only). One hour lecture. Study of the role, benefits, objectives, and practice of academic peer advising.

GB 3021. Academic Peer Advising II. (1) (Prerequisites: GB 3011 and consent of Instructor, for Business majors only). One hour lab. Laboratory application of academic peer advising.

GB 3031. Academic Peer Advising III. (1) (Prerequisites: GB 3011, GB 3021, and consent of Instructor, for Business majors only). One hour lab. Laboratory application of academic peer advising.

GB 4853. Business Policy. (3) (Prerequisite: Graduating senior). Three hours lecture. Administrative process under conditions of uncertainty. Emphasis in integrating knowledge acquired in the functional areas of business administration in formulating administrative policies.

GB 4990/6990. Special Topics in General Business. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

GB 8101. Comprehensive Study. (1) (Prerequisite: Consent from the Director of Graduate Studies in Business). Preparation for master’s level comprehensive examination to be taken by masters students needing a comprehensive program of study.

GB 8853. Policy Strategy. (3) (Prerequisite: Final semester MBA). Three hours lecture. Corporate, business and functional level in strategic positioning. Emphasis on strategy formation, implementation, and evaluation on profit and non-profit institutions through lecture and case analysis.

GB 8990. Special Topics in General Business. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

GENERAL ENGINEERING
Office: 106 McCain Engineering Building
Professors Bennett and Taylor
Instructors Brocato, Dobberfuhl, and Garretson

GE 2990. Special Topics in General Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

GE 3011. Engineering Entrepreneurship Seminar. (1) Two hours seminar. Current topics in engineering entrepreneurship to enable students to better understand the role of the entrepreneur in creating start-up companies and leading young existing companies.

GE 3513. Technical Writing. (3) (Prerequisites: Completion of English composition requirements; junior standing). Three hours lecture. Instruction and practice in technical writing for scientific and engineering fields, emphasizing analysis and development of correspondence, progress and research reports, instruction, and proposals.

GE 4990/6990. Special Topics in General Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

GE 8990. Special Topics in General Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

GE 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

Department of GEOSCIENCES
(Courses are listed under GG (Geology) and are found below and GR (Geography) which follows Genetics listing.)
Office: 109 Hilburn Hall
Professors Binkley, Myroie, Schmitz and Wax;
Professors Emeritus Kaye, Laswell, Myers, and Russell;
Associate Professors Dewey and Panuska;
Assistant Professors Brown, Lynch, Mack and Rodgers

GG 1111. Earth Sciences I Laboratory. (1) Two hours laboratory. Laboratory for GG 1113, but may be scheduled without GG 1113. Includes study of earth materials, maps, and aerial photographs. Planned primarily as a science elective for the non-geology major.

GG 1113. Survey of Earth Sciences I. (3) Three hours lecture. Study of the Earth in space, the materials of which the Earth is composed, and the processes affecting change on the Earth. Planned primarily as a science elective for the non-geology major.

GG 1121. Earth Sciences II Laboratory. (1) Two hours laboratory. Laboratory for GG 1123, but may be scheduled without GG 1123. Includes the study of fossils, geologic maps, and geologic cross sections. Planned primarily as a science elective for the non-geology major.

GG 1123. Survey of Earth Sciences II. (3) (Prerequisite: GG 1113, or equivalent). Three hours lecture. Origin and development of the Earth through geologic time. Planned primarily as a science elective for the non-geology major.
GG 1133. Planetary Geology. (3) Three hours lecture. Process-oriented examination of the planets and their satellites with emphasis on the “Earth-like” planets and moons.

GG 1151. Earth Materials and Processes Laboratory. (1) Prerequisite: Consent of instructor). Two hours laboratory. Study of natural earth materials and the processes acting upon them. Designed to accompany GG 1153.

GG 1153. Geology for Scientists and Engineers. (3) Three hours lecture. Introduction to physical geology, earth materials and earth processes for professional careers related to the earth sciences. Designed to accompany GG 1151.

GG 1161. Earth’s History Laboratory. (1) Prerequisite: GG 1153 or equivalent). Two hours laboratory and field work. Includes the study of fossils, geologic maps, geologic sections and their use in interpreting Earth history. Designed to accompany GG 1153.

GG 1163. Earth’s History. (3) Prerequisite: GG 1153 or equivalent). Three hours lecture. An in-depth consideration of the physical and biological evolution of the Earth through geologic time. Designed to accompany GG 1161.

GG 1183. Honors in Physical Geology. (3) Prerequisite: Open through invitation only). Three hours lecture. The principles of physical geology, earth materials and earth processes. GG 1151 may be taken to satisfy laboratory requirements.

GG 1193. Honors in Historical Geology. (3) Prerequisite: Open through invitation only) Three hours lecture. History of the earth as recorded in rocks and fossils, and the history of geologic thought. GG 1161 may be taken to satisfy laboratory requirements.

GG 2990. Special Topics in Geology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

GG 3133. Introduction to Environmental Geology. (3) Prerequisite: GG 1153, 1155, or 1183). Three hours lecture. Consideration of those aspects of earth science concerned with problems arising from intensive use of earth by modern society.

GG 3603. Introduction to Oceanography. (3) Prerequisite: GG 1113, 1153, or 1183). Three hours lecture. A survey of the basic principles and applications of science to the study of the marine environment.

GG 3613. Water Resources. (3) Prerequisite: GG 1113 or equivalent or consent of instructor). Three hours lecture. Introduction to the location, use, recovery and environmental problems of surface and subsurface waters.

GG 4000. Directed Individual Study. (Prerequisite: Junior standing). Hours and credits to be arranged.

GG 4033/6033. Resources and the Environment. (3) Prerequisite: Major in geology). Three hours lecture. Formation and development of natural resources involving the basic evolution, planning, and design of a typical lignite coal mine, including environmental monitoring and reclamation.

GG 4063/6063. Development of Fossil Fuel Resources. (3) Prerequisite: Consent of instructor). Three hours lecture. Formation, deposition, and extraction of fossil fuel resources. Petroleum and coal will be the main fossil fuels examined.

GG 4113/6113. Micropaleontology. (3) Prerequisite: GG 4203 or equivalent). Three hours lecture. A study of microscopic fossils. May be taken with GG 4201.

GG 4114/6114. Mineralogy. (4) Prerequisites: GG 1111 and CH 1223, or equivalents). Three hours lecture. Three hours laboratory. The physical and chemical properties of minerals; crystallography, origin, distribution, association, uses, and identification of minerals.

GG 4123/6123. Petrology. (3) Prerequisite: GG 4114, or equivalent). Three hours laboratory. The origin, occurrence, and classification of the major rock types.

GG 4133/6133. Principles of Paleocology. (3) Prerequisite: GG 4203 or equivalent or consent of instructor). Three hours lecture. A study of paleocology with special emphasis on marine paleocology. May be taken with GG 4201.

GG 4153/6153. Engineering Geology. (3) Prerequisite: GG 1113 or equivalent). Two hours lecture. Two hours laboratory. Application of geologic principles to location and construction of engineering structures; engineering properties of geologic materials; engineering application of equipment used by geologists.

GG 4203/6203. Principles of Paleobiology. (3) Prerequisites: GG 1163 and BIO 1504, or equivalents). Three hours lecture. Three hours laboratory. An introductory study of topics in paleobiology. May be taken with GG 4201.

GG 4233/6233. Applied Geophysics. (3) Prerequisite: Consent of instructor). Three hours lecture. A survey of the basic principles and applications of geophysics with major emphasis on petroleum exploration.

GG 4304/6304. Principles of Sedimentary Deposits I. (4) Prerequisite: GG 1123 or equivalent). Three hours lecture. Three hours laboratory. Treatment of sediment and sedimentary rock. Emphasis on texture, fluid processes, deposition, structure, and diagenesis; stratigraphic analysis; and application to subsurface flow systems.

GG 4333/6333. Geowriting. (3) Three hours lecture. Weekly library research on controversial topics in geology presented in class as written professional papers.

GG 4403/6403. Gulf Coast Stratigraphy. (3) Prerequisite: GG 4203 or equivalent). Three hours lecture or field trips. Systematic study of the stratigraphy of the Gulf Coast; actual field experience substituted for class work, when conditions permit.

GG 4413/6413. Structural Geology. (3) Prerequisites: GG 4123 or consent of instructor). Two hours lecture. Two hours laboratory. Application of the principles of mechanics to the forces deforming the rocks of the Earth’s crust; emphasis on structures in sedimentary rocks.

GG 4443/6433. Subsurface Methods. (3) Prerequisite: GG 4443 and GG 4413, or equivalent). One hour lecture. Four hours laboratory. The study of subsurface geologic methods including contouring, sampling study, various types of logging, and the interpretation of subsurface data.

GG 4503/6503. Geomorphology. (3) Prerequisite: Consent of instructor). Three hours lecture. The origin and characteristics of land forms based on a consideration of geologic processes, stages of development, and geological structure.

GG 4623/6623. Chemical Hydrogeology. (3) Prerequisite: CE 3523, CE 8563, or GG 4613/6613 or consent of instructor). Three hours lecture. Two hours laboratory. Advanced study of groundwater and its environment with emphasis on the chemical interaction of water with porous solids and the transport of chemical constituents.

GG 4990/6990. Special Topics in Geology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

GG 7000. Directed Individual Study. Hours and credits to be arranged.

GG 8000. Thesis Research/Thesis. Hours and credits to be arranged.

GG 8164. Earth Sciences I. (4) Prerequisite: Consent of the Head of Department). Three hours lecture. Two hours laboratory and field work. Comprehensive study of physical aspects of earth sciences, including geology, geophysics, oceanography, and atmospheric and space sciences. Planned primarily for teachers of science.

GG 8223. Advanced Paleontology. (3) Prerequisite: GG 4203 or equivalent). Two hours lecture. Two hours laboratory and field trips. Deals with topics in advanced paleontology.

GG 8413. Paleomagnetism. (3) Prerequisite: Consent of instructor). Three hours lecture. In depth examination of the geomagnetic field and magnetization of rocks and minerals with emphasis on practical application to geologic problems.

GG 8443. Advanced Structural Geology. (3) Prerequisite: Major in geology including GG 4413 or equivalent). Three hours lecture. A study of major tectonic units and the forces involved in their formation.

GG 8561. Geoscience Seminar. (1) Prerequisite: Graduate standing). Review of current geoscience literature; preparation and presentation of formal papers.

GG 8572. Geologic Literature. (2) Prerequisite: Major in geology). A reading course with emphasis on library research.

GENETICS
(For the interdisciplinary graduate programs in Genetics, consult College of Agriculture and Life Sciences section of this catalog, and the Graduate Bulletin.)

GNS 2990. Special Topics in Genetics. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

GNS 3103. Genetics I. (3) (Prerequisites: MA 1313 and BIO 1504 or BIO 1203). (Same as PO 3103 and BIO 3103).

GNS 4102/6102. Genetics II. (2) (Prerequisite: GNS 3103). (Same as PO 4102/6102).

GNS 4133/6133. Human Genetics. (3) (Prerequisite: BIO 1504 or consent of instructor). Three hours lecture. Principles of Mendelian and molecular genetics as applied to humans. Description and causes of human genetic diseases and other anomalies. (Same as BIO 4133/6166).

GNS 4282/6282. Genetics and Pest Management. (2) (Same as EPP 4282/6282).

GNS 4303/6303. Poultry Breeding and Hatchery Management. (3) Three hours lecture. Principles of inbreeding, linebreeding, crossbreeding, heritability, pedigree records, embryonic development; study of mortality peaks; causes of low fertility and hatchability.

GNS 4805/6805. Biochemical Methods. (5) (Prerequisite: Coregistration in BCH 4613/6613). One hour lecture. Eight hours laboratory. A comprehensive course to teach the student the modern methods of biochemistry including molecular biology. (Same as BCH 4805/6805).

GNS 4990/6990. Special Topics in Genetics. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

GNS 6123. Animal Breeding. (3) Fall semester. (Prerequisite: PO 3103). Three hours lecture. The basis for genetic improvement of livestock, including the study of variation, heritable characteristics, mating systems and methods of estimating breeding values. (Same as ADS 4123/6123.)

GNS 6713. Molecular Biology. (3) (Prerequisite: Coregistration in BCH 4613/6613). Three hours lecture. A study of basic molecular processes such as synthesis of DNA, RNA, and protein in both prokaryotic and eukaryotic cells. Offered fall semester. (Same as BCH 4713/6713).

GNS 7000. Directed Individual Study. Hours and credits to be arranged.

GNS 8000. Thesis Research/Thesis. Hours and credits to be arranged.

GNS 8113. Advanced Plant Breeding. (3) Three hours lecture. An intense review of methods of plant improvement and the application of these methods to modern plant breeding. (Same as PSS 8513 and PSS 8573).

GNS 8143. Biometrical Genetics in Plant Breeding. (3) (Same as PSS 8543).

GNS 8233. Advanced Breeding. (3) (Same as ADS 8233).

GNS 8453. Statistical Genetics. (3) (Same as ADS 8453).

GNS 8533. Genetic Variation. (3) (Same as PSS 8533).

GNS 8643. Molecular Genetics. (3) (Prerequisites: PO 3103 or BIO 3103 and Coregistration in BCH 4613/6613). Three hours lecture. Study of the gene and its expression with emphasis on structure and function in higher organisms. (Same as BCH 8643 and PHY 8643).

GNS 8990. Special Topics in Genetics. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

GEOGRAPHY
(For departmental information, see GEOSCIENCES, GG.)

GR 1114. Elements of Physical Geography. (4) Three hours lecture. Two hours laboratory. Systematic study of the elements of the environmental process that form and characterize the earth’s natural landscapes. May be taken as a science elective.

GR 1123. Introduction to World Geography. (3) Three hours lecture. A survey of the world’s regions, with emphasis upon locational aspects, physical and cultural diversity, and environmental issues.

GR 1603. Introduction to Meteorology. (3) (Prerequisite: GR 1114, GR 1123, or equivalent). Three hours lecture. Descriptive study of weather with the objective of gaining appreciation of the variety of atmospheric phenomena. Explanation of daily weather events, their causes and impacts.

GR 2013. Cultural Geography. (3) Three hours lecture. Study of human occupation of the Earth, treating geographic aspects of population, settlement, origin and diffusion of cultural traits, resource utilizing systems, and political factors.

GR 2313. Maps and Remote Sensing. (2) Three hours lecture. Two hours laboratory. Fundamental principles of cartography and remote sensing, including types and applications. Attention is given to interpretation of surface features, environmental problem solving, and environmental planning.

GR 2990. Special Topics in Geosciences. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

GR 3113. Conservation of Natural Resources. (3) Three hours lecture. Consideration of the current problems associated with the conservation of soils, forests, waters, minerals, and wild life in the United States and the world.

GR 3523. Computer Applications in Geoscience. (3) (Prerequisites: Coregistration in course or consent of instructor). Three hours lecture. Use of computer software in geosciences. Preparation of professional and technical documentation, graphical analyses, and computer modeling in geology, meteorology, climatology, geography and environmental science.

GR 8990. Special Topics in Geology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).
GR 4263/6263. Geography of the South. (3) Three hours lecture. A regional survey of the South with emphasis upon physical and cultural landscapes, settlement patterns, ethnic diversity, tourism development, and environmental issues.

GR 4273/6273. Geography of Mississippi. (3) Two hours lecture. Two hours laboratory or field work. A detailed survey of Mississippi with emphasis upon physical landscapes, population, settlement patterns, cultural/economic regions, tourism development and environmental issues.

GR 4401/6401. Weather Analysis I. (1) (Prerequisite: GR 1603 or equivalent.) One hour lecture. Two hours laboratory. Introduction to real-time weather information such as Difax charts, satellite and radar imagery, and text data. Emphasis placed on Nowcasting.

GR 4411/6411. Weather Analysis II. (1) (Prerequisite: GR 4401/6401.) One hour lecture. Two hours laboratory. Continuation of Weather Forecasting I. Advanced analysis of current weather data in Nowcasting.

GR 4421/6421. Weather Forecasting I. (1) (Prerequisite: GR 4411/6411). Two hours laboratory. Introduction to the process of creating and disseminating weather forecasts. Use of current weather data in creating daily forecasts for the local area.

GR 4431/6431. Weather Forecasting II. (1) (Prerequisite: GR 4421/6421). One hour lecture. One hour laboratory. Continuation of Weather Forecasting I. Emphasis placed on disseminating both oral and written forecasts for the local area.

GR 4503/6503. Practicum in Broadcast Meteorology I. (3) (Prerequisite: GR 1603 or equivalent.) Two hours lecture. Two hours laboratory. Continuation of Practicum in Broadcast Meteorology I. Emphasis is placed on understanding the television studio as related to weathercasting.

GR 4523/6523. Practicum in Broadcast Meteorology III. (3) (Prerequisite: GR 4513/6513.) Two hours lecture. Two hours laboratory. Continuation of Practicum in Broadcast Meteorology II. Emphasis is placed on producing weather graphics for weather broadcasts.

GR 4533/6533. Practicum in Broadcast Meteorology IV. (3) (Prerequisite: GR 4523/6523.) Two hours lecture. Two hours laboratory. Continuation of Practicum in Broadcast Meteorology III. Emphasis is placed on studio performance of weathercasts.

GR 4603/6603. Climatology. (3) (Prerequisite: GR 1114 or GR 1123, or equivalent.) Three hours lecture. Study of the elements and controls of weather and climate, distribution and characteristics of climatic regions.

GR 4613/6613. Applied Climatology. (3) (Prerequisite: GR 4633 or equivalent.) Two hours lecture. Two hours laboratory. Problem solving in today’s world in topics such as bioclimatology, agricultural climatology and land use climatology.

GR 4633/6633. Statistical Climatology. (3) (Prerequisites: GR 4603/6603 or equivalent.) Two hours lecture. A survey of the types of statistical weather data available. Manipulation of the data on various temporal and spatial scales.

GR 4640/6640. Meteorological Internship. (1-6) (Prerequisite: Consent of Instructor.) Hours and credits to be arranged. Internship with a television station, private company or government agency under supervision of instructor.

GR 4703/6703. Severe Weather. (3) (Prerequisites: GR 1603 or equivalent.) Three hours lecture. Descriptive study of severe and unusual weather across the earth. Explanation of variations in severe weather in both spatial and temporal scales.

GR 4713/6713. Synoptic Meteorology I. (3) (Prerequisites: GR 4603/6603 or equivalent.) Two hours lecture. Two hours laboratory. Fundamental principles behind weather forecasting. Physical processes in the atmosphere, atmospheric circulation systems, air mass analysis, frontogenesis and frontolysis.

GR 4743/6743. Synoptic Meteorology II. (3) (Prerequisite: GR 4713/6713.) Two hours lecture. Two hours laboratory. Advanced analysis and detailed case studies of meteorological phenomena related to weather forecasting problems. Short and long-range forecasting techniques are presented.

GR 4813/6813. Natural Hazards and Processes. (3) (Prerequisites: GR 1114 or equivalent.) Three hours lecture. A survey of natural processes and interactions in geology, oceanography and astronomy as applied to meteorology. Detailed study of earthquakes, volcanoes, ocean movements, and solar activity.

GR 4990/6990. Special Topics in Geosciences. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

GR 4913/6913. Thermodynamic Meteorology. (3) (Prerequisite: GR 1603 or equivalent.) Three hours lecture. Examination of the meteorological stability within the earth’s atmosphere. Focus on analysis of the various stability indices related to predicting severe weather.

GR 4943/6943. Air pollution Meteorology. (3) (Prerequisite: GR 1603 or equivalent.) Three hours lecture. Introduction to air pollution meteorology with emphases on types of pollutants, meteorological conditions associated with air pollution, and examination of air pollution models.

GR 7000. Directed Individual Study. Hours and credits to be arranged.

GR 8000. Thesis Research/Thesis. Hours and credits to be arranged.

GR 8313. Advanced Cultural Geography. (3) (Prerequisite: Consent of instructor.) Three hours lecture. Study and analysis of population distribution, densities, and movements; rural and urban settlement patterns and features; principles of cultural geography.

GR 8323. Geography for Teachers. (3) (Prerequisite: GR 1123 or equivalent.) Three hours lecture. Systematic overview of geography designed for in-service teachers. Organized around the National Geography Standards, class lectures are augmented by lessons presented by K-12 teachers.

GR 8400. Field Methods in Geosciences. (1-3) (Prerequisite: Consent of Instructor.) Hours and credits to be arranged. May be taken twice. Provides field experience in the geosciences through planned and supervised outdoor projects and field trips.

GR 8542. Geographic Literature. (2) (Prerequisite: Major or minor in geography.) A reading course with emphasis on library research.

GR 8990. Special Topics in Geosciences. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

HIGHER EDUCATION

Advisors: Merrily Dunn and Maureen Wilson

HED 7000. Directed Individual Study. Hours and credits to be arranged.

HED 8113. Administration of Student Personnel Services in Higher Education. (3) Three hours lecture. One hour laboratory. A study of the organization and administration of student personnel services with emphasis on health services, placement, financial aid and student housing.

HED 8123. University and Community College Governance. (3) Three hours lecture. A comprehensive survey of the field of administration of the community college and the university.

HED 8133. University and Community College Instruction. (3) Three hours lecture. A study of teaching methods and techniques, development of course content and instructional aids, and evaluation of student performance in the university and community college.

HED 8143. Seminar in University and Community College Education. (3) Three hours lecture. An in-depth analysis of current problems, strengths and issues confronting community college and university administrators and faculty.

HED 8153. University and Community College Curriculum Development. (3) Three hours lecture. A study of the practices, trends, and issues in university and community college programs of study and curriculum offerings.

HED 8710. Practicum in University and Community College. (1-3) Observation and supervised teaching activities in a university or community college.
HED 8723. Internship in University and Community College Education (3) Directed off-campus experiences designed to relate ideas and concepts to problems encountered in managing higher education programs.

HED 8990. Special Topics in Higher Education. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years.)

Department of HISTORY
Office: 214 Allen Hall

Professors Emeritus: James, Lowery, Moore, Parrish, Radvanyi and Scott; Associate Professors: Willman, Assistant Professors: Fote, Mabry, Godbold, Grill and Haug.

HI 1073. Modern U.S. History. (3) Three hours lecture. A continuation of HI 1063, covering the period from Reconstruction to the present.

HI 1083. Problems in American Civilization. (3) (Prerequisite: Open through invitation only). An honors course for freshmen. Three meetings each week. Readings, discussions, and reports.

HI 1163. World History Before 1500. (3) Three hours lecture. A survey of world history since prehistory until about 1500.

HI 1173. World History Since 1500. (3) Three hours lecture. A survey of world history since about 1500 until the present.

HI 1183. Problems in Modern World Civilization. (3) (Prerequisite: Open through invitation only). An honors course for freshmen. Three meetings each week. Readings, discussions, and reports.

HI 1213. Early Western World. (3) Three hours lecture. A survey of western world history from ancient times to about 1600.

HI 1223. Modern Western World. (3) Three hours lecture. A continuation of HI 1213, covering the period from the 17th century to the present.

HI 1313. East Asian Civilizations to 1300. (3) Three hours lecture. A survey of China and Japan and their peoples through a multi-disciplinary approach from pre-history until the thirteenth century.

HI 1323. East Asian Civilizations Since 1300. (3) Three hours lecture. A survey of China and Japan and their peoples through a multi-disciplinary approach from 1300 to the present.

HI 2203. International Security and Strategic Studies. (3) (Prerequisite: Consent of instructor). Three hours lecture. Survey of the security and strategic interests of the major powers and weapons technology. Strategic doctrines, arms control, and civil defense. (Same as PS 2203).

HI 2990. Special Topics in History. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

HI 3213. History of Sports in America. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. An examination of the role of sports in American history from colonial times to modern times.

HI 3333. Mississippi History. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A survey of Mississippi history examining economic, social, political, geographical, and cultural aspects of the state’s past.

HI 3703. The Western Church: Beginning to Reformation. (3) (Prerequisites: Completion of any 1000-level history course in history or philosophy and religion.) Three hours lecture. An examination of the institutions, doctrines, and spirituality of the Western Church and their impact on Western European politics, society, and culture. (Same as REL 3703).

HI 3743. History of England. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A survey of English history from its origins to the present.

HI 3763. Hitler and Nazi Germany. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A study of Adolf Hitler’s personality and rise to power, and examination of the theory and practice of National Socialism.

HI 3773. (3) History of the Holocaust. (3) (Prerequisite: Completion of any 1000-level history course or consent of the instructor). Three hours lecture. An examination of the role of perpetrators, victims, and bystanders during the Holocaust.

HI 3813. Modern Latin America. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. An introduction to the modern history of the major Latin American nations and their importance to the United States.

HI 3853. The United States and Latin America. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture.

Department of HISTORY
Office: 214 Allen Hall

Professors Emeritus: James, Lowery, Moore, Parrish, Radvanyi and Scott; Associate Professors: Willman, Assistant Professors: Fote, Mabry, Godbold, Grill and Haug.

HI 3903. Historiography and Historical Method. (3) (Prerequisites: Junior or senior standing). Three hours lecture. The writings and interpretations of leading European and American historians, bibliographical aids, methods of research, preparation of bibliographies, practice in writing a research paper.

HI 4000. Directed Individual Study. Hours and credits to be arranged.

HI 4103/6103. Colonial America. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. Study of the earliest English settlements to 1740. Emphasis on Puritanism, interaction with other people, expansion and forming of societal and political institutions.

HI 4113/6113. U.S. History 1783-1825. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. An advanced course in the history of the United States, 1783-1825, with emphasis on economic, social, political, and constitutional developments.

HI 4123/6123. Jacksonian America 1825-1850. (3) (Prerequisites: Completion of any 1000-level history course). Three hours lecture. America from the beginnings of the Jacksonian movement, its political, economic and social battles, through trans-continent expansion and the Mexican War.

HI 4133/6133. Civil War and Reconstruction 1850-1877. (3) (Prerequisites: Completion of any 1000-level history course). Three hours lecture. Origins of the secessionist movement and the Civil War, the political and military battles of the War, and the struggle to reunify the nation.

HI 4143/6143. Revolutionary America. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. American provinces from 1740 until 1783. Emphasis on maturation, pluralism, role in British empire, religion, Enlightenment, and causes, ideology, and conduct of the Revolution.

HI 4153/6153. U.S. History 1877-1917. (3) (Prerequisites: Completion of any 1000-level history course). Three hours lecture. A survey of political, economic, social, and constitutional developments.

HI 4163/6163. U.S. 1917-1945. (3) (Prerequisites: Completion of any 1000-level history course). Three hours lecture. A study of all major aspects of American government and life through World War II.

HI 4173/6173. U.S. History Since 1945. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A study of all major aspects of American government and life since the end of World War II.

HI 4183/6183. U.S. Economic History. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. An intensive study of economic change in the United States and its impact on political and social development. (Same as EC 4183/6183).

HI 4203/6203. Diplomatic History of the U.S. (3) (Prerequisites: Completion of any 1000-level history course). Three hours lecture. A study of American foreign policy from the founding of the Republic to the present time.

HI 4233/6233. War, Peace, and Society: The American Experience. (3) (Prerequisites: Completion of any 1000-level history course). Three hours lecture. A survey of the military history of the United States from colonial times to the present.

HI 4243/6243. American Life and Thought. (3) Three hours lecture. A survey of the changing lives and ideas of Americans from colonial to modern times. Family life, religion, recreation, dress, communities, social theories, medicine.

HI 4253/6253. Religion in America. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. Surveys history of religion in America, emphasizing interaction with social and political developments. (Same as REL 4253/6253).
HI 4263/6263. America’s Viet Nam War. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. Analysis of the U.S. conduct of Viet Nam War including such as: Cold War context, presidential decision-making, military doctrine, domestic opposition, and legacy.

HI 4273/6273. Women in American History. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A study of the economic, political, and social activities of women in American history. Emphasis on Southern women.

HI 4283/6283 History of Southern Women. (3) Three hours lecture. The lives and images of women in the South from colonial times to the present. Native-, African-, and European-American women to be studied.

HI 4303/6303. The Old South. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. Development of the Old South from colonization through the slavery controversy and the Civil War.

HI 4313/6313. The New South. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. Southern life from Reconstruction times to the present.

HI 4323/6323. The American West. (3) (Prerequisites: Completion of any 1000-level history course). Three hours lecture. A survey of the western frontier in American history from colonial times to 1900.

HI 4363/6363. African-American History and Culture. (3) (Prerequisite: Completion of any 1000-level history course). African-Americans from their African origins to the present, emphasizing black-white relations in the making of America.

HI 4403/6403. The Ancient Near East. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A study of the origins and development of civilizations in Mesopotamia, Egypt, and Syria-Palestine from prehistoric times to the end of the Persian period. (Same as REL 4403/6403).

HI 4563/6563. Viet Nam Between Revolution and War, 1940-1990. (3) (Prerequisite: completion of any 1000-level history course or consent of instructor). Three hours lecture. The drama of modern Viet Nam that defined an entire era of decolonization and Cold War division. Historical roots, competing political visions, and sociocultural changes.

HI 4583/6583. China Since 1800. (3) (Prerequisite: Completion of any 1000-level history course or consent of instructor). Three hours lecture. A survey in English of China’s turbulent centuries of imperial decline, foreign assault, nationalist and communist revolutions, cultural and social transformations and the quest for institutional and economic modernization.

HI 4593.6593. Japan Since 1600. (3) (Prerequisite: Completion of any 1000-level history course or consent of instructor). Three hours lecture. Examines the major political, cultural, economic, military and diplomatic events that have brought Japan from sheltered feudalism to international preeminence.

HI 4603/6603. Medieval Civilization. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. An intensive study of medieval institutions and culture.

HI 4623/6623. The Vikings. (3) (Prerequisite: Junior standing or consent of the instructor). Three hours lecture. A survey in English of the Vikings and the Viking Age. (Same as FL 4623/6623)

HI 4643/6643. Renaissance and Reformation. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. The Renaissance and its relation to religion, politics, and social life; origins of the Reformation movement and its effect on Europe in early modern times.

HI 4653/6653. The History of Science and Technology. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. Science and technology from Newton to the present, emphasizing the relationship between scientific innovation and technological application.

HI 4673/6673. Europe, 1789-1914. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A study of the political, economic, and intellectual foundations of nineteenth century society.

HI 4683/6683. Europe: The First World War to Hitler. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. European development from the beginning of the First World War to the beginning of the Second World War.

HI 4693/6693. Europe: The Second World War to the Common Market. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. European development from the beginning of the Second World War to the present time.

HI 4703/6703. England to 1485. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture.

HI 4713/6713. Tudor and Stuart England. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. The development of English institutions during the Tudor and Stuart periods.

HI 4753/6753. History of Russia. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. The political, social, cultural, and economic development of Russia from Kievan to Soviet times.

HI 4763/6763. History of Modern Germany. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. The history of German institutions in modern times.

HI 4773/6773. History of Modern France. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. The history of French institutions in modern times.

HI 4783/6783. African Civilization to 1880. (3) (Prerequisite: Completion of any 1000-level history course or consent of instructor). Three hours lecture. This is a survey course which traces the major developments in Africa to 1880.

HI 4793/6793. Modern Africa. (3) (Prerequisite: Completion of any 1000-level history course or consent of instructor). Three hours lecture. This course traces Africa’s history from 1880 to the present. It discusses how Africa lost and regained its sovereignty and the dilemma of independence.

HI 4833/6833. Colonial Latin America. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A survey of Latin America in the colonial era: geographical setting, native cultures, conquest and colonization, Portuguese and Spanish colonial administration, cultural development.

HI 4843/6843. Latin-American Republics. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. Modern Latin-American republics from the wars of independence to the present day, with special attention to Inter-American relations.

HI 4853/6853. Modern Mexico. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. The political, economic, and social development of the Mexican nation from Independence through the age of dictators to the Great Revolution and its aftermath.

HI 4903/6903. The Far East. (3) (Prerequisite: Completion of any 1000-level history course). Three hours lecture. A study of the impact of western civilization on China, Japan, and India in the nineteenth and twentieth centuries.

HI 4913/6913. The Administration of Archives and Manuscript Collections. (3) (Prerequisite: HI 3903 or consent of instructor). Three hours lecture. An introduction to archival theory and practice, including the evaluation, arrangement and description of archival materials in university, business, state, and federal depositories.

HI 4923/6923. A Practicum in Archival Administration. (3) (Prerequisite: HI 4913/6913). Nine hours laboratory. In-service training in processing manuscript materials including a semester assignment of handling all facets of a manuscript collection.

HI 4990/6990. Special Topics in History. (1-9) (Credit and title to be arranged). This course is to be used on a limited basis to offer developing student matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

General

HI 7000. Directed Individual Study. Hours and credits to be arranged.

HI 8803. Graduate Colloquium. (3) (Prerequisite: Graduate standing). Three hours lecture. Topical focus to be determined by the faculty member conducting the colloquium. (May be taken for credit more than once).

HI 8923. Historiography and Historical Method. (3) (Prerequisite: Graduate standing). Three hours lecture. The writings and interpretations of leading European and American historians; bibliographical aids in history; methods of research; preparation of bibliographies; practice in writing a research paper.
HI 8990. Special Topics in History. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years.)

Directed Readings

HI 8103. Readings in Colonial American History. (3) (Prerequisite: Graduate standing).
HI 8113. Readings in U.S. History, 1783-1825. (3) (Prerequisite: Graduate standing).
HI 8123. Readings in Jacksonian America. (3) (Prerequisite: Graduate standing).
HI 8133. Readings in the Civil War and Reconstruction. (3) (Prerequisite: Graduate standing).
HI 8153. Readings in U.S. History, 1877-1917. (3) (Prerequisite: Graduate standing).
HI 8163. Readings in Contemporary United States. (3) (Prerequisite: Graduate standing).
HI 8203. Readings in American Diplomatic History. (3) (Prerequisite: Graduate standing).
HI 8233. Readings in American Military History. (3) (Prerequisite: Graduate standing).
HI 8263. Readings in American Economic Developments. (3) (Prerequisite: Graduate standing).
HI 8273. Readings in Women in American History. (3) (Prerequisite: Graduate standing).
HI 8283. Readings in Women in Southern History. (3) (Prerequisite: Graduate standing).
HI 8293. Readings in History of American Families. (3) (Prerequisite: Graduate standing).
HI 8303. Readings in the Old South. (3) (Prerequisite: Graduate standing).
HI 8313. Readings in the New South. (3) (Prerequisite: Graduate standing).
HI 8323. Readings in the American West. (3) (Prerequisite: Graduate standing).
HI 8353. Readings in African-American History and Culture. (3) (Prerequisite: Graduate standing).
HI 8733. Readings in Colonial Latin America. (3) (Prerequisite: Graduate standing).
HI 8743. Readings in Latin-American Republics. (3) (Prerequisite: Graduate standing).
HI 8403. Readings in Ancient History. (3) (Prerequisite: Graduate standing).
HI 8423. Readings in Medieval History. (3) (Prerequisite: Graduate standing).
HI 8443. Readings in Renaissance and Reformation. (3) (Prerequisite: Graduate standing).
HI 8503. Readings in European History, 1600-1789. (3) (Prerequisite: Graduate standing).
HI 8523. Readings in European History, 1789-1914. (3) (Prerequisite: Graduate standing).
HI 8533. Readings in European History, 1914-Present. (3) (Prerequisite: Graduate standing).
HI 8613. Readings in English History, 1485-1714. (3) (Prerequisite: Graduate standing).
HI 8623. Readings in English History Since 1714. (3) (Prerequisite: Graduate standing).
HI 8753. Readings in Russian History. (3) (Prerequisite: Graduate standing).
HI 8763. Readings in the Far East. (3) (Prerequisite: Graduate standing).

Seminars

HI 8813. Seminar in U.S. History Before 1877. (3) (Prerequisite: Graduate standing).
HI 8823. Seminar in U.S. History Since 1877. (3) (Prerequisite: Graduate standing).
HI 8833. Seminar in Southern History. (3) (Prerequisite: Graduate standing).
HI 8843. Seminar in Latin-American History. (3) (Prerequisite: Graduate standing).
HI 8853. Seminar in European History Before 1789. (3) (Prerequisite: Graduate standing).
HI 8863. Seminar in European History Since 1789. (3) (Prerequisite: Graduate standing).
HI 8883. US Agricultural History, 1500-2000. (3) (Prerequisite: Graduate standing). Three hours seminar. An intensive study of agricultural and rural development in the United States and its impact on social, economic, and political changes.
HI 8913. Seminar in Quantitative Methods for Historical Research. (3) (Prerequisite: Graduate standing).

School of HUMAN SCIENCES

Office: 128 Lloyd-Ricks
Interim Director: Gary B. Jackson
Professors Dodson and Taylor;
Associate Professors Bateman, P. Miller, and Oakley;
Assistant Professors Byrd, Cheek, Lokken, Malone, and B. Miller;
Instructor Sutphin; Lecturer: Bioley, Batchelder, Boutwell, Carroll, Hauser, Johnson, Jones, Lewis, and Match

HS 1711. Professional Protocol. (1) One hour lecture. The essentials of professional protocol and accepted standards of social usage.

HS 1523. Visual Design in Dress. (3) Three hours lecture. Application of basic art principles to selection and design of clothing; physical, cultural, social, aesthetic, and psychological aspects of dress.

HS 1701. Survey of Human Sciences. (1) One hour lecture. Introduction to the field of human sciences through a study of its history and the variety of professional careers available.

HS 1802. Professional Seminar I. (2) Two hours lecture. Overview of individual development and the family life cycle with emphasis on professional opportunities in the field.

HS 2203. Science of Food Preparation. (3) One hour lecture. Four hours laboratory. A study of foods and the principles underlying handling and preparation of food products to maintain the highest standard of quality.

HS 2233. Meal Management. (3) One hour lecture. Four hours laboratory. Planning, preparing, and serving meals; emphasis on management of time, energy, and money in relation to feeding the family.

HS 2273. Introduction to Hospitality Beverages. (3) Three hours lecture. Overview of history, identification and management of hospitality beverages and the venues from which they are served.

HS 2283. Child Health and Nutrition. (3) Three hours lecture. Nutrition requirements during pregnancy and lactation, and of infants and young children; birth defects from metabolic errors; related health of young children.

HS 2293. Individual and Family Nutrition. (3) Three hours lecture. Fundamental principals of human nutrition and the practical application of this knowledge in the selection of adequate diets.

HS 2523. Introductory Textiles. (3) (Prerequisite: CH 1043). Two hours lecture. Two hours laboratory. A basic study of fibers, yarns, fabric structure, and factors influencing selection, appearance, care, and serviceability of textiles and fabrics.

HS 2553. Fashion Merchandising. (3) Three hours lecture. A survey of the entire fashion industry as it relates to fashion merchandising.

HS 2593. Apparel/Sewn Product Analysis and Evaluation. (3) Two hours lecture. Two hours laboratory. Analysis of design and construction entities that affect cost, consumer perception, consumer satis-
faction, marketability and profits of various items of apparel/sewn products.

HS 2613. Introduction to Interior Environments. (3) (Prerequisite: ART 1123 or consent). Two hours lecture. Two hours laboratory. Introduction to design theory and its application in the development of criteria for interior environments.

HS 2633. Interior Materials, Treatments and Resources. (3) (Prerequisite: HS 2523 or concurrent enrollment). Three hours lecture. Materials, equipment, services and resources available to the interior designer. Needs.

HS 2803. Pre-natal and Infant Development. (3) Two hours lecture. Two hours laboratory. Biological and environmental influences; behavioral and developmental patterns, from the onset of pregnancy to toddlerhood.

HS 2813. Child Development I. (3) (Prerequisite: PSY 1013). Two hours lecture. Two hours laboratory. Developmental characteristics of children with emphasis on the early years; implications for care and guidance. Observation and participation in the Child Development and Family Studies Center.

HS 2990. Special Topics in Human Sciences. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

HS 3000. Field Experience. (1-6) (Prerequisite: Consent of instructor). Supervised field experience for human sciences students; an internship in an approved, option-related situation.

HS 3113. Wine Appreciation. (3) Three hours lecture. Principles of wine identification, evaluation and service with emphasis on the wines of Europe and the United States.

HS 3263. Nutrition Research in Food and Nutrition. (3) (Prerequisites: ST 2113, HS 2293). Two hours lecture. Two hours laboratory. Introduction to food and nutrition research methods, application of computer and related technologies in nutrition research through design and development of a research project.

HS 3273. Beverage Systems Management. (3) (Prerequisite: HS 2273 or consent of instructor). Three hours lecture. Operation of hospitality beverage facilities. Includes design, staffing, training, responsible service, procurement, pricing, systems controls and marketing.

HS 3274. Quantity Food Production and Service. (4) (Prerequisite: HS 2233 or consent of instructor). One hour lecture. Eight hours laboratory. Principles and methods of preparation and service of food in quantity.

HS 3283. Food Service Organization and Management. (3) Three hours lecture. Introduction to the foodservice system concept, function, subsystems, and management of financial and human resources.

HS 3303. Consumer Economics. (3) (Prerequisite: EC 2113 or Junior Standing and consent of instructor). Three hours lecture. Economic principles. Their application to consumer situations, and the consumer's relation to the American and world economy.

HS 3553. Fashion Retailing. (3) (Prerequisites: HS 2553 or consent of instructor). Three hours lecture. Specific problems, procedures and practices in fashion retailing.

HS 3563. Visual Merchandising. (3) (Prerequisite: HS 2553 or consent of instructor). Two hours lecture. Two hours laboratory. Principles of window and interior display, individual and group participation in designing and executing displays for commercial and educational purposes.

HS 3573. Historic Costume. (3) Two hours lecture. Two hours laboratory. Survey of costume from prehistoric to modern times with emphasis on biographical, social, political, and technological changes impacting fashion, preservation, documentation, and exhibition of artifacts.

HS 3593. Merchandising and Promotion Strategies. (3) (Prerequisite: HS 2553 or consent of instructor). Three hours lecture. A study of fashion presentation techniques and production requirements in the primary, secondary and retail settings.

HS 3611. Portfolio Presentation: Methods and Media. (1) (Prerequisites: HS 2613, ART 1213, ART 1133, EC 1513). One hour lecture. Portfolio presentation techniques for the professional practice of interior design.

HS 3623. Space Planning. (3) (Prerequisite: HS 2613). Two hours laboratory. Physical and socio-economic aspects of planning residential and non-residential spaces.

HS 3643. History of Interiors I. (3) Three hours lecture. A survey of furniture styles, ornament, designers, and accessories associated with period interiors from the early Egyptian period through 1850.

HS 3653. History of Interiors II. (3) (Prerequisite: HS 3643 or consent of instructor). Three hours lecture. Technological advancement and subsequent evolution of design philosophies reflected in furnishings and interiors of the late nineteenth and twentieth centuries.

HS 3663. Color and Lighting for Interiors. (3) (Prerequisites: HS 2613). One hour lecture. Four hours laboratory. Concentrated study of color and light relationships and their application to the visual, technical, and functional aspects of interior spaces.

HS 3673. Environments for Special Needs. (3) (Prerequisite: HS 2613 or consent of instructor). Three hours lecture. Laws, attitudes, conditions, specifications, and environmental issues affecting private and public spaces.

HS 3803. Child Care Procedures. (3) (Prerequisites: HS 2813). Two hours lecture. Two hours laboratory. Selection of appropriate equipment and supplies; program planning for nursery school and day care centers, observation and participation in the Child Development Center.

HS 3813. Child Development II. (3) (Prerequisites: HS 2813 and junior standing). Three hours lecture. An intensified exploration of child development theory, research and methodology used in the study of the young child (birth to five). Major emphasis on process of development.

HS 3823. Designing Child Care Programs. (3) (Prerequisites: HS 3803 and HS 3813). Two hours lecture. Two hours laboratory. Designing programs for nursery-age children with emphasis on children's development needs and characteristics as related to appropriate learning experiences.

HS 4000. Directed Individual Study in Human Sciences. Hours and credits to be arranged.

HS 4193/6193. Social and Cultural Aspects of Food. (3) Three hours lecture. A study of international, regional and religious history, customs, beliefs and other impacts upon food preparation and consumption.

HS 4213. Nutrition Public Policy and Promotion. (3) (Prerequisite: HS 2293). Three hours lecture. Addresses the role of the public and private sectors in identifying and addressing the nutritional needs of various population groups.

HS 4233/6233. Medical Nutrition Therapy. (3) (Prerequisites: HS 2293 or consent of instructor). Three hours lecture. Three hours laboratory. Advanced problems in human nutrition: digestion, metabolism, function, requirements, and recommendations for carbohydrates, lipids, proteins and water. (Same as NTR 6233).

HS 4243/6243. Nutrition Throughout the Life Cycle. (3) (Prerequisite: HS 4233/6233 or consent of instructor). Three hours lecture. Three hours laboratory. Advanced study of the nutritional needs of individuals and groups during the life cycle; infancy through the later years. (Same as NTR 6243).

HS 4253/6253. Human Nutrition I. (3) (Prerequisites: BIO 2014 and CH 2503 or equivalent). Three hours lecture. Advanced human nutrition: digestion, metabolism, function, requirements, and recommendations for carbohydrates, lipids, proteins and water. (Same as NTR 4253/6253).

HS 4273/6273. Nutritional Assessment. (3) (Prerequisite: BCH 3613 and HS 4223 or equivalent). Two hours lecture. Two hours laboratory. Selection, utilization, interpretation, and evaluation of anthropometric, laboratory, clinical and dietary methods available for the assessment of nutritional status.

HS 4274/6274. Advanced Food Service Management. (4) (Prerequisites: HS 3274, HS 4283). One hour lecture. Eight hours laboratory. Practical experience in the management of quantity food production for specialty dinners and catering, including purchasing and cost accounting.

HS 4293/6293. Human Nutrition II. (3) (Prerequisites: BIO 2523/6253 or consent of instructor). Three hours lecture. Advanced human nutrition and metabolism with emphasis on the functions, requirements, and recommendations of the regulatory nutrients (vitamins and minerals) and water. (Same as NTR 4293/6293).

HS 4313/6313. Family Resource Management. (3) Three hours lecture. Decision-making in the family and operation of the household as affected by family values, philosophies, resources, and socio-economic conditions.

HS 4323/6323. Consumer Issues and Policy. (3) (Prerequisite: HS 3290 or consent of instructor). Three hours lecture. An assessment of policies and programs relating to information, product safety, and channels of appeal for the individual.

HS 4333/6333. Families, Legislation and Public Policy. (3) (Prerequisite: Junior Standing). Three hours lecture. An examination of the impact of legislation and public policy on the well being of the family with emphasis on policy and family change.

HS 4343/6343. Apparel Design II. (3) (Prerequisite: HS 1533 or consent). One hour lecture. Four hours laboratory. Advanced problems
and techniques for clothing construction; creative expression through appli-
cation of techniques of flat pattern design.

HS 4403. Introduction to Gerontology. (3) Three hours lecture. An
introduction to the dynamics of the aging process and strategies for
maximizing the quality of life. Emphasis on the role of geriatric
hs

HS 4423/6423. Teaching Human Sciences. (3) (Prerequisite: Consent of
advisor). Three hours lecture. The function of human sciences
education in the educational system. Curriculum structure, classroom
methods, media and evaluation.

HS 4440/6440. Workshop in Human Sciences. (1-3) This course
provides supervised practicum experience in human sciences.

HS 4450/6450. Work Experience in Human Sciences Related
Occupations. (3-6) Work experience in two phases of occupational
human sciences, development of a program of work, and incorporating
the work experience into curricula.

HS 4462. Curriculum in Human Sciences. (2) (Prerequisites: Se-
nior standing and admission to Teacher Education). Two hours
lecture. Spring semester. Bases for curriculum planning, exemplar curric-
um, and customizing curriculums.

HS 4513/6513. Social-Psychological Aspects of Clothing. (3)
(Prerequisite: Three hours Sociology or Psychology). Three hours
lecture. Exploration of the sociological and psychological aspects of
wearing apparel; man’s response to and use of clothing as an aspect of behavior at
different life stages.

HS 4523/6523. Problems In Consumer Textiles. (3) (Prerequisite:
HS 2523). Three hours lecture. In-depth study of consumer selection
of contemporary textiles; end-use performance and care; opportunity for
individual investigation of fabric and analysis.

HS 4563. Intermediate Textiles. (3) (Prerequisite: HS 2523). Two
hours lecture. Two hours laboratory. A basic study of dyes, color applica-
tions, finishes and physical testing used in manufacturing textiles.

HS 4583/6583. Home-Based Entrepreneurship. (3) Three hours
lecture. Exploration of services/products that have potential for
home-based businesses with emphasis on business, marketing, and
management skills necessary for operation of these businesses.

HS 4613/6613. Residential Interior Design Studio I. (3) (Prere-
quisite: HS 2613, HS 4733 or concurrent enrollment). One hour
lecture. Four hours laboratory. Integration of the total living environment,
through the application of the design elements and technical aspects of
the field.

HS 4623/6623. Commercial Interior Design Studio I. (3) (Prere-
quisite: HS 4613). One hour lecture. Four hours laboratory. Actual
practice in the commercial design field through the execution of commer-
cial design problems.

HS 4643/6643. Residential Interior Design Studio II. (3) (Prere-
quisite: HS 4613). One hour lecture. Four hours laboratory. Integration
of the total living environment, through the application of the design
elements and technical aspects of the interior design field.

HS 4653/6653. Commercial Interior Design Studio II. (3) (Prere-
quisite: HS 4623/6623). One hour lecture. Four hours laboratory. Ad-
vanced study of design problems in the commercial interior design field
through the individual research and the execution of design solutions.

HS 4663/6663. Professional Procedures and Practices for In-
terior Designers. (3) (Prerequisite: HS 4613, HS 4623). Three hours
lecture. Professional opportunities as they relate to individual competen-
cies. Study of studio procedures, ethics, business and legal aspects. Prep-
aration of resume and portfolio presentation.

HS 4683/6683. Current Housing Problems of Families. (3)
(Prerequisite: Junior standing). Three hours lecture. Analysis of current
housing problems confronting families, their historical development,
government policies and remedial measures.

HS 4693. Furniture Design. (3) (Prerequisite: EG 1513, HS 3643,
HS 3653 and consent of instructor). Two hours lecture. Two hours labor-
atory. Exploration of the basic methods and processes of furniture de-
sign.

HS 4701. Internship Placement Seminar. (1) (Prerequisite: Ju-
nior standing and consent of instructor). One hour lecture. Preparation
for an internship in a chosen specialization.

HS 4702. Human Sciences Senior Seminar. (2) (Prerequisite:
Senior standing in Human Sciences). Two hours lecture. Examination of
current societal issues and trends using an integrative approach. Empha-
sis on professional development and effectiveness in Human Sciences.

HS 4710/6710. Study Tour. (1-3) Experimental learning through
travel in the United States or abroad focusing on specialized areas of
study in human sciences.

(3) (Prerequisites: CS 1013 or equivalent). Two hours lecture. Two
hours laboratory. Applications of computer-aided design for interior design,
which includes fashion merchandising, child development, human sciences education,
consumer economics, foods and nutrition.

HS 4750. Internship. (6-8) (Prerequisites: Minimum of senior stand-
ing, 2.0 and consent of instructor). Individual work experience in an
approved setting under supervision of Mississippi State University faculty.

HS 4803/6803. Art of Parenting. (3) (Prerequisite: Junior stand-
ing). Three hours lecture. Study of the child as a part of the family in a dy-
namic transactional system. Emphasis on economics, stress, practical
problems and child services.

HS 4813/6813. Adult Development: The Middle Years. (3)
(Prerequisite: PSY 1013 and junior standing). Three hours lecture. The-
ory and perspectives on adulthood in contemporary society, adjustment
to internal and environmental changes, role structures, supportive net-
works and public policy issues.

HS 4823/6823. Development and Administration of Child
Service Programs. (3) (Prerequisite: HS 3813 or concurrent enroll-
ment). Three hours lecture. Planning, administering, and evaluating
the organizational structure of a variety of child service programs.

HS 4834. The Hospitalized Child. (4) (Prerequisites: HS 3813 or
concurrent enrollment, junior standing and permission of the instructor).
Three hours lecture. Two hours laboratory. A pre-practicum develop-
ment approach to the special needs of the hospitalized infant, child, and
adolescent.

HS 4843/6843. Family Interaction. (3) (Prerequisites: SO 1203
and PSY 1013 or HS 4853). Three hours lecture. Interaction within func-
tional families; focus on the family as a system, on diversity and roles, and
on effective interactions.

HS 4853/6853. The Family: A Transactional Approach. (3)
(Prerequisite: Three hours Sociology or Psychology and Junior Stand-
ing). Three hours lecture. The impact of internal and external factors on
the development of individual and family relationships throughout the
life cycle.

HS 4863/6863. Consumer Aspects of Aging. (3) (Prerequisite:
HS 3303 or consent of instructor). Three hours lecture. Analysis of the de-
cisions, issues and research related to the consumer aspects of aging from
a global and national perspective.

HS 4886. 4896. Student Teaching Vocational Human Sci-
ces. (6) (Both courses to be taken concurrently). (Prerequisites: Ad-
mission to Teacher Education and senior standing). Supervised
observation and directed teaching in respective field of endorsement.

HS 4990/6990. Special Topics in Human Sciences. (1-9)
Credit and title to be arranged. This course is to be used on a limited basis
to offer developing subject matter areas not covered in existing courses. (Courses
limited to two offerings under one title within two academic years).

HS 7000. Directed Individual Study in Human Sciences.
Hours and credits to be arranged.

HS 8233. Maternal, Infant, and Child Nutrition. (3) Three hours
lecture. Nutritional needs during reproduction and growth; problems in
nutrition of women during the reproductive period, infants and children;
indices of growth and development. (Same as NTR 8233.)

HS 8243. Community Nutrition. (3) (Prerequisite: HS 3213 or
consent of instructor). Three hours lecture. Nutrition services and prob-
lems in the community. Supervised experience in methods for determin-
ing and implementing action programs in nutrition education. (Same as
NTR 8243.)

HS 8261. Dietetic Internship Seminar. (1) (Prerequisite: Admis-
sion into the School of Human Sciences Dietetic Internship/Graduate
Studies Program). One hour lecture. Selection of current topics in foods,
nutrition or dietetics and in-depth review of current literature for critical
analysis presentation. (Same as NTR 8261.)

HS 8273. Dietetic Internship Capstone. (2) (Prerequisite: Admis-
sion into the School of Human Sciences Dietetic Internship/Graduate
Studies Program). Three hours lecture. Theoretical aspects of dietetics
gained through the study of resources, technology, professional stan-
dards, and other factors that influence entry-level practice.

HS 8286. Supervised Practice Experience. (6) (Prerequisite: Ad-
mission into the School of Human Sciences Dietetic Internship/Graduate
Studies Program). Supervised practice experiences in clinical, commu-
nity and food service systems settings. May be repeated for credit.

HS 8523. Advanced Textiles. (3) (Prerequisite: HS 2523 and HS
4563) Three hours lecture. Mechanics of textiles related to performance,
health, safety, protection degradability and recycling; non-woven pro-
cessing of specialty fiber-fabrics; barrier textiles and industrial fabrics.

HS 8990. Special Topics in Human Sciences. (1-9) Credit and ti-
tle to be arranged. This course is to be used on a limited basis to offer de-
veloping subject matter areas not covered in existing courses. (Courses
limited to two offerings under one title within two academic years).
IB 2990. Special Topics in International Business. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

IB 3900. Internship Work. (1-6). (Prerequisite: approval of the International Business Director). Business topics examined by student during work semester. Student evaluations are assigned on satisfactory/unsatisfactory basis.

IB 3913. Principles of International Business. (3) (Prerequisites: Senior standing in business or consent of instructor). An overview of the major forms of international business: Exports and imports, overseas investments, production and marketing operations, licensing, financing and other international business services.

IB 4990/6990. Special Topics in International Business. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

--

Department of INDUSTRIAL ENGINEERING
Office: 125 McCain Engineering Building
Professors Brown (head), Bowden, Bullington, and Usher;
Associate Professors Duffy, Greenwood, and Smyer
Assistant Professors Jin, Kim, and McGilberry

IE 1911. Introduction to Industrial Engineering. (1) Three hours laboratory. Concepts of industrial engineering, emphasizing the total systems approach. Introduction to analysis and design of general and industrial systems.

IE 2990. Special Topics in Industrial Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

IE 3113. Motion and Time Study. (3) Two hours lecture. Two hours laboratory. A study of the techniques for analysis of production systems, the design of work stations, and the development of time standards. (For non-IE students). (Same as TRI 3363).

IE 3124. Industrial Ergonomics. (4) (Co-requisite: IE 4613). Three hours lecture. Three hours laboratory. Analysis of work tasks; ergonomic design principles for manual work design, workplace design, and work environment design; work measurement; and design of wage payment plans.

IE 3323. Manufacturing Processes. (3) (Prerequisites: Grade of C or better in IE 3913, Co-requisites: CHE 3413 and IE 4613). Two hours lecture. Three hours laboratory. Manufacturing processes and materials; interrelationships of product design, material properties, and processing methods; robotics and CAM systems; economic factors in material, process, and equipment selection.

IE 4000. Directed Individual Study. Hours and credits to be arranged.

IE 4123/6123. Psychology of Human-Computer Interaction. (3) (Prerequisite: PSY 3713 or CS 4663/6663 or IE 4113/6113 or consent of the instructor). Two hours lecture. Two hours laboratory. Exploration of psychological factors that interact with computer interface usability. Interface design techniques and usability evaluation methods are emphasized. (Same as CS 4763/6763 and PSY 4743/6743).

IE 4333/6333. Production Control Systems I. (3) (Prerequisite: Grade of C or better in IE 4613). Three hours lecture. Principles, analysis, design, implementation, and operation of production and inventory planning and control. Demand forecasting, production scheduling and control systems and introduction to CPM.

IE 4533/6533. Project Management. (3) (Prerequisite: IE 3124). Three hours lecture. Analysis and design of materials handling systems and components. Introduction to facilities design.

IE 4733/6733. Automation. (3) Two hours lecture. Three hours laboratory. Introduction to the various technologies used in both design and manufacturing automation.

IE 4733/6733. Automation. (3) (Prerequisite: Junior or Senior standing). Three hours lecture. An introduction to the implementation, application, and management of concurrent engineering, as well as, the tools and techniques that support new product development.

IE 4513/6513. Engineering Administration. (3) (Prerequisite: Senior or graduate standing in engineering). Three hours lecture. Study of problems confronting the engineering manager. Includes: Organization and communication theory, internal and external relationships and responsibilities, and designing and implementing managerial systems.

IE 4533/6533. Process Improvement Engineering. (3) Three hours lecture. Introduction to quality and productivity improvement methodologies and tools. The design and implementation of continuous improvement systems in organizations.

IE 4623/6623. Engineering Statistics II. (4) (Prerequisite: Grade of C or better in IE 4613). Three hours lecture. Continuation of IE 4613/6613. Introduction to engineering applications of regression, experimental design and analysis, and nonparametric methods.

IE 4653/6653. Industrial Quality Control I. (3) (Prerequisite: IE 4613). Three hours lecture. The theory and application of statistical quality control: statistical process control and statistical acceptance sampling.
IE 4673/6673. Reliability Engineering. (3) (Prerequisites: IE 4613 and MA 3253). Three hours lecture. Probability functions and statistical methods for component life testing and system reliability prediction; system availability and maintainability. Redundancy in time-dependent and time-independent situations.

IE 4733/6733. Linear Programming I. (3) (Prerequisites: CS 1213 and MA 3113). General theory of linear programming and its application; the simplex algorithm, revised simplex algorithm, duality, sensitivity transportation algorithm, assignment algorithm network analysis, and goal programming. (Same as MA 4733/6733).

IE 4753/6753. Systems Engineering and Analysis. (3) (Prerequisite: IE 4613). Three hours lecture. Systems concepts, methodologies, models, and tools for analyzing, designing, and improving new and existing human-made systems.

IE 4773/6773. Systems Simulation I. (3) (Prerequisites: CS 1233 or equivalent and grade of C or better in IE 4613). Three hours lecture. Introduction to mathematical techniques of queuing and the principles of stochastic simulation. The statistics of simulation. Use of C programming and special purpose simulation languages.

IE 4915/6915. Design of Industrial Systems. (5) (Prerequisites: Grade of C or better in the following courses: IE 3124, IE 3323, and IE 4333). Three hours lecture. Eight hours laboratory. The fundamental procedures and techniques in design of operational systems. Emphasis on both sub-systems and total systems.

IE 4990/6990. Special Topics in Industrial Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

IE 7000. Directed Individual Study. Hours and credits to be arranged.

IE 8000. Thesis Research/Thesis. Hours and credits to be arranged.

IE 8333. Production Control Systems II. (3) (Prerequisites: IE 4333 and consent of instructor). Three hours lecture. Inventory systems, static and dynamic production planning, operations scheduling and forecasting systems.

IE 8343. Artificial Intelligence in Manufacturing. (3) (Prerequisite: Computer programming ability and consent of instructor). Three hours lecture. Introduction to artificial intelligence techniques used in manufacturing. Topics include the applications of expert systems, neural networks, machine learning, and discussion of current research.

IE 8353. Manufacturing Systems Modeling. (3) (Prerequisites: IE 4733 and IE 4773). Three hours lecture. A study of models used to describe and analyze manufacturing systems. Development of models using queuing networks, mathematical programming, simulation, and other techniques.

IE 8583. Enterprise Systems Engineering. (3) (Prerequisite: Consent of Instructor). Three hours lecture. Focuses on the design and improvement of an enterprise through the use of engineering tools and methods, based on the systems perspective of industrial engineering.

IE 8743. Nonlinear Programming I. (3) (Prerequisite: IE 4733 or MA 4733). Three hours lecture. Optimization of nonlinear functions; quadratic programming, gradient methods, integer programming; Lagrange multipliers and Kuhn-Tucker theory.

IE 8783. Neural Networks in Optimization. (3) (Prerequisites: IE 4733/6733). Three hours lecture. A study of neural network models and their applications to optimization problems.

IE 8913. Engineering Economy II. (3) (Prerequisites: IE 3913 and IE 4713). Three hours lecture. Advanced principles and methods for engineering analysis of industrial problems. Topics include criteria for decisions, project investment and analysis, and elements of risk and uncertainty.

IE 8990. Special Topics in Industrial Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

IE 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.
INS 8521. International Risk Management. (1) (Prerequisite: Consent of instructor). One hour lecture. Study of principles, concepts and techniques to manage speculative and pure risk exposures which organizations face while pursuing their goals and objectives in international commerce.

INTERNATIONAL STUDENT EXCHANGE

ISE 4100-4200. International Student Exchange. (Prerequisite: Acceptance into the International Student Exchange Program). Grades from the host institution will be transferred and recorded at MSU after each semester the student participates in the program.

LA 1153. Introduction to Landscape Architecture. (3) Six hours studio/lab. Acquaints students with the profession’s design vocabulary, application, types of work, and initial experiences dealing with the creation of and evaluation of three dimensional space.

LA 1172. Freshman Seminar Landscape Architecture. (2) Two hours seminar. An introduction to the profession of landscape architecture including professional opportunities and an overview of the body of the knowledge.

LA 1253. Design Fundamentals in Landscape Architecture. (3) One hour lecture. Six hours studio/lab. The investigation and application of problem solving techniques, learning of basic drawing fundamentals, and exploration of the nature of creativity associated to landscape architecture issues.

LA 1701. Introduction to Landscape Contracting. (1) Two hours laboratory. A survey of the construction industry with emphasis on landscape contracting and the roles of principals involved. Opportunities in the landscape industry.

LA 1712. Landscape Contracting Internship I. (2) (Prerequisites: LA 1701; completion of 12 hours; 2.0 GPA). Internship of planned, progressive and supervised experiential learning with a landscape contracting firm.

LA 1803. Landscape Architecture Appreciation. (3) Three hours lecture. A survey of landscape architecture encompassing design, construction, management, maintenance and practice. Emphasis on development and improvement of home, neighborhood and community environment. (For non-majors.)

LA 2233. Presentation Methods and Media. (3) (Prerequisite: None; recommended: ART 1123 & ART 1213). Six hours studio/lab. De-lineation and professional presentation techniques for the practice of Landscape Architecture utilizing traditional and contemporary presentation approaches.

LA 2334. Plant Specifications For Small Properties. (4) (Prerequisite: PSS 3473). One hour lecture. Six hours studio. Plant selection, design and specifications for small properties in response to environmental conditions and user needs.

LA 2433. Landscape Systems and Plant Communities. (3) One hour lecture. Four hours laboratory. The nature, scope and relevancy of landscape systems and their respective plant communities as they relate to land planning and landscape architectural design.

LA 2453. Site Inventory and Analysis. (3) One hour lecture. Four hours studio/lab. The collection, presentation, and use of pertinent site related data. Conventional non-technical methods of presentation of data and computer generated forms are considered and analyzed.

LA 2701. Landscape Contracting Seminar I. (1) (Prerequisite: LA 1712). One hour lecture. Weekly seminar to investigate topics related to modern landscape practices experienced in LA 1712 LC Internship I. Formal presentations of internship case studies.

LA 2712. Landscape Contracting Internship II. (2) (Prerequisites: LA 1712, LA 2701, and 2.00 GPA). Internship of planned, progressive and supervised experiential learning with a landscape contracting firm.

LA 2990. Special Topics in Landscape Architecture. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses.

LA 3544. Landscape Architecture Construction I. (4) (Prerequisite: none; Recommended: ABE 2873 & MA 1523). Two hours lecture. Four hours studio/lab. Course is concerned with land surveying, landscape architecture grading, road alignments and calculations for cut and fill volumes.

LA 3555. Landscape Architecture Design Studio I. (5) (Prerequisites: LA 1153, LA 1253, LA 1223, LA 2323, & LA 2453). Two hours lecture. Six hours studio/lab. A landscape architectural design process applied to site planning for small acreages. Emphasis on accommodation and application of design principles to site design elements.

LA 3603. Design of the Golf Environment. (3) (Prerequisite: LA 1803). Three hours lecture. Defining site development concerns of a golf complex, addressing areas of history, design, construction and maintenance.

LA 3644. Landscape Architecture Construction II. (4) (Prerequisite: none; Recommended: LA 3544). Two hours lecture. Four hours studio/lab. Calculations for storm-water management, best management practices, surface and subsurface drainage systems, basic hydrology and erosion and sediment control design and practices.

LA 3652. Case Studies of Executed Works in Landscape Architecture. (2) (Prerequisite: LA 3655). Special five to ten day on-site observation visit for the study of notable LA projects and construction methods with lectures.

LA 3655. Landscape Architecture Design Studio II (5) (Prerequisites: LA 1153, LA 1253, LA 1223, LA 2323 & LA 2453). Two hours lecture. Six hours studio/lab. Deals with program and site specific requirements, inventory and analysis, construction detailing, economic issues, social impact, and planting design applied to medium scale projects.

LA 3701. Landscape Contracting Seminar II. (1) (Prerequisite: LA 2712). One hour lecture. Weekly seminar to investigate topics related to modern landscape practices experienced in LA 2712 LC Internship II. Formal presentations of internship case studies.

LA 3712. Landscaping Contracting Internship III. (2) (Prerequisites: LA 2712, LA 3701, and 2.00 GPA). Internship of planned, progressive and supervised experiential learning with a landscape contracting firm.

LA 3713. Landscape Contracting I. (3) (Prerequisites: ABE 1073 and EG 1513). Two hours lecture. Two hours laboratory. Study of the nature, scope, and application of the varied construction materials used in landscape projects; and, the construction processes related to landscape development.

LA 3721. Landscape Contracting Field Trip I. (1) (Prerequisite: LA 1701). Five to ten day trip to visit landscape contracting firms and observe completed works.

LA 3742. Landscape Architecture Internship. (2) (Prerequisite: Satisfactory completion of all semester six of B.L.A. program with an overall G.P.A. of 3.0 in the Junior Year). Supervised experiential learning with a professional office or public agency.

LA 4000. Directed Individual Study. Hours and credits to be arranged.

LA 4344. Landscape Architecture Construction IV. (4) (Prerequisites: LA 3274 or consent of instructor). Two hours lecture. Four hours laboratory. Preparation of landscape architectural construction plans,
details, and specifications for outdoor lighting, for irrigation, and for septic systems.

LA 4701. Landscape Contracting Seminar III. (1) (Prerequisite: LA 3712). One hour lecture. Weekly seminar to investigate topics related to modern landscape architecture experienced in LA 3712 LC Internship III. Formal presentations of internship case studies.

LA 4721. Landscape Contracting Field Trip II. (1) (Prerequisite: LA 3721). Five to ten day trip to visit with landscape contracting firms and observe completed works.

LA 4723. Professional Practice of Landscape Architecture. (3) Three hours lecture. Office management, contracting, budgeting, design proposals, supervision of construction contracts, professional liability, and professional ethics.

LA 4724. Landscape Contracting II. (3) (Prerequisites: LA 3713 or LA 4334). Two hours lecture. Four hours laboratory. Analysis of legal, financial, and management aspects of landscape contracts; and quantity surveying, cost estimation, and critical path management of landscape construction projects.

LA 4744. Landscape Contracting IV. (4) (Prerequisite: LA 4724 and PSS 4414). Two hours lecture. Two hours laboratory. Application levels studies of post-construction management practices of landscape projects.

LA 4755. Landscape Architecture Design Studio III. (5) (Prerequisites: LA 1153, LA 1253, LA 1223, LA 2323 & LA 2453). Two hours lecture. Six hours studio/lab. The design process applied to intermediate size project, with emphasis on providing shelter for society. Integration of techniques for design development into a holistic process.

LA 4844. Design of Sustainable Communities. (4) (Prerequisite: None. Recommended: MA 1313 and MA 1323). Three hours lecture. Two hours studio/lab. Nature of materials used in landscape architecture, their physical attributes and liabilities that contribute to their use in a safe and healthy manner.

LA 4855. Landscape Architecture Capstone Studio. (5) (Prerequisites: LA 3535, LA 3635, LA 4755, LA 5344, LA 3644, LA 4723). Twelve hours studio/lab. A self-directed course that includes an approved terminal project including proposal, analytical design process, master plan, support drawings, and construction documents of selected plan elements.

LA 4990/6990. Special Topics in Landscape Architecture. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years.)

LA 5544. Golf Course Architecture I. (4) (Prerequisite: LA 4445 and PSS 4414). One hour lecture. Six hours studio. Comprehensive studies of golf course architecture, including analysis, design, irrigation, construction detailing, cost analysis, and management concerns.

Department of MATHEMATICS and STATISTICS

Office: 410 Allen Hall

Professors Ebanks (Head), Neumann, Razzaghi, Reed, Shibaji, and Xu;
Associate Professors Aktosum, Davi, Dubé, Gerard, Johnson, L. Miller, V. Miller, Oppenheimer, Pearson, Qian and Smith;
Assistant Professors Dobson, Fabel, Harvill, Jonkman, Knudson, Okhuysen, Sarkissian, B. Scarborough and Wu;
Instructor Daniels

Students who have credit for one or more upper division mathematics courses will not receive repeat credit for a mathematics course numbered below MA 2000. Students who have credit for MA 1713 are not permitted to enroll in any mathematics course numbered below MA 1713 without departmental approval.

MA 0003. Developmental Mathematics. (3) (MA 0003 is a developmental course designed to prepare a student for university mathematic courses at the level of MA 1313 College Algebra: credit received for this course will not be applicable toward a degree). Three hours lecture. Real numbers, fractions, decimal fractions, percent, algebraic expressions, factoring, algebraic fractions, linear equations/inequalities, integral exponents, quadratic equations.

MA 0103. Intermediate Algebra. (3) (MA 0103 is designed to prepare a student for MA 1313 College Algebra) Three hours lecture. Real numbers, fractions, decimal fractions, percent, algebraic expressions, factoring, algebraic fractions, linear equations/inequalities, integral exponents, quadratic equations.

LA 7000. Directed Individual Study. Hours and credit to be arranged.

LA 8000. Thesis Research/Thesis. Hours and credit to be arranged.

LA 8512. Landscape Architecture Graduate Studio I. (2) (Prerequisite: admission to the Master of Landscape Architecture). Four hours studio. Emphasis on holistic approaches to sustainable watershed planning and management. Course deals specifically with prevention of destruction of habitat, biological stress, and hydrologic changes.

LA 8522. Landscape Architecture Graduate Studio II. (3) (Prerequisite: admission to the Master of Landscape Architecture). Four hours studio. Application of spatial analytical techniques and Geographic Information Systems to the execution of landscape planning problems in the Mississippi region.

LA 8532. Landscape Architecture Graduate Studio III. (2) (Prerequisite: second year standing in the Master of Landscape Architecture). Four hours studio. Emphasis on community based planning and design, including consideration of natural resource planning, main street revitalization, open space planning, community design, and small town planning.

LA 8711. Seminar in Watershed Planning and Management. (1) (Prerequisite: admission to the Master of Landscape Architecture program or consent of the instructor). One hour seminar. Examination of major elements of watershed planning and management pertinent to landscape architecture, with particular emphasis on emerging trends in the field.

LA 8721. Seminar in Landscape Management. (1) (Prerequisite: admission to the Master of Landscape Architecture program or consent of the instructor). One hour seminar. Examination of major elements of landscape management pertinent to landscape architecture, with particular emphasis on emerging trends in the field.

LA 8731. Seminar in Community Based Planning. (1) (Prerequisite: second year standing in the Master of Landscape Architecture program or consent of the instructor). One hour seminar. Examination of major elements of community based planning pertinent to landscape architecture, with particular emphasis on emerging trends in the field.

LA 8741. Seminar in Landscape Architecture Thesis. (1) (Prerequisite: second year standing in the Master of Landscape Architecture program or consent of the instructor). One hour seminar. Preparation of a detailed proposal, selection of the student’s thesis committee, and submission of the proposal to the Graduate Studies Committee for review and approval.

LA 8990. Special Topics in Landscape Architecture. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years.)

**MA 1303. Quantitative Reasoning.** (3) [Prerequisite: ACT Math subscore 20, or grade of C or better in MA 0103. High School Credit in Algebra I, Algebra II, and Geometry, or equivalent. MA 1303 is a general education core alternative to MA 1313; credit may be earned for both MA 1303 and MA 1313 but the completion of same will not satisfy the MSU core requirement in the definitive integral, function of two variables, and some transcendental functions.] Three hours lecture. Descriptive statistics, normal and binomial distributions, sampling, probability, hypotheses testing; logical statements and arguments; graphical solution of systems of equations/inequalities; estimation and approximation.

**MA 1313. College Algebra.** (3) [Students with credit in MA 1713 will not receive credit for this course. Prerequisite: ACT Math subscore 20, or grade of C or better in MA 0103.] Three hours lecture. Review of fundamentals; linear and quadratic equations; inequalities; functions; simultaneous equations; graphing techniques; applications; theory of equations.

**MA 1323. Trigonometry.** (3) [Students with credit in MA 1713 will not receive credit for this course. Prerequisite: ACT Math subscore 24, or grade of C or better in MA 1313.] Three hours lecture. The trigonometric functions: identities; trigonometric equations; applications.

**MA 1413. Structure of the Real Number System.** (3) [Prerequisite: a C or better in MA 1313 or an ACT Math subscore of 24.] Three hours lecture. The nature of mathematics; introductory logic; structure and development of the real number system. (For Elementary and Special Education majors only.)

**MA 1423. Problem Solving with Real Numbers.** (3) [Prerequisite: MA 1413.] Three hours lecture. Proportions, percent problems, probability, counting principles, statistics. (For Elementary or Special Education majors only.)

**MA 1433. Informal Geometry and Measurement.** (3) [Prerequisites: a C or better in both MA 1413 and MA 1423.] Three hours lecture. Measurements and informal geometry. (For Elementary and Special Education majors only.)

**MA 1453. Precalculus with Graphing Calculators.** (3) [Prerequisites: Math ACT 22 or C or better in MA 1313.] Three hours lecture. Properties, applications, and graphs of linear, quadratic, polynomial, exponential, logarithmic, and trigonometric functions; trigonometric identities; equations; identities; conic sections; polar and parametric equations. (Degree credit will not be granted for MA 1453 and either MA 1313 or MA 1323. This course is intended to prepare students to take MA 1713 or MA 1713 Calculus I.)

**MA 1463. Finite Mathematics and Introduction to Calculus.** (3) [Prerequisite: ACT Math subscore 24, or grade of C or better in MA 1313.] Three hours lecture. Matrices and systems of linear equations; introduction to calculus.

**MA 1613. Calculus for Business and Life Sciences I.** (3) [Prerequisite: ACT Math subscore 24, or grade of C or better in MA 1313.] Three hours lecture. Introduction to and algebraic and some transcendental functions, solutions of systems of linear equations, limits, continuity, derivatives, applications.

**MA 1623. Calculus for Business and Life Sciences II.** (3) [Prerequisite: MA 1613.] Three hours lecture. Antiderivatives, the definite integral, applications of the definite integral, functions of two or more variables, partial derivatives, maxima and minima, applications.

**MA 1713. Calculus I.** (3) [Prerequisite: ACT Math subscore 26, or grade of C or better in MA 1323.] Three hours lecture. Analytic geometry; functions; limits; continuity; derivatives of algebraic functions; applications of the derivative.

**MA 1723. Calculus II.** (3) [Prerequisite: Grade of C or better in MA 1713.] Three hours lecture. Antidifferentiation; the definite integral; applications of the definite integral; differentiation and integration of transcendental functions.

**MA 1763. Honors Calculus I.** (3) [Prerequisite: Open through invitation only.] Honors section of MA 1723.

**MA 1773. Honors Calculus II.** (3) [Prerequisite: Open through invitation only.] Honors section of MA 1723.

**MA 2733. Calculus III.** (3) [Prerequisite: Grade of C or better in MA 1723.] Three hours lecture. Further methods of integration; polar coordinates; vectors; infinite series.

**MA 2743. Calculus IV.** (3) [Prerequisite: Grade of C or better in MA 2733.] Three hours lecture. Differential calculus of functions of several variables; multivariable optimization; vector calculus.

**MA 2783. Honors Calculus III.** (3) [Prerequisite: Open through invitation only.] Honors section of MA 2733.

**MA 2793. Honors Calculus IV.** (3) [Prerequisite: Open through invitation only.] Honors section of MA 2743.

**MA 2990. Special Topics in Mathematics.** (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years.)

**MA 3053. Foundations of Mathematics.** (3) [Prerequisite: MA 1723.] Three hours lecture. The logical structure of mathematics; the nature of a mathematical proof; applications to the basic principles of algebra and calculus.

**MA 3113. Introduction to Linear Algebra.** (3) [Prerequisite: MA 1723.] Three hours lecture. Vector spaces; matrices; linear transformations; systems of linear equations; characteristic values and characteristic vectors.

**MA 3163. Introduction to Modern Algebra.** (3) [Prerequisite: MA 3113.] Three hours lecture. Rings, integral domains, and fields with special emphasis on the integers, rational numbers, real numbers and complex numbers; theory of polynomials.

**MA 3213. Mathematical Writing.** (3) [Prerequisites: MA 3163 or consent of instructor. Either junior or senior standing in mathematics or consent of instructor.] Three hours lecture. Refinement of specialized writing skills needed for effective communication in the mathematical sciences.

**MA 3253. Differential Equations I.** (3) [Prerequisite: MA 2743 or coregistration in MA 2743.] Solution and theory of differential equations; series solutions; Laplace Transform methods; applications.

**MA 3313. Numerical Methods.** (3) [Prerequisites: MA 2733, MA 3113, and a knowledge of FORTRAN.] Three hours lecture. Programming of basic algorithms of numerical methods; computational errors; linear systems of equations; nonlinear equations; interpolation; numerical differentiation and integration; least squares approximations. (Not open to students enrolled in or having credit for MA/CS 4313 or MA/CS 4323.) (Same as CS 3313.)

**MA 3353. Differential Equations II.** (3) [Prerequisite: MA 3253.] Three hours lecture. Systems of differential equations; matrix representations; infinite series solution of ordinary differential equations; selected special functions; boundary-value problems; orthogonal functions; Fourier series.

**MA 3463. Foundations of Geometry.** (3) [Prerequisite: MA 1723.] Three hours lecture. The structural nature of geometry; modern methods in geometry: finite geometry.

**MA 3513. History of Mathematics.** (3) [Prerequisite: MA 2733 or coregistration in MA 2733.] Three hours lecture. A historical development of mathematicians and their most important contributions will be emphasized.

**MA 4000. Directed Individual Study.** Hours and credits to be arranged.

**MA 4133/6133. Discrete Mathematics.** (3) [Prerequisites: MA 3163 or consent of instructor.] Three hours lecture. Sets, relations, functions, combinatorics, review of group and ring theory, Burnside’s theorem, Polya’s counting theory, group codes, finite fields, cyclic codes, and error-correcting codes.

**MA 4143/6143. Graph Theory.** (3) [Prerequisite: MA 3113 or consent of instructor.] Three hours lecture. Basic concepts, graphs, and matrices, algebraic graph theory, planarity and nonplanarity, Hamiltonian graphs, digraphs, network flows, and applications.

**MA 4153/6153. Matrices and Linear Algebra.** (3) [Prerequisites: MA 3113 and MA 2753.] Three hours lecture. Linear transformations and matrices; eigenvalues and similarity transformations; linear functionals, bilinear and quadratic forms; orthogonal and unitary transformations; normal matrices; applications of linear algebra.

**MA 4163/6163. Group Theory.** (3) [Prerequisite: MA 3163 or consent of the instructor.] Three hours lecture. Elementary properties: normal subgroups; factor groups; homomorphisms and isomorphisms; Abelian groups; Sylow theorems; composition series; solvable groups.

**MA 4173/6173. Number Theory.** (3) [Prerequisite: MA 3113.] Three hours lecture. Divisibility; congruences; quadratic reciprocity; Diophantine equations; continued fractions.

**MA 4313/6313. Numerical Analysis I.** (3) [Prerequisites: CS 1213 or equivalent. MA 3113, and MA 2743.] Three hours lecture. Matrix operations; error analysis; norms of vectors and matrices; transformations; matrix functions; numerical solutions of systems of linear equations; stability; matrix inversion; eigen value problems; approximations. (Same as CS 3313/6313.)

**MA 4323/6323. Numerical Analysis II.** (3) [Prerequisites: CS 1213 or equivalent. MA 3113 and MA 3253.] Three hours lecture. Numerical solution of equations; error analysis; finite difference methods; numerical differentiation and integration; series expansions; difference equations; numerical solution of differential equations. (Same as CS 3323/6323.)

**MA 4353/6353. Multivariable Calculus.** (3) [Prerequisite: MA 2743, MA 3113, MA 3253.] Three hours lecture. Vectors; scalar functions, gradients relative extrema, Taylor series; vector functions, diver-
MA 4373/6373. Introduction to Partial Differential Equations. (3) (Prerequisite: MA 3253.) Three hours lecture. Linear operators, linear first order equations; the wave equation; Green’s function and Sturm—Liouville problems; Fourier series; the heat equation; Laplace’s equation.

MA 4513/6513. Applied Probability and Statistics for Secondary Teachers. (3) (Prerequisite: MA 1723.) Three hours lecture. (Credit not available for students with credit in MA-ST 4543/6543.) Graphical methods of presenting data; analysis of data; probability, binomial distribution, normal distribution; random sampling; linear regression and correlation.

MA 4523/6523. Introduction to Probability. (3) (Prerequisite: MA 4133 or consent of instructor.) Three hours lecture. Basic concepts of probability, conditional probability, independence, random variables, discrete and continuous probability distributions, moment generating function, moments, special distributions, central limit theorem. (Same as ST 4523/6523.)

MA 4533/6533. Introductory Probability and Random Processes. (3) (Prerequisites: MA 3113 and MA 2743.) Three hours lecture. Probability, law of large numbers, central limit theorem, sampling distributions, confidence intervals, hypothesis testing, linear regression, random processes, correlation functions, frequency and time domain analysis. (Credit can not be earned for this course and MA-ST 4523/6523.)

MA 4543/6543. Introduction to Mathematical Statistics I. (3) (Prerequisite: MA 2743.) Three hours lecture. Combinatorics; probability, random variables, discrete and continuous distributions, generating functions, special distributions, multivariate distributions, independent distributions, distributions of functions of random variables. (Same as ST 4543/6543.)

MA 4553/6553. Foundations of Analysis For Secondary School Teachers. (3) (Prerequisite: Consent of instructor.) Three hours lecture. Elements of set theory; the real numbers as a complete ordered field; mathematical induction; introduction to metric spaces; convergence theorems.

MA 4563/6563. Theory of Equations for Secondary School Teachers. (3) (Prerequisite: MA 2743.) Three hours lecture. Complex numbers; polynomials and their properties; roots of algebraic equations; systems of linear equations; determinants; elements of matrices.

MA 4573/6573. Introduction to Mathematical Statistics II. (3) (Prerequisite: MA 4543/6543.) Three hours lecture. Continuation of MA-ST 4543/6543. Transformations, sampling distributions, limiting distributions, point estimation, interval estimation, hypothesis testing, likelihood ratio tests, analysis of variance, regression, chi-square tests. (Same as ST 4573/6573.)

MA 4583/6583. Numerical Methods and Computer Programming for Secondary School Teachers. (3) (Prerequisite: MA 1723.) Three hours lecture. Introduction to computer programming; flow charts and BASIC language; elementary numerical and statistical methods including basic probability.

MA 4633/6633. Advanced Calculus I. (3) (Prerequisite: MA 2743.) Three hours lecture. Theoretical investigation of functions; limits; differentiability and related topics in calculus.

MA 4643/6643. Advanced Calculus II. (3) (Prerequisite: MA 4633/6633.) Three hours lecture. Rigorous development of the definite integral; sequences and series of functions; convergence criteria; improper integrals.

MA 4733/6733. Linear Programming I. (3) (Prerequisites: CS 1213 and MA 3113.) General theory of linear programming and its application; simplex algorithm; revised simplex algorithm; duality, sensitivity transportation algorithm, assignment algorithm, network analysis and goal programming. (Same as IE 4733/6733 and CS 4013/6013.)

MA 4753/6753. Applied Complex Variables. (3) (Prerequisite: MA 2743.) Three hours lecture. Analytic functions; Taylor and Laurent expansions; Cauchy theorems and integrals; residues; contour integration; introduction to conformal mappings.

MA 4853/6853. Workshop in Microcomputing Techniques for Teachers. (3) (Prerequisite: Graduate standing or consent of instructor.) Three hours lecture. Interim term; intensive 7-day workshop. Techniques and methods of using microcomputers and the BASIC language in problem solving. (Same as CS 4073/6073.)

MA 4990/6990. Special Topics in Mathematics. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years.)

MA 4933/6933. Mathematical Analysis I. (3) (Prerequisite: MA 4633/6633 or equivalent.) Three hours lecture. Metric and topological spaces; functions of bounded variation and differentiability in normed spaces.

MA 4943/6943. Mathematical Analysis II. (3) (Prerequisite: MA 4933/6933.) Three hours lecture. Riemann-Stieltjes integration, sequences and series of functions; implicit function theorem; multiple integration.

MA 4953/6953. Elementary Topology. (3) (Prerequisite: MA 6633/6633.) Three hours lecture. Definition of a topological space, metric space, continuity in metric spaces and topological spaces; sequences; accumulation points; compactness, separability.

MA 7000. Directed Individual Study. Hours and credits to be arranged.

MA 8113. Modern Higher Algebra I. (3) (Prerequisite: MA 4163/6163.) Three hours lecture. A study of the basic mathematical systems with emphasis on rings, fields, and vector spaces.

MA 8123. Modern Higher Algebra II. (3) (Prerequisite: MA 8113.) Three hours lecture. A continuation of the topics introduced in MA 8113.

MA 8133. Advanced Discrete Mathematics. (3) (Prerequisite: MA 4133/6133 or consent of instructor.) Three hours lecture. Inversion formulas, finite fields, block designs, algebraic graph theory, mathematical modeling.

MA 8203. Foundations of Applied Mathematics I. (3) (Prerequisites: MA 3113, MA 3253 or consent of instructor.) Three hours lecture. Principles of applied mathematics including topological perturbation theory, calculus of variations, and partial differential equations. Emphasis of applications from heat transfer, mechanics, fluids.

MA 8213. Foundations of Applied Mathematics II. (3) (Prerequisite: MA 8203.) Three hours lecture. A continuation of MA 8203 including topics from wave propagation, stability, and similarity methods.

MA 8233. Linear Control Systems. (3) (Prerequisites: MA 8313 and either MA 4153 or consent of instructor.) Three hours lecture. Stability analysis for linear systems; singular solutions; solution of the matrix Riccati equation; applications of orthogonal functions in control problems.

MA 8243. Mathematics Theory of Optimal Control. (3) (Prerequisite: MA 8283 or MA 8233 or consent of instructor.) Three hours lecture. Hamilton-Jacobi Theory; sufficient conditions for optimality, controllability, and observability; analysis and synthesis of optimal control systems; computational aspects of control theory.

Courses numbered MA 8273, 8283, 8293 and 8313 have as prerequisites at least one of the courses MA 4633/6633, MA 4573/6673, 4583/6583, 4753/6753.

MA 8273. Special Functions. (3) Three hours lecture. Infinite products: asymptotic series; origin and properties of the special functions of mathematical physics.

MA 8283. Calculus of Variations. (3) Three hours lecture. Functionals: weak and strong extrema; necessary conditions for extrema; sufficient conditions for extrema; constrained extremum; direct methods; applications.

MA 8293. Integral Equations. (3) Three hours lecture. Equations of Fredholm type: symmetric kernels; Hilbert-Schmidt theory; singular integral equations; applications; selected topics.

MA 8313. Ordinary Differential Equations I. (3) Three hours lecture. Linear systems of differential equations; existence and uniqueness; second order systems; systems with constant coefficients; periodic systems; matrix comparison theorems; applications and selected topics.

MA 8323. Ordinary Differential Equations II. (3) (Prerequisite: MA 8313.) Three hours lecture. Existence, uniqueness, continuation of solutions of nonlinear systems; properties of solutions of linear and nonlinear equations including boundedness, oscillation, asymptotic behavior, stability, and periodicity; application.

MA 8333. Partial Differential Equations I. (3) (Prerequisite: MA 4733/6733 or consent of instructor.) Three hours lecture. Solution techniques; existence and uniqueness of solutions to elliptic, parabolic, and hyperbolic equations; Green’s functions.

MA 8343. Partial Differential Equations II. (3) (Prerequisite: MA 8333.) Three hours lecture. A continuation of the topics introduced in MA 8333.

MA 8363. Numerical Solution of Systems of Nonlinear Equations. (3) (Prerequisites: MA 4313/6313 and MA 4323/6323.) Three hours lecture. Basic concepts of numerical solution of systems of nonlinear equations with applications to unconstrained optimization.

MA 8383. Numerical Solution of Ordinary Differential Equations I. (3) (Prerequisites: MA 4313/6313 and MA 4323/6323.) Three hours lecture. General single-step, multistep, multivalue, and extrapolation...
tion methods for systems of nonlinear equations; convergence; error bounds; error estimates; stability; methods for stiff systems; current literature.

**MA 8633. Real Analysis I. (3)** (Prerequisite: MA 4943/6943). Three hours lecture. Lebesgue measure and Lebesgue integrals; convergence theorems, differentiation and L spaces.

**MA 8643. Real Analysis II. (3)** (Prerequisite: MA 8633). Three hours lecture. General measures; the Radon-Nikodym theorem and other topics.

**MA 8663. Functional Analysis I. (3)** (Prerequisite: MA 8643). Three hours lecture. Hilbert spaces; Banach spaces; locally convex spaces; Hahn-Banach and closed graph theorems; principle of uniform boundedness; weak topologies.

**MA 8673. Functional Analysis II. (3)** (Prerequisite: MA 8663). Three hours lecture. Continuation of topics introduced in MA 8663.

**MA 8713. Complex Analysis I. (3)** (Prerequisite: MA 4943/6943 or consent of instructor). Three hours lecture. Complex numbers: functions of a complex variable; continuity; differentiation and integration of complex functions; transformations in the complex plane.

**MA 8913. Introduction to Topology I. (3)** (Prerequisite: MA 4643/6643 or MA 4953/6953). Three hours lecture. Basic general topology; introduction of homotopy and homology groups.

**MA 8923. Introduction to Topology II. (3)** (Prerequisite: MA 8913). Three hours lecture. Continuation of topics introduced in MA 8913.

**MA 8981. Teaching Seminar.** (1) One hour lecture. Preparation for service as instructors in mathematics and statistics courses; includes practice lectures and exam preparation. (May be taken for credit more than once.)

**MA 8990. Special Topics in Mathematics. (1-9)** Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years.)

**MA 9000. Dissertation Research. (1-6)** Hours and credits to be arranged.

**MA 9163. Selected Topics in Combinatorics. (3)** (Prerequisites: MA 8133 or consent of instructor). (May be taken for credit more than once). Three hours lecture. Continuation of one or more advanced topics introduced in MA 8133.

**MA 9313. Selected Topics in Ordinary Differential Equations. (3)** (Prerequisite: MA 8313 and consent of instructor). (May be taken for credit more than once). Three hours lecture. Topics to be chosen from such areas as Bifurcation Theory, Biological Modeling, Control Theory, Dynamical Systems, Functional Differential Equations, Nonlinear Oscillations, and Quantitative Behavior.

**MA 9333. Selected Topics in Partial Differential Equations. (3)** (Prerequisite: MA 8333 and consent of instructor). (May be taken for credit more than once). Three hours lecture. Topics to be chosen from such areas as Bifurcation Theory, Boundary Integral Methods, Evolution Equations, Maximum and Variational Principles, and Spectral Methods.

**MA 9413. Selected Topics in Numerical Analysis. (3)** (Prerequisite: Consent of instructor). (May be taken for credit more than once). Three hours lecture. Current topics in Numerical Analysis. The subject matter may vary from year to year.

**MA 9633. Selected Topics in Analysis. (3)** (Prerequisite: MA 8643 and consent of instructor). (May be taken for credit more than once). Three hours lecture. Topics will be chosen from areas of analysis of current interest.

**MA 9913. Selected Topics in Algebra. (3)** (Prerequisite: MA 8123 and consent of instructor). (May be taken for credit more than once). Three hours lecture. Topics to be chosen from such areas as valuation theory; polynomial rings; Noetherian, Prufer, Dedekind, and other domains of classical ideal theory; nonassociative algebraic systems.

---

**Professor Emplaincourt;**

**Department of MECHANICAL ENGINEERING**

Office: 210 Carpenter Engineering Building

Professors Steele (head), Adebiyi, Berry, Hodge, Horstemeyer, Jones, Marcum, and Taylor;

Associate Professors Cain, Chamera, Daniewicz, and Luck;

Assistant Professors Hudson, Parsons, Patton, and Schneider;

Instructor Emplaincourt;

**ME 1111. Introduction to Mechanical Engineering. (1)** (Prerequisite: Freshman standing or consent of instructor). One hour lecture. Introduction to the mechanical engineering curriculum, the profession, and career opportunities. Historical perspective; the support role of the department, college, and university; student roles and responsibilities.

**ME 2990. Special Topics in Mechanical Engineering. (1-9)** Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years.)

**ME 3113. Engineering Analysis. (3)** (Prerequisites: Computer Literacy, MA 3113, MA 3253, and PH 2213). Three hours lecture. Analysis of engineering problems requiring the use of engineering fundamentals and mathematical techniques of analysis with computer applications.

**ME 3123. The Engineer and Society. (3)** (Prerequisite: junior standing). Three hours lecture. History of civilization from a technological perspective; world economy and the maintenance of a sustainable society. Engineering professionalism, philosophy and lifestyles for career success.

**ME 3133. Heat Transfer. (3)** (Prerequisites: EM 3313, MA 3253, and ME 3533 or ME 3513). Three hours lecture. A study of the fundamental principles of heat transfer; processes; steady and transient conduction in solids; thermal radiation; and convective processes.

**ME 3403. Materials and Manufacturing in Design. (3)** (Prerequisites: CH 1223 and EM 2413, Corequisite EM 3213). Three hours lecture. Behavior, testing and processing of engineering materials. Emphasis is placed on the interrelation of design with processing and material selection.

**ME 3423. Mechanics of Machinery. (3)** (Prerequisites: EM 2433 and ME 3113). Three hours lecture. Analysis of mechanisms for motions, velocities, accelerations, and forces.

**ME 3513. Thermodynamics I. (3)** (Prerequisites: CH 1223, MA 2733, and PH 2213). Three hours lecture. Definitions; properties of a pure substance; work and heat; First and Second Laws; entropy, ideal gases.

**ME 3523. Thermodynamics II. (3)** (Prerequisite: ME 3513). Three hours lecture. Mixtures of ideal gases; irreversibility and availability; vapor power cycles; gas power cycles; refrigeration cycles; flow through nozzles and turbine blades; combustion; chemical equilibrium.

**ME 3533. Thermodynamics. (3)** (Prerequisite: MA 1723). Three hours lecture. Definitions; work and heat; pure substances; fundamental laws; processes; externally reversible cycles; entropy; vapor and gas power cycles; heat transfer.

**ME 3613. System Dynamics. (3)** (Prerequisites: EM 2433, ME 3113, EM 3313, and ECE 3183). Three hours lecture. Mathematical description of mechanical, electrical, hydraulic and pneumatic systems. Transient and frequency response of linear systems.

**ME 3701. Experimental Orientation. (1)** (Prerequisite: credit or registration in ME 3523 and a technical junior level writing course). Three hours laboratory. Measurements: their accuracy and usefulness; reporting; measurements of pressure, temperature, mass, weight, volume, speed, time, frequency, torque, power, area, force, and displacement.

**ME 4000. Directed Individual Study.** Hours and credits to be arranged.

**ME 4223/6223. Mechanical Systems Analysis. (3)** (Prerequisites: EM 3413 or ME 3613 and senior standing). Three hours lecture.
Fourier methods, shock spectra, signature analysis, relation to specific phenomena and malfunctions; acoustical aids; field measurement analysis; random functions, correlations; mobility and impedance methods.

ME 4353/6353. Alternate Energy Sources. (3) (Prerequisite: ME 3313). Three hours lecture. Analysis and design of systems using energy derived from solar, hydro, geothermal, wind, ocean, waste, and biomass sources.

ME 4373/6373. Air Conditioning. (3) (Prerequisites: ME 3523 and ME 3313). Three hours lecture. Psychrometrics; comfort conditions; determination of heat losses and gains; determination of sensible and latent elements; energy usage estimating; residential and commercial systems.

ME 4383/6383. Heat Exchanger Design. (3) (Prerequisites: ME 3313 and EM 3313). Three hours lecture. Thermal design and application of various types of heat exchangers including: surface selection, designing, sizing, rating, and operational challenges.

ME 4413/6413. Casting and Joining. (3) (Prerequisite: ME 3403 or consent of instructor). Three hours lecture. Fundamentals of solidification in casting and joining processes, including design applications.

ME 4423/6423. Machining and Forming. (3) (Prerequisite: ME 3403 or consent of instructor). Three hours lecture. Fundamentals of mechanical processing of metals, including bulk and sheet forming techniques.

ME 4443/6443. Mechanical Systems Design. (3) (Prerequisites: ME 3423 and ME 4403). Three hours lecture. Mechanical design projects involving analysis; industrial standards and considerations for safety and manufacturability; the use of computers in design and manufacturing automation (CAD/CAM).

ME 4463/6463. Engineering Design. (3) (Prerequisites: ME 3613 and Senior standing). Three hours lecture. In-depth topics in mechanical design of precision devices, hydrodynamic drives, and shells of revolution. Design for thermal creep, thermal stresses, surface contact, and impact.

ME 4483/6483. Computer-Aided Design. (3) (Prerequisite: ME 4403). Three hours lecture. Role of computers in design process, CAD tools, design software development, numerical methods, finite elements, design optimization, shape description, presentation of design data, data structures.

ME 4493/6493. Concurrent Engineering. (3) (Prerequisite: Junior or Senior standing). Three hours lecture. An introduction to the implementation, application, and management of concurrent engineering, as well as, the tools and techniques that support new product development.

ME 4543/6543. Combustion Engines. (3) (Prerequisites: ME 3523 and ME 3313). Three hours lecture. Application of thermodynamics, heat transfer, and combustion in the determination of performance characteristics of various engines, e.g., internal combustion, jet, and rocket engines.

ME 4553/6553. Refrigeration. (3) (Prerequisites: ME 3523 and ME 3313). Three hours lecture. Vapor compression, air, ejector, and absorption cycle analysis; refrigerants; equipment and control; application; and prevention of fatigue failure and fracture.

ME 4563/6563. Fundamentals of Combustion. (3) (Prerequisites: ME 3523 and ME 3313). Three hours lecture. Equilibrium, dissociation, deflagration, detonation, jet mixing, chemical reactions in compressible flow, mass transfer, heat transfer with chemical reaction.

ME 4633/6633. Microprocessors in ME. (3) (Prerequisite: ECE 3283). Two hours lecture. Three hours laboratory. Course for non-Electrical Engineering majors with emphasis on Mechanical Engineering applications. Microprocessor based systems with breadboard system designs: EPROM programming; A/D, D/A conversion; controls.

ME 4653/6653. Fluid Power Control. (3) (Prerequisite: Senior standing). Three hours lecture. Analysis of fluid power components and their integration into systems to power machinery. Introduction to sequencer and computer control.

ME 4721. Experimental Techniques I. (1) (Prerequisites: ME 3701, EM 3313, and credit or registration in ME 3313). Three hours laboratory. Application of principles of experimental design, statistics, uncertainty analysis, instrument response, data acquisition and data reduction to obtain experimental solutions to problems in engineering.

ME 4731. Experimental Techniques II. (1) (Prerequisite: ME 4721). Three hours laboratory. Continuation of ME 4721. Plan and use the microcomputer to record data and control experiments in traditional mechanical engineering subject areas. Analyze and report results.

ME 4823/6823. Compressible Flow and Turbomachinery. (3) (Prerequisites: EM 3313 and ME 3523). Three hours lecture. Fundamentals of compressible flows, simple processes, energy transfer in turbomachines, turbomachinery efficiencies, multi-dimensional effects.

ME 4990/6990. Special Topics in Mechanical Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

ME 7000. Directed Individual Study. Hours and credits to be arranged.

ME 8000. Thesis Research. Hours and credits to be arranged.

ME 8011. Graduate Seminar. (1) Presentation and discussion of research and current mechanical engineering literature by students, faculty, and visiting lecturers. Attendance required for students in Mechanical Engineering Graduate Program.

ME 8313. Conductive Heat Transfer. (3) Three hours lecture. Closed form analytical and approximate numerical solutions to one, two, and three dimensional steady-state and transient problems in conduction heat transfer.

ME 8323. Radiative Heat Transfer. (3) Three hours lecture. Thermal radiation through non-absorbing and absorbing media; integral equations for radiative transfer; unified method for radiation-exchange calculations; solar terrestrial, and planetary radiation.

ME 8333. Convective Heat Transfer. (3) Three hours lecture. Analytical and empirical methods of solution of problems in laminar and turbulent, natural and forced convective heat transfer. Stability; thermal boundary layer techniques; multiphase systems.

ME 8343. Two-Phase Flow and Heat Transfer. (3) (Prerequisites: ME 3313 and EM 3313). Three hours lecture. Two-phase fluid mechanics and heat transfer processes in engineering systems. Pool boiling, flow boiling, and convective conduction with emphasis on multiphase flow.

ME 8363. Computational Heat Transfer. (3) (Prerequisite: Consent of Instructor). Three hours lecture. Application of numerical techniques to elliptic and parabolic problems in engineering heat transfer and fluid flow. Discretization techniques; linearization; stability analysis. (Same as ASE 8363).
ME 8403. Principles of Computer-Aided Design and Manufacturing. (3) Three hours lecture. CAD/CAM principles and tools presented in generic and basic forms; engineering and design applications; numerical control part programming and manufacturing.

ME 8613. Dynamic Systems. (3) Three hours lecture. Mathematical description and simulation of systems with mechanical, electrical, pneumatic, and hydraulic components; state variables; bondgraphs; stability; observability and controllability.

ME 8733. Experimental Procedures. (3) Three hours lecture. Design of experiments; instrumentation; data acquisition; and correlation and evaluation of results.

ME 8743. Stress Analysis. (3) [Prerequisite: EM 3213]. Two hours lecture. Three hours laboratory. Analysis of stress distributions in machine and structural members by the experimental methods of photoelasticity, electrical-resistance strain gages, and brittle coating; dynamic stress analysis.

ME 8813. Viscous Flow I. (3) Three hours lecture. Fundamental laws of motion for a viscous fluid; classical solutions of the Navier-Stokes equations; inviscid flow solutions; laminar boundary layers; stability criteria.

ME 8823. Viscous Flow II. (3) [Prerequisite: ME 8813 or equivalent]. Three hours lecture. Numerical solution techniques for viscous flow equations. Turbulence and turbulence modeling. Current literature and topics.

ME 8990. Special Topics in Mechanical Engineering. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

ME 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

Department of MANAGEMENT and INFORMATION SYSTEMS
Office: 3103 McCool Hall
Professors Smith (Head), Arnett, Cochran, Lehman, R. Pearson, Shim, Spencer, Taylor, and White;
Associate Professors Jones, A. Pearson;
Assistant Professors Harrell-Cook, Long, Maertz, Peyrefitte, Stollack, and Vance

MGT 2990. Special Topics in Management. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

MGT 3114. Principles of Management and Production. (4) [Prerequisites: EC 2113, BQA 2113, and junior standing]. Four hours lecture. Management principles for all organizations including planning, organizing, leading, and controlling as well as the purposes, methods, tools, and procedures of production management.

MGT 3213. Organizational Communications I. (3) [Prerequisites: EN 1113 and junior standing]. Three hours lecture. A study of the role of communications in the modern business organization. Emphasis is given to the basic writing skills applied to various forms of business communications.

MGT 3323. Entrepreneurship. (3) [Prerequisite: EC 2113]. An introduction to the processes involved in owning and managing a business. Includes the entrepreneurial activities normally associated with starting and operating a business.

MGT 3333. Field Studies in Entrepreneurship. (3) [Prerequisite: MGT 3323]. Three hours lecture. Students, working in groups under the direction of their professor, will assess the problems of an embryonic or operating entrepreneurial organization and recommend appropriate solutions.

MGT 3413. Production Management. (3) [Prerequisite: MGT 3113 and BQA 2113]. Three hours lecture. Processes, methods, tools, and procedures of production/operations management: systems used in large and small firms.

MGT 3813. Organizational Behavior. (3) [Prerequisites: MGT 3113]. Three hours lecture. Study of behavioral theories used by managers to assist them in better understanding, anticipating, and influencing behavior in an organizational setting.

MGT 4000. Directed Individual Study. (Prerequisite: Junior standing). Hours and credits to be arranged.

MGT 4113. Advanced Management. (3) [Prerequisite: MGT 3113]. Three hours lecture. A brief history of management thought and a study in depth of the managerial functions of planning, organizing, controlling.

MGT 4153. Organization Theory. (3) [Prerequisite: Final semester senior standing]. Presents for analysis, discussion, and solution case-problems of actual situations met in day-to-day operation of business enterprise which require managerial action.

MGT 4213. Organizational Communications II. (3) [Prerequisite: MGT 3213]. Three hours lecture. Study of the communication channels and media used by the firm in its relationships with the employees, the customers, the public, and others.

MGT 4413. Introduction to Operations Research Methods. (3) [Prerequisites: BIS 1013 or equivalent and BQA 3113]. Three hours lecture. Principles of operations research for business decisions; deterministic and probabilistic models; queuing theory, Markov Chains, PERT/CPM, goal programming, simulations.

MGT 4533. Advanced Human Resource Management. (3) [Prerequisite: MGT 3513]. Three hours lecture. Study of problems in the field of human resource management emphasizing development of the ability to analyze problems and to apply management fundamentals to human resource.

MGT 4543. Compensation Management. (3) [Prerequisite: MGT 3513]. Three hours lecture. Compensation fundamentals, practices, and problems, including wage level determinants, wage & salary structures, merit rating, methods of wage payments, fringe benefits, & controls.

MGT 4553. Collective Bargaining. (3) [Prerequisite: MGT 3513]. Three hours lecture. Management and union organization for collective bargaining, issues in current bargaining context, methods and procedures in bargaining, legal-administrative requirements under the NLRA as amended.

MGT 4713. Quality in Organizations. (3) [Prerequisites: MGT 3113]. Three hours lecture. An introduction to theories and tools associated with quality management in organizations. Considers the management, employee, organizational, and cultural changes required to enhance quality.

MGT 4990/6990. Special Topics in Management. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

MGT 7000. Directed Individual Study. Hours and credits to be arranged.

MGT 8000. Thesis Research/Thesis. Hours and credits to be arranged.

MGT 8063. Survey of Management. (3) [Prerequisite: Graduate standing]. Three hours lecture. Survey of management principles and techniques including: objective, policies, functions, leadership, organization, and production control procedures and systems as applied to all fields of business.
MGT 8111. Human Resources Issues. (1) (Prerequisite: MGT 8063 or equivalent). One hour lecture. Survey of nature and influences of human resource management in organizations. Case studies are used to apply and reinforce theory.

MGT 8112. Leadership Skills for Managerial Behavior. (2) (Prerequisite: MGT 8063 or equivalent). Two hours lecture. Survey of major behavioral skills used by managers to help them understand and influence behavior in an organizational setting.

MGT 8113. Management Policies. (3) (Prerequisite: MGT 3113). Three hours lecture. Application of management principles and practices to policy making. Universality of management functions to all phases of business and need for policy formulation are developed.

MGT 8121. Strategic Management. (1) (Prerequisite: MGT 8063 or equivalent). One hour lecture. A detailed study of strategic management concepts as environmental analysis, competition between firms, establishing and sustaining a competitive advantage, and strategy implementation.

MGT 8122. Strategy Field Study. (2) (Prerequisite: MGT 8121 or equivalent). A group project based, field study of strategic issues currently facing a participating organization.

MGT 8132. Project Management Field Study. (2) Prerequisites: IE 6533 or equivalent and instructor consent. Two hours lecture. A project based field study requiring the application of specific project management skills in a organized setting.

MGT 8213. Graduate Seminar in Communications. (3) (Prerequisite: MGT 3113). Three hours lecture. Communication orientation to the managerial function. Includes study of verbal and nonverbal communication, persuasion, semantics, upward, downward and horizontal communication, communication skills, and communication programs.

MKT 4000. Directed Individual Study. (2) Hours and credits to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

MKT 4113. Personal Selling. (3) (Prerequisite: Junior standing). Three hours lecture. Psychology of personal selling; planning and presentation; the sales approach; the interview; closing the sale.

MKT 4123. Advertising. (3) (Prerequisite: MKT 3013 or consent of instructor). Three hours lecture. A course dealing with the role of advertising in society, the relation of advertising to other business activity, and the use of advertising as communication.

MKT 4143/6143. Sales Management. (3) (Prerequisites: MKT 3013 and MGT 3113). Three hours lecture. Application of scientific management to the selling and distribution of consumer and industrial goods.

MKT 4143/6143. Golf Merchandising Management. (3) (Prerequisite: PGM Major, MKT 3213). Three hours lecture. Development of marketing strategies for the organization, operation, and maintenance of operations in the golf shop and golf course environment.

MKT 4413. Consumer Analysis and Behavior. (3) (Prerequisites: MKT 3013). A study of the nature and dynamics of consumer markets, and the significance of these markets to marketing executives.

MKT 4453. Marketing Research. (3) (Prerequisites: MKT 3013, 4000). Three hours lecture. Study of modern marketing research techniques and their applications. Scope and purpose of marketing research; planning of surveys; collecting and analysis of data; preparation of reports.

MKT 4700. Directed Individual Study. Hours and credits to be arranged.

MKT 8000. Thesis Research/Thesis. Hours and credits to be arranged.

MGT 4813. Marketing Management. (3) (Prerequisites: Marketing Graduating Senior). Marketing from managerial viewpoints; critical analysis of functions of marketing opportunity assessment, marketing planning and programming, marketing leadership and organization, evaluating and adjusting marketing effort.

MKT 4990/6990. Special Topics in Marketing. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

MGT 9143. Development of Management Theory. (3) (Prerequisite: approval of Instructor). Three hours lecture. Doctoral Seminar. A survey analysis and synthesis of the classical idea which has influenced the development of management and current management theory.

MGT 9533. Seminar in Human Resource Management Literature. (3) (Prerequisite: Approval of Instructor). Discussions and presentations pertaining to HRM literature. Emphasis on understanding the empirical that theoretical research in this area and developing individual theoretical manuscripts for presentation.

MKT 9613. Organizational Theory and Practice. (3) (Prerequisite: Approval of Instructor). Discussions and presentations pertaining to OB literature. Emphasis on understanding the empirical add theoretical research in this area, and developing individual theoretical manuscripts for presentation.

MKT 9913. Seminar in Strategy Formulation. (3) (Prerequisite: Approval of Instructor). Doctoral seminar covering the strategic management literature in the area of strategy formulation.

MKT 9933. Seminar in Strategy Implementation. (3) (Prerequisite: Approval of instructor). Doctoral seminar covering the strategic management literature in the area of strategy implementation.
MKT 8072. Survey of Marketing. (2) (Prerequisite: Graduate standing; EC 8043, equivalent of concurrent enrollment). Two hours lecture. Survey of product, price, promotion, and distribution decisions in for-profit and non-profit settings; external environmental factors affecting marketing decisions; focus on strategic decision making.

MKT 8112. Marketing Management. (2) (Prerequisite: MKT 8072 or equivalent). Two hours lecture. A graduate survey of marketing focused on the strategic analysis and planning necessary to effectively match marketing strategies with changing macro, micro, and organizational environments.

MKT 8122. Management of Delivery Systems. (2) (Prerequisite: MKT 8072 or equivalent). Two hours lecture. Provides knowledge of operations, purchasing and logistics that is crucial to managing in the modern business world.

MKT 8313. Marketing Policies. (3) (Prerequisite: MKT 3013). Three hours lecture. A graduate survey of marketing focused on the analysis and planning necessary to effectively match marketing programs with competitive, economic, social, political and ethical environments.

MKT 8323. Problems in Marketing. (3) (Prerequisite: MKT 8112 or equivalent). Seminar. Identification of current marketing problems and the specification, evaluation and modification of strategies for their resolution, with emphasis on the use of conceptual modeling.

MKT 8333. Seminar in Marketing—Promotion and Distribution Strategies. (3) (Prerequisite: MKT 8313). Intensive analysis of promotion and distribution strategies as key functional marketing variables. Emphasis is on obtaining an advanced understanding of strategic and research alternatives.

MKT 8343. Seminar in Marketing—Pricing and Product Strategies (3) (Prerequisite: MKT 8313). Intensive analysis of pricing and product strategies as key functional marketing variables. Emphasis is on obtaining an advanced understanding of strategic and research alternatives.

MKT 8413. Seminar on Consumer Behavior. (3) (Prerequisite: MKT 8313). An analysis of macro and micro consumer behavior. Particular emphasis is placed on the consumer decision process in the market place.

MKT 8533. Research Design and Execution. (3) (Prerequisite: Consent of instructor). Interdisciplinary; designing and executing valid quantitative research projects, development valid, reliable data collection instruments, correctly analyzing, interpreting data. Wide-range applicability. Master-doctoral-level.

MKT 8543. Quantitative Marketing Seminar. (3) (Prerequisites: MKT 8313 and BQA 8443 or consent of instructor). Development of marketing strategy and the solution of marketing problems using quantitative methods.

MKT 8990. Special Topics in Marketing. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

MKT 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

MKT 9333. Advanced Marketing Theory. (3) (Prerequisite: MKT 8313). Seminar. A critical examination of the evolution of marketing concepts, terminology, principles, and theory, through analysis of the literature in the field.

MU 1101. Recital Hour. (0) Minimum one (1) hour weekly. Performance and critique experiences in applied music. Required for music majors.

MU 1103. African American Music. (3) Three hours lecture. A study of African musical and cultural traditions with focus on the impact of these traditions on the development and advancement of African American Music.

MU 1111-1121. Piano Class. (1) Two hours laboratory. Beginning piano for non-music majors.

MU 1113. History and Appreciation of Music. (3) Three hours lecture. Historical development of music and the composers of the different eras; individual investigation of related special topics; individual and directed listening to musical examples.

MU 1131. Voice Class. (1) Two hours laboratory. Class study of Voice Production.
MU 1211. Guitar Class. (1) Two hours laboratory. Class study of guitar-playing techniques at the beginning level.

MU 1213-1413. Music Theory I (3) and Music Theory II. (3) Three hours lecture. A course for music majors in which the elements of form, melody, rhythm, and harmony of music are studied on an integrated plan.

MU 1321-1521. Ear Training I (1) and Ear Training II. (1) Two hours laboratory. A course for music majors utilizing micro and macro-listening to emphasize melodic, harmonic, and rhythmic patterns and relationships in music.

MU 2011. Third Year Woodwind Ensembles. (1) (Audition required). One to five rehearsals per week. The study and performance of significant woodwind literature. May be repeated for credit more than once.

MU 2111-2121. Piano Class. (1) Two hours laboratory. Beginning piano for instrumental and vocal music majors.

MU 2322. History and Literature of Music I. (2) Two hours lecture. An intensive study of the history of music, composers, and significant literature with special research topics. Primarily for music majors.

MU 2323. History and Literature of Music II. (3) Three hours lecture. Emphasis on classifying and identifying period and composer characteristics. (Primarily for music majors.)

MU 2511. Marching Band. (1) (Audition required). One to five rehearsals per week. The study and performance of significant concert band literature. May be repeated for credit more than once. (Fall semester only).

MU 2531. Concert Band. (1) Concert Band. (Audition required). One to five rehearsals per week. The study and performance of significant concert band literature. May be repeated for credit more than once. (Spring semester only).

MU 2551. Percussion Ensemble. (1) (Audition required). One to five rehearsals per week. The study and performance of significant percussion literature. May be repeated for credit more than once.

MU 2561. Symphonic Band. (1) (Audition required). One to five rehearsals per week. The study and performance of significant symphonic band literature. May be repeated for credit more than once. (Spring semester only).

MU 2571. Wind Ensemble. (1) (Audition required). One to five rehearsals per week. Study, rehearsal, and performance of selected literature from the wind band repertory. May be repeated for credit more than once.

MU 2611. Concert Choir. (1) (Audition required). One to five rehearsals per week. The study and performance of significant choral literature. May be repeated for credit more than once.

MU 2613-2813. Music Theory III (3) and Music Theory IV. (3) (Prerequisite: MU 1213-1413). Three hours lecture. A course for music majors in which the elements of form, melody, rhythm, and harmony of music are studied on an integrated plan.

MU 2631. Starkville Community Chorus. (1) (Audition required). One to five rehearsals per week. The study and performance of significant choral literature. May be repeated for credit more than once.

MU 2711. Pop/Jazz Choir. (1) (Audition required). One to five rehearsals per week. The study and performance of significant choral literature. May be repeated for credit more than once.

MU 2721-2921. Ear Training III (1) and Ear Training IV. (1) Two hours laboratory. A course for music majors utilizing micro and macro-listening to emphasize melodic, harmonic and rhythmic patterns and relationships in music.

MU 2731. Chamber Singers. (1) (Audition required). One to five rehearsals per week. The study and performance of significant choral literature. May be repeated for credit more than once.

MU 2851. Brass Ensembles. (1) (Audition required). One to five rehearsals per week. The study and performance of significant brass literature. May be repeated for credit more than once.

MU 2911. Jazz Ensemble. (1) (Audition required). One to five rehearsals per week. The study and performance of significant jazz ensemble literature. May be repeated for credit more than once.

MU 2990. Special Topics in Music. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

MU 3111-3121. Piano Class. (1) (Prerequisite: grade of C or better in MU 2121 or equivalent or permission of instructor). Two hours laboratory. Intermediate piano for instrumental and vocal music majors; continuation of MU 2121.

MU 3112-3122. Piano Class. (2) (Prerequisite: Prior credit or concurrent enrollment in MU 1213-1413). Two hours laboratory. Functional keyboard skills for music majors who read and play intermediate to advanced-level piano repertoire.

MU 3123 Basics of Music. (3) Three hours lecture. An exploration of basic musical elements through listening; singing; movement; and playing rhythm, melodic, and ethnic instruments, utilizing a variety of multicultural and orchestral music.

MU 3232. History of the Organ and Organ Literature. (2) Two hours lecture. (Prerequisite: Junior or Senior Music Education majors or others with consent of department). A survey of organ design and literature for the instrument.

MU 3333. Orchestration. (3) Three hours lecture. Basic arranging/orchestration techniques for chorus and band. The student will learn the practical ranges of band instruments and voices so that they can write idiomatically.

MU 3412. Conducting. (2) Two hours lecture. The elements of conducting, baton technique, and interpretation.

MU 3422. Piano Literature. (2) Two hours lecture. A study of basic piano literature and stylistic trends of the Baroque, Classical and early Romantic periods. (Required of all piano pedagogy majors.)

MU 3442. Advanced Conducting. (2) (Prerequisite: MU 3412 or consent of instructor). One hour lecture. Two hours laboratory. Continuation of MU 3412 with emphasis on interpretation of significant instrumental and choral literature.

MU 3452. Advanced Piano Literature. (2) (Prerequisite: MU 3422 or consent of instructor). Two hours lecture. A continuation of Piano Literature, MU 3422. Detailed study of the keyboard literature and its composers from approximately 1875 to the present. (Required of all piano pedagogy majors).

MU 4000. Directed Individual Study. Hours and credits to be arranged.

MU 4313. Form and Analysis. (3) (Prerequisites: MU 2214/2224). Three hours lecture. A comparative survey for music majors of the principal formal designs found in instrumental and vocal literature with emphasis on compositional techniques and harmonic structure.

MU 4353. Traditional Harmony. (3) Three hours lecture. Intensive study of harmonic techniques of the common practice period, including chord function complexities of the late eighteenth century.

MU 4413. Church Music in History and Practice. (3) Three hours lecture. A survey of the use of music in the worship service from primitive to present-day cultures.

MU 4513. Counterpoint. (3) Three hours lecture. Study and analysis of free and strict polyphonic techniques.

MU 4900/4990. Special Topics in Music. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

MU 7000. Directed Individual Study. Hours and credits to be arranged.

MU 8990. Special Topics in Music. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

**Band**

Office: Band Hall
Director: Elva Kaye Launce

MU 2511. Marching Band. (1)
MU 2531. Concert Band. (1)

**Symphonic Band**

MU 2561. Symphonic Band. (Second Semester Only). (1)

**Wind Ensemble**

MU 2571. Wind Ensemble (1)

**Choral**

Office: Choral Building
Director: Jeff Pappas

Training in the correct principles of singing. Stress on tone quality, enunciation, pronunciation, even scale and musicianship. Repertoire for each of the choral groups during a four-year period is designed to provide participants with opportunity to study and perform standard and contemporary compositions.
MUE 3211. Woodwind Class. (1) Two hours laboratory. Study of woodwinds with emphasis on embouchure, techniques, and teaching problems.

MUE 3221. Woodwind Techniques. (2) Two hours lecture. Study of woodwinds with emphasis on embouchure, techniques, and teaching problems.

MUE 3231. String Class. (1) Two hours laboratory. Study of strings with emphasis on bowing, techniques, and teaching problems.

MUE 3242. Percussion Class. (2) Two hours lecture. Detailed study of percussion instruments with emphasis on teaching problems, training materials, and performance literature.

MUE 3243. Planning and Managing Learning in Music Education. (3) Three hours lecture. Study of variables contributing to efficiency and competency for teacher-learner activities and the creation and maintenance of a positive learning environment in music classrooms.

MUE 3262. Instrumental Class. (2) One hour lecture. Two hours laboratory. Instrumental experiences for vocal and piano majors.

MUE 3333. Introduction to Piano Pedagogy. (3) Two hours lecture. Two hours laboratory. Methods, materials, curriculum building, and philosophical bases for teaching beginning piano. Required of all piano pedagogy students.

MUE 3343. Advanced Piano Pedagogy. (3) (Prerequisite: MUE 3333). Two hours lecture. Two hours laboratory. Methods, materials, curriculum building and philosophical bases for teaching piano at the intermediate level. Required for all piano pedagogy students.

MUE 3613. Methods and Materials of Music for Special Education. (3) (Prerequisite: Junior standing). Three hours lecture. Materials and methods for well-rounded musical growth of child; various methods of teaching music in special education classes. Primarily for special education majors.

MUE 4000. Directed Individual Study. Hours and credits to be arranged.

MUE 4622/6622. Staging Musical Productions. (2) Two hours lecture, laboratory. Sceney design and construction, costuming, stage direction and management, coaching, and the study of selected literature.

MUE 4863. Professional Seminar in Church Music Administration. (3) (Prerequisites: Admission to the program in Church Music Education and senior standing). Three hours lecture. A seminar dealing with professional and administrative issues as they relate to music in the Church.

MUE 4873. Professional Seminar in Music Education. (3) (Prerequisites: Admission to Teacher Education and senior standing). Three hours lecture. A seminar dealing with legal, professional, administrative, and curriculum issues as they relate to music education in the schools.

MUE 4884.4894. Internship in Piano Pedagogy. (4.4) (Prerequisites: MUE 3333/3343 and senior standing). Supervised observation and directed teaching in the private piano studio. Limited to music majors with a concentration in Piano Pedagogy.

MUE 4886.4896. Student Teaching in Music Education. (6.6) (Both courses to be taken concurrently). (Prerequisites: Admission to Teacher Education and senior standing). Supervised observation and directed teaching in the private studio. Limited to music majors with a concentration in Piano Pedagogy.

MUE 4900/6900. Special Topics in Music Education. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

MUE 7000. Directed Individual Study. Hours and credits to be arranged.

MUE 8990. Special Topics in Music Education. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

(For the interdisciplinary graduate programs in Nutrition, consult College of Agriculture and Life Sciences section of this Catalog, and the Graduate Bulletin.)

NTR 4253/6253. Human Nutrition I. (3) (Prerequisites: BIO 2140 and CH 2503 or equivalent). Three hours lecture. Advanced human nutrition: digestion, metabolism, function, requirements, and recommen-
NTR 4293/6293. Human Nutrition II. (3) (Prerequisites: BIO 4253/6253 or consent of instructor). Three hours lecture. Advanced human nutrition and metabolism with emphasis on the functions, requirements, and recommendations of the regulatory nutrients (vitamins and minerals) and water. (Same as HS 4293/6293).

NTR 4313/6313. Food Industry Nutrition Issues. (3) (Prerequisite: consent of instructor). Three hours lecture. Designed to help food technologists understand scientific evidence, changing demographics and lifestyles, and consumer perceptions influence food product demand and thus diet quality. (Same as FST 4313/6313).

NTR 4990/6990. Special Topics in Nutrition. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

NTR 6233. Medical Nutrition Therapy. (3) (Prerequisites: HS 3213, HS 4223, BCH 3613 and BIO 2014 or consent of instructor). Two hours lecture. Two hours laboratory. Treatment of human diseases through nutrient modification. (Same as HS 6233).

NTR 6243. Nutrition Throughout the Life Cycle. (3) (Prerequisite: HS 4223/6223). Three hours lecture. Study of interrelationships of physiological, biochemical and sociological factors and nutrient needs of individuals and groups through the life cycle; infancy through the later years. (Same as HS 4243/6243).

NTR 6333. Fish and Shellfish Nutrition. (3) (Prerequisites: CH 2503 and CH 2501 or BCH 3613). Three hours lecture. Fundamental and applied aspects of the nutrition of fish, crustaceans, and mollusk species including feeding behavior, nutritional ecology, energetics, and nutrient requirements. (Same as WF 4333/6333).

NTR 6423. Feed Manufacturing. (3) (Prerequisites: CH 2503 and CH 2501). Three hours lecture. Two hours laboratory. Mill design and equipment; procurement, storage and quality control for ingredients and complete feeds; formulation of practical type poultry rations. (Same as PO 4423/6423).

NTR 7000. Directed Individual Study. Hours and credits to be arranged.

NTR 8114. Comparative Nutrition. (4) Spring semester. (Prerequisites: BCH 4613/6613 or equivalent). Three hours lecture. Two hours laboratory. Attention is given to background information concerning various nutrients, their functions, and their participation in energy transactions of the body.

NTR 8111-8131. Nutrition Seminar. (1) Survey of current literature; preparation, organization, and presentation of papers on selected topics in nutrition.

NTR 8123. Methods in Nutrition Research. (3) Fall semester. (Prerequisites: NTR 4115/6115 and ST 8114 or equivalent). Two hours lecture. Two hours laboratory. Application of analytical methods used in research techniques; practice in writing research proposals, conducting a research project, and preparing research finds suitable for scientific publication.

NTR 8153. Ruminant Nutrition. (3) (Prerequisite: NTR 4115/6115 or Equivalent). Three hours lecture. In-depth treatment of rumen function and recent concepts in ruminant nutrition.

NTR 8162. Monogastric Nutrition. (2) Fall semester. (Prerequisite: NTR 4115/6115 or equivalent). Two hours lecture. Monogastric nutritional relationships with special emphasis on swine nutrition. Metabolic functions, dietary requirements, deficiency symptoms and distribution of nutrients in feedstuffs.

NTR 8183. Specialty Nutrition. (3) Summer semester. (Prerequisite: NTR 4115/6115 or equivalent). Three hours lecture. Nutritional requirements and special dietary considerations necessary to the nutrition of fish, dogs, cats, horses, mink, rabbits, and laboratory animals.

NTR 8233. Maternal, Infant and Child Nutrition. (3) Three hours lecture. Nutritional needs during reproduction and growth; problems in nourishing women during the reproductive period, infants, and children; indices of growth and development. (Same as HS 8233).

NTR 8243. Community Nutrition. (3) (Prerequisite: HS 3213). Three hours lecture. Nutrition services and problems in the community. Supervised experience in methods for determining and implementing action programs in nutrition education. (Same as HS 8243).

NTR 8253. Nutrition and Food Science Research Techniques. (3) Spring semester. One hour lecture. Six hours laboratory. Application of various instruments and techniques for assay of food and biological material. (Same as FST 8253).

NTR 8261. Dietetic Internship Seminar. (1) (Prerequisite: Admission into the School of Human Sciences Dietetic Internship/Graduate Studies Program). One hour lecture. Selection of current topics in foods, nutrition or dietetics and in-depth review of current literature for critical analysis presentation. (Same as HS 8261).

NTR 8273. Dietetic Internship Capstone. (3) (Prerequisite: Admission into the School of Human Sciences Dietetic Internship/Graduate Studies Program). Three hours lecture. Theoretical aspects of dietetics gained through the study of resources, technology, professional standards, and other factors that influence entry-level practice. (Same as HS 8273).

NTR 8443. Avian Nutrition. (3) (Prerequisite: NTR 4115/6115 or equivalent). Three hours lecture. Detailed study of functions, deficiency symptoms, distribution in feedstuffs and quantitative requirements of nutrients.

NTR 8463. Advanced Animal Nutrition. (3) (Prerequisite: NTR 4115/6115 or prior approval from instructor). Two hours lecture. Two hours laboratory. Develop an understanding of nutritional physiology, metabolism, and utilization of nutrients by animal species.

NTR 8473. Micro-Nutrient Nutrition. (3) (Prerequisite: NTR 8114 or equivalent). Three hours lecture. Detailed study of functions, deficiency symptoms, dietary considerations necessary to the nutrition of fish, dogs, cats, horses, mink, rabbits, and laboratory animals.

NTR 8990. Special Topics in Nutrition. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

NTR 9000. Dissertation Research and Dissertation. Hours and credits to be arranged.

Department of HEALTH, PHYSICAL EDUCATION, RECREATION and SPORT

Office: 216 McCarthy Gymnasium

Professors: Abadie, Hunt, Kirk (head); Associate Professor: Lambeth;
Assistant Professors: Chromiak, Dohoney, Foxworth, Jordan, Smith;
Instructors Funderburk, Wiley, and Young.

PE 1001. Racquetball. (1) Two hours laboratory. Emphasis is on rules, knowledge, skill development, and team tactics necessary to successfully participate in an organized game.

PE 1021. Basic Physical Fitness Concepts. (1) Two hours laboratory. Basic knowledge, understandings and values of physical fitness; Emphasis on individualized fitness evaluation procedures and diversified program construction.

PE 1041. Aerobics. (1) Two hours laboratory. Assessment, development and maintenance of physical fitness through aerobic exercises to music.

PE 1051. Beginning Karate. (1) Two hours laboratory. The essential principles both physical and psychological will be stressed. Emphasis is placed on organization of karate techniques and training methods.

PE 1071. Soccer. (1) Two hours laboratory. Emphasis is on rules, knowledge, skill development, and team tactics necessary to successfully participate in an organized game.

PE 1081. Beginning Golf. (1) Two hours laboratory. Instruction and laboratory experience in the development of individual skills for participation in golf.

PE 1091. Contemporary Dance. (1) Two hours laboratory. A non-majors course designed to develop skills in contemporary dance repertory.

PE 1101. Karate for Intermediates. (1) (Prerequisite: PE 1051 or prior Karate experience having attained the rank of Yellow Belt). Two hours laboratory. Current events of the American Karate world. Advanced free-fighting and self-defense techniques. Interpretation of forms.

PE 1111. Physical Development. (1) Two hours laboratory. This course is designed to develop understanding in the conceptual knowledge of fitness and physical conditioning and maintenance of human wellness. (May be taken up to four times for credit).

PE 1112. Teaching Team Sports. (2) One hour lecture. Two hours laboratory. Theory of and participation in non-traditional and traditional team sports. Analysis of skills, discussion of developmental appropriateness, terms, basic rules and teaching strategies.
PE 1121. Advanced Physical Development. (1) Two hours laboratory. A continuation of PE 1111. This course is designed to further the understanding of the conceptual knowledge of fitness and physical conditioning, and maintenance of human wellness (May be taken up to four times for credit).

PE 1122. Teaching Individual and Dual Sports. (2) One hour lecture. Two hours laboratory. Theory of and participation in non-traditional and traditional individual and dual sports. Analysis of skills, discussion of developmental appropriateness, terms, basic rules and teaching strategies.

PE 1123. History and Appreciation of Dance. (3) Two hours lecture, two hours laboratory. A course designed to acquaint students with the history of dance and to develop a greater sensitivity, appreciation and understanding of this art.

PE 1131. Fitness Walking/Jogging. (1) Two hours laboratory. An exercise and activity class emphasizing walking and/or jogging to develop and maintain fitness, weight control and flexibility.

PE 1142. Teaching Rhythms. (3) One hour lecture. Two hours laboratory. Instruction, demonstration, skill development, and teaching techniques in the areas of square, folk, and contemporary dance.

PE 1151. Teaching Gymnastics and Tumbling. (1) (Prerequisite: Consent of instructor). Two hours laboratory. Teaching methods for instructional procedure in gymnastics and tumbling. (May be taken up to four times for credit).

PE 1181. Training Techniques for Physical Conditioning. (1) Two hours laboratory. Provides the student with theoretical and laboratory experiences in the development of muscular strength, flexibility, and cardiovascular endurance. (May be taken up to four times for credit).

PE 1213. Introduction to Exercise Science. (3) Three hours lecture. This course is designed to provide students and overall understanding of the professions within Exercise Science.

PE 1221. Volleyball. (1) Two hours laboratory. Emphasis is on rules, knowledge, and team tactics necessary to successfully participate in an organized game.

PE 1223. Personal Health. (3) Three hours lecture. An introductory survey of the multiple dimensions of health. Focus is upon healthy behaviors across the lifespan as well as environmental and social influence.

PE 1231. Modern Dance. (1) (Prerequisite: Consent of Department Head). Two hours laboratory. Laboratory experience including a wide range of fundamental exercises and techniques, movement patterns, and dance choreography.

PE 1233. Introduction to Lifetime Leisure. (3) Three hours lecture. A comprehensive examination of leisure from psychological, sociological, economic and historical contexts. Includes an exploration of individual and group activities appropriate for lifetime involvement.

PE 1241. Tennis (1) Two hours laboratory. Emphasis is on rules, knowledge, skill development, and team tactics necessary to successfully participate in an organized game.

PE 1271. Fitness and Conditioning. (1) Two hours laboratory. This course provides the student with necessary cognitive and laboratory experiences to make personal decisions specific to fitness and conditioning. (May be taken up to four times for credit).

PE 1313. Introduction to Physical Education. (3) Three hours lecture. Interpretation of the meaning of physical education based on the significant facts of the biological sciences.

PE 1361. Strength Training. (1) Two hours laboratory. Principles and practice of strength training with particular emphasis on specificity of design and management of load, repetitions, rate of exercise and recovery time.

PE 1461. Badminton. (1) Two hours laboratory. Emphasis is on rules, knowledge, skill development, and team tactics necessary to successfully participate in an organized game.

PE 1471. Country and Western Dance. (1) Two hours laboratory. The course provides a broad introduction to country and western dance and related activities which can be enjoyed throughout an individual's lifetime.

PE 1783. Introduction to Athletic Training. (3) Three hours lecture. Introduction to the theory and practice of athletic training.

PE 2001. Practicum in Health and Physical Education. (1) Two hours laboratory. This course is designed to provide a laboratory experience for health and physical education majors in actual teaching situations.

PE 2003. Foundations of Health Education. (3) Three hours lecture. Introduction to the discipline of Health Education. Examination of fundamental concepts and required competencies of the health educator in a variety of settings.

PE 2163. Consumer Health. (3) Three hours lecture. A study of consumer health for major students. The course is designed to acquaint students with junk foods, drugs, health laws, and health services.

PE 2221. Lifeguarding. (1) (Prerequisite: Swim 500 yards continuously using a front crawl, a sidestroke, a stroke done on the back using an inverted scissors or breaststroke kick, and breaststroke). Two hours laboratory. Knowledge and skills designed to save an individual's own life or the life of another in the event of an emergency.

PE 2231. Water Safety Instructor Certification. (1) (Prerequisite: Red Cross Advanced Lifesaving Certificate). Two hours laboratory. Preparation of all Red Cross swimming classes.

PE 2603. Medical Terminology. (3) Three hours lecture. A working knowledge of terminology related to the human body through descriptive definitions, practical applications, and medical abbreviations will be developed.

PE 2613. Exercise Electrocardiography. (3) (Prerequisite: BIO 1004). Three hours lecture. Basic and intermediate electrocardiography including cardiac function, lead systems, rate, rhythm, axis, infarction, ischemia, hypertrophy and effects of cardiovascular drugs and exercise on ECG.

PE 2990. Special Topics in Physical Education. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developmental subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

PE 3033. Basketball/Football Officials. (3) Three hours lecture. A course designed to qualify officials for major sports officiating in Mississippi. Rules, rules interpretation, and mechanics of officiating for the major sports are covered.

PE 3111. Advanced Military Physical Fitness. (1) (Prerequisites: MS 3113, MS 3123, MS 4113, MS 4123). One hour laboratory. Develops the physical fitness required of an officer in the Army through emphasis of individual fitness programs and examination of the role of exercise/fitness. (May be taken up to four times for credit).

PE 3133. Adapted Physical Education. (3) (Prerequisite: Consent of the instructor). Two hours lecture. Two hours laboratory. A study of the psychomotor domain with emphasis on identifying handicapping problems and developing instructional strategies for remediation of these problems.

PE 3153. Methods of Elementary Physical Education. (3) Three hours lecture. Designed to provide students with knowledge and practical experience that will enhance their effectiveness in teaching physical education to pre-school through fifth grade students.

PE 3163. Principles and Methods of Secondary School Health and Physical Education. (3) (Prerequisite: Senior standing). Three hours lecture. This course is designed to emphasize contemporary teaching methods in all areas of health and physical education in the secondary school.

PE 3173. Measurement and Evaluation in Exercise Science. (3) Three hours lecture. Emphasis is placed on fitness assessment and statistical interpretation of data related to fitness.

PE 3183. Psychology of Coaching. (3) Three hours lecture. Psychological principles applied to athletic coaching.

PE 3213. Emergency Health Care. (3) Three hours lecture. First Aid procedures which include shock, wounds, CPR, resuscitation, poisoning, transportation, hemorrhaging, splinting, burns, respiratory problems, etc. are taught and practiced.

PE 3263. Basic Principles of Health Promotion. (3) (Prerequisite: PE 2003 Foundations of Health Education). Three hours lecture. Basic concepts of health promotion. Role of Health/Fitness professionals in developing wellness/prevention oriented interventions to promote healthy lifestyles.

PE 3273. Athletic Training I. (3) (Prerequisites: PE 1783 and BIO 1004). Two hours lecture. Two hours laboratory. Prevention and treatment of injuries prevalent in athletics, physical education and adult fitness programs.

PE 3283. Athletic Training Practicum I. (3) (Prerequisites: PE 1783 and consent of instructor). Three hours practicum. A supervised
work experience of 375 hours; interacting with intramural sports teams is required.

**PE 3293. Athletic Training Practicum II. (3)** (Prerequisite: PE 3283). Three hours practicum. A supervised work experience of 375 hours; interacting with secondary school sports teams is required.

**PE 3303. Physiology of Exercise. (3)** (Prerequisite: BIO 1004). Two hours lecture. Two hours laboratory. Functions of the body in muscular work; physiological aspects of training, physical fitness and fatigue.

**PE 3422. Coaching Football. (2)** Two hours lecture. Theoretical study of football fundamentals, positions, styles of offensive and defensive rules. In-depth examination of important contemporary issues in coaching and optimal health throughout life.

**PE 3432. Coaching Basketball. (2)** Two hours lecture. Theoretical study of basketball from a coaching standpoint; fundamental and team play; methods of teaching fundamentals stressed; team organization.

**PE 3452. Coaching Softball and Baseball. (2)** Two hours lecture. Theoretical study of baseball and softball fundamentals and coaching techniques.

**PE 3623. Applied Exercise Physiology. (3)** (Prerequisite: PE 3303). Three hours lecture. Study of the application of mechanisms of metabolic control, force production, and cardiorespiratory support to acute and chronic adaptations of exercise.

**PE 3633. Rehabilitation Techniques in Sport. (3)** (Prerequisite: PE 3273). Two hours lecture. Two hours laboratory. Investigate aspects of physiotherapy utilized in treatment of injuries. Course will be supported with assistance of Oktibbeha County Hospital.

**PE 3643. Applied Anatomy. (3)** (Prerequisite: BIO 1004). Three hours lecture. Provide an in-depth analysis of muscle structure, muscle function, adaptation of muscle to resistance training, and effects of disuse.

**PE 4000. Directed Individual Study.** Hours and credits to be arranged.

**PE 4113/6113. Fitness Programs and Testing Procedures. (3)** (Prerequisite: PE 3303 and PE 3173). Two hours lecture. Two hours laboratory. Provides study of and practice in conducting adult fitness programs and fitness testing procedures.

**PE 4113S. Exercise Programs for Special Populations. (3)** Three hours lecture. This course describes the methods of prescribing exercise programs for individuals with special medical conditions.

**PE 4153/6153. Training Techniques for Exercise and Sport. (3)** (Prerequisite: PE 3303). Three hours lecture. Training techniques used for exercise and sport and their acute and chronic effect upon the body.

**PE 4173. Tests and Measurements in Health and Physical Education. (3)** Three hours lecture. Test construction, test administration, and statistical procedures for evaluating test results in health and physical education.

**PE 4183. Exercise and Weight Control. (3)** Two hours lecture. Two hours laboratory. The course describes the relationship between physical activity and nutrition for the maintenance of ideal body weight and optimal health throughout life.

**PE 4210. Fitness Management Internship. (1-9)** (Prerequisite: PE 4113; senior status, five hours of PE activity elected). Hours and credits to be arranged. Supervised observation and teaching experience in a fitness/health enhancement facility.

**PE 4233. Biomechanics. (3)** (Prerequisites: BIO 1004). Three hours lecture. Analysis of movement; body mechanics; relationships and application of principles of movement to teaching physical education.

**PE 4313-4316. Sports Communication Internship. (3.6)** (Prerequisite: Consent of instructor). Hours and credits to be arranged. Supervised observation and practicum experience in a sports communication setting.

**PE 4413. Basic Driver and Traffic Safety Education I. (3)** (Prerequisite: Valid driver’s license, two years driving experience). Two hours lecture. Two hours laboratory. Critical analysis of traffic accidents, attitude factors, essential knowledge of automobile operations and traffic laws and regulations; laboratory experiences for developing driving skills.

**PE 4423. Driver and Traffic Education Methods II. (3)** (Prerequisite: PE 4413). Two hours lecture. Two hours laboratory. Professional preparation of college students who plan to teach driver education in secondary schools; methods of teaching and administering program; scheduling, financing, and public relations.

**PE 4503. Contemporary Issues in Health Education. (3)** Three hours lecture. In-depth examination of important contemporary issues in school, community, and worksite health. Emphasis is placed on examination of current literature in the field.

**PE 4603. Exercise in Health and Disease. (3)** (Prerequisites: PE 3303 and PE 2603). Three hours lecture. Focus on the pathophysiology and risk factors of diseases and associated health problems attributable to physical inactivity.

**PE 4783. Athletic Training II. (3)** (Prerequisites: PE 3273 and PE 4233). Three hours lecture. A specialized course in initial clinical evaluation of athletic injuries, emergency care procedures, and training room administration.

**PE 4793. Athletic Training Practicum III. (3)** (Prerequisite: PE 3293). Three hours practicum. A supervised work experience of 375 hours; interacting with secondary school sports teams is required.

**PE 4853. Motor Learning and Skill Analysis. (3)** Three hours lecture. Designed to provide students with an understanding of how movement is produced and controlled and the principles that underlie the learning of motor skills.

**PE 4873. Professional Seminar in Physical Education and Athletics. (3)** (Prerequisites: Admission to Teacher Education and senior standing). Three hours lecture. Seminar dealing with legal, professional, administrative, and curriculum issues as they relate to physical education and athletics in the schools.

**PE 4883. School Health Education (3)** (Prerequisite: PE 2003 Foundations of Health Education or consent of instructor). Three hours lecture. Preparation for prospective teachers in planning, implementing and evaluating all aspects of comprehensive school health education.

**PE 4886. 4896. Student Teaching in Physical Education. (6,6)** (Prerequisites: to be taken concurrently). Involves theories of leadership, programs, and philosophies of the profession.

**PE 4893. Athletic Training Practicum IV. (3)** (Prerequisite: PE 4793). Three hours practicum. A supervised work experience of 375 hours; interacting with secondary school sports teams or intercollegiate athletics is required.

**PE 4990/6990. Special Topics in Physical Education. (1-9)** (Prerequisite: Consent of instructor). Hours and credits to be arranged. Course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Maximum of two offerings under one title within two academic years).

**PE 7000. Directed Individual Study.** Hours and credits to be arranged.

**PE 8000. Thesis Research/Thesis.** Hours and credits to be arranged.

**PE 8113. Curriculum Construction in Health and Physical Education. (3)** Three hours lecture. Principles, problems, and procedures in the development of a physical education curriculum are considered. Special emphasis is placed upon developing a course of study in physical education for a chosen situation.

**PE 8123. Physical Education and Sport Programs. (3)** Three hours lecture. Study of principles, problems, human relationships, and program structures in supervision; explores theories of leadership, programs, and philosophies of the profession.

**PE 8143. Problems in Health Education. (3)** Three hours lecture. Includes current information relating to various health problems in our society. Stresses methods of prevention and wellness at different levels of curriculum organization.

**PE 8153. Wellness and Aging. (3)** (Prerequisites: PE 3303 or PSY 4403/6403 or consent of Department). Three hours lecture. A study designed to prepare practitioners to initiate, develop, and conduct programs in wellness and movement activities for the enrichment of life in older populations.

**PE 8163. Seminar in Physical Education. (3)** The course gives a complete review of current literature in Health, Physical Education, and Recreation.

**PE 8193. Professional Preparation in Health Education, Physical Education, and Recreation Education. (3)** Three hours lecture. This course covers NASPE guidelines for professional preparation. Special areas are professional roles, academic advisement, and professional writing skills.

**PE 8213. Problems in the Administration of Athletics. (3)** Three hours lecture. Intercollegiate athletic program; place of athletics in education, program organization and administration, budget, equipment, facilities, public relations, legal liability, and eligibility and contest regulations.

**PE 8223. Advanced Motor Learning and Motor Performance. (3)** Two hours lecture. Two hours laboratory. This course is designed to investigate, observe, and evaluate human demands which occur during sports activity. Sensory, psychological, perceptual, and motor demands are investigated.
PE 8243. Cardiorespiratory Exercise Physiology. (3) (Prerequisite: GE 3303). Three hours lecture. Advanced principles of cardiovascu-
lar and respiratory physiology, with special emphasis on the
physiological responses of these systems to acute and chronic exercise.

PE 8263. Exercise Biochemistry. (3) (Prerequisites: GE 3303). Three hours lecture. Functioning, interrelationships and adaptations of
the systems of the body during acute and chronic exercise.

PE 8273. Laboratory Instrumentation. (3) (Prerequisite: GE 3303). Six hours laboratory. A course in the function, calibration and op-
eration of physical education laboratory instruments.

PE 8283. Environmental Exercise Physiology. (3) (Prerequisite: GE 3303; suggested prerequisite or corequisite GE 8243). Three hours lecture. Advanced principles and applications in exercise physiology in-
cluding responses to acute exercise and chronic training in the heat, cold, and at high and low pressures.

PE 8303. Research in Exercise Science and Sport. (3) A study of research methods and techniques; the preparation of the research pro-
specific to exercise science and sport; and familiarization with APA writing guidelines.

PE 8313. Interpretation of Data in Exercise Science and Sport. (3) Three hours lecture. Measurement, analysis and interpreta-
tion of data in exercise science and sport.

PE 8323. Introductory Concepts Basic to Cardiac Rehabilita-
tion. (3) (Prerequisite: GE 3303). Two hours lecture. Two hours labora-
tory. An overview of the expanding field of cardiac rehabilitation and the opportunities for the physical educator.

PE 8423. Graded Exercise Testing. (3) (Prerequisite: GE 3303). Two hours lecture. Two hours laboratory. Methods of supervising graded
exercise testing, including interpretation of basic electrocardiography.

PE 8513. Theory and Practice of Health Education. (3) Three hours lecture. Historical perspectives and current status of health educa-
tion/promotion. Fundamental constructs of the discipline in school, com-
munity, and worksite programs.

PE 8523. Health Promotion Techniques. (3) Three hours lecture. Examination of techniques utilized in delivery of health promotion inter-
ventions. Emphasizes use of technology in development of activities suit-
able for diverse audiences and settings.

PE 8533. Health Education for Diverse Populations. (3) Three hours lecture. This course is designed to help students identify and de-
velop programs to overcome the health disparities that exist in diverse populations.

PE 8553. Behavioral Epidemiology. (3) Three hours lecture. Be-
havioral and social environmental issues related to premature morbidity and mortality patterns. Current research literature and application of epi-
demiological principles to health education/promotion.

PE 8613. Design and Administration of Health Promotion Pro-
grams. (3) Three hours lecture. Principles of health promotion planning
models applicable to school, community, and worksite programs. Investi-
gation of existing programs and current literature.

PE 8653. Implementation and Evaluation of Health Promo-
tion Programs. (3) Three hours lecture. Development and application of evaluation protocols for health promotion programs. Process, impact
and outcome measures are examined.

PE 8710. Internship. (3-6) (Prerequisite: Consent of the Depart-
ment Head). Opportunity for practical experience in business, fit-
ness/wellness and sports organizations.

PE 8803. Sport Law (3) Three hours lecture. The analysis and appli-
cation of the legal foundations, concepts and issues impacting the sports
industry.

PE 8823. The Sport Product. (3) Three hours lecture. An examina-
tion of the uniqueness of the sport product and the importance of effec-
tive advancement and visibility of the sport product.

PE 8833. Event and Facility Management. (3) Three hours lecture. The principles and applications of management, design, and main-
tenance of concepts as they apply to indoor and outdoor events and
facilities.

PE 8883. Sports Ethics. (3) Three hours lecture. Philosophical ex-
ploration in the recognition, analysis, and implementation of ethical
thought and the ethical decision making process within the multifaceted
core of the sport industry.

PE 8990. Special Topics in Physical Education. (1-9) Credit and
title to be arranged. This course is to be used on a limited basis to offer de-
veloping subject matter areas not covered in existing courses. (Courses
limited to two offerings under one title within two academic years).

Department of PHYSICS and ASTRONOMY

Office: Hilburn Hall

Professors Novotny (Head), Bauman, Cook, Ferguson,
Foley, Harpole, Koshel, Lestrade, Ma, Monts, and Su;

Professors Emeriti Croft, Crow, Denson, Howell, Jones and Rundel;

Associate Professors Arnoldus, and Winger;

Assistant Professors Clay, Dunne, Ermer and Kim;

Adjunct Lindner, Luthe, Singh, Wang, and Winstead;

Instructor/Instructional Support Coordinator Worthy

When both PHY 2414 and PHY 2424 are taken at the same commu-
nity college they will equate to PH 1113, PH 1123 and PH 1133.

When both PHY 2514/2515 and PHY 2524/2525 are taken at the
same community college they will equate to PH 2213, PH 2223, and PH
2233.

PH 1001. Introduction to Physics. (1) (Prerequisite: Consent of in-
structor). One hour lecture. Only open to Freshmen and transfer physics
majors or prospective majors. Introduction to the profession. Historical
perspectives. Use of microcomputers in physics.

PH 1011. Physical Science Laboratory 1. (1) (Prerequisites or
corequisites: PH 1013 or PH 1063). Two hours laboratory. Experiments in
mechanics, sound, light, electricity, and astronomy...

PH 1013. Physical Science Survey 1. (3) (Counts toward teacher certification in general science, but not physics/chemistry). Three hours
lecture. Topics include mechanics, sound, light, electricity, and astron-
omy. Recommended laboratory PH 1011.

PH 1021. Physical Science Laboratory 2. (1) (Prerequisite or
corequisite: PH 1023) Two hours laboratory. Experiments in chemistry,
heat, meteorology, and geology.

PH 1023. Physical Science Survey 2. (3) (Counts toward teacher certification in general science, but not in physics/chemistry). Three hours
lecture. Topics include chemistry, heat, meteorology, and geology.
Recommended laboratory PH 1021.

PH 1041. Physics Laboratory A. (1) (Prerequisite or corequisite:
PH 1042). Two hours laboratory. Experiments in sound and waves.

PH 1042. Physics of Sound and Music. (2) Two hours lecture. Pri-
marily for the non-technical student. Production, propagation, and per-
ception of sound. Applications to musical instruments, architectural
acoustics, high fidelity systems.

PH 1063. Descriptive Astronomy. (3) Three hours lecture. Night
observation. The solar system; description and evolution of stars and the

PH 1093. The Solar System; description and evolution of stars and the

PH 1113. General Physics. (3) (Prerequisites: MA 1313 and MA
1323 or registration in MA 1713). Two hours lecture, one hour drill, two
hours laboratory. Noncalculus-based study of the fundamental laws of
mechanics, fluids, and relativity.

PH 1123. General Physics. (3) (Prerequisite: PH 1113). Two hours
lecture, one hour drill, two hours laboratory. Noncalculus-based study of
thermal physics, waves, sound, and light.

PH 1133. General Physics. (3) (Prerequisite: PH 1113). Two hours
lecture, one hour drill, two hours laboratory. Noncalculus-based study of
electricity and magnetism and selected topics in modern physics.

PH 2213. Physics I. (3) (Prerequisite: MA 1713). Three hours lec-
ture. Calculus-based course emphasizing Newtonian mechanics and
conservation laws.

PH 2223. Physics II. (3) (Prerequisites: PH 2213 and MA 1723).
Two lecture hours, one hour recitation, two hours laboratory. Calculus-
based introduction to gravitation, electricity and magnetism. Labora-
tory emphasizes concepts of force and motion, conservation laws, and
simple electrical circuits.

PH 2233. Physics III. (3) (Prerequisite: PH 2223). Two hours
lecture, one hour recitation, two hours laboratory. Calculus-based course in
simple harmonic motion, waves, optics and an introduction to modern
physics. Laboratory emphasizes optics and electronics.

PH 2283. Honors Physics I. (3) (Prerequisite: Open through invita-
tion only). Three hours lecture. Honors section of PH 2213.

PH 2293. Honors Physics II. (3) (Prerequisite: Open through invi-
tation only). Two hours lecture. One hour recitation, two hours labora-
tory. Honors section of PH 2223.

PH 2990. Special Topics in Physics. (1-9) Credit and title to be ar-
 ranged. This course is to be used on a limited basis to offer developing
subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

PH 3613. Modern Physics. (3) (Prerequisites: PH 2233 or PH 1133; MA 2733, or registration in MA 2733). Three hours lecture. Special relativity, quantum physics, atomic, nuclear, and solid state physics.

PH 4000. Directed Individual Study. Hours and credits to be arranged.

PH 4013/6013. Selected Topics in Physics for Teachers. (3) Two hours class work, three hours laboratory. For teachers. Basic concepts of physics. Will include discussion and clarification of material from currently adopted public school textbooks.

PH 4023/6023. Astronomy for Teachers. (3) Two hours class work. Three hours laboratory. For teachers. An introduction to the physical universe with emphasis on observational astronomy.

PH 4033/6033. Demonstrations and Concepts for Physics Teachers I. (3) (Prerequisite: Consent of instructor). Two hours lecture, three hours laboratory. Topics are those normally covered in first semester high school physics. Equal emphasis on theory, problems, demonstrations, and laboratory.

PH 4043/6043. Demonstrations and Concepts for Physics Teachers II. (3) (Prerequisite: Consent of instructor). Two hours lecture, three hours laboratory. Topics are those normally covered in second semester high school physics. Equal emphasis on theory, problems, demonstrations, and laboratory.

PH 4113/6113. Electronic Circuits for Scientists. (3) (Prerequisites: PH 1133 or PH 2223 and MA 2733). Two hours lecture and six hours laboratory. DC and AC circuits. Resistors, capacitors, inductors, diodes and transistors in basic analog circuits. Topics include filters, tuned circuits, power supplies, amplifiers and oscillators.

PH 4123/6123. Digital Electronics for Scientists. (3) (Prerequisite: PH 1133 or 2223). One hour lecture and six hours laboratory. Transistors in switching circuits and gates. Digital logic. Microprocessor basics, support hardware, interaction of hardware and software, interfacing experiments.

PH 4152/6152. Modern Physics Laboratory. (2) Six hours laboratory. Introduction to measurement theory. The determination of e, e/m, and beta-ray spectroscopy, gamma-ray scintillation spectroscopy, Geiger counters; other experiments.

PH 4213/6213. Intermediate Mechanics. (3) (Prerequisites: PH 1133 or PH 2223 and MA 2733). Three hours lecture. Plane statics and dynamics of particles and systems of particles with emphasis on both derivation and application of principles involved.

PH 4223/6223. Intermediate Mechanics. (3) (Prerequisite: PH 4213/6213). Three hours lecture. Statics and dynamics of particles in three dimensional space using vector notation; Lagrange’s equations; introduction to the special theory of relativity.

PH 4323/6323. Electromagnetic Fields I. (3) (Prerequisites: PH 1133 or PH 2223 and MA 2743). Three hours lecture. Electrostatics, dielectrics, electric current, magnetostatics, electromagnetic induction, magnetic properties of matter.

PH 4333/6333. Electromagnetic Fields II. (3) (Prerequisite: PH 4323/6323). Three hours lecture. Electromagnetic waves in free space and in matter, reflection and refraction, radiation.

PH 4513/6513. Intermediate Optics. (3) (Prerequisites: PH 1123 or PH 2223 and MA 2733). Three hours lecture. Geometrical optics and physical optics.

PH 4613/6613. Nuclear and Particle Physics. (3) (Prerequisite: PH 3613). Three hours lecture. Special theory of relativity; nuclear structure; radioactivity; nuclear reactions; nuclear forces; fission; fusion; high energy particle and astrophysics. Experimental apparatuses and techniques.

PH 4713/6713. Introduction to Quantum Mechanics. (3) (Prerequisites: PH 3613 and MA 3253). Three hours lecture. Principles of quantum mechanics, Heisenberg uncertainty principle, angular momentum; the Schrödinger wave equation in one and three dimensions; the one-electron atom.

PH 4723/6723. Applications of Quantum Mechanics. (3) (Prerequisite: PH 4713/6713). Three hours lecture. Introduction to perturbation theory and quantum statistics. Topics selected from multi-electron atoms, diatomic molecules, solid state and nuclear physics.

PH 4813/6813. Introduction to Solid State Physics. (3) (Prerequisite: PH 3613). Three hours lecture. Crystal structure, crystal diffraction, and the reciprocal lattice, crystal binding, free electron gas, energy bands, and semiconductors.

PH 4990/6990. Special Topics in Physics. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

PH 7000. Directed Individual Study. Hours and credits to be arranged.

PH 8000. Thesis Research/Thesis. Hours and credits to be arranged.

PH 8013. Modern Topics for Physics Teachers. (3) (Prerequisites: Consent of instructor). Two hours lecture, three hours laboratory. Historical development of special relativity and quantum physics with particular emphasis on topics and experiments in atomic and nuclear physics.

PH 8213. Mechanics. (3) (Prerequisite: A good undergraduate training in physics and mathematics—consent of instructor). Coordinate systems and transformations, tensors, and matrices. Particle dynamics, variational principles, Lagrange’s and Hamilton’s equations, rigid body motion, special relativity in mechanics.

PH 8233. Methods of Theoretical Physics I. (3) (Prerequisite: Consent of instructor). Topics will vary, but may include linear vector spaces, tensor analysis, group theory, function space and orthogonal polynomials.

PH 8243. Methods of Theoretical Physics II. (3) (Prerequisite: PH 8233). Topics will vary but may include analytic functions, Fourier analysis, Green’s functions, integral transforms, partial differential equations and integral equations.

PH 8313. Electromagnetic Theory (3) (Prerequisite: PH 4333 or equivalent). Maxwell’s theory of electromagneticism. Boundary value problems in electrostatics, static multipole moments, theory of dielectrics, magnetostatics, plane electromagnetic waves, simple radiating systems. (Same as ECE 8313).

PH 8623. Nuclear Physics II. (3) (Prerequisites: PH 8613, PH 8743). Elementary particle theory and interpretation of experimental data.

PH 8743. Quantum Mechanics I. (3) (Prerequisites: PH 4723 and MA 3313). Schrödinger theory, spherically symmetric systems, matrix mechanics, angular momentum and spin, time-independent perturbation theory.

PH 8803. Molecular Structure. (3) (Prerequisites: PH 8743). Theoretical interpretation of thermal, electric, and magnetic properties of solids.

PH 8890. Special Topics in Physics. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

PH 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.
PHI 1103. Introduction to Philosophy. (3) Three hours lecture. An introduction to the major ideas and methods of philosophy. At least one philosophic classic is read, usually one suitable for orientation purposes.

PHI 1113. Introduction to Logic. (3) Three hours lecture. A development of practical ability in the major forms of valid argumentation concluding with a consideration of the universal and existential operators.

PHI 1123. Introduction to Ethics. (3) Three hours lecture. A study of the specific considerations, such as facts, feelings, principles, values and conflicts, which influence the making of concrete moral decisions.

PHI 1183. Honors Introduction to Philosophy. (3) (Prerequisite: Open through invitation only). Three hours lecture. Honors section of PHI 1103.

PHI 1193. Honors in Ethics. (3) (Prerequisite: Open through invitation only). Three hours lecture. Honors section of PHI 1123.

PHI 2123. Medical Ethics. (3) Three hours lecture. A philosophical study of situations requiring ethical decision making in the area of medicine. (Not open to freshmen).

PHI 2133. Introduction to Aesthetics. (3) Three hours lecture. Theories of art and the nature of beauty, designed to enhance the student's sensitivity and cultural awareness.

PHI 2990. Special Topics in Philosophy. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

PHI 3013. Business Ethics. (3) Three hours lecture. A philosophical exploration of how to recognize, analyze, and implement ethical decisions within the multivalued contexts of the various fields of business.

PHI 3023. History of Western Philosophy: Part I. (3) Three hours lecture. A survey of major figures and movements from early Greek philosophy to the Middle Ages.

PHI 3033. History of Western Philosophy: Part II. (3) Three hours lecture. A survey of major figures from the Renaissance through contemporary philosophy.

PHI 3103. Symbolic Logic. (3) (Prerequisite: PHI 1113 or equivalent). Three hours lecture. An analysis of the properties of formal systems along with special problems in the philosophy of logic.

PHI 3113. Philosophy of Law. (3) Three hours lecture. A philosophical analysis of the concepts of law, liberty, justice, responsibility, and punishment from the rival ethical perspectives of deterrence and retribution.

PHI 3123. Philosophy of Religion. (3) (Prerequisite: Three hours of philosophy). Three hours lecture. A critical inquiry into the rational justification of central theistic beliefs, with emphasis on the traditional philosophical arguments for and against the existence of God. (Same as REL 3123).

PHI 3133. Seminar in Philosophy. (3) Three hours lecture. (Prerequisites: Completion of fifteen hours of PHI courses, including PHI 1113). The study of selected philosophy essays and practice in philosophical composition.

PHI 3213. Syllogism. (3) (Prerequisite: PHI 1113). Three hours lecture. A concentrated study of the categorical syllogism, with emphasis on recent extensions of it.

PHI 3214/6214. Existentialism and Postmodernism. (3) (Prerequisite: 3 hours PHI or junior standing). Three hours lecture. A study of the 20th century philosophical movements of existentialism and postmodernism.

PHI 4143/6143. Philosophy of Science. (3) Three hours lecture. An analytical examination of the essential ingredients of science concluding with the effect of scientific values on contemporary culture.

PHI 4153/6153. American Philosophy. (3) (Prerequisite: Junior standing). Three hours lecture. Speculative and practical philosophies beginning with the early colonial settlers, and terminating with pragmatism, Santayana and Whitehead.

PHI 4163/6163. Research Ethics. (3) Three hours lecture. This course examines ethical issues that are generated by the tensional balancing of personal consideration against public good in the practice of scientific research.

PHI 4213/6213. Theories of Inquiry. (3) (Prerequisite: Junior/Senior standing or consent of instructor). Three hours lecture. A historical and topical examination of rival traditions and theories of inquiry. Special attention will be paid to the concepts of knowledge, warrant, and truth.

PHI 4313/6313. Feminist Interpretations of Western Social and Political Philosophy. (3) (Prerequisite: Junior/senior standing or consent of instructor). Three hours lecture. A survey of modern and contemporary social and political philosophical texts, which emphasizes recent feminist interpretations, analyses, and criticism of traditional social and political philosophy.

PHI 4990/6990. Special Topics in Philosophy. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

PHI 7000. Directed Individual Study. Hours and credits to be arranged.

PHI 8990. Special Topics in Philosophy. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

ANIMAL PHYSIOLOGY

(For the interdisciplinary graduate programs in Animal Physiology, consult College of Agriculture and Life Sciences section of this Catalog and the Graduate Bulletin.)

PHY 6114. Cellular Physiology. (4) (Same as BIO 4114/6114).

PHY 6335. Anatomy and Physiology of Insects. (5) (Prerequisite: EPP 4154/6154). (Same as EPP 6335).

PHY 6514. Animal Physiology. (4) (Same as BIO 4514/6514).

PHY 6611. Practice in Physiology of Reproduction. (Prerequisite: ADS 4613/6613 or taken concurrently). (Same as ADS 4611/6611).

PHY 6623. Physiology of Lactation. (3) (Prerequisite: VS 3014 or BIO 1504). (Same as ADS 4623/6623).

PHY 6631. Physiology of Reproduction. (3) (Prerequisite: BIO 1504 or VS 3014). (Same as ADS 4631/6631).

PHY 6843. Poultry Physiology. (3) (Prerequisite: PO 4833/6833 or consent of instructor). Two hours lecture. Two hours laboratory. Physiology of the fowl with emphasis on integration of body functions. (Same as PO 6843).

DESCRIPTION OF COURSES 259

PO 3313. Advanced Poultry Judging. (3) Two hours lecture. Two hours laboratory. Advancement of breed type and characteristics: intensified training in judging for production and exhibition qualities. (Same as PO 6313.)

PO 4373. Hatchery Management Laboratory. (3) Six hours laboratory. Fundamental principles of hatchery design, incubator layout, ventilation and humidity control, fertility and hatchability problems that relate to hatching chicks.

PO 4413/6413. Poultry Nutrition. (3) (Prerequisite: CH 2503 and PO 3313 or equivalents). Three hours lecture. Study of the digestion, absorption, and metabolism of nutrients in avian species. Special emphasis is given to practical nutritional needs of commercial poultry flocks.

PO 4423/6423. Feed Manufacturing. (3) Three hours lecture. Two hours laboratory. Mill design and equipment; procurement, storage and quality control for ingredients and complete feeds; formulation of practical type poultry rations. (Same as NTR 6423.)

PO 4513/6513. Poultry Processing. (3) Two hours lecture. Two hours laboratory. Operation and study of modern processing equipment; grading poultry and eggs; killing, dressing, eviscerating, and packaging poultry; studying methods of retail and wholesale marketing. (Same as FST 4513/6513.)

PO 4523/6523. Commercial Broiler Processing Technology. (3) Three hours lecture. Study of preparation of live broiler chickens for retail sales, including all pertinent technology, product flow, equipment and applicable regulations.

PO 4833/6833. Poultry Anatomy. (3) Two hours lecture. Two hours laboratory. Anatomy of the fowl with emphasis on morphology and organization of the avian body structures.

PO 4900/6900. Special Topics in Poultry. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

PO 4843/6843. Poultry Physiology. (3) (Prerequisites: PO 4513/6513 or consent of instructor). Two hours lecture. Two hours laboratory. Physiology of the fowl with emphasis on integration of body functions. (Same as PH 6843.)

PO 7000. Directed Individual Study. Hours and credits to be arranged.

PO 8000. Thesis Research. (3) Hours and credits to be arranged.

PO 8500. Thesis Research/Thesis. (3) Hours and credits to be arranged.

PO 8513. Poultry Food Science Readings. (3) (Prerequisite: PO 6513 or 3 hours in related courses offered in Animal Science, Dairy Science, or Horticulture). One hour lecture. Six hours library research weekly. An intensive study of poultry food science literature dealing with chemical, microbial, physical and organoleptic attributes of eggs and poultry meats. (Same as FST 6513.)

PO 8823. Physiology of Digestion and Metabolism. (3) (Prerequisites: CH 4523/6523). Three hours lecture. The chemistry and physiology of digestion and absorption; the fate of absorbed products in the body. (Same as PH 8823.)

PO 8990. Special Topics in Poultry. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years.)

PO 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

Master of Public Policy and Administration

PPA 7000. Directed Individual Study. Hours and credits to be arranged.

PPA 8103. Seminar in Public Administration. (3) (Prerequisite: consent of instructor). Detailed examination of the major elements of the field of public administration, with particular emphasis on emerging trends in the field.

PPA 8123. State Government Administration. (3) Seminar in the practice and principles of state government administration, including judicial and legislative administration.

PPA 8133. City and County Management. (3) Seminar focus on small town and county management in quasi-bureaucratic settings. Detailed consideration of problem solving capabilities as they relate to different forms of local government structure.

PPA 8143. Civil Rights and Affirmative Action. (3) (Prerequisite: consent of the instructor). A seminar which examines the various civil rights laws and acts and court decisions related to affirmative action in the workplace and public policy.

PPA 8153. Seminar in Privatization. (3) (Prerequisite: Consent of instructor). Three hours lecture. Examination of the theoretical and practical issues of public-private partnerships.

PPA 8193. Seminar in Intergovernmental Relations. (3) (Prerequisite: 9 hours of graduate work). Three hours lecture. Examines the current day functioning of the American federal system. Focuses upon...
national-state, national-local, interstate, state-local and interlocal relationships as well as fiscal federalism.

PPA 8400. Public Administration Internship. (1-6) Hours and credits to be arranged. (Prerequisite: Consent of instructor). Individual work experience under faculty guidance in a governmental or public agency. Scholarly paper on approved topic required. Student evaluations are assigned on satisfactory/unsatisfactory basis.

PPA 8703. Government Organization and Administrative Theory. (3) Detailed survey of organization theories and managerial techniques as they relate to the public sector.

PPA 8713. Public Personnel Management. (3) Course considers major developments in the issues and management practices affecting personnel such as affirmative action, unions, and civil service reforms.

PPA 8723. Public Budgeting and Financial Management. (3) Analysis of current financial and budgetary techniques as they apply to the public sector. Capital budgeting, debt administration, and financial management.

PPA 8733. Public Program Evaluation. (3) Techniques and analytical methods of assessing governmental program success. Special emphasis will be given to program designs, data collection and quantitative applications.

PPA 8743. Administrative Law. (3) (Prerequisite: PS 4703/6703). Three hours lecture. An environmental study of the legal nature and effects of policies and attitudes of government toward business, especially the power and limitations of regulatory agencies.

PPA 8793. Directed Research in Public Administration. (3) (Prerequisites: PPA 8803 and special consents). Individual instruction and supervision of research work in public policy and administration.

PPA 8803. Research Methods for Public Affairs. (3) Stress on research designs and methods, survey research and other techniques and measuring data. Focus on applied approaches for mathematically analyzing governmental data. (Same as PS 8803).

PPA 8813. Quantitative Methods for Public Affairs. (3) (Prerequisite: PPA 8803 or PS 8803). Detailed consideration of selected quantitative analytic models and their application to public sector management and policy problems. (Same as PS 8813). (Prerequisites: PPA 8803 or PS 8803).

PPA 8833. Systems in Public Administration. (3) (Prerequisite: BIS 1013, CS 1013, TKT 1273, or equivalent). Three hours lecture. Role of automated, computer-based systems in government; their impact on the workplace, government institutions, and the governmental systems; selected topical applications.

PPA 8903. Public Policy. (3) Nature, determinants, and effects of public goods and services; policy formulation and implementation; seminar emphasizes contemporary issues such as strategic planning, leadership, and managerial control. (Same as PS 8903). (Prerequisite: Consent of instructor). Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

PPA 9909. Special Topics in Public Policy Administration. (1-9) Credit and title to be arranged. This is course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

PPA 9900. Dissertation Research/Dissertation. Hours and credits to be arranged.

PPA 9103. American Political Institutions. (3) (Prerequisite: consent of instructor). Three hours lecture. Seminar addressing theoretical and empirical issues pertaining to the dynamics of American political institutions. (Same as PS 9103).

PPA 9413. Normative Analysis of American Public Policy. (3) Three hours lecture. Seminar exploring issues in American politics and public policy from a normative perspective. (Same as PS 9413). (Prerequisite: Consent of the Instructor). Seminar dealing with principles of democratic theory as they affect the role of government and citizens’ participation in government in rural settings.

PPA 9623. Rural Government Administration II. Implementation Aspects. (3) (Prerequisite: Consent of the Instructor). A seminar dealing with current basic research concerning management in the public sector environment.

PPA 9723. Public Budgeting Processes and Their Policy Implications. (3) (Prerequisite: Consent of Instructor). A seminar dealing with norms and behaviors of budget process participants, their impact on budget policy and implications of budget actions for democratic government.

PPA 9803. Multivariate Analysis and Design for Public Affairs. (3) (Prerequisite: PPA 8813). Seminar dealing with applications of multivariate statistical methods and special topics in research design to problems in public policy and administration.

PPA 9893. American Public Behavior. (3) (Prerequisite: PPA 9803 and consent of instructor). Three hours lecture. Seminar in American political behavior including public opinion, socialization, participation, and voting behavior. (Same as PS 9893).

PPA 9903. Public Policy Formulation and Implementation. (3) (Prerequisite: Consent of Instructor). A seminar dealing with public policy formulation implementation and evaluation which stresses the theoretical aspects of policy processes.
PS 1393. Honors in International Relations. (3) (Prerequisite: Open through invitation only). Honors section of PS 1313.

PS 1513. Comparative Government. (3) Three hours lecture. Survey of various governmental systems.

PS 1593. Honors in Comparative Government. (3) (Prerequisite: Open through invitation only). Three hours lecture. Introduction to comparative political inquiry including developing, democratic and authoritarian political systems.

PS 2203. International Security and Strategic Studies. (3) (Prerequisite: Junior standing or consent of Principal Instructor). Three hours lecture. Survey of the security and strategic interests of the major nuclear powers and weapons technology. Strategic doctrines, arms control and civil defense. (Same as HI 2203).

PS 2403. Introduction to Political Theory. (3) Three hours lecture. An examination of selected thinkers, texts, ideas, and periods in the history of political thought.

PS 2703. Introduction to Public Policy. (3) (Prerequisite: PS 1113 or consent of instructor). Three hours lecture. An examination of the formulation and implementation of public policy and the roles of government institutions and actors in policy making.

PS 2713. Politics of the American Bureaucracy. (3) Three hours lecture. Historical development of governmental organizations. Role of administration, bureaucratic power and regulation, and role of the individual.

PS 2990. Special Topics in Political Science. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

PS 4000. Directed Individual Study. (Prerequisite: Junior standing). Hours and credits to be arranged.

PS 4083. Senior Honors Research in Political Science. (3) (Prerequisite: Senior standing, and consent of department head). Topic to be selected by the student under the guidance of an honors faculty advisor.

PS 4093. Senior Honors Thesis in Political Science. (3) (Prerequisites: PS 4083, and consent of department head). Thesis writing on the topic researched in PS 4083.

PS 4464/4644. Political Analysis. (4) (Prerequisite: 6 hours in political science). Three hours lecture. Two hours laboratory. Philosophical and historical foundations of political analysis; constructing and executing research designs; measuring political phenomena; elementary methods of data analysis; games, models, and simulations.

PS 4900/6990. Special Topics in Political Science. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

American Politics

PS 3013. Political Leadership. (3) Analysis of political leadership, emphasizing characteristics of successful leadership and opportunities available to students for leadership in the political arena.

PS 3033. Gender and Politics. (3) Three hours lecture. Examines gender differences in law, the courts, voting, political involvement, approaches to political power, and violence.

PS 3063 Constitutional Powers. (3) (Prerequisite: Junior standing or consent of instructor). Three hours lecture. A study of the constitutional system; constitutional modification, federal courts and judicial review, separation of the powers, federalism, congressional and presidential powers, and contact clause.

PS 3073. Civil Liberties. (3) (Prerequisite: Junior standing or consent of instructor). Three hours lecture. Political and civil rights; individual rights, national security and individual freedom; war and the Constitution; equal protection, criminal procedure; administrative process.

PS 3183. Law and Politics. (3) (Prerequisite: Sophomore standing or consent of instructor). Three hours lecture. Study of the politics of selected features of the legal system and the political usages of law as a tool for social control.

PS 3193. Intergovernmental Relations. (3) (Prerequisites: PS 1113 and PS 1193). Three hours lecture. Historical, prescriptive, and empirical studies of federalism with emphasis upon recent development in federal-state-local relationships.

PS 4113/6113. State Government. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. Comparative study of the structures, functions, and policies of the various American states.

PS 4163/6163. The Chief Executive. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. Historical and comparative study of chief executives, including governors and mayors, with special emphasis on the Presidency.

PS 4173/6173. Legislative Process. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. Organization, work, and procedures of legislative bodies of other law-making authorities.

PS 4193/6193. Mississippi Judicial System. (3) (Prerequisite: PS 1113). Three hours lecture. A study of the interrelationship of the actors within Mississippi’s judicial system. Emphasis is placed on judicial decision-making, selection process, and resource allocation.

PS 4203/6203. Political Parties and Electoral Problems. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. The development and operation of American political parties, with special attention to electoral problems.

PS 4213/6213. Campaign Politics. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. Survey of the theory of political campaigns, the resources and techniques they employ, and their effects on voters.

PS 4223/6223. The Dynamics of American Democracy. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. Analyzing factors affecting the translation of public opinion into public policy within a national institutional context.

PS 4233/6233. Interest Groups. (3) (Prerequisite: PS 1113 or consent of instructor). Three hours lecture. The study of the politics and practices of interest groups within the American political process.

PS 4253/6253. Southern Politics. (Prerequisites: PS 1113 and junior standing). Three hours lecture. Survey of the politics of the Confederate and border states, examination of party formation, leadership, and impact of the South in national politics.

PS 4263/6263. Mississippi Government and Politics. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. A study of the organization, powers, processes and politics of state government in Mississippi.

PS 4273/6273. African American Politics. (3) (Prerequisite: PS 1113). Three hours lecture. The nature, processes, structures, and functions of African American politics in the domestic arena and international arena.

PS 4283/6283. Public Opinion. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. The nature of public opinion; the influence of the press; pressure groups and propaganda techniques; the means of political communication.

PS 4293/6293. Political Behavior. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. Examination of the foundations and types of individual political activity; emphasis on psychological, social and cultural factors influencing personal political behavior.

PS 4703/6703. Principles of Public Administration. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. Bureaucratic politics and power; administrative responsibility in a pluralist democracy; public administration organization; public personnel administration; and public budgeting.

PS 4743/6743. Environmental Policy. (3) (Prerequisite: PS 1113, PS 2703, or consent of instructor). Three hours lecture. History, development, and practice of environmental policy in the United States.

International Politics

PS 4303/6303. U.S. Foreign Policy. (3) (Prerequisite: PS 1313 or consent of instructor.) Three hours lecture. An examination of the decision-making processes, institutions and structures that influence the formulation and execution of past and current U.S. foreign policy.

PS 4313/6313. Principles of International Law. (3) (Prerequisites: PS 1313 and junior standing). Three hours lecture. The nature, sources and scope of international law as found in custom, international convention, the teachings of authoritative writers, and judicial decisions.

PS 4333/6333. Theories of International Relations. (3) (Prerequisites: PS 1313 and junior standing). Three hours lecture. This course critically examines traditional and contemporary, normative and behavioral, qualitative and quantitative theories of international relations.

PS 4533/6353. International Political Economy. (3) (Prerequisite: PS 1313 or consent of instructor). Three hours lecture. This course will systematically address the relationship between politics and economics in an international context.

PS 4383/6383. National Security Policy. (3) (Prerequisites: PS 1313 and junior standing). Three hours lecture. An examination of those policies and issues affecting American national security with attention to the institutions, organizations and processes which shape them.

PS 4393/6393. The Global Context. (3) (Prerequisite: Junior standing or consent of instructor). Three hours lecture. Examination of selected issues of current importance to international relations.

**Political Theory**

PS 4423/6423. 20th Century Political Thought. (3) (Prerequisites: PS 2403 or consent of instructor). Three hours lecture. An examination of selected thinkers, text, and ideas in the history of political thought from the late 19th Century to the present.

PS 4433/6433. American Political Theory. (3) (Prerequisites: PS 1113 and junior standing). Three hours lecture. Major schools of political thought in America from the colonial to the contemporary period.

PS 4453/6453. Western Political Theory: Plato to Marx. (3) (Prerequisite: PS 1113 or PS 2403). Three hours lecture. Chronological survey of central thinkers, texts, ideas, and movements in Western political thought from Plato to Marx.

**Comparative Politics**

PS 4543/6543. African Politics. (3) (Prerequisites: PS 1513 and junior standing). Three hours lecture. Contemporary sub-Saharan Black Africa: prospects for political development or decay. Role of parties, bureaucracy and military and their relation to elite formation and political integration.

PS 4553/6553. West European Politics. (3) (Prerequisites: PS 1513 and junior standing). Three hours lecture. Governments of countries of Western Europe with emphasis upon England, France, Germany, Italy, and Spain.

PS 4573/6573. South and Southeast Asian Politics. (3) (Prerequisites: PS 1513 and junior standing). Three hours lecture. An evaluation of the traditional and contemporary political institutions, behavior and ideas of the countries of South and Southeast Asia.

PS 4583/6583. East Asian Politics. (3) (Prerequisites: PS 1513 and junior standing). Three hours lecture. Political institutions and behavior in East Asia, particularly China and Japan.

PS 4593/6593. Latin American Politics. (3) (Prerequisites: PS 1513 and junior standing). Three hours lecture. Background, organization, and structure of the governments of the various Latin American countries.

PS 4623/6623. Politics of the Third World. (3) (Prerequisites: PS 1513 and junior standing). Three hours lecture. Political processes of developing nations. Prospects for development and decline considered. Relationship between political, economic and cultural dimension during the process of social change.

**Master of Political Science**

NOTE: See latest Graduate Bulletin for admission information into the Political Science Department’s M.A., M.P.P.A., or Ph.D. graduate programs.

PS 7000. Directed Individual Study. Hours and credits to be arranged.

PS 8000. Thesis Research/Thesis. Hours and credits to be arranged.

PS 8113. Seminar in State Government and Politics. (3) (Prerequisites: PS 4113 and nine hours of related courses, or consent of instructor). Three hours lecture. The examination of selected concepts in the policies, politics, machinery, and/or powers of state government.

PS 8153. Seminar in Campaign Politics. (3) (Prerequisite: Consent of instructor). Analysis of conduct and phases of political campaigns, and their impact on voter and the political system generally.

PS 8203. Seminar in Comparative Government. (3) (Prerequisites: PS 1513 and nine hours of related courses, or consent of instructor). Special research problems dealing with governmental organization and administration in the major nations of the modern world.

PS 8303. Seminar in International Relations. (3) (Prerequisites: PS 1513 and nine hours of related courses, or consent of instructor). Special research dealing with major international problems.

PS 8413. Seminar in Political Theory. (3) (Prerequisites: PS 2403 and nine hours of related courses, or consent of instructor). Three hours lecture. Seminar on selected aspects of political theory from the ancient to the modern period.

PS 8513. Readings in Local Government and Politics. (3) (Prerequisite: Consent of instructor). Reading assigned material in local government and politics and making reports thereon under the supervision of a member of the graduate faculty.

PS 8523. Readings in State Government and Politics. (3) (Prerequisite: Consent of instructor). Reading assigned material in state government and politics and making reports thereon under the supervision of a member of the graduate faculty.

PS 8533. Readings in National Government and Politics. (3) (Prerequisite: Consent of instructor). Reading assigned material in an appropriate subfield of national government and making reports thereon under the supervision of a member of the graduate faculty.

PS 8543. Readings in Comparative Government and Politics. (3) (Prerequisite: Consent of instructor). Reading assigned material in an appropriate subfield of comparative government and making reports thereon under the supervision of a member of the graduate faculty.

PS 8803. Research Methods for Public Affairs. (3) Stress on research designs and methods, survey research and other techniques and analytic approaches for mathematically analyzing governmental data. (Same as PPA 8803).

PS 8813. Quantitative Methods for Public Affairs. (3) (Prerequisite: PS 8803 or PPA 8803). Detailed consideration of selected quantitative analytic models and their application to public sector management and policy problems. (Same as PPA 8813).

PS 8903. Public Policy. (3) Nature, determinants, and effects of political processes and services; formulation and implementation; seminars emphasize contemporary issues such as strategic planning, leadership, and managerial control. (Same as PPA 8903).

PS 8990. Special Topics in Political Science. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

PS 9103. American Political Institutions. (3) (Prerequisite: Consent of instructor). Three hours lecture. Seminar addressing theoretical and empirical issues pertaining to the dynamics of American political institutions. (Same as PPA 9103).

PS 9413. Normative Analysis of American Public Policy. (3) Three hours lecture. Seminar exploring issues in American politics and policy from a normative perspective. (Same as PPA 9413)

PS 9893. American Political Behavior. (3) (Prerequisite: PPA 9803 and consent of instructor). Three hours lecture. Seminar in American political behavior including public opinion, socialization, participation, and voting behavior. (Same as PPA 9893).

Department of PLANT and SOIL SCIENCES
Offices: 117 Dorman Hall
Professors Byrd, Creech, Goatley, Jenkins*, Kingery, Matta, McCarty*, Nagel, Reichert, Reynolds, Rowe*, Shaw, Tatum, Triplett, Varco, and Williams; Associate Professors Baldwin, Cox, DelPrince, Harness, Lang, Reddy and Wallace; Assistant Professors Massey, Meints, Rankings and Stewart;
Instructor McDougald

PSS 1313. Plant Science. (3) Two hours lectures. Two hours laboratory. Scientific principles as the basis for practice in producing, handling, processing, marketing, and utilizing agronomic and horticultural plants.

PS 1393. Honors: Plant Science. (3) (Prerequisite: Open through invitation only). Honors section of PSS 1313.

PSS 2343. Floral Design. (3) Two hours lecture. Two hours studio. The history and appreciation of floral art through exploration of design principles, plant materials, and compositional floral forms.

PSS 2351. Techniques in Flowershop Management. (1) (Prerequisite: PSS 2343). Floral Design). Two hours laboratory. Demonstrations and practice of fundamentals which are essential in the operation of a retail flower shop.
PSS 2423. Plant Materials I. (3) Six hours laboratory. Characteristics, identification and landscape uses of ornamental trees, shrubs, vines, flowers and grasses adapted to Southern conditions.

PSS 2990. Special Topics in Plant and Soil Sciences. (1-9) One hour lecture and consent of Agronomy Faculty. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

PSS 3023. Retail Floristry Operation and Management. (3) (Prerequisites: ACG 2023, MKT 3013). Three hours lecture. To identify and understand the basic principles of retail floristry management and the operation of a florist shop.

PSS 3043. Fruit Science. (3) Three hours lecture. Principles and practices involved in the production of deciduous trees and small fruits. Fall semester.

PSS 3133. Introductory Weed Science. (3) (Prerequisites: BIO 1203, CH 1213 or CH 1053). Three hours lecture. Managing weeds; basic weed biology; methods of controlling weeds; introductory herbicide technology, weed control systems, and the fate of herbicides in the environment.

PSS 3301. Soils Laboratory. (1) (Prerequisite: Prior credit for/or current enrollment in PSS 3303.) Two hours laboratory. Fall and Spring semesters. General treatment of selected phases of the subject matter.

PSS 3303. Soils. (3) (Prerequisite: One semester (preferably two) of inorganic chemistry, CH 1043.) Three hours lecture. Fall and Spring semester. General treatment of all phases of the subject including lime and fertilizers.

PSS 3313. Interior Planting Design and Maintenance. (3) Two hours lecture, two hours laboratory. Identification of plant materials for interior planting and principles of design, installation and maintenance, preparation of cost estimates and maintenance contracts for interior plantings.

PSS 3343. Advanced Floral Design I. (3) (Prerequisite: PSS 2343). One hour lecture. Four hours laboratory. Application of design theory and principles to specific operations encountered in retail floristry.

PSS 3411. Turf Seminar I. (1) One hour lecture. Class discussions with invited turf industry representatives. Topics will include Turf industry overview, turf career opportunities, writing a resume, and job interviews.

PSS 3413. Floristry Internship. (3) (Prerequisites: PSS 2343, PSS 2351 and consent of Retail Floristry Management faculty). Individual work experience in a floral industry enterprise with an approved employer under faculty supervision.

PSS 3421. Turf Seminar II. (1) One hour lecture. Review of turfgrass literature and presentations of scientific articles.

PSS 3423. Agronomy Internship. (3) (Prerequisites: Junior standing and consent of Agronomy Faculty). Individual work experience in an agronomic or environmental organization with an approved employer under faculty supervision. This course may be repeated under approved conditions.

PSS 3433. Horticulture Internship. (3) (Prerequisite: Consent of the Floriculture and Ornamental Horticulture faculty). Individual work experience in a horticulture or allied industry organization with an approved employer under faculty supervision. This course may be repeated under approved conditions.

PSS 3443. Advanced Floral Design II. (3) One hour lecture. Four hours laboratory. Application of design theory and principles to non-perishable, dried, and preserved floral products.

PSS 3473. Plant Materials II. (3) (Prerequisite: PSS 2423). Six hours laboratory. Continuation of PSS 2423.

PSS 3511. Seminar. (1) (Prerequisite: Nine credits in horticulture). One hour lecture. Review of horticultural literature, and presentation and discussion of scientific articles.

PSS 3923. Plant Propagation. (3) (Prerequisite: BIO 1203). Two hours lecture. Two hours laboratory. Basic principles in the propagation of horticultural plants. Spring semester.

PSS 4000. Directed Individual Study. Hours and credits to be arranged.

PSS 4103/6103. Forage and Pasture Crops. (3) Two hours lecture. Two hours laboratory. Fall semester. Origin, uses, and ecology of forage crops. Establishment, nutritive value, use, yield and maintenance of forage crops as related to morphology, physiology and pasture management.

PSS 4123/6123. Grain Crops. (3) (Prerequisite: Junior standing). Two hours lecture. Two hours laboratory. Spring semester, odd-numbered years. Corn, soy, grain, practice in commercial grading given in laboratory.

PSS 4133/6133. Fiber and Oilseed Crops. (3) (Prerequisite: Junior standing). Three hours lecture. Spring semester. Production and utilization of fiber and oilseed crops. Emphasis on cotton and soybean production in Mississippi.

PSS 4143/6143. Advanced Fruit Sciences. (3) (Prerequisite: PSS 3043 or equivalent). Three hours lecture. Three hours laboratory. A study of the latest advances in pomology and interpretation of recent research findings and their application to modern fruit growing. Spring semester, odd years.

PSS 4213/6213. Seed Analysis and Lab Practices. (3) (Prerequisite: BIO 4203/6203). One hour lecture. Four hours laboratory. Fall semester, even years. Principles and practices, special emphasis on production of variously processed seed; agronomic factors in harvesting, drying, storage, treating and marketing seed.

PSS 4223/6223. Seed Production. (3) (Prerequisite: Junior standing). Two hours lecture. Two hours laboratory. Fall semester, odd years. Principles and practices of seed production. Principles and practice of seed, crop and soil laboratory and special tests for seed quality, maintenance of seed viability, and seed quality control system.

PSS 4253/6253. Seed and Grain Conditioning and Storage. (3) (Prerequisite: Senior standing). Two hours lecture. Two hours laboratory. Fall semester. Physical and biological principles involved in the conditioning and storage of seed and grain with emphasis on systems used, conditioning procedures, nutritional composition, and storage requirements.

PSS 4263/6263. Viticulture. (3) (Prerequisite: PSS 3043). Three hours lecture, field trips. Grapes and muscadines emphasized. Vineyard construction, growth, development, morphology and physiology of grapevines and fruit composition and maturation. Spring semester, even years.

PSS 4313/6313. Soil Fertility and Fertilizers. (3) (Prerequisites: PSS 3303 and Junior standing). Three hours lecture. Four hours laboratory. Soil microorganisms and their importance in ammonification, nitrification, and other biological processes. (Same as BIO 4324)

PSS 4323/6323. Soil Classification. (3) (Prerequisite: PSS 3043). Three hours lecture. Fall semester. Odd-numbered years. Origin, development, and classification of soils including identification and field mapping.

PSS 4333/6333. Soil Conservation and Land Use. (3) (Prerequisite: PSS 3303). Two hours lecture. Three hours laboratory. Fall semester. Soil identification, topographic relationships and soil-water resources; their characteristics, quality, suitability, and management; conservation practices; using soil maps to determine land use.

PSS 4343/6343. Greenhouse Management. (3) (Prerequisites: BIO 1203 and PSS 3303 and PSS 3301). Two hours lecture. Two hours laboratory. A detailed review and explanation of principles and practice of greenhouse operation and management. Fall semester.

PSS 4353/6353. Arboriculture and Landscape Maintenance. (3) Two hours lecture. Two hours laboratory. Care of ornamental trees and shrubs, including pruning, braces, surgery, transplanting, and fertilization.

PSS 4363/6363. Nursery Management. (3) (Prerequisites: PSS 3923, PSS 2423, and PSS 3473). Two hours lecture. Two hours laboratory. The production and handling of ornamental nursery stock. Spring semester, even-numbered years.

PSS 4373/6373. Geospatial Agronomic Management. (3) (Prerequisites: PSS 3303 and PSS 3133). Two hours lecture. Three hours laboratory. This class will utilize the basic tools of geographical information systems and geographical positioning systems technologies to analyze agronomic case studies.

PSS 4411-4441/6411-6441. Remote Sensing Seminar. (1) (Prerequisite: Junior standing). One hour lecture. Lectures by remote sensing experts from industry, academia, and governmental agencies on next-generation systems, applications, and economic and societal impact of remote sensing.

PSS 4414/6414. Turf Management. (4) (Prerequisite: Junior Standing). Three hours lecture. Two hours laboratory. Comprehensive study of turfgrasses, their establishment, and the varied management strategies employed for golf and sports turf, home lawns and commercial turf, and sod production.
PSS 4423/6423. Golf Course Operations. (3) (Prerequisite: PSS 4414/4414). Two hours lecture. Two hours laboratory. Fall semester. Scheduling maintenance practices, golf course construction and renovation with emphasis on operation and care of specialized turf equipment.

PSS 4433/6433. Plant Biotechnology for Teachers. (3) (Prerequisite: Secondary Science Education Major of consent of Instructor). Three hours lecture. An introduction to various aspects of plant biotechnology including tissue culture, genetics and molecular biology with practical laboratory application.

PSS 4443/6443. Athletic Field Management. (3) (Prerequisite: PSS 3303, PSS 4414, or consent of instructor). Two hours lecture. Two hours laboratory. A comprehensive study of athletic fields, including construction, maintenance, renovation and management. Emphasis will be placed on interactions between soil properties and sports turf performance.

PSS 4444/6444. Plant Tissue Culture. (4) (Prerequisite: BIO 4214 and CH 1053 or equivalent). Three hours lecture. Three hours laboratory. A comprehensive study of plant cell, tissue and organ culture with emphasis on practical applications of tissue culture in various areas of plant science.

PSS 4453/6453. Vegetable Production. (3) (Prerequisite: PSS 3303 and PSS 3301 or BIO 4204). Two hours lecture. Two hours laboratory. Principles and practices of commercial vegetable production.

PSS 4483/6483. Intro to Remote Sensing Technologies. (3) (Prerequisite: PO 3101 and PSS 4443 or consent of instructor). Three hours lecture. Electromagnetic interactions, passive sensors, multispectral and hyperspectral optical sensors, active sensors, imaging radar, SAR, Lidar, digital image processing, natural resource applications (Same as AES 4424 and ABE 4434). seen years. Utilization systems for forage crops in Mississippi; morphology and physiology of grasses and legumes; emphasis on identification through floral characteristics; interpretation of forage research.

PSS 8123. Crop Ecology. (3) (Prerequisite: BIO 4213/6213 or consent of instructor). Three hours lecture. Spring semester, even-numbered years. The geographical distribution, use, and adaptation of field crops as influenced by soil, climate, and other environmental factors.

PSS 8163. Environmental Plant Physiology. (3) Three hours lecture. Spring semester, even-numbered years. The influences of physical factors of the environment on growth and development of crop plants.

PSS 8203. Seed Physiology. (3) (Prerequisite: PSS 4243/6243 or approval of instructor). Three hours lecture. Spring semester, even years. Physiology of seed maturation, germination, dormancy, and deterioration; relation of seed quality to growth and development of plants.

PSS 8303. Soil Genesis and Classification. (3) (Prerequisite: PSS 4233). Two hours lecture. Three hours laboratory. Fall semester, odd-numbered years. Advanced study of the development, classification and distribution of soils; special emphasis on the morphology of soils of the great soil groups.

PSS 8314. Clay Mineralogy. (4) (Prerequisite: Approval of instructor). Two hours lecture. Four hours laboratory. Spring semester, even-numbered years. Crystal structure and reaction mechanisms of clay minerals weathering. X-ray diffraction, thermal, and chemical studies of clay minerals.

PSS 8323. Advanced Soil Chemistry. (3) (Prerequisite: CH 4413 and preferably CH 4423 or approval of instructor). Three hours lecture. Spring semester, odd-numbered years. Application of the fundamental laws of colloid chemistry to inorganic and organic soil colloids with special emphasis on chemical equilibria, cation exchange, Gouy-Chapman theory and electrokinetics.

PSS 8333. Advanced Soil Fertility. (3) (Prerequisite: Graduate standing). Two hours lecture. Three hours laboratory. Fall semester, even-numbered years. Advanced course in soil fertility; special emphasis on all soil conditions affecting plant growth. Experimental techniques in plant nutrition and in soil fertility will be utilized.

PSS 8343. Soil Physics. (3) (Prerequisite: PSS 4613/6613 or consent of instructor). Three hours lecture. Fall semester, odd-numbered years. Analysis of experiments and insect studies using computer programs. Study of physical system with special emphasis on transport phenomena and the physical characteristics of soils.

PSS 8511. Seminar. (1) (Prerequisite: Graduate standing). One hour lecture. Review of scientific literature and presentation of scientific papers.

PSS 8513. Advanced Plant Breeding. (3) (Prerequisite: PSS 4503/6503 or equivalent). Three hours lecture. Fall semester, even-numbered years. An intensive review of methods of plant improvement and the application of these methods to modern plant breeding.(Same as GNS 8113.)

PSS 8523. Nutrition of Horticultural Plants. (3) (Prerequisites: PSS 3303 and PSS 3301 and BIO 4214/6214 or equivalent). Three hours lecture. Principles of mineral nutrition applied to diverse horticultural crops.

PSS 8533. Genetic Variation. (3) (Prerequisite: PO 3101 and PSS 4503/6503). Three hours lecture. Spring semester, even-numbered years. Sources of genetic variation and gene conservation in plants. (Same as GNS 8533.)

PSS 8543. Biometrical Genetics in Plant Breeding. (3) (Prerequisites: PSS 4503/6503 and ST 8114). Three hours lecture. Spring semester, odd-numbered years. Analysis and interpretation of experiments for evaluation of hereditary parameters. Emphasis on mating designs, heritability, and genotype x environment interactions in plant breeding. (Same as GNS 8143.)

PSS 8553. Plant Growth and Development. (3) (Prerequisites: BIO 4214/6214 and CH 2503). Three hours lecture. Auxins, gibberellins, and other growth regulating substances, photoperiodism, thermoperiodicity. Fall semester, odd-numbered years.

PSS 8554. Plant Genetic Engineering. (4) (Prerequisite: PSS 6444 or PSS 6443 and BCH 6713). Two hours lecture. Four hours laboratory. A study of molecular techniques, product development, application-
PSY 8563. Post-Harvest Physiology of Horticultural Plants. (3) (Prerequisites: Organic Chemistry and BIO 4214/6214 or equivalent). Three hours lecture. The nature, evaluation, and control of chemical and physiological changes that occur after harvest of horticultural products.

PSY 8573. Morphology of Horticultural Plants. (3) (Prerequisite: BIO 4204/6204). One hour lecture. Four hours laboratory. Development of the floral and vegetative organs of horticultural plants. Fall semester, even-numbered years.

PSY 8613. Methods of Horticultural Research. (3) (Prerequisite: Graduate standing). One hour lecture. Four hours laboratory. Techniques and instrumentation in plant research.

PSY 8634. Environmental Fate of Herbicides. (4) (Prerequisites: CH 4513/6513, PSS 4813/6813). Three hours lecture. Three hours laboratory. Fate of herbicides, including drift volatility, adsorption/desorption, leaching, runoff, microbial, chemical, and photolytic degradation, and plant metabolism, environmental factors that influence these processes.

PSY 8645. Field Applications of Weed Sciences Principles I. (5) (Prerequisite: PSS 6633 and PSS 6813 or consent of instructor). Three hours lecture. Four hours laboratory. Field weed identification; herbicide symptomology; problem solving in cotton, soybean, and vegetables; equipment application calibration.

PSY 8655. Field Applications of Weed Science Principles II. (5) (Prerequisite: PSS 8464 or consent of instructor). Three hours lecture. Four hours laboratory. Field weed identification; herbicide symptomology; problem solving in turf, field corn, rice, sorghum and pastures; application equipment calibration.

PSY 8701-8791. Current Topics in Weed Science. (1) (Prerequisites: Graduate standing, PSS 4813/6813 or consent of instructor). Lecture, discussion and readings in selected areas of current interest in weed science. Maximum total credits in graduate program allowed, 4 hours-M.S.; 6 hours-Ph.D.

PSY 8724. Herbicide Physiological and Biochemistry. (4) (Prerequisites: PSS 4813/6813, BIO 4214/6214 and CH 4513/6513 or consent of instructor). Three hours lecture. Three hours laboratory. Herbicide, growth regulator and allelochemical chemistry, mode of action, and effects on plants and plant constituents: fate/persistence of herbicides in the environment. Fall semester, odd-years.

PSY 8811-8831. Seminar. (1) (Prerequisite: Graduate standing). Review of literature on assigned topics; preparation of formal papers and presentation of them at staff seminars.

PSY 8990. Special Topics in PSS. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

PSY 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

PSY 4223/6223. Drug Use and Abuse. (3) (Prerequisite: PSY 1013). Three hours lecture. Study of basic principles of drug use and abuse. Includes an introduction to psychopharmacology and basic treatment strategies.

PSY 4323. History of Psychology. (3) (Prerequisite: PSY 1013 and junior standing). Three hours lecture. A discussion of people, events, and theoretical and empirical contributions relevant to development of psychology.

PSY 4333. Introduction to Clinical Psychology. (3) (Prerequisites: PSY 3213 and PSY 3313 or consent of instructor). Three hours lecture. Survey of basic sensory mechanisms and perceptual phenomena. Sensory mechanisms reviewed will include vision, audition, olfaction, gustation, and touch with emphasis on vision and audition.

PSY 4523/6523. Industrial Psychology. (3) (Prerequisite: PSY 1013). Three hours lecture. Applications of psychological principles and methods to industry emphasizing employee selection, placement, merit rating, training, human relations, and measurement and improvement of employee morale.

PSY 4633/6633. Social Intervention. (3) (Prerequisite: PSY 3623 or consent of instructor). Three hours lecture. Examination of how people perceive, categorize, and reason about other people and themselves.

PSY 4643/6643. Social Cognition. (3) (Prerequisite: PSY 3623 or consent of instructor). Three hours lecture. Examination of how people perceive, categorize and reason about other people and themselves.

PSY 4653/6653. Cognitive Science. (3) (Prerequisite: CS 4633/6633 or PSY 4713 or PH 4143/6143 or AN 4623/6623 or EN 4463/6463). Three hours lecture. The nature of human cognition from an interdisciplinary perspective, primarily utilizing a computational model, including insights from philosophy, psychology, linguistics, artificial intelligence, anthropology, and neuroscience. (Same as CS 4653/6653).

PSY 4713/6713. Language and Thought. (3) Three hours lecture. Review of current research and theories of the symbolic process, concept formation, problem solving and language development.

PSY 4723/6723. Psycholinguistics. (3) (Prerequisite: PSY 4713/6713 or consent of instructor). Three hours lecture. Language production and comprehension, conversational interaction, language acquisition.

PSY 4733/6733. Memory. (3) Three hours lecture. (Prerequisite: PSY 1013). Introduction to theoretical and practical aspects of memory. Discussion of laboratory memory, computer models of memory, memory self-concepts, everyday memory, and clinical memory problems.

PSY 4726. Internship in Psychology I. (6) (Prerequisite: Consent of instructor). A minimum of twenty hours per week of professional experience in a human service or other field setting. One hour of seminar and group supervision.

PSY 4736. Internship in Psychology II. (6) (Prerequisite: Consent of instructor). A minimum of twenty hours per week of professional experience in a human service or other field setting. One hour of seminar and group supervision.

PSY 4743/6743. Psychology of Human-Computer Interaction. (3) (Prerequisites: PSY 3713 or CS 4663/6663 or IE 4113/6113 or consent of the instructor). Two hours lecture. Two hours laboratory. Exploration of psychological factors that interact with computer interface usage. Focus on design techniques and usability evaluation methods are emphasized. (Same as CS 4743/6743 and IE 4123/6123).

PSY 4903/6903. Seminar in Psychology. (3) (Prerequisite: PSY 1013). In-depth examination of particular topics of current interest to faculty and students. Critical evaluation of current research.

PSY 4983/6983. Psychology of Aging. (3) (Prerequisite: PSY 1013). Three hours lecture. A description and analysis of the development and changes occurring in individuals from early adulthood through late life.

PSY 4990/6990. Special Topics in Psychology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

PSY 7000. Directed Individual Study. Hours and credits to be arranged.

PSY 8000. Thesis Research and Thesis. Hours and credits to be arranged.

PSY 8214. Quantitative Methods in Psychology II. (4) (Prerequisite: PSY 3103). Three hours lecture. Three hours laboratory. Advanced experimental design and methods with emphasis on analysis of variance.

PSY 8223. Systems and Theories of Psychology. (3) (Prerequisite: PSY 4323/6323). Three hours lecture. Study of the basic systems and theories relevant to current psychology.

PSY 8313. Developmental Psychology. (3) (Prerequisite: PSY 3803). Three hours lecture. Human growth processes and related developmental tasks in areas such as creative ability, language, social competency, and bodily fitness.

PSY 8323. Psychopathology. (3) (Prerequisites: PSY 3213). In-depth coverage of contemporary systems and biological, psychological, and social theories of the etiology of psychological disorders.

PSY 8333. Systems of Psychotherapy. (3) (Prerequisite: Consent of instructor). Three hours lecture. A comparative introduction to the theories, techniques, and outcomes of major approaches to psychotherapy.

PSY 8353. Intelligence Testing. (3) (Prerequisite: Consent of instructor). Two hours lecture. Two hours practicum. Administration, scoring and interpretation of the standard psychometric instruments used in evaluating individual intellectual functioning.

PSY 8363. Personality Appraisal. (3) (Prerequisite: PSY 8323). One hour lecture. Two hours practicum. Administration, scoring and interpretation using standard self-report and projective methods of individual personality assessment. Current research is also explored.

PSY 8383. Behavior Therapy. (3) (Prerequisite: Consent of instructor). Three hours lecture. Current theories and learning models; methods and results of experimental studies of human and animal learning.

PSY 8403. 8413. Seminar. (3) (Prerequisite: Consent of department head required of all nonpsychology students). Exploration of current research and theoretical positions in selected areas of psychology.

PSY 8454. 8464. Professional Practicum. (4) (Prerequisite: Department consent). A minimum of 300 hours per semester of supervised professional psychological experience in an appropriate setting.

PSY 8503. Learning. (3) (Prerequisite: PSY 3343). Three hours lecture. Current theories and learning models; methods and results of experimental studies of human and animal learning.

PSY 8513. Psychological Research. (3) (Prerequisite: PSY 3313). Three hours lecture. Practicum in the techniques of planning and execution of various areas of psychological research.

PSY 8533. Introduction to Clinical Practicum in Psychology. (3) (Prerequisite: Consent of instructor). One hour lecture. Two hours practicum. Intensive introduction to clinical interviewing, as well as the research literature in clinical psychology.

PSY 8573. Psychopharmacology. (3) (Prerequisites: PSY 4403 and PSY 8323). Three hours lecture. Overview of research on pharmacological and combined treatments for psychological disorders. Emphasis is placed on psychological disorders in adulthood.

PSY 8613. Advanced Social Psychology. (3) (Prerequisite: PSY 3623). Three hours lecture. Examination of research and theories of attraction and liking. Emphasis upon reinforcement theory, gain-loss theory, and dissonance theory.

PSY 8703. Personnel Psychology. (3) (Prerequisite: Consent of instructor). Three hours lecture. Study of the methods and principles of psychology as applied to work setting design, personnel management, and organizational behavior with special emphasis on personnel psychology.

PSY 8713. Issues and Methods in Cognitive Psychology. (3) (Prerequisite:Graduate Standing). Three hours lecture. Exploration of theoretical issues and research methods in current Cognitive Psychology.

PSY 8723. Cognitive Models of Skill. (3) (Prerequisite: Graduate standing). Three hours lecture. Introduction to cognitive modeling, with a
focus on computational models of skill acquisition and expert skill (Same as CS 8613).

PSY 8803. Advanced Quantitative Methods for Industrial/Organizational and General Psychology. (3) (Prerequisites: PSY 8214). Three hours lecture. Study of advanced analytic and multivariate quantitative methods applied to contemporary problems and research in industrial/organizational and general psychology.

PSY 8990. Special Topics in Psychology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

RADIO — T.V. — FILM
(See Communication)

READING EDUCATION
(See Elementary Education)

RDG 2990. Special Topics in Readings. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses.

RDG 3113. Foundations of Literacy. (3) (Prerequisite: Admission to Teacher Education). Three hours lecture. Foundations of literacy learning and teaching; emergent literacy.

RDG 3213. Teaching of Literacy. (3) (Prerequisite: RDG 3113). Three hours lecture. Literacy teaching and learning for upper elementary and middle school.

RDG 3313. Practicum: Diagnosis and Remediation of Reading Disability. (3) (Prerequisite: RDG 3213). The supervised diagnostic teaching of reading in a public school setting.

RDG 3513. Developing Reading Strategies in the Secondary School Content Areas. (3) Basic theories and techniques needed by content area teachers for teaching reading to secondary school students.

RDG 4113/6113. Teaching Reading in the Middle School. (3) (Prerequisite: RDG 3113). Three hours lecture. Theory and applied methods, techniques, and analysis of reading strategies for the adolescent learner (ages 10-15) in the middle school.

RDG 4990/6990. Special Topics in Readings. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses.

RDG 8153. Psychology of Reading. (3) Three hours lecture. Analysis of reading patterns; conditions favorable and unfavorable to progress in reading skill; the readiness concept; problems of levels. Prevention and correction of reading handicaps.

RDG 8413. Reading in the Public Schools. (3) Three hours lecture. Materials and methods employed in individual and group procedures for the teaching of reading in public schools.

RDG 8453. Research in Reading. (3) Three hours lecture. The function of research in the development of reading programs; contribution of research to reading.

RDG 8573. Diagnosis of Reading Problems. (3) The selection, utilization and interpretation of instruments used to diagnose disability and outline remedial procedures.

RDG 8593. Issues and Innovations in Reading. (3) Issues and innovations related to trends, methodology, and materials in the teaching of reading.

RDG 8713. Practicum: Remedial Reading. (3) Three hours lecture. Methods of identifying and diagnosing deficiencies in children’s reading skills; remedial measures, improvement and evaluation.

RDG 8990. Special Topics in Readings. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses.

RELIGION
(For departmental information, see PHILOSOPHY and RELIGION.)

REL 1103. Introduction to Religion. (3) Three hours lecture. Religion seen as a human search for meaning in life or response to the holy. Studied through basic structures and modes of expression.

REL 1213. Introduction to the Old Testament. (3) Three hours lecture. A survey of Old Testament literature with attention to archaeological findings and the cultural setting.

REL 2990. Special Topics in Religion. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

REL 3123. Philosophy of Religion. (3) (Prerequisite: Three hours of philosophy). Three hours lecture. A critical inquiry into the rational justification of central theistic beliefs, with emphasis on the traditional philosophical arguments for and against the existence of God. (Same as PHI 3123).

REL 3203. The Prophets of Ancient Israel. (3) Three hours lecture, seminar. A study of the message and function of prophetic traditions within ancient Israel and in contemporary ancient Near Eastern societies.

REL 3223. World Religions: Part II. (3) Three hours lecture. A history and comparative study of beliefs and the cultural impact of the great theistic religions of the West.

REL 3333. Society and Religion. (3) Three hours lecture. Religion, as an institution. Examines the social origins of religion and its functions, both positive and negative, in social movements, social control and politics. (Same as SO 3333).
REAL ESTATE and MORTGAGE FINANCING
Office: 315 McCool Hall
(For departmental information, see FINANCE and ECONOMICS)

REM 2990. Special Topics in Real Estate & Mortgage Finance. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

REM 3253. Real Property Evaluation (Appraisal). (3) (Prerequisite: REM 3333 or consent of instructor). Three hours lecture. Methods, evaluation procedures, and techniques of appraising commercial and residential real property under various value-influencing conditions; case problems for appraisal.

REM 3333. Principles of Real Estate. (3) (Prerequisite: Junior standing). Three hours lecture. A survey of the activities involved in the acquisition, transfer, operation, and management of real estate.

REM 3353. Real Estate Finance. (3) (Prerequisites: REM 3333 or consent of instructor). Three hours lecture. Direct investment in real estate. Sources of funds; risk analysis; typical policies and procedures of investing and financing investment real estate.

REL 7000. Directed Individual Study. Hours and credits to be arranged.

REL 8990. Special Topics in Religion. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

Department of SOCIOLOGY, ANTHROPOLOGY, and SOCIAL WORK
Office: 200 Bowen Hall
Professors Emeriti Baird, Bryant, Estes, Marshall, Saunders, Sollie, Swain, Thomas and Wells;
Professors Emeriti: Baird, Bryant, Estes, Marshall, Saunders, Sollie, Swain, Thomas and Wells;
Distinguished Professor: C. Rent
Professors Bluhm, Cosby, Frese, Gill, Howell, Jones, Levin (Head), Rafferty, G. Rent, and Seger;
Associate Professors Bartkowski, Boyd, Crudden, Dunaway, Hogue, Ray, Wood, Woodrow-Lafeld, Wood and Xu;
Assistant Professors Blanchard, Burson, Cossman, Kerley, Lee, Loewe, Parisi, and Peacock

SO 1003. Introduction to Sociology. (3) Three hours lecture. The nature and development of culture; social aspects of personality; analysis of community life, population trends, social classes, institutions, processes, and organization; culture change.

SO 1093. Honors Introduction to Sociology. (3) (Prerequisite: Open through invitation only). Three hours lecture. The nature and development of culture; social aspects of personality; analysis of community life, population trends, social classes, institutions, processes, and organization; culture change.

SO 1103. Contemporary Social Problems. (3) Three hours lecture. Analysis of problems related to: life cycle, sexuality, family disruptions, health, illness, death and dying, addictions, crime, minorities, population trends, social classes, institutions, processes, and organization; culture change.

SO 1173. Introduction to Gender Studies. (3) Three hours lecture. An introduction to theoretical concepts in Gender Studies. This course will examine the influence of the women’s movement on the academic development of Gender Studies (Same as AN 1173 and WS 1173).

SO 1203. Marriage and Family. (3) Three hours lecture. A study of dating, mate selection, marriage and parenthood, with emphasis on the contemporary American family.

SO 2203. Cultural and Racial Minorities. (3) (Prerequisite: Three hours in an introductory social science). Three hours lecture. Origins of minority groups and racial attitudes. Biological and cultural concepts of race and minority groups; problems of adjustment in intercultural and multiethnic societies. (Same as AN 2203).

SO 2990. Special Topics in Sociology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

SO 3003. Social Inequality. (3) (Prerequisite: SO 1003). Three hours lecture. Investigates the nature, causes, and consequences of social inequality and stratification, the relationships among class, race, and gender inequalities in cross-cultural perspective.

SO 3013. Society and the Individual. (3) (Prerequisite: SO 1003). Three hours lecture. A study of interrelationships between society and the individual. Emphasis is placed on the structural aspects of socialization and the social construction of reality.

SO 3053. Organizations in Modern Society. (3) (Prerequisite: SO 1003). Three hours lecture. Examines the nature and types of formal organizations, their impact on, and outcomes for, individuals and society; organizational structures, processes, environments and effectiveness.

SO 3103. Social Theory I. (3) (Prerequisite: Nine hours of sociology, CS 1013 or equivalent and junior standing). Lecture course. Study of European and American sociological theory—intellectual antecedents as well as social-cultural context.

SO 3213. Introduction to Social Research. (3) (Prerequisites: Nine hours of sociology and junior standing). Three hours lecture. A survey of the general field of research and methodology, including an examination of the various types of research designs, techniques, and procedures.

SO 3303. Rural Sociology. (3) (Prerequisite: Six hours of social science or consent of instructor). Three hours lecture. A study of rural society, its organizations, agencies, institutions, population trends and composition, patterns of settlement, social processes, and changing character.

SO 3313. Deviant Behavior. (3) (Prerequisite: SO 1103 or its equivalent or consent of instructor). Three hours lecture. Introduction to the social and cultural factors related to human deviance. Special attention is given to the study of various theories of deviance.

SO 3323. Contemporary Woman. (3) Three hours lecture. Introductory course for the Concentration in Women’s Studies. Major topics are women’s heritage, identity, culture, and vulnerabilities.

SO 3333. Society and Religion. (3) Three hours lecture. Religion as an institution. Examines the social origins of religion and its functions, both positive and negative, in social movements, social control and politics. (Same as REL 3333).

SO 3343. Gender, Crime, and Justice. (3) Three hours lecture. Gender differences in criminal behavior, victimization, and criminal justice processing, emphasizing the unique experiences of women in all of these areas. (Same as COR 3343).

SO 3503. Violence in the United States. (3) Three hours lecture. An in-depth study of violence, including types of violence, categories of offenders and victims, its social causes, and potential solutions. (Same as COR 3503).

SO 3603. Criminology. (3) (Prerequisites: SO 1103 and 3313 or equivalent or consent of instructor). A study of the causes of crime, organized crime, psychopathology, social control, law enforcement, and crime prevention programs.

SO 3901. Seminar in Sociology. (1) (Required of all senior majors). Lectures and reports. Critical evaluation of current research and theoretical writings.
SO 3913. Industrial Sociology. (3) (Prerequisite: SO 1003). Three hours lecture. The work group as a social group; the formal and informal organization; the roles of management.

SO 4000. Directed Individual Study. Hours and credits to be arranged.

SO 4113/6113. Social Organization and Change. (3) (Prerequisites: SO 1003 and junior standing). Three hours lecture. An intensive examination of recent research focusing on the prediction, explanation and control of social change with attention to trends in developing countries.

SO 4123/6123. Poverty Analysis: People, Organization and Prejudice (Prerequisites: SO 1003 and junior standing). Three hours lecture. Historical perspectives; problems of definition and measurement; socio-cultural situations contributing to deprivation; delineation of poverty groups; social consequences of poverty; poverty programs and organizations.

SO 4173/6173. Environment and Society. (3) (Prerequisite: AN 1103 or SO 1003 or consent of instructor). Three hours lecture. A study of the interaction between human society and the environment including the social aspects of environmental problems. (Same as AN 4173/6173).

SO 4203/6203. The Family in the United States. (3) (Prerequisite: SO 1203). Three hours lecture. A study of the American family as an institution, with emphasis on change and interrelationships with other institutions.

SO 4223/6223. Comparative Family Systems. (3) (Prerequisite: SO 1203). Three hours lecture. A systematic study of family patterns in selected cultures of the world.

SO 4233/6233. Juvenile Delinquency. (3) (Prerequisite: SO 3063 or equivalent). Three hours lecture. Critical study of problems, causes, ways of handling; attitudes, roles and relationships of persons involved, including youthful offender, social worker, court and law enforcement officials. (Same as COR 4233/6233).

SO 4273/6273. Sociology of Education. (3) (Prerequisites: SO 1003 and junior standing). Three hours lecture. A sociological study of urban areas emphasizing the processes of population, environment, technology and social organization.

SO 4303/6303. Urban Sociology. (3) (Prerequisites: SO 1003 and junior standing). Three hours lecture. A sociological and ecological study of urban areas emphasizing the processes of population, environment, technology and social organization.

SO 4313/6313. Contemporary Muslim Societies. (3) (Prerequisites: Any 1000-level sociology or religion course or consent of instructor). Three hours lecture. An examination of Islamic civilization. Muslim sectarianism, social organization and change, the individual and family, education, political and economic orders, Muslims and the world. (Same as REL 4313/6313).

SO 4333/6333. Sociology of Sport. (3) (Prerequisites: SO 1003 and junior standing). Three hours lecture. Examination of sport as a social institution in American society, its contributions to society and to participants.

SO 4403/6403. Sex Roles and Gender. (3) (Prerequisites: SO 1003, or approval of instructor). Three hours lecture. Changing sex roles in theory and reality, social problems associated with gender, and probable future realities of the female-male relationships.

SO 4413/6413. Aging and Retirement in American Society. (3) (Prerequisites: Nine hours of sociology or related disciplines). Three hours lecture. A study of the social and economic aspects of aging and of the social problems in American society related to the aged and retired groups.

SO 4623/6623. Language and Culture. (3) (Prerequisite: AN 1103 or consent of instructor). Three hours lecture. Examination of language as a source of knowledge about other aspects of culture, and a social behavior. (Same as AN 4623/6623 and EN 4623/6623).

SO 4633/6633. Sociolinguistics. (3) (Prerequisites: SO 1003, or consent of instructor). Three hours lecture. Examination of relationship between language and society, and how, when, and why people in speech communities use language varieties. (Same as AN 4633/6633 and EN 4633/6633).

SO 4703/6703. Population Problems and Processes. (3) (Prerequisite: SO 1003 or consent of the instructor). Three hours lecture. World population growth and its consequences, population change and national policies, family planning, recent U.S. population trends, basic demographic measurement, the demographic report.

SO 4803. Social Research Practice. (3) (Prerequisite: SO 3213 or equivalent). Three hours lecture. Practical application of sociological analysis and methods conducting social research projects. Includes selection of methods and analytical techniques, data collection, ethics, and report writing.

SO 4713/6713. Methods in Population Research. (3) Review and evaluation of censuses, vital statistics, and demographic surveys and their uses, with emphasis on measurement, methods, and analytical techniques.

SO 4733/6733. Community: Organization and Relationships. (3) (Prerequisites: SO 1003 and junior standing). Three hours lecture. Rural-urban approach to community; types of local societies and community organizations; perspectives in community study.

SO 4990/6990. Special Topics in Sociology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

SO 7000. Directed Individual Study. Hours and credits to be arranged.

SO 8000. Thesis Research Thesis. Hours and credits to be arranged.

SO 8113. Graduate Theory II. (3) Focus on post-19th century theory and antecedents. Delineation of the basic postures in the discipline and relative relationships of these postures to theory development.

SO 8213. Research Design. (3) (Prerequisite: SO 8274). Three hours lecture. Emphasis on overall design, plan, structure, and strategy. Also limitations of theory, measurement, sampling and statistical testing in research.

SO 8223. Techniques of Survey Research. (3) (Prerequisite: SO 8213). Schedule construction, sampling, field procedures, techniques of analysis, presentation of statistical materials.

SO 8233. Qualitative Analysis. (3) (Prerequisite: SO 8213). Three hours lecture. Qualitative approaches to understanding social behavior. Exposure to all phases of qualitative research: epistemology, design, field work, ethics, and writing research results.

SO 8274. Graduate Social Statistics I. (4) (Prerequisite: ST 2113 or equivalent). Three hours lecture. Two hours laboratory. Probability, hypothesis testing, tests of means and proportions, contingency table analysis, analysis of variance, bivariate linear regressions correlation; data analysis and interpretation using current statistical software.

SO 8284. Graduate Social Statistics II. (4) (Prerequisite: SO 8274). Three hours lecture. Two hours laboratory. Hypothesis testing, analysis of variance, multiple linear regression and correlation, causal models, exploratory factor analysis; data analysis and interpretation using current statistical software.

SO 8293. Structural Equations Modeling with Latent Variables in Sociology. (3) (Prerequisites: SO 8284 or equivalent). Three hours lecture. The application of structural equation modeling techniques to sociological problems containing unobserved variables, focusing on estimation and interpretation of model parameters with errors of measurement.

SO 8323. Strategies and Tactics of Planned Change. (3) (Prerequisites: Six hours in the social sciences). Three hours lecture. Study of models of social action: historical bases and types of planned change; case studies in planned change; roles of change agents. Emphasis on application.

SO 8343. Complex Organizations. (3) Theory and research in organizations. Nature and types of organizations; determinants and consequences of organizational growth; organizational effectiveness; production, authority, and control systems in organizations.

SO 8403. Seminar in Race Relations. (3) Three hours lecture. Contributions of anthropology, sociology and psychology to the field of race relations. Critical analysis of recent studies, current racial theories and programs.

SO 8413. Seminar in Social Stratification. (3) Three hours lecture. Critical analyses of theories and research on social class and related social structures. Explores race/gender/class stratification and policies to alter income/wealth inequality.

SO 8423. Seminar in Deviant Behavior. (3) Examination of relation between social conditions, social problems, deviance, and deviant careers. The organization of social control activities, and the social differentiation of deviant populations.

SO 8433. Seminar in Criminology. (3) Exploration of conceptual, methodological, and substantive problems of research in the field of criminology. The classification of criminals and criminal careers receives special emphasis.

SO 8503. Seminar in the Family. (3) An advanced seminar on the family institution, emphasizing theoretical and conceptual frameworks.
topics of current concern to family sociology, and major literature in the
area.

SO 8523. Symbolic Interaction and Social Structure. (3) Review of classic and current sociological literature in symbolic interaction and development of self as process and product of social structure.

SO 8603. Seminar in Modernization. (3) [Prerequisites: Six hours in social sciences.] Three hours lecture. Structural, institutional and behav-
ioral factors and processes affecting the modernization of traditional societies. Examination of causal factors and theoretical perspectives.

SO 8673. Seminar in Social Impact Analysis. (3) [Prerequisites: ST 4173/6173 or AN 4173/6173.] Three hours lecture. Examination of the requirements of, methodologies for, and issues in, social impact as-
essment. Attention is given to practical working experience with tech-
niques.

SO 8703. Seminar in Population. (3) [Prerequisite: SO 4703/6703 or equivalent.] Study of population dynamics; theories of optimum pop-
ulation; population policies and programs; zero population growth; inter-
relationship of population phenomena with socioeconomic developments.

SO 8723. Advanced Demographic Analysis and Research. (3) Techniques for evaluation, interpretation and presentation of demographic data; and methods of estimating basic demographic measures from incom-
plete data.

SO 8900. Fields of Sociology. (Hours and credits to be arranged up to 3 hours.) A seminar in selected areas of sociological research and prac-
tice.

SO 8990. Special Topics in Sociology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years.

SO 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

STATISTICS

(For departmental information, see MATHEMATICS and STATISTICS.)

ST 2113. Statistics for the Behavioral Sciences. (3) [Prerequi-
site: MA 1313 or equivalent.] Three hours lecture. Statistical techniques used in the behavioral sciences, including descriptive statistics, random variables and their probability distributions, estimation, confidence intervals, hypothesis testing, and measures of association.

ST 2990. Special Topics in Statistics. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years.

ST 3113. Introduction to Statistical Inference. (3) [Prerequisite: MA 1313 or equivalent.] Two hours lecture. Two hours laboratory. Basic concepts and methods of statistics, including descriptive statistics, proba-
bility, random variables, sampling distributions, estimation, hypothesis testing, introduction to analysis of variance, simple linear regression.

ST 4000. Directed Individual Study. Hours and credits to be ar-
 ranged.

ST 4111/6111. Seminar in Statistical Packages. (1) One hour lecture. Introduction to the statistical computer packages available at MSU.

ST 4211/6211. Statistical Consulting. (1) [Prerequisite: Consent of the department. (May be repeated for credit.)] Provides students with the opportunity to participate as statistical consultants on real projects; consultants are required to attend a weekly staff meeting.

ST 4213/6213. Nonparametric Methods. (3) [Prerequisite: An intro-
ductive course in statistical methods.] Three hours lecture. Nonparametric and distribution-free methods, including inferences for propor-
tions, contingency table analysis, goodness of fit tests, statistical methods based on rank, order, and measures of association.

ST 4523/6523. Introduction to Probability. (3) [Prerequisite: MA 2733.] Three hours lecture. Basic concepts of probability, conditional probability, independence, random variables, discrete and continuous probability distributions, moment generating function, moments, special distributions, or equivalent. (Same as MA 4523/6523.)

ST 4543/6543. Introduction to Mathematical Statistics I (3) [Prerequisite: MA 2743.] Three hours lecture. Combinatorics; probabil-
ity, random variables, discrete and continuous distributions, generating functions, moments, special distributions, multivariate distributions, in-
dependence, distributions of functions of random variables. (Same as MA 4543/6543.)

ST 4573/6573. Introduction to Mathematical Statistics II. (3) [Prerequisite: MA 4543/6543.] Three hours lecture. Continuation of ST 4543/6543. Transformations, sampling distributions, limiting distribu-
tions, point estimation, interval estimation, hypothesis testing, likelihood ratio tests, analysis of variance, regression, chi-square tests. (Same as MA 4573/6573.)

ST 4990/6990. Special Topics in Statistics. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer develop-
ing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years.

ST 7000. Directed Individual Study. Hours and credits to be ar-
ranged.

ST 8000. Thesis Research/Thesis. Hours and credits to be ar-
ranged.

ST 8114. Statistical Methods. (4) [Prerequisite: MA 1313.] Three hours lecture. Two hours laboratory. Fall and Spring semesters. Descrip-
tive statistics; sampling distributions; inferences for one and two popula-
tions; completely random, block, Latin square, split-plot designs; factorials; simple linear regression; chi-square tests.

ST 8214. Design and Analysis of Experiments. (4) [Prerequisite: ST 8114] Three hours lecture. Three hours laboratory. Offered spring se-
ST 8863. Advanced Design of Experiments II. (3) (Prerequisites: ST 8853 and ST 8613). Three hours lecture. Continuation of ST 8853, including analysis of covariance, split-plot designs and variants, applications of the general linear model, response surface methodology, randomization models, pseudo-factors, and cross-over design.

ST 8913. Recent Developments in Statistics. (3) (Prerequisite: Consent of instructor). New results in statistical theory and/or statistical methodology; advanced work organized around topics not usually considered in the other courses.

ST 8951. Seminar in Statistics. (1) (Prerequisite: Consent of instructor). (May be repeated for credit). Review of literature on assigned topics; discussions and presentations of papers.

ST 8990. Special Topics in Statistics. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

ST 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

ST 9493. Topics in Multivariate Statistics. (3) (Prerequisite: Consent of instructor). (May be repeated for credit). Advanced readings in multivariate statistics; course content varies depending on current issues.

ST 9533 Probability Theory. (3) Prerequisite: ST 4543/6543 and MA 8633). Three hours lecture. A measure-theoretic presentation of the theory of probability including independence and conditioning, convergence theorems, characteristics functions, martingales, and Brownian motion.

ST 9593. Topics in Probability Theory. (3) (Prerequisite: Consent of instructor). (May be repeated for credit). Advanced readings in probability theory or stochastic processes; course content varies depending on current issues.

ST 9693. Topics in Linear Models. (3) (Prerequisite: Consent of Instructor). (May be repeated for credit). Advanced readings in linear models; course content varies depending on current interests.

ST 9733. Statistical Inference. (3) (Prerequisites: ST 4573/6573 and consent of Instructor). Three hours lecture. Topics include: sufficiency, completeness, and uniqueness, convex loss functions, minimax estimation, Bayesian estimation, decision theory, symmetry and invariance, and sequential testing.

ST 9793. Topics in Statistical Inference. (3) (Prerequisite: Consent of Instructor). (May be repeated for credit). Advanced readings in statistical inference; course content varies depending on current interests.

ST 9893. Topics in Design of Experiments. (3) (Prerequisite: Consent of Instructor). (May be repeated for credit). Advanced readings in the design and analysis of experiments; course content varies depending on current interests.

SOCIAL WORK

(Social Welfare Policy I. (3) Three hours lecture. In-depth study of the historical and contemporary effects of social welfare policy on client systems.

SW 2313. Introduction to Social Work/Social Welfare. (3) Three hours lecture. A study of professional social work and the historical and philosophical development of social work and social welfare.

SW 2323. Social Welfare Policy II. (3) (Prerequisite: SW 2313). Three hours lecture. The course provides an analysis and evaluation of social welfare policies as institutional responses to social problems, social justice, and human needs.

SW 2990. Special Topics in Social Work. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

SW 3003. Social Work with At-Risk Populations. (3) Three hours lecture. Examines the role and interaction of social workers with vulnerable groups. Includes concepts of racism, sexism, homophobia, oppression, affirmative action, and xenophobia.

SW 3013. Human Behavior and Social Environment I. (3) (Prerequisite: SW 2313). Three hours lecture. Examines biological, psychological, social-structural, and cultural aspects of human development from conception through young adulthood from a social systems perspective, emphasizing diversity and oppression.

SW 3023. Human Behavior and the Social Environment II. (3) (Prerequisite: SW 3013). Three hours lecture. Examines biological, psychological, social-structural, and cultural aspects of human development from middle adulthood to death from a social systems perspective, emphasizing diversity and oppression.

SW 3213. Introduction to Social Research. (3) (Prerequisite: Nine hours of sociology and junior standing). Three hours lecture. A survey of the general field of research and methodology including an examination of the various types of research design, techniques, and procedures.

SW 3513. Social Work Practice I. (3) (Prerequisites: SW 2323 and SW 3013). Three hours lecture. The course emphasizes problems solving methods utilizing communication theories and skills working with individuals, families, groups, and communities in preparation for generalist social work practice.

SW 3523. Social Work Practice II. (3) (Prerequisites: SW 3023, and SW 3513). Three hours lecture. The course focuses on processes involved in engaging client systems in data collection, assessment, intervention, evaluation, and termination in preparation for generalist social work practice.

SW 3533. Social Work Practice III. (3) (Prerequisites: SW 3523). Three hours lecture. The course focuses on processes involved in engaging client systems in problem solving with emphasis upon groups and larger systems in generalist social work practice.

SW 4000. Directed Individual Study. (Prerequisites: Six hours of social work, junior standing, and consent of instructor). Hours and credits to be arranged. Independent research of problems related to social work.

SW 4613. Child Welfare Services. (3) (Consent of instructor). Three hours lecture. Assessment of parental and society's responsibilities in meeting physical, social, psychological, and legal needs of children and examining the delivery, policies, systems, and services.

SW 4623. Social Work with the Aged. (3) (Consent of the instructor). Three hours lecture. Assessment of social, psychological, physical, and economic needs of aging persons; their utilization of services, joint planning and creation of new community based resources.

SW 4633. Social Work in Health Care. (3) (Consent of instructor). Three hours lecture. Assessment of social work knowledge, values, and skills in understanding psychosocial aspects of illness, medical terminology, recording, discharge planning, ethics, team disciplines, and community resources.

SW 4643. Social Work Services in Schools. (3) Three hours lecture. Assessment of the development, concepts, policies, planning, implementation, and evaluation of social work services in primary and secondary schools.

SW 4713. Social Work Senior Seminar. (3) (Prerequisite: SW 3523). Critical evaluation of current issues in social work practice; examination of career opportunities; and assessment of personal educational preparation for practice.

SW 4990/6990. Special Topics in Social Work. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

SW 4916-4926. Social Work Field Practicum/Seminar I-II. (6) (Prerequisites: SW 4713 and SW 3533). The course provides students opportunities to apply generalist social work practice methods by completing a minimum of 450 supervised hours in a social work agency.

THEATRE

(See Communication)
Department of INSTRUCTIONAL SYSTEMS, LEADERSHIP, and WORKFORCE DEVELOPMENT
Office: 100 Industrial Education Building
Professors Olinzock (Head), Abraham, Cornelious, Forde, Perry, Stirewalt;
Associate Professors Anderson, Fleming and Johnson;
Assistant Professors: Adams, Boling, Hillman, Lightner, and Okojie

BUSINESS TECHNOLOGY

TKB 1012. Keyboarding. (2) One hour lecture: Two hours laboratory. Keyboard mastery; letter writing; vertical and horizontal centering; manuscript writing; tabulation. No credit allowed if student has earned high-school credit. Students with no high-school credit will be allowed to remove this deficiency during the freshman year.

TKB 1122. Document Formatting. (2) [Prerequisite: TKB 1012 or equivalent]. One hour lecture. Two hours laboratory. Keyboarding principles, development of speed/accuracy using computer software, and mastery of format skills required to produce business and other documents using computer software.

TKB 1313. Records Management. (3) Two hours lecture. Two hours laboratory. Development of guidelines for establishment, implementation, and maintenance of records control programs in various organizations.

TKB 2112. Document Production. (2) [Prerequisite: TKB 1122 or equivalent]. One hour lecture. Two hours laboratory. Development of speed and accuracy using computer software, advanced application of formatting skills using computer software, machine dictation and transcription.

TKB 2413. Administrative Office Procedures. (3) [Prerequisite: TKB 1122 or instructor’s consent]. Three hours lecture. Principles and practices involved in preparation for administrative support positions.

TKB 2543. Word Processing—Concepts, Procedures, and Applications. (3) [Prerequisite: TKB 1122 or instructors consent]. Two hours lecture. Two hours laboratory. Concepts and applications in word processing using microcomputers.

TKB 2990. Special Topics in Business Technology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

TKB 3133. Office Management. (3) [Prerequisite: Junior standing]. Three hours lecture. Planning and directing functions of offices; executive duties, selection and training of office employees; selection of office equipment and supplies.

TKB 4283/6283. Office Systems Applications. (3) [Prerequisite: TKT 1273]. Two hours lecture. Two hours laboratory. An exploration of computer technology as it applies to the office. Provides hands-on microcomputer experience with integrated business software and graphics.

TKB 4543/6543. Advanced Applications in Word/Information Processing. (3) [Prerequisite: TKB 2543 or instructor’s consent]. Two hours lecture. Two hours laboratory. Applications in advanced word processing and desktop publishing.

TKB 4990/6990. Special Topics in Business Technology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

INDUSTRIAL TECHNOLOGY

TKI 1223. Wood, Polymer, and Composite Processing. (3) Two hours lecture. Two hours laboratory. The planning, operation, and control of the processing of natural and synthetic polymers and associated composites.

TKI 1813. Basic Industrial Electricity and Electronics. (3) One hour lecture. Four hours laboratory. Study of fundamental industrial electrical and electronic principles with experimentation and project construction.

TKI 2312. General Metal Work. (2) Four hours laboratory. Sheet and wrought metal processing; cold forming, bench tools, process and analysis, material selection and utilization, experimentation, project construction.

TKI 2323. Forging, Welding and Founding. (3) [Prerequisite: Concurrent or credit in TKI 1813]. Six hours laboratory. Practice in hand forging, annealing, hardening and tempering of tool steel, casting, gas and electric welding, plasma arc cutting.

TKI 2413. History and Appreciation of the Artcrafts. (3) Three hours lecture. Growth and development of the artcrafts through the ages; instructional applications; practical designs; demonstrations and projects in artmetal, leather, ceramics, and other handcraft areas.

TKI 2990. Special Topics in Industrial Technology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

TKI 3043. Industrial Safety. (3) Three hours lecture. Principles and procedures relating to appraisal, organization and administration of safety programs in industrial plants including implementation of occupational safety and health legislation.

TKI 3063. Industrial Human Relations. (3) Three hours lecture. The application of psychological principles to teacher-pupil relationships, employer-employee relationships, and other human relationships in industry.

TKI 3103. Advanced Industrial Electricity and Electronics. (3) [Prerequisite: TKI 1813]. One hour lecture. Four hours laboratory. Continuation of TKI 3103. Study of and experimentation with industrial electronic, transistor, and integrated circuitry.

TKI 3183. Machine Metal Processing. (3) Six hours laboratory. Machine tool (drill, grinder lathe, mill and shaper) operations; bench metals, precision measurements, calculations, and chipless machining; project construction.

TKI 3223. Industrial Materials Technology. (3) [Prerequisite: CH 1043]. Three hours lecture. Two hours laboratory. An investigation of the mechanical and characteristic properties of industrial materials. The influence of these properties on manufacturing and product service requirements.

TKI 3363. Motion and Time Study. (3) [Prerequisite: TKI 3083]. Two hours lecture. A study of the techniques for analysis of production systems, the design of work stations, and the development of time standards. (For non-I.E. students). (Same as IE 3113).

TKI 4103. Industrial Control Systems. (3) [Prerequisite: TKI 3103]. One hour lecture. Four hours laboratory. Application of basic and advanced industrial electronic principles to industrial control systems and processes.

TKI 4113/6113. Industrial Fluid Power. (3) [Prerequisites: PH 1113 and TKI 3103]. One hour lecture. Four hours laboratory. A practical study of fluid power concepts, components, and systems as relates to modern industrial applications and to appropriate scientific principles. Hands-on laboratory activities.

TKI 4203/6203. Automated Systems. (3) [Prerequisite: TKI 4103]. Two hours lecture. Two hours laboratory. An advanced study of automated systems and applications for the Industrial Technologist.

TKI 4213/6213. Survey of Energy Sources and Power Technology. (3) [Prerequisite: three semester hours physical science or other physics]. Three hours lecture. Scientific and applied approaches to energy conversion, transmission, utilization, and conservation. Internal-external combustion, nuclear, fluid, hydroelectric, solar, etc. Current energy problems; lab demonstrations; activities.

TKI 4223/6223. Quality Assurance. (3) [Prerequisites: BQA 2113 and ACC 1203]. Three hours lecture. Concepts and procedures to design, plan, assure and audit quality and quality systems.

TKI 4263/6263. Manufacturing Technology & Processing. (3) [Prerequisite: TKI 3363]. One hour lecture. Four hours laboratory. Interpretation of modern industry duplicates the life cycle of an industrial enterprise in a laboratory environment.

TKI 4303/6303. Industrial Robotics. (3) [Prerequisite: TKI 4103]. Two hours lecture. Two hours laboratory. A study of industrial robotics and applications for production supervisors.

TKI 4990/6990. Special Topics in Industrial Technology. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

TECHNOLOGY TEACHER EDUCATION

TKT 1273. Microcomputers in Education. (3) Three hours lecture. A study of the educational application of microcomputer technology.
TKT 2990. Special Topics in Technology Teacher Education. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

TKT 3001. Practicum in Vocational Education. (1) Observation of secondary and high school students and participation in classroom activities prior to the directed teaching.

TKT 3153. Teaching Business Technology. (3) (Prerequisite: Admission to Teacher Education and senior standing). Three hours lecture. A seminar dealing with legal, professional, and curriculum issues as they relate to vocational/technical education.

TKT 3173. Teaching Business Education Skills Subjects. (3) (Prerequisite: Acceptance to student teaching). Three hours lecture. A study of objectives, materials, and teaching methods appropriate for business education skills subjects.

TKT 3303. Coordination of Vocational Student Organizations. (3) Three hours lecture. Learning experiences which lead to an understanding of purposes, objectives, and successful operation of vocational student organizations. Emphasis on business and marketing vocational student organizations.

TKT 4000. Directed Individual Study. Hours and credits to be arranged.

TKT 4103/6103. Delivery of the Vocational-Technical Instructional Program. (3) Three hours lecture. Methods and techniques of instructing vocational-technical students in the classroom and laboratory setting.

TKT 4143/6143. History and Philosophy of Vocational and Technology Education. (3) Three hours lecture. History and development, aims and purposes of vocational education.

TKT 4183/6183. Coordination of Part-Time Education. (3) Three hours lecture. Principles of promotion, organization, and operation of part-time cooperative classes in vocational education: instruction in analyzing needs, preparing schedule of processes, developing instructional materials.

TKT 4213/6213. Teaching Basic Business Subjects. (3) (Prerequisite: Acceptance to teacher education.) Three hours lecture. Objectives, materials, and methods of teaching basic business subjects.

TKT 4253/6253. Evaluation and Measurement of Students in Vocational Education and Technology. (3) Three hours lecture. Construction, selection, interpretation, and uses of cognitive and psychomotor evaluation instruments used in vocational-technical programs.

TKT 4713/6713. Hypermedia for Instruction. (3) Three hours lecture. (Prerequisite: TKT 4273/6273 or consent of instructor). A hands-on study of object-oriented programming applied to instruction, using HyperCard as a tool.

TKT 4733/6733. Technology Laboratory Management. (3) Three hours lecture. Physical, mechanical, and electronic considerations for effective management of technology-based learning laboratories.

TKT 4743/6743. Elements of Electronic Desktop Publishing. (3) (Prerequisites: TKT 2543, 4543 or consent of instructor). Two hours laboratory and two hours lecture. Design applications utilizing electronic desktop publishing technologies.

TKT 4753/6753. Electronic Presentation. (3) (Prerequisite: TKT 4743/6743 or consent of the instructor). Two hours lecture. Two hours laboratory. The study of using various electronic technologies in the development of visual electronic presentations.

TKT 4873. Professional Seminar in Vocational/Technical Education. (3) (Prerequisites: Admission to Teacher Education and senior standing). Three hours lecture. A seminar dealing with legal, professional, administrative, and curriculum issues as they relate to vocational/technical education.

TKT 4886. 4896. Student Teaching in Vocational/Technical Education. (6,6) (Both courses to be taken concurrently). (Prerequisites: Admission to Teacher Education and senior standing). Supervised observation and directed teaching in respective fields of endorsement.

TKT 4990/6990. Special Topics in Technology Teacher Education. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

TKT 7000. Directed Individual Study. Hours and credits to be arranged.

TKT 8000. Thesis Research/Thesis. Hours and credits to be arranged.

TKT 8193. Improvement of Instruction in Office Procedures and Communications. (3) Three hours lecture. A study of secretarial skills in the office, office systems technology and techniques, and the communicative process.

TKT 8200. Internship in Vocational Education and Technology. (1-6) Opportunity under supervision of regular university staff for directed experience and reporting in the major area of interest.

TKT 8213. Content and Method of Teaching in Vocational Education. (3) Three hours lecture. The content of various types of courses in trade, industrial, and distributive education; instruction in appropriate techniques and methods.

TKT 8233. Occupational Survey, Placement and Follow-Up. (3) Three hours lecture. Problems, methods and procedures involved in planning, organizing, and conducting occupational surveys; and in the placement and follow-up of students.

TKT 8263. Philosophy and Administration of Vocational Education. (3) Three hours lecture. Development of well-rounded, comprehensive programs suitable to various types of schools and communities; correlation with other school programs.

TKT 8723. Instructional Design for Industry. (3) Three hours lecture. Techniques; strategies, and development of instruction for industry.

TKT 8733. Telecommunications: Applications in Scholarship. (3) Three hours lecture. The study and application of the telecommunications to professional scholarship and research endeavors; includes data search mechanisms applicable to and in support of graduate program demands.

TKT 8743. Interactive Media. (3) Two hours lecture. Two hours laboratory. Investigation and development of a variety of computer-interactive instructional media.

TKT 8763. Seminar in Planning for Instructional Technology. (3) Three hours lecture. An analytical study of techniques and strategies contributing to the establishment and effective operation of functional instructional technology.

TKT 8773. Production of Technology-Aided Instruction. (3) Six hours laboratory. Application of the electronic curriculum (computer and media) to the development of audio and visual aids for industry and education.

TKT 8793. Directed Project in Instructional Technology. (3) Design, development, and presentation of a complex, comprehensive instructional product integrating learning theories with contemporary and/or emerging technologies. Evaluation by jury.

TKT 8803. Design and Evaluation of Instructional Software. (3) Two hours lecture. Two hours laboratory. (Prerequisite: TKT 4273/6273 and hypermedia authoring experience). Analysis, synthesis, and evaluation of instructional software designed for and applied to varied learning situations.

TKT 8813. Issues in Distance Education. (3) Three hours lecture. The course investigates such issues as administration, implementation, instructional challenges, and evaluation in distance education environments including interactive video and online courses.

TKT 8833. Design and Implementation of Data Networks. (3) Three hours lecture. This course explores the design and implementation of data networking systems that are appropriate for instructional and research environments.
TKT 8990. Special Topics in Technology Teacher Education. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

TKT 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

TRANSPORTATION

(For departmental information, see MARKETING, QUANTITATIVE ANALYSIS and BUSINESS LAW.)

TR 2990. Special Topics in Transportation. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

TR 3313. Principles of Transportation. (3) [Prerequisites: MKT 3013 or consent of instructor and junior standing]. Three hours lecture. Transportation development; freight rate differential; transportation and the industrial pattern; valuation and rate making.

TR 4000. Directed Individual Study. Hours and credits to be arranged.

TR 4133. General Transportation. (3) [Prerequisite: TR 3313]. Highway, airways and waterways development. Motor, airline and water carriers administration, finance, service operations, and regulation. Airline development—passenger, cargo, domestic and foreign.

TR 4313/6313. Physical Distribution Management. (3) [Prerequisites: BQA 2113 and MKT 3013]. Functions of physical distribution in business management; analysis of shippers, distribution problems in relation to carrier types, services and functions; methods of reducing distribution costs, use of internal and external data in warehouse and factory location; study of rate of structure and rate changes.

TR 4393. Transportation Seminar. (3) [Prerequisite: TR 3313]. Three hours lecture. A course designed for those students engaged in intensive study and analysis of problems of a particular mode of transport.

TR 4413/6413. National Transportation Policies. (3) [Prerequisite: TR 3313]. Extensive individual reporting on transportation literature. Designed for students desiring advanced work in the area not previously covered—ICC law and procedures; subsidy and promotion.

TR 4990/6990. Special Topics in Transportation. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

UNIVERSITY HONORS COURSES

Office: 45 Magruder Street
Specialized Honors courses are offered under UHP numbers; departmental Honors courses are listed under departmental abbreviations and numbers. The titles of departmental Honors courses clarify their equivalency to regular courses in relation to transfer credits and Core Curriculum and degree requirements. The sections available for honors credit are identified in the MSU Master Schedule each semester.

UHP 1081-2091. Honors Forum. (1) One hour lecture. Weekly meeting of honors students. Discussion led by faculty and/or students on various topics.

UHP 2093. Ascent of Man. (3) Three hours lecture. Examination of relationships among the arts, sciences, and humanities. (The course may be used to satisfy fine arts, social sciences, or humanities electives only.)

The courses UHP 3183 and UHP 3283 may be taken only by students who have the consent of the instructor. Since the content of each course will vary from year to year, the student should check with the instructor for more information.

UHP 3183. Interdisciplinary Seminar in the Humanities. (3) An investigation of an interdisciplinary problem or theme in man's experience. Lectures, readings, discussions, and reports.

UHP 3283. Interdisciplinary Seminar in the Natural Sciences. (3) An investigation of an interdisciplinary problem in man's understanding of the natural world. Lectures, readings, discussions, and reports.

UHP 3198. Internship. (8) [Prerequisites: Junior standing or consent of instructor]. Individual work experience in a governmental or public agency in Washington, D.C., under the guidance of an MSU faculty member.

UHP 3293. Internship Seminar. (3) [Co-requisite: UHP 3218]. In-depth discussion of topics relevant to various academic disciplines with an emphasis on the integration of theory and practice.

DEPARTMENTAL HONORS COURSES

(A complete course description for each course is to be found under the department's list of courses. All of the courses except those marked with * meet core curriculum requirements. Equivalent courses may be transferred from other institutions as honors credits.)

Each semester, departmental honors courses will be listed in the Master Schedule with section number preceded by the letter “H” and will include the word “Honors” in the title.

ACC 2013-2023* Honors Accounting Principles I-II
AN 1103 Honors Introduction to Anthropology
ARC 1536-1546 Honors Architecture Design I-A-IIB
ARC 2536-2546 Honors Architecture Design II-A-IIB
ART 1113 Honors Art Appreciation
ART 4833-4843 Computer Animation I-II
CH 1223 Honors In Chemistry
CO 1003 Honors Oral Communication

CO 1403 Introduction to Mass Media
CO 1503 Introduction to Theater
EC 1033 Economic Social Issues
EC 2113 Honors: Principles of Macroeconomics
EC 2123 Honors: Principles of Microeconomics
EC 4523 History of Economic Thought
EG 1143 Honors Engineering Graphics
EN 1103-1113 Honors English Composition I-II
EN 2213-2223 English Literature
EN 2243-2253 American Literature
EN 2383-2393 Sophomore English Honors I-II
FLF 2133-2143 Honors French III-IV
FLG 2133-2143 Honors German III-IV
FLS 2133-2143 Honors Spanish III-IV
GG 1113 Honors Physical Geology
GG 163 Honors Historical Geology
HI 1183 Honors Problems in Modern World Civilization
HI 1083 Honors Problems in American Civilization
MA 1713, 1723, 2733, 2743 Honors Calculus I, II, III, IV
PH 2213, 2223 Honors Physics I, II
PHI 1103 Honors Introduction to Philosophy
PHI 1123 Honors in Ethics
PS 1113 Honors in American Government
PS 1313 Honors in International Relations
PS 1513 Honors Comparative Government
PS 4083 Senior Research/Thesis
PSS 1393 Honors Plant Science
PSY 1013 Honors Introduction to General Psychology
SO 1003 Honors Introduction to Sociology

Directed Individual Study for Honors credit may be arranged under departmental numbers 4000. Please see “The UHP Handbook” available from the University Honors Program for additional information about honors courses.
**ANIMAL HEALTH SCIENCES**

Office: College of Veterinary Medicine (Wise Center)

<table>

<tbody>
<tr>
<td>WF 1101</td>
<td>Wildlife and Fisheries Profession.</td>
<td>1</td>
<td>(Prerequisite: Freshman or Sophomore standing). One hour lecture. Orientation to the interdisciplinary and applied nature of wildlife and fisheries management and related fields, emphasizing the department, college, and university; student roles and responsibilities; and career opportunities.</td>
</tr>
<tr>
<td>WF 1213</td>
<td>Introduction to Wildlife and Fish Conservation.</td>
<td>3</td>
<td>Three hours lecture. A survey of wildlife and forest conservation, stressing biological principles and management practices for renewable resources.</td>
</tr>
<tr>
<td>WF 2990</td>
<td>Special Topics in Wildlife &amp; Fisheries.</td>
<td>1-9</td>
<td>Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).</td>
</tr>
<tr>
<td>WF 3000</td>
<td>Internship in Wildlife, Fisheries or Aquaculture.</td>
<td>1-4</td>
<td>(Prerequisite: Junior standing). Professional work experience with governmental or private agencies. (Hours and credits to be arranged).</td>
</tr>
<tr>
<td>WF 3031</td>
<td>Introductory Wildlife/Fisheries Practices.</td>
<td>1</td>
<td>(Prerequisite: Junior standing). Field exercises and practical exposure to research and management of wildlife and fish species and habitats in Mississippi.</td>
</tr>
<tr>
<td>WF 3131</td>
<td>Applied Aquatic and Terrestrial Ecology Laboratory.</td>
<td>4</td>
<td>Four hours laboratory, alternate weeks. Demonstration of ecological concepts and methodologies in the classroom and in the field.</td>
</tr>
<tr>
<td>WF 3133</td>
<td>Applied Aquatic and Terrestrial Ecology.</td>
<td>3</td>
<td>Three hours lecture. Four hours laboratory, alternate weeks. The application of ecological principles which serve as a basis for the management of wildlife and fisheries in terrestrial and aquatic habitats.</td>
</tr>
<tr>
<td>WF 3141</td>
<td>Seminar in Wildlife and Fisheries.</td>
<td>1</td>
<td>(Prerequisite: Junior standing). One hour lecture. Current topics and job opportunities in the field of wildlife and fisheries.</td>
</tr>
<tr>
<td>WF 4000</td>
<td>Directed Individual Study.</td>
<td>1</td>
<td>Hours and credits to be arranged.</td>
</tr>
<tr>
<td>WF 4013</td>
<td>Introduction to Aquaculture.</td>
<td>3</td>
<td>Correspondence course introducing basic principles of aquaculture production and management. Designed primarily for extension, education and other professionals and prospective fish producers.</td>
</tr>
<tr>
<td>WF 4121</td>
<td>Wildlife and Fisheries Biometrics Laboratory.</td>
<td>1</td>
<td>(Prerequisite: ST 3113; corequisite: WF 4122). Four hours laboratory, alternate weeks. Application of basic statistical analytical tools to address wildlife and fisheries management/research questions.</td>
</tr>
<tr>
<td>WF 4122</td>
<td>Wildlife and Fisheries Biometrics.</td>
<td>2</td>
<td>(Prerequisite: ST 3113; corequisite: WF 4121). Two hours lecture. Application or basic statistical analytical tools to address wildlife and fisheries management/research questions.</td>
</tr>
<tr>
<td>WF 4133</td>
<td>Fisheries Science</td>
<td>3</td>
<td>(Prerequisite: ST 3113 or equivalent). Two hours lecture. Four hours laboratory, alternate weeks. Study of the biological parameters of fish populations.</td>
</tr>
<tr>
<td>WF 4153</td>
<td>Principles of Wildlife Conservation and Management.</td>
<td>3</td>
<td>Two hours lecture. Four hours laboratory on alternate weeks. Principles of game management; habitat improvement; wildlife techniques; public relations.</td>
</tr>
<tr>
<td>WF 4173</td>
<td>Fish Physiology.</td>
<td>3</td>
<td>Two hours lecture. Four hours laboratory, alternate weeks. Basic anatomy and physiology of major systems of fish as they function during development, growth and maturation.</td>
</tr>
<tr>
<td>WF 4193</td>
<td>Finfish Aquaculture.</td>
<td>3</td>
<td>Two hours lecture. Four hours laboratory alternate weeks. Introduction to theory and practice of aquatic culture to the culture of fish.</td>
</tr>
<tr>
<td>WF 4213</td>
<td>Wildlife Disease Management.</td>
<td>3</td>
<td>(Prerequisite: WS 3133 or consent of instructor). Two lectures per week, labs alternate weeks. Principles and practices of wildlife disease management with emphasis on damage identification and damage prevention and control methods.</td>
</tr>
<tr>
<td>WF 4221</td>
<td>Limnology Laboratory.</td>
<td>1</td>
<td>(Prerequisite: WF 3133 or consent of instructor; corequisite: WF 4222/6222). Four hours laboratory skills required to evaluate freshwater ecosystems.</td>
</tr>
<tr>
<td>WF 4222</td>
<td>Limnology.</td>
<td>2</td>
<td>(Prerequisite: WF 3133 or consent of instructor; corequisite: WF 4221/6221). Two hours lecture. The physical, chemical and biological processes underlying the function and productivity of freshwater ecosystems.</td>
</tr>
<tr>
<td>WF 4243</td>
<td>Wildlife Techniques.</td>
<td>3</td>
<td>(Prerequisite: Junior or Senior standing or consent of instructor). Two hours lecture. Four hours laboratory. Contemporary research and management techniques and tools for wildlife populations and habitats.</td>
</tr>
<tr>
<td>WF 4253</td>
<td>Application of Spatial Technologies to Wildlife and Fisheries Management.</td>
<td>3</td>
<td>(Prerequisite: Sr. standing or consent of instructor). Two hours lecture. Four hours laboratory. Practical Application of Global Positioning Systems and Geographic Information Systems to Wildlife and Fisheries Management.</td>
</tr>
<tr>
<td>WF 4263/6263</td>
<td>Wildlife Diseases.</td>
<td>3</td>
<td>Two hours lecture. Four hours laboratory, alternate weeks. Effects and management of parasites and diseases in wild bird and mammal populations. (Same as CVM 4263/6263).</td>
</tr>
<tr>
<td>WF 4313</td>
<td>Fisheries Management.</td>
<td>3</td>
<td>(Prerequisite: WF 3133 or consent of instructor). Two hours lecture. Laboratories alternate weeks. Principles of fisheries management and methods for assessment and analysis of fish populations and aquatic habitats.</td>
</tr>
<tr>
<td>WF 4323</td>
<td>Wildlife Nutrition and Physiology.</td>
<td>3</td>
<td>Two hours lecture. Four hours laboratory, alternate weeks. Basic applied physiology and nutrition related to management of ruminant and nonruminant game animals.</td>
</tr>
<tr>
<td>WF 4333</td>
<td>Fish and Shellfish Nutrition.</td>
<td>3</td>
<td>(Prerequisites: CH 2503 and CH 2501 or BCH 3613). Three hours lecture. Fundamental and applied aspects of the nutrition of fish, crustacean, and mollusk species including feeding behavior, nutritional ecology, energetics, and nutrient requirements. (Same as NTR 6333).</td>
</tr>
<tr>
<td>WF 4343</td>
<td>Pond and Stream Management.</td>
<td>3</td>
<td>(Prerequisite: Junior or Senior standing or consent of instructor). Two hours lecture. Four Hours Laboratory alternate weeks. Ecological foundations and management techniques for fisheries in small impoundments and streams.</td>
</tr>
</tbody>
</table>

* Courtesy appointment

** U.S.D.E.
WF 4353/6353. Fish and Wildlife Policy and Law Enforcement. (3) Prerequisite: Sr. standing or consent of instructor. Three hours lecture. A survey of the major content areas of fish and wildlife policy and law enforcement. Emphasis is on the fundamentals of conservation policies and laws.

WF 4363/6363. Wildlife and Fisheries Administration and Communication. (3) Prerequisite: Junior standing. Two hours lecture. Three and one-half hours lab, alternate weeks. Administrative and communication principles and skills in the workplace and public environments of wildlife and fisheries organizations.

WF 4371/6371. Water Quality Management Laboratory. (1) (Prerequisite: CH 1043 and CH 1053 or consent of instructor, corequisite WF 4372/6372). Four hours laboratory, alternate weeks. Basic analytical and laboratory skills required to evaluate water quality problems.

WF 4372/6372. Water Quality Management. (3) (Prerequisite: CH 1043 and CH 1053 or consent of instructor; corequisite WF 4371/6371). Two hours lecture. Biological, chemical and physical principles affecting water quality; water quality management techniques in aquaculture, fisheries and wastewater treatment.

WF 4383/6383. Wetlands Ecology and Management. (3) Two hours lecture. Four hours laboratory, alternate weeks. Hydrology, soils and biogeochemistry of wetlands; structure and function of important wetland types; wetland management for wildlife and fisheries; wetland creation and restoration.

WF 4394/6394. Waterfowl Ecology and Management. (4) (Prerequisite: WF 3133, WF 3131, WF 4153, senior standing, or consent of instructor). Three hours lecture. Four hours laboratory. Annual ecology of North American waterfowl, habitat and population ecology, and management, waterfowl identification, field trips, management plan, and current issues.

WF 4453/6453. International Cultures and Natural Resources Management. (3) (Prerequisite: Jr./Sr. standing or consent of instructor). Three hours lecture. Comparative examination of how natural resources are viewed and used by various cultures and how this relates to natural resource management.

WF 4463/6463. Human Dimensions of Fish and Wildlife Management. (3) (Prerequisite: Jr./Sr. standing or consent of instructor). Three hours lecture. Survey of the major content areas of human dimensions. Emphasis on the considerations and implications associated with measuring, evaluating and influencing people’s attitudes and behaviors.

WF 4473/6473. Wildlife and Fisheries Practices. (3) (Prerequisite: Senior standing). Two hours lecture. Four hours laboratory. The integration of principles of ecology, wildlife and fisheries techniques and policies for effective planning and implementation of natural resource management.

WF 4484/6484. Upland Avian Ecology and Management. (3) Three hours lecture. Four hours laboratory. (Prerequisites: WF 3133 and WF 3131 and WF 4153 and senior standing or consent of instructor). The application of ecological principles to management of avian populations, focusing on avian species and communities inhabiting upland ecosystems.

WF 4494/6494. Large Mammal Ecology and Management. (3) (Prerequisites: WF 3133/3131 and WF 4153 and senior standing). Three hours lecture. Four hours laboratory, alternate weeks. Ecological principles and applied methods used in the management of large mammals.

WF 4990/6990. Special Topics in Wildlife & Fisheries. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

WF 7000. Directed Individual Study. Hours and credits to be arranged.

WF 8000. Thesis Research/Thesis. Hours and credits to be arranged.

WF 8012. Advanced Applied Ecology. (2) One hour lecture. Two hours laboratory. Provides a review in fundamental principles and application of community ecology, with emphasis on professional communication in teaching and research important to natural resource management.

WF 8113. Scientific Literature and Communication for the Natural Sciences. (3) Two hours lecture. Three hours laboratory. Experiential learning and communication strategies that will be useful in the renewable natural resource sciences.

WF 8311-8231. Seminar in Fisheries and Wildlife. (1) One hour each week. Seminar for graduates in natural history field.

WF 8134. Research Methods in Wildlife and Fisheries Sciences. (4) (Prerequisites: Graduate standing; ST 8114). Three hours lecture. Four hours laboratory. Graduate level introduction to application of scientific methods to wildlife and fisheries ecology and management.

WF 8144. Theory of Wildlife Population Ecology. (4) (Prerequisite: WF 3133, ST 3133 or consent of instructor). Three hours lecture. Two hours laboratory, weekly. Theory of wildlife population ecology including population growth, population regulation, predation, and competition. Basic methods of data collection and population sampling.

WF 8154. Quantitative Applications in Wildlife Population Ecology. (4) (Prerequisite: WF 8144, ST 8114 or consent of instructor). Three hours lecture. Four hours laboratory weekly. Application of basic statistical analytical tools to address natural resource management research questions.

WF 8223. Management of Impounded River Ecosystems (3) (Prerequisites: WF 6313/4313 or equivalent). A survey of guidance and criteria for managing reservoirs and associated riverine environments to enhance fisheries. Focus is on managing fish and their environment.

WF 8243. Conservation Biology. (3) (Prerequisites: WF 3133, BIO 3103 or consent of instructor). Three hours lecture. Theory and applications of conservation biology, measures of biodiversity, ecological geogaphy, measures and treatments of decline.

WF 8273. Advanced Fisheries Management. (3) (Prerequisites: WF 4133/6133 and WF 4313/6313 or consent of instructor). Three hours lecture. Field exercises during spring break. Advanced treatment of the multidimensional aspects of fisheries management in a global setting with emphasis on setting realistic objectives and establishing appropriate strategy.

WF 8283. Fish Genetics. (3) (Prerequisite: GNS 3103 and ST 8114.) Two hours lecture. Four hours laboratory. Introduction to and use of genetic methods in aquaculture and wild fisheries management.

WF 8343. Conceptual Ecology and Natural Resource Management. (3) (Prerequisites: WF 8012 or equivalent or consent of instructor). Three hours lecture. A forum to discuss current literature and theory that advances the study of community ecology and its application to natural resource management.

WF 8344. Wildlife Habitat Analysis and Management. (4) (Prerequisite: BIO 4203). Three hours lecture. Four hours laboratory alternate weeks. Identification, ecology, analysis and management of plant communities of value to upland and wetland game species of North America.

WF 8373. Advanced Fishery Science. (3) (Prerequisites: WF 4133/6133 and ST 3133, or equivalents). Two hours lecture. Two hours laboratory. Estimation and interpretation of vital statistics of fish populations: analysis of fishery data using computers; models for assessment of fish stocks.

WF 8644. Wildlife Habitat Evaluation and Modeling. (4) (Prerequisites: ST 8114 or equivalent, WF 8344 or equivalent and graduate standing or consent of instructor). Three hours lecture. Four hours laboratory. Contemporary quantitative analyses of wildlife habitat relationships, habitat sampling methods, habitat selection, and habitat modeling.

WF 8990. Special Topics in Wildlife & Fisheries. (1-9) Credit and title to be arranged. This course is to be used on a limited basis to offer developing subject matter areas not covered in existing courses. (Courses limited to two offerings under one title within two academic years).

WF 9000. Dissertation Research/Dissertation. Hours and credits to be arranged.

WOMEN’S STUDIES
Office: 208 Allen Hall

WS 1173. Introduction to Gender Studies. (3) Three hours lecture. An introduction to theoretical concepts in Gender Studies. This course will examine the influence of the women’s movement on the academic development of Gender Studies (Same as AN 1173 and SO 1173).
GILES DISTINGUISHED PROFESSORS

Dr. Terry L. Amburgey
Dr. Janice E. Chambers
Dr. Nancy Duvall Hargrove
Dr. B. Keith Hodge
Dr. Jeffrey V. Krams
Dr. John F. Marszalek
Dr. Edward E. Milam
Dr. J. Elton Moore
Dr. Henry N. Pitre
Dr. David R. Shaw
Dr. Ratnasingham Shivaji
Dr. W. Glenn Steele
Dr. Joe F. Thompson
Dr. W. William Wilson

LINDA S. ANDREWS, B.S., M.S., Ph.D., Assistant Extension/Research Professor, Food Science, Experimental Seafood Processing Laboratory, Pascagoula.
W. STANLEY ANTHONY, Adjunct Assistant Professor of Agricultural and Biological Engineering, B.S., Mississippi State University, 1968; M.S., 1970.
ABDOLLAH ARABSHAHI, Research Engineer, Engineering Research Center, B.S., M.S., Ph.D.
KEVIN L. ARMBRUST, Associate Professor of Chemistry and State Chemist, Mississippi State Chemical Laboratory, B.S., University of CA at Davis, 1987; Ph.D., University of CA at Davis, 1992.
KEVIN J. ARMSTRONG, Associate Professor of Psychology, Research Fellow, Social Science Research Center, B.A., Carleton College, 1982; Ph.D., Illinois Institute of Technology, 1992.
LYNNE S. ARNAULT, Professor of Counseling Education, Educational Psychology, and Special Education, B.S., Mississippi State University, 1974; M.R.E., New Orleans Baptist Theological Seminary, 1977; M.S., Mississippi State University, 1979; Ed.S., 1981; Ed.D., Memphis State University, 1985.
ROBERT PAUL ARNETT, Associate Professor of Communication, B.F.A., Pacific Lutheran University, 1970; M.A., Washington State University, 1983; Ph.D., University of Southern Mississippi, 1996.
HENDRICK E. ARNOLDUS, Associate Professor of Physics, B.S., Eindhoven University of Technology, The Netherlands, 1980; M.S., 1981; Ph.D., Utrecht University, The Netherlands, 1985.
BETH E. ASHMORE, Assistant Professor and Instruction Services Librarian, M.S., University of Illinois, Urbana-Champaign, 2001.
FRANK W. AUSTIN, Associate Professor of Veterinary Medicine, B.S., Oklahoma State University, 1979; D.V.M., 1983; Ph.D., Louisiana State University, 1988.

FACULTY 2003-2004

October 1, 2002

IV. FACULTY, EMERITI, and STAFF

B.S., University of Arkansas, 1972; M.S.E., Arkansas State University, 1981; M.F.A., Indiana State University, 1985.

WILLIAM A. GUSTIN, Assistant Professor of Veterinary Medicine, B.S., Louisiana State University, 1972; M.D., University of Southern California, 1976.

B.S., Pennsylvania State University, 1979; M.S., University of Tennessee - Knoxville, 2001.

THOMAS E. HANNIGAN, Instructor of Aerospace Engineering, B.S., Mississippi State University, 1989; M.S., 1990.

FRANK A. HANSEN, Associate Professor of Computer Science, B.A., Harvard University, 1981; M.S., University of Massachusetts at Amherst, 1993; Ph.D., 1998.

LARRY HANSON, Associate Professor of Veterinary Medicine, B.S., Auburn University, 1981; M.S., 1983; Ph.D., Louisiana State University, 1990.

TERRILL R. HANSON, Assistant Professor, Department of Agricultural Economics, B.S., Allegheny College, 1977; M.S., Auburn University, 1985; Ph.D., 1990.

ZAHURUL HAQUE, Professor of Food Science and Technology, B.S., Dhaka University, Bangladesh, 1972; M.S., 1974; Ph.D., Kyoto University, Japan, 1984.

JAMES C. HARDEN, Professor of Electrical and Computer Engineering, Interim Department Head, B.S., Mississippi State University, 1965; M.S., Georgia Institute of Technology, 1966; Ph.D., Texas A&M University, 1971.

ALYSON C. HARDIN, Lecturer, Finance & Economics, B.A., The South, 1982; M.S.C., Georgia State University, 1996; M.T.X., Georgia State University, 1998.

WILLIAM G. HARDIN, III, Assistant Professor of Real Estate, B.A. University of North Carolina, Chapel Hill; M.A., University of South Carolina, 1984; M.S., Georgia State University, 1992; Ph.D., Georgia State University, 1995.

R. DWIGHT HARE, Professor of Curriculum and Instruction, B.A., University of North Carolina, 1975; Ph.D., 1984.

JOHN A. HARGREAVES, Associate Professor of Aquaculture, B.A., Amherst College, 1980; M.S., Auburn University, 1987; Ph.D., Louisiana State University, 1992.

NANCY DUVALL HARGROVE, Distinguished Professor of English, B.A., Agnes Scott College, 1963; M.A., University of Wisconsin, 1965; Ph.D., University of South Carolina, 1976.

RICHARD L. HARKNESS, Associate Professor of Horticulture, B.S., University of Minnesota, 1987; M.S., Colorado State University, 1989; Ph.D., Virginia Polytechnic Institute and State University, 1995.

JOHN E. HARKNESS, Professor of Veterinary Medicine and University Laboratory Animal Veterinarian, B.S., Rolls College, 1961; D.V.M., Michigan State University, 1968; M.S. & M.Ed., University of Missouri, 1976.

SANDRA H. HARPOL, Interim Associate Vice President for Research; Professor of Physics; and Director, Center for Science, Mathematics, and Technology, B.S., Mississippi State University, 1971; M.Ed., 1983; Ed.D., 1991.

C. ANNE HARRIS, Instructor of Communication, B.S., Mississippi State University, 1974; M.A., University of Georgia, 1976.

F. AUBREY HARRIS, Research Professor of Entomology, B.A., Mississippi College, 1960; B.S., Mississippi State University, 1964; M.S., 1965; Ph.D., 1968.

IAN HARTLEY, Assistant Professor of Forestry, B.S., University of New Brunswick, 1986; M.S., University of New Brunswick, 1986; Ph.D., University of British Columbia, 2004.

JAN HARVILL, Assistant Professor of Statistics, B.S.E., Auburn University, 1990; M.S., University of South Alabama, 1994; Ph.D., Georgia State University, 1999.

CHARLES JAMES HAUG, Distinguished Professor of Chemistry, B.S., University of Minnesota, 1963; M.S., 1964; Ph.D., University of California, 1968; Ph.D., University of Kansas, 1976.

RUTH J. HAUG, Assistant Research Professor and Coordinator of Administrative and Research Services, Social Science Research Center, B.A., M.A., Ph.D.

JEFFREY HAUP, Assistant Professor of Art, B.F.A., Cleveland Institute of Art, 1998; M.F.A., Indiana University, Bloomington, 1999.

TOMASZ HAUP, Associate Research Professor, Engineering Research Center, B.S., M.S., Ph.D.

BETTIE HAUSER, Lecturer of Human Sciences, B.A., Centre College of Kentucky, 1952; M.S., University of Tennessee, 1957; Ph.D., University of North Carolina at Greensboro, 1977.

BYRON C. HAVARD, Assistant Professor of Instructional Systems, Leadership, and Workforce Development, B.S., Auburn University, 1991; M.S., 1994; Ph.D., University of South Alabama, 1994; Ph.D., Georgia State University, 1999.

ELIZABETH HAWKINS, Coordinator of Interinstitutional Programs, Mississippi State University for Women, 1963; M.A., Mississippi State University, 1965; Ph.D., University of Mississippi, 1968.

PAUL A. HEDIN, Adjunct Professor of Chemistry and Biochemistry and Entomology, B.S., University of Minnesota, 1950; M.S., 1953; Ph.D., 1958; Distinguished Professor of Chemistry.

JAMES J. HIGHTOFT, Adjunct Professor, Plant and Soil Sciences, B.S., Agriculture, Western Illinois University, 1978; M.S., Agronomy, University of Missouri, 1980; Ph.D., Crop Science, University of Kentucky, 1984.

LISA A. HENDERSON, Instructor of Computer Science, B.S., Mississippi State University, 1984; M.S., 1992; Ph.D., University of Southern Mississippi, 1994.

ROBERT E. HENDERSON, Associate Professor of Anesthesiology, B.S., Wichita State University, 1980; D.V.M., Louisiana State University and University of Minnesota, 1992; Ph.D., University of Minnesota, 1995.
F. LEO LYNCH, Assistant Professor of Geology, B.S., Tufts University, 1981; M.S., Dartmouth College, 1985; Ph.D., The University of Texas at Austin, 1992.

DUANE E. LYON, Professor Emeritus of Forest Products, B.S., University of Michigan, 1962; M.S., 1963; Ph.D., University of California at Berkeley, 1967.

RICHARD J. LYONS, Professor of English, B.A., University of Massachusetts, 1973; M.F.A., University of Arizona, 1979; Ph.D., University of Houston, 1991.

DIN-POW MA, Professor of Biochemistry and Molecular Biology, B.S., National Chung-Hsing University, 1970; M.S., National Taiwan University, 1981; Ph.D., Cornell University, 1983.

WENCHAO MA, Associate Professor of Entomology, B.S., Hong Kong Baptist College, 1980; M.S., Mississippi State University, 1985; Ph.D., Cornell University, 1992.

PETER W.K. MA, Assistant Professor of Physics, B.S., Tsinghua University, Beijing, China, 1970; M.S., Vanderbilt University, 1983; Ph.D., 1985.

DONALD J. MABRY, Professor of History, B.S., Oregon State University, 1961; M.A., 1963; M.Ed., Bowling Green State University, 1964; Ph.D., Syracuse University, 1970.

TAYLOR E. MACK, Assistant Professor of Geography, B.A., University of Kansas, 1989; M.A., 1992; Ph.D., Louisiana State University, 1997.

ANDREW J. MACHIN, Associate Professor, B.S., Murdoch University, 1981; B.V.M., Murdoch University, 1983; M.V.S., University of Melbourne, 1988; D.V.M., University of Guelph, 1994.

BISOONDAT MACOON, Assistant Research Professor, Agronomy, B.S., University of Guyana, 1984; M.S., University of Florida, 1992; Ph.D., 1999.

CARL R. MAERTZ, Assistant Professor of Management, B.A., 1980; College, 1989; M.S., The School of Science at Purdue, Indianapolis, 1995; Ph.D., Kent State University, 1998.

DOUGLAS L. MARSHALL, Professor of Food Science and Technology, B.S., University of Nebraska, 1982; M.S., 1985; Ph.D., University of Florida, 1989.

THOMAS G. MATNEY, Assistant Professor of Agriculture and Biological Sciences, B.S., Mississippi State University, 1977; D.V.M., Auburn University, 1979; M.A.M., University of Georgia, 1981.

CAROLYN MALONE, Assistant Professor of Human Sciences, B.S., Mississippi State University, 1974; M.S., 1976.

CAMERON R. J. MAU, Professor of Landscape Architecture and Head of the Department, B.Arch., University of Manitoba, 1965; M.A., University of California (Berkeley), 1964.

DAVID L. MARCM, Professor of Mechanical Engineering, B.S., Purdue University, 1978; M.S., 1981; Ph.D., 1985.

WILLIAM D. MAYFIELD, Assistant Professor of Geology, B.S., University of Windsor, 1997; M.S., Mississippi State University, 1999.

M. F. McCAFFREY, Professor of Computational Engineering, B.S., New Mexico Highlands University, 1960; M.S., New Mexico Highlands University, 1961; Ph.D., Colorado State University, 1966.

RACHEL E. MCCANN, Assistant Professor of Architecture, B.Arch., Mississippi State University, 1980; M.Arch., Georgia Institute of Technology, 1986; M.Phil., University of Cambridge, 1999.

NANCY G. MCCARLEY, Assistant Professor of Psychology, B.A., Mississippi State University, 1984; M.S., 1986; Ph.D., 1993.

JACK C. MCCARTY, Adjunct Professor of Agronomy and Entomology, A.A., Jones County Junior College, 1966; B.S., Mississippi State University, 1970; M.S., 1971; Ph.D., 1976.

WILLIAM H. MCCARTY, Extension Professor, Department of Plant and Soil Science, B.S. Agronomy, Mississippi State University, 1975; M.S. Agronomy, -Soils, Mississippi State University, 1977; Ph.D. Agronomy, Mississippi State University, 1984.

JAMES D. MCCORMICK, Lecturer, Marketing, Quantitative Analysis and Business Law, B.A., St. Olaf College, 1979; M.B.A., Southeastern Louisiana University, 1984.

TIM MCCOURT, Assistant Professor of Art, B.A., Chapman College, 1981; M.F.A., University of Southern California, 1986.

JACOB MCCOY, Professor of Veterinary Medicine, B.S., Oklahoma State University, 1968; M.S., 1971; Ph.D., 1974.

JAMES S. MCCULLY JR., Curriculum and Research Coordinator of the Research and Curriculum Unit and Assistant Professor of Agricultural and Extension Education, B.S., Mississippi State University, 1972; M.S., 1975; Ph.D., 1978.

CHRISTOPHER D. MCDANIEL, Assistant Professor of Poultry Science, B.S., Mississippi State University, 1990; M.S., Purdue University, 1992; Ph.D., University of Georgia, 1995.

SIDNEY T. MCDANIEL, Professor of Botany in Biological Sciences, B.S., Mississippi State University, 1961; M.S., 1962; Ph.D., Florida State University, 1966.

LYNETTE L. MCDOWALD, Professor and Florist Manager, Plant and Soil Sciences, B.S., Horticulture, Mississippi State University.

JOSEPH H. MCGILBERT JR., Director, Mississippi State University Extension Service, and Assistant Professor of Industrial Engineering, B.S.I.M., M.S.E., M.S.E., University of Tennessee, 1972; Ph.D., Texas A&M University.

WILLIAM L. MCGOVERN, Adjunct Assistant Professor of Entomology, B.A., Eastham College, 1961; M.A., Mississippi State University, 1968; Ph.D., 1975.

JACK M. MCMINON, Assistant Professor of Agricultural and Biological Engineering, B.S., Mississippi State University, 1969; M.S., 1972; Ph.D., Tulane University, 1976.

MICHAEL R. MCLAUGHLIN, Adjunct Professor of Plant Pathology, B.S., Tennessee State University, 1971; M.S., 1974; Ph.D., University of Illinois, 1978.

RONALD MCLAUGHLIN, Associate Professor Veterinary Medicine, D.V.Sc., University of Guelph, 1991; D.V.M., University of Missouri-Columbia, 1988.

WILLIAM H. MCMANAHAN Jr., Professor of Chemistry, B.S., Auburn University, 1959; M.S.; 1961; Ph.D., University of Kansas, 1965.

ROBERT C. MCMILLEN, Assistant Research Professor, Social Science Research Center, B.A., Rhodes College, 1991; M.S., Mississippi State University, 1994; Ph.D., University of Georgia, 1998.

JOHN C. McWHORTER, III, Professor of Aerospace Engineering and Engineering Mechanics and Head of the Department of Aerospace Engineering, B.S., Mississippi State University, 1964; M.S., 1965; Ph.D., University of Illinois, 1969; P.E.

PAUL D. MEINTS, Assistant Professor of Seed Technology, Department of Plant and Soil Sciences, B.S., University of Minnesota, 1952; M.S., 1954; Ph.D., 1960.

CECILIA R. MOLOCH, Instructor of Geography, University of Windsor, 1997; M.S., Mississippi State University, 1999.

ROBERT MELNIR, Professor of Computational Engineering, B.S., Polytechnic Institute of Brooklyn, 1956; M.S., Polytechnic Institute of Brooklyn, 1961; Ph.D., Polytechnic Institute of Brooklyn, 1966.
State University, 1976; M, Ed. Southeastern Louisiana University, 1992; Ph.D. Louisiana State University, 1995.

DAVID L. POSEY, Associate Professor, School of Forestry, University of Arizona, 1987; Ph.D. University of Michigan, 1993.

DONALD E. POWELL, Associate Professor, Department of Biology, University of North Carolina, 1993; Ph.D. Arizona State University, 1993.

DANIEL R. PRESTON, Assistant Professor, Department of Agricultural Economics, Texas A&M University, 1988; Ph.D. The Ohio State University, 1990.

ROBERT W. PRESTON, Associate Professor, Department of Animal Science, University of Nebraska-Lincoln, 1989; Ph.D. University of Illinois, 1992.

J. TRAVIS PRIMERO, Associate Professor, Department of Plant Science and Technology, University of Idaho, 1990; Ph.D. University of California, 1993.

K. H. PRESTON, Professor, Department of Environmental Science, Texas A&M University, 1980; Ph.D. University of California, 1991.

GEORGE H. PRESTON, Professor, Department of Animal Science, Oregon State University, 1976; Ph.D. University of California, 1980.

LINDA A. PRESTON, Assistant Professor, School of Veterinary Medicine, University of Georgia, 1992; Ph.D. University of Georgia, 1995.

T. P. PRESTON, Assistant Professor, Department of Plant Science and Technology, University of Idaho, 1990; Ph.D. University of California, 1993.

CAROLYN PRESTON, Assistant Professor, Department of Environmental Science, Texas A&M University, 1980; Ph.D. University of California, 1991.

J. B. PROCTOR, Associate Professor, Department of Biological Sciences, University of Southern Mississippi, 1982; Ph.D. University of Mississippi, 1986.

T. B. PROCTOR, Assistant Professor, Department of Biological Sciences, University of Southern Mississippi, 1982; Ph.D. University of Mississippi, 1986.

B. G. Pritchett, Associate Professor, Department of Plant Science and Technology, University of Idaho, 1990; Ph.D. University of California, 1993.

R. H. Pritchett, Professor, Department of Plant Science and Technology, University of Idaho, 1990; Ph.D. University of California, 1993.

R. W. PRITCHETT, Associate Professor, School of Forestry, University of Arizona, 1987; Ph.D. Arizona State University, 1993.

T. W. PRITCHETT, Assistant Professor, Department of Plant Science and Technology, University of Idaho, 1990; Ph.D. University of California, 1993.

J. M. PRITCHETT, Assistant Professor, Department of Plant Science and Technology, University of Idaho, 1990; Ph.D. University of California, 1993.

J. W. PRITCHETT, Associate Professor, Department of Plant Science and Technology, University of Idaho, 1990; Ph.D. University of California, 1993.

G. W. PRITCHETT, Assistant Professor, Department of Plant Science and Technology, University of Idaho, 1990; Ph.D. University of California, 1993.

T. W. PRITCHETT, Assistant Professor, Department of Plant Science and Technology, University of Idaho, 1990; Ph.D. University of California, 1993.

J. W. PRITCHETT, Associate Professor, Department of Plant Science and Technology, University of Idaho, 1990; Ph.D. University of California, 1993.
ROBERT WEST, Assistant Professor of English, B.A., Wake Forest University, 1991; M.A., University of North Carolina at Chapel Hill, 1993; Ph.D., 1998.

CHARLES H. WHITE, Professor of Food Science and Technology and Head of the Department, B.S., Mississippi State University, 1966; M.S., 1969; Ph.D., University of Missouri, 1971.

EMILIO R. WHITE, Associate Professor and Architect Branch Librarian, Library, B.A., Mississippi State College for Women, 1962; M.S.L., University of Alabama, 1981.

HAROLD WHITE, Lecturer of Management, Meridian Campus, B.S., Mississippi State University, 1972; M.B.A., Mississippi State University, 1984; Ph.D., University of Mississippi, 1996.

JACK H. WHITE, Associate Professor of English, Director, University Honors Program/Envirionmental Scholarships, and Coordinator of Cooperative Center for Study Abroad, B.A., Texas A&M University at Commerce, 1965; M.A., 1967; Ph.D., Texas Tech University, 1978.

JEFFREY G. WHITE, Adjunct Professor, Department of Plant and Soil Sciences, B.A. Rice University, 1972; M.S., Cornell University, 1987; Ph.D., Cornell University, 1988.

LARRY R. WHITE, Associate Professor of Banking and Finance, B.A., Mississippi State University, 1969; M.B.A., University of Georgia, 1975; Ph.D., 1985.

MICHAEL C. WHITE, Professor of Management, B.A., University of Wisconsin, 1968; M.A., Purdue University, 1974; Ph.D., University of Georgia, 1978.

RONNIE W. WHITE, Leader, Organizational Development and Associate Professor of Agricultural Information Science and Education, B.S., Austin College, 1981; M.S., 1983; Ph.D., Texas A&M University, 1985; E.D. Mississippi State University, 1986.

THOMAS D. WHITE, Professor and Head of Civil Engineering, B.S., Mississippi State University, 1964; M.S., 1971; Ph.D., Purdue University, 1981.

STEVEN D. WHITNEY, Associate Professor of Political Science and Education, B.A., Northern Michigan University, 1981; M.A., Troy State University, 1990; Ph.D., Florida State University, 1994.

LOUIS M. WILKINSON, Associate Laboratory Animal Veterinarian, B.S., Tulane University, 1992; D.V.M., Mississippi State University, 1996.

G. WAYNE WILKINSON, Assistant Professor of Landscape Architecture, B.A., Mississippi State University, M.A., Mississippi State University, M.L.A., Louisiana State University, 1988.

SCOTT WILLARD, Assistant Professor of Animal and Dairy Sciences, B.S., University of Missouri, 1980; M.S., Texas A&M University, 1993; Ph.D., Texas A&M University, 1996.

KENNETH O. WILLEFORD, Associate Professor of Biochemistry and Molecular Biology, B.S., California State University, Fullerton, 1978; M.S., 1982; Ph.D., University of California at Riverside, 1986.

JEFFREY LEE WILLERS, Adjunct Assistant Professor of Entomology, B.S., Millsaps College, 1977; M.S., Mississippi State University, 1980; Ph.D., 1986.

CAROL HARRIS WILLIAMS, Associate Professor of Microbiology in Biological Sciences, B.S., Mississippi State University, 1972; M.S., 1974.

CLYDE V. WILLIAMS, Associate Professor of English, B.A., Millsaps College, 1959; M.A., Mississippi State University, 1961; Ph.D., Louisiana State University, 1969.

JERRY DAVID WILLIAMS, Professor of Music Education, B.M.E., Murray State College, 1952; M.M., Northwestern University, 1953; Graduate School of Peabody College.

MICHAEL R. WILLIAMS, Extension Professor of Entomology, B.S., Mississippi State University, 1968; M.S., 1969; Ph.D., Auburn University, 1977.

RAYMOND S. WINTON, Professor of Electrical and Computer Engineering, B.S., North Carolina State University, 1962; Ph.D., Duke University, 1965.

NORMAN WINTER, Extension Instructor-Ornamental Horticulture, B.A., Hardin-Simmons University, 1974; M.S., Texas A&M University, 1981.

DAVID O. WIPF, Associate Professor of Chemistry, B.S., The University of Michigan, 1965; M.S., Michigan State University, 1967; Ph.D., 1972.

DAVID WISE, Associate Research Professor, B.S., Southwest Texas State University, 1987; M.S., Clemson University, 1989; Ph.D., 1994.

DWAYNE A. WISE, Professor of Botany in Biological Sciences, B.A., David Lipscomb College, 1967; M.S., Florida State University, 1970; Ph.D., 1972.

WILLIAM M. WISEMAN, Director of John C. Sterner Institute of Government District University, B.S., Mississippi State University, 1973; M.S.S., 1974; M.P.P.A., 1980; Ph.D., 1986.

RICHARD B. WOLF, Associate Professor of English, B.A., Yale College, 1969; University of Chicago, 1971; Ph.D., 1976.

WESLEY WOLFE, Assistant Professor of Agricultural Economics, B.S., Mississippi State University, 1966; M.S., 1960.

ROBERT E. WOLVERTON JR, Assistant Professor and Database Mainte- nance Authority, Control Library, Library, B.A., Miami University, 1976; M.S., Miami University, 1978; Ed.D., Mississippi State University, 1990; M.L.I.S., Louisiana State University, 2000.

ROBERT E. WOLVERTON SR, Professor of Foreign Languages, B.A., Hanover College, 1948; M.A., University of Michigan, 1949; Ph.D., University of North Carolina, 1954.

H. ALAN WOOD, Director, Life Sciences & Biotechnology Institute; and Professor of Biology, B.S., Mississippi State University, 1974; M.S., 1976; Ph.D., 1979.

DAVID WOOD, Assistant Professor, B.S., Troy State University, 1963; M.S., Purdue University, 1965; Ph.D., Purdue University, 1968.

PETER WOOD, Associate Professor of Sociology, Coordinator of Criminal Justice and Corrections; and Research Fellow, Social Science Research Institute, B.A., M.A., Vanderbilt University, 1985; Ph.D., Vanderbilt University, 1988.

ROBERT D. WOODS, Assistant Professor of Aerospace Studies, B.S., Air Force Academy, 1989; M.A., The Air Force Institute of Technology.

MARK C. WORTHY, Instructor and Instructional Support Coordinator for Physics, B.S.E., University of Alabama in Huntsville, 1992; M.S.E., 1992.

DAREK WOZNIAK, Visiting Professor of Counseling Education, Educational Psychology, and Special Education, B.A., University of Maribor, 1992; M.A., Northeastern University, 1998; Ph.D., University of Texas, 2002.

DAONGFENG WU, Assistant Professor, B.S., Peking University, Beijing, PR, China, 1990; M.S., 1993; M.S., UC Santa Barbara, 1999; Ph.D., 1999.

SHUHUI WU, Assistant Professor of History, B.A., Tsing-wu (Soochow) Uni-

versity in Taibei, Taiwan, 1979; M.L.S., Free University Berlin, Germany, 1982; Ph.D., University of Texas, 1990.

JOHN EDWARD WYATT, Assistant Professor of Instructional Systems, Leader-

ship, and Workforce Development, CHIN YUN-LONG, Assistant Professor of Civil Engineering, B.S., Southeast University of China, 1984; M.S., Southeast University of China, 1987; Ph.D. Virginia Polytechnic Institute and State University, 1996; PE, 1996.

J. SCOTT YOUNG, Professor of Instructional Systems, Leadership, and Workforce Development, CHIN YUN-LONG, Assistant Professor of Civil Engineering, B.S., Southeast University of China, 1984; M.S., Southeast University of China, 1987; Ph.D. Virginia Polytechnic Institute and State University, 1996; PE, 1996.

EMERITI FACULTY

JIMMY D. AKERS, Professor Emeritus of Electrical and Computer Engineering
ROBERT W. AHW, Professor Emeritus of Economics
TIP HENRY ALLEN, JR., Professor Emeritus of Political Science
EARL G. ALLEY, State Chemist and Professor Emeritus of Chemistry
RONALD G. ALTY, Professor Emeritus of Biological Sciences
GALE P. AMMERMAN, Professor Emeritus of Food Science and Technology
NEIL AMOS, Professor Emeritus of Curriculum and Instruction
MARY ELEANOR ANDERSON, Instructor Emerita of Communication
ROBERT G. ANDERSON, Professor Emeritus of Communication
ANN P. ANDREWS, Instructor Emerita of English
CECIL HUNTER ANDREWS, Professor Emeritus of Plant and Soil Sciences
DALE HOWARD ARNER, Professor Emeritus of Wildlife and Fisheries
ANDREW W. ARK, Professor Emeritus of Sociology
BRYAN BAKER, JR., Professor Emeritus of Animal Science
EVERARD G. BAKER, Associate Professor Emeritus of Chemical Engineering
BILLIE J. BALL, Professor and Department Head Emeritus of Electrical and Computer Engineering
JACK L. BARTLETT, Professor Emeritus of Art
BEN F. BARRENTINE, Professor Emeritus of Biochemistry, Animal Science, and Chemistry
LIDA K. BARRETT, Professor Emerita of Mathematics and Statistics and Dean Emerita of the College of Arts and Sciences
CHARLES C. BASSEN, Professor Emeritus of Agronomy
HABBIB BAZARI, Professor Emeritus of Business and Industry
H. JOE BEARDEN, Professor Emeritus and Department Head Emeritus of Dairy Science
LYLE CHRISTIAN BEHR, Dean Emeritus of the College of Arts and Sciences, Professor Emeritus of Chemistry
J. THOMAS BELL, Professor Emeritus in the Academic Program of the College of Veterinary Medicine
WILLIAM D. BELL, Associate Professor of History and Chairman Emeritus of the Division of Arts and Sciences, Meridian Campus
GEORGE BENNET, Professor Emeritus of Aerospace Engineering
GARY BENTON, Professor Emeritus of Education
RICHARD D. BENTON, Professor Emeritus of Electrical and Computer Engineering
EULA M. BETTS, Associate Professor and Associate Dean Emeritus of University Libraries
KRISHNA PRAASAD G. BHANSALI, Professor Emeritus of Political Science
CALVIN T. BISHOP, Associate Professor Emeritus of Landscape Architecture
JOE M. BLACKBURN, Professor Emeritus of Educational Leadership
BENJAMIN BLANEY, Professor Emeritus of Foreign Languages
DONALD J. BLASINGAME, Emeritus Extension Plant Pathologist
LOUIS H. BLUHM, Professor Emeritus of Sociology, Anthropology, and Social Sciences
DONALD BOATWRIGHT, Assistant Professor Emeritus of Aerospace Engineering
CHARLES W. BOBBITT, Associate Professor Emeritus of Engineering Mechanics
LOIS M. BOGGESS, Professor Emerita of Computer Science
MARTIN T. BOND, Professor Emeritus of Civil Engineering and Director Emeritus of the Resources Research Institute
MARTHA O. BOOTH, Assistant Professor Emerita of University Libraries
CHARLES W. BOUCHILLON, Professor Emeritus of Mechanical Engineering
ALBERT H. BOYD, Professor and Department Head Emeritus of Plant and Soil Sciences
CATHERINE R. BOYD, Professor Emerita of Human Sciences
LEHOR H. BOYD, Professor Emeritus of Animal and Dairy Sciences
LARRY BRANCH, Assistant Professor Emeritus of Industrial Engineering
SHELBY BRIGHTWELL, Professor and Head Emeritus of Health, Physical Education, Recreation and Sport
HENRY D. BRODNAX, JR., Director and Specialist Emeritus of Southern Agronomic Development Center
LEWIS R. BROWN, Professor Emeritus of Microbiology in the Department of Biological Sciences
RONALD A. BROWN, Director Emeritus of Mississippi State University Extension Service; Professor Emeritus of Agricultural Information Science and Education
GORDON KEY BRYAN, Professor Emeritus of Political Science
ELLEN S. BRYANT, Professor Emerita of Sociology
GEORGE BUEHLER, Professor Emeritus of Foreign Languages
GIFFORD BULL, Associate Professor Emeritus of Aerospace Engineering
HARRY DEAN BUNCH, Professor Emeritus of Agronomy and Director Emeritus of International Programs
SANDRA P. BURKETT, Professor Emerita of Curriculum and Instruction
ROFFIE BURT, Associate Professor Emeritus of Civil Engineering
CHARLES T. CARLEY, JR., Professor Emeritus of Mechanical Engineering and Head Emeritus of Mechanical and Nuclear Engineering
JOE THOMAS CEDDOKE, Professor Emeritus of Dairy Manufacturing (Dairy Foods)
KARL WILLIAM CARLSON, Associate Professor Emeritus of Electrical Engineering
WALTHER R. CARNES, Professor Emeritus of Aerospace Engineering and Associate Dean Emeritus of the College of Engineering
JAMES R. CARPENTER, Director Emeritus of the Mississippi Cooperative Extension Service
JUNE C. CARPENTER, Professor Emeritus of Management and Information Systems
JAMES R. CHATHAM, Professor Emeritus of Foreign Languages
LUNG-HUA CHEN, Professor Emeritus of Agriculture and Biological Engineering
DANNY L. CHEATHAM, Assistant Director Emeritus, Mississippi Cooperative Extension Service
LUNG-HUA CHEN, Professor Emeritus of Agricultural and Biological Engineering
O. A. CLEVELAND JR., Professor Emeritus of Agriculture Economics
CHARLES B. CLETT, Professor Emeritus of Aerospace Engineering and Head Emeritus of the Department of Aerospace Engineering
AVEAN WAYNE COLE, Professor Emeritus of Plant and Soil Sciences
FRANCIS COLLENS COLE, Professor Emeritus of Computer Science
MORRIS W. H. COLLINS, JR., Professor Emeritus of the John C. Stennis Institute
LEON L. COMBS, Professor and Head Emeritus of Chemistry
ROBERT L. COMBS, Professor Emeritus of Entomology
DAVID CORNELL, Professor Emeritus of Chemical Engineering
MARION W. COREY, Professor Emeritus of Civil Engineering
CHRIS CORRERO, Emeritus Professor of Curriculum and Instruction and Associate Dean Emerita of Education
HOMER SNEED COSKREY, JR., Dean Emeritus of Continuing Education
FRANK E. COTTON, Professor Emeritus and Department Head Emeritus of Biological Engineering
MARIAN B. COUILLARD, Associate Professor Emerita of Communication
WENNEN R. COUILLARD, Professor Emeritus of Agricultural Economics
JOHN C. CRECINK, Professor Emeritus of Agricultural Economics
W. LAWRENCE CROFT, Professor and Head Emeritus of Physics and Astronomy
WILLIAM LEWIS CROSS, Associate Professor Emeritus of Accounting and Associate Dean Emeritus of the College of Business and Industry
TERRY T. CROW, Professor Emeritus and Head Emeritus of Physics and Astronomy
LORAINE PERRY CROWDER, Professor Emeritus of Music Education
LORENZO M. CROWELL, Associate Professor Emeritus of History
ARMANDO A. DE LA CRUZ, Professor Emeritus of Biological Sciences
DOMINIC J. CUNETTO, Professor Emeritus of Communication
JOSEPH FRANCIS CURRY, Professor Emeritus of Accounting
TROY E. DANIEL, Professor Emeritus of Accounting
HENRY A. DAUM, JR., Associate Professor Emeritus of Sociology/Social Work
EDNA RUTH DAVIS, Professor Emerita of Social Work, Sociology and Anthropology
FRANK M. DAVIS, Adjunct Professor Emeritus of Entomology
FRED DAVIS, Professor Emeritus of Computer Science
ELBERT J. DAY, Professor Emeritus of Poultry Science
DONALD W. DEARHOLT, Professor Emeritus of Computer Science
ARMANDO A. DE LA CRUZ, Professor Emeritus of Biological Sciences
JAMES CURTIS DELOUCHE, Professor Emeritus of Plant and Soil Sciences
JACK E. DENSON, Professor Emeritus of Physics and Astronomy
KEITH H. DENSON, Professor Emeritus of Civil Engineering
JAMES G. DILLARD, Professor Emeritus of Agricultural Economics
JIMMY L. DODD, Professor Emeritus of Electrical Engineering
HENRY J. DONAGHY, Professor Emeritus of English
DON DOTT, Professor Emeritus of Economics
NORMAN C. DOWNEY, Assistant Professor Emeritus of University Libraries
WALTER JOSEPH DRAFAL, Professor Emeritus of Experimental Statistics and Agronomy and Head Emeritus of Experimental Statistics
E. SAM DUDLEY, Professor Emeritus of Communication
JULIE DUGES, Assistant Professor Emerita of Curriculum and Instruction
BILLY JACK EATHERLY, Professor Emeritus of Economics, College of Business and Industry
BETTY J. ECTOR, Associate Professor Emerita of Human Sciences
JOSEPH B. EDMOND, Professor Emeritus of Horticulture
FELIX WING EDWARDS, Professor Emeritus of Agricultural and Biological Engineering
MOHAMED EL ATTAR, Professor Emeritus of Sociology
WILLIAM W. ELAM, Professor Emeritus of Forestry
WILLIAM EDWIN ELLIS, Professor Emeritus of Computer Science
DONALD WARREN EMERICH, Emeritus Professor of Chemistry
WILLIAM E. EMERICH, Professor Emeritus of Mathematics and Statistics
JAMES W. EPPS, Professor Emeritus of Civil Engineering
HARRIET WERNER ESPI, Professor Emeritus of Animal and Dairy Science
LESTER ESTER, JR., Professor Emeritus of Plant and Soil Sciences
WILLIAM H. EUBANKS, Professor Emeritus of Engineering Graphics
LEANNE FAZIO, Professor Emerita of Music Education
THOMAS H. FISHER, Professor Emeritus of Chemistry
ROBERT ROODY FOIL, Professor Emeritus of Forestry and Vice President Emeritus of Veterinary Medicine
RICHARD E. FORBES, Professor Emeritus of Mechanical Engineering
ROBERT M. FORD, Professor Emeritus of Architecture
BILL R. FOSTER, Assistant Vice President Emeritus of Student Affairs
WILLIAM R. FOX, Professor of Agricultural and Biological Engineering and Dean Emeritus of Agriculture and Life Sciences
MARY F. FUTRELL, Professor Emerita of Home Economics
JOHN W. FULLER, Professor Emeritus of Animal and Dairy Sciences
JAMES O. GARNER, JR., Professor Emeritus of Plant and Soil Sciences
JAMES D. GASSAWAY, Professor Emeritus of Electrical and Computer Engineering
ANN T. GEORGE, Professor Emerita of Curriculum and Instruction and Director Emerita of The Learning Center
VERNON D. GIFFORD, Professor Emeritus of Curriculum and Instruction
JOHN GIOVANNI B. GIGLIONI, Professor Emeritus of Management and International Business
ANITA T. GEORGE, Professor Emerita of Curriculum and Instruction and Director Emerita of Management
RUTHEA S. GILBERT, Professor and Head Emerita of Economics
WILLIAM A. GILES, Associate Professor Emeritus of Political Science
BRUCE GLICK, Professor Emeritus of Poultry Science
LYNN MERWIN GOURLEY, Professor Emeritus of Plant and Soil Sciences
CLINTON H. GRAVES, Professor Emeritus of Plant Pathology
WILLIAM H. GRAVES, Professor of Counselor Education and Educational Psychology and Dean Emeritus of Education
ALTON C. GRIMES, Professor Emeritus of Foreign Language
PAUL GROOTKERK, Professor Emeritus of Art
JOHN E. GUNTER, Professor Emeritus of Forestry and Dean Emeritus of Forest Resources
ROBERT D. GUYTON, Professor Emeritus of Electrical Engineering
FAY HAGAN, Professor Emerita of Agricultural and Experimental Statistics
HAROLD B. HALL, Dean Emeritus of Agricultural Economics
WILLIAM B. HAMILL, Professor Emeritus of Agricultural Economics
THOMAS H. HANDY, Associate Professor Emeritus of Political Science
MARY LOUISE HARE, Professor Emerita of Botany
WOODROW W. HARE, Professor Emeritus of Plant Pathology and Weed Science
EDEWELL O. HAWKINS, Professor Emeritus of English
MERRILL L. HAWKINS, Dean Emeritus of the College of Education
ROBERT L. HAYNES, Professor Emeritus of Poultry Science
ROBERT B. HEAD, Emeritus Cotton Extension Entomologist
JAMES L. HEITZ, Professor Emeritus of Biochemistry and Molecular Biology
HARRY R. HEFFNER, Associate Professor Emeritus of Mathematics
DORA R. HERRING, Professor Emerita of Accountancy
JOHN W. HERRING, JR., Professor Emeritus of Electrical and Computer Engineering
ROBERT A. HERSHBARGER, Peter K. Lutken Chair of Insurance and Professor Emeritus of Finance
LESLIE R. HESTER, Professor Emeritus of Aerospace Engineering
CAROLINE HILL, Professor Emeritus of Agriculture
DONALD O. HILL, Professor Emeritus of Chemical Engineering
HARRY FRANKLIN HODGES, Professor Emeritus of Plant and Soil Science
IAN H. HOGG, Professor Emeritus of Forestry
GERTRUDE HOWARD, Professor Emeritus of Management
D. DONOVAN HORN, Professor Emeritus of Physical Education
WARREN F. HOUSLEY, Professor and Head Emeritus of Counselor Education and Counseling Psychology
EVERETTE B. HOWELL, Professor Emeritus and Head Emeritus of Physics and Astronomy
VERNER G. HURT, Professor Emeritus of Agricultural Economics and Director Emeritus of Mississippi Agricultural and Forestry Experiment Station
FLAVOUS L. HUTCHINSON, Professor Emeritus of Business Law
FRANKLIN M. INGELS, Professor Emeritus of Electrical and Computer Engineering
MARTHA B. IRBY, Assistant Professor Emeritus of University Libraries
JEROME A. JACOBS, Professor Emeritus of Biological Sciences
PAUL H. JACOBS, JR., Professor Emeritus of Electrical Engineering
HARRY A. JACOBS, Professor Emeritus of Wildlife and Fisheries
D. CLAYTON JAMES, Professor Emeritus of History
MARY A. JASPER, Associate Professor Emeritus of Industrial Engineering
DAVID P. JENNINGS, Professor Emeritus of Veterinary Medicine
LARRY RAY JOHNSON, Professor Emeritus of Industrial Engineering
E. WILLIAM JONES, Professor Emeritus of Mechanical Engineering
GEORGE WASHINGTON JOHNSTON, Professor and Head Emeritus of Botany
GORDON C. JOHNSTON, Professor Emeritus of Curriculum and Instruction
E. WYNN JONES, Professor Emeritus of the Research Program in the College of Veterinary Medicine
GORDON E. JONES, Professor Emeritus of Physics and Astronomy and Associate Dean Emeritus of the College of Arts and Sciences
JAMES KENNETH JONES, Professor Emeritus of Physical Education
WILLIAM F. JONES, Professor Emeritus of Veterinary Medicine
WILLIAM F. JONES, Professor Emeritus of Plant and Soil Sciences
JOHN MORGAN KAYE, Assistant Professor Emeritus of Geology and Geography
DONALD M. KEADY, Professor Emeritus of Geology and Geography
ROBERT KEIRS, Associate Professor Emeritus of Veterinary Medicine
THOMAS F. KELLOGG, Professor Emeritus of Biochemistry
MAURICE V. KENNEDY, Professor Emeritus of Biochemistry
ESSE HAROLD REYES, Associate Professor and Director Emeritus of Social Science
JOE KHATENA, Professor and Head Emeritus of Educational Psychology
LOIS T. KILGORE, Professor Emerita of Home Economics
WALLACE E. KILLEN, Professor Emeritus of Agricultural Economics
ERROL T. KINER, JR., Professor Emeritus of Agricultural and Biological Engineering
PAMELA C. RIRK, Professor Emerita of Health, Physical Education, Recreation and Sport
JANE V. KISER, Professor Emerita of School of Human Sciences
WILLIAM E. KNIGHT, Adjunct Professor Emeritus of Agronomy
HAROLD A. KOELLING, Professor Emeritus of Chemical Engineering
CHIANG-HAI KUO, Professor Emeritus of Chemical Engineering
JAMES D. LANCASTER, Distinguished Professor Emeritus of Agronomy
WARREN A. LAND, Professor Emeritus of Curriculum and Instruction
MARIAN L. LASTER, Professor Emeritus of Entomology
TROY J. LASWELL, Professor Emeritus of Geology and Geography
MOZELLE E. LEACH, Professor Emeritus of Curriculum and Instruction
C. LEE, Associate Dean Emeritus for International Programs and Professor Emeritus of Education
JOHN E. LEE, JR., Professor and Head Emeritus of Agricultural Economics
GEORGE E. LEWIS, Professor and Director of Library Services Emeritus
HARVEY S. LEWIS, Dean Emeritus of Business and Industry, and Professor Emeritus of Finance
WILLIAM F. LOCKE, Professor Emeritus of Botany
MARIANO LOPEZ, Professor Emeritus of Forest Sciences
WENDELL J. LORO, Research Professor, STRC. B.S., M.S., Ph.D.
NED W. LOWELL, Professor and Head Emeritus of Educational Leadership
CHARLES D. LOWERY, Professor and Head Emeritus of History
ROBERT A. HERSHBARGER, Peter K. Lutken Chair of Insurance and Professor Emeritus of Finance and Economics
DUANE E. LYNON, Professor Emeritus of Forest Products
ROBERT A. MARRASHEL, Professor Emeritus of Anthropology
JOHN E. MARRS, Professor Emeritus of History
EDWARD CURTIS MARTIN, JR., Professor Emeritus of Landscape Architecture
DIA L. MARTIN, Adjunct Professor Emeritus of Entomology
JAMES H. MARTIN, Professor Emeritus of Food Science and Technology
ROBERT J. MARTIN, Specialist Emeritus, Mississippi Cooperative Extension Service
WAYNE C. MASTIN, Professor Emeritus of Mathematics and Statistics
RALPH KENNETH MATTHEWS, JR., Professor and Department Head Emeritus of Agricultural and Biological Engineering
GERALD A. MATTHEWS, Associate Professor Emeritus of Computer Science
MARY E. MAULDIN, Associate Professor Emeritus, University Libraries
NATALIE MAYNOR, Professor Emerita of English
WILLIAM A. MECLING, Professor Emeritus of English
J. LEONARD MCCULLOUGH, Associate Dean Emeritus and Professor Emeritus of Continuing Education
WILLIE LEE MCDANIEL, JR., Provost & Vice President Emeritus for Academic Affairs and Professor Emeritus of Electrical Engineering
JEWEL CHESTER MCKEE, JR., Professor Emeritus of Electrical Engineering, Vice President Emeritus for Research and Graduate Studies
JOHN C. MCHORTER, III, Professor and Head Emeritus of Aerospace Engineering
H. DWIGHT MERCER, Professor and Dean Emeritus of Veterinary Medicine
DAVID B. MILLER, Professor Emeritus of Electrical and Computer Engineering
HOWARD W. MILLER, Professor Emeritus of Animal and Dairy Sciences
JAMES P. MINTZ, Jr., Professor Emeritus, Chemistry and State Chemist Emeritus, Mississippi State Chemical Lab
LUCEILLE L. MITLIN, Assistant Professor Emerita, Library
JAMES E. MOAK, Professor Emeritus of Forestry
DAVID MOFFETT, Professor Emeritus of Educational Leadership and Dean Emeritus of Meridian Branch
LAMAR MOODY, Professor and Head Emeritus of Educational Leadership
ARNOLD J. MOORE, Dean of Education and Professor Emeritus of Education
CHARLES N. MOORE, Professor Emeritus and Head Emeritus of Business Information Systems and Quantitative Analysis
GLOVER MOORE, Professor Emeritus of History
WILLIAM F. MOORE, Emeritus Extension Plant Pathologist
HAROLD J. MORRIS, Professor Emeritus of Educational Leadership
JOHN T. MORROW, Professor Emeritus of Biological Sciences
RICHARD H. MULLENAX, Professor Emeritus and Department Head Emeritus of Plant and Soil Sciences
WALLACE A. MURPHREE, Professor Emeritus of Philosophy and Religion
MELE WENTWORTH MYERS, Professor Emeritus of Geology and Geophysics
HARRY W. NASH, Professor Emeritus of Marketing and Head Emeritus of Marketing, Quantitative Analysis and Business Law
VICTOR NASH, Professor Emeritus of Agricultural Economics
WILLIAM W. NEEL, Professor Emeritus of Entomology
LYLE ENGRAN NELSON, Professor Emeritus of Agronomy
WALTER B. NEWSOM, Professor Emeritus of Management, College of Business and Industry
WILLIAM F. NEWSOM, Professor Emeritus of Horticulture and Horticulture Extension
JOE DIER, B.S., Assistant Sports Information Director
BROCK DULANEY, B.B.A., M.Ed., Video Coordinator
JOE LEE DUNN, B.S., Defensive Coordinator
DON EDWARDS, B.S., Assistant Coordinator/Game Operations
SHARON FANNING, B.S., M.S., Head Women’s Basketball Coach
WILLIAM FINDLEY, B.S., M.E., Head Women’s Soccer Coach
STACEY FRANKLIN, B.S., Assistant Women’s Basketball Coach
GERARD FREMIN, B.S., M.S., Assistant Football Coach
BRENT FREY, B.S., Assistant Coordinator/Game Operations
JEANNINE GAUDREAU, Assistant Women’s Softball Coach
NICKY GOETZE, B.S., Head Men’s Golf Coach
DEBBY GOLSON, Administrative Assistant
ARTHUR “PETE” GOODWIN, B.S., M.A., Assistant Women’s Softball Coach
MIKE GRANT, B.S., M.S., Head Strength Coach
SYLVAIN GUICHARD, B.S., Assistant Men’s Tennis Coach
JOHN HENDRICK, B.S., Assistant Football Coach
TODD HUNT, B.B.A., M.Ed., Director of Humphrey Coliseum and Athletic Concession
ANDY JACSON, B.S., Head Men’s Tennis Coach
MICHELLE JENKINS, B.S., M.S., Assistant Academic Counselor
SAMYE JOHNSON, B.S., M.Ed., Associate Athletic Director/Women’s Sports
STRATON E. KARATASSOS, M.Ed., Assistant Athletic Director/Development
GEORGE T. KERIN, B.S., Assistant Compliance Officer
ROBERT KIRBY, B.S., Assistant Men’s Basketball Coach
LIANNE LAIRD, Assistant Ticket Manager
TRACY LANE, B.S., M.Ed., Head Women’s Tennis Coach
JOSEPH LOGAN, JR., B.S., M.S., Assistant Athletic Trainer
BRENDAN LUCAS, Assistant Ticket Manager
BYRON MCCAUL, B.S., Administrative Assistant
JOCELYN MCCOLBERY, B.S., Assistant Women’s Basketball Coach
DUNCAN MCLAREN, B.S., B.A., Associate Athletic Director/Internal Operations
MARY MCLENDON, B.S., M.S., Assistant Athletic Trainer
PAT MCMAHON, B.A., M.Ed., Head Baseball Coach
CARLA MILLARD, B.S., Media Relations Assistant
GEORGE MILLER, B.S., M.A., Coordinator Tutorial Program
STEPHEN P. MCKOY, B.S., Head Athletic Trainer
MIKE NEMETH, B.S., M.A., Associate Athletic Director/Media Relations
BRENDA NEUBAUER, B.S., M.Ed., Coordinator of Services, Multi-Purpose Building
JEFFREY NEUBAUER, B.S., M.S., Operations Coordinator, Multi-Purpose Building
NICOLE OAKES, B.S., Assistant Academic Counselor
SARA OSWALT, Assistant Ticket Manager
TOMMY RAFFO, B.A., M.A., Assistant Baseball Coach
GEORGE WESLEY REED, M.E., Associate Athletic Director/Development
KATHERINE RICE, B.S., Administrative Assistant
DAVID ROSINSKI, B.S., M.S., Associate Sports Information Director
CHRISTI SANDERS, B.S., Head Women’s Golf Coach
AL SCHMIDT, B.S., M.S., Head Track Coach
JACKIE SHERILL, B.A., Head Football Coach
PHIL SILVA, B.S., Equipment Manager
SHARON SIMMONS, B.S., M.S., Assistant Track Coach
MELVIN SMITH, B.S., B.A., Assistant Football Coach
RICK STANBURY, B.S., M.A., Head Men’s Basketball Coach
CRAIG STUMP, B.S., M.Ed., Assistant Football Coach
BOBBY TOMLINSON, B.S., Coordinator of Game Operations
TONY TOMMASI, B.A., Assistant Women’s Soccer Coach
JIM TOMPKINS, B.S., M.S., Assistant Football Coach
JIM VANHOOTEGEM, B.A., Assistant Track Coach
PATRICIA WALLACE, Ticket Manager
RANI WHITSON, B.S., Assistant Women’s Volleyball Coach
DAVID WILSON, B.S., Assistant Football Coach
PHILLIP “SPARKY” WOODS, B.S., Offensive Coordinator
MILDRED YEATMAN, Assistant Business Manager
V. OTHER DIVISIONS, UNITS, and AGENCIES

A. MAJOR DIVISIONS and STAFFS

ADMINISTRATIVE AFFAIRS

Responsible for Human Resources management; operation and maintenance of the physical plant; campus landscape operations; support services; the operation of auxiliary enterprises, including the laundry, dining services and University-owned faculty and staff housing.

W. Gaddis Hunt, B.S. M.Ed., Chief Administrative Officer

BUDGET and FINANCIAL OFFICE

Responsible for receiving, managing, and disbursing funds from all sources; for fiscal planning and the development of budgets; and control of purchasing.

J. Wayne Bland, B.S., M.C.S., Controller and Treasurer

C. Wayne Reed, B.S., Assistant Chief and Financial Officer

CONTROLLER and TREASURER’S OFFICE

The Controller and Treasurer’s Office primary mission is to (1) provide financial service to the University community and its customers, (2) protect the University’s financial resources and (3) insure compliance with both internal and external financial regulations, policies and procedures.

CONTINUING EDUCATION

(For functions, organizations, and programs of the Division of Continuing Education, see PART II. THE COLLEGES and SCHOOLS.)

Clayborne D. Taylor, P.E., Ph.D., Dean of Continuing Education

FOREST and WILDLIFE RESEARCH CENTER

The Forest and Wildlife Research Center (FWRC) was authorized by the Mississippi Legislature with passage of the Renewable Natural Resources Act of 1994. This Act consolidated within a single administrative unit at Mississippi State University programs of research which focus on the forest, wildlife, and fisheries resources of Mississippi. To this end the FWRC was assigned the mission to conduct research and technical assistance programs relevant to the efficient management and utilization of the forest, wildlife and fisheries resources of the state and region and the protection and enhancement of the natural environment associated with these resources. Within the scope of this mission, the FWRC has responsibilities for developing through research: (1) natural resource management systems which ensure the optimal production of goods and services while protecting and enhancing the forest and aquatic environments; (2) harvesting and manufacturing technologies that promote the efficient utilization of the state’s timber resource; (3) biological and economic data bases which address specific problems and opportunities related to the state’s forest and wildlife resources, including environmental issues related to those resources; and (4) policy analyses which provide options for renewable resources management and use in Mississippi.

The research center is composed of the Department of Forestry, the Department of Wildlife and Fisheries, Department of Forest Products Laboratory. The agency’s base research program involves approximately 100 separate research activities and covers project work in 14 research areas in forestry, forest products, wildlife, and fisheries. This research program serves a diverse list of clients which includes forest landowners, forest-based industries, other state agencies, and various forest resources user groups. Faculty in the Forest and Wildlife Research Center hold joint appointments for teaching purposes in the College of Forest Resources.

Bob L. Karr, B.S., M.S., Ph.D., Department Head

Douglas P. Richards, B.S., M.F., Ph.D., Department Head

Keith L. Bell, B.S., M.S., Ph.D., Professor

William C. Booth, B.S., Research Associate I

William W. Elam, B.S., Ph.D., Professor Emeritus

David L. Evans, B.S., M.S., Ph.D., Associate Professor

Andrew W. Ezell, B.S., M.S., Professor

R. Rodney Foil, B.S.F., M.F., D.F., Forest Emeritus

Laura A. Grace, B.S., M.S., Ph.D., Associate Professor

Stephen C. Grado, B.A., B.S., M.S., Ph.D., Associate Professor

Donald L. Grebner, B.S., M.A., Ph.D., Assistant Professor

John E. Gunter, B.S., M.S., Ph.D., Professor

John D. Hodges, B.S., M.S., Ph.D., Professor Emeritus

Amanda L. Husak, B.S., M.S., Visiting Research Scientist

Samuel B. Land, B.S.F., M.S., Ph.D., Professor

Andrew J. Londo, B.S., M.S., Ph.D., Assistant Professor

Thomas G. Matney, B.S., M.S., Ph.D., Professor

James E. Moak, B.S.F., M.F., Ph.D., Professor Emeritus

Ian A. Munn, B.A., M.B.S., Ph.D., Professor

Robert C. Parker, B.S., M.S., Ph.D., Associate Professor

Scott D. Roberts, B.S., M.F., Ph.D., Associate Professor

Roy D. Ross, B.S.F., M.F., Ph.D., Associate Professor Emeritus

Emily B. Schultz, B.S., M.S., Ph.D., Associate Professor

William B. Stuart, B.S., M.F., Ph.D., Professor

William E. Watson, B.S.F., M.S., Ph.D., Professor Emeritus

John B. Auel, B.S., M.S., Research Associate I

Janet C. Dewey, B.S., M.S., Research Associate III

Patrick A. Glass, A.A., B.S., M.S., Ph.D., Research Assistant I

Jonathan Paul Jefferys, B.S., Research Associate I

H. Alexis Londo, B.S.F., M.S.F., Research Associate I

John W. McCombs, B.S., M.S., Research Associate I

Juanita A. Mobley, B.S., M.S., Research Associate I

Clayton B. Altizer, B.A., M.S., Research Associate I

Forest Products Laboratory

Abdolhamid Borazjani, B.S., M.S., Ph. D., Environmental Microbiologist
The success of agricultural research in the first 100 years has resulted in a highly complex food and fiber system that is the envy of the world — but one that is also chock-full of new problems and opportunities. Thus, the mission of MAFES is maintaining a continuum of research discovery and education to keep Mississippi's agricultural producers viable and competitive in a global economy.

Experiment Station Headquarters (MSU Campus) The Leveck Animal Research Center, the Bearden Dairy Research Center, the Plant Science Research Center and the Black Belt Branch Station at Brooksville provide field laboratories for on-campus scientists and represent all of the important plant and animal commodities produced in the State. On-campus departments conducting research to meet these needs are: Agricultural Economics, Agricultural and Biological Engineering, Plant and Soil Sciences, Animal and Dairy Sciences, Biochemistry and Molecular Biology, Entomology and Plant Pathology, Food Science and Technology, Human Sciences, Poultry Science, the Social Science Research Center, Veterinary Medicine, and the aquaculture unit of wildlife and fisheries.

Off-campus activities are conducted through four regional research and extension centers and associated branch experiment stations in the various soil and types-of-farming areas of the State. Research efforts involve cooperative projects with scientists from on-campus departments and other branch stations, as well as collaboration with state and federal agencies, producers, and private industry sponsors.

Central MS Research and Extension Center: The Brown Loam Branch Station near Raymond carries out an extensive program of beef cattle crossbreeding and management, forage, and field crop studies. At the Coastal Plain Branch Station near Newton, long-standing programs of dairy and field crop research are conducted with studies of nutrition management. The Truck Crops Branch Station at Crystal Springs serve a populous urban-rural area with research on both commercial greenhouses and home garden fruits and ornamentals.

Coastal Research and Extension Center: Research at the Coastal Aquaculture Unit at Gulfport focuses on production of freshwater species, estuarine species, and other fishery resources that have potential for production in commercial enterprises and includes redfish, hybrid striped bass, and freshwater shrimp. The Seafood Processing Laboratory and Aquaculture Unit at Biloxi was established to enhance the utilization of later marine fishery resources and improve seafood quality and safety. The South MS Branch Station units at Poplarville, White Sand and McNeill conduct research on beef cattle, field and forage crops, agro-forestry, and ornamentals.

Delta Research and Extension Center: The Delta Branch Station at Stoneville employs an integrated, multidisciplinary approach to discover, develop, and demonstrate new technologies and improved germplasm for enhanced profitability and productivity of agricultural enterprises in the Yazoo River-Mississippi River Delta. Its research programs on the major crop and animal production systems of the Delta (cotton, rice, soybean and catfish) are recognized nationally and internationally. Both the Southern Regional Aquaculture Center and the National Warmwater Aquaculture Research Center are located here.

North MS Research and Extension Center: The North MS Branch Station at Holly Springs emphasizes research on dairy production, soil erosion management, and crop production systems using conservation tillage methods suitable for the soils of the region. The Horticulture Research & Education Unit at Vicksburg is involved with studies of vegetable, ornamental, and medicinal herbs crops. The Northeast MS Branch Station at Verona conducts conservation tillage systems research and variety evaluations for the major field crops of the region. The Pontotoc Ridge-Flatwoods Branch Station at Pontotoc emphasizes sweet potato breeding and production, peaches and other fruits, field crops, and swine production. The Prairie Research Unit at Prairie focuses on utilizing forages in the economic and efficient production of beef, with emphasis on beef health and improved conception and nutrition.
Research programs of MAFES are both basic and applied. Basic research deals with long-range fundamental opportunities or problems in agriculture and the development of new knowledge. Applied research is directed toward early solution of problems of immediate concern facing farmers, processors and marketers of agricultural products, and all citizens of the state, whether urban or rural.

Research facilities to support the broad scope of research conducted by MAFES include chemical, biological, engineering, and computer laboratories; greenhouses and growth chambers; land for crops, orchards, and forests; pastures and building facilities for beef and dairy cattle, sheep, hogs, and poultry; ponds and related facilities for aquaculture; and the farm machinery and other equipment required to enable our scientists to conduct effective research programs. In addition, facilities and personnel of ARS, USDA and other federal and state agencies are strategically co-located to augment the total research effort.

While the primary mission of MAFES is agricultural and aquacultural research for the State, its presence on the campus adds strength to both the teaching and staff members have joint appointments involving teaching, research, and/or extension activities, and teach or administer instructional programs in agriculture, engineering, and art and sciences. Agriculture students at Mississippi State University have the opportunity to observe and participate in research, and MAFES provides graduate research assistantships and other part-time employment for many students.

MAFES operates on state and federally appropriated funds supplemented by income from sales of products from the research projects. Grants and contracts from private industry and from other sources provide additional funds.

PERSONNEL

**J. Charles Lee, B.S., M.S., Ph.D., President**
Vance H. Watson, B.S., M.S., Ph.D., Director

**Roger B. Johnson, B.S., M.S., Ph.D.,**
**Steven H. Elder, B.S., M.S., Ph.D.,**
**Eugene P. Columbus, B.S., M.S.,**

Agricultural Extension

**Richard Evans, B.S., M.S., Ph.D., Assistant Animal Scientist**
**Timothy E. Fairbrother, B.S., M.S., Ph.D., Adjunct Research Animal Scientists**
**Wesley Farmer, B.S., M.S., Associate Extension Professor - Dairy**
**Charles W. Flowers, B.S., IRM Coordinator**

Agricultural Economics

**Blair McKinley, B.S., M.S., Extension Professor - Beef Cattle**
**Wanda G. Gillis, B.S., M.S., Ph.D.,**

Agricultural Engineering

**September 1999**

**Jerry A. Gilbert, B.S., Ph.D., Professor and Head**

**Douglas E. Parsell, B.S., Ph.D., Adjunct Assistant Professor**

**Jonathan W. Pote, B.S., M.S., Ph.D., Adjunct Assistant Professor**

**F. Aubrey Harris, B.S., M.S., Ph.D., Entomologist**

**Larry E. Trevathan, B.S., Ph.D., Entomologist**

**Thomas Shields, B.S., M.S., Ph.D., Assistant Economist**

**Robert W. Rogers, B.S., M.S., Ph.D., Animal Scientist/Director, Food Science Institute**

**James M. McKinion, B.S., M.S., Ph.D.,**

**Mark A. Crenshaw, B.S., M.S., Ph.D., Assistant Extension Professor - Swine**

**Wanda G. Gillis, B.S., M.S., Ph.D.,**

**Robert P. Wilson, B.S., M.S., Ph.D., Biochemist**

**Shelby P. Weeks, B.S., M.S., Ph.D., Entomologist**

**Donny Ray, B.S., M.S., Facilities Supervisor**

**Robert W. Rogers, B.S., M.S., Ph.D., Animal Scientist/Director, Food Science Institute**

**K. W. Battal, B.S., M.S., Ph.D.,**

MISSISSIPPI STATE UNIVERSITY EXTENSION SERVICE

The Mississippi State University Extension Service provides research-based educational programs and information in agriculture and natural resources, 4-H youth development, family and consumer education and enterprise and community resource development to improve the economic, social, and cultural well-being of all Mississippians.

The Smith-Lever Act of 1914 established the Cooperative Extension System, a publicly funded, informal educational system that links the United States Department of Agriculture, the land-grant university system, and individual counties. As the off-campus educational arm of Mississippi State University, Extension provides current research and educational information in all 82 counties. Mississippi State University Extension Service is also a cooperating partner with Alcorn State University, the 1890 land-grant institution in Mississippi.

Extension’s overall purpose is education-education that will empower people to make intelligent decisions relating to their vocations, their families, and their environment. Extension’s unique interdisciplinary perspective enables the organization to make a real difference in the lives of Mississippians. Mississippi State University Extension Service is, and will continue to be, a leader for positive change for individuals, families, and communities by: providing research and education in a practical and applicable way; using the latest technology and teaching techniques to serve clients; developing and using volunteers to help disseminate programs and information; cooperating with other groups and agencies; and maintaining a culturally diverse staff responsive to needs of various audiences at all socio-economic levels.

The educational efforts of the Extension Service are conducted primarily through local Extension agents in each county. They use a variety of educational methods and technologies and the most current delivery technology, such as the World Wide Web, in disseminating research-based information.

The county staff is supported by a team of state and area specialists who are responsible for gathering, interpreting, and disseminating the latest research and technology developed by Mississippi Agricultural and Forestry Experiment Station (MAFES), Forest and Wildlife Research Center (FWRC), College of Veterinary Medicine (CVM), USDA research agencies, and other legitimate research institutions across the nation. In performing these functions, the subject matter specialists are in constant contact with research scientists to ensure that they are current on the latest research findings and technology. We believe that agriculture and its related enterprises are of major economic importance in Mississippi, and we will direct programs and resources to reflect this importance. We also believe that quality of life is affected by the reciprocal relationship between people and their environment will continue to emphasize environmental issues. We recognize the critical need for human resource development and will continue to search for ways to assist individuals, families, youth and communities cope with an ever-changing society.

UNIVERSITY LIBRARIES

The University’s major library collections and functions are housed in the Mitchell Memorial Library, which occupies a central location on the campus. In addition to providing more than 1,757,536 volumes selected to support the teaching and research efforts of students and faculty, the library subscribes to more than 16,202 periodicals. The Special Collections Department contains materials of historical value, including 491 manuscript collections, church and business records. The Congressional and Political Research Center houses the papers of a number of public figures important to Mississippi—most notably those of U.S. Senator John C. Stennis. The Archives of the University includes papers of the University’s presidents and other officers, college, division and departmental records, faculty papers, records of committees and university related organizations. The Library provides an environment for education technology activities and a learning center of techniques related to digital multimedia in the Instructional Materials/Software and software. See www.its.msstate.edu for more information.

The School of Architecture and the College of Veterinary Medicine maintain their own library holdings but operate as branches of Mitchell Memorial Library.

Frances N. Coleman, Dean of Libraries
John Cuckshank, Veterinary Medicine Librarian
Emilie C. White, Architecture Librarian

Kathrin Dodds, Jackson Center Librarian and Information Specialist
Melanie Thomas, Meridian Campus Librarian and Information Specialist

UNIVERSITY REGISTRAR

The Office of the University Registrar is responsible for supervising the scheduling of classes, managing the registration of students in courses, recording grades, and maintaining academic records and transcripts of all students and alumni of the University.

Bobby R. Stokes, B.S., M.B.I.S., Interim Registrar
Sharon Nobles, B.A., M.A., Interim Assistant Registrar

Lisa G. Holloway, Student Information Systems Coordinator
Terri N. Monge, B.S. M.S., Curriculum and Scheduling Specialist

B. INTERNAL SERVICE UNITS

INFORMATION TECHNOLOGY SERVICES

The mission of Information Technology Services (ITS) is to enhance learning, service, and research through an advanced information technology environment. The mission is fulfilled through the four operational units within ITS - Systems & Networks, User Services, Information Systems, and Telecommunications. ITS supports and operates the University’s voice, data, video and wireless networks and provides a broad array of computing and information technology resources and services for students, faculty, and staff, including Internet and InNet2 access. The ITS Help Desk is available to answer questions and help with computer-related problems. A comprehensive suite of workshops is offered to aid faculty and staff in learning new hardware and software. See www.its.msstate.edu for more information.

Mike Rackley, B.S., M.C.S., Head, Information Technology Services
Mike Argo, B.S., M.S., Security & Compliance Officer
Danny Kemp, B.S., M.B.A., Director, Information Systems

Timothy Griffin, B.S., Director, Systems & Networks
Tom Lindsay, B.P.A., C.P.A., Director, Telecommunications
Matt Raven, B.S., M.S., Ph.D., Director, User Services
OFFICE OF INSTITUTIONAL RESEARCH

The Office of Institutional Research assimilates, analyzes, and reports external information needed for orderly planning and provides background information needed in the formulation of policy decisions to the President, Vice Presidents, and others. The office analyzes and prepares reports to the President, Vice Presidents, Deans and others, relevant to evaluating faculty workload, student credit hours produced and departmental data that are vital in the allocation of university resources.

The office assists the university community through its research, consulting, and survey activities. A major component of these activities is the Evaluation and Test Service. This service, utilizing optical scanning equipment, scores and analyzes more than 150,000 faculty-constructed tests and processes an equal number of questionnaires and student evaluation of instruction each year.

The office is a primary contact with State and Federal agencies, educational groups, other institutions of higher education, and individuals for the purpose of information and data exchange. A major activity of the office is maintaining a responsive and productive relationship with these external entities.

Julie C. Fulgham, Interim Director
Kathy A. Huffman, Coordinator of Reports and Analyses
Elaine B. Turner, Administrative Secretary

Steven Barlow, Data Analyst
Vanessa McTaggart, Evaluation Assistant
Ling Zhao, Data Analyst

POLICE DEPARTMENT

It is the mission of the Police Department to support the university and its community by providing effective and efficient services that assist in establishing a safe and secure environment.

The department is staffed 24 hours a day with highly trained officers to enforce the laws, and university rules and regulations. Additionally, police officers actively work with the campus community in providing crime prevention information and addressing crime, safety, and security issues.

C. RESEARCH UNITS

OFFICE OF THE VICE PRESIDENT FOR RESEARCH

Office: 617 Allen Hall

The Office of Research is the administrative unit for the coordination of all basic and applied research of the University in the areas of Architecture, Biological and Physical Sciences, Education, Engineering, Business and Economics, Humanities and the Social Sciences. It is composed of the following:

- **Intellectual Property and Technology Licensing**
- **Laboratory Animal Veterinarian, Radavanyi Chair in International Studies, Regulatory Compliance Office**
- **Sponsored Programs Administration, the Mississippi State Chemical Laboratory, and Centers and Institutes:**
  - Center for Advanced Energy Conversion
  - Center for Advanced Vehicular Systems
  - Center for Educational and Training Technology
  - Center for Safety and Health
  - Center for Science, Math and Technology, Electron Microscope Center
  - Remote Sensing Technologies Center
  - Research and Curriculum Unit
  - Science and Technology Research Center
  - Social Science Research Center (Mississippi Alcohol Safety Education Program)
  - T.K. Martin Center for Technology and Disability
  - Transportation Research Center
  - Water Resources Research Institute

In addition, there are separately organized research units in the various schools and colleges:

- **School of Architecture** (Architecture Research-Small Town Center, Jackson Community Design Center)
- **College of Arts and Sciences** (Biological and Physical Science Research Center, Cobb Institute of Archaeology, Institute for the Humanities, University/Industry Chemical Research Center)
- **College of Business and Industry** (Division of Business Research, Bureau of Business Services, Center for Insurance Loss Control)
- **Technology Resource Institute for Business and Engineering**
- **College of Education** (Bureau of Educational Research and Evaluation, Center for Educational Partnerships, Rehabilitation Research and Training Center)
- **College of Engineering** (Diagnostic Instrumentation and Analysis Laboratory, Engineering Research Center, Global Center for Desicant Technology, High Voltage Laboratory, Industrial Assessment Center, Microsystems Prototyping Laboratory, Mississippi Energy Research Center, Raspet Flight Research Laboratory)

Interdisciplinary research is promoted and coordinated by the Office of Research. Teams are assembled and proposals, projects, and programs are developed for research opportunities. The Directors for Centers and Institutes and Sponsored Programs Administration serves to help assemble teams of experts in broad areas.

Mississippi State University is a participating institution of the Mississippi-Alabama Sea Grant Consortium, a consortium of Mississippi and Alabama universities and the Gulf Coast Research Laboratory, it is a member institution of the Oak Ridge Associated Universities, the Southeastern Universities Research Association, and the Mississippi Academy of Sciences.

With a core of excellent scientists, engineers, and economists, aided by numerous graduate research assistants, Mississippi State University has contributed to the economic and industrial growth of the State. Extensive resources are available to assist economic, industrial, and governmental organizations desiring help in discovery, design, and the development of new products. Research, graduate education, and undergraduate education become the three segments of learning pursued in a university setting. Each of these contributes to the other, making possible a balanced program which provides the State with research oriented graduates as well as new basic knowledge necessary for growth. The Office of Research and the Mississippi Agricultural and Forestry Experiment Station work together and exchange ideas and information in the performance of their missions to do basic and applied research contributing to the total industrial and agricultural development of Mississippi.

Jonathon W. Pote, Ph.D., Interim Vice President for Research
Sandra H. Harpole, Ph.D., Interim Associate Vice President for Research

OAK RIDGE ASSOCIATED UNIVERSITIES (ORAU)

Since 1949, students and faculty of Mississippi State University have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 85 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education, the DOE facility that ORAU operates, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the ORISE Catalog of Education and Training Programs which is available at http://www.orau.gov/orise/regd.htm, or by calling either of the contacts below.

ORAU’s Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU’s members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scientist Program, and various services to chief research officers.

For more information about ORAU and its programs, contact:

Jonathon W. Pote, Ph.D., ORAU Counselor for MSU (662-325-3570)
The mission of the Office of Intellectual Property and Technology Licensing is the identification, protection, marketing, and licensing of intellectual properties developed by Mississippi State University faculty, staff, and students. This mission originates from Public Law 96-517, better known as the Bayh-Dole Act, which stipulates that inventions developed under sponsorship from the federal government and assigned to the university must be actively transferred to the private sector for the benefit of the general public.

Charles Rivenburgh, M.B.A., Director

LABORATORY ANIMAL VETERINARIAN (LAV)
Office: 300 Bowen Hall
Laboratory Animal Veterinarian is a University-wide resource that provides compliance monitoring, veterinary care, technical support, and program planning for animals used in biomedical and some agricultural teaching, testing, and research. The research, overseen by the Vice President for Research, is advised by the University Institutional Animal Care and Use Committee and conforms with local, state, and Federal regulations and guidelines for animal care and use.

John E. Harkness, D.V.M., University Laboratory Animal Veterinarian
Michelle Wilkerson, D.V.M., Associate Laboratory Animal Veterinarian

RADVANYI CHAIR in INTERNATIONAL STUDIES
Office: 55 & 57 Magruder
On June 11, 1996, the endowed Chair in International Security and Strategic Studies was established with Dr. Janos Radvanyi as the first chair holder. On June 22, 1998, Dr. Malcolm Portera, President, Mississippi State University, named the Chair in Dr. Radvanyi’s honor, the Radvanyi Chair in International Studies. The Chair devotes full attention to vital global problems, with special emphasis on the complex security issues of the post-communist era. It alerts to America’s vulnerability by not having a reliable defense against hostile missile attacks. The Chair is studying U.S. counter terrorism policy and is monitoring German-European and American relations and the insight of the workings of the European Union and Asian Security issues. The Chair, through its Executive Lecture Forum (ELF) provides a unique outreach program, hosting internationally respected speakers from around the globe to address the membership. Its publications reach government agencies, think-tanks, and major libraries. This exclusive lecture forum counts as its members Mississippi business executives, academicians, and state government representatives, and meets on a regular basis, several times a year. Through the Chair, both students and faculty are provided with a wide range of opportunities to gain awareness of international, political, economic, and cultural issues.

Janos Radvanyi, Ph.D., Chair

REGULATORY COMPLIANCE OFFICE (RCO)
Office: 300 Bowen
The Regulatory Compliance Officer is responsible for the administration and facilitation of regulatory compliance matters that affect the research, instruction, and extension programs of the institution. Primary emphasis is on day to day management and overall coordination of the Regulatory Compliance Office and its components: Biosafety, Radiological Safety, Hazardous Waste, Human Use in Research (IRB) Animal Care and Use (IACUAC).

The Biosafety Officer ensures compliance with federal, state, and local governmental regulations concerning biosafety in the laboratory and field. Information is provided to faculty and support personnel on guidelines developed by the Centers for Disease Control (CDC), the National Institutes of Health (NIH), and the United States Department of Agriculture (USDA) which normally complement state and local regulations.

The Radiological Safety Officer administers the University’s radioactive materials license, and monitors the use of radioactive materials and other sources of ionizing radiation on campus. This officer is responsible for the endorsement of federal, state, and University regulations regarding the use of ionizing radiation at MSU.

Terry Coggins, Radiological Safety Officer
Marion B. Hughlett, Hazardous Waste Officer

SPONSORED PROGRAMS ADMINISTRATION
Office: 305 Bowen Hall
Sponsored Programs Administration (SPA) is the component of the Office of Research responsible for the administration of external proposal activities, and pre-award and post award contractual negotiations of fiscal and administrative matters. Services provided by Sponsored Programs include: Disseminate funding information; assist faculty in locating potential funding opportunities; assist faculty in contacting funding agencies; assure compliance with proposal guidelines; provide proposal budget cost analysis; facilitate in obtaining appropriate departmental and collegiate approvals; coordinate institutional compliance with government regulation; act as administrative liaison with the administrative officers of external sponsors; and assist faculty and staff in administrative problem-solving associated with their sponsored projects.

James E. Peterson, Ph.D., Director
Tina C. Henson, Senior Sponsored Programs Administrator
Robyn B. Remotigue, Sponsored Programs Administrator
Sheri Johnson, Sponsored Programs Administrator
Kacey Jones Strickland, Sponsored Programs Administrator
Mary Ann Richardson, Sponsored Programs Associate Administrator
Mary Ann Latham, Sponsored Programs Assistant Administrator

MISSISSIPPI STATE CHEMICAL LABORATORY
Office: 112 Hand Lab
From the earliest days in its history the authorities of Mississippi State University have encouraged those in charge of its science and technical departments to seek opportunities of contributing to the agricultural and industrial progress in the State and otherwise to cooperate in the public service. The State Chemical Laboratory is a part of this effort.
The State Laboratory was established in 1892 with the control of fertilizer quality as its primary responsibility. Subsequent legislation added duties in the areas of animal feed control, pesticide control, food control, paint and varnish control, and petroleum products control.

In 1970 the Legislature redefined and clarified the purpose and operations of the Mississippi State Chemical Laboratory. Four divisions were established: the Chemical Regulatory Division, the Petroleum Products Division, the Industrial and Agricultural Services Division, and the Research Division. Operation of the first two divisions was continued practically unchanged from the practice of many years. The Industrial and Agricultural Services Division and the Research Division are an expansion of services formerly performed by the Chemical Regulatory Division.

The Chemical Regulatory Division carries out regulatory control programs in food, animal feeds, fertilizers, economic poisons, and paints and varnishes. The Petroleum Products Division conducts regulatory control testing on petroleum and related products. The Industrial and Agricultural Services Division provides applied scientific and engineering consultation to industries and individuals residing in or doing business in the State. Charges are assessed for major projects such that they will be self-supporting but nonprofit. The guiding principle in such services, free or paid, shall be that they contribute to the economic growth of Mississippi or to the welfare of its citizens.

The Research Division conducts self-supported, grant, or contract research having immediate or potential influence on the economic growth and promotion of agriculture or industry in Mississippi, or on improvement of the Laboratory’s analytical capabilities.

Kevin L. Armbrust, Ph.D., Interim State Chemist, Associate Professor of Chemistry
Paul J. Brignac, Ph.D., Associate State Chemist
Patricia B. Reeves, Director, Chemical Regulatory Division

Reba L. Ingram, Ph.D., Director, I.A.S. Division
Fay Y. Hutto, M.S., Director, Petroleum Products Division

R.D. Brook, ED.D., Co-Director, Training and Contract Development
R.D. Koshel, Ph.D., Co-Director, Software Tools Development

CENTERS and INSTITUTES

CENTER for ADVANCED ENERGY CONVERSION (CAEC)

The Center for Advanced Energy Conversion (CAEC), established in 2001, is a multidisciplinary organization formed to address alternative energy fuels and energy Conversion systems of the future. The mission of CAEC is to research and develop alternative energy technologies that will address the energy needs of the future. Energy Technology for Tomorrow’s World.

The center enlists faculty from across the Science and Engineering Colleges to address its cross-disciplinary research problems. The Center also forms strategic alliances and/or industrial organizations.

The research efforts of the Center will provide state-of-the-art capabilities for various alternative energy technologies and advanced enabling technologies. This along with strategic initiatives and industrial partnerships will lay the groundwork for Mississippi industries to address the country’s future energy needs. The Center will also be an informational resource on alternative energy for Mississippi industries.

Robert L. Cook, Ph.D., Director

CENTER for ADVANCED VEHICULAR SYSTEMS (CAVS)

Office: 617 Allen Hall

The Center for Advanced Vehicular Systems (CAVS) was created in 2001 to research and develop manufacturing and design means and methods for producing vehicles of superior quality with advanced features and functions at reduced costs and shorter product development times, exploiting the underlying technologies for broader industrial use.

The State of Mississippi initiated significant efforts to recruit Nissan to build a major manufacturing facility in central Mississippi and committed to the establishment and continued operation of CAVS at Mississippi State University with a branch of CAVS near the Nissan plant site to provide direct support and engineering training for Nissan and suppliers. Both the CAVS engineering extension building at Canton and the CAVS research building at MSU are targeted for opening in August of 2003.

The Center for Advanced Vehicular Systems

J. Donald Trotter, Ph.D., Interim Director, Center for Advanced Vehicular Systems
C. Dean Norman, Ph.D., Research Professor
Mark F. Horstemeyer, Ph.D., CAVS Chair, Computational Solid Mechanics; Professor, Mechanical Engineering

Zachery Rowland, M.S., Research Associate III
Song-Vul Choe, Ph.D., Research Professor

CENTER for EDUCATIONAL and TRAINING TECHNOLOGY

Office: 309 Bost, 512 Russell Street

The Center for Educational and Training Technology was created in 1996 to provide for the development of innovative software tools through an interdisciplinary approach involving a wide cross section of units, departments, and colleges from Mississippi State University, state and federal agencies, and corporate America. The Center’s ultimate goal is to develop emerging software-based technologies and to integrate them into the educational and training environment at all levels.

R.D. Brook, ED.D., Co-Director, Training and Contract Development
R.D. Koshel, Ph.D., Co-Director, Software Tools Development

CENTER for SAFETY and HEALTH

Office: Suite C, 106 Crosspark Drive
Pearl, Mississippi 35208

The Center for Safety and Health is a federal grant program. It was created in 1970 as the Branch of Occupational Safety and Health, a part of the Mississippi State Board of Health. In 1991 the branch was elevated to division status and in 1992 was relocated to the Mississippi Workers’ Compensation Commission. In 1994 the division was transferred to Mississippi State University and designated a center.

The purpose of the Center is to provide assistance to small, medium, and high hazard business employers in Mississippi by helping them come into compliance with the regulations of the U.S. Department of Labor, Occupational Safety and Health Administration (OSHA). The services provided by the Center are free of charge, confidential, and conducted only at the request of the business employers. The Center is staffed with experienced safety consultants and industrial hygienist that conduct consultative surveys at industrial sites, construction projects, and medical facilities. During the consultation visit, an opening conference is held to present the consultant’s credentials, define the consultation procedure, and explain employer’s recordkeeping and program requirements under the law. Also during the opening conference the employers obligations are addressed. The employer must agree to correct all identified imminent danger and serious hazards. A review of the recordkeeping and required programs will be conducted. During a conducted tour of the survey site or facility, production processes, methods of operation, and facilities are assessed for potential and observed hazards. Health and safety conditions present in the workplace are evaluated by the use of appropriate monitoring and testing equipment. A brief closing conference is held to review the observed safety and health hazards and to suggest initial corrective measures. The consultant then prepares a technical report to describe any hazards as related to applicable standards and to make recommendations for correction and/or control measures. Mutually agreed upon hazard abatement dates are addressed in the report.
The Center for Science, Mathematics and Technology was created in 1996 to facilitate multidisciplinary research with a focus on science and mathematics education. Concentrating on human resource development issues in preparing people for work, in gender equity, in curriculum reform and in environmental education, the Center has actively pursued research projects in teacher enhancement, advanced technology and faculty development from extramural sources. Under supervision of the Vice President for Research, the Center will continue to undertake collaborative research projects with other Mississippi State University departments and units supporting educational reform, faculty enhancement, environmental education, and encouraging participation of women and minorities in science, engineering, mathematics and technology.

Sandra H. Harpole, Ed.D., Director and Professor of Physics
Lori A. Hill, M.S., Research Associate I

ELECTRON MICROSCOPE CENTER

Office: Clay Lyle Entomology Complex

The Electron Microscope Center is a University-wide facility administratively under the Mississippi State University Office of Research. The purposes of the Electron Microscope Center are: (1) to provide the Mississippi State University academic and research community access to specialized electron microscopy and confocal equipment, (2) to give professional consultation on research problems related to electron microscopy, and (3) to provide instruction and assistance in the use of electron microscopy and confocal equipment.

Kay Nevels Milam, B.S., H.T., HTL., Director

REMOTE SENSING TECHNOLOGIES CENTER (RSTC)

Office: 403 Bost

Mississippi State University has established a Center for Remote Sensing Technologies (RSTC) in the areas of agriculture and forestry, and wildlife and transportation underpinned by the cross-cutting areas of computational modeling and workforce development. The overall goal of the research program of the RSTC is to produce a robust research process that defines the role of the land-grant university in applying remote sensing technologies to solve problems that affect our stakeholders. Organizational, MSU offers colleges, schools, institutes, centers, and laboratories whose outstanding capabilities have been recognized both nationally and internationally. Through its mission statement and programs of research, teaching, and service, MSU supports human resources development, economic and community advancement, science, and technology at the local, state, national, and international level. Mississippi State University possesses the infrastructure, with thirteen experiment station research sites throughout the state, necessary to validate phenomena observable with remote sensing. A few examples include crop conditions, forest stand conditions and effects of management on all types of vegetation and transportation infrastructure. The unique physical and demographic features of the State, along with the presence and commitment to MSU, the NASA Stennis CRSP and the Mississippi Space Commerce Initiative (MSCL), make Mississippi an ideal laboratory for applications of remote sensing to promote sustainable use by the public and private sectors. Recent federal mandates for production of an agriculture and forestry census by USDA (Census of Agriculture Act of 1997, Public Law 105-113, Title 7 U.S.C.) as well as federal appropriations for transportation infrastructure, place an important national focus on needs for landscape management.

David Shaw, Ph.D., Director
Jon H. Arulk, Chief Technologist
Charles L. Hill, Associate Director
Roger L. King, Chief Engineer

Research and Curriculum Unit for Vocational and Technical Education

Office: 601 Hogan Street

The Research and Curriculum Unit for Vocational and Technical Education (RCU) is jointly sponsored by the Mississippi Department of Education, Office of Vocational and Technical Education, and the Office of Research of Mississippi State University.

The mission of the RCU is to provide leadership in state workforce development efforts and coordinate those efforts with secondary and community/junior college vocational technical education curriculum development. The RCU cooperates with other state agencies in uniting and coordinating workforce development efforts. It provides instructional leadership in vocational and technical education activities, working with statewide curriculum frameworks and initiatives. Professional development activities are provided for educators across the state, enhancing their ability to provide optimal utilization and implementation of materials and research findings for the classroom. Research activities include assistance with state-wide vocational-technical assessments, reporting, and innovations. The RCU staff works with personnel from local school systems, community/junior colleges, state universities, the Mississippi Department of Education, the U.S. Office of Education, and other agencies and organizations.

Patricia Abraham, Ph.D., Interim Director and Professor, Department of Technology and Education
James S. McCully, Ph.D., Senior Research Scientist, (Coordinator for Instructional Programs) and Assistant Professor, Agricultural Information Science and Education
Lemond Irvin, Ed. D., Senior Research Scientist, (Coordinator for Workforce Development)
Cindy Morgan, Ph.D., Associate Research Professor, (Coordinator of Research and Assessment)

Science and Technology Research Center

Office: John C. Stennis Space Center

The Science & Technology Research Center (STRC) has been located at The John C. Stennis Space Center (SSC) in Hancock County, MS., since the mid sixties. It provides research coordination and fact-finding assistance as a liaison office to all MSU faculty with Federal and State Agencies at SSC and elsewhere on the Mississippi Gulf Coast. Additionally, STRC coordinates research projects through the Mississippi Research Consortium (MRC) for MSU, UM, JSU, and USM.

Roy A. Crochet, Ph.D., Director
Wendell J. Lorio, Ph.D., Senior Research Scientist

Social Science Research Center

Office: 103 Research Park
The Social Science Research Center has over 50 years experience as an organized university research center. It engages in the analysis and study of numerous important social and economic issues facing Mississippi, the southern region, and the nation. Some 35 research fellows, supported by approximately 75 graduate and undergraduate students, research associates, and support staff conduct around 60 sponsored and numerous unsponsored research projects. The Center has a strong tradition of multi-disciplinary research, development and evaluation projects dealing with social and community development, the family and children, alcohol and drug studies, highway safety, race relations, natural resources, the environment, behavioral dimensions of health and information-age societal monitoring. Housed in the Mississippi Research and Technology Park adjacent to the MSU campus, SSRC researchers benefit from the interdisciplinary research infrastructure of the Center, which has seven program areas: the Family and Children Research Unit; the Mississippi Alcohol Safety Education Program; the Crime and Justice Research Unit; the Rural Health, Safety and Security Institute; the Social and Community Research Program; and the General Research Program. It also supports the Survey Research Unit, the Monitor Laboratory, the Delta Data Center, the Secure Date Laboratory, the Decision Support Laboratory, and the Unit for Community and Environmental Studies. A university-level, multi-disciplinary research unit, organized with university-wide responsibilities under supervision of the Vice President for Research, the SSRC also has administrative responsibilities, for certain programs, to the Director of MAFES.

The SSRC has the following major goals: 1) to conduct research on social, economic, political, human resource and social-environmental problems facing the state, nation, and world; 2) to provide a support system for the University to plan, develop, secure funding for and conduct social research on problems of interest to the scientific community and to consumers of research findings; 3) to provide a mechanism whereby existing social science research capabilities in the University can be matched with funding sources; 4) to contribute to the University’s graduate and undergraduate program by involving students in research projects through assistantships and other work arrangements; and 5) to provide a vehicle for unique social research and public service programs that do not fit more traditional academic structures.

A university-level, multi-disciplinary research unit, organized with university-wide responsibilities under supervision of the Vice President for Research, the SSRC also has administrative responsibilities, for certain programs, to the Director of MAFES. The Center receives continuing support for its research operations from MSU and MAFES. Most research projects, however, are supported through extramural funding.

Arthur G. Cosby, Ph.D., Director; Executive Director of Rural Health, Safety and Security Institute, Sociologist and Research Fellow
Michael L. Lightsey, M.A., Associate Director for Administration, MASEP Operations Coordinator, and Research Fellow
Ellis, Ph.D., Associate Director of Cognitive and Behavioral Research, Co-Director of Cognitive and Behavioral Research of the Rural Health, Safety and Security Institute; Psychologist and Research Fellow
Martin L. Levin, Ph.D., Co-Director of Sociological and Organizational Research of the Rural Health, Safety and Security Institute; Research Fellow
M. Larry Doolittle, Ph.D., Coordinator, Delta Data Center; Sociologist and Research Fellow
R. Gregory Dunaway, Ph.D., Coordinator, Crime and Justice Research Unit, Sociologist and Research Fellow
Wolfgang Frese, Ph.D., Coordinator, Survey Research Unit; Sociologist and Research Fellow

Duane A. Gill, Ph.D., Co-Coordinator, Unit for Community and Environmental Studies; Sociologist and Research Fellow
Ruth J. Haug, Ph.D., Coordinator of Administrative and Research Services and of the General Research Program; Assistant Research Scientist
Domenico Parisi, Ph.D., Coordinator, Unit for Community and Environmental Studies; Assistant Sociologist; and Research Fellow
Jarrel Ritchie, B.A., Coordinator, Monitor Laboratory; and Research Associate
Liesel A. Ritchie, M.A., Coordinator, Decision Support Laboratory; Scientist; and Research Fellow
Stephen D. Shafer, Ph.D., Coordinator, Mississippi Poll, Political Scientist and Research Fellow
Ronald W. Snow, Ph.D., Coordinator, MASEP Program Development and Research; Associate Research Geographer; and Research Fellow
Linda Southward, Ph.D., Coordinator, Family and Children Research Unit; Associate Social Scientist; and Research Fellow

T.K. MARTIN CENTER for TECHNOLOGY and DISABILITY
Office: T.K. Martin Center

The T.K. Martin Center for Technology and Disability at Mississippi State University was created in 1994 as a unique entity which provides direct clinical assistive technology to individuals with disabilities in an environment that promotes application and research.

The T.K. Martin Center for Technology and Disability works in conjunction with the Mississippi Department of Rehabilitation Services and other agencies to provide the latest in evaluation, prescription and training of a wide range of assistive technologies, ranging from design and fabrication of mechanical devices to computer based technologies. The T.K. Martin Center collaborates with other University Centers, Institutes and Departments on research involving new technology and technology integration issues.

The T.K. Martin Center for Technology and Disability is housed in a new facility, the T.K. Martin Center Building, adjacent to the Longest Student Health Center.

Elizabeth Williams, B.S., Special Educator

TRANSPORTATION RESEARCH CENTER
Office: 204 McCain Engineering

The Transportation Research Center (TRC) was established in 1997. The primary function of TRC is to conduct scholarly research designed to advance the current state of technologies in the Mississippi Department of Transportation (MDOT) personnel for the advancement of their professional careers. The TRC acts in coordination with the MDOT Division of Research to screen proposals submitted to TRC and jointly awards the research contracts. TRC provides on-campus administration of the research projects, and provides credit and non-credit instructional programs as requested by MDOT.

Thomas D. White, Ph.D., Director

WATER RESOURCES RESEARCH INSTITUTE
Office: 55-57 Magruder Street

As a reflection of the public consciousness of water problems, Congress in July 1964 (PL 98-242) authorized the establishment of a Water Resources Research Institute in each of the fifty states and in Puerto Rico. In November 1964, The Governor of Mississippi designated Mississippi State as the institution in Mississippi to carry out this work.

The mandate of the Institute is to help Mississippi citizens, water users, and water managers in their continuing efforts to improve the stewardship of water. This is accomplished through a coordinated research and development program that helps solve water and water-related problems in Mississippi, the region, and the nation. Student assistants receive on-the-job research training, preparing many of them for employment in water resource-related fields.

Activities are developed in close consultation and collaboration with leading water resources officials within the state. The Institute is a joint state-federal undertaking for which federal funds are presently derived through the U.S. Geological Survey, Department of the Interior.

David R. Shaw, Ph.D., Director
Jeffery A. Ballweber, J.D., Associate Director for Governmental Affairs
SCHOOLS and COLLEGES

SCHOOL of ARCHITECTURE

ARCHITECTURAL RESEARCH

Office: 140 Giles

As architecture combines aspects of both science and art, research within the School of Architecture is more than either basic research or creative expression. Research in the discipline of architecture aims to improve the quality of life and may range from the development of new materials or building components which make buildings more efficient, safer, less expensive, or more durable to the design of prototypical communities that are environmentally sensitive, energy efficient, and economically viable.

The research program of the School of Architecture includes the Small Town Center (STC), the Jackson Community Design Center (JCDC), the Digital Research and Imaging Laboratory (DRIL), and the Educational Design Institute (EDI). Established in 1979, the Small Town Center seeks to initiate theoretical and applied research, and to serve as a national focus for the collection, storage, dissemination, and application of information pertinent to issues of special interest in small towns.

Small Town Center activities include graphic and photographic documentations and computer imaging of the small-town scene. The STC has participated in design case studies, environmental impact studies, and economic and marketing analyses. The STC provides research and service assistance to towns through the redevelopment of downtowns and the implementation of other comparable community improvement initiatives. Assistance projects may include: organizing for community improvement, community design, economic diversification, town planning, conservation of architectural and historic resources, affordable housing design and technology, and other activities that affect quality of life in the community.

Jackson Community Design Center activities include interdisciplinary studies of urban living and working environments. Studies focus on environmental factors associated with crime prevention, history, social behavior, building material durability, and use-feasibility analysis for urban revitalization efforts.

The JCDC endeavors to provide technical, educational, design, and research assistance to neighborhoods and groups within the Jackson urban community in order to facilitate their revitalization initiatives. Assistance projects include: affordable housing design, urban public-space-improvement design, programming and cost estimating, educational seminars, identification of and research on historically significant structures, and feasibility studies to encourage new development.

The Digital Research and Imaging Laboratory aims to apply state-of-the-art visualization technology to problems that yield significant improvements in the quality of life for the people of Mississippi and beyond. Located in Giles Hall, it is a state-of-the-art laboratory for the creation of multi-media productions, including video tape and CD-ROM, as well as for the development of new graphics and visualization software. Graduate and undergraduate students participate in projects that apply visualization technology to a range of multi-disciplinary problems. Work ranges from design studies of buildings and facilities on the MSU campus through master planning and visualization work for major facilities within the state, to a variety of projects of national and international scope that bring together such disciplines as archaeology, anthropology, history and the sciences.

The Educational Design Institute is a collaborative initiative between the College of Education and the School of Architecture. The EDI is charged with exploring the changes in educational delivery and with rethinking how schools envision, plan, design, manage, and use their educational facilities. The EDI is conducting surveys of educational facilities and preparing design guidelines and documents for school-facilities design. To achieve the goals of establishing the EDI as both a collaborative partner for educational-facility planning and a leader in educational-design innovation in the South, the Institute is pursuing collaborative projects and initiatives with local school districts, the Small Town Center, the Mississippi Department of Education, and private foundations.

Other research activities within the School of Architecture focus on humanities and technology studies. Humanities include such work as new methodologies for programming, planning and design, anthropometric modeling and evaluation, architecture theory and history research, visual imagery and its impact, post-occupancy evaluation of buildings by their user, etc. Technology studies include technological evaluation of building materials and methods, energy design evaluation, solar energy equipment, construction, and testing.

James L. West, M. Arch., A.I.A., Dean and Director of Research

Larry R. Barrow, D. Des., A.I.A., Director, Digital Research and Imaging Laboratory

Kimberly A. Brown, M. Arch., A.I.A., Director, Small Town Center

COlLeGE of ARTS and SCIENCES

BIOLOGICAL and PHYSICAL SCIENCES RESEARCH INSTITUTE

Office: 208 Allen Hall

Support for research activities in the biological and physical sciences comes both from the University and from outside sources, including state and federal agencies, private industry, and foundations. Some projects are carried out by staff members working independently or with graduate students, while other projects are multidisciplinary in nature and are conducted in cooperation with staff members from other colleges in the University, the Mississippi Agricultural and Forestry Experiment Station and the Mississippi State Chemical Laboratory. Staff members also participate in multi-institutional projects in cooperation with personnel from the University of Mississippi, the University of Southern Mississippi and Gulf Coast Research Laboratory.

Facilities at the Gulf Coast Research Laboratory at Ocean Springs and the Mississippi State Research Center at the National Space Technology Laboratories are available and are being utilized in several of the research projects.

The results of the research efforts are published in appropriate scientific journals and, in the case of graduate student participation, become the basis of theses and dissertations.

Assistance in the preparation of research proposals, the location of appropriate funding sources, and the administration of grants and contracts is available to staff members through the institute.

The research staff of 21 consists of faculty and staff members from the departments of Biological Sciences, Chemistry, Geosciences, Mathematics and Statistics, and Physics and Astronomy.

Philip B. Oldham, Ph.D., Dean, College of Arts and Sciences
THE COBB INSTITUTE of ARCHAEOLOGY

Office: Cobb Institute Building

The Cobb Institute of Archaeology was founded in July, 1971, at Mississippi State University by Mr. Cully A. Cobb (Class of 1908) and Mrs. Lois Dowdle Cobb, for instruction and research in Archaeology with emphasis upon the origins of Western European Civilization and the Indians of the South, particularly Mississippi. The Institute was endowed by the Cobbs to complement the university’s activities in archaeological instruction, research and service.

The Institute provides active support for the instructional program in Archaeology offered through the Department of Sociology, Anthropology and Social Work and the Department of Philosophy and Religion. Research and field work are actively pursued, primarily in the Middle East and the Southeastern United States. The Institute actively supports an archaeological field school offered in alternate summers in the Middle East and Mississippi. The Institute is housed in two specially designed archaeological buildings which include classrooms, archaeological laboratories, environmentally controlled artifact storage areas, and a museum in which archaeological exhibits are made available to students and the public.

Janet L. Rafferty, Ph.D., North American Archaeologist
Joe D. Seger, Th.D., Director and Middle Eastern Archaeologist
Evan Peacock, Ph.D., North American Archaeologist

INSTITUTE for the HUMANITIES

Office: 209 Allen Hall

In order to organize the scholarly activities in the area of the humanities, the Institute for the Humanities (IH) has been established. Support for scholarly work in the humanities has been obtained from the National Endowment for the Humanities, from the Mississippi State University Development Foundation, and from private sources. Staff members have been authors of books and articles and have presented papers at meetings of learned societies.

The research staff consists of four faculty members from the departments of Art, Communication, English, Foreign Languages, History, and Philosophy and Religion.

Donald J. Mabry, Ph.D., Director

THE JOHN C. STENNIS INSTITUTE of GOVERNMENT

Office: The Depot Building

The John C. Stennis Institute of Government performs a threefold mission: (1) to enhance the efficiency and effectiveness of Mississippi State and local government through basic and applied research, training, technical assistance and service; (2) to provide technical assistance and research for both rural development in Mississippi and regional activities in the Southeast; and (3) to promote civic education and citizen involvement in the political process. The Stennis Institute’s programs relating to state and local government include the State Executive Development Institute for key state officials; the Governing Institute for Mayors, and technical assistance to state agencies and local governments. The Institute’s research on rural development includes an assessment of local officials’ perceptions of state economic development activities. The Stennis Institute’s civic education programs include participation in the Congressional Insight program, as well as a variety of state and national programs.

Funds for The Stennis Institute of Government come partially from interest on more than $1.7 million that has been raised by the Mississippi State University Development Foundation as a memorial to Senator John C. Stennis, but primarily from grants and contracts from outside sources.

W. Martin Wiseman, Ph.D., Director
W. Martin Wiseman, Ph.D., Director
Phillip S. Pierce, M.P.P.A., Research and Development Coordinator
James Markham, M.P.P.A., Research Associate I
Judith Phillips, M.B.A., Research Associate I

UNIVERSITY/INDUSTRY CHEMICAL RESEARCH CENTER

Office: 118 and 313 Hand Lab

The University/Industry Chemical Research Center (UICRC) began doing contract work for industries in 1982. The UICRC has the following major goals: 1) to assist Mississippi industry by performing chemical research to aid in their product development, 2) to work on chemistry related problems for any industry, 3) to teach graduate and undergraduate students techniques of industrial chemistry, 4) to help attract chemical based industry into the state, and 5) to help train B.S., M.S., and Ph.D. Chemists and attract visiting scholars and postdoctoral fellows for specific functions for industry.

The UICRC conducts grant and contract research and can work with most industries to develop mutually satisfactory agreements involving any necessary secrecy arrangements. It is also possible to work on short or long term projects and to arrange feasibility studies before binding contracts are written.

Keith A. Smith, Research Associate I
Charles U. Pittman, Ph.D., Research Director

COLLEGE of BUSINESS and INDUSTRY

DIVISION of BUSINESS RESEARCH and SERVICES (DBRS)

Office: 240 McCool Hall

The Division of Business Research and Services is an integral part of the College of Business and Industry. Recently organized, this office is comprised of four distinct and varied units. The Division of Business Research (DBR) is one of the major research organizations of the University. It was established in 1939 as the Bureau of Business and Economic Research to study scientifically the business, economic and governmental problems of the state under the direction of the College of Business and Industry. Continued growth of the Bureau led to the eventual establishment of the Division of Business Research with several distinct responsibilities. First, the Division participates in contracted research, cooperating with interested organizations that have specific problems requiring investigation. Second, the Division serves as the coordinating center of funded research for the College of Business and Industry and offers services to faculty. Third, the Division works with the MSU Office of Research in seeking grants for faculty members and in assisting with implementing and completing projects. Fourth, this unit publishes the Mississippi Statistical Abstract, a varied compendium of statistics about Mississippi.

The Division of Business Services (DBS) has in its primary responsibility the provision of training and services, other than primary research, to the business community. Typical activities include custom-designed seminars and consulting services for private firms, governmental agencies, international groups, and non-profit associations. These services are usually provided on a contractual or fee basis.

Small Business Development Center (SBDC) at Mississippi State University was organized in 1984 to provide counseling in Oktibbeha County and the surrounding counties to people who own a small business of are interested in starting one. This unit is designed to assist small businesses through direct consulting, training seminars, and referrals to other agencies or individuals. Charges are minimal or non-existent.
**Technology Resource Institute (TRI)** is charged with the mission of promotion of university public/private partnership that will enhance economic development throughout the state. This Center provides assistance with business analysis or planning; production, marketing or finance solutions; research projects; feasibility studies; and community planning. The staff serves as liaison with appropriate faculty or service agencies and assists in resolving business issues.

**Sara M. Freedman, Ph.D., Dean**
**G. Stephen Taylor, Ph.D., Director, Technical Resource Institute**

**Thomas M. Adkins, Associate Director/External Liaison Resource Referral Center**
**R.S. “Sonny” Fisher, Director, Small Business Development Center**

**COLLEGE of EDUCATION**

**BUREAU of EDUCATIONAL RESEARCH and EVALUATION**

Office: 328 Allen

The Bureau of Educational Research and Evaluation (BERE) was authorized by the Board of Trustees in the Spring of 1966. This research organization is an integral part of the College of Education and is a cooperating unit of the MSU Office of Research.

The major functions of the Bureau are:
1. To engage in basic and applied research pertaining to all phases of education.
2. To consult with faculty and students about problems of research design and analysis.
3. To provide aid in dissemination of research findings.
4. To assist faculty/staff in the development of proposals for research and program development in the College of Education.
5. To provide assistance to school districts and other educational/human service agencies in Mississippi, the region, and the nation in the areas of research and evaluation.
6. To assist in test development for public schools.

The services of the Bureau of Educational Research and Evaluation are available to all students and faculty of Mississippi State University and to educators of the state, region, and nation.

The Bureau helps coordinate research projects and proposals in seven departments/units of the College of Education.

**Stephanie King, M.S., Research Scientist**

**CENTER for EDUCATIONAL PARTNERSHIPS (CEP)**

400 Morrill Road

The Center for Educational Partnerships is an integral part of the College of Education, functioning as a facilitator of technical and support services to the public school districts of Mississippi.

Major functions of the Center include:
1. Providing administrative support for the Program for Research and Evaluation of Public Schools, Inc. (PREPS, Inc.) PREPS is a private nonprofit consortium composed of 88 public school districts.
2. Providing administrative support for the Mississippi Writing/Thinking Institute. The Institute is a state-wide project chartered by the National Writing Project.
3. Providing administrative support for the World Class Teaching Project. The Project is a state-wide initiative intended to support the certification of Mississippi teachers through the National Board of Professional Teaching Standards.
4. Providing administrative support for the America Reads - Mississippi Project. This project is intended to support and enhance the reading performance of elementary students in participating schools located in the State’s 14 Level 1 accredited school districts.
5. Providing administrative support for the Educational Design Institute. This project focuses on improving the educational design of education facilities and offering educational planning consultation and other services to school districts.
6. Administering the Mississippi Superintendent Mentor Program. The Mentor program provides training and consultation for newly selected Mississippi school superintendents.
7. Providing assistance in the development of a National Center for the Community College.

**Peggy Swoger, M.A., Ph.D., Project Director**
**Cynthia Ward, Ed.D., Project Director**

**Sherry Seale Swain, Ed.D., Director, Writing/Thinking Institute**
**Theresa Hall-Brown, M.A., Sr. Regional Coordinator**

**REHABILITATION RESEARCH and TRAINING CENTER on BLINDNESS and LOW VISION**

Office: 150 Industrial Education Building

The Rehabilitation Research and Training Center (RRTC) on Blindness and Low Vision was established in 1981 at Mississippi State University to serve all states and territories of the U.S. It is cooperatively sponsored by the National Institute on Disability and Rehabilitation Research and the College of Education.

This National Center is dedicated to the study of blindness and low vision and their effects on the employment and careers of people who are blind or severely visually impaired. The programs of the RRTC are based on the two following assumptions:
1. All blind and severely visually impaired people have a right to work at a wage comparable with non-disabled persons and in careers which provide satisfaction and opportunity for advancement and;
2. Many persons who are blind or visually impaired may obtain satisfying gainful employment through the utilization of research and training programs.

**RESEARCH PROGRAM:** Guiding the research conducted at the RRTC is the Career Development Intervention Strategy model. This model examines the impact of intrinsic and extrinsic factors on the career development of visually impaired people. It also indicates how these factors might be altered or strengthened to enhance such development. It examines the relationship among the following dimensions: career development stages, career services, service provision setting, and service outcomes. The six career development stages identified represent the individual’s birth-to-death process of preparing for and maintaining a work life. The eight service areas identified all relate to employment of the individual who is blind or visually impaired. The six service delivery sites represent rehabilitation, education, employment, and self-help settings. Four employment outcomes are identified that range from competitive to unpaid employment. These four dimensions: career development, career services, service delivery site, and outcomes are arranged in a cube that makes it possible to identify potential combinations. All of the research projects of the Center can be placed within this model, which is used both as an organizing tool for ongoing research and as a framework for new research.

**TRAINING PROGRAM:** The RRTC is linked to the blindness field through its training programs. The goal of which is to influence employment of persons who are blind or severely visually impaired by facilitating use of the most current rehabilitation and education research and service delivery techniques. This goal is accomplished through development of materials that make research findings readily usable by professionals, the dissemination of these materials, and the training of rehabilitation and education service providers. Both pre-service and in-service training are provided through the Center and Mississippi State University.

The RRTC conducts in-service training programs throughout the United States. Center staff are heavily involved in training programs sponsored and cosponsored by other agencies within the blindness field. Additionally, the Center conducts specially designed training programs on a contractual basis for various rehabilitation and education agencies.
Pre-service training is conducted in two ways. First in cooperation with the MSU Department of Counseling, Education Psychology, and Special Education, RRTC staff members teach courses designed to specifically prepare new rehabilitation professionals to work with persons who are blind or severely visually impaired. Second, the RRTC sponsors graduate assistantships, which enable students to acquire special skills in research areas related to blindness and low vision. New research has been promoted through student dissertations and theses, as well as the Anne Sullivan Macy Fellowship and the Jennings Randolph Research Awards Program.

tion

John H. Maxson, M.S., Director of Training

Brenda Cavenaugh, Ph.D., Research Director

COLLEGE of ENGINEERING

DIAGNOSTIC INSTRUMENTATION and ANALYSIS LABORATORY (DIAL)

Office: 205 Research Boulevard

The Diagnostic Instrumentation and Analysis Laboratory (DIAL) has established a tradition of excellence in diagnostic research at Mississippi State University. Funding for DIAL comes primarily from the Office of Technology Development within the Office of Environmental Management in the U.S. Department of Energy (DOE).

DIAL is an interdisciplinary research department in the College of Engineering employing more than 50 professional and support personnel. A number of the professionals hold joint appointments in academic departments in the College of Engineering and the College of Arts and Sciences. DIAL has the distinction of being the longest continuously funded research project in the College of Engineering.

The DIAL facility is a 58,000-square-foot, state-of-the-art building located on eight acres in the Mississippi Research and Technology Park. The Facility houses 1 faculty and administrative offices, two classrooms, a 100-seat auditorium, a machine shop, a high-bay test area, 16 research laboratories, and numerous graduate student offices.

DIAL's research program includes the development and application of advanced diagnostic systems, analytical model development and validation, test facilities process development, and onsite field measurement and analysis. DIAL's staff has expertise and experience using their instruments in the field to make diagnostic measurements at government-sponsored development facilities, at commercial power facilities, and in industrial facilities. DIAL researchers are meeting the challenges of the future by providing diagnostic support for environmental management projects in a variety of diverse venues.

John Plodinec, Ph.D., Director

Charles A. Waggoner, Ph.D., Deputy Director

ENGINEERING RESEARCH CENTER (ERC)

Main Office: 2 Research Boulevard

Branch Office: Building 1103, Stennis Space Center

The Engineering Research Center was created in 1990 by the University and the National Science Foundation as an interdisciplinary research center within the College of Engineering. Its primary mission was to enhance global competitiveness of United States industry by reducing the time and cost necessary for complex field simulations for engineering analysis and design. Such problems were among the computational grand challenges of the nation’s High Performance Computing and Communication Program and have been cited by DoD and DoE as critical technologies for the 1990's and beyond. Only a close collaboration among computational engineers, computer scientists and engineers, mathematicians and application engineers can achieve the necessary advances. The ERC was formed to provide such a cross-disciplinary environment to support this research.

With the foundation of computational engineering, computational science, high performance computing, computational mathematics, and visualization established to address the field simulation problems, the ERC has expanded in size and domain. Computational field simulation of fluid dynamics, structural mechanics, and electromagnetics in problem domains such as aircraft, ships, and submarines, automobiles, pollutant transport, water resources, earthquakes, buildings, oceans, human hearts, and bronchial tubes are addressed by researchers in the center. Researchers are also addressing improved simulation algorithms, and new computational methodologies. ERC researchers are collaborating with researchers of the Remote Sensing Technologies Center to integrate sensed data into simulations with researchers of the Life Sciences and Biotechnology Institute in the area of computational biology, and with researchers of the Water Resources Research Institute in computational approaches to water and environmental issues.

With the growth of the research in ERC, computational engineering and computational science was identified in 2000 as one of the priority areas of the University. In 2001, the mission of the ERC was revised and expanded. The ERC is to serve the University as "an institute for the advancement of computational engineering and science through research, education, and collaboration with industry and government."

With the new role, several research centers within the ERC have been formed. These are dynamic organizations that will be redefined as opportunities and research needs change. The current research groups within the ERC with their missions are as follows:

Computational Simulation and Design Center: to serve the U.S. Government and industry through research and development of advanced computational simulation design systems to both enable and support designers in simulation, design, and certification of land, sea, air and space vehicular systems.

Center for Computational Systems: to enhance the applicability and usability of simulations involving interacting physical, chemical, biological, and engineering phenomena by developing integrated computational environments and cross-cutting tools that synergistically couple information technology with computational science and engineering.

Computational Geospatial Technologies Center: to develop the science and knowledge base for creating information from data with a geospatial context (e.g., geospatial of geoscience) focused in the measurement, information extraction, modeling, visualization, and knowledge discovery technologies used in these data in application areas that involve atmosphere, ocean, and land processes.

Center for DoD Programming Environment and Training: to bring research results and expertise to bear in collaborative assistance and training for DoD users as part of the DoD High Performance Computing Modernization Program (HPCMP). In collaboration with several other universities and private companies, this center addresses the needs of the four DoD Major Shared Resource (supercomputing) Centers.

David Marcum, Ph.D., Interim Executive Director and Interim Director, Computational Simulation Design Center

David Thompson, Ph.D., Interim Director, Center for Computational Systems

Roger L. King, Ph.D., Director, Computational Geospatial Technologies Center

J. Donald Trotter, Ph.D., Interim Director, Center for Advanced Vehicular Systems

Joe F. Thompson, Ph.D., Director, Center for DoD Programming Environment and Training

Boyd Gatlin, Ph.D., Coordinator of Education and Communication Services

EMERGING MATERIALS RESEARCH LABORATORY (EMRL)

OFFICE: 412 Simrall Engineering Building

The Emerging Materials Research Laboratory (EMRL), a unit within the Department of Electrical and Computer Engineering, was established to serve as a center of development in the State of Mississippi in the field of wide-bandgap semiconductor technology. This exciting field is where the next generation of advanced semiconductor devices will be developed, and EMRL will ensure that the State of Mississippi plays an active role in this important field of research.
The Emerging Materials Research Laboratory is housed in a class 10,000 clean room with class 1,000 work stations. The principal equipment of EMRL is a high-temperature, RF-induction-heated Chemical Vapor Deposition (CVD) system for growing state-of-the-art single-crystal silicon carbide. Materials characterization capabilities include electrical characterization and photoluminescence spectroscopy.

Michael S. Mazzola, Ph.D., Director

GLOBAL CENTER for DESICCANT TECHNOLOGY (GCDT)

Office: 210 Carpenter Engineering Building

The Global Center for Desiccant technology is a partnership of equipment manufacturers, users, utilities, and academia to foster research, development, validation, design, and applications of gas-fired desiccant technology. The Center will pursue desiccant topics collectively funded by affiliates and will make such information available to the HVAC industry. Additionally, research into topics of a proprietary nature and equipment testing with confidentially maintained are possible by contract with individual sponsors.

B. Keith Hodge, Ph.D., Director
Carl James, Ph.D., Associate Director

HIGH VOLTAGE LABORATORY (HVL)

Office: 115 Simrall Engineering Building

The Mississippi State University High Voltage Laboratory is a part of the Department of Electrical and Computer Engineering and serves as an independent, non-industrial, university center for high voltage engineering. The mission of the High Voltage Laboratory includes the following: research, evaluation/testing, and education activities. The principal objective of this multi-purpose laboratory is to meet the research and evaluation/testing needs of industry, utilities, and government, and to provide the necessary environment for an academic program associated with high voltage engineering.

B. Keith Hodge, Ph.D., Director

The main laboratory of the High Voltage Laboratories has a floor area of 33.5m by 24.5m and a minimum ceiling height of 15.2m. This is the largest high voltage laboratory among North American universities. This unique laboratory is comparable in size to many industrial facilities and is equipped with the following energy sources: 300kV, 57kV lightning switching impulse generator; 60Hz, 1000kV, 100kV kVA conventional test transformer, 150kV, 250kV transformer test sets; a 1050kV, 7kW dc test set; and a portable IMJ current generator that can deliver a 2.00-kA lightning impulse.

Current research projects in the area of high voltage engineering include: lightning protection of electrical power transmission and distribution lines and substations; an electrical breakdown mechanism in high voltage polymer insulation; lightning impulse performance of composite insulation; electrical degradation of high voltage polymer insulators; and lightning protection of marine vehicles.

The High Voltage Laboratory frequently offers short courses in the area of high voltage engineering. The lecturers at the various short courses are recognized as outstanding experts in their field of high voltage engineering. They are from the U.S. as well as internationally recognized institutions and industries.

G. Marshall Molen, Ph.D., Director

INDUSTRIAL ASSESSMENT CENTER (IAC)

Office: 210 Carpenter Engineering Building

The primary mission of the Industrial Assessment Center is to serve the energy-related needs of small and medium-sized manufacturers within a geographic radius of approximately 150 miles of the Mississippi State University Campus. This is accomplished by analyzing the operating characteristics and energy requirements of manufacturing facilities to identify and recommend specific opportunities to conserve energy and/or utilize alternate energy sources, to improve productivity and minimize waste production, and to report the findings to the manufacturer together with estimates of their implementation costs, payback periods, and returns on investment. The Center fulfills its mission through site visits to plants which are carried out by the Center director or student teams under the supervision of the assistant director.

B. Keith Hodge, Ph.D., Director

MISSISSIPPI CENTER for ADVANCED SEMICONDUCTOR PROTOTYPING (MCASP)

Office: 103 Edwards Laboratory

The Mississippi Center for Advanced Semiconductor Prototyping (MCASP), a unit within the Department of Electrical and Computer Engineering was established in 1999 to serve as a prototyping laboratory serving both government and private industry for wide-bandgap semiconductor devices. Mississippi State University is a leader in wide-bandgap silicon carbide technology, and MCASP helps to move this important new semiconductor technology from the research laboratory to the military and commercial sectors.

MCASP is temporarily housed in the Edwards Laboratory, a stand-alone facility on the east side of the MSU campus, while a new facility is being constructed in the Mississippi Research and Technology Park, just north of the MSU campus. The principal equipment of MCASP is a Chemical Vapor Deposition system for growing state-of-the-art epitaxial semiconductor layers. Lam 9900 Plasma Enhanced Chemical Vapor Deposition System, Lam 9400 Inductively Coupled Plasma Etching System, Varian E-Beam Deposition System, Hitachi 808C Electron Microscope, a GCA 630B Wafer Step-By-Step, and a fully automated Keithley Semiconductor Test and Characterization system. MCASP maintains active collaborations with industry, government, and academia world wide. Further information is available at www.mcasp.mstate.edu or by calling (662) 325-2500.

Jeffery B. Casady, Ph.D., Director and Assistant Professor of Electrical and Computer Engineering
Doug Seale, Laboratory Manager

MISSISSIPPI ENERGY RESEARCH CENTER (MERC)

Office: 210 Carpenter Engineering Building

Sponsored by the Division of Energy within the Mississippi Economic and Development Authority, the purpose of the Mississippi Energy Research Center is to develop, implement and coordinate energy and energy-related research programs in Mississippi. This mission is accomplished by developing appropriate policies and procedures (a) for identification of priority research problems (b) for collaborating with local and state government agencies, utilities, industry, other universities, federal government agencies and the Legislature in the formation of their research programs (c) for selection of projects to be funded; and (d) for the transfer of technology which is produced by the research.

B. Keith Hodge, Ph.D. Director

RASPET FLIGHT RESEARCH LABORATORY (RFRL)

Office: Starkville Airport

The Raspet Flight Research Laboratory (RFRL) is one of the premier university flight research facilities in the country. Established at Mississippi State University over 50 years ago by Dr. August Raspet, this aeronautical research laboratory possesses a rich heritage in full-scale flight vehicle develop-
ment and test, advanced composites development and fabrication, computer controlled manufacturing, and test of prototype composite applications. The RFRL is an integral part of the Department of Aerospace Engineering. In addition to externally funded research, the RFRL has historically made significant contributions to the educational goals of the department and the University as a superior training ground and research facility for MSU students at the graduate and undergraduate level. Among universities engaged in aeronautical research, the RFRL is distinguished as one of the very few with the capability to design, build, and test prototypes of full-scale manned and unmanned aircraft. The RFRL has engaged in a broad spectrum of composite prototyping and flight test activities over the past years to include development and fabrication of the first turbine powered composite aircraft, the XV-11A (1959), the development of a Kevlar STOL wing for the SV-11A (1981), a Kevlar towed RPV for SOCOM (1984), a graphic wing and horizontal tail for a Beech A-36 (1986), the first all-graphite turbofan business jet (Honda UA-5 1989), a close range UAV for Westinghouse (1990), a one-third-scale mock-up of X-30 National AeroSpace Plane (NASP) (1992) and a series of LoFlyte wind tunnel models (1994).

D. SERVICE UNITS

AGRIBUSINESS INSTITUTE

100 Lloyd-Ricks Building

The Agribusiness Institute has as its primary responsibility the coordination of teaching, research and service activities in the broad area of agribusiness. Its mission is to assist agribusinesses through teaching, research and service. The Agribusiness Institute is a joint venture between the Colleges of Agriculture and Life Sciences and Business and Industry. Association with the Institute is available to faculty and professional staff of the university who are actively engaged in agribusiness instruction, research and service. Adjunct affiliation with the Institute is available to individuals involved in both private and public sector agribusiness activities external to Mississippi State University.

The major functions of the Institute are as follows:

(1) To provide the operational vehicle for administering appropriate academic programs in agribusiness jointly conducted by the College of Agriculture and Life Sciences, the College of Business and Industry, and the Graduate School.

(2) To stimulate, develop, and coordinate regional, national and international research and service programs in agribusiness management.

(3) To seek external support from agribusiness firms and governmental agencies to advance research, internships, and continuing education programs in agribusiness management.

(4) To assist faculty members associated with the Institute in broadening research support in agribusiness.

(5) To serve as a vehicle of communication for students, staff, industry and government agencies with an interest in agribusiness management.

M. Darren Hudson, AB Coordinator

DIVISION of AGRICULTURE, FORESTRY, and VETERINARY MEDICINE

BIOMEDICAL RESEARCH CENTER

The Biomedical Research Center, established in FY 1994 focuses on use of animal models for new and advanced areas of technology, such as, for bone regeneration and repair, for testing dietary fiber substitutes, for active compounds for human dietary substitutes, for periodontal disease, and for osteoporosis. The Center also collaborates in its research efforts with major biomedical and pharmaceutical firms developing and evaluating new products and technology for human health care. This research will lead to the commercialization of drugs that contribute to the quality of life for middle-age and geriatric people. In addition, the BRC has tested dietary substitutes that have anti-cancer and cardiovascular benefits. Appropriate new animal models are developed and standardized in the area of drug evaluation.

J. Greg Boring, DVM, Director

CENTER for ENVIRONMENTAL HEALTH SCIENCES

1102 Wise Center

The Center for Environmental Health Sciences provides a focus for university activities directed towards maintaining and improving the quality of environmental health in Mississippi, the nation, and the world. Its goal is to facilitate the development, implementation, and administration of focused and of multi-disciplinary efforts in research, training, and service in the areas of environmental health, with consideration of both human health and ecosystems. One of the primary focus areas in environmental health is discerning the effects of environmentally relevant chemicals on organisms and on ecosystems, and, conversely, the effects that organisms and ecosystems have on these chemicals. The Center provides an interdisciplinary mechanism for uniting researchers from different MSU administrative units to work on common problems which require interdisciplinary solutions. Participants have appointments in the College of Veterinary Medicine, the College of Arts and Sciences, the Mississippi Agricultural and Forestry Experiment Station, the Mississippi State Chemical Laboratory, and the School of Forest Resources. Major disciplines represented are biochemical toxicology, neurotoxicology, immunotoxicology, analytical chemistry, pharmacology, water quality, ecology, microbiology (bioremediation), and food safety. The Center unites MSU faculty members with appropriate expertise into teams which can respond to environment health issues when general or specific needs arise.

Janice E. Chambers, Ph.D., D.A.B.T., Director

ANALYTICAL SUPPORT and FOOD SAFETY LABORATORY

Office: Wise Center

The Analytical Support and Food Safety Laboratory (ASFSL) provides specialized chemical analyses for faculty of Mississippi State University. Where the interests of the faculty and agencies outside of Mississippi State University coincide, the ASFSL will also provide analyses for these agencies. The agencies include industry, agribusiness, municipal, county, state, and federal governments. Operating procedures comply with Good Laboratory Practices and regulations of federal agencies. The laboratory staff participant with university faculty in preparing proposals for funding and will serve as a resource for graduate training on funded projects. The laboratory is located in the College of Veterinary Medicine’s Wise Center.

Scott Boone, Ph.D., Assistant Laboratory Director

Kristina Hansson Lebbin, Laboratory Project Manager

FLOW CYTOMETRY FACILITY

Office: Wise Complex, Room R2217

The Flow Cytometry Facility is a University-wide facility supported by the College of Veterinary Medicine. The facility has a two-fold purpose of providing flow cytometry support of scientists at Mississippi State University and consultation on research problems involving flow cytometry. The facility is staffed by two trained technicians.

A. Jerald Ainsworth, Ph.D., Director
Mississippi State University has an active program of research and teaching in the broad area of Food Science and Technology and Food Safety. Research in Animal and Dairy Science, Human Science, Poultry Science, Microbiology, Biochemistry and Molecular Biology, Biotechnology, Dairy Manufacturing, Human Nutrition, Agricultural Economics, Seafood and Catfish Processing, Sensory Analysis, Agricultural and Biological Engineering, Horticultural Products Processing, Enology, and Food Engineering has been in progress for several years. Since 1966, Mississippi State has had an undergraduate teaching program and a Master of Science program in Food Science and Technology. The SITL supports resident instruction offered by the Department of Forestry through transfer of research results into courses such as Forest Photogrammetry, Remote Sensing Applications, and GIS for Natural Resource Management. Graduate programs are offered that lead to Masters and Doctor of Philosophy degrees with concentration in SIT.

For more information on the SITL, research, or academic programs, contact:
Dr. David L. Evans, Department of Forestry
MISSISSIPPI DEPARTMENT OF AGRICULTURE and COMMERCE - BUREAU OF PLANT INDUSTRY
Office: Mississippi Department of Agriculture and Commerce Building on Stone Boulevard

The Bureau of Plant Industry is a division of the Mississippi Department of Agriculture and Commerce.

The Bureau is established under the Mississippi Plant Act, Sections 69-25-1 through 69-25-47, Mississippi Code 1972, and is responsible for protecting the agricultural and horticultural interests of the state from the introduction into and dissemination within the state of injurious insects and plant diseases. The Bureau of Plant Industry is the Plant Protection and Quarantine Division of the Mississippi Department of Agriculture and Commerce. An Advisory Board is established by law to advise the Commissioner of Agriculture on matters regarding the Bureau, especially in adopting rules and regulations.

The Bureau of Plant Industry Advisory Board is composed of the following: the State Chemist; the head of the Department of Entomology and Plant Pathology, Mississippi State University; the head of the Department of Plant and Soil Sciences, Mississippi State University; Director of Agriculture and Applied Sciences, Alcorn State University; and for a period of two years, the following: one Soil Conservation District Commissioner appointed by the Commissioner; one resident of Mississippi who is a licensed landscape contractor; one resident of Mississippi who is a restricted use pesticide registrant or an employee of such person, appointed by the Commissioner; one resident of the state of Mississippi who is a commercial pesticide applicator licensed by the Bureau of Plant Industry, appointed by the Commissioner; one resident of the state of Mississippi who is a retail nursey stock certifier; one resident of the state of Mississippi who is a wholesale or retail horticulturist, appointed by the Commissioner; and one resident of the State of Mississippi who is either a wholesale or retail horticulturist, appointed by the Commissioner; and one resident of the State of Mississippi who is a licensed landscape contractor, appointed by the Commissioner.

The Bureau is responsible for administration and enforcement of statutes as follows:

1. The Mississippi Plant Act, - Sections 69-25-1 through 69-25-47.
5. Crop Spraying and Licensing of Aerial Applicators - Sections 69-21-1 through 69-21-27.
8. Mississippi Soils Amendment Law - Sections 75-45-151 through 75-45-195.
9. Mississippi Pure Seed Law, - Sections 69-3-1 through 69-3-27.
10. Mississippi Pure Seed Law, - Sections 69-3-1 through 69-3-27.
11. Mississippi Soil and Plant Amendment Law, - Sections 69-24-1 through 69-24-27.

Major Programs

1. Under the provisions of the Mississippi Plant Act, plant quarantine programs are in operation, including quarantine programs for inspection and certification of nursery stock, sweet potatoes and various other plants, crops, machinery, and other articles which may be responsible for the spread of injurious insects and plant disease.
2. Regulation of Professional Services - Receiving fees for entomological, plant pathological, horticultural, tree surgery and weed control work, customs services, and soil classifiers. This statute requires persons engaged in the above mentioned professions to be licensed by the Bureau in order to practice. The Bureau of Plant Industry is the Plant Protection and Quarantine Division of the Mississippi Department of Agriculture and Commerce. An Advisory Board is established by law to advise the Commissioner of Agriculture on matters regarding the Bureau, especially in adopting rules and regulations. The Bureau of Plant Industry Advisory Board is composed of the following: the State Chemist; the head of the Department of Entomology and Plant Pathology, Mississippi State University; the head of the Department of Plant and Soil Sciences, Mississippi State University; Director of Agriculture and Applied Sciences, Alcorn State University; and for a period of two years, the following: one Soil Conservation District Commissioner appointed by the Commissioner; one resident of Mississippi who is a licensed landscape contractor; one resident of Mississippi who is a restricted use pesticide registrant or an employee of such person, appointed by the Commissioner; one resident of the state of Mississippi who is a commercial pesticide applicator licensed by the Bureau of Plant Industry, appointed by the Commissioner; one resident of the state of Mississippi who is a retail nursey stock certifier; one resident of the state of Mississippi who is a wholesale or retail horticulturist, appointed by the Commissioner; and one resident of the State of Mississippi who is either a wholesale or retail horticulturist, appointed by the Commissioner; and one resident of the State of Mississippi who is a licensed landscape contractor, appointed by the Commissioner.

The Bureau is responsible for administration and enforcement of statutes as follows:

1. The Mississippi Plant Act, - Sections 69-25-1 through 69-25-47.
5. Crop Spraying and Licensing of Aerial Applicators - Sections 69-21-1 through 69-21-27.
8. Mississippi Soils Amendment Law - Sections 75-45-151 through 75-45-195.
9. Mississippi Pure Seed Law, - Sections 69-3-1 through 69-3-27.
10. Mississippi Pure Seed Law, - Sections 69-3-1 through 69-3-27.
11. Mississippi Soil and Plant Amendment Law, - Sections 69-24-1 through 69-24-27.

Major Programs

1. Under the provisions of the Mississippi Plant Act, plant quarantine programs are in operation, including quarantine programs for inspection and certification of nursery stock, sweet potatoes and various other plants, crops, machinery, and other articles which may be responsible for the spread of injurious insects and plant disease.
2. Regulation of Professional Services - Receiving fees for entomological, plant pathological, horticultural, tree surgery and weed control work, customs services, and soil classifiers. This statute requires persons engaged in the above mentioned professions to be licensed by the Bureau in order to practice. The Bureau of Plant Industry is the Plant Protection and Quarantine Division of the Mississippi Department of Agriculture and Commerce. An Advisory Board is established by law to advise the Commissioner of Agriculture on matters regarding the Bureau, especially in adopting rules and regulations. The Bureau of Plant Industry Advisory Board is composed of the following: the State Chemist; the head of the Department of Entomology and Plant Pathology, Mississippi State University; the head of the Department of Plant and Soil Sciences, Mississippi State University; Director of Agriculture and Applied Sciences, Alcorn State University; and for a period of two years, the following: one Soil Conservation District Commissioner appointed by the Commissioner; one resident of Mississippi who is a licensed landscape contractor; one resident of Mississippi who is a restricted use pesticide registrant or an employee of such person, appointed by the Commissioner; one resident of the state of Mississippi who is a commercial pesticide applicator licensed by the Bureau of Plant Industry, appointed by the Commissioner; one resident of the state of Mississippi who is a retail nursey stock certifier; one resident of the state of Mississippi who is a wholesale or retail horticulturist, appointed by the Commissioner; and one resident of the State of Mississippi who is either a wholesale or retail horticulturist, appointed by the Commissioner; and one resident of the State of Mississippi who is a licensed landscape contractor, appointed by the Commissioner.

The Bureau is responsible for administration and enforcement of statutes as follows:

1. The Mississippi Plant Act, - Sections 69-25-1 through 69-25-47.
5. Crop Spraying and Licensing of Aerial Applicators - Sections 69-21-1 through 69-21-27.
8. Mississippi Soils Amendment Law - Sections 75-45-151 through 75-45-195.
9. Mississippi Pure Seed Law, - Sections 69-3-1 through 69-3-27.
10. Mississippi Pure Seed Law, - Sections 69-3-1 through 69-3-27.
11. Mississippi Soil and Plant Amendment Law, - Sections 69-24-1 through 69-24-27.
To carry out its various functions, the Bureau of Plant Industry has a headquarters staff at Mississippi State consisting of technically trained personnel and the needed secretarial force. A staff of district entomologists is assigned to territories on a basis of work loads in those areas.

**Headquarters Staff:**
- **Edwin G. Dyess, B.S., M.S.,** Director and State Entomologist
- **Mike Tagert, B.S., M.S.,** Deputy, Director
- **Harry Fulton, B.S., M.S.,** Director Pesticide Division & State Apiarist
- **Lee Daughtry, B.S.,** Director, Seed Division
- **Harry Ballard, B.S.,** Director, Feed and Fertilizer & Lime Programs
- **James Haskins, B.S., M.S.,** Branch Director, Commercial Certification and Pest Control Licensing
- **Benny Graves, B.S., M.S.,** Branch Director, Plant Certification
- **Tommy McDaniel, B.S., M.S.,** Branch Director, Private Certification, Dealer Licensing and EPA Programs
- **John Corbon, B.S., M.S.,** Branch Director, U.S.D.A. Programs
- **Patti Drapala, B.A., B.B.A., M.P.P.A.,** Director, Public Relations
- **Keith Davis, B.S., M.S.,** Branch Manager, Pesticide Compliance and EPA Programs
- **Rusty Crowe, B.S., M.S.,** Environmental Scientist III, Pesticides, Groundwater, Endangered Species, Worker Protection Standard, and Waste Pesticide Collection and Container Disposal Programs

**District Entomologists:**
- **Randy Boyle, B.S.,** Mississippi State

**MISSISSIPPI STATE CLIMATOLOGY LABORATORY**

Office: 314 Hilbun Hall

The MSU Climatology Laboratory (MSUCL) was created in 1987 to supply the university and the surrounding area with real-time weather information. The Climatology Laboratory is also the focal point of the Broadcast Meteorology Program (BMP) and the Operational Meteorology Program (OMP) within the Department of Geosciences.

The Climatology Laboratory is equipped with state-of-the-art meteorological hardware and software systems in support of the teaching, research, and service missions of the department. The Laboratory includes four WSI Weather Producer workstations and four Weather Central Genesis workstations used for the production of television and radio weathercasts, thirteen Celeron 550Mhz workstations, and a Baron Radar system featuring FasTrac/NexTrac and VIPIR which processes near-real time radar data from Columbus (MS), Jackson (MS), Memphis (TN), and Birmingham (AL). An Automated Weather Systems instrument group provides instantaneous weather conditions and video of the current weather from atop Hilbun Hall.

The Climatology Laboratory also houses our Broadcast Studio, fully equipped with linear and non-linear digital editing equipment for the production of television weathercasts.

The MSUCL also serves as a base of operations for the North Mississippi Severe Storms Intercept Team (NOMISSIT). NOMISSIT members are highly-trained operational meteorology students who pursue severe local storms in the field in order to provide the National Weather Service, and local community, with the most up-to-date severe weather information possible. Annual field expeditions are undertaken; to the Great Plains to survey severe storms during the spring, and to the Gulf and Atlantic coast in pursuit of hurricanes during the late summer and fall.

The MSU Climatology Laboratory provides a valuable resource for undergraduate and graduate students, as well as off-campus students through the Division of Continuing Education, in support of their education and training as operational meteorologists. Graduates of our program go on to careers in broadcast meteorology, private industry, or government service.

Daily weather forecasts developed in the Climatology Laboratory are provided to the public through the Bulldog Forecast Line (662-325-2915); radio station WMSV (FM 91.1); through television broadcasts on Bulldog Weather (MSU), and WOVB-TV (Starkeville); and through live “webcasts” on the World Wide Web.

Research supported by the Climatology Laboratory includes topics in Broadcast Meteorology, human biometeorology, synoptic meteorology, tropical meteorology, severe local storms, and influences of mesoscale land-surface-atmosphere interactions on deep convection. The Lab also supports the Office of the State Climatologist and is opened on a limited basis to tour groups.

**MISSISSIPPI STATE SEED TESTING LABORATORY**

The State Seed Testing Laboratory is a facility operated by the State Department of Agriculture in cooperation with Mississippi State University. Its primary function is to test official seed samples submitted by inspectors of the State Department of Agriculture in connection with the enforcement of the Mississippi Pure Seed Law. The laboratory also serves as the official testing laboratory for the Mississippi Seed Improvement Association.

In addition, the laboratory operates as a service department for farmers and seed merchants. Seeds submitted for analysis are tested for purity, germination and noxious weeds. Seed merchants are charged a nominal fee. Resident farmers are entitled to have one sample of each kind tested free in any calendar year, but for each additional sample a small fee is charged.

The State Seed Testing Laboratory is in the Mississippi Department of Agriculture and Commerce Building on the west side of Stone Boulevard along with the Division of Plant Industry.

**USDA AGRICULTURAL RESEARCH SERVICE**

**Southern Insect Management Research Unit**

The mission of the Integrated Pest Management Research Unit is to expand the knowledge of the biology of various cotton insects and turn this knowledge into sound, profitable technology for detecting, estimating, suppressing or eradicating populations of pest species. In the technologies developed, a major emphasis is placed on alternative control methods that avoid dependence on pesticides alone. The current program is in keeping with the ARS position on Integrated Pest Management.

- **Eric J. Villavaso, B.S., M.S., Ph.D.,** Research Entomologist
- **William L. McGovern, B.A., M.S., Ph.D.,** Entomologist

**Biological Control and Mass Rearing Research Unit**

The mission of the Biological Control and Mass Rearing Research Unit is to conduct basic and applied research on the production and use of natural enemies for control of agricultural pests. Emphasis is placed on development of in vivo and in vitro mass rearing methods and technology. Related research is on field biology/ecology and economic use of parasites, predators and pathogens as biological control agents. Methods that include classical biological control (introduction of exotic natural enemies), augmentation, and conservation of natural enemies are developed and integrated with other pest management techniques to help solve pest problems.

- **Robert G. Jones, B.S. M.S., Ph.D.,** Entomologist (APHIS)
329 MISSISSIPPI STATE UNIVERSITY

Donald A. Nordlund, B.S.F.R., M.S., Research Leader and Supervisory Research Entomologist
Janet Alverson, B.S., D.V.M., Ph.D., Research Microbiologist

USDA CROP SCIENCE RESEARCH LABORATORY

In the Crop Science Research Laboratory of the U.S. Department of Agriculture, basic and applied research is conducted by scientists representing many scientific disciplines. The major objectives of the research programs are to provide increased crop production with greater efficiency by developing cropping systems, pest resistant strains with improved agronomic traits, and decision-making models to reduce costs and conserve natural resources.

Major research lines include corn host plant resistance, genetics and precision agriculture, waste management and forage research.

Johnie J. Jenkins, B.S., M.S., Ph.D., Director
Farid Bal'a, B.S., M.S., Ph.D., Microbiologist
Thomas D. Brooks, B.S., M.S., Ph.D., Geneticist
Franklin E. Callahan, B.S., Ph.D., Plant Physiologist
Michael J. Clements, B.S., M.S., Ph.D., Geneticist
Timothy Fairbrother, B.S., M.S., Ph.D., Animal Scientist
Leigh K. Hawkins, B.S., M.S., Ph.D., Plant Physiologist
Paul A. Hedin, B.A., M.S., Ph.D., Collaborator
Jack C. McCarty, Jr., B.S., M.S., Ph.D., Agronomist
James M. McKinley, B.S., M.S., Ph.D., Electronics Engineer
Michael R. McLaughlin, B.S., M.S., Ph.D., Plant Pathologist

USDA SOUTHERN RESEARCH STATION

Two research units of the Southern Research Station, U.S. Department of Agriculture, Forest Service, are located in the Forestry Sciences Laboratory, 201 Lincoln Green, in the southwest portion of the campus, and two in the Forestry Building. Basic and applied research on the physiology and technology of seeds of forest tree species is conducted by the staff of the Tree Seed Project. The Forest Inventory and Analysis Unit personnel conduct the continuing forest resources survey for the mid-south states. The Wood Products Insect Survey Unit personnel conduct basic and applied research on termites.

Center for Bottomland Hardwoods Research - Seed Research
Franklin T. Bonner, B.S., M.F., D.F., Plant Physiologist, Emeritus
J. A. Vozzo, B.S., M.S., Ph.D., Plant Physiologist

USDA SOUTH CENTRAL POULTRY RESEARCH LABORATORY

The South Central Poultry Research Laboratory of the U.S. Department of Agriculture was dedicated May 29, 1965. Located on the west side of the campus on Spring Street, it is a center for the study of disease, environmental, and waste management factors that affect the poultry industry. Research facilities include the office-laboratory building, environmental chambers, disease isolation units and seven poultry research houses. The research is being conducted by specialists in the fields of Engineering, Molecular Biology, Poultry Science, and Veterinary Science of Agricultural Research Service, U.S.D.A., in cooperation with Mississippi State University and other interested universities.

Scott L. Branton, D.V.M., M.S., Ph.D., Veterinary Medical Officer; Acting Research Leader
Stephanie D. Collier, B.S., M.S., Ph.D., Molecular Biologist
Dana M. Miles, B.S., M.S., Chemical Engineer
John D. Simmons, B.S., M.S., Ph.D., Agricultural Engineer
Jeff D. Evans, B.S., M.S., Ph.D., Molecular Biologist
William B. Roush, B.S., M.S., Ph.D., Poultry Management

USDA/APHIS/WS NATIONAL WILDLIFE RESEARCH CENTER

103 Scales Building

The National Wildlife Research Center (NWRC) is the research arm of the Wildlife Services program of the U.S. Department of Agriculture/Animal and Plant Health Inspection Service. NWRC is the U.S. federal organization responsible for conducting research to resolve conflicts between humans and wildlife. The NWRC Mississippi field station was established by Congressional mandate in 1988 to develop methods for reducing bird depredations at aquaculture farms in the southern United States. Personnel at the NWRC Mississippi field station study the biology, impact, and management of a variety of captive and free-ranging avian species, including cormorants, pelicans, and wading birds.

Scott Werner, Ph.D., Project Leader/Supervisory Wildlife Biologist (Research)
D. Tommy King, M.S., Research Wildlife Biologist
Susan C. Smith, B.S., Program Support Assistant

Brian S. Dorr, M.S., Biological Science Technician (Wildlife)
Paul B. Fioraneli, B.S., Biological Science Technician (Wildlife)
Billy Scott Woodruff, B.S., Biological Science Technician (Wildlife)

USDA/APHIS/ WILDLIFE SERVICES

200 Thompson Hall

The U.S. Department of Agriculture, Animal and Plant Health Inspection Service, Wildlife Services (WS) program is legislatively mandated to provide assistance in the prevention and control of wildlife damage. WS programs are directed toward the protection of agriculture, property, industrial resources, and public health and safety, and natural resources. Services include technical assistance or direct operational control. Technical assistance consists of advice, recommendations, training, information transfer, or materials provided to others for the resolution of problems. In contrast, direct operational control activities are conducted by WS personnel through cooperative wildlife damage management programs. These two types of assistance are available upon request to individuals or government agencies.

Kris Godwin, B.S., M.S., State Director
Kevin Sullivan, B.S., M.S., District Supervisor
UNIVERSITY PRESS of MISSISSIPPI

The University Press of Mississippi was founded in 1970 to encourage the dissemination of the results of research and study through the publication of scholarly works. Functioning as the scholarly publishing arm of the state-supported universities in Mississippi, the University Press is governed by a Board of Directors made up of two representatives from each of the eight state universities, one representative from the Board of Trustees of Institutions of Higher Learning, and the director of the Press, ex officio.

The University Press normally publishes approximately fifty books each year. Primary areas of interest are Mississippi history, literature, and culture, but manuscripts in all areas of study are welcomed.

Administrative offices of the University Press are located in the Education and Research Center of Mississippi, 3825 Ridgewood Road, Jackson, Mississippi.

DISCLOSURE STATEMENT
Student Right-to-Know Act (P.L. 101-542)

Graduation Rate of Entering Freshmen

The graduation rate for all students entering Mississippi State University as first-time freshmen during the 1995-96 academic year was 53.0 percent. This graduation rate represents the percentage of students entering Mississippi State University as first-time (i.e. new) full-time degree-seeking freshmen during the 1995-96 academic year who subsequently were awarded baccalaureate degrees by Mississippi State University within six calendar years (i.e., through August 2001). This rate was calculated under definitions and procedures established by the National Collegiate Athletic Association (NCAA), and reported to the NCAA on the University’s 2001 Graduation Rate Disclosure Form in March 2002.

Specific regulations and guidelines for the calculation, reporting, and disclosure of graduation rate information required under the Student Right-to-Know Act have not yet been issued by the Department of Education. Definitions of the entering student cohort in the Department of Education’s proposed regulations (Federal Register, July 10, 1992) and the NCAA Graduation Rate Disclosure Form differ slightly. However, the University has determined that the graduation rate information in the annual NCAA report is substantially comparable to the information required under the Student Right-to-Know Act, and is reporting that information at this time pending release of final federal reporting regulations. The graduation rate information reported above is accurate and complete as of the date of publication of the 2003-04 Bulletin.
